Foreword

The Gods Who Walk among Us is a most enlightening and insightful book on a subject about which we need to know more. It graphically describes the gods of this world and their wide-ranging influence upon individuals and upon peoples. This book is most unusual and timely. For the most part, today's generation is unaware of, even blind to, the dangers of ideas and teachings regarding the spirit-world that have become so commonplace. Demons, worship of demons, occult activities, and the like, have been topics somewhat apart from evangelical believer's concerns. Most of us have given little thought or study to such things. We have felt almost untouched or untainted by them. How dangerously mistaken we have been.

Authors Thomas Horn and Donald Jones have researched the subject remarkably well. Not only have they done a superb job of identifying the gods of antiquity and their functions, but they have, in scholarly fashion, shown that these same gods command the attention and allegiance of multitudes of modern men and women. While Horn and Jones suggest that the names of some of the gods may have been altered to a degree, they demonstrate quite conclusively that their

nefarious activities have remained constant. After reading this book, we are suddenly aware of the “ever-present darkness” and find that we can no longer afford to be blind to what we have previously ignored. It is evident that pagan worship and rituals are going on today. Of particular interest is the revelation that all of Egypt’s plagues were direct affronts to her recognized and revered deities. In every instance, we see how Jehovah effectively demonstrated his vast and unequalled superiority.

Horn and Jones recognize that the gods of this world are, in every instance, and in every manifestation, representations of the evil supernatural; in fact, they are representations of Satan himself. They believe, and with good reason, that the New Age Movement is, at its core, a cleverly devised scheme whereby Satan is seeking to acquire the allegiance of all of mankind; they provide adequate illustration to support this thesis. The suggestion that possibly some things that occur during worship times in our churches today are similar to things which happened in pagan worship is, to say the least, frightening. Horn and Jones ascribe a measure of credibility to UFO sightings, and are persuaded that the evil supernatural is making alarming and ever-increasing inroads into modern culture. They believe this sets the stage for the Antichrist. This book is an eye-opener for some of us who grew up in a day when most people believed in the God of the Bible, even if they did not strive to obey Him. No doubt we were simplistic, even naïve about the spirit world, especially the evil spirit world. No longer! It is time to pay attention to what Horn and Jones say, for to be well-informed is to have the possibility

of being well- prepared. We are at the end of the age. The coming of our Lord is near. Let us sound the trumpet in Zion!

R. L. Brandt

Acknowledgment

I wish to acknowledge the following people without whose help and inspiration this book would not have been possible: Dr. Donald C. and Joyce Jones for their willingness to work with me on this project. Pastor Rance and Jaynie Kinser for their unconditional love and support. Judy Vorfeld for her tireless technical and research assistance. R.L. Brandt for providing a thoughtful forward. Superintendents William O. Vickery and William I. Gallaher for their steadfast leadership example over the years. My mother Virginia (Sally) for a lifetime of love and support. My sister Vida for sharing deeply personal information on the possible spiritual aspects of the UFO abduction phenomenon. My big brother Clarence (Amil) for illustrating what it means to be a pastor. And to my wife Juanita, and our children Althia, Joe, and Donna, for being the greatest family on earth.

The Origin of the Gods

Birds skipped among groves of date palms along the marshy banks of the Euphrates in the year B.C. 3500. As the sun arose above Sumer, the alluvial desert of the Middle East came alive with agricultural activity. In a valley forged between the twin rivers of the Tigris and the Euphrates, magnificent walled cities awoke to the chatter of busy streets and marketplaces. In what the Greeks would later call “Mesopotamia” (between the rivers), the world’s first great trade center and civilization developed. The opulent Sumerian cities of Ur—the home of Abram—Uruk, and Lagash, had become the economic machines of the ancient Middle East, and industries from as far away as Jericho, near the Mediterranean Sea, and Catal Huyuk, in Asia Minor, competed for the trade opportunities they provided. Laborers from the biblical city of Jericho exported salt to Sumer, and miners from Catal Huyuk prepared obsidian, used in making mirrors, for shipment to the ancient metropolis. But while the prehistoric people of the East looked to the Sumerians for their supply of daily bread, the Sumerians themselves gazed heavenward to the early rising of Utu (Shamash), the all-providing sun god, as he prepared once

Ancient Sumeria/Mesopotamia

again to ride across the sky in his mule-drawn chariot. In B.C. 3500, Utu was not alone among the gods.

By now, the Sumerian pantheon provided the earliest known description of organized mythology, consisting of a complex system of more than 3,000 deities and covering nearly every detail of nature and human enterprise. There were gods of sunshine and rain. There were vegetation gods, fertility gods, river gods, animal gods, and gods of the afterlife. There were the great gods, Enlil (prince of the air), Anu (ruler of the heavens), Enki, (the god of water), and so on. Under these, existed a second level of deities, including Nannar, the moon god, Utu, the sun god, and Inanna, the "Queen of Heaven." But, where did the gods of Sumeria come from?

Since the religion of Sumeria was the first known organized mythology, and would greatly influence the foundational beliefs of the forthcoming nations of Assyria, Egypt, Greece, Rome, and others, this question has interested scholars and historians for more than a millennium. Specifically, where does one find the historical beginning of the ancient gods of Sumeria? Were the Sumerian deities the product of human imagination, or the distortion of some earlier prehistoric revelation? Were they the "mythologizing" of certain ancient heroes, or, as some New Age followers suggest, the result of an extra-terrestrial "alien" visitation, which gave birth to the legends and mythological gods? More importantly, did the gods of Sumeria reflect the emergence of a real and spiritual power operating

through pagan dynamics, or were the gods purely the creation of primitive imagination?

These questions are both fascinating and difficult since the gods and goddesses of ancient Sumeria/Mesopotamia continue to be shrouded in a history of unknown origins. As though, out of “nowhere,” the Sumerians sprang onto the scene over 5,500 years ago, bringing with them the first written language, a corpus of progressive knowledge from complicated religious concepts, and an advanced understanding of astrology, chemistry, and mathematics. The questionable origin of the Sumerian culture has caused some theorists to conclude that the gods of Sumeria, and the subsequent mythologies that grew out of them (Assyrian, Egyptian, etc.), were the diabolical scheme of a regressive and evil “supernatural presence.” If this is true, does the ancient power continue to work within our world? Do primordial and living entities, once worshipped as “gods,” coexist with modern man? There are three competing theories regarding the origin of the early mythological gods: 1) the Euhemerus view; 2) the New Age view; and 3) the Biblical view.

The Euhemerus view was based on the historical theories of the Greek scholar Euhemerus, who claimed that the pagan gods originated with certain ancient and famous kings who were later deified. The more widely accepted theories, the New Age view and the Biblical view, have succeeded in becoming the popular authorities regarding original paganism, and are, therefore, the focus of our attention. What can we learn from these two views?

The New Age View Concerning the Origin of the Gods

A growing doctrine within the New Age Movement claims that the origin of the gods, and the human race, as we know it today, is the direct result of extra-terrestrial (UFO) activity. In the introduction to his bestselling book, *Chariots of the Gods?*, Erich von Daniken, who, it might be argued, is one of the fathers of the New Age Movement related to UFOs, said, "I claim that our forefathers received visits from the universe in the remote past, even though I do not yet know who these extra-terrestrial intelligences were or from which planet they came. I nevertheless proclaim that these 'strangers' annihilated part of mankind existing at the time and produced a new, perhaps the first, *homo sapiens*."¹

As depicted in the Hollywood films *Contact* and *Close Encounters of the Third Kind*, Erich von Daniken's hypothesis took America by storm in the 1960s with the proposition that mankind was possibly the offspring of an ancient, perhaps ongoing, extra-terrestrial experiment. New Age UFO experts like Daniken assert that the gods of mythology may have been themselves evidence of, and a reaction to, an encounter with other-worldly beings. They claim that ancient men would have considered space travelers as gods and would have recorded their arrival, their experiments, and their departure, in hieroglyphs, megaliths, and stone tablets, as supernatural encounter between gods and men. Von Daniken wrote,

While [the] spaceship disappears again into the mists of the universe our friends will

talk about the miracle, 'The gods were here!' . . . they will make a record of what happened: uncanny, weird, miraculous. Then their texts will relate, and drawings will show, that gods in golden clothes were there in a flying boat that landed with a tremendous din. They will write about chariots which the gods drove over land and sea, and of terrifying weapons that were like lightning, and they will recount that the gods promised to return. They will hammer and chisel in the rock pictures of what they had seen, shapeless giants with helmets and rods on their heads, carrying boxes in front of their chests; balls on which indefinable beings sit and ride through the air; staves from which rays are shot out as if from a sun .²

Von Daniken also claimed that the odd appearance of some of the gods, as depicted in various hieroglyphs, (human-like creatures with falcon heads; lions with heads of bulls, etc.) could be viewed as evidence that "aliens" conducted experiments of cloning and cross-mutated ancient people and animals.

Some people accept this part of Von Daniken's hypothesis as a humanistic alternative to the Biblical account of creation. It's uncertain how many people believe such a theory, but a full eighty percent of Americans claim they believe in the possibility of extra-terrestrial life. Some, like the 39 members of the Heaven's Gate cult who committed suicide in Rancho Santa Fe, California because they believed they were being summoned by a UFO trailing the Hale-Bopp Comet, subscribe

Intergalactic New Age Scientist?

to an eerie amalgam of mysticism and conventional religion. Not surprisingly, the growing interest in UFOs and the paranormal has given birth to a host of popular television specials and weekly programs depicting such other-worldly creatures and those who claim to have encountered them. One of the more disturbing aspects of such UFO phenomena are the reports, which continue to come in from around the world, of nighttime abductions by small, wide-eyed creatures who supposedly pilot UFOs, and conduct various medical experiments on their victims. The New Age Movement argues that such activity would be proof of an ongoing experiment between humans and aliens, and they note that the radical aspects of such experiments have included impregnating victims and later removing the hybrid embryos.

Ancient Chinese folklore includes stories of a distant land of “flying carts.” A Sanskrit text, *The Drona Parva*, documented “dogfights” by gods in flying machines.³ But men like Von Daniken claim that the Bible is their best advocate and is the “greatest UFO book of all time!” The “wheel” in Ezekiel 1:15; the “pillar of cloud” in Exodus 13:21-22; and Elijah’s “chariot of fire” (2 Kings 2:11), are all viewed as examples of UFO sightings by New Agers. It’s true that we do find a biblical record of mysterious celestial creatures invading the earth and conducting procreative experiments. In Genesis 6:4 we read, “When mankind had spread all over the world, and girls were being born, some of the supernatural beings saw that these girls were beautiful, so they took the ones they liked. In those days, and even later, there were giants [*nepheli*] on the earth who were

descendants of human women and the supernatural beings" (*TEV*). But is Genesis 6 a description of reproductive experiments conducted by advanced extra-terrestrial creatures? Or is it a record of something even more sinister?

A Christian Analysis vs. the New Age View

Regardless of one's interpretation of these and other ancient records, one fact remains. Thousands of years ago, heavenly beings visited the earth. They engaged in sexual experiments resulting in a race of mutant beings called *nepheli*. The final result appears to have been an immediate judgment from God, who ordered Israel to destroy the *nepheli* and its descendants. Thousands of years later, Jesus spoke of the events that occurred during the days of Noah as being comparable to the days leading up to the rapture of the Church (Matthew 24). This prophecy is remarkable when one realizes that after God judged the celestial beings who cohabited with the Noahtic women, all such comparable activity apparently ceased until about 1940. Then, following the infamous Roswell incident which occurred in New Mexico in 1947, people from around the world began encountering strange creatures conducting procreative experiments with increasing regularity. One is forced to wonder, what's going on? Who are these creatures? Are the current UFO visitors the same as those of Noah's day? If so, what is this reproductive experimentation about? Perhaps the answer to this question (the Christian's analysis vs the New Age view on "aliens") is hidden in the first six chapters of Genesis.

Very soon after the fall of man, we find in Genesis 3:15 the protoevangelium (the promise that the seed of the woman would someday bring forth a child [Jesus] capable of destroying the serpent's [Satan's] power). In response to the promise, supernatural beings (fallen angels?) appeared from the heavens and performed reproductive experiments on human women (Genesis 6). Was Satan attempting to intercept, pollute, and thereby destroy the righteous seed? Was he trying to cut off the birth line of the Messiah? Perhaps. Satan's ancient goal included cutting off the line leading to the Messiah. Satan led Pharaoh to destroy the Hebrew children so the deliverer might not be born. Herod sought the baby Jesus in the *New Testament* in order to have Him killed. In Revelation 12, we see the devil (dragon) waiting to destroy the messianic seed as soon as it is born of the woman. But Dr. I.D.E. Thomas, in his book, *The Omega Conspiracy*, suggests that Satan had even bigger plans at work in Genesis 6. He claims that Satan (as opposed to aliens) was trying to produce a race of mutant warriors by breeding fallen angels with women in an effort to exterminate the children of God.

From a Christian's point of view, this could explain how people like the Sumerians of Mesopotamia, who were enemies of Yahweh, appeared out of nowhere around B.C. 3500, bringing with them a pantheon of deities, the first written language, and a superior knowledge of earthly sciences. This may also explain why many of the religions that followed Sumerian mythology, including Greek mythology, emerged from the origi-

nal idea that powerful beings, with names like “Zeus” and “Apollo,” visited the earth, intermarried with women, and fathered half-human children. Dr. Thomas believes recent UFO abduction activity may point to the birth of a new race of anti-God warriors, as we approach the end of the age and the coming of Armageddon.

Does Genesis 6 support the New Age theory that alien creatures traveled from distant planets in UFOs, performed reproductive experiments on women, and were afterward honored in the images and folklore of the gods of mythology? Or, is Dr. I.D.E. Thomas correct in stating that the story in Genesis is a record of fallen angels acting in accord with Satan? What, if anything, could this tell us about the origin of the gods and the current interstellar phenomena? Are we experiencing an ongoing invasion of earth by intergalactic scientists, or is Satan busy advancing the most sophisticated con game in history? We know that the rapture of the Church will be accompanied by “fearful sights and great signs from heaven” (Luke 21:11). Perhaps Satan is contriving an “alien invasion” to explain the disappearance of so many people at once! If 80 percent of the population believes in the possibility of extra-terrestrial intelligence, wouldn’t this be a powerful form of deception? Since New Age theology produces a growing belief among some contemporary church groups that flying saucers will be the method God uses to retrieve the Christian community during the Rapture, couldn’t the UFO sightings phenomenon play a part in the great deception that will pervade the earth following the Rapture?

We read in 2 Thessalonians 2:8-12,

And then shall that Wicked [one] be revealed . . . whose coming is after the working of Satan with all power and signs and lying wonders. . . . And for this cause God shall send them strong delusion, that they should believe a lie: That they all might be damned who believed not the truth, but had pleasure in unrighteousness.

The world authorities remaining to make up the governments of the Antichrist will need an explanation for those taken in the Rapture. People from around the world will be missing! Now imagine if the Rapture was followed by hundreds of "space craft" landing on earth piloted by creatures who appeared to be advanced humanoids, couldn't these beings claim to have removed the Christians into some kind of a high-tech "rapture," and simultaneously present their leader (antichrist?) as the messiah? Couldn't they point to ancient mysteries, megaliths, pyramids, and the gods of mythology, as proof of an ancient visitation of planet earth?

The late Pulitzer Prize-winning author and agnostic Carl Sagan was, until his death, working on a screenplay about the ramifications of just such a savior who appears in the coming millennium!⁴ Humanists like Sagan argue that evidence such as the meteorite,⁵ which has been hypothesized as indicating that microscopic life existed on Mars millions of years ago, is proof that prehistoric life forms could have moved throughout the universe for untold millennia. Not long ago, people who supported UFO activity were the object of scorn. Because of accumulating

evidence and reputable eye-witness accounts; this is no longer the case. That some kind of unexplained phenomenon, called the UFO experience by some, occurs, is beyond question. UFO reports are coming in at the alarming world-wide rate of about six sightings per hour! Whatever or whomever they are, the reality of this activity can no longer be doubted. One concludes that these beings are either advanced humanoids from outer space, or that this activity signals an ongoing deception of demonic design. If the current UFO activity is demonic and indicates that Satan has for centuries planned an "alien" visitation in order to, among other things, explain the Rapture of the church, wouldn't it be reasonable to believe that his plans have heretofore included indoctrination and advanced intelligence? Military invasions always involve preliminary and clandestine maneuvers, and one should believe Satan's plans to deceive in the past, the present, and the future World Order, would first involve covert strategies of brainwashing, political manipulation, and the positioning of his agents in places of power.

While I believe that the New Age Movement's interpretation of UFO phenomenon and the origin of the gods is erroneous, I do credit New Agers for recognizing the high possibility that the gods of mythology were a result of, and perhaps a first step toward, the developing of the schemes of a super-intelligent force, a power which may energize the UFO phenomenon today. But what New Agers describe as the goals of a "highly advanced alien civilization," I call the plotting of an evil supernatural creature.

The Biblical View of the Origin of the Gods

The biblical (and I believe correct) view of the origin of the pagan gods begins with Original Revelation. This means there was a perfect revelation from God to man at the time of creation. The first man, Adam, was one with God and perceived divine knowledge from the mind of God. Adam was “in tune” with the mental processes of God, and understood, therefore, what God knew about science, astronomy, cosmogony, geology, eschatology, and so on. After the fall, Adam was “detached” from the mind of God, but retained an imperfect memory of divine revelation, including a knowledge of God’s plan of redemption. Two things began to occur in the decades after the Fall: 1) information from the original revelation became distant and distorted, as it was dispersed among the nations, and passed from generation to generation; and 2) the realm of Satan seized upon this opportunity to receive worship, and to turn people away from Yahweh, by distorting and counterfeiting the original revelation with pagan ideas and gods. This point of view seems reasonable when one considers that the earliest historical and archeological records, from civilizations around the world, have consistently pointed back to and repeated portions of the original story.

In their startling book, *The Discovery of Genesis*, the Rev. C.H. Kang and Dr. Ethel R. Nelson confirm that prehistoric Chinese ideographic pictures (used in very ancient Chinese writing) depict the story of Genesis, including the creation of the Man and Woman, the Garden, the Temptation and Fall, Noah’s flood, and the Tower of Babel. In

his book, *The Real Meaning of the Zodiac*, Dr. James Kennedy claims that the ancient signs of the Zodiac also indicate a singular and original revelation, a kind of gospel in the stars. And that the message of the stars, although demonized and converted into astrology after the Fall, originally recorded the Gospel of God. Kennedy writes:

There exists in the writings of virtually all civilized nations a description of the major stars in the heavens, something which might be called the "Constellations of the Zodiac" or the "Signs of the Zodiac," of which there are twelve. If you go back in time to Rome, or beyond that to Greece, or before that to Egypt, Persia, Assyria, or Babylonia, regardless of how far back you go, there is a remarkable phenomenon; nearly all nations had the same twelve signs, representing the same twelve things, placed in the same order.

The book of Job, thought by many to be the oldest book of the Bible, goes back to approximately 2150 B.C., 650 years before Moses came on the scene to write the Pentateuch; over 1,100 years before Homer wrote the *Odyssey* and the *Illiad*; and 1,500 years before Thales, the first philosopher, was born. In Job 38, God finally speaks to Job and his false comforters. As He is questioning Job, showing him and his companions their ignorance, God says to them, "Canst thou bind the sweet influences of Pleiades, or loose the bands of Orion? Canst thou bring forth Mazzaroth in his season? Or canst thou guide Arcturus with his sons?"

(Job 38:31,32). We see here reference to the constellations of Orion and Pleiades, and the star Arcturus. Also in the book of Job, there is reference to Cetus, the Sea Monster, and to Draco, the Great Dragon. I would call your attention to Job 38:32a: "Canst thou bring forth Mazzaroth in his season?" Mazzaroth is a Hebrew word which means, "The Constellations of the Zodiac." In what may be the oldest book in all of human history, we find that the constellations of the zodiac were already clearly known and understood.

Having made it clear that the Bible expressly, explicitly, and repeatedly condemns what is now known as astrology, the fact remains that there was a God-given Gospel [universally acknowledged original revelation] in the stars which lies beyond and behind that which has now been corrupted.⁶

In his book, Kennedy strongly condemns the practice of astrology, while asserting his view that the constellations of the zodiac were likely given by God to the first man as "record-keepers" of the original revelation of God. If the primary assumption of the Biblical view is correct, that an original revelation was corrupted after the fall of man and subsequently degenerated into the mythologies of the pagan gods, one should be able to find numerous examples of such corruption from the beginning of history, in various civilizations around the world.

Since the myths behind the gods would thus be "borrowed" ideas, the corrupted texts would be similar to the original truth, and, in that sense,

evidence of a singular and original revelation. Furthermore, if the distortions of the original revelation were in fact energized by an evil supernaturalism, the goal of the alterations would be to draw people away from the worship of Yahweh. In certain ancient legends, such as the *Enuma Elish*, the *Adapa Epic*, and the *Epic of Gilgamesh*, we discover early traces of the kaleidoscope of the original revelation, plagiarized for the purpose of constructing the mythologies of the pagan gods.

Early Traces of Corruption

Evidence suggests that the earliest legends of mythology were preceded by a belief in “the God” (*Yahweh* to the Hebrews) as the creator of all things and the “ruler of heaven.” Later, Satan was described as “the god of this world” (2 Cor. 4:4), and the “prince of the air” (Eph. 2:2). A fascinating struggle between the “ruler of the heavens” versus the “power of the air” occurred in early Sumerian mythology after Enki, the god of wisdom and water, created the human race out of clay. It appears that Anu, who was at first the most powerful of the Sumerian gods and the “ruler of the heavens,” was superseded in power and popularity by Enlil, the “god of the air.” To the Christian mind this is perceived as nothing less than Satan, the god of the air, continuing his pretence to the throne of God, and his usurpation of Yahweh, “the Lord of the heavens.” It also indicates a corruption of the original revelation and perhaps an effort on the part of Satan to trick the pagan Sumerians into perceiving him as the “supreme” god (above the God of Heaven) and, therefore, worthy of adoration.

Correspondingly, in the *Enuma Elish* (a Babylonian epic), Marduk, the great god of the city of Babylon, was exalted above the benevolent gods and extolled as the creator of the world. Marduk was symbolized as a dragon (as is Satan in Revelation 12:9) called the *Muscrussu*, and his legend appears to contain several distortions of the important elements of the biblical account of creation. The *Adapa Epic* tells of another Babylonian legend that is also roughly equivalent to the Genesis account of creation. In it, Adapa, like Adam, underwent a test on food consumption, failed the test, and forfeited his opportunity for immortality. As a result of the failure, suffering and death were passed along to humanity.

Finally, the *Epic of Gilgamesh* is a Sumerian poem, which, like the *Adapa Epic*, is deeply rooted in ancient Assyrian and Babylonian mythology. In 1872, George Smith discovered the Gilgamesh tablets while doing research on the Assyrian library of Ashurbanipal at the British Museum. Because of the strong similarity to the biblical account of Noah and the great flood, Bible scholars have viewed the Gilgamesh epic with interest (and suspicion) since its discovery. As the legend goes, Gilgamesh, the king of the city of Uruk, was told about the flood from his immortal friend, Utnapishtim (the Sumerian equivalent of Noah). Utnapishtim described for Gilgamesh how the great god Enlil decided to destroy all of mankind because of its “noisy” sins. A plague was sent but failed to persuade mankind of better behavior, and, consequently, the gods decided on a complete extermination of the human race. Enki, the lord of the waters, was not happy with the other

gods for this decision and warned Utnapishtim of the coming deluge, instructing him to tear down his house and build a great boat. Utnapishtim obeyed Enki, built a great vessel, and sealed it with pitch and bitumen. The family of Utnapishtim loaded onto the boat together with various beasts and fowl. When the rains came, the doors were closed and the vessel rose up above the waters. Like Noah, Utnapishtim sent out a dove, and later a swallow, to search for dry land. They both returned. Later, a raven was released and it never came back. After several more days the boat came to rest on the top of a mountain where Utnapishtim built an altar and offered a sacrifice of thanksgiving to the gods. As the gods smelt the sweet offering, all but Enlil repented for sending the flood.

In my first book, *Spiritual Warfare, The Invisible Invasion*, I described an interesting example of the original revelation of God as distorted and plagiarized by Satan in order to draw men away from the worship of Jehovah. Concerning Asclepius, the Greek god of healing, I wrote:⁷

At the base of Pergamums hill stood the shrine of Asclepius, equipped with its own library, theater, sleeping chambers used in healing rituals, and long underground tunnels joining various other shrines to which pagans journeyed to receive the healing powers of Apollo's favorite son. The Christian Church considered these mystical powers as demonic, for the worship of Asclepius focused on the image of a serpent, sometimes called Glycon, an enormous serpent-figure some historians see as the origin for the modern symbol of healing, a serpent

winding about a pole. Asclepius carried the lofty title, the hero god of healing. In Numbers 21, Moses designed the brazen serpent on a pole that was used of God as an oracle of healing. Seven hundred and forty-three years later, in 2 Kings 18:4, we find that Israel had begun to worship the brazen serpent with offerings and incense.

From here the image was adopted into Greek mythology where it became the symbol of Asclepius, the Greek god of healing. Asclepius was reported to have cured untold numbers from every conceivable disease, even raising a man from the dead. This caused Apollo, through his Oracle at Delphi, to declare, "Oh Asclepius! Thou who art born a great joy to all mortals, whom lovely Coronis bare to me, the child of love, at rocky Epidaurus." Such a healer was he reported to be, that Pluto, god of Hades, complained to Zeus that hardly anyone was dying anymore, and so Zeus destroyed Asclepius with a thunderbolt. Afterward, Apollo pleaded with Zeus to restore his son and this intercession so moved Zeus that he not only brought Asclepius back to life, but immortalized him as the god of medicine.

First at Thessaly, and finally throughout the Greek and Roman world, Asclepius was worshiped as the god of healing.

Thus, we find a glaring example of God's "revelation" plagiarized for demonic purposes. Greek mythology represented Asclepius had the power to heal the sick and bring the dead back to life by

drawing blood from the side of the goddess of justice. Asclepius was symbolized by a serpent winding about a pole, and he was called the great "Physician." The obvious intention of the serpent on a pole in Numbers 21 was to focus mankind on the coming Messiah, the true Great Physician, who would hang upon a pole and would deliver His followers from sickness and death by the blood that ran from His side.

The Energy of the Gods

Time does not allow for a full disclosure of the many other examples of corruption that occurred with regard to the Original Revelation. They include distortions or "knock-offs" of the virgin birth, Heaven and Hell, the Resurrection and Final Judgment, water baptism, communion, etc. In addition to the corruptions of the original revelation which pre-dated the gods of mythology, the Biblical view of the origin of the gods makes the following important assumptions: 1) that there exists within our universe real and supernatural powers; 2) that these powers are divided by their nature into two separate camps or "kingdoms," one evil, the other good; 3) that these kingdoms are presided over by rulers, the biblical Satan over the evil and Yahweh over the good; and 4) that the kingdom of Satan provided the historical energy or "life" within and behind the gods of mythology as Satan's kingdom solicited human worship through the elements of idolatry.

Quoting again from *Spiritual Warfare, The Invisible Invasion*, I conclude:

The worship of Asclepius and other such idolatries were, as Paul would later articu-

late in 1 Corinthians 10:20, *the worship of demons*. [emphasis added] In Acts 7:41-42, we find that when men serve idols they are worshipping “the army of heaven” (Jerusalem Bible). Psalms 96:5 says, “For all the gods of the nations are idols” (*‘elilim*, *LXX daimonia*). Demons. Many other biblical references indicate evil supernaturalism as the true dynamic of idolatry and reveal that idols of stone, flesh, or other imagery are simply “elilim (empty, nothing, vanity), but that *behind these images exist the true objects of heathen adoration: demons.*”

John Milton wrote in *Paradise Lost* that millions of spiritual creatures walk the earth unseen. The Biblical view of the origin of the gods affirms the idea that “in the beginning” Yahweh created the heavens (celestial beings, planets, etc.) and the earth. Lucifer, “the light bearer,” was a crowning achievement of God’s heavenly creation and a chief servant of the creative Yahweh. But Lucifer became jealous of the worship Yahweh was receiving from his many creations, and proudly proclaimed, “I will exalt my throne above the stars of God. . . . I will be like the most high” (Isa. 14:13-14). Somehow Lucifer convinced one-third of the celestial creatures to join him in a great rebellion, with the uprising ultimately resulting in Lucifer and his followers being cast out of Heaven. Lucifer (now Satan), driven by a quest for worship and thirsty for revenge against Yahweh, tempted Eve, and, after the fall with its resulting separation between man and God, moved to corrupt the divine truths contained within the Original Revelation by proclaiming himself (the god of the air) more worthy

of worship than the God of Heaven.

If such a summary of the Biblical view is correct, that a real and evil supernatural presence exists and has for centuries drawn men away from worshipping Yahweh through the dynamics of various mythologies, the following questions arise: Were the angels that joined Lucifer in the fall also driven by a lust for worship? Did the images and attributes ascribed to the gods of mythology reflect the real and spiritual characteristics of certain unseen personalities operating behind them? More important, is the kingdom of Satan still at work in this manner? Do the living entities of the ancient gods continue to walk among us? If so, do such spirits embody themselves in trees, earth, and idols of stone, or should we assume that modern idolatry has acquired a more selective sophistication and social manifestation? In the following chapters, we'll search for the answers to these questions through a comparison of the various aspects of the gods of mythology. But, be warned, the forthcoming conclusions may startle you.

The Gods Who Walked among the Egyptians

“Oh Egypt! Egypt! Your knowledge will survive but in legends, which later generations will be unable to believe.”

—Lucius Apuleius,
Roman Philosopher,
Second Century A.D.

As the centuries passed by, the god and goddess worshipping cities of the Sumerians began to fade away. The flourishing fields of agriculture that provided the underpinnings of the great Sumerian economy were depleted of fertility through over-irrigation, and residues of salt build-up appeared to chafe the surface of the land. The city-states of Sumeria, Kish, Ur, Lagash, and Umma, weakened by a millennium of ruthless infighting among the Sumerians, finally succumbed to militant external forces. The barbarian armies of the Elamites (Persians) invaded and destroyed the city of Ur, and Amorites from the west overran the northern province of Sumer and subsequently established the hitherto little-known town of Babylon as their capital.

By B.C.1840, Hammurabi, the sixth king of Babylon, conquered the remaining cities of Sumeria and forged northern Mesopotamia and Sumeria into a single nation. But the ultimate demise of the Sumerian people did not vanquish their ideas. Sumerian art, language, literature, and, especially, religion, had been forever absorbed into the cultures and social academics of the nations surrounding Mesopotamia, including the Hittite nation, the Babylonians, and the ancient Assyrians. A principal benefactor of Sumeria's ideas, and a people who would ultimately make their own contributions to the ancient mythologies, was an old and flourishing population of agrarians known as the Egyptians.

By the year B.C. 1350, Egyptian dominance had spread from Syria and Palestine into the farthest corners of the Fertile Crescent. From northern Mesopotamia to the Baltic Sea, the pharaohs of Egypt had established themselves as the social and economic leaders of the civilized world, ruling an area more than 2,000 miles in length. The military superiority of the Egyptian army demonstrated its ability to subdue the threat of resistance, maintaining a hegemony that extended from the Nubians to the Hyksos. But, in the final analysis, it was the influence of the gods of Egypt, with their magic, myths, and rituals, that provided the Egyptians with a lasting place in history and led the following generations into an immense, enlightening description of the ancient mythologies, including a wealth of information regarding the dynamics and supernatural possibilities of paganism.

Thoth, by Brooke Townsend

Facts about Atum (RA), Osiris, and Isis

Prehistoric Egyptians believed in the same fundamental idea that most evolutionists subscribe to today, the premise that the oceans both preceded, and, in some way, contributed to the creation of the living cosmos. From the Fifth Dynasty Pyramid Texts, the Heliopolitan theory of creation stated that Atum (the sun god, Ra) independently created himself from a singular expression of self will, an act visualized by the Egyptians as a divine egg that appeared upon the primordial waters of the all-filling ocean called Nun, out of which Atum (meaning "He who created himself"), emerged. According to myth, a second act of creation developed around a divine masturbation when Atum, the great "He-She," orally copulated himself and afterward regurgitated his children, Shu and Tefnut, who assumed the positions of god and goddess of air and moisture.

Later, when Shu and Tefnut became lost in the universal ocean of Nun, Atum exhibited his paternal care by sending out his Eye, which had the curious habit of detaching itself from Atum and thinking independent thoughts, to look for them. The Eye of Atum succeeded in finding the child gods and eventually returned to discover that Atum had grown impatient during the wait and had created a second eye. In order to placate the hostility that soon developed between the two divine eyes, Atum affixed the first eye upon his forehead where it was to oversee and rule the forthcoming world of creation. Thus, the Eye of Atum became the jealous, destructive aspect of the sun god Ra.

To avoid getting lost again in the all-filling waters of Nun, Shu and Tefnut procreated Geb (the earth), and Nut (the sky), and thus provided the more stable elements of earth, nature, and the seasons. Later, Geb was conceptualized as cohabiting with Nut and producing four children of his own: Seth, Osiris, Isis, and Nephthys. Of these, Osiris and Isis grew into such important cult deities that the mythology of the Egyptian religion was modified to support the claim that Osiris, with the help of his sister-wife Isis, had nearly overthrown and replaced Ra as the most powerful of the gods, an action that so enraged his brother Seth that the hateful and jealous sibling killed him.

Seth's murderous act was followed by the jackal-headed god, Anubis, assisting Isis with the embalming of her slain husband-brother Osiris, an act which secured the jackal god's position as "the god of embalming." Then, while still in mourning, Isis summoned the wisdom of Thoth, which she combined with her own proficient magical skills and produced a resurrected Osiris, who, in turn, impregnated her with Horus, the god of daylight. Horus promptly avenged his father's death by killing the evil brother Seth. Another version of the myth claims that Horus was born to Isis only after she impregnated herself with semen, which she took from the corpse of Osiris. Yet another story claims that Seth persuaded his brother Osiris to climb into a box, which he quickly shut and threw into the Nile. Osiris drowned and his body floated down the Nile river where it snagged on the limbs of a tamarisk tree. In Byblos, Isis recovered the body from the river bank and

took it into her care. In her absence, Seth stole the body again and chopped it into fourteen pieces, which he threw into the Nile. Isis searched the river bank until she recovered every piece, except for the genitals, which had been swallowed by a fish (Plutarch says a crocodile). But Isis simply replaced the missing organ with a facsimile and was somehow able to reconstruct Osiris and impregnate herself with the ithyphallic corpse.

This portion of the Isis/Osiris myth probably developed over time in order to provide the legendary background necessary to sanction the kind of temple prostitution practiced during the rituals of Isis. Temple prostitutes represented the human manifestation of the goddess and were available for ritual sex as a form of imitative magic. Much of the details are no longer available, but it appears these prostitutes usually began their services to the goddess as a child and were deflowered at a very young age by a priest, or, as Isis was, by a carved phallus of the god Osiris. Sometimes prostitutes were chosen, on the basis of their beauty, as the sexual mates of the sacred temple bulls. Such bulls were considered the incarnation of Osiris. In other places, such as at Mendes, temple prostitutes were offered in coitus to divine goats.¹

Regardless, from this time forward Osiris was considered the chief god of the deceased and the judge of the netherworld, the dark and dreary underworld region of the dead. In human form Osiris was perceived as a mummy and, paradoxically, while he was loved as the guarantor of life after death, he was feared as the demonic presence that decayed the bodies of the dead. Such necromantic worship of Osiris and Isis grew to

become an important part of several Mediterranean religions, with the most famous cult center of Osiris at Abydos in Upper Egypt, where an annual festival reenacted his death and resurrection. In Abydos, Osiris was called the god of the setting sun, the mysterious “force” that ruled the region of the dead just beneath the western horizon. He was venerated in this way primarily because death, and specifically the fear of one’s estate after death, grew to consume so much of Egyptian consciousness.

In the funerary texts, known as the *Book of the Dead*, the most elaborate magical steps were developed around the Osiris myth to assist the Egyptians with their journey into the afterlife. It was believed that every person had a *Ka*, a spiritual and invisible duplicate, and that such *Ka* accompanied them throughout eternity. Since the *Ka* provided each person with a resurrected body in the kingdom of the dead, but could not exist without the maintenance of the earthly body, every effort was made to preserve the human corpse. The body was, therefore, mummified according to the elaborate magic rituals passed down from Isis, who, according to legend, singularly perfected the rituals of mummification through her work on Osiris. Wooden replicas of the body were also placed in the tomb, as a kind of substitute in case the mummy was accidentally destroyed, and additional protection for the corpse was provided through the construction of ingenious burial tombs specifically designed to hide and preserve the human body for eternity. Finally, curses were placed throughout the tomb, as a warning against intruders.

At death of the Egyptian, *Ka* departed from the human body and, accompanied by the hymns and prayers of the living, used the formulas memorized from the funerary texts to outsmart the horrible demons seeking to impede the *Ka*'s progress into the kingdom (or hall) of Osiris. Arriving at the judgment hall, the heart of the *Ka* was "weighed in the balance" by Osiris and his forty-two demons. If they found the deceased lacking in virtue, he was condemned to an eternity of hunger and thirst. If the *Ka* was determined to have belonged to an outright "sinner," it was cut to pieces and fed to Ammit, the miserable little goddess and "eater of souls." But if the deceased was judged to have lived a virtuous life, the *Ka* was granted admission into the heavenly fields of Yaru, where foods were abundant and pleasures unending. The only toil in this heaven was to serve in the grain fields of Osiris, and even this could be obviated by placing substitutionary statues, called *shawabty*, into the tomb.

There is some evidence that the forty-two demons or "judges" of Osiris were in some way related to the prehistoric legend of the Watchers, the mysterious angelic beings who first appeared in the early cultures of the Middle East. The Egyptian people originally migrated from the biblical land of Shin'ar, which means the "Land of the Watchers." The Egyptians called it *Ta Neter*, the Land of the Watchers "from which the gods came into Egypt." As mentioned in Chapter One, it's possible that a historical event occurred giving birth to the legend of the Watchers, and references to a race of "watcher/gods" who cohabited with women and sought to control the human

race is attested to by numerous ancient texts. The Sumerian scribes referred to the watchers as *Anunnaki*, who, they said, "came from Nibiru" to judge/rule the inhabitants of the earth. Some have interpreted Nibiru as "a distant planet," but the actual translation is, "Those Who from Heaven to Earth Came." In the Bible, references are made to the Anakim and to the Nephilm, which also means "those who came from Heaven to Earth." In the *Book of the Dead*, there are prayers for deliverance from the Watchers (Tchatcha, the princes of Osiris), who came from Ta-Ur, the "Far Away Land," and in the Book of Jubilees, also known as the Apocalypse of Moses, the Watchers are compared to the "supernatural beings" mentioned in Genesis 6 as having come down from heaven to cohabit with women, a union ultimately leading to the birth of the giants. The Apocryphal Book of Enoch also associates the creatures of Genesis 6 with the Watchers.

We read:

And I, Enoch, was blessing the Lord of majesty and the King of the ages, and lo! the Watchers called me, Enoch the scribe, and said to me: Enoch, thou scribe of righteousness, go, declare to the Watchers of the heaven who have left the high heaven, the holy eternal place, and have defiled themselves with women, and have done as the children of earth do, and have taken unto themselves wives: Ye have wrought great destruction on the earth: And ye shall have no peace nor forgiveness of sin: and inasmuch as they delight themselves in their children, The murder of their beloved ones

Isis, by Brooke Townsend

shall they see, and over the destruction of their children shall they lament, and shall make supplication unto eternity, but mercy and peace shall ye not attain. (1 Enoch 10:3-8)

From the *Dead Sea Scrolls*, we learn that only 200 of the larger group of powerful angels called "Watchers" ever departed from the higher Heavens and sinned. Thus, Enoch referred to the Watchers in the High Heavens as separate from the ones on earth. The fallen class of Watchers are considered by some to be the creatures referred to in the Book of Jude as the "angels which kept not their first estate, but left their own habitation . . . [and are] reserved in everlasting chains under darkness unto the judgment of the great day" (Jude 6). In either case, it appears the early Egyptian scribes believed that leaders from among the fallen Watchers had become the underworld demons of Osiris whose "terrible knives" exacted judgment upon the *Ka* of the wicked. The Egyptians were desperately afraid of these netherworld "watchers," and a significant amount of time was spent determining how to placate the judgment of Osiris and his forty-two demons. The worship of Isis, the sister-wife of Osiris, thus became integral.

As one of the most important goddesses of ancient mythology, Isis was venerated by the Egyptians, Greeks, and the Romans, as the "goddess of a thousand names," and as the undisputed queen of magical skills. Her enchantments were so powerful that she even forced the reluctant sun god Ra to reveal his most secret name. She accomplished this by conjuring a magic serpent that bit the sun god, a reptile whose venom was so potent

that it brought Ra to the point of death, thus he surrendered his hidden and powerful name to the goddess. In response, Isis uttered secret words which drove the serpent's poison from Ra's body. Afterward, the victorious goddess celebrated by adding Ra's powerful and hidden name to her archive of divine words.

Such magic words (of Isis) were considered by the Egyptians to be of the highest importance for the preparation and navigation of this world and the afterlife. This was because Isis not only possessed secret words, but she instructed her followers how, when, and with what vocal tones they were to be uttered. If the proper words were pronounced perfectly—at the right time of day and with the proper ceremony, they would have the effect of altering reality, manipulating the laws of physics, and forcing the being or object to which they were directed into compliance, including evil spirits.

An example of this form of magic is found in the *Theban Recension* of the *Book of the Dead* and depicts Isis providing a spell for controlling the forty-two demons of Osiris. The formula consisted of an amulet made of carnelian that had been soaked in the water of ankhami flowers. It was supposed to be placed around the neck of the dead person, in combination with the spoken words of magic. If performed properly, it would empower the *Ka* of the individual to enter into the region of the dead under the protection of Isis, where the *Ka* would thereafter move about whenever it wanted without fear of the forty-two demons of Osiris. The only Egyptian who did not benefit from this spell was the Pharaoh, and for a

very good reason. Although Pharaoh was considered to be the “son of the sun god” (Ra) and the incarnation of the falcon god Horus during his lifetime, he was considered, at death, to have become the Osiris, the divine judge of the netherworld. On earth, Pharaoh’s son and predecessor would take his place as the newly anointed manifestation of Horus, and, thus, each new generation of the pharaohs provided the gods with a divine spokesman for the present world and the afterlife.

Judgment of the Egyptian God King

While conducting a recent tour of Egypt and the Holy Land, Donald C. Jones (Ph.D. in Biblical History and contributing author of this book), stood outside the Great Pyramid in Giza and pondered what it must have been like to be an Egyptian Pharaoh. As the divine son of Ra, Pharaoh was the earthly representative of the supreme god of cosmic deities; in short, Pharaoh was god on earth. Dr. Jones wondered what the children of Israel must have thought when Moses challenged the mighty arm of a ruler whose kingdom was so vast and powerful. Who would “take on” the leader of a people capable of building a single structure over thirty times larger than the Empire State Building? The Great Pyramid was built over 4,500 years ago of more than 2,000,000 blocks of stone weighing between 2 and 60 tons each, by builders whose knowledge of the earth and the planetary systems was so advanced that the Great Pyramid faces true North, South, East, and West, while also standing at the exact center of the Earth’s land mass and at a height exactly that of the earth’s

Dr. Jones in Egypt

mean sea level. One would understand how the leader of such a people would have easily been considered by the ancients as a god on earth.

Whereas most scholars believe that the Great Pyramid, the last standing monument of the Seven Wonders of the Ancient World, was built around the year B.C. 2560, by Khufu (Cheops), the Pharaoh of the Fourth Egyptian Dynasty, and that Moses probably challenged the pharaoh, known as Ramses II, many other testaments, temples, and pyramids, have survived to reveal that each of the Pharaohs were, in their respective times (at least in the mind of the average Egyptian), the undisputed god-kings of planet earth. Nevertheless, God instructed Moses to go “unto Pharaoh . . . [and] bring forth my people the children of Israel out of Egypt” (Exod. 3:10). One of the main reasons for the Exodus narrative was, I believe, the historical opportunity for the Hebrew God to reveal Himself as more powerful than the Egyptian gods. In other words, the great “I AM” not only wanted to deliver His people from the Egyptian bondage, but He wanted to “execute judgment” against “all the gods of Egypt” (Exod. 12:12). Numbers 33:4 says, “For the Egyptians buried all their firstborn, which the Lord had smitten among them: upon their gods also the Lord executed judgments.”

Thus Yahweh manifested his superiority over Osiris, Isis, Pharaoh, and the various other gods assigned to protect the famous Egyptians. Dr. Jones says, “It would be a mistake to overlook the fact that, taken individually, each plague of the Exodus stands alone as a specific judgment of a particular Egyptian god; while, viewed collectively,

the plagues of the Exodus illustrate God's supremacy over, and his attitude toward, the corporate sphere of the gods of mythology."

The Plagues of Exodus

Let's consider a brief overview of the plagues of the Exodus, and their respective condemnations of the Egyptian gods.

1. The Nile Plague

And the Lord spake unto Moses, Say unto Aaron, Take thy rod, and stretch out thine hand upon the waters of Egypt. . . . that they may become blood . . . and Moses and Aaron did so, as the Lord commanded; and he lifted up the rod, and smote the waters that were in the river, in the sight of Pharaoh, and in the sight of his servants; and all the waters that were in the river were turned to blood. (Exod. 7:19-20)

Why would Yahweh turn the Nile into blood? Because the Nile was worshiped as the single most important element needed for the ongoing success of the culture, economy, and paganism of the Egyptian people. The annual flooding of the Nile brought new life and sustenance to over 1,000 miles of Egyptian-dominated settlements, and the watery event was perceived by the Egyptians as the best evidence that the gods of the Nile were pleased. When the Hebrew God challenged the welfare and divinity of the Nile River, He was striking a blow at the core of the Egyptian's faith and pantheon.

First, the waters of the Nile were considered sacred. Blood, on the other hand, was considered an abhorrence to the Egyptian people. The Nile

River was supposedly protected from the contamination of human blood and other such impurities by the fearsome ram-headed god, Khnum, who consorted with Sati, the goddess of Elephantine, as the dispenser and protector of the cool waters. Secondly, the Nile was “possessed” by the spirit of Hapi, the son of Horus, who was often depicted as a corpulent man with the breasts of a female (representing the abundance and succoring of the Nile) and was honored as the god who, through using the silt and waters of the Nile, provided the abundant fertility of the land of Egypt. At other times, Hapi was depicted as a mummified man with the head of a baboon, a portrayal in which he was considered the guardian of the lungs of the deceased and the Nile-servant of Osiris. Keeping Osiris happy was important to the welfare of the Nile, because the origin of the Nile was not known in ancient times (the central African location was not discovered until 1862) and the Nile's origin was considered by the Egyptians to be the spiritual bloodstream, or divine “life flow,” of the netherworld, Osiris. Turning the Nile into blood was thus, in part, a mockery of the Osiris blood-myth by the Hebrew God, Yahweh. Thirdly, the fish of the Nile were considered sacred and were supposedly protected by two powerful goddesses—Hathor, the goddess of the sky and the queen of heaven (who protected the *chromis* or “small fish”), and Neith, the very ancient goddess of war who protected the *lates* (large fish), which were also considered to be her children. Neith was a powerful Egyptian deity, the sister of Isis, and the protectress of Duamutef, the god who watched over the inner stomach of the dead. More impor-

tantly, she was the mother of the Nile-god Sobek, an evil god with the head of a crocodile, to whom pharaoh may have “offered” the Hebrew male children when he commanded the midwives to throw them into the Nile. (Exod. 1:22)

Another Nile crocodile god, Apepi, was the arch rival of the sun god Ra, and may have been one of the “serpents” who appeared before Pharaoh and Moses in Exodus 7:10-12. We read, “And . . . Aaron cast down his rod before Pharaoh . . . and it became a serpent (*tanniym*, dragon or crocodile) . . . the magicians of Egypt, they also did in like manner with their enchantments . . . and they became serpents [*crocodiles*, Sobek and Apepi?]: but Aaron’s rod swallowed up their rods.” Since the word *tanniym* is not translated “serpent” anywhere else in Scripture, Dr. Jones believes, as do many other Bible scholars, that *tanniym* should be interpreted as dragons or “crocodiles” in the Book of Exodus, as it was thus translated throughout the Books of Isaiah and Ezekiel. Either way, by turning the Nile River into blood, no less than nine separate deities were judged by the Hebrew God and found to be inferior and under His authority; the Nile River, Khnum, Sati, Hapi, Osiris, Hathor, Neith, Sobek, and Apepi. Through the first plague Yahweh confirmed that He alone is the supplier of every human need, and the true Judge of the after life and only Sovereign of destiny.

2. The Frog Plague

And the Lord spake unto Moses, Go unto Pharaoh, and say unto him, Thus saith the Lord, Let my people go. . . . And if thou

refuse to let them go, behold, I will smite all thy borders with frogs: And the river shall bring forth frogs abundantly. . . . And Aaron stretched out his hand over the waters of Egypt; and the frogs came up, and covered the land of Egypt. (Exod. 8:1-3; 6)

When I was a young Christian I had an interesting experience during a time of intercessory prayer. I was fasting and praying for the salvation of a member of my wife's family when suddenly the image of a frog appeared in my mind's eye. The vision startled me, because it was unexpected and powerful. No matter how I tried, I could not shake the uncanny feeling that a "frog" was resisting my prayer. It had the appearance of a typical river frog, but it stared at me as if to warn me that I had wandered into its territory and that it was fully intending to defend its position within the life of the person for whom I was praying. After a while, it became obvious that whatever or whomever the frog creature was, it was not going away, so I rebuked it "in the name of Jesus," and it immediately vanished! Some time later, I was amazed to discover that certain demons can appear as images of frogs. In the Book of Revelation, we read: "And I saw three unclean spirits like frogs come out of the mouth of the dragon, and out of the mouth of the beast, and out of the mouth of the false prophet" (Rev. 16:13). My experience had been genuine, and, over time, helped me to understand that the Hebrew depiction of frogs as unclean animals was perhaps based on an ancient and spiritual revelation from Yahweh.

To the ancient Egyptians, however, frogs were sacred animals, and, ultimately, the infants of the frog-goddess Heka. Heka played an important role in the development of infants, including humans, beginning at the embryonic stage and continuing up until childbirth. She was, thus, an important patroness of midwives and a powerful goddess of fertility. As the wife of Khnum, she assisted in the original creation of mankind and was closely associated with Hapi, who held the divine frog in his hands as the waters of nourishment flowed from her mouth.

When the *krur* (frogs) increased along the banks of the river during the annual receding of the Nile, it was perceived by the Egyptians as a good Heka omen. It's easy to see how the Plague of the Frogs was a substantial embarrassment to the Egyptians, to have the frog-goddess babies so multiplied that one could not walk upon the ground or move within the house without squashing the divine creatures beneath their feet. Pharaoh could not order the Hebrew slaves to destroy and haul the frogs away, as it was a capital offence to kill a frog in Egypt! How powerful the Hebrew Creator-God must have appeared, compared to the stupidity and stench of the creator-frog goddess, as her infants lay rotting in massive filthy heaps, covering nearly every square inch of Pharaoh's Egyptian empire. Through the plague of the frogs, the mystical power (in the chapter on Greece we shall discuss how Heka was associated with Hekate, the Greek goddess of mysticism and witchcraft) of Heka was reduced to nothing more than a greasy pavement crushed to death beneath the feet of the sorrowful Egyptians.

3. Plague of Lice

And the Lord said unto Moses, Say unto Aaron, Stretch out thy rod, and smite the dust of the land, that it may become lice throughout all the land of Egypt. And they did so; for Aaron stretched out his hand with his rod, and smote the dust of the earth, and it became lice in man, and in beast; all the dust of the land became lice throughout all the land of Egypt. (Exod. 8:16-17)

Four distinct facts stand out in the plague of the lice: First, the priests of Egypt were immaculate regarding their purifications. Discovering a single louse would have rendered an Egyptian priest unclean, and, as such, incapable of ministering in the temple. The shutdown of the priestly ministry would have been no small matter, as the priesthood numbered in the thousands of men who maintained a strict regimen of daily ministering, bathing, shaving, and sacred purification. Such priests exercised great influence over the common Egyptians, and were considered the uppermost servants of the gods, the “consecrated ones” who carried out the required daily ceremonies of the hundreds of Egyptian temples deemed necessary for the ongoing functionality of the local community. The religious duties of the priests included two main categories: 1) carrying about the little shrines or oracles (small replica temples containing statues of the gods) which were made available to the common people (those who could not enter beyond the veil); and, 2) performing the mystery rituals in the inner sanctums or “holy of holies” of the temples. The difference between

the two priestly categories was that the portable gods were publicly available to nod their heads and speak (it's been suggested that the priests spoke for the idols while moving their mouths with a string) while the mystery functions of the priesthood were highly secretive and included the important creation rituals conducted in the inner sanctums of the main temples, like those of Amun-Ra at Karnak, where a priestess known as the "hand of god" performed ritual masturbations on the priests as a form of imitative magic (referring to the Atum masturbation/creation myth). This practice was considered necessary for the ongoing balance of nature, the annual flooding of the Nile, and regulating the seasons.

Moses was a man "learned in [such] wisdom of the Egyptians" (Acts 7:22). As such, he was aware of, and may have been trained in, the mysteries of the Egyptian priesthood. It's even possible that Moses served as an Egyptian priest. The name Moses means to be "drawn out of" or "born of" and was usually associated with a priestly Egyptian deity, i.e., Thothmoses (born of Thoth), Amenmosis (born of Amen), or Rameses (born of Ra). The slight variations of the spelling of Moses (mosis, meses, etc.) did not change the priestly Egyptian meaning. This has caused some scholars to conclude that the Hebrew Moses may have been named after a Nile deity by the Pharaoh's daughter (Exodus 2:10), and that he served as an Egyptian priest who later dropped his Nile deity-name reference upon encountering the omnipotent Yahweh, the God of his fathers. Whether or not that's true, Moses was raised in the Pharaoh's court, thus he had a special understanding of the far-

reaching ramifications of the plague of the lice. Moses understood that when every micro-particle of dust began to crawl upon the Egyptians, the priesthood was ceremonially unclean, and thus immobilized. The masturbation mysteries of Karnak could not be performed. The portable gods could not walk and talk. The seasons could not bring forth their blessings. While this kind of reasoning may seem simplistic, such imitative magic, as performed by the Egyptian priesthood, was central to the Egyptian way of life and was considered of the highest importance.

The second point of interest concerning the plague of the lice involves the fact that Pharaoh was supposedly the incarnation of Horus and the son of the Sun god Ra. He was, thus, god incarnate. The dust of Egypt was, therefore, holy ground. To say the least, it was a serious slap in Pharaoh's face for the Hebrew God to transform the sacred dust of Ra into lice.

The third notable point concerning the plague of the lice is that the magicians (priests) of Egypt could not duplicate the miracle, as they had duplicated the first two plagues. The Hebrew God was perhaps illustrating that He alone has the ability to create life out of the dust of the earth. Even the magicians testified, "This is the finger of God" (Exodus 8:19).

Fourth, Geb (earth) was the god who protected the soil, while Seth was, among other things, the angry god of the desert sand. In the Osiris myth, it was Seth who raged against the other gods in his bid to become the greatest among the Egyptian pantheon. In the plague of the lice, Yahweh was perhaps mocking the Egyptian religion by causing

the dust god, Seth, to literally struggle against Geb, Ra, and Osiris, while leaving the Egyptians to suffer as collateral casualties.

4. Plague of Flies

And the Lord said unto Moses, Rise up early in the morning, and stand before Pharaoh . . . and say unto him, Thus saith the Lord. . . . if thou wilt not let my people go, behold, I will send swarms of flies upon thee, and upon thy servants, and upon thy people, and into thy houses. . . . and the Lord did so; and there came a grievous swarm of flies . . . and. . . the land was corrupted [destroyed] by reason of the swarm of flies. (Exodus 8:20-24).

The beetle was known in Egypt as a fly. The scarab beetle was the sacred emblem of the sun god Ra and was the symbol of eternal life. But the flies of the forth plague were most likely a blood-sucking breed that spread blindness and disease among the populace that lived along the Nile. Whereas such flies were generally disliked by the Egyptians, they were, nevertheless, revered as the servants (demons?) of Vatchit, the Egyptian “lord of the flies.” In this context, it’s possible that the Hebrew God was administering a threefold judgement: first, of the Egyptians for their veneration of the fly-deities; second, of the sun god Ra, the Egyptian almighty creator; and third, of Vatchit himself, the Egyptian equivalent of Baalzebub (Beelzebub), the ancient god who, according to various eastern religions, was the evil god and “lord of the flies.”

The name Baalzebub originally derived from two different words: *Baal* (lord, master), and *zebub*

(of flies). While the original meaning is unclear, and may have referred to a certain priestly interpretation of the flight path of flies as an oracular communication between a Baal and his followers, some have pointed out that flies are present at decaying bodies, and thus Baal-zebub may have been a kind of Baal-Osiris; a lord-demon of the human corpse.

According to the *Grimorium Verum* and the *Grand Grimoire* (18th century textbooks on magic), Baalzebub manifested himself in the image of a huge fly whenever he was summoned by the sorcerer.² Whether Baalzebub, like Vatchit, commanded the flies to do his bidding, or delivered from their nuisance, is unclear. Additionally, since the title "Baal" referred to any lord, deity, or human master, there were many gods of antiquity known as a Baal; i.e. Baal-berith (lord of the covenant), Baal-Gad (lord of the fortune), Baal-hazor (lord of the village), and so on. That some Baals were worshiped by the Egyptians is known from the titles of certain Egyptian provinces; i.e. Baal-ze-phon ("Baal-of-the-North" or "Hidden Place") of Exodus 14:2. In times of great distress, it was usually a Baal that was called upon for help, and people who sought material prosperity believed their lives could be improved by offering their firstborn child as a sacrifice to the deity. The Greek author Kleitarchos recorded the dastardly process of sacrificing infants to Baal three hundred years before Christ:

Out of reverence for Kronos [Baal], the Phoeniciens, and especially the Carthaginians, whenever they sought to obtain some great favor, vowed one of their

children, burning it as a sacrifice to the deity, if they were especially eager to gain success. There stands in their midst a bronze statue of Kronos, its hands extended over a bronze brazier, the flames of which engulf the child. When the flames fall on the body, the limbs contract and the open mouth seems almost to be laughing [such areas of child sacrifice were often called "the place of laughing"], until the contracted body slips quietly into the brazier.

The sacrifice of babies to Baal was widespread in antiquity and was practiced by the children of Israel under the reign of King Ahab and Queen Jezebel. A recent archeological find illustrated how far-reaching such offerings were. It unearthed the remains of over 20,000 infants who had been sacrificed to a single Baal. Ahaziah, King of Israel, may have authorized such a child sacrifice when he sent messengers to the Philistine city of Ekron to inquire of the fly-god whether he (the king) would recover from his illness. Yahweh intervened and instructed Elijah to prophesy to the King:

Thus saith the Lord, Forasmuch as thou hast sent messengers to inquire of Baalzebub the god of Ekron, is it not because there is no God in Israel to inquire of his word? Therefore thou shalt not come down off that bed on which thou art gone up, but shall surely die. (2 Kings 1:16)

The Hebrews acknowledged Baalzebub as Satan's highest power and often referred to him as Beelzeboul, "lord of the height," a classification in which he was depicted as the dark atmospheric god who controlled the cosmos, or circumambient

“air.” Baalzebub eventually developed into a demon-god of such evil reputation that he became known as “the prince of devils” (Matt. 12:24). Milton referred to Baalzebub in *Paradise Lost* as Satan’s chief lieutenant, and, in the litanies of the witches’ Sabbath, Baalzebub is ranked, together with Lucifer and Leviathan, as an equal member of the supreme trinity of evil. The mocking of Vatchit, as the Egyptian equivalent of Baalzebub, and, thus, as the ultimate manifestation of evil, may have been what the Hebrew God had in mind during the plague of the flies.

5. The Deadly Murrain

Then the Lord said unto Moses, Go in unto Pharaoh, and tell him, Thus saith the Lord God of the Hebrews, Let my people go, that they may serve me. For if thou refuse to let them go. . . . Behold, the hand of the Lord is upon thy cattle which is in the field. . . . there shall be a very grievous murrain. (Exodus 9:1-3)

The first chapter showed how, down through the ages, Satan distorted the various aspects of the Original Revelation of God. The sacred Apis bull of Egypt was a perfect example of such plagiarism in that the Apis bull was a demonization of the life of Jesus, especially of the protoevangelium, the biblical promise of an immaculately born Son of God, who would also be God in flesh. (See Gen. 3:15; Isa. 7:14) Cattle, and especially the Apis bull, were sacred to the Egyptians. But the Apis bull (also known as Serapis or Osorapis) was special in that it was supposedly born of a miraculous conception when, every twenty-five years, divine moonlight (or lightning) struck a cow and it con-

ceived. The Apis bull was thus considered to be the incarnation of god on earth. During its life span, the Apis was worshipped as both the son, and incarnation, of Ptah, the Universal Architect god. As Ptah incarnate, the Apis embodied the Egyptian logos god who created, according to a later version of the Egyptian creation myth (the Memphite cosmology), all of creation by the authority of his spoken word. In death the Apis supposedly experienced a "resurrection" with Osiris, and thus the Apis bull, identified with Osiris, was a remarkable parallel of the Christian Messiah.

For practical reasons, the Apis bull was, for the most part, kept in seclusion. The Egyptian priests cared for the sacred animal and worked with a team of doctors and nutritionists in maintaining the bull's health. At the end of the twenty-five year cycle, a new bull was chosen with the pomp and ceremony of royalty. A celebration followed the selection and, for a period of forty days thereafter, the Egyptian women raised their dresses and exposed themselves to the bull. Such exposure was thought to capture the fertility energies of the Apis, and to excite the life-giving waters of Osiris. It was also believed that a special generational blessing came upon the exposed women's offspring. At the end of the forty days of "exposure," the new bull was removed to the Apis temple in Memphis where it was kept in a special sanctuary. It was thereafter publicly displayed during special occasions only. We find the Apis sanctuary mentioned in, *The Geography of Strabo* (63 B.C., A.D. 26):

Memphis itself, the royal residence of the Aegyptians [Egyptians], is also near

Babylon; for the distance to it from the Delta is only three schoeni. It contains temples, one of which is that of Apis, who is the same as Osiris; it is here that the bull Apis is kept in a kind of sanctuary, being regarded, as I have said, as god.³

Once the new Apis was inaugurated, the old bull was drowned, mummified, mourned, and placed into a huge sarcophagus. The burial rites of the passing bull were so revered and costly that they were paralleled in Egypt only by those of the Pharaoh. The comprehensive nature of such Apis burial rituals was illustrated in 1851, when 60 Apis sarcophagi of red and black granite weighing more than 60 tons each were discovered in Saqqara, just west of Memphis, where the Apis temple stood. I once took notes on, and photographed, the mummified head of one such bull. It was obvious from the detail and craftsmanship, that great reverence was given to the animal during the mummification process. Especially impressive were the elaborate glass eyes that had been placed into the eye sockets, and the golden sun-disk of Ra that rested between the horns. Such golden discs were similar to the moon-discs worn by other members of the divine bovine family, including those donned by Hathor, the cow-goddess-mother of the sun god, Ra. While other religions have practiced similar veneration of cattle, most notably Hinduism in India where the humped Zebu cow continues to be worshipped as the representative of Aditi, the "sinless cow," nowhere was the deification of such animals more noteworthy than in Egypt.

The ancient Egyptians considered all cattle to be sacred sources of generative power, and the

Sekhmet, by Brooke Townsend

cults of Apis and of Hathor thus set the standards of eastern myth and ritual. This fact has caused the plague of the deadly murrain to be considered an especially effective grievance, as, in a single move, it repudiated the six most important aspects of the Apis cult: 1) it devastated the protected livestock of the Egyptians including the vast herds of Pharaoh; 2) it illustrated God's unlimited power when, miraculously, none of the Hebrew cattle died; 3) it humiliated the Universal Architect god, Ptah, and exposed him as a helpless demon; 4) it destroyed the dominion of the sacred Apis and Mnevis bulls of Heliopolis; 5) it judged the goddess Hathor, and the god Osiris, and found them to be inferior; and 6) it nullified the generational blessings of Apis-Osiris (Serapis). Amazingly, after all of this evidence, the foolish heart of Pharaoh was hardened against the Hebrew God.

6) The Plague of Boils

And the Lord said unto Moses and unto Aaron, Take to you handfuls of ashes of the furnace, and let Moses sprinkle it toward the heaven in the sight of Pharaoh. And it shall become small dust in all the land of Egypt, and shall be a boil breaking forth with blains upon man, and upon beast, throughout all the land of Egypt. (Exod. 9:8-9)

During the third Egyptian Dynasty, at least 1,000 years before the Exodus, a man named Imhotep served as the vizier of the Pharaoh Zoser. Imhotep was an engineering genius and built the first-known massive stone structures, including the great Step-Pyramid (still standing) at Saqqara.

From history, we learn that Imhotep's well-founded distinction as a builder was surpassed only by his talent as a skilled magician and healer. When the Egyptians suffered under a seven-year famine that occurred during the reign of Zoser, the king appealed to Imhotep, who in turn consulted the sacred books.

After several days, Imhotep emerged from isolation and announced to the king "the hidden wonders, the way to which had been shown to no king for unimaginable ages." Zoser, impressed with Imhotep's discernment, obeyed the divinations. Simultaneously, Egypt withdrew from the famine and Imhotep was decreed the chief Kheri-heb priest ("son of Ptah") of Egypt. But the popularity of Imhotep's life eventually gave way to the fame that followed his death, as, later he was elevated, deified, and transformed into a healing god. By the time of the reign of the Pharaoh Menkaure (B.C. 2600), temples throughout Egypt were dedicated to the god Imhotep. Such temples contained incubation or "sleeping" chambers used in the convalescence of the sick and the mentally diseased, and the same became acknowledged as the most potent healing alchemies of Egypt. The incubation-temple of Imhotep at Memphis, for instance, proved to be so popular that the Greeks identified Imhotep with Asclepius, the Greek god of healing, and affirmed his divine membership within the powerful Egyptian "trinity" composed of Imhotep, Ptah, and Sekhmet the lion-headed goddess.

It's said that Imhotep convinced the Egyptians that premature forms of sickness and disease could be ultimately avoided if the proper aspects of

healing-magic were carefully employed. The magicians of Imhotep used the magic crystals and incantations of Isis to call upon Sekhmet, the goddess-sovereign of epidemics and diseases, to work with the positive energies of Serapis in the administration of the healing needs of the Egyptians. Such rituals were often accompanied by burnt offerings (sometimes human), and the ashes of the same were sprinkled into the air as a health-blessing for the Egyptians. At other times, the diagnosis called for an extended stay in the temple of Serapis where the sick or injured person was placed under the mystical spell of the katoche. Such katoche supposedly provided the internal coercion of the god and ultimately led to the proper diagnosis, and divine assimilation, of the transmissible and healing energies of the god. The katoche, affiliated with Imhotep's sleep-wizardry, was linked to the mystical crystals of Isis. These, in turn, were joined with Sekhmet's administration of the overall life-giving energies of Ptah and Osiris. Combined, they provided the Egyptian magicians with the powerful and esoteric tools necessary for the overall health (?) of the people. Such magic was, indeed, powerful, and the fame of such men and magic (Jannes and Jambres) continued up until the time of the New Testament (2 Tim. 3:8).

When the Hebrew God attacked the divine health of the Egyptians by placing a filthy, eruptive disease of boils upon the population, He accomplished what no other surrounding power had attempted to do: 1) He sent the respected Egyptian magicians fleeing, powerless, before Moses—unclean and unable to perform their priestly duties; 2) He illustrated the inferiority of

Seth, by Brooke Townsend

the Egyptian high gods, Ptah and Osiris, and denounced them as helpless demons; 3) He judged the lion-headed goddess Sekhmet and demonstrated her impotence at regulating diseases; 4) He altered the ritual of "casting ashes" and made the ashes a curse instead of a blessing; and 5) He mocked the temples of Imhotep and Serapis, and, thereby, notified the surrounding nations that neither crystals, nor psychic dreams, nor positive energies, nor coercions of men and their gods, can defy the incontestable will of Yahweh.

7) The Plague of Hail

And the Lord said unto Moses. . . . Behold, tomorrow about this time I will cause it to rain a very grievous hail, such as hath not been in Egypt since the foundation thereof even until now. . . . So there was hail, and fire mingled with the hail, very grievous. . . . And the hail smote throughout all the land of Egypt all that was in the field, both man and beast; and the hail smote every herb of the field, and brake every tree of the field. (Exodus 9:13; 18; 23-25)

The goddess Nut was the Egyptian protectress of the sky and weather, and was depicted in Egyptian art as a woman arched over the earth, with the stars above her back and the earth (her brother Geb) beneath her belly. She was the consort of Osiris, the "blesser" of crops and fertility, and was cherished as the caring mother "sky-goddess" by the agricultural people of the Fertile Crescent. According to myth, Nut elevated herself each morning upon her fingers and toes and thereby

provided an expanse between herself and Geb/earth. The spherical covering generated by Nut's towering action allowed the sun god Amun-Ra to coat the earth with light, and the warmth of the new day was received as a blessing of the goddess. At night, when Nut lay down, the expanse closed anew, and darkness covered the earth. To the Egyptians, this was the natural order of things. But when violent storms erupted and the daytime skies were darkened, the same was perceived as a disturbance in the original cosmic scheme.

Nut was displeased with such nonconforming weather, and, at times, the skies grew red with the blood of her wounds (other myths define the red skies as Nut's menstrual period) as she struggled against the storm to restore the cosmic rhythm. For the sake of her people, the Egyptians, Nut bravely fought to maintain the essential universal cycle. Both men and gods depended on the cycle of Nut. Amun-Ra needed her expanse to visit the earth each day. Seth needed the same to dry the desert sand. Osiris needed Nut's meteorological blessings to sustain the agriculture; and Pharaoh desired the sanctions of Nut for two essential reasons: first, she controlled the atmospheric conditions surrounding the Pharaoh's Egyptian empire, and second, she conquered the fierce storms that could herald the death of a king. For these and other reasons, Nut was particularly important to Egyptian devotions.

When the Hebrew God sent a storm of hail and fire "such as there was none like it in all the land of Egypt since it became a nation" (Exodus 9:24), He was repudiating the combined efforts of Nut, Geb, Amun-Ra, Osiris, and Pharaoh, to con-

trol the atmospheric conditions that befell the land of Egypt. A similar storm of fire mingled with hail is predicted to hit the earth again during the Great Tribulation. We read, "The first angel sounded, and there followed hail and fire mingled with blood, and they were cast upon the earth" (Rev. 8:7). Just as Pharaoh rejected Yahweh, embraced pagan idols, and hardened his foolish heart, modern men seem destined to repeat the same mistakes. We find "the rest of the men which were not killed by these plagues yet repented not of the works of their hands, that they should not worship devils, and idols of gold, and silver, and brass, and stone, and of wood" (Rev. 9:20). Such verses indicate a latter-day revival of idolatry, and provide the impetus for the last two chapters of this book, in which we discuss the prophetic and extensive aspects of modern paganism.

8) The Plague of Locusts

Thus saith the Lord God of the Hebrews. . . . if thou refuse to let my people go, behold, tomorrow will I bring the locusts into thy coast: And they shall cover the face of the earth, that one cannot be able to see the earth: and they shall eat the residue of that which is escaped, which remaineth unto you from the hail, and shall eat every tree which groweth for you out of the field.
(Exodus 10:3-5)

The locust plague was an awesome spectacle and was one of the most feared pestilences of the ancient world. Such invasions darken the sky and destroy every green thing. An average locust can consume its weight in food daily, and can quickly

amass an army of insects numbering in the hundreds of millions per square mile. In 1927, a few African locusts were spotted near a river in Timbuktu. Within three years, the whole of west Africa was besieged by the creatures. Eventually, locusts covered an area more than 2,000 miles wide—extending from Ethiopia and the Belgian Congo to the luxuriant farm lands of Angola. Finally, 14 years after the plague began, 5,000,000 square miles of Africa (an area twice the size of the United States!) had been destroyed by the locusts.

In ancient times, the idea of such a calamity brought instant terror to the hearts of the vegetation-dependent Egyptians. To avoid defoliation created by Edipoda locusts and other living things, the Egyptians prayed to Sobek—the crocodile-headed god of animals and insects. As the son of Neith, Sobek was the underworld demon of the four elements (fire, earth, water, and air). At his cult center in Arsinoe (Crocodylopolis), where devotees cared for his sacred crocodiles, Sobek was ritually associated with Ra (fire), Geb (earth), Osiris (water), and Shu (air). It was believed that Sobek controlled such elements to the extent that he restrained the activity of certain creatures within specific habitats. Thus, Sobek limited the activity of a crocodile within water, a locust within air, etc. His mastery of such elements was demonstrated in the Isis/Osiris myth, when Isis searched the Nile for the severed body-parts of her husband/brother Osiris. Sobek, out of respect for the goddess, limited the appetite of the river animals, and thus spared the floating pieces of Osiris.

As an Egyptian demon, Sobek was associated with the goddess Ammit—the crocodile-headed

Sobek, by Brooke Townsend

“eater of souls” that dwelt beneath the Scales of Justice in the judgment hall of Osiris. At other times, Sobek and Ammit were depicted as one and the same. In his book, *Egypt, Gift of the Nile*, Walter A. Fairservis, Jr. paraphrased a section of the *Book of the Dead*. In the following paragraph he describes Sobek in the role of Ammit:

According to the book Meri would at last reach the place of the greatest test of all—the Great Judgment Hall. Here in the presence of Osiris, King of the Dead, Anubis the embalmer, Thoth the ibis-headed scribe, and the forty-two gods of judgment, the heart of Meri would be placed on the scales to be weighed with the “Feather of Truth.” If Meri had been a bad man in life, no words or deeds could save him now. His heart would not balance the Feather of Truth, and Meri would be thrown to Sebek (Sobek), the crocodile-headed eater of souls.⁴

In another Sobek-related chapter of the *Book of the Dead*, “Making The Transformation Into The Crocodile-God,” we read:

The Osiris Ani, whose word is truth, saith:-
I am the crocodile god [Sobek] who dwelleth
amid his terrors. I am the Crocodile-god
and I seize [my prey] like a ravening beast.
I am the great Fish which is in Kamui. I am
the lord to whom bowings and prostrations
are made in Sekhem.

Such prostrations were made to Sobek along the Nile river and at his centers at Kom Ombo and Thebes. Sobek’s oblations often included human sacrifices, and this may have been the

Pharaoh's intention when he commanded the midwives to throw the Hebrew children into the Nile. The offerings anticipated Sobek's favor in delivering from bothersome insects, and, if a person wanted to eradicate an annoyance, such as locusts, he or she simply made supplications to Sobek while chanting, "To Sobek with it (the locust)!" The modern-day slang, "to Hell with it!" is a derivative of such a ritual.

It was undoubtedly against the demon-god Sobek, and his pestilence-protection rituals, that the Hebrew God initiated the relentless plague of the locusts. In so doing, Yahweh revealed that Sobek was unable to control the elements, or limit the activity of God's insect army. Sobek's companion, the high god Ra (of fire), could not scorch the creatures. Ra's son Shu, the Egyptian god of sun and wind (air), could not blow the consuming insects away.

It was not until the Hebrew God commanded "a mighty strong west wind, which took the locusts, and cast them into the Red sea" (Exod. 10:19), that the grievous plague was ended. Even so, the heart of Pharaoh was hardened against the God of Israel.

9) The Plague of Darkness

And the Lord said unto Moses, Stretch out thine hand toward heaven, that there may be darkness over the land of Egypt, even darkness which may be felt. And Moses stretched forth his hand toward heaven; and there was thick darkness in all the land of Egypt three days: They saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings. (Exodus 10:21-23)

My research companion, Dr. Jones (I call him “Indy” after Indiana Jones), spoke recently of his trek through Hezekiah’s Tunnel in Jerusalem. He described the interior of the cave as dominated by a darkness “that could be felt, compounded by feelings of claustrophobia, obscurity, and utter dejection.” One can imagine the terrors that the Egyptians must have experienced when the Hebrew God devised a darkness that spread throughout “all the land of Egypt” and lasted for three days! Such an occurrence must have caused an unparalleled despondency, and most certainly would have devastated the Egyptian’s religious idea that Amun-Ra (“The Hidden One”) was the incarnation of the midday sun, and the most powerful god in the Cosmos.

The Egyptians referred to Amun-Ra as “the king of the gods.” They believed that no deity was superior to him, and that the whole of the pantheon would perish without his symmetry. The sun itself was considered “the Eye of Amun-Ra,” and the light and warmth of the midday sun was perceived as the bath of his blessing. Amun-Ra was also called Khepri (the rising sun), and Atum (the setting sun), so that each position of the sun, rising, midday, and setting, was perceived as a posture of Amun-Ra. According to myth, Amun-Ra, like the Sumerian god “Utu” (Shamash), traversed the sky each day. At night, he journeyed through the underworld where the evil god Apepi attempted to prevent him from rising again. With the assistance of the magical masturbation rituals conducted by the Egyptian priests, Amun-Ra was empowered each night to conquer Apepi and become the Ra-Harachte, the bright and morning

sun. His cult center at Thebes was the primary location of such rituals, and the same site boasted the largest religious structure ever built, the temple of Amun-Ra at Karnak. Interestingly, the great Temple of Amun-Ra (with its 100 miles of walls and gardens) was the primary object of fascination and worship by the nemesis of Moses, the Pharaoh of the Exodus, Ramses II. It was believed that each pharaoh, including Ramses II (who completed Amun-Ra's temple), reconciled his divinity in the company of Amun-Ra during the festival of Opet. The festival was held at the Temple of Luxor and included a procession of gods carried on barges up the Nile river from Karnak to the Temple. The royal family accompanied the gods on boats while the Egyptian laity walked along the shore, calling aloud and making requests of the gods. Once at Luxor, the Pharaoh and his entourage entered the holy of holies where the king joined his *Ka* (the mysterious ritual is unknown) and transmogrified into a living deity. Outside, large groups of dancers and musicians waited anxiously. When the king emerged "transformed" (supposedly), the crowd erupted in gaiety. From that day forward Egypt was "guarded" by their king and the Pharaoh was considered the son of the sun god—the earthly representative of the creator deity, Amun-Ra.

Subsequently, it was believed that the midday sun arose above Egypt because the Pharaoh had been honored and inaugurated in the Temple of Amun-Ra. If the sun was ever darkened or eclipsed, it was an evil omen for the king. Egypt's priests carefully interpreted such "signs," and even offered life-saving maneuvers to the Pharaoh. But, when

three days of utter darkness paralyzed the Egyptians (Exodus 10:21-23), the number three being understood by the Hebrews and the Egyptians as representing divine providence, the king's magicians were uncharacteristically silent. Like the three hours of darkness that accompanied the death of Christ (Luke 23:44), the sovereignty of the Highest was believed to be at work. It would do no good to call upon the goddess Nut. She had been proven to be powerless before Yahweh. If the God of the Hebrews was at work, Nut could do nothing to elevate herself nor could she force the light of Amun-Ra to come forth. The sky-cow-goddess Hathor had been equally humiliated by Israel's Lord during the deadly murrain, and the evil god Sobek had been found impotent at controlling the element of sky. The mystical spells of Isis were useless against Yahweh. The priestly magic, paralyzed, and now, Amun-Ra, the Creator "king of the gods" and champion of the Egyptian pantheon, was confirmed helpless before the God of Hebrew slaves. "And Pharaoh called unto Moses, and said. . . . Get thee from me, take heed to thyself, see my face no more; for in that day thou seest my face thou shalt die. And Moses said, Thou has spoken well, I will see thy face again no more" (Exodus 10:24; 28-29). With this final act, Pharaoh sealed the destiny of his kingdom, and, sadly, his firstborn son.

10) Death of the Firstborn

And Moses said, Thus saith the Lord, About midnight will I go out into the midst of Egypt: And all the firstborn in the land of Egypt shall die, from the firstborn of Pharaoh that sitteth upon his throne, even unto

the firstborn of the maidservant that is behind the mill; and all the firstborn of beasts.
(Exodus 11:4-5)

At least six deities were committed to the protection of Egypt's children. They included Heka, the mystical frog-goddess, who oversaw the development of animals and children beginning at the embryonic stage; Isis, the advocate-mother of the children who kept her word; Min, the god of virility who conferred reproductive vigor upon men and who was ritually called upon to produce an heir to the pharaoh; Horus, the son of Isis and Osiris, who protected the Pharaoh's son; Bes, the patron protector of mothers and their children; and the Pharaoh himself—Egypt's protector-incarnation of Amun-Ra and Horus. The female deities, Heka and Isis, oversaw different aspects of the children's physical development, while Min and Horus were the powerful male deities responsible for the spiritual progress and overall health of the child.

Min's full name was Menu-ka-mut-f ("Min, Bull of his Mother"), and he was often worshiped in the image of a white bull. At other times, Min was depicted as a bearded man with an oversized phallus. Such iconography of Min served to verify his position as the eminent Egyptian god of male sexuality, while also accounting for his mythological marriage to Qetesh' the equivalent Egyptian deity of female sexuality. Egyptian boys supposedly acquired their sexual strength from Min, and subsequently made offerings of lettuce (considered an aphrodisiac by the Egyptians) to this god. The Greeks confused Min with Pan, the Dionystic god of unbridled sexual desire, and thus participated

in the orgiastic festivals held in his honor. But the most important area of Min's dominion, insofar as the Pharaoh was concerned, was the mystical relationship between the god and the royal family, including Min's association with the princely heir of Egypt, the pharaoh's son. The pharaoh was so concerned with the blessings of Min that he ceremoniously hoed the lettuce fields during the festival of this god. The idea was to humble himself in the presence of Min and thereby procure divine favor and reproductive synergy. Sexual energy, such as was abundantly produced by Min, was believed to be synonymous with health and longevity. Thus, if the pharaoh and his son were to live long and prosperous lives, they required the favor of Min, the preeminent god of sexual power. Such power of Min would have likely been sought during the death of Egypt's firstborn.

Legend has it that the god Horus was also involved in guarding the pharaoh's son, due, in part, to the mythology that the child Horus had been subjected to homosexual rape by the evil god Seth. The adult Horus was, thus, protective of children in general. Equally important, Horus was believed to incarnate himself within the living pharaoh, and to fill the heart of the pharaoh with respect for the father. The virtue of such parental respect was an important part of ancestor ritual, and referred to the story of Horus and his war with evil Seth over the murder of his father. Such myths supposedly contributed to the survival of the pharaoh and his son in two important ways: 1) Horus was the protector of the father and child, and perched above and behind the pharaoh, spreading his wings around and guarding the

pharaoh's head (another plagiarism reminiscent of the Old Testament passage "in the shadow of Thy wings"); and 2) Horus reminded the royal son of his responsibilities toward the father, especially of the offerings to be made daily at the deceased father's tomb. Such offerings were deemed necessary for maintenance in the afterlife, and amulets (the eye of Horus) placed beside the offerings protected the stomach of the dead. In this way, the living pharaoh (Horus) served the needs of the deceased father, while the predecessor pharaoh conducted himself as the Osiris in the underworld.

In the classic film by Cecil B. DeMille, *The Ten Commandments*, Yul Brynner, in the role of the pharaoh, placed his firstborn son in the arms of the falcon-headed god, Seker (who protected the dead as they passed through the underworld), and said, "Seker, great lord of the lower world, I . . . bow before you now. Show that you have power above the God of Moses. Restore the life he has taken from my son. Guide back his soul across the lake of death to the place of living men." Ramses II undoubtedly prayed in such fashion for the life of his son. Nevertheless, "at midnight the Lord smote all the firstborn in the land of Egypt, from the firstborn of Pharaoh who sat on his throne unto the firstborn of the captive who was in the dungeon" (Exodus 12:29).

By initiating the death of the firstborn, Yahweh executed His final judgment "against all the gods of Egypt" (Exodus 12:12). Heka was proven powerless. Isis was defunct. Min was unable to energize the pharaoh's son. Horus was equally inept. The pharaoh was without a successor to watch

over his tomb. Amun-Ra was without earthly representation. Egypt was without an heir. and the whole of the Egyptian pantheon, with its magic, myths, and rituals, crumbled at once beneath the feet of the Hebrew God. "And Pharaoh rose up in the night, he, and all his servants . . . for there was not a house where there was not one dead. And he called for Moses and Aaron by night, and said, Rise up, and get you forth from among my people, both ye and the children of Israel; and go, serve the Lord, as ye have said" (Exod. 12:30-31).

Important Notes Regarding the Gods of Egypt

The following notes on the Egyptian deities are important and relate to the last two chapters of the book.

From the example of Amun-Ra we learn: 1) prehistoric Egyptians believed in the same idea that evolutionists subscribe to today—the premise that the oceans preceded and in some way contributed to life on earth; 2) Amun-Ra was a self-existing primordial earth spirit; 3) Amun-Ra was associated with moisture spirits (Shu and Tefnut); 4) sacred prostitution was practiced at the Temple of Amun-Ra as a form of imitative magic; 5) the Eye of Amun-Ra (the sun) was considered a living part of "god"; and 6) the Egyptians treated nature "properly" in order to maintain the blessings of the nature spirits.

From the example of Geb we learn: 1) Geb was the original Egyptian "Father Earth"; 2) his sister/wife Nut was the original Egyptian "Mother Sky"; 3) the earth and sky spirits are the "parents" of humanity; and 4) it is important to care for the earth and sky if we want their ongoing blessings.

From the examples of Osiris and Isis we learn: 1) Osiris was the original Egyptian lord of the dead; 2) the Egyptians believed in a netherworld judgement; 3) the Egyptians believed in the *Ka*, an invisible duplicate body throughout life and provided the person with a new body in the underworld; 4) the goddess Isis was the undisputed Queen of magic; 5) her spells were necessary for the navigation of this world and the afterlife; 6) the magic of Isis, if performed properly (at the right time of the day, with the proper crystals and words) would have the effect of altering reality, manipulating the laws of physics, and forcing the being or object to which they were directed into compliance; 7) sacred prostitution (magic sex) was practiced at the temples of Isis and Osiris as a form of imitative magic; 8) imitative magic extended into the spirit world (i.e., placing a wooden crocodile at the grave of an enemy would produce a real crocodile in the underworld); 9) the Egyptians had numerous oracles, and practiced divining through amulets and crystals; 10) the Egyptians practiced self-healing through psychic dreaming, crystals, and positive energies which were assimilated at the temples of Imhotep; and 11) the Egyptian religion may have started following an encounter with the "Watchers," a powerful group of fallen angels who visited the earth during antiquity.

From the example of the Plagues of the Exodus we learn: 1) the plagues of the Exodus illustrate God's supremacy over, and His attitude toward, idolatry and paganism; 2) similar plagues are forecast for the Great Tribulation (boils, hail, darkness, locusts, etc.), and, like the plagues of

the Exodus, they will be directed at paganism (see Rev. 9:20); 3) Egyptians, like modern pagans, worshiped natural phenomena such as rivers, trees, etc., and attributed divine characteristics to such; 4) the Egyptians treated the earth with respect and believed that, if they did so, she (the earth) would continue the cycle of seasons; 5) the magicians of Egypt were powerful and could mimic many of the miracles of God; 6) the creatures of the Nile (fish, hippos, etc.) were sacred, and, like the environmental movement today, were often placed above the needs of the community; 7) Egyptians, like modern abortionists, often protected sacred animals while sacrificing children; 8) gods (demons) could manifest themselves through animal forms; and 9) the following deities were among those directly impacted by the Plagues of the Exodus: Ammit, Amun-Ra, Apepi, Apis, Geb, Hapi, Hathor, Heka, Horus, Imhotep, Isis, Khnum, Min, Neith, Nile River, Nut, Osiris, Pharaoh, Ptah, Sati, Seker, Sekhmet, Seth, Serapis, Shu, Sobek, Tefnut, and Vatchit.

The Gods Who Walked among the Greeks

“Mother, what the gods send us, we mortals bear perforce, although we suffer; for they are much stronger than we.”

—The Homeric Hymns

The Dorians came from out of the north by the tens of thousands. They were nearly invincible Indo-European invaders riding in horse-drawn chariots of war. Between B.C. 2800 and 2000, they conquered most of the indigenous inhabitants of the Middle East, from the inland people of Asia Minor to the Macedonians and beyond, and they did it in the name of their sky god, the thunderous and fearsome Zeus. They came, they conquered, and finally they forged a new and curious fusion of pagan theologies, of the Dorians, Myceneans, and Minoans, into a new and influential society of gods known as the Olympians. Later, known as the famous (and sometimes infamous) gods of Greece, these powerful deities dwelt together above the towering Mount of Olympus in the north, where they “spent their delightful days.” Under Zeus, the greatest of the Olympian gods, was Hera, Poseidon, Hades, Demeter, Apollo,

Artemis, Ares, Aphrodite, Hermes, Athene, Hephaestus, and Hestia (later replaced by Dionysus). Simultaneously, a complex system of lesser Greek deities developed beneath the principle Olympian gods including Adonis, Selene, Hypnos, Asclepius, Eros, and, of course, Hercules.

The Major Oracle Gods— Zeus and Apollo

In Hesiod's *Theogony* we are told of a time when twelve pre-Olympian gods, known as the Titans, ruled the Universe. These were the children of Mother Earth (Gaia), who gave birth to the "elder" gods by cohabiting with Uranus (Heaven), who also sired the mountains, the sea, the hundred-handed monsters, and the Cyclops. The important Titans included Oceanus, Tethys, Mnemosyne, Themis, Hyperion, Lapetus, and Atlas. But when Uranus attempted to imprison the Titans within the body of his wife (the earth), Cronus, "the youngest and most terrible of her children," conspired with his mother and castrated Uranus with a sickle. The mutilation of Uranus separated Heaven from Earth and succeeded in freeing the Titans. When the powerful Cronus later cast the severed genitals of his father into the sea, a white foam enveloped them, from which Aphrodite was born; thus, the name Aphros, or "foam-born."

As the newly-crowned king of the gods, Cronus took note of the beauty of his sister Rhea, and married her. Six famous god-children were born of their union: Hestia, Demeter, Hera, Hades, Poseidon, and Zeus. Since Mother Earth and Father Uranus warned Cronus that his offspring

would someday try to overthrow and replace him as the king of the gods, Cronus attempted to circumvent the possibility by swallowing each child whole as it was born. But Rhea, "cunning as the night air," replaced the baby Zeus with a cloth-wrapped stone which Cronus unwittingly swallowed instead. Afterward, Rhea hid the young Zeus at Crete, where he was fed on the milk of the goat Amalthea and where he remained until adulthood, protected by the nymphs. Years later, Zeus somehow forced Cronus to regurgitate his brothers and sisters. A fierce ten-year war ensued, and the younger and powerful Olympian gods overthrew the older Titans, casting them down into Tartarus (Hell) where they (except for Hecate) were to remain fettered forever.

Eventually, Zeus reconciled with the Titans and proclaimed Cronus the ruler of the Golden Age. But, for the time being, Zeus, fresh from the triumphant victory, summoned his brothers, Hades and Poseidon, and decreed that the universe should thereafter be divided among them. They cast lots, and the sky became the dominion of Zeus; Poseidon was chosen to rule over the sea, and the inner-earth or underworld was declared the haunt of Hades. Notwithstanding, the surface of the earth was determined to be neutral territory, a place where sky, sea, and the underworld joined together, and thus a place where any of the gods could rest, chiefly upon Mount Olympus. Hephaestus was commissioned, and immediately adorned the heavenly stronghold of Olympus with intimate dwelling-places for the victorious gods, each surrounding the beautiful palace of Zeus.

Then, according to a former vow, Zeus be-

Zeus, by Brooke Townsend

stowed additional privileges upon the Olympians. It seems that Zeus had vowed to his supporters that victory over Cronus and the Titans would result in "spheres of influence" for each of the faithful gods. Consequently, Hephaestus was made the "lord of the fire." Demeter was given the dominion of agriculture. Artemis was placed over the wild animals. Hera, the wife of Zeus, was made the overseer of the various phases of female life. Hermes became the messenger of Zeus and the protector of travellers. Apollo was placed over music, prophecy, healing, and so on. Even so, Zeus remained the preferred god of the early Greeks.

There was scarcely any part of the Greek's daily life in which Zeus was not involved. He was Zeus Herkeios (protector of the house) and Zeus Ktesios ("the Acquirer"). He was Zeus Hikesios (friend of the fugitive) and Zeus Polieus (guardian of the city). His firmly-held position as the supreme and high god within the Greek religion has been easily verified by archaeology, including the discovery of the great temple of Zeus. This masterwork stood in the southern part of the precinct of Zeus at Olympia (the Atlis), and exhibited the famous gold and ivory colossus of Zeus by Pheidias (destroyed in A.D. 462), a single masterpiece estimated to be the greatest work of art in all of antiquity, and one of the Seven Wonders of the ancient world.¹

More important in ritual than in mythology, was the oracle and altar worship that developed throughout Asia Minor in response to the popularity of Zeus. In Pergamum, perpetual sacrifices were offered to the deity upon the

towering and famous 40 foot high altar of Zeus, the same artifact which now stands inside the Berlin Museum. Some scholars believe that Antipas, the first leader and martyr of the early Christian church in Pergamum, was slain for resisting the altar worship of Zeus in Pergamum. Tradition holds that Antipas was slowly roasted to death inside the statue of a bull, the symbol and companion of Zeus, and some claim that the passage in Revelation 2:13 is a reference to the cult worship of Zeus at Pergamum. We read: "I know thy works, and where thou dwellest, even where Satan's seat is. . . . wherein Antipas was my faithful martyr, who was slain among you, where Satan dwelleth." Others believe this passage refers to Caesar worship, while still others (myself included) contend that the phrase in Revelation 2:13 is a reference to the cult worship of Asclepius, the Greek god of healing. But the argument could be made for a Pergamum connection between Zeus and the biblical Satan, as both were considered gods of thunder, Zeus in antiquity and Satan in modern times. Zeus was also known as the king or "prince" of the air, as was Satan. (See Eph. 2:2)

· Lastly, altars have been discovered near Pergamum which were dedicated to Zeus Kataibates, which most accurately means "Zeus who descends" (in thunder and lightning), and, of course, Jesus said of Satan, "I beheld Satan as lightning fall [descend] from heaven" (Luke 10:18). In any case, the fact that Zeus was a powerful presence in ancient cult and ritual is undisputed. His principle oracle was at Dodona, the chief city of Epirus and the "land of the oak trees," where a shrine to Zeus had existed since the second

Aphrodite, by Brooke Townsend

millennium B.C. For a while, the oracle at Dodona rivaled Apollo's famous oracle at Delphi, as consultations with Zeus grew in popularity. At Dodona, Zeus provided the inquiring mortals with divine guidance by whispering through the leaves of a sacred oak tree attended to by bare-footed priests called Selloi.² At other times, Zeus communicated through the splashing of water in a nearby sacred spring, or through the cooing of sacred pigeons. Eventually, his answers were simplified and divination came through the casting of lots or by interpreting the echo of a gong. But it was the oak-tree oracle at Dodona that claimed to be the oldest in Greece and the "father of gods and men."

The connection between Zeus and the tree oracles probably began with certain prehistoric religious ideas from Crete and undoubtedly refers to the earliest marriage of the Dorian Zeus and the Minoan/Cretan willow goddesses. In Hagia Triada, Zeus was called Zeus Welkhanos, which means the "god of the willow-tree."³ He was also known by the name Welkhanos at Gortyna and at Phaistus where he was somehow ritually associated with his lover Leto. The cult worship of Zeus and Leto in Phaistus was curious in its own right, because it connected the ancient elements of earth worship (the children of Gaia conversing through various nature manifestations, i.e., the willow-tree) and transsexualism. In fact, the worship of Zeus was sometimes overshadowed in Phaistus by the cult of Leto, as the Cretan youths cast off their boyish garments during their initiation into manhood. The festival was called the *Ekdysai* ("Casting off") and was associated with the myth of Leucippus, a peculiar legend in which a baby girl

(Leucippus) was born to a woman named Galatea who preferred instead to have a son, so she persuaded Leto to let the girl change her sex into a boy when she grew up. During the Cretan initiation, the young men apparently lay down beside a statue of Leucippus in the temple of Leto where the blessings of growth and of fertility could be invoked. Comparable traces of transsexuality, lesbianism, witchcraft, and feminism, were incorporated into various other goddess myths and will be considered later in this book.

Apollo and the Pythians

According to the Greeks, the greatest outcome of the love affair between Zeus and Leto was the birth of the most beloved of the oracle gods, Apollo. More than any other god in classical Greece, Apollo inspired the nobler passions of poetry, painting, and music. He was the god of prophecy, music, archery, and healing. But the primitive deity whose myth grew into the Olympian Apollo was probably of a much lower original stature as some histories suggest that Apollo started out as a Hittite wolf god who was venerated by shepherds and who protected the flocks against the ravages of wild animals. The Hittite people called him Apulunas or Appaliunaas. The more liberal Greek scholars agreed with the pre-Olympian origin of Apollo, and some even claimed that he had been the god of the Hyperboreans, an ancient and legendary people to the north. Herodotus claimed that the Hyperboreans continued in their worship of Apollo even after his induction into the Greek pantheon, and that they made an annual pilgrimage to the land of Delos

where they participated in the famous Greek festivals of Apollo.

Lycia, a small country in southwest Turkey, also had an early connection with Apollo, and he was known there as Lykeios, which some have adjoined to the Greek Lykos or "wolf," thus, the ancient title: "the wolf slayer." But, in the end, it was the mythology of the Greeks that secured Apollo's place in history. Apollo, with his twin sister Artemis, was said by the Greeks to have been born in the land of Delos, the children of Zeus and of the Titaness Leto. Appropriately, an important oracle existed at Delos and played a significant role in the festivals of the god.

While the Delos oracle was important, it was nevertheless the famous oracle at Delphi that became the popular mouthpiece of the Olympian. Located on the mainland of Greece, the omphalos of Delphi (the stone which the Greeks believed marked the center of the earth) can still be found among the ruins of Apollo's Delphic temple. On a singular column was carved the three maxims: "Know thyself," "Nothing in excess," and "Go surety, and ruin is at hand." So important was Apollo's oracle at Delphi that wherever Hellenism existed, its citizens and kings, including some from as far away as Spain, ordered their lives, colonies, and wars, by its sacred communications.

At Delphi, the Olympian gods spoke to mortal men through a priesthood, which interpreted the trance-induced utterances of the Pythoness or Pythia. She was a middle-aged woman who sat on a copper-and-gold tripod, or, much earlier, on the "rock of the sibyl" (medium), and crouched over a fire while inhaling the smoke of burning

Apollo, by Brooke Townsend

laurel leaves, barley, marijuana, and oil, until a sufficient intoxication for her prophecies had been produced. While the use of the laurel leaves may have referred to the nymph Daphne (Greek for Laurel), who escaped from Apollo's sexual intentions by transforming herself into a laurel tree, the leaves also served the practical purpose of supplying the necessary amounts of hydrocyanic acid and complex alkaloids which, when combined with hemp, created cerebral and powerful hallucinogenic visions.

An alternative version of the Oracle myth claims that the pythia sat over a fissure breathing in magic vapors that rose up from a deep crevice within the earth. The vapors "became magic" as they were mingled with the smells of the rotting carcass of the dragon Python, which had been slain and thrown down into the crevice by Apollo as a youth. The former version is obviously the truth, and, in either case, it was under the spell of such drugs (and spiritual forces?) that the Pythia prophesied in an unfamiliar voice thought to be that of Apollo himself. During the pythian trance, the medium's personality often changed, becoming melancholic, defiant, or animal-like. This psychosis may have been a source for the origin of the werewolf myth, or lycanthropy, as the Pythia reacted to an encounter with Apollo/Lykeios, the wolf god. In either case, the Delphic "women of python" prophesied in this way for nearly a thousand years and were considered to be a vital part of the religious order, and of the local economy, of every Hellenistic community. An interesting example of this is found in the New Testament Book of Acts:

And it came to pass, as we went to prayer, a certain damsel possessed with a spirit of divination [of python, a seeress of Delphi] met us, which brought her masters much gain by soothsaying: The same followed Paul and us, and cried, saying, These men are the servants of the most high God, which shew unto us the way of salvation. And this did she many days. But Paul, being grieved, turned and said to the spirit, I command thee in the name of Jesus Christ to come out of her. And he came out the same hour. And when her masters saw that the hope of their gains was gone, they caught Paul and Silas. . . . And brought them to the magistrates, saying, These men, being Jews, do exceedingly trouble our city. (Acts 16:16-20)

The story in Acts is interesting because it illustrates the level of culture and economy that had been built around the oracle worship of Apollo. It cost the average Athenian more than two days' wages for an oracular inquiry, and a lawmaker or military official seeking important State information was charged ten times that rate. That's one reason the actions of the woman in Acts are difficult to understand. She undoubtedly understood the damage that Paul's preaching could do to her industry.

Furthermore, the Pythia of Delphi had a historically unfriendly relationship with the Jews and was considered an enemy of the truth and a pawn of demonic power by both the Jews and the Christians. Quoting again from *Spiritual Warfare—The Invisible Invasion*,

Delphi with its surrounding area, in which the famous oracle ordained and approved the worship of Asclepius, was earlier known by the name Pytho, a chief city of Phocis. In Greek mythology, Python, the name-sake of the city of Pytho, was the great serpent or demon who dwelt in the mountains of Parnassus, menacing the area as the chief guardian of the famous oracle at Delphi. . . . In Acts 16:16, the demonic woman who troubled Paul was possessed with a spirit of divination. In Greek this means a spirit of python (a seeress of Delphi, a pythoness) . . . [and] reflects . . . the accepted Jewish belief . . . that the worship of Asclepius [Apollo's son] and other such idolatries were, as Paul would later articulate in 1 Corinthians 10:20, the worship of demons.⁴

It could be said that the Pythia of Acts 16 simply prophesied the inevitable. That is, the spirit that possessed her may have known that the time of Apollo's darkness was coming to an end, and the spread of Christianity would ultimately lead to the demise of the Delphic oracle. This is possible. Demons are sometimes aware of changing dispensations (compare the plea of the demons in Matthew 8:29, "What have we to do with thee, Jesus, thou Son of God? art thou come hither to torment us before the time?").

Perhaps the ancient spirit of Delphi understood the dispensation timing and power of the gospel Paul was preaching? The last recorded utterance of the oracle at Delphi seems to indicate the spirit of the Olympians understood time for

domination was over. From *Man, Myth & Magic*, we read:

Apollo. . . delivered his last oracle in the year 362 A.D., to the physician of the Emperor Julian, the Byzantine ruler who tried to restore paganism after Christianity had become the official religion of the Byzantine Empire. "Tell the King," said the oracle, "that the curiously built temple has fallen to the ground, that bright Apollo no longer has a roof over his head, or prophetic laurel, or babbling spring. Yes, even the murmuring water has dried up."⁵

As the oracle at Delphi slowly diminished, Apollo secured his final and most durable characterization through the influence of his favorite son, Asclepius. Beginning at Thessaly and spreading throughout the whole of Asia Minor, the cult of Asclepius, the Greek god of healing, became the chief competitor of early Christianity. Asclepius was even believed by many pagan converts of Christianity to be a living (evil?) presence who possessed the power of healing. Major shrines were erected to Asclepius at Epidaurus and at Pergamum, and for a long time he enjoyed a strong cult following in Rome where he was known as Aesculapius. Usually depicted in Greek and Roman art as carrying a sacred snake wound around a pole, Asclepius was often accompanied by Telesphoros, the Greek god of convalescence. He was credited with healing a variety of incurable diseases, including raising a man from the dead, a miracle that later caused Hades to complain to Zeus, who responded by killing Asclepius with a thunderbolt. When Apollo argued that his son

had done nothing worthy of death, Zeus repented and restored Asclepius to life, immortalizing him as the god of medicine.

Because the snake was sacred to Asclepius and played a vital role in the healing rituals at his shrines (hospitals), some claim the healing cult of Asclepius began with the biblical story of Moses and the brazen serpent. We read: "And the Lord said unto Moses, Make thee a fiery serpent, and set it upon a pole: and it shall come to pass, that every one that is bitten, when he looketh upon it, shall live [be healed]" (Num. 21:8). In 2 Kings 18:4, the children of Israel developed a cult following of the brazen serpent and worshipped the image as a healing oracle. Some scholars believe the Greeks borrowed from this history in formulating the myth of Asclepius. Either way, Asclepius represented the last popular cult of the Olympian Apollo myths and was one of the most durable challenges to Christianity by the ancient pagan's who dominated Asia Minor for more than 4,000 years. So popular had the iconography of Asclepius become that, to this day, the sacred snakes of the healing god can be found adorning the entry doors and halls of hospitals in cities around the world.

Facts about Dionysus (Bacchus)— The Mystery God

Dionysus, the Thirteenth God of the Greeks, was the divine son of Zeus and of the mortal Semele. He was often depicted as the inventor of wine, abandon, and revelry, but this description seems inadequate in that it refers only to the basic elements of intoxication and enthusiasm, which were used by the Bacchae (the female participants

of the Dionysiac mysteries; also known as Maenads and Bacchantes) in their rituals to experience Dionysus, the intoxicating god of unbridled human desire. Followers of Dionysus considered him to be much more than the inventor of wine. He was the presence that is otherwise defined as the craving within man that longs to "let itself go" and to give itself over to the baser earthly desires. What a Christian might resist as the lustful desires of the carnal man, the followers of Dionysus embraced as the incarnate power that would, in the next life, liberate the souls of mankind from the constraints of this present world, and from the customs which sought to define respectability through a person's obedience to moral law.

Until that liberating (?) day arrived, the worshippers of Dionysus attempted to bring themselves into union with the god through a ritual casting off of the bonds of sexual denial and primal constraint by seeking to attain to a higher state of ecstasy. The uninhibited rituals of ecstasy (Greek for "outside the body") supposedly brought the followers of Dionysus into a supernatural condition that enabled them to escape the temporary limitations of the body and mind, and to achieve a state of *enthousiasmos*, or, "outside the body and inside the god." In this sense, Dionysus represented a dichotomy within the Greek religion, as the primary maxim of the Greek culture was one of moderation, or, "nothing too extreme." But Dionysus embodied the absolute extreme in that he sought to inflame the forbidden passions of human desire. Interestingly, as most students of psychology will understand, this gave Dionysus a stronger allure among the Greeks who other-

wise tried in so many ways to suppress and control the wild and secret lusts of the human heart. But Dionysus resisted every such effort, and, according to myth, visited a terrible madness upon those who tried to deny him his free expression. The Dionysiac idea of mental disease resulting from the suppression of secret inner desires, especially aberrant sexual desires, was later reflected in the atheistic teachings of Sigmund Freud. Thus, Freudianism might be called the grandchild of the cult of Dionysus.

Conversely, the person who gave himself over to the will of Dionysus was rewarded with unlimited psychological and physical delights. Such mythical systems of mental punishments and physical rewards based on resistance and/or submission to Dionysus, were both symbolically and literally illustrated in the cult rituals of the Bacchae, as the Bacchae women (married and unmarried Greek women had the "right" to participate in the mysteries of Dionysus) migrated in frenzied hillside groups, dressed transvestite in fawn skins and accompanied by screaming, music, dancing, and licentious behavior. When, for instance, a baby animal was too young and lacking in instinct to sense the danger and run away from the revelers, it was picked up and suckled by nursing mothers who participated in the hillside rituals. But when older animals sought to escape the marauding Bacchae, they were considered "resistant" to the will of Dionysus and were torn apart and eaten alive as a part of the fevered ritual.

Human participants were sometimes subjected to the same orgiastic cruelty, as the rule of the cult was "anything goes," including lesbianism,

Dionysus, by Brooke Townsend

bestiality, etc. Later versions of the ritual (Bacchanalia) expanded to include pedophilia and male revelers, and perversions of sexual behavior were often worse between men than they were between men and women. Any creature (sometimes a child) that dared to resist such perversion of Dionysus was subjected to sparagmos ("torn apart") and omophagia ("consumed raw"). In B.C. 410, Euripides wrote of the bloody rituals of the Bacchae in his famous play, *The Bacchantes*.⁶

The Bacchantes. . . . with hands that bore
no weapon of steel, attack our cattle as they
browsed. Then wouldst thou have seen
Agave mastering some sleek lowing calf,
while others rent the heifers limb from limb.
Before thy eyes there would have been hurl-
ing of ribs and hoofs this way and that, and
strips of flesh, all blood be-dabbled, dripped
as they hung from the pine branches. Wild
bulls, that glared but now with rage along
their horns, found themselves tripped up,
dragged down to earth by countless maid-
ens hands.

Euripides went on to describe how Pentheus, the King of Thebes, was torn apart and eaten alive by his own mother as, according to the play, she fell under the spell of Dionysus.

The tearing apart and eating alive of a sacrificial victim may refer to the earliest history of the cult of Dionysus. An ancient and violent cult ritual existing since the dawn of paganism stipulated that, by eating alive, or by drinking the blood, of an enemy or an animal, a person might somehow capture the essence or "soul-strength" of the victim. The earliest Norwegian huntsmen believed

this, and they drank the blood of bears in an effort to capture their physical strength. East African Masai warriors also practiced omophagia, and sought to gain the strength of the wild by drinking the blood of lions. Human victims were treated this way by Arabs before Mohammed, and head-hunters of the East Indies practiced omophagia in an effort to capture the essence of their enemies.

Today, omophagia is practiced by certain Voodoo sects as well as by cult Satanists. It should be pointed out that such modern omophagia illustrates a continuing effort on the part of Satan to distort the original revelations of God. Eating human flesh and drinking human blood as an attempt to "become one" with the devoured is, in many cases, a demonization of the Eucharist, or Holy Communion. But sparagmos and omophagia, as practiced by the followers of Dionysus, was not an attempt of transubstantiation (as in the Catholic Eucharist), nor of consubstantiation (as in the Lutheran communion), nor yet of a symbolic ordinance (as in the fundamentalist denomination), all of which have as a common goal—the elevating of the worshipper into a sacramental communion with God. The goal of the Bacchae was the opposite: the frenzied dance, the thunderous song, the licentious behavior, the tearing apart and eating alive, all were efforts on the part of the Bacchae to capture the essence of the god (Dionysus) and bring him down into an incarnated rage within man. The idea was not one of holy communion, but of possession by the spirit of Dionysus. When one recalls the horrific rituals of the followers of Dionysus, it's easy to believe that a demonic pos-

session actually occurred. A Christian should find this idea as plausible, and, it would seem, so did the Hebrews.

The Hebrew people considered Hades (the Greek god of the underworld) to be equal with Hell and/or the Devil, and many ancient writers likewise saw no difference between Hades (in this sense the Devil) and Dionysus. Euripedes echoed this sentiment in the *Hecuba*, and referred to the followers of Dionysus as the “Bacchants of Hades.”⁷ In Syracuse, Dionysus was known as Dionysus Morychos (“the dark one”) a fiendish creature; roughly equivalent to the biblical Satan, who wore goatskins and dwelt in the regions of the underworld.⁸ In the scholarly book, *Dionysus Myth and Cult*, Walter F. Otto connected Dionysus with the prince of the underworld. He wrote:

The similarity and relationship which Dionysus has with the prince of the underworld (and this is revealed by a large number of comparisons) is not only confirmed by an authority of the first rank, but he says the two deities are actually the same. Heraclitus says, “Hades and Dionysus, for whom they go mad and rage, are one and the same.”⁹

But the Hebrews considered the magic (witchcraft) of the Bacchae to be the best evidence of Dionysus’ Satanic connection, and, while most of the details are no longer available because Dionysus was a mystery god and his rituals were revealed to the initiated only, the Hebrew prophet Ezekiel described the “magic bands” (*kesatot*) of the Bacchae, which, as in the *omophagia*, were used

to capture (magically imprison) the souls of men. We read,

Therefore, thus says the Lord GOD, "Behold I am against your magic bands [kesatot] by which you hunt lives [souls] there as birds, and I will tear them off your arms; and I will let them go, even those lives [souls] whom you hunt as birds." (Ezek. 13:20 NAS)

In Acts 17:34, we read of a soul liberated from the control of Dionysus: "Howbeit certain men clave unto [Paul], and believed: among the which was Dionysius the Areopagite." To carry the name of Dionysus usually meant one of two things: 1) the parents were devotees of Dionysus and thus the child was "predestined" to be a follower of the god; or 2) the individual was under the spell of the kesatot. The kesatot was a magic arm band used in connection with a container called the kiste.

Wherever the kiste is inscribed on sarcophagi and on Bacchic scenes, it is depicted as a sacred vessel (a soul prison?) with a snake peering through an open lid. How the magic worked and in what way a soul was imprisoned is still a mystery. Pan, the half-man/half-goat god (later relegated to devildom) is sometimes pictured as kicking the lid open and letting the snake (soul?) out. Such loose snakes were then depicted as being enslaved around the limbs, and bound in the hair, of the Bacchae women. Such imagery of Pan, the serpents, the imprisoned souls, and the magic Kesatot and Kiste, have not been adequately explained by any available authority, and the interpretation of

them as a method for producing zombies is thus subject to ongoing scrutiny. Since the prophet Ezekiel spoke of the efforts of the Bacchae to mystically imprison the souls of men through the magic bands of Dionysus, and since Pan was most beloved of Dionysus, because of his pandemonium (“all the devils”) which struck sudden panic in the hearts of men and beasts, and as the serpent was universally accepted by the Hebrews as a symbol of occult devotion, it can be easily surmised that the iconography of Dionysus represented the most tenacious effort on the part of the Bacchae to embrace the will of evil supernaturalism.

Facts about Demeter— The Mystery Goddess

While the mysteries of Dionysus were closely associated with those of Demeter (some very ancient histories suggest that Dionysus, Demeter, and Persephone were a type of unholy trinity), the rituals of Demeter, the goddess of agriculture and fertility, were different in that they were observed by married women only (participation was mandatory for all wives of Greek citizens), and, unlike the rituals of the Bacchae, chastity was strictly enforced. The Thesmophoria was the most popular of the fertility festivals held in honor of Demeter, and it drew the largest crowds at Athens and at Eleusis for nearly 2,000 years. Demeter’s celebrations also boasted the most protected cult secrets of the mystery religions because her rituals were performed inside the inner sanctum of the Temple of Demeter (the Telesterion) and were so well-guarded by the Temple devotees that little has survived to enlighten us as to what actually

occurred there. Only those portions of the Thesmophoria held outside of the Temple were publicly recorded (sparsely) and provide us with a partial historical record.

What is known is that the rituals of the Thesmophoria were based on the mythology of the abduction and rape of Persephone (Proserpina), and of Demeter's (Persephone's mother) subsequent actions in searching for her daughter. The cult's rituals are, therefore, interpreted according to the Demeter myth. The myth claimed that Hades, the dark god of the underworld, fell in love with beautiful Persephone. One day, as she plucked flowers in a grassy meadow, Hades swooped down in his chariot and dragged Persephone down into the underworld, where he forced her to become his bride. Above ground, Demeter was distraught by her daughter's disappearance, and she searched the earth in vain to find her. With the help of Helios and Hecate, Demeter finally discovered the truth of what happened, and, in her fury, she demanded that Hades release her daughter. When Hades refused, Demeter sent a horrific famine upon the earth. Plants dried up; Seeds refused to sprout, and the gods began to suffer from a lack of sacrifices. Finally, Zeus dispatched Hermes to intercede with the lord of the underworld, and, after a great debate, Hades agreed to release Persephone if she would eat a pomegranate seed.

What Persephone did not understand was that by eating the pomegranate seed in the mystical location of the underworld, a sort of divine symmetry was created that bonded Persephone with Hades. This ensured that the goddess would

automatically return to the underworld for a third part of each year (in the winter), during which time the seeds of the ground would not grow. Persephone thus became the upperworld goddess of youth and happiness, and the underworld queen of the dead; a dual role depicting her as both good and evil. On earth, she was the goddess of the young and the friend of the nymphs who appeared in the blooming of the spring flowers (symbolizing her annual return from Hades), and in the underworld she was the dreaded wife of Hades and the Queen of the Darkness who controlled the fates of deceased men. The reenactment of such myth, the abduction and rape of Persephone, was central to the rituals of the Thesmophoria, and, as such, were key to interpreting the bits of information that are known.

The festival of the Thesmophoria, sometimes called the Eleusinian Mysteries, lasted from three to ten days. Each day of the festival had a different name and included specific rituals. A highlight of the festival was a procession from Athens to Eleusis which was led by a crowd of children known as Ephebi. The Ephebi assisted in carrying the hiera (sacred objects), and in pulling a statue of Dionysus as a boy (Iacchos), and finally in the ceremonial cleansing of the initiates (candidates of the mystery religion) in the sea. Upon arriving at Eleusis, the women organized the first day of the celebration (Anodos) by building temporary shelters and electing the leaders of the camp. On the second day (Nesteia), they initiated the Greater Mysteries which, according to myth, produced the cult's magical requests (a fertile harvest). Such mysteries included a parody of the abduction and rape of

Persephone, and the positioning of the female devotees upon the ground weeping (in the role of Demeter for her daughter) and fasting for the return of Persephone (the return of spring). The setting upon the ground and fasting was also intended to mystically transfer the “energies” of the women into the ground, and thus into the fall seeds.

Not surprisingly, the festival was held during the time of the fall planting, so as to nearly guarantee a positive response to the cult’s magic. On the fifth day of the festival, the participants drank a special grain mixture called *kykeon* (a symbol of Persephone) in an attempt to assimilate the spirit of the goddess. The idea was to produce a blessing of fertility, both of the crops and of children. About this same time, certain women, called *Antleriai*, were cleansed in the sea and then sent down into the mountainside trenches to recover the sacrificial piglets and various other sacred objects that had been thrown down into the hillside canyons several days earlier. The sacred objects included dough replicas of snakes and of genitalia, which were burned, with the piglets and a grain-seed-mixture, as an offering to Demeter.

The reason for the casting of the piglets into the mountainside cliffs has been thoroughly debated and no single interpretation has emerged as the absolute authority. While several mystical representations can be made of the symbology, and the dough replicas are obviously fertility symbols, pigs’ blood was sacred to the gods and, thus, the piglets are key to understanding the ritual. Greeks venerated pigs because of their uncanny ability to find, and unearth, underground items

(roots, etc.). Some scholars conclude from this that the ritual casting of the pigs “into the deep” was a form of imitative magic based on the underworld myth of Persephone and Hades. That is to say, casting the piglets into the deep canyon trenches, and fetching them out again, represented the descent of Persephone into the underworld and her subsequent ascension back up to the surface of the earth. The piglets in the trenches may have also served the practical purpose of supplying a host (body) for Persephone to hide in until the *antleriai* could assist her (by retrieving the piglets) in her annual escape from the underworld. Burning the piglets later that night would, according to an ancient religious idea that fire passes the soul from one location to another, free the spirit of Persephone into the upperworld (compare the children sacrificed to Baal who “passed through the fire” from the physical world into the spiritual). This interpretation sounds reasonable and is considered by some to be true.

Since the New Testament informs us that pagan rituals, such as those performed in the Thesmophoria, were the worship of demons, “The things which the Gentiles sacrifice, they sacrifice to devils . . .” (1 Cor. 10:20), one wonders if a connection between the ritual casting of the piglets down into the deep canyon trenches (representing a descent into hell), and the biblical story of the Gadarene demoniac, existed.

In Luke, chapter Eight, we read:

And they arrived at the country of the Gadarenes. . . . And when he [Jesus] went forth to land, there met him out of the city a certain man, which had devils. . . . When

he [the demoniac] saw Jesus, he cried out, and fell down before him, and with a loud voice said, "What have I to do with thee, Jesus, thou Son of God most high? I beseech thee, torment me not". . . . And Jesus asked him, saying, "What is thy name?" And he said, "Legion:" because many devils were entered into him. And they besought him that he would not command them to go out into the deep. And there was there an herd of swine feeding on the mountain: and they besought him that he would suffer them to enter into them. And he suffered them. Then went the devils out of the man, and entered into the swine: and the herd ran violently down a steep place into the sea, and were choked. (Luke 8:26-33)

The word *deep* in this text is *Abussos* (the Abyss), and refers to the underworld, Bottomless Pit. Since the principle elements of the sea, the swine, and the deep were employed; and since the Abyss (part of the underworld) was central to the narrative; and since the cult rituals of the Thesmophoria were well known throughout Asia Minor and were considered by the Hebrews to be an activity of the devil (the inhabitants of Hades were known as "Demeter's people," and Hecate, the goddess of witchcraft, was Perserphone's underworld guide during the rituals); one could easily surmise that Jesus was mocking the Thesmophoria. It is possible that Jesus was revealing, to His followers and to the neighboring communities, that Dionysus and Demeter were, in fact, devils. It may be a stretch to suggest an interpretation of the biblical

story in this way, but clearly the similarities and historical proximities are startling, especially since the demons requested an entry into the swine.

Why would demons make such a plea? There are two possible connections with the Thesmophoria: 1) the demons believed that by entering the swine they could escape the underworld deep (as in the magical Persephone escape ritual described above); and 2) Jesus, by granting the request of the devils, was illustrating that the Thesmophoria ritual of casting the piglets into the deep was inherently demonic. Obviously, there are other possible interpretations of the narrative in Luke 8. But since this is the only record of Jesus granting the petition of demons, it seems possible that a powerful social commentary on a popular pagan idea, like that of the Thesmophoria of Demeter, was being made by the Master.

Demeter and the Mother Earth Spirit

While much is still unknown about the mysteries of Demeter, the basis of her popularity was almost certainly rooted in her divinity as a mother-earth goddess. Demeter (De or Da “earth”, and meter “mother”) actually means “earth mother.” As earth mother, Demeter was the giver of generosity and grace and the controller of the awesome forces of nature. She was loved as the giver of food and fertility and was feared as the taker of life. She could open her womb with blessings and abundance and could enclose the dead in her soil. Either way, at all times, she commanded absolute reverence.

Without a doubt, the worship of the earth’s “spirit” as a mother, and the incarnation of the

earth's fertility forces within specific goddesses, was one of the oldest and most widespread forms of paganism recorded in antiquity. Whether it was Inanna of the Sumerians, Ishtar of the Babylonians, or Fortuna of the Romans, every civilization had a sect of religion based on the embodiment of the earth's spirit as a mother-goddess. The Egyptians worshipped Hathor in this way, as did the Chinese, Shingmoo. The Germans worshipped Hertha as the great Earth Mother, and the apostate Jews idolized "the queen of heaven." In Greece, the queen of the Olympian goddesses and wife of Zeus was Hera, the benevolent earth mother. Before her was Gaia (Gaea, the Greek creator-mother earth) and beneath her were many other Greek earth goddesses, including Demeter, Artemis, Aphrodite, and Hecate.

The principal idea was, and evidently still is among New Age devotees, that the earth is a living entity. The ancient and universally accepted idea that the "living earth" was also a fertile mother was conceptualized in different ways and in various goddess myths and images throughout the ancient world. In *The Golden Asse*, by second century Roman philosopher Lucius Apuleius, evidence reveals that the spirit of the earth was perceived as a feminine force, and that such force incarnated itself at various times, and to different people, within the goddess mothers. Note how Lucius prays to the earth spirit:

O blessed Queene of Heaven, whether thou
be the Dame Ceres [Demeter] which art
the original and motherly source of all fruitful
things in earth, who after the finding of
thy daughter Proserpina [Persephone],

through thy great joy which thou diddest presently conceive, madest barrain and unfruitful ground to be plowed and sowne, and now thou inhabitest in the land of Eleusie [Eleusis]; or whether thou be the celestiall Venus . . . [or] horrible Proserpina . . . thou hast the power to stoppe and put away the invasion of the hags and ghoasts which appeare unto men, and to keep them downe in the closures [womb] of the earth; thou which nourishest all the fruits of the world by thy vigor and force; with whatsoever name is or fashion it is lawful to call upon thee, I pray thee, to end my great travaile.

The earth spirit responds to Lucius:

Behold Lucius I am come, thy weeping and prayers hath mooved me to succour thee. I am she that is the natural mother of all things, mistresse and governesse of all the elements, the initial progeny of worlds, chiefe of powers divine, Queene of heaven, the principall of the Gods celestiall, the light of the goddesses: at my will the planets of the ayre [air], the wholesome winds of the Seas, and the silence of hell be disposed; my name, my divinity is adored throughout all the world in divers manners, in variable customes and in many names, for the Phrygians call me the mother of the Gods: the Athenians, Minerva: the Cyprians, Venus: the Candians, Diana: the Sicilians, Proserpina: the Eleusians, Ceres: some Juno, other Bellona, other Hecate: and principally the aethiopians . . . Queene Isis.¹⁰

One could assume, based on such texts, that a single spiritual source (or realm) energized the many goddess myths. Likewise, in the ancient hymn, "To Earth, the Mother of All," Homer illustrates how the earth-spirit was universally involved in the affairs and lives of nations. Through Homer's dedication to the earth we discover how far-reaching and omnipresent the mother-earth spirit was thought to be:

I will sing of well founded Earth, mother of all, eldest of all beings. She feeds all creatures that are in the world, all that go upon the goodly land, and all that are in the paths of the seas, and all that fly: all these are fed by her store. Through you, O queen, men are blessed in their children and blessed in their harvests, and to you it belongs to give means of life to mortal men and to take it away. Happy is the man whom you delight to honour! He hath all things abundantly: his fruitful land is laden with corn, his pastures are covered with cattle, and his house is filled with good things. Such men rule orderly in their cities of fair women: great riches and wealth follow them: their sons exult with ever-fresh delight, and their daughters in flower-laden bands play and skip merrily over the soft flowers of the field. Thus it is with those whom you honour O holy goddess, bountiful spirit. Hail, mother of the gods, wife of starry Heaven; freely bestow upon me for this my song substance that cheers the heart! And now I will remember you and another song also.¹¹

From these and other ancient records, it is obvious that the earth was more than an agricultural or herbaceous facility to the pagans, she was the personable and “eldest of all beings,” the “holy goddess,” the “bountiful spirit,” the all nourishing mother of men who manifested herself within the popular idols of the mother goddesses.

Christian theologians also believe the physical earth contains spiritual forces. In Revelation 9:14, we read of “the four angels which are bound in the great river Euphrates.” Likewise, in Job 26:5, we find “Dead things are formed from under the waters.” The literal Hebrew translation says, “The Rafa (fallen angels) are made to writhe from beneath the waters.” Additional biblical references indicate the earth is a kind of holding tank, or prison, where God has bound certain fallen entities (2 Pet. 2:4; Jude 6). That such fallen spirits seek to communicate with, or participate in, the affairs of humanity, is described in Scripture. The Hebrew people were warned of spirits who seek regular communion with men (Deut. 18:11), and, when the witch of Endor communicated with the same spirits, they ascended up from “out of the earth” (1 Sam. 28:13). It would seem, based on such scriptures, that the dynamic or energy behind the earth-goddess-spirits is indeed real, and, according to the Christian doctrine, is identical with the legions of fallen spiritual forces that are bound within the earth and that seek association with men. Such conclusions can be made because of the obvious and physical location of the biblical demons within the body of the earth, and also because of the nature of the manifestations, or attributes, of the goddesses. As previously noted, the myths and rituals behind the earth-goddess-

mothers, Isis, Demeter, and Persephone, were openly connected with the evil spirits of the underworld.

The Earth-Mother Hecate

Hecate, the Titan earth-mother of the wizards and witches, illustrates, perhaps better than any other goddess, the connection between the earth goddesses and the realm of evil supernaturalism. As the daughter of Perses and Asteria, Hecate (Hekate) was the only one of the Titans to remain free under Zeus. She was the mother of the wizard, Circe, and of the witch, Medea, and was considered to be the underworld sorceress of all that is demonic. This was because Hecate characterized the unknown night-terrors that roamed the abandoned and desolate highways. She was often depicted as a young maiden with three faces, each pointing in a different direction, a role in which she was the earth-spirit that haunted wherever three paths joined together. As the "goddess of three forms" she was Luna (the moon) in heaven, Diana (Artemis) on earth, and Hecate in the underworld. At times of evil magic, she appeared with hideous serpents, spreading demons, encouraging criminal activity, and revealing enigmatic secrets to the crones. At other times, she roamed the night with the souls of the dead, visible only to dogs, who howled as she approached. When the moon was covered in darkness, and the hell-hounds accompanied her to the path-beaten crossways, Hecate came suddenly upon the food offerings and dead bodies of murders and suicides that had been left for her by the fear-stricken common-folk. Her hounds bayed, the ghost-torches lit up the night, and the river nymphs

shrieked as Hecate carried away the mangled souls of the suicides into the underworld caverns of Thanatos (Death), where the shrill cries of such damned-ones were known to occupy her presence.

As the dark goddess of witchcraft, Hecate, like Isis, was worshiped with impure rites and magical incantations. Her name was probably derived from the ancient Egyptian word *Heka* ("sorcery" or "magical"), which may explain her association with the Egyptian frog goddess of the same name. This may also explain the affiliation of frogs with witchcraft, and the various potions of frog-wart and "hecateis" (Hecate's hallucinogenic plant, also called Aconite), which supposedly sprouted from the spittle of Cerberus (Hade's three-headed guard dog), which fell to the ground when Hercules forced him up to the surface of the earth.

Because her devotees practiced such magic wherever three paths joined, Hecate became known to the Romans as *Trivia* (tri "three," and via "roads"). Later, when the Latin church fathers compared the magic of the goddess Trivia with the power of the Gospel, they found it to be inferior, and the pursuit of Hecate's knowledge became known as Trivial Pursuit, or inconsequential. But the fact that Hecate's followers sincerely believed in, and feared, her magic and presence, was legendary. We find an example of such belief in the *Argonautica*, (Jason and the Argonauts) by Apollonius Rhodius, when the sorceress Medea provided a spell for Jason to use in winning Hecate's assistance:

Take heed now, that I may devise help for thee. When at thy coming my father has given thee the deadly teeth from the

dragon's jaws for sowing, then watch for the time when the night is parted in twain, then bathe in the stream of the tireless river, and alone, apart from others, clad in dusky raiment, dig a rounded pit; and therein slay a ewe, and sacrifice it whole, heaping high the pyre on the very edge of the pit. And propitiate only-begotten Hecate, daughter of Perses, pouring from a goblet the hive-stored labour of bees.

And then, when thou hast heedfully sought the grace of the goddess, retreat from the pyre; and let neither the sound of feet drive thee to turn back, nor the baying of hounds, lest haply thou shouldst maim all the rites and thyself fail to return duly to thy comrades." . . . [and] Jason . . . bathed his tender body reverently in the sacred river; and round him he placed a dark robe. . . . and . . . he cut the throat of the sheep, and duly placed the carcass above; and he kindled the logs placing fire beneath, and poured over them mingled libations, calling on Hecate Brimo [the Mighty One] to aid him in the contests.

And when he had called on her he drew back; and she heard him, the dread goddess, from the uttermost depths and came to the sacrifice of Aeson's son [Jason]; and round her horrible serpents twined themselves among the oak boughs; and there was a gleam of countless torches; and sharply howled around her the hounds of hell. All the meadows trembled at her step; and the nymphs that haunt the marsh and the river shrieked, all who dance around

that mead of Amarantian Phasis. And fear seized Aeson's son, but not even so did he turn round as his feet bore him forth, till he came back to his comrades.¹²

Such magic, as illustrated in the fiction above, was employed by fearful men to appease Hecate. The appeasement of the dark goddess in this way was primarily because of her role as the sorceress of the afterlife, but true believers also feared Hecate's ability to afflict the mind with madness (as in the Dionystic curses), as well as her influence over the night creatures. That is to say, offerings were made to Hecate because she was thought to govern haunted places where evil or murderous activity occurred. Such areas where violence or lechery had a history were believed to be magnets of malevolent spirits, something like "haunted houses," and if one wanted to get along with the resident apparitions they needed to make oblations to the ruler of the darkness, Hecate. The acceptance of the oblations was announced by Hecate's familiar (the night owl), and the spooky sound of the creature was perceived as a good omen by those who gathered on the eve of the full moon. Statues of the goddess bearing the triple-face of a dog, a snake, and a horse, overshadowed the dark rituals when they were performed at the crossing of three roads. At midnight, Hecate's devotees left food offerings at the intersection for the goddess ("Hecate's Supper"), and, once deposited, quickly exited without turning around or looking back.

Sometimes the offerings consisted of honey cakes and chicken hearts, at other times puppies, honey, and female black lambs were slaughtered

for the goddess and her strigae. The strigae were deformed and vicious owl-like affiliates of Hecate who flew through the night feeding on the bodies of unattended babies. During the day the strigae appeared as simple old women, and such folklore may account for the history of flying witches. The same strigae hid amidst the leaves of the trees during the annual festival of Hecate (held on August 13), when Hecate's followers offered up the highest praise of the goddess. Hecate's devotees celebrated such festivals near Lake Averno in Campania where the sacred willow groves of the goddess stood, and they communed with the tree spirits (earth spirits, including Hecate, were thought to inhabit trees) and summoned the souls of the dead from the mouths of nearby caves. It was here that Hecate was known as Hecate-Chthonia ("Hecate of the earth"), a depiction in which she most clearly embodied the popular earth-mother-spirit, which conversed through the cave-stones and sacred willow trees.

Whereas Hecate was known elsewhere as Hecate-Propylaia, "the one before the gate," a role in which she guarded the entrances of homes and temples from nefarious outside evils (talk about Satan casting out Satan!); and whereas she was also known as Hecate-Propolos, "the one who leads," as in the underworld guide of Persephone and of those who inhabit graveyards; and finally she was known as Hecate-Phosphoros, "the light bearer," her most sacred title and one which recalls another powerful underworld spirit, Satan, whose original name was Lucifer ("the light bearer"); it was nevertheless her role as the feminist earth-goddess-spirit Hecate-Chthonia that popularized

her divinity and commanded such reverence from common people.

Such popular religious concepts of earth-spirits inhabiting trees, soliciting incantation and ritual, and revealing abstruse secrets, is an idea familiar to students of eastern mythology. The following chapter will discuss the revival of such paganistic notions, and, more importantly, will attempt to answer the disturbing question: Do the ancient spirits of the gods and goddesses converse with modern man?

Important Notes Regarding the Gods of Greece

The following notes on the Greek deities are important and relate to the remaining chapters of the book.

From the example of Gaia we learn: 1) Gaia was the original Greek “mother earth”; 2) she was worshipped as a literal spirit; 3) her body (the planet earth) was made to contain the elder spirits of the Titans; and 4) such spirits were known to communicate through trees, streams (etc.), and various idols.

From the example of Zeus we learn: 1) Zeus, among other things, was the king or “prince of the air” and the “god of thunder,” titles biblically and historically associated with Satan; 2) his altar at Pergamum may have been the “throne of Satan” mentioned in Revelation 2:13; 3) he was an oracle spirit and communicated through trees, streams, and other nature devices; and 4) he was ritually associated with transsexualism through his lover Leto.

From the example of Apollo we learn: 1) Apollo

was the most important oracle god in Greece; 2) his oracle at Delphi was the most famous in antiquity; 3) his pythian prophetesses popularized the social status of mediums (psychics); 4) natural hallucinogens used as instruments of paranormal communication was a part of his spirituality; 5) his gospel was humanistic: “know yourself,” “do nothing in excess,” and “don’t get in a hurry,” were the basic rules; 6) unlike the Hebrew prophets, the Delphic “psychics” commercialized the prophetic gifts and charged for their services; and 7) Apollo’s son, Asclepius, combined earth elements, spirit-guide animals (especially serpents), energy channeling, incantation, and psychic dreams, with healing.

From the example of Dionysus we learn: 1) the uses of wine, sensuality, song, and revelry, were combined with having a “religious experience”; 2) Dionysus’ feminist devotees, the Bacchae, challenged the traditional roles of women by dressing transvestite, behaving violently masculine, and disregarding virtuous sexuality; 3) the Bacchae embraced physical pleasures including the drink, the dance, the song, and lesbianism, at the expense of their children; 4) the Bacchae practiced magic, embraced evil, destroyed children, and profaned the sacred, in the name of women’s rights; and 5) they manipulated others (magically imprisoned their souls) for personal gain.

From the example of Demeter we learn: 1) Demeter was the popular goddess of the environment; 2) her rituals and rewards taught people to tune in with, and care for, the planet; 3) her doctrines involved an amalgam of human energy, superstition, and mystical earth forces; 4) she, along

with Gaia, Hera, Artemis, Hecate, and others, incarnated the earth's fertility forces within the goddess images; 5) the Bible reveals that such forces are demonic and seek communion with mankind; and 6) this was illustrated in the myths, behaviors, and rituals of the goddesses, especially of Hecate.

The Old Gods of the New Age

“The kind of events that once took place will by reason of human nature take place again.”

—Thucydides

A few years ago during the Christmas season, my wife, Nita, and I, walked through a local mall. As we perused the different shops, we came across a New Age bookstore conducting a “Grand Opening.” In a derisive tone, I said to my wife, “Can you believe the lack of intelligence of some people?” I strolled casually into the store, and without hesitation, snatched a book from the shelf and began offering a sarcastic commentary as I read from the pages. When I noticed that Nita was growing uncomfortable, I placed the book back on the shelf and proceeded out of the store. Suddenly, a dull sensation hit me. It began in my stomach and shot upward through my cranium, impacting my equilibrium. As I stepped outside onto the main mall walkway, my head started to spin, my hands began to shake, and I felt as if I were going to faint. It was literally as if an invisible terror had “jumped” on me, and was somehow injecting powerful feelings of nausea and anxiety

throughout my entire body. I tried to shake it off, but couldn't. I attempted to walk it off, and failed. At last, feigning interest in something, I moved away from my wife and began to pray. I asked the Lord to forgive me for my sarcastic attitude, for my lack of caution, and for my want of concern for the lost. I prayed for deliverance from evil and for a healing of the body and mind. After several hours of such walking and praying, I was finally restored. I discovered a valuable lesson that day: while it's true that a Christian cannot be demon-possessed, it's equally true that the "princes" of this world are powerful, and we should enter their arena only after prayer, and at the prompting of the Lord. I also learned the mystical forces of the New Age movement are genuine (and willing to protect their territory!), and that much of what is currently published under the guise of New Age "enlightenment," is nothing less than Old Age doctrines of nefarious, invisible hosts.

As in antiquity, so in modern times, those who practice paganism are guilty of worshipping "devils" (Rev. 9:20). The dogma, which were once embraced (and still are, through the New Age Movement) as the wisdom of the gods, are defined in the scriptures as the "doctrines of devils." The Apostle Paul declared: "The things which the Gentiles sacrifice, they sacrifice to devils" (1 Cor. 10:20). In Acts 7:41-42 (Jerusalem Bible), we find that those who worship idols are joined to the "army of heaven" [stratos, the "fallen angel army"], and Psalm 96:5 concludes that "all the gods of the nations are idols" (elilim, LXX daimonia [demons]). Thus, pagan images, such as represented the ancient gods and goddesses, were

elilim (empty, nothing, vanity), but behind the empty idols were the living dynamics of idolatry, and spiritual objects of heathen adoration, the daimonia (demons) of the Bible.

Since the Bible clearly defines idolatry as the worship of demons, and since demons are eternal personalities that desire the worship of men, it is fair to conclude the characterization of such deities as "Zeus," "Amun-Ra," "Demeter," and "Isis," were simply the classical names attributed to specific fallen spirits. In other words, Apollo was a real personality; Osiris was a genuine underworld fiend; Hecate actually lived, and still does! One also concludes that the images of the gods (falcon-headed statues, animal forms, etc.) served the purposes of such spirits by providing a point of focus, and by revealing the "nature" of the particular spirit existing within the god. The iconographies, myths, and rituals of each deity exhibited the specific characteristics (nature, gender, underworld authority, etc.) of that particular entity. Thus, the myths and images of Zeus, according to such theory, were the physical manifestations of a literal demon of air, while statues of the goddess Demeter represented an earth spirit. It is my assertion, and the claim of this book, that the same spirits of antiquity, including Zeus, Athene, Dionysus, and others, continue to express themselves within modern paganism. Dr. Jones agrees, asserting that the connection between the New Age Movement and the gods of mythology is strong. "Nothing has changed in Satan's game plan," says Jones, "just the names of the players, and, in some instances, even the names are the same."

Paganism in America is exploding as we approach the new millennium. Throughout Hollywood, government, cyberspace, and even the church, people rush to embrace the religious philosophies of the New Age of Aquarius. As a modernistic process by which the old gods are worshipped, the New Age Movement emerged in the United States during the 1960s, and has experienced a steady growth ever since. The broad appeal of the New Age Movement as a Western phenomenon can be explained to some degree as the result of a changing culture. Americans have gradually abandoned the fundamental precepts of Christianity (prayer in school, Bible in courts, etc.), which provided the cornerstone of civil life and jurisprudence in American society for more than 200 years. As a generation of baby-boomers has focused on human potential and the "god within us all," Eastern philosophies of Monism, Pantheism, Hinduism, and self-realization, continue to provide Americans, and even some Christians, with an alluring opportunity to throw off the "outdated ideas" of fundamental Christianity and to espouse a more "enlightened" world view of God and reality.

Some of the most notable celebrities have joined the political ambitions of the New Age Movement (goals include a United Nation's sponsored Environmental Sabbath for the Goddess Earth), including Shirley MacLaine, Dick Gregory, Lindsay Wagner, Dennis Weaver, Dirk Benedict, Cloris Leachman, Richard Gere, Ally Sheedy, and the late John Denver. Many mainstream "Christian" denominations have also annexed the New Age ideas, and believers who once held strong

doctrinal positions of the supremacy of Christ, have abandoned those views in exchange for a New Age universal philosophy.

Examples include a witch who teaches principles of goddess worship at a Roman Catholic college in California, and United Methodist pastors who propose replacing the name of Jesus with Sophia (Goddess of Wisdom) when reading about the crucifixion. Such persons claim we should join the efforts of New Agers and be sympathetic to "Goddess-minded Christians." Former New Age devotee, Judy Vorfeld re-discovered the real Jesus after embracing such ideas. She became involved in freelance writing as a result of experiencing the dangers involved in participating in the New Age Movement. For many years she actively avoided anything to do with the Christianity of her childhood. When she was in her early forties, a neighborhood minister said he was starting a new church, and she thought the time might be right to look at Christianity again. Judy writes:

For a time I was involved in a fellowship that worshipped a different deity than the God of the Bible. . . . I joined a church that evolved from ecumenism to religious syncretism. . . . Six months after I became part of the fellowship, fundamental Christianity was retired in favor of a universal religious system, one designed to be inoffensive to people of any theological persuasion. The fellowship then put together a creed that would be acceptable for any visitors coming to worship with us. Jews, Hindus, Muslims, and Buddhists were welcome, as were Theosophists, Rosicrucians,

and Hare Krishnas. . . . Our minister brought a popular seminar, advertised a self-improvement course into our church. Most of us were impressed with the professional manner of the leaders and their sophisticated system of teaching self-realization. . . . The organization's format, we were told, held the answers to all our problems. . . . Church leadership eagerly blended the organization's ideas into an agenda that became a part of our church curriculum. Eastern meditation, Psychic healing, and guided imagery were all practiced.¹

Judy Vorfeld is a friend of mine and has provided me with guidance on the New Age Movement. In recent correspondence, she described modern Druids, and spoke of their methods of magic healing through "visualization." She confessed:

Tom. . . . When we were involved in Silva Mind Control [through her local church], we did the same thing [visualized healing]. At that time, I thought God was behind all this stuff. I 'saw' people in my mind's eye who had various diseases, and I sent energy to heal them. In groups like this, the leader often has a list of people who are sick. This gives them a way to follow through and see who was healed. I have no doubt some people were healed, but since we were invoking a power other than that of the real God, what were we doing?"

What indeed?

An amazing component of the New Age Movement (as verified by such examples as my friend, Judy's) is its capacity to adapt to a variety of religious, even Christian, ideas. Consequently, many of the popular "Christian" doctrines advocated today are nothing more than the cultic propositions of Eastern mysticism and ancient paganism. These include concepts of psychic healing, self-realization, emotional experiences, rules of success, breathing techniques, positive confession, name it and claim it, environmental theology, the ecumenical movement, visualization, hypnosis by clergy, mind manipulation, and so on. At times, and I say this with caution, even the activity within the "fundamental" church, including certain physical phenomena we sometimes embrace as the miraculous evidence of "revival," is a modern form of magic and opens the door for "old gods" and their mysticism to invade the church. The line between a true manifestation of God, and human orchestration, is often blurred. Sincere people, in a quest to experience God, frequently mimic the doctrinal and physical activity of others. Some physical phenomena (crawling on the church floor and making animal sounds, etc.) is extra-biblical in nature (not everything that is extra-biblical is un-biblical, however) and therefore undefined by New Testament teachings.

As a result, some Christians have been drawn to mystical experiences rather than concentrating on God and His Word. Even sermons preached by well-meaning ministers have tempted Christians to pursue "supernatural" encounters with God, rather than instructing them to live by faith. The danger of such undisciplined sincerity is that hu-

man nature rarely limits its opportunity for experience. If the Bible has no clear guidelines of conduct and order, and the activity is being promoted by church authorities as a way of experiencing God, then the person seeking the experience may have trouble defining what is, and what isn't acceptable, and thus go too far. For emotional people, the experience may be expressed by a physical reaction, while academics tend to interpret mystical experiences with God as divine revelations or imparted knowledge. The dangerous consequences of such conduct often leads to religious behavior more reminiscent of Dionysus or Apollo worship than of New Testament Christianity. As a result, people like Judy Vorfeld start out in a Christian church and wind up in the New Age movement.

The dangers of mysticism, such as those inherent with emphasizing experiences over doctrine, were soundly illustrated in a recent report by Samantha Smith. She writes:

I became strongly concerned about this movement after observing a "service" at a south Denver Vineyard church. . . . [a woman] stood in the middle of a group of people who ran their hands over her body (within an inch or so of the clothing), then kept swooshing some invisible thing toward her heart area. Saddened, I walked toward the door, where a church member said, "You should come back on Sunday night. That's when they levitate." . . . [another group] in Seattle . . . sit in circles, clucking, flapping their tucked arms and visualizing themselves hatching the "Man Child Com-

pany," a heretical Manifested Sons of God concept. In Kansas City, a pastor watched in horror as men and women lay on the floor with their knees up and legs spread apart, trying to birth the same thing. . . . I tape-recorded a group of Episcopalians howling at the moon, like wolves, giving a "Howl-le-lu-ia Chorus" for Earth Day. It gets worse. There are reports of "holy vomiting" (seance ectoplasm?) and of Christians becoming demonized by being "slain in the spirit." How can this be?²

I share Samantha Smith's concerns. Recently I was approached by a young man during a Sunday morning service (at a church which stresses supernatural "experiences" as a test of one's spirituality) and was told how, he, and other members of the "intercessory prayer group," were experiencing temporary possessions (?) of evil spirits. When I asked him what he meant, he stated that evil spirits were "coming out of people, and, as they do, they are going into us [the people in the prayer room] and then speaking out loud." When I asked for clarification, he repeated that evil "spirits" were audibly conversing through him and other members of the prayer group during the Sunday morning church services! I warned him of the dangers of mysticism and reminded him that the Jews were forbidden to communicate with spirits. I strongly advised him not to allow any spirit (other than the Holy Spirit) to speak through him, and showed him how Michael the archangel did not discourse with the devil, but said, "The Lord rebuke thee" (Jude 9). I'm unsure if the young man followed my instruction, but the episode illustrates how a

church environment emphasizing supernatural experiences over sound biblical doctrine can create an atmosphere conducive to New Age mysticism, mediumism, spiritism, and paganism. I believe the young man was earnest, and it's my understanding that the "medium" practices at the church have ended.

Gaia, Hathor, and Demeter Live! New Age Earth Worship

The majority of New Age mysticism and other forms of modern paganism (the ongoing worship of the gods and goddesses) is unquestionably occurring outside of the fundamentalist church. Expressions of neo-paganism ranging from self-help organizations working with large corporations to offer stress management symposiums to their employees using the principles of the New Age Movement to produce positive harmony, prosperity, and overall business success, to other not-so-subtle forms of paganism, such as those practiced by WICCA and the Women's Spirituality Movement, account for more than 600,000 women nationwide participating in the invocation of ancient earth-goddesses, including Demeter, Aphrodite, and Isis.

Retail stores springing up in faddish malls across the United States supply replica idols of the popular female deities, and marketing of the occultic paraphernalia used in venerating the goddesses (crystals, candles, books of spells, etc.) has become a multimillion dollar industry. Dimly lit "occult" bookstores that once inhabited shabby old buildings have been replaced with trendy New Age shops located amidst the most fashionable

strip malls in the nicest areas of town. One such store, Necromance, is located at stylish Melrose Avenue in Los Angeles, and business is booming with sales of "human fingers on a leather cord, necklaces of human teeth, bone beads, human skulls and even a tiny fetal one."³ The Necromance, and similar New Age businesses, are attentively supported by a growing population of neo-pagans and teachers of the arcane rites. Store owners are generally New Agers or practicing witches, and many have been publicly embraced by politicians, religious leaders, and Hollywood entertainers. Not long ago, one such witch claimed to be a temple prostitute of the goddess Astarte and performed sequential ritual earth-magic sex with 251 men at the University of Southern California.

In her book, *Goddess Earth*, Samantha Smith connected the pagan agenda of the Earth Summit, the Environmental Movement, and the current mix of politics and public education, with the New Age Movement's goals of a revival of Mother Earth worship under a united World Order. After attending a lecture by Miriam Starhawk (a teacher of the "ancient craft") at the University of Denver, she wrote:

Miriam Starhawk, who calls herself "a goddess-worshipping pagan witch," appeared at the University of Denver to lecture. . . . about her concerns on "Magic, Sex and Politics." . . . There was a time, she said, thousands of years ago, when people lived in harmony with the earth and each other. They practiced magic and used the art of evoking power from within, trancing, and became one with the balance of things.

When they turned from the goddess, all havoc broke loose. Men ruled over women and other men. They waged endless wars. People splintered into rich and poor, free and slave, powerful and powerless. The witchess (goddesses) were battered, raped, tortured, burned, poisoned, and dismembered. And so, the Earth herself nearly died. But, she was not destroyed! Some continued to practice [earth-centered magic] in secret. . . . [and now] Just at a time when the final destruction of the earth is probable and nearly inevitable, women are remembering the goddess [Mother Earth]. They are crying out against the war and the destruction of the human race. "The reborn are walking the Earth in new forms and the witches arise and dance (skyclad) in the open. The Goddess has not come to save us. It is up to us to save Her [the earth]."4

Today, New Agers ask, "If God is our Father, then who is our Mother?", and they happily answer, "Earth!" Not surprisingly, the worship of the earth's "spirit" as a nurturing goddess mother has been revived as a central feature of paganism. Earth Day 1990, celebrated the start of the decade by coordinating nearly 200 million people worldwide into a universal effort aimed at saving "our endangered Mother Earth." Christian leaders signed "Green Pledges," and Wiccan witches performed arcane rituals in honor of the Earth Goddess, Gaia. Interest in such contraptions as the sweat lodge, a device used by several ancient religions, including many American Indian tribes, as an apparatus whereby one re-enters the womb

Athene, by Brooke Townsend

of the Earth Mother, was celebrated. Such famous personalities as Ted Turner and Jane Fonda built their own private sweat lodges, and were praised for following the primitive and simple pattern of furrowing a womblike "nest" into the surface of the earth and covering it with a dome of natural materials. The entry into Ms. Fonda's lodge was intentionally kept so low as to simulate the birthing experience during exit, and the ground inside was left uncovered so as to allow the inhabitants the opportunity of getting in touch with the all-knowing Earth Spirit.

The sweat lodge method of communing with the sacred Earth Mother, Gaia, as practiced by various ancient religions and New Age devotees, includes sitting in a semi-circle around heated stones inside the lodge, and entering into a mystical state of consciousness. As with ancient pythians, the prophetesses of Apollo, the altered mental condition is accomplished through repetitive chanting, drumming, and breathing the fumes of natural stimulants, such as peyote. Spirit animals, called "power animals" by New Agers and American Indians, are called upon to guide the soul through the underworld journey, or "vision quest," and participants are encouraged to "dance their animal" for revelations and healing of the body and mind. Such animal dancing is accomplished by allowing the spirit of the creature to enter into, and take control of, the participant.

Dr. Leslie Gray, a noted University instructor and female shaman (something like a witch doctor), employs such uses of "animal dancing" in the psychiatric (shamanic) treatment of her patients. She described the positive results of animal danc-

ing in the case of one insecure young woman, saying, "I lay down on the ground next to her and put us both into an altered state of consciousness via a tape of drumming. I came back from my 'journey' and blew the spirit of a mountain lion into [her]. I then instructed her to go out into nature and dance her animal. . . . [and when she did] She no longer felt afraid of people."⁵

Such uses of animal images and other natural products in the worship of the Great Earth Mother is by design. New Age pagans, drawing on Eastern philosophies and the occult, believe that, unlike the evil human race, such elements are at one with Gaia. According to them, if it were not for the male-dominated, styrofoam-producing, beef-eating, gas-guzzling, bulldozer-driving destroyers of the rainforests (human beings), the earth would be a better place. Natural earth-centered resources, such as animals, crystals, and even colors, are thus the products of choice for the students of New Age earth-magic. For instance, light blue is the color of Mother Earth's sky, thus Wiccans burn candles of light blue to acquire her magic tranquility or understanding. Red candles are burned for strength or sexual love, and green candles for financial assistance, etc. Instruments of magic, such as magic wands, are also made of Mother Earth's natural supply, usually of Willow, Oak, or fruit tree branches. Magic potions employed during the witches' Esbats (earth-celebrations held during the new and full moons) also contain the Earth's natural byproducts, including clover, olive oil, grape juice, garlic cloves, and rosebuds. Finally, special ceremonies conducted at the crossing of three earth-paths (remember the triple-path earth-

Diana, by Brooke Townsend

mother, Hecate?) are dedicated to the Mother Earth goddesses, Gaia, Demeter, Persephone, Isis, Aphrodite, Hathor, Hera, Diana, Athene, and Hecate. While such rituals are gender-inclusive, they are specifically designed to elevate the goddess, or female spirit. In fact, an enlightening component of nearly every form of goddess-earth worship is the absence of male leadership. Goddess deities, especially the ones that exhibit independence of the male presence, are cheerfully exalted during the worship of Gaia. Athene, the manly goddess of Olympus, and Diana (Artemis), the lesbian⁶ earth-goddess and patroness of witches, are considered especially important during the contemporary worship of the Earth Goddess. Venerating such "she-devils" is more widespread than ever, and anyone visiting the local university library, the area bookstore, the internet, or Saturday morning cartoons, will undoubtedly discover the presence and deification of Mother Earth. The effect of New Age cartoons on young people is particularly disturbing, as it teaches innocent kids the principles of paganism. Characters such as Captain Planet and the Planeteers tell children to use their "mystical powers" to protect the environment, and to assist Gaia, the motherly earth-spirit, in her quest to join forces with Captain Planet and his "special children" to save the earth from middle-aged capitalist swine (there go those rotten adults again!) who want to destroy the loving Mother Earth. Each episode of Captain Planet ends by encouraging kids to help Gaia and the Planeteers save the earth from evildoers. The new animated Superman, that once proud defender of "truth, justice, and the American way," has also

seen the light, and, evidently, converted to New Age mysticism. His girlfriend, Lois Lane, consults the "white Wiccan coven" for information or magic to assist in Superman's task.

The Burning Man

For the past ten years such earth-worshipping pagans, and their little cartoon-watching pagans, have migrated from Canada, Brazil, Germany, Russia, and 25 other countries, to an isolated corner of Black Rock Desert in Nevada, where a four-day-long New Age techno-fest known as "The Burning Man" has been conducted. Attendance at the 1997 pagan carnival included an estimated 15,000 Wiccans, Satanists, Goddesses (white witches), nudists, and a consortium of other lost party-goers, who converge on the hot Nevada desert for a Labor Day weekend of "glorious Hell on earth." The number of participants at the Burning Man gala has nearly doubled each year since 1986, and, by the year 2000, organizers hope to break 30,000. The Burning Man is a no-holds-barred New Age "Woodstock" style festival, where neo-pagans, Wiccans, transvestite entertainers, back-slidden Christians, and a host of homosexuals, go to trance, perform rituals, burn sacrifices to idols, dance in the nude, engage in sex, and otherwise "express" themselves and become one with Gaia.

Attendees set up theme camps such as "Lost Vegas," "Motel 666," and "Crucifixion with a Celebrity" (where one can purchase a picture of a crucified obese Elvis). Hamburgers are sold by devil-worshipping pagans at the McSatan cafe, and T-shirts are available that proudly proclaim, "Praise

the Whore." The Burning Man itself is a forty-foot-high effigy of the "Spirit Cave Man" (sacred to local Indians and New Agers) which is torched, together with just about everything else, at the close of the festivities.

George Otis Jr., president of The Sentinel Group (a Christian research agency), attended the 1996 Burning Man festival with a colleague. He wrote of the experience:

On Saturday night, the hell-themed 1996 festival reached its crescendo in the form of a drama. . . . These people were literally celebrating the fact that one day they would enter hell. To simulate their journey, the camp's center stage was transformed into the "Vestibule of Hell." The guest of honor was none other than "Papa Satan." . . . As the lecherous Papa Satan bowed in mock chains before a placard reading "Believe in the Lord Jesus Christ and thou shalt be saved," a group called "Idiot Flesh," [supposedly Christians] dressed as hooded executioners, began to play a discordant dirge accompanied by flashing strobes. When the crowd started its torchlight procession toward the Gates of Hell and an eerie, sculpted castle called The City of Dis, I sensed an unmistakable chill in the air. Our march had been joined by unseen, malevolent guests. . . . nudist and a moving sea of devil banners [also] moved around us. . . . At the tri-tower City of Dis, our descent into the Inferno reached a demonic sanctuary. . . . While massive loudspeakers pumped out a hellish bass tone accompanied by tormented screams . . . people dressed as de-

monic insects celebrated by copulating with other captured souls. It was a scene that looked as if it had been plucked from a horrific nightmare. Mesmerized by the evocative music, the performers began to chant, "Devil's delight, fire tonight!" Wood piles inside the towers of Dis were ignited, causing orange flames to belch forth from the eyes and mouths of demonic gargoyles built onto the turrets. As the heat became more intense, the entourage danced around the towers. Satan had defeated the church.⁷

Otis continued the report by confessing, "I had to remind myself that what I had witnessed at the Burning Man Festival was happening right here in the United States, not in the temples of India or the deserts of Sinai." He also admits that he met many friendly, creative, and intelligent people at the Burning Man festival, and he encourages believers to contend for such lost souls in prayer.

Zeus, Osiris, and Apollo Live! New Age Oracles

"What advantage then hath the Jew? . . . Much every way: chiefly, because that unto them were committed the oracles of God" (Rom. 3:1-2). When the apostle Paul wrote to the church at Rome concerning the oracles (*logion*, "divine utterances") that God gave to the Jews, he was referring to the revelations of the Old Testament Law and Prophets. In the Bible, the word "oracle" means supernatural utterance. It can also refer to a device used in the production of divine utterances. The Bible is an oracle, as was the Urim and Thummim

(sacred devices) of the Old Testament. When a man or a woman speaks as true prophets of God, he or she is likewise considered “an oracle of God” (1 Peter 4:11).

New Age pagans, such as those who attend the Burning Man Festival, are extremely interested in such oracular phenomena, and readily accept certain portions of the Bible as divinely oracular (the verses they believe support their ideas of God, reincarnation, spirit communing, and the after-life). But, in the quest for spiritual knowledge, modern pagans also reach out beyond the “confines” of the Bible into a veiled world of mystical utterances, table-tapping, ouija boards, psychic phone lines, visualization, channeling, and other esoteric forms of prognostication.

I once preached a sermon on oracles and the “death of the Olympian gods.” I boldly proclaimed that Christianity had swept the globe, and that, as far as I knew, not a living person remained on earth that bowed in reverence to Apollo, or consulted at his sacred shrines. The sermon was received with rousing applause by the audience, and I sold some tapes. The only problem was, I was wrong. Apollo’s Oracle at Delphi, the most famous oracle of antiquity, is in ruins. But the worship of the Olympian god, and the order of his pythian priestesses, are actively involved in Wiccan and New Age paganism in the 1990s. The fact is, it’s unclear if the worship of Apollo or the consulting of his oracles ever ceased.

There is some evidence that generational witches may have continued the worship of Apollo and the secrets of his pythian divination for centuries. Whether or not that’s true, the admirers of

Apollo number in the tens of thousands today. This is primarily because Apollo is an oracle god, and his disciples are granted a “divine audience.” Unlike other underworld spirits, Apollo audibly communicates (at times with amazing accuracy in antiquity) through the vocal chords of the pytho-ness to his followers. This characteristic originally caused, and apparently continues to cause, a tremendous cult popularity for Apollo. The Greek historian, Herodotus (considered the father of history), wrote of an interesting event. Croesus, the king of Lydia, expressed doubt regarding the accuracy of Apollo’s Oracle at Delphi. To test the oracle, Croesus sent messengers to inquire of the pythian prophetess as to what he, the king, was doing on a certain day. The priestess surprised the king’s messengers by visualizing the question, and by formulating the answer, before they arrived. A portion of the historian’s account reads:

The moment that the Lydians (the messengers of Croesus) entered the sanctuary, and before they put their questions, the Pythoness thus answered them in hexameter verse: “. . . Lo! on my sense there striketh the smell of a shell- covered tortoise, Boiling now on a fire, with the flesh of a lamb, in a cauldron. Brass is the vessel below, and brass the cover above it.” These words the Lydians wrote down at the mouth of the Pythoness as she prophesied, and then set off on their return to Sardis. . . . [when] Croesus undid the rolls. . . . [he] instantly made an act of adoration . . . declaring that the Delphic was the only really oracular shrine. . . . For on the departure of his messengers he had set himself to think what

was most impossible for any one to conceive of his doing, and then, waiting till the day agreed on came, he acted as he had determined. He took a tortoise and a lamb, and cutting them in pieces with his own hands, boiled them together in a brazen cauldron, covered over with a lid which was also of brass. (Herodotus, book 1: 47)

The demon Apollo established an enormous following through such prophetic trickery, and, evidently, continues to do so. On the Internet, there are numerous Web sites dedicated to the modern worship of Apollo, and some such sites teach the methods and sacred locations of current pythian oracular activity.

Modern pagans are drawn to oracles because oracles ostensibly prove the existence of a spirit world, and because they seemingly provide a method of communicating with such spirits. Besides the pythian, ancient oracles being revived by the participants of New Age paganism include interpreting the flame of candles, the organs of animals, the behavior of water, and the wisping of wind through the leaves of trees. Tree oracles, such as the necromantic oak tree of Zeus at Dodona, were among the most popular oracles of the ancient world. This was due in part to the belief that the root of the tree extended into the lower world, and the tree was thus connected to the underworld dead. Judy Vorfeld admitted communing with tree spirits when she was involved in New Age mysticism. As a biblical endorsement of the activity, New Agers erroneously claim that 2 Samuel 5:24 is a scriptural account of King David consulting with tree oracles, and they point out

that Jehovah instructed David to “smite the host of the Philistines” after he heard “the sound of a going in the tops of the mulberry trees.”

Angels are another popular oracular entity of New Agers. Literally dozens of New Age books describe methods of communicating with the spirit world through the “assistance” of angels. Such book titles are self explanatory: *Ask Your Angels: A Practical Guide to Working with the Messengers of Heaven to Empower and Enrich Your Life*, and, *The Angels Within Us: A Spiritual Guide to the Twenty-two Angels that Govern Our Lives*. In one publication, we discover the interesting “identity” of such governing spirits as the author describes an encounter with his angel-oracle:

The swirling fog began to dissipate, and I could see the flicker of a light ahead—a darting, pulsating glow resembling a fire-fly. I paused for a moment to observe, and the tiny flare expanded in size and appeared as a small full moon touching the earth. As I moved closer to the radiance, it suddenly changed into a vertical beam, a pillar of transparent light.

“Are you the angel I am seeking?” I asked. The soft yet powerful feminine voice replied,

“I am the Angel of Creative Wisdom.”

“Do you have a name?”

“Some have called me Isis,” she said, and with those words the pillar of light slowly materialized to reveal the face and form of a beautiful woman wearing a flowing white robe trimmed in gold.⁸

Can you believe it? "Isis" is identified as a New Age angel! Satan is clever. While such angel-oracles are undoubtedly popular among New Age devotees, the most curious form of oracular activity reinvigorated by pagans today is the "psychomanteum;" a simple, yet eerie, idea. A chair, placed in front of a large mirror in a dark room, serves as the oracle. Once positioned on the chair, the occupant stares into the mirror and waits for contact with the ghosts of the departed. In ancient times, the psychomanteum's mirror-system of communicating with "spirits" was employed by primitive Greeks in gloomy underground caverns called "halls of visions." Standing in front of a shining metal surface or caldron, grieving ancients saw and spoke with familiar apparitions.

The Sumerians, Egyptians, and Romans employed similar oracles of polished crystal, brass mirrors, and pools of water. Some argue that the Apostle Paul was referring to such mirror-oracles when he said, "For now we see through a glass, darkly; but then face to face: now I know in part; but then shall I know even as also I am known" (1 Cor. 13:12). The New Age psychomanteum is likewise used to facilitate contact with deceased relatives or family members and is increasingly being encouraged by New Age psychiatrists as a method for dealing with grief. Sometimes, under nefarious conditions, the mirror-contact phenomenon spontaneously occurs. As a teenager, my wife was involved in a horrific accident that killed her dad and sister. Following the accident, her eleven-year-old sister "materialized" in the bedroom mirror on two occasions. Since the house she lived in was

formerly occupied by gypsies, my wife believes this fact contributed to the spontaneous psychomanteum activity.

In his book, *Reunions*, Raymond Moody promotes the use of the New Age psychomanteum as an oracle. He has documented the experiences of more than three hundred users of the device, and points out that 50 percent claim to have been contacted by a deceased relative or friend during the first try. People interviewed by Moody include physicians, teachers, housewives, business owners, and law enforcement officials. One such witness, an accountant who grieved over his departed mother a year after her death, testified of his experience with the psychomanteum:

There is no doubt that the person I saw in the mirror was my mother! I don't know where she came from, but I am convinced that what I saw was the real person. She was looking out at me from the mirror. . . . I could tell she was in her late 70s, about the same age as. . . when she died. However, she looked happier and healthier than she had at the end of her life. Her lips didn't move, but she spoke to me and I clearly heard what she had to say. She said, "I am fine," and smiled. . . . I stayed as relaxed as I could and just looked at her. . . . Then I decided to talk to her. I said, "It's good to see you again."

"It s good to see you, too," she replied. That was it. She simply disappeared.⁹

A physician was unexpectedly contacted by a nephew while seated in a psychomanteum:

I suddenly had a very strong sense of the presence of my nephew, who had committed suicide. . . . I heard his voice very clearly. He greeted me and brought me a very simple message. He said, "Let my mother know that I am fine and that I love her very much." This experience was profound. I know he was there with me.¹⁰

Although the Bible warns of communicating with "familiar spirits" and of consulting mediums, the revival of ancient oracles, and the experiences being drawn from them, are especially seductive curiosities to the followers of New Age paganism. Communications with the dead, channeling, tranceing, near-death experiences, and other forms of mediumship, harmonize a coveted and reassuring New Age theme, "I'm fine now," "All is well," "I'm waiting for you." New Agers and neo-pagans cherish such next-life universalism, and, while they typically reject the Judeo-Christian Hell, they willingly embrace the message of the oracle gods, Osiris, Zeus, and Apollo, which tell them that everyone eventually goes to "heaven."

Dionysus, Asclepius, and Hecate Live! New Age Mysticism

A spirit of mysticism has been present in the United States for generations. Like an insidious cancer, unseen, patient, deadly, it has grown. Indications of its presence have been felt occasionally, and confirmations of its actuality have been documented from Washington D.C. to Portland, Oregon. By tracing city-name origins, such as Ceres, Alexandria, Mars, Fortuna, and Media, one discovers the early influence of such

mysticism within the United States. By looking at sites such as the House of the Temple, the home office of Scottish Rite Freemasonry, one discovers a continuation of the ancient occultism. Located several blocks from the White House on 16th Street in Washington D.C., the House of the Temple contains eight candelabrum fashioned after Hermes, the “god of light,” as well as various other artworks reminiscent of the Temple of Dionysus. Statues of the goddesses, Isis and Nephthys, stand hallowed inside.

One can exit the House of the Temple, walk down the street and around the corner, and take pictures of an enormous obelisk (phallic Egyptian symbol of fertility) known as the Washington Monument. From there one can travel across country to Portland, Oregon, where a huge statue (“Portlandia”) representing of the goddess Hecate, stands overshadowing the entrance to the City of Portland Office buildings. On the Portland City Seal, “Lady Commerce” holds a trident under a six-pointed star. Both are important instruments of Hecatian witchcraft.

To the South, in California, Athene (Minerva), the manly goddess of war, greets humans from a prominent position on the Great Seal of the State of California. Other states boasting similar Great Seals and goddesses include New York (Liberty and Justice); Oklahoma (Themis); New Jersey (Ceres and Liberty); and Florida. Even the Great Seal of the United States depicts an array of equally abstruse symbols, including an unfinished Egyptian pyramid overshadowed by the “All-Seeing Eye” and bearing the cryptic phrase, *NOVUS ORDO SECLORUM*, “A new order of the ages.”

As we approach the culmination of the “new order of the ages,” cult experts forecast a staggering revival of idolatry and Eastern mysticism. As church attendance declines across the United States, Buddhists, Muslims, Hindus, Theosophists, Christian Scientists, and New Agers, expand to meet the desires and mystical interests of Americans. Tarot card reading is at an all-time high. Psychic phone lines are jammed with over \$300 million in calls per year, and celebrities such as LaToya Jackson and Dionne Warwick lend credibility to psychic consultations. Even the US Government has shown interest in such phenomena. During the 1995 budget cuts, the CIA was forced to release a \$20 million project (“Operation Stargate”) aimed at studying the usefulness of psychics in gathering military secrets from foreign powers.

The wives of two U.S. Presidents, Nancy Reagan and Hillary Clinton, have also been the subject of public examination since it was discovered that they consulted with astrologers and psychics. Hillary Clinton went so far as to channel “conversations” with the spirit of Eleanor Roosevelt. Whether such conversations included a White House psychomanteum, or other oracular device, is unknown, but the obvious widespread interest in such paranormal activity substantiates what Judy Vorfeld has said: “Dabbling in the realm of the occult is currently stylish. Even some Christians seem unable to avoid the attraction of this colorful, seductive world.”¹¹

The colorful seduction of mysticism is reaching into every fiber of our culture. From public school Environmental Education to faddish televi-

sion good-guys, today's generation is bombarded with a New Age Occultianity (Western Christian beliefs mixed with occultism) that popularize the supernatural. Beloved comic book heroes such as "Spawn" teach our youth the dangerous Persephonian idea that a person can be in league with the devil, and still be a good person. Such doctrines of "harmonizing duality" are extremely popular (comics of "Spawn" have sold over 100 million copies) and blend nicely with the syncretistic goals of the New Age Movement. Judy Vorfeld continues:

The mystical, make-believe world of yesteryear, whose delightful stories tickled the imaginations of generations of young people, has evolved into a magical world of pseudo-reality for people of all ages. It's seen as a world of "good" creatures having supernatural powers and using them to stamp out "evil" beings. These popular characters are displayed on such items as cereal boxes, T-shirts, glassware, jewelry, bumper stickers, bedding, school folders, and toothbrushes. . . . Television paved the way by giving us sympathetic, clever characters like Samantha, Tabitha, Endora, and Jeannie. . . . Now our culture is surrounded with supernatural cuddly toys, adorable magic elves, pastel-colored unicorns, and extraterrestrial entities who roam earth's atmosphere offering love, justice, comfort, reincarnation, and other types of eternal life.¹²

Christians must realize that powerful and ancient entities are behind such mystical playthings.

In the air above and the earth beneath are nefarious progenitors of Old/New Age mysticism. "Gods" to some and "demons" to others, such forces have numerous titles. They can appear in hideous forms or as beautiful angels of light. They are the "wicked spirits" (*poneria*: the collective body of demon soldiers comprising Satan's hordes), "rulers of darkness" (*kosmokrators*: governing spirits of darkness), "powers" (*exousia*: high ranking powers of evil), and "principalities" (*arche*: commanding generals over Satan's fallen army) of Ephesians 6:12. As the gods who walk among us, they live today and encourage mysticism among pagans, witches, New Agers, church-goers, and the general public, in at least the following ways:

- Aphrodite—sensuality, fertility rites, wiccan rituals, sacred prostitution;
- Amun-Ra—masturbation, self realization, environmentalism, Darwinism;
- Apis—animal worship, animal rights, animal channeling, occultianity;
- Apollo—humanism, oracles, channeling, psychics, drugs, visualization;
- Artemis—goddess worship, animal worship, animal rights, lesbianism;
- Asclepius—holistic medicine, psychic dreaming, spirit-guide animals;
- Athene—goddess worship, feminism, the spirituality movement, lesbianism;
- Baal—oracles, polytheism, abortion, fertility issues;
- Demeter—environmental education, earth worship, goddess worship;
- Dionysus—excessive wine, Freudianism, ecstasy, pornography, lesbianism, abortion;

- Eros—eroticism, mystical sex, body worship,
body piercing, sacred prostitution;
Gaia—earth worship, environmentalism, pa-
ganism, pantheism, sweat lodges;
Geb—environmental movement, animal rights,
eco-paganism;
Hades—devil worship, occultism, spiritism,
necromancy;
Hathor—goddess worship, earth worship, ani-
mal rights, animal worship;
Hecate—witchcraft, necromancy, crystals,
spells, druidism, feminism;
Heka—mysticism, demonism, animal rights,
environmentalism;
Hypnos—hypnotism, psychic dreaming, prog-
nostication, e.s.p., clairvoyance;
Imhotep—mystic healing, animal dancing, ho-
listic medicine, vision quests;
Isis—wicca, witchcraft, goddess worship, magic,
channeling, visualization;
Min and Qetesh—fertility rites, body worship,
sensuality, pornography;
Osiris—occultianity, necromancy, anthropo-
morphism, occultism, spiritism;
Persephone—animism, Zoroastrianism, dual-
ism, magic, necromancy;
Ptah—universalism, pantheism, mysticism, ho-
listic medicine;
Sekhmet—environmentalism, mystic medicine,
animal worship;
Seth—homosexuality, rebellion, earth worship,
environmental movement;
Vatchit—devil worship, channeling, trancing,
visualization, necromancy;
Zeus—satanism, transsexualism, pantheism,
oracles, animal worship.

By whatever names they may be called, the underworld spirits, historically referred to as gods and goddesses, are gathering the combined efforts of the kingdom of Satan into a conspiracy of apocalyptic proportions. As a consequence, we are experiencing an unprecedented revival of paganism at a time when the United States is considered the most advanced economic and technological power in the world. Why paganism? There's an ominous answer. Billy Graham declares, "Lucifer, our archenemy, controls one of the most powerful and well-oiled war machines in the universe. He controls principalities, powers, and dominions. Every nation, city, village, and individual has felt the hot breath of his evil power. He is already gathering the nations of the world for the last great battle in the war against Christ—Armageddon."¹³

The following chapter will discuss paganism's ultimate contribution to the battle of Armageddon—the resurrection of the Pharaoh spirit, the human god-king.

The New Age of the God King

“Kingship, like the gods, has for most people at most times had an appeal far profounder than its purely practical and political significance would explain: in many parts of the world kings have been revered as being sacred, or even divine.”

—*Man, Myth & Magic*

In the near future, a man of superior intelligence, wit, charm, and diplomacy, will emerge on the world scene as a savior. He will seemingly possess a transcendent wisdom that enables him to solve problems and offer solutions to many of today's most perplexing issues. His popularity will be widespread, and his fans will include young and old, religious and non-religious, male and female. Talk show hosts will interview his colleagues, news anchors will cover his movements, scholars will applaud his uncanny ability at resolving what has escaped the rest of us, and the poor will bow down at his table. He will, in every human way, appeal to the best idea of society. But his profound comprehension and irresistible presence will be the result of an invisible network of thousands of years of collective knowledge. He will,

like the pharaohs of Egypt, represent the embodiment of a very old and super-intelligent spirit. Just as Jesus Christ was the “seed of the woman” (Gen. 3:15), he will be the “seed of the serpent.” Although his arrival in the form of a man was foretold by numerous Scriptures, the broad masses of the world will not recognize him as paganism’s ultimate incarnation, the “beast” of Revelation 13:1.

It’s been assumed for centuries that a prerequisite for the end-time Pharaoh (the Antichrist) will be a “revived” world order, an umbrella under which national boundaries dissolve, and ethnic groups, ideologies, religions, and economics from around the world, orchestrate a single and dominant sovereignty. Such a system will supposedly be free of religious and political extremes, and membership will tolerate the philosophical and cultural differences of its constituents. Except for minor nonconformities, war, intolerance, and hunger will be a thing of the past. At the head of the utopian administration, a single personality will surface. He will appear to be a man of distinguished character, but will ultimately become “a king of fierce countenance” (Dan. 8:23). With imperious decree, he will facilitate a one-world government, a universal religion, and global socialism. Those who refuse his New World Order will inevitably be imprisoned or destroyed, until at last he exalts himself “above all that is called God, or that is worshiped, so that he, as God, sitteth in the temple of God, showing himself that he is God” (2 Thess. 2:4).

For many years, the idea of an Orwellian society, where a one-world government oversees the

smallest details of our lives and where human liberties are abandoned, was considered anathema. The concept that rugged individualism could be sacrificed for an anesthetized universal harmony was repudiated by America's greatest minds. Then, in the 1970s, things began to change. Following a call by Nelson Rockefeller for the creation of a "new world order,"¹ presidential candidate Jimmy Carter campaigned, saying, "We must replace balance of power politics with world order politics."² Evidently he struck a chord with world leaders. During the 1980s, President George Bush continued the one-world dirge by announcing over national television that "a new world order" had arrived. Following the initial broadcast, President Bush addressed Congress and made the additional comment:

What is at stake is more than one small country [Kuwait], it is a big idea—a new world order, where diverse nations are drawn together in common cause to achieve the universal aspirations of mankind: peace and security, freedom, and the rule of law. Such is a world worthy of our struggle, and worthy of our childrens' future!³

Ever since the President's astonishing newscast, a parade of political and religious leaders has discharged a profusion of New Age rhetoric aimed at implementing the goals of the New World Order. Al Gore, in his book *Earth In the Balance*, wrote that "we must all become partners in a bold effort to change the very foundation of our civilization." The director of the United Nations World Health Organization, Brock Chisolm, announced: "To achieve world government, it [will

be] necessary to remove from the minds of men their individualism, loyalty to family traditions, national patriotism.”⁴

And New Age guru Benjamin Creme hit the nail on the head by admitting: “What is the plan? It includes the installation of a new world government and a new world religion under Maitreia.”⁵ (Maitreia is a New Age “messiah.”)

Concurrent with the political aspects of the New World Order is the syncretistic and spiritual goals of the New Age Movement. The blending of politics and spirituality, such as occurs in New Age mysticism, harmonizes perfectly with the ideas of an end-time marriage of governmental policy and religious creed as was prophesied in the Bible. To that end, the tools necessary for paganism’s ultimate incarnation, the god-king of the Great Tribulation (Satan in flesh), are in place. The “gods” have been revived through modern mysticism. The pagan agenda of governing by “divine representation” is being constructed. The governments of the world are uniting beneath a one-world banner, and the earths masses stand at the brink of a decisive moment in time.

In his book, *The New World Order*, Pat Robertson sees the strategy of the coming world leader played out in the following way:

It is as if a giant plan is unfolding, everything perfectly on cue. Europe sets the date for its union. Communism collapses. A hugely popular war is fought in the Middle East. The United Nations is rescued from scorn by an easily swayed public. A new world order is announced. Christianity has been battered in the public arena, and New

Age religions are in place in the schools and corporations, and among the elite. Then a financial collapse accelerates the move toward a world money system.

The United States . . . turns its defense requirements over to the United Nations, along with its sovereignty. The United Nations severely limits property rights and clamps down on all Christian evangelism and Christian distinctives under the Declaration of the Elimination of All Forms of Intolerance and Discrimination Based on Religious Belief already adopted by the General Assembly. . . . Then the New Age religion of humanity becomes official, and the new world order leaders embrace it. Then they elect a world president with plenary powers who is totally given to the religion of humanity.⁶

Who will be enthroned as the President of the New World Order? Lord Maitreia? United Nations Secretary General Boutros Boutros-Ghali? A resurrected John F. Kennedy? The Pope? A complete unknown? I do not know. But an ancient scheme is unfolding. At the core of the conspiracy, a leader of indescribable brutality is scheduled to appear. He will make the combined depravities of Antiochus Epiphenes, Hitler, Stalin, and Genghis Khan, all of whom were types of the antichrist, look like child's play. He will raise his fist, "speaking great things . . . in blasphemy against God, to blaspheme his name, and his tabernacle, and them that dwell in heaven" (Rev. 13:5-6). He will champion worship of the "old gods" and "cause that as many as would not worship the image of the beast

should be killed" (Rev. 13:15), and he will revive an ancient mystery religion that is "the habitation of devils, and the hold of every foul spirit, and a cage of every unclean and hateful bird" (Rev. 18:2). Such verses are reminiscent of the Mystery religions of Dionysus and Demeter, in which the Greek god Pan, a consort of Dionysus, was famous for his pandemonium ("all the devils"). The coming world religion will be similar to the Dionysian cult in that those who reject the will of the New Age god-king will be destroyed.

Pandemonium! The Pagan Gospel of the New Age God King

The gospel, according to the New Age Movement, is an expansive idea centered around the birth of a new world "consciousness." As a religion of monism (all is one), New Agers hope to accomplish what the builders of the Tower of Babel failed to do: unify the masses of the world under a single religious umbrella, and, at the macro level, harmonically converge the world's energies with the power of Gaia. To promote such goals, New Agers claim that God is pantheistic (*God is all and all is God*) and that humans are divine members of the whole "that God is." According to New Ageism, Jesus came to reveal this pantheistic nature of God and to teach humanity the gospel of Self-Realization. After illustrating the divine principle of "God within us all," Jesus ascended to a place of distinction to live among the Masters of the Spiritual Hierarchy, including Buddha and Krishna. Jesus promised that the essence of God would be revealed from time to time, and, thus, New Agers look for the imminent appearing of a

World Teacher who will, as Jesus did, illustrate the divine human potential. In this way, New Age theology prepares the world for the coming of the False Prophet and the Antichrist.

Pagans claim such a religion of Self-realization, a belief that will be championed by the Antichrist, is older than Christianity. That's true. The gospel according to the New Age Movement, a gospel of "becoming god," is as old as the fall of man. It began when the serpent said to the woman "ye shall be as gods" (Gen. 3:5), and it will culminate during the reign of the Tribulation god-king. The New Age movement provides the perfect creed for implementing such an end-time religion. It unifies the religions of the world. It consecrates the forces of nature. It provides for human divinity, and it is vogue, post modern, and politically correct. Tal Brooke, former New Age disciple of Hindu holy man, Sai Baba, confirms that "the New Age movement, and its progeny, Gaia, are spiritually correct for a new world order. Christianity is not."⁷ Thus, history repeats itself, and the ancient Egyptian gospel of men becoming "gods" is fashionable again! Consequently, New Age celebrities such as Shirley MacLaine represent themselves as "I AM that I AM" at human potential symposiums around the world, and the Vice President of the United States, Al Gore, describes God in terms of "a constant and holy spiritual presence in all people, all life, and all things."⁸ Hillary Clinton channels the spirits of the dead and members of the House of Representatives warn Congress of "increasing evidence of a government-sponsored religion in America . . . [a] cloudy mixture of New Age mysticism, Native American folklore and primitive earth worship."⁹

For many years, Christians wondered how the Antichrist would deceive the earth's masses. How does one convince millions of people, especially in countries where Christianity exists, to exchange their souls for temporary earthly benefits? Then, the New Age Movement came along with its focus on human-potential and self-empowerment and successfully drew many Christians away from Christ-exalting doctrines. Old-fashioned gospel preaching was replaced with positive thinking, self-realization, and pop psychology, and mystical experiences which tantalize the flesh, were sanctioned as "the last great revival." As a result, celebrity preachers advance sermons focusing on "the inner self," and Sunday morning services begin with shouts of "Are you ready for God to do great things!?" The implication that God will meet with believers and grant their many requests is touted as dynamic Christianity. The days of unconditional Christian devotion are threatened as contemporary congregations expect God to "manifest" Himself and please the whims of the audience. Although Jesus warned of an "evil and adulterous generation [that] seeketh after a sign," physical and mystical "thrills" have become the benchmark of many popular Christian gathering places. The result is a growing superficiality among some Christians who are preoccupied with mysticism and "me-ism."

As a businessman and ministry leader, I've tasted the bitter results of the "new age" segment of Christianity. Too often, these believers fall, flop, quiver, shake, and gyrate on Sunday, but can't get out of bed and go to work Monday morning. Among such employees, I've found insignificant

character differences between religious groups, and “Christians” have been just as likely as non-believers to lie, cheat, and steal at my place of business. Perhaps I’ve been unlucky, or maybe, as I believe, twenty years of popular New Age metaphysical focusing on “self” has so impacted this generation that many “Christians” are willing to dilute their character to acquire what pleases them. Either way, an inward-focusing generation of “religious people” willing to trade their soul for whatever makes them happy is exactly what is necessary for the appearance of Antichrist. “You can stamp my hand if you’ll give me what I want” is the required attitude. While many Christians and New Age devotees are sincere, giving people, the lasting result of the New Age Movement is nevertheless demonic, self-absorbed, and paves the way for the coming of paganism’s preeminent materialization, the god-king of the Great Tribulation.

New Age Angels and the Chariot of the God King

When I was a child, my father made an amazing discovery while deer hunting in the mountains of Arizona. Several large and perfectly spherical craters, perhaps twenty feet across and eight feet deep, were located in an unexplored section of the range where he was hunting. The mysterious cavities were so precise that it looked as if an enormous white-hot ball had pushed into the rock, and the finish on the walls was such that rainwater filled the orbs. The sides of the holes were slick and each “pool” contained deer that had fallen in and drowned while attempting to drink the water.

Dad took pictures of the obscure semispherical holes (he showed them to the family and I remember being especially impressed), and led a representative of the Army Corps of Engineers to the location. The origin of the puzzling craters was never determined, and the Corps of Engineers filled the pools with rock to protect the wildlife. A local newspaper ran an article on the baffling holes, reprinted photographs of my father kneeling beside the orbs, and that seemed to be the end of the story.

Then, on 5 November 1975, along the north-eastern ridge of an Arizona mountain range, Travis Walton stepped out of his pick-up to look at a mysterious glowing object. While a crew of loggers waited nearby, Travis approached the UFO and was jolted by a blast of inexplicable energy. As his companions fled in terror, Travis was taken on-board the alien spacecraft and subjected to a variety of physical examinations. His story, *Fire in the Sky*, is now a motion picture. It reports what's considered to be the best documented account of a UFO abduction ever recorded. Is Travis Walton's story true? Was there a connection between the Walton-UFO and the mysterious mountain holes? Did the experiences of my sister who saw small alien-like creatures around her bed at night for years following the discovery mean anything? I don't know. But the strange phenomenon known as UFO activity is sure to play a part in the coming World Order and in the introduction of the New Age god-king.

As mentioned in chapter one, I believe a portion of UFO activity is demonic. Increasingly, others agree with that opinion. Hal Lindsey states,

"I have become thoroughly convinced that UFOs are real. . . . I believe these beings are not only extraterrestrial but supernatural in origin. To be blunt, I think they are demons."¹⁰ In *Angels Dark and Light*, Gary Kinnaman claims, "I am fairly convinced that . . . UFO sightings are the manifestations of angels of darkness. My main reason for thinking this is that UFO sightings have never, at least to my knowledge, led a person closer to God. In fact, most UFO experiences have just the opposite effect."¹¹ UFO celebrity and author of *Communion* (bestselling book about his alleged alien abduction), Whitley Streiber, describes UFOnavts in terms of demonology.

He writes:

There are worse things than death, I suspected. And I was beginning to get the distinct impression that one of them had taken an interest in me. So far the word demon had never been spoken among the scientists and doctors who were working with me. And why should it have been? We were beyond such things. We were a group of atheists and agnostics, far too sophisticated to be concerned with such archaic ideas as demons and angels."¹²

Associate professor of psychology Elizabeth L. Hillstrom points out that a growing number of academics support the conclusion that UFOnavts are synonymous with historical demons. In her informative book, *Testing the Spirits*, she writes:

From a Christian perspective, Vallee's explanation of UFOs is the most striking because of its parallels with demonic activity. UFO investigators have noticed these

similarities. Vallee himself, drawing from extrabiblical literature on demonic activities, establishes a number of parallels between UFOnavts and demons. . . . Pierre Guerin, a UFO researcher and a scientist associated with the French National Council for Scientific Research, is not so cautious: "The modern UFOnavts and the demons of past days are probably identical." Veteran researcher John Keel, who wrote *UFOs: Operation Trojan Horse* and other books on the subject, comes to the same conclusion: "The UFO manifestations seem to be, by and large, mere minor variations of the age-old demonological phenomenon."¹³

It's easy to believe that demons are involved with "flying saucers." Evil spirits can manipulate energy and matter, and the theological terms, "Transmogrification" and "Poltergeist" ("noisy ghost"), imply that spirits can make lights go off and on, doors bang, icons bleed, and saucers fly.

But if a portion of "flying saucer" activity is demonic, what nefarious purpose is served by the stealthy nature of UFO phenomena? The answer is diabolical. UFO-ism seems to be aimed at preparing the earth for the coming of Antichrist, i.e., an extraterrestrial "visitation of the gods," and, more importantly, at changing our religious beliefs. This occurs in two ways: First, from a technological standpoint, UFO sightings challenge the claim of human superiority and dispute our unique role in the universe. We are made to feel shallow, undeveloped, unenlightened. Second, from a religious point of view, extraterrestrials bring a

message (as reported in hundreds of abduction cases) of easy universalism and New Age mysticism including dialogue of humans “on the verge of extraordinary telepathic and technological growth.” Benevolent ETs profess to watch over us and promise to appear at the appropriate time to assist in our next big evolutionary, spiritual, and technological step forward. To prepare us for their coming, popular movies, bestselling books, cultural trends, and religious ideas, focus the earths masses on “help from above,” and New Agers smile and explain “It’s okay, they’ve been here before” and “Don’t worry, ancient men simply described flying saucers in terms of demons, angels, and gods, because they didn’t understand what they were seeing.”

In other words, New Agers believe that space vehicles manipulating laws of physics (suddenly appearing and disappearing, operating anti-gravitationally, etc.) were assigned “god” or “angel” status by sincere but ignorant prophets, and that Ezekiel’s living creatures will return someday in wheels “in the middle of a wheel” providing explanations of our origin and solutions to our problems. Such New Age claims of extraterrestrials visiting the earth in ancient times and interacting with men is biblically and historically true. Where Christians differ from New Agers is in the definition of who these creatures were and what they were doing. In the *Interlinear Hebrew Bible* we read:

The benei Elohim saw the daughters of Adam, that they were fit extensions. And they took wives for themselves from all those that they chose . . . The Nephelim were in the earth in those days, and even

afterwards when the benei Elohim came in to the daughters of Adam, and they bore to them—they were Powerful Ones which existed from ancient times, the men of name. (Gen. 6:2,4)

As noted in the first two chapters of this book, the benei Elohim were “extraterrestrial” angelic creatures also known as “watchers,” “sons of God,” and “rephiam.” They visited the earth during antiquity and used the daughters of Adam as “fit extensions” or instruments through which they extended themselves into the physical world. They sought to corrupt the bloodline of Adam, to deceive the human race, and to prevent the birth of the Messiah. They represented themselves as “gods,” and their offspring, the Nephilim (“fallen ones”), attempted to exterminate the people of Yahweh. In what may be a prophecy of end-time UFOs, Isaiah connected the benei Elohim to “fiery flying seraph.” We read, “Do not rejoice O Philistia, all of you, for the rod of your striking is broken, because a viper (Antichrist) comes forth from the root of the snake (Satan) and his fruit is the fiery flying seraph” (Isa. 14:29). The seraph (seraphim) were powerful angels known for their brilliance. If, as we suspect, some of the seraphim followed Lucifer in the fall, it could be that such “fiery flying seraph” are the source of UFOs today. As previously noted; the “air” above the earth was considered by ancient Hebrew scholars to be the dwelling place of fallen angels. An interesting point of this is made by J. N. Schofield in *Man, Myth & Magic*:

The warm interest of angels in mans’ welfare is vividly expressed in the saying of

Jesus that there is joy before the angels of God over one sinner who repents' (Luke 15), and that children have their guardian angels standing as favoured envoys near God Himself (Matthew 18). It was through Jewish Christians that angeology, based on the Old Testament and other Jewish writings, entered the teaching of the Church. Angels were set over the life of Nature, and over human communities. God was Israel's portion but Michael was her protector, taught her Hebrew and gave the law on Sinai. Every individual had his guardian angel and babies exposed or aborted were cared for by guardian angels. There continued to be angelic intercessors and messengers of revelation or warning, but further functions were more specialized. There was an Angel of Repentance who brought to man consciousness of sin and the promise of forgiveness, and an Angel of Peace received the soul as it left the body and bore it to paradise. The Angel of Death in Sheol was a good angel and guardian of souls.

Angelic rank was associated with speculation about the universe, which increased to the three heavens known to St. Paul. All these were thought to be above the firmament [the kosmos] where fallen angels were imprisoned, and all were inhabited exclusively by angels, the lower heavens by those in charge of human affairs, the upper by Angels of the Presence. According to some speculation, these heavens (the *Hajoth-Hakados*) were successive stages through

which souls must pass, encountering their guardian angels to whom account must be given.

If it's true that fallen angels inhabit the earth's atmosphere and that, historically, they conducted genetic experiments on the daughters of Adam and thereby produced the mutant nephilim, does the prophecy of Jesus in Luke 17:26 indicate such activity would reoccur before the Rapture? Does recent UFO abduction activity point to genetic engineering of a new race of anti-God warriors (nephilim) as we approach the Great Tribulation? Will UFOs provide the grand entry of the ultimate cross-mutation of angelic and human species, the god-king of the New World Order? Time will tell. Until then:

The mystery of iniquity doth already work: only he who now letteth will let, until he be taken out of the way. And then shall that wicked be revealed, whom the Lord shall consume with the spirit of his mouth, and shall destroy with the brightness of his coming: Even him, whose coming is after the working of Satan with all power and signs and lying wonders. (2 Thess. 2:7-9)

The Real War of the Worlds

In a popular New Age book on angels we read:

Even in this day and age, films like *The Omen*, *Rosemary's Baby*, and *The Seventh Sign* evoke horror, because they tap into the possibility that we may be influenced in some way by universal messengers of evil. However, according to our angelic informants [?], the situation, thank God, is not

like that at all. . . . Slowly, surely, we are collectively emerging from this *illusion of evil*. . . . Many contemporary Christians have begun to abandon the concept that there is a real devil, recognizing once again that there is only one omnipotent force in the universe [emphasis added].¹⁴

Whereas some pagans profess a belief in Karma or Zoroastrianism (opposing forces of good and evil), the idea of personal evil spirits such as Satan and his angels is rejected by New Agers. The concepts of Hell and a future Great Judgment are also disregarded. But the reality of Hell and the doom of Satan's followers is nevertheless described in the Bible. The "old gods" of the underworld, including Zeus, Apollo, Demeter, Isis, and others, will be judged by Yahweh. "The Lord will be terrible unto them: for he will famish all the gods of the earth" (Zeph. 2:11). "The Lord of hosts, the God of Israel, saith; Behold, I will punish the . . . gods" (Jer. 46:25). Yahweh will also punish the leader of the gods, that old serpent, called the Devil, and his human followers. In Isaiah we read:

Come, my people, enter thou into thy chambers, and shut thy doors about thee: hide thyself as it were for a little moment, until the indignation be overpast. For, behold, the Lord cometh out of his place to punish the inhabitants of the earth for their iniquity: the earth also shall disclose her blood, and shall no more cover her slain. In that day the Lord with his sore and great and strong sword shall punish Leviathan the piercing serpent, even Leviathan that crooked serpent; and he shall slay the dragon that is in the sea. (Isa. 26:20-27:1)

However futile, the gods will retaliate, and a war of indescribable intensity will occur in the future. It will be fought on land and sea, in the heavens above, and in the earth below, in the physical and spiritual worlds. It will include "Michael and his angels [fighting] against the dragon; and the dragon [fighting] and his angels" (Rev. 12:7). Heretics will join the battle and call upon "idols of gold, and silver, and brass, and stone, and of wood" (Rev. 9:20) to convene their evil powers against the Christian God, and New Agers will unite with "unclean spirits like frogs. . . . the spirits of devils [the frog goddesses Heka or Hekate?] working miracles, which go forth unto the kings of the earth . . . to gather them to the battle of that great day. . . . [to] a place called in the Hebrew tongue Armageddon ["Mount Megiddo"]" (Rev. 16:13-14;16). There, in the valley of Megiddo, the omnipotent Christ will utterly repel the forces of darkness and destroy the New World army. Blood will flow like rivers, and the fowl of the air will "eat the flesh of the mighty, and drink the blood of the princes of the earth."

Tim LaHaye says, "As far back as the time of Napoleon, that great valley was claimed to be the most natural battleground of the whole earth."¹⁵ Besides Armageddon, battles will be fought in the Valley of Jehoshaphat and in the city of Jerusalem. But the battle of Armageddon will climax the hostility between God Almighty and the lower gods of the underworld. Once before, Satan and his "god" spirits challenged Yahweh at Megiddo. They lost. On Mount Carmel, overlooking the Valley of Armageddon, the prophets of the demon-god Baal dared the Hebrew God to answer by fire. He did

and He will again. When He does, where will you be? Will you join forces with the gods of the underworld and trust in the armies of the New Age/New World Order? If so, here is your future:

And I saw the beast, and the kings of the earth, and their armies, gathered together to make war against him that sat on the horse [Jesus], and against his army [Christians and angels of God]. And the beast was taken, and with him the false prophet that wrought miracles before him, with which he deceived them that had received the mark of the beast, and them that worshipped his image. These both were cast alive into a lake of fire burning with brimstone. And the remnant were slain with the sword of him that sat upon the horse, which sword proceeded out of his mouth: and all the fowls were filled with their flesh. . . . And I saw a great white throne, and him that sat on it, from whose face the earth and the heaven fled away: and there was found no place [to hide]. And I saw the dead, small and great, stand before God; and the books were opened: and another book was opened, which is the book of life: and the dead were judged out of those things which were written in the books, according to their works. . . . And whosoever was not found written in the book of life was cast into the lake of fire. (Rev.19:19-21; 20:11-12,15)

If you repent of your sins and believe on the Lord Jesus Christ you will experience a different destiny at the battle of Armageddon:

And I saw heaven opened, and behold a white horse; and he that sat upon him was called Faithful and True [Jesus], and in righteousness he doth judge and make war. His eyes were as a flame of fire, and on his head were many crowns; and he had a name written, that no man knew, but he himself. And he was clothed with a vesture dipped in blood: and his name is called The Word of God. And the armies which were in heaven [Christians and angels of God] followed him upon white horses, clothed in fine linen, white and clean. And out of his mouth goeth a sharp sword, that with it he should smite the nations: and he shall rule them with a rod of iron: and he treadeth the winepress of the fierceness and wrath of Almighty God. And he hath on his thigh a name written, KING OF KINGS, AND LORD OF LORDS. . . . And I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and. . . . I heard a great voice out of heaven saying, Behold, the tabernacle of God is with men. . . . And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away. And he that sat upon the throne said. . . . I will give unto him that is a thirst of the fountain of the water of life freely. He that overcometh shall inherit all things; and I will be his God, and he shall be my son [or daughter] (Rev. 19:11-16; 20:1-7).

Preceding such apocalypse, the year 2000 will undoubtedly herald the unprecedented changes of a final millennium. As the gods of the underworld work to establish dominion over mankind and within a new world order, the god-king (Antichrist) of the Great Tribulation will prepare for his appearance. Such is a time for Christians worldwide to unite in common cause. What can believers do about the spread of paganism and the goals of a New World Order?

First, Christians must resist the temptation to squander their time and energy pursuing silly mystical experiences and religious entertainment and wholly commit to the vocal community declaration of the Gospel of Jesus Christ. It is the preaching of the Gospel that embodies the power of God unto salvation; both of nations and of individuals.

Second, we must be willing to intercede in prayer and fasting for our nation and for its leaders. The lower gods of the underworld and their impact on society have historically been overcome by heavenly activity generated by righteous men and women on bended knees.

Third, political representatives need to hear about Christian concerns. A single call or letter is considered by most congressmen to represent the will of many thousands of other Americans.

Fourth, let's prepare for the coming of Christ! Believers in this age need to draw close to God and to His Word and live righteously. As R.L. Brandt said in the foreword, "We are at the end of the age. The coming of our Lord is near. Let us sound the trumpet in Zion!"

A Word from Ex New-Ager Judy Vorfeld

“Everything is about power,” says a character in a best-selling novel. This certainly appears to be the key theme of the Bible. God the Father, God the Son, and God the Holy Spirit, from the beginning, have all power, and, in their holiness, are worthy of the highest form of worship.

Early in the Bible we see Satan working relentlessly to become the only object of worship on Planet Earth. Fully aware of the nature and purposes of Jesus, Satan still tried to manipulate Him into worshipping him. Matthew 4:8 reveals that Satan “took Him to a very high mountain, and showed Him all the kingdoms of the world, and their glory; and he said to Him, ‘All these things will I give You, if You fall down and worship me.’”

Through the centuries, the enemy downplays God’s power and the work of the Cross. He continues to work vigorously to make Jesus an equal of Buddha, Mohammed, the Dalai Lama, and other wise ones. He often succeeds. But Christians know that Jesus came to Earth to die, not to teach platitudes or become politically correct. God didn’t plan that Jesus would be on the *All-time List of the World’s Greatest Teachers* or become *Time* magazine’s Person of the Year.

Many people we love have fallen under the influence of deceived teachers and deceptive philosophies. Their doctrines, often graced with biblical words and phrases, undermine God’s authority, ability, promises and power. These people cling to religion, hoping for peace, happiness, and meaning for their lives. They honestly believe that religious practices will accomplish this. At one time,

so did I, ignorant of the fact that Satan offers a highway to happiness paved with empty promises and cheap glitter. Some of the road signs say, *This Way To A God Who Won't Embarrass You* (subtitle: Forget This "Born Again" Nonsense), *Turn Left For The God Of Your Design*, and *Two Miles To An Intellectually Stimulating God*. Countless souls struggle on this wide, but crowded, road.

God offers a slim, straight highway of simple faith, paved with the blood of Jesus, and ending at Calvary. Christianity offers a spiritual life based on what Christ did 2,000 years ago. Beyond the requirement of belief, God offers something quite different than all other religions: relationship.

I grew up thinking that Christianity required good works and constant church attendance. I also thought God was watching me with a lightning bolt in one hand and a sledge hammer in the other, waiting to get me if I misbehaved. After moving from Humanism to the New Age Movement to Christianity, I discovered that going to church was a choice and a privilege, but my eternal destiny wasn't based on how many times a week I attended church. Relationship with God, not religion, is everything.

Part of a healthy relationship comes from listening well, and I'm not always the best listener. God's voice is soft and gentle. I've learned that He loves me deeply and passionately. He shows it many times each day in tiny, precious ways. His delight in me helps me see myself through His eyes as one who is lovable. I've always been able to see the value and beauty in others, but not in myself.

How has He revealed Himself to me? Perhaps

the best example is in filling a basic need, of having a loving relationship with my father. For most of my life, my father and I were strangers, and I had a hole in my soul. My parents divorced when I was a teen. I've been close to my mother most of my life; she's a friend and a delight. But by the time Dad reached 90, I figured things would always be the same. I loved him, but didn't know him. Several years ago, his family, converging from many parts of the country, and including many great grandchildren, threw a surprise 90th birthday party for him. I believe this activated something deep inside him. The following year, I flew up from Arizona to visit him in Washington. For a solid week, we lugged cameras, maps, and sack lunches, hiking to many breathtaking locations. Actually, I hiked. Sometimes Dad (who has Congestive Heart Failure) crawled. We laughed a lot.

This visit triggered something in both of us, and our relationship began to change. Most of our contact since then has been via telephone. How can I express my feelings when my 94-year-old father says, "I love you, darling," as our conversations come to a close? His voice seems coated with honey. My heart bubbles with joy. I always hang up the phone in awe of a Heavenly Father that allowed this to happen. Would I have loved God as much if Dad had died before our special reconciliation? Absolutely. But God gave me a special gift, a just-for-Judy gift, another taste of his grace.

Christians, are any of your loved ones traveling the highway of futility? Are they trapped in paganism? Do you feel frustrated in your inability to share Jesus with them? Here are a few things

you can do that may help them see the truth:

Intercede. Ask God to help you see them from His perspective, to feel what He feels toward them. Be willing to have your heart broken with love as you experience God's deep, powerful love for them.

Never stop praying for them. My family and Christian friends lifted me up before the Lord (some, for years) before I accepted Him.

Separate the believer from the belief, but be willing to be totally honest in discussing those beliefs, if God makes an opening.

Resist shooting them with "Bible Bullets," but know your Bible well, and be prepared to share the truth when the opening comes. If you are not a Christian, I ask one thing: on your own, begin reading the Bible, with the understanding that it may be more than an ordinary book and more than mere words. Consider reading, each day, about six chapters in the Old Testament to two in the New Testament, starting with Genesis and Matthew. Read it with this in mind: *does it reveal Jesus Christ as God's Son, and does it show how He made a way for you to have a deeply intimate relationship with Him?* Surely you can take time to read this book and see if it has truth and consistency running through it.

There is much truth in the statement that everything is about power. We humans constantly look for it in our lives. Anything we can understand, we can control (to one extent or another). This is why it is important for so many to have a god they can figure out. Many sincere people search in vain for a magic blueprint for happiness and meaning to life. One road offers any kind of a god you want. Pick from the gods of the past,

the gods of the New Age, or go the create-a-god route: choose size, shape, age, race, gender, and composition.

The other road is just wide enough for one person at a time. At the end is Jesus. His open arms reach toward the traveler. All He offers is two nail-scarred hands.

FLORENTINE CODEX

Answer: Aztecs

-Aztec civilization: began the conquest of the latin america

-The Aztec Empire flourished between c. 1345 and 1521 CE and, at its greatest extent, covered most of northern Mesoamerica. Aztec warriors were able to dominate their neighbouring states and permit rulers such as Motecuhzoma II to impose Aztec ideals and religion across Mexico. Highly accomplished in agriculture and trade, the last of the great Mesoamerican civilizations was also noted for its art and architecture which ranks amongst the finest ever produced on the continent.

- *The Aztec Civilisation (1345 - 1521 CE)*
- *Indigenous central Mexican people*
- *covered most of northern Mesoamerica*
- *Aztec warriors were powerful*
- *highly accomplished in agriculture and trade*

AZTEC CIVILIZATION

The Aztec Empire flourished between c. 1345 and 1521 CE and, at its greatest extent, covered most of northern Mesoamerica. Aztec warriors were able to dominate their neighbouring states and permit rulers such as Motecuhzoma II to impose Aztec ideals and religion across Mexico. Highly accomplished in agriculture and trade, the last of the great Mesoamerican civilizations was also noted for its art and architecture which ranks amongst the finest ever produced on the continent.

The fall of the Aztec civilization: began the conquest of the latin america

An encyclopedic work about the people and culture of central Mexico compiled by Fray Bernardino de Sahagún (1499–1590), a Franciscan missionary who arrived in Mexico in 1529, eight years after completion of the Spanish conquest

Sahagún's primary motivation was to evangelize indigenous Mesoamerican peoples, and his writings were devoted to this end. He described this work as an explanation of the “divine, or rather idolatrous, human, and natural things of New Spain.” Before he can begin to convert the natives to Christians, it was necessary to understand those gods and the hold they had on the Aztec people. Sahagún was repelled by much of native culture, but he also came to admire many qualities of the Aztecs. As he wrote in the prologue to Book I of his work, the Mexicans “are held to be barbarians and of very little worth; in truth, however, in matters of culture and refinement, they are a step ahead of other nations that presume to be quite politic.”

-The 12 volumes document the culture, religious and ritual practices, economics, and natural history of the indigenous central Mexican peoples in the years immediately preceding the Spanish Conquest, as well as the events of the Conquest itself.

BOOK SUMMARIES

Composed of 12 Books

BOOK 1: THE GODS

BOOK 2: THE CEREMONIES

BOOK 3: THE ORIGIN OF THE GODS

BOOK 4: THE SOOTHSAYERS

BOOK 5: THE OMENS

BOOK 6: PRAYERS AND MORAL PHILOSOPHY

The Gods. Deals with gods worshiped by the natives of this land, which is New Spain.

The Ceremonies. Deals with holidays and sacrifices with which these natives honored their gods in times of infidelity.

The Origin of the Gods. About the creation of the gods.

The Soothsayers. About Indian judiciary astrology or omens and fortune-telling arts.

The Omens. Deals with foretelling these natives made from birds, animals, and insects in order to foretell the future.

Rhetoric and Moral Philosophy. About prayers to their gods, rhetoric, moral philosophy, and theology in the same context.

The Sun, Moon and Stars, and the Binding of the Years. Deals with the sun, the moon, the stars, and the jubilee year.

Kings and Lords. About kings and lords, and the way they held their elections and governed their reigns.

The Merchants. About long-distance elite merchants, pochteca, who expanded trade, reconnoitered new areas to conquer, and agents-provocateurs.

The People. About general history: it explains vices and virtues, spiritual as well as bodily, of all manner of persons.

Earthly Things. About properties of animals, birds, fish, trees, herbs, flowers, metals, and stones, and about colors.

The Conquest. About the conquest of New Spain from the Tenochtitlan-Tlatelolco point of view.

Answer: Sacrifice

Literal SACRIFICE

The Aztec Capital: TENOCHTITLAN

- where the skinning of the daughter of Coxcox of Colhuacan was held

sacrifices not limited to humans, included animals such as eagles,
dogs, and deers

objects were also given as sacrifice

The Aztecs were very big on sacrifice. The first human sacrifice was held in Tenochtitlan, the Aztec Capital. The victim was the daughter of Coxcox of Colhuacan. Sacrifices included humans, animals and even objects, and whatever they deemed pleasing to the gods, to whom they were sacrificing whatever to.

But why do they perform sacrifices a lot? Sacrifice holds such great religious significance for the Aztecs because it was a way to maintain the balance in between them, the gods and nature. They had a festival for a certain god every month, which means they had a total of 18 festivals a year for the Aztec calendar had 18 20-day months, which means they held or performed the ritual of sacrifice at least 18 times a year. Even their battles against other clans or tribes were religious. Well, scholars would argue that they were political in nature which involved a power play between the respective tribes, but if adopting a religious perspective on these battles, it would seem that the battles, called the Flower Wars, were fought mainly to gain sacrifices in the form of prisoners of war, who they offered or sacrificed to the sun god Huitzilopochli to give him strength and keep the sun shining and avert disaster or the end of the world every 52 years.

Figurative

SACRIFICE

LEGEND OF THE FIVE SUNS

gods sacrificed themselves for mankind

humans owe the gods a blood debt, repaid through sacrifices

atonement: human sacrifice as the highest form

death through sacrifice deemed as good death

heart as the seat of an individual

BOOK 12: THE CONQUEST

N E W S P A I N
S A W I E H
S P N T N C

Answer: New Spain

SUMMARY: BOOK 12

PRE-CONQUEST AND THE CONQUEST

- contains primary accounts from the natives of the arrival of the foreigners
- Spanish conquest of Mexico
- New Spain: modern-day Mexico, Central America, Cuba, Hispaniola, Puerto Rico, Jamaica, Philippines, Florida, most of the southwestern U.S.

Book XII recounts the Spanish conquest of Mexico, which took place between 1519, when Cortés landed on the coast with just over 100 men and a few horses, and 1521, when Tenochtitlan was taken and the Aztecs subjugated.

S O N I E O
S Q L T M L

Answer: OMENS

As mentioned before, Book 12 shows the arrival of the conquerors as how locals or the natives saw it, through omens that began 10 years prior to their arrival.

First Omen: flame or tongue of fire

Second Omen: house of the devil, Huitzilpochtli, in his mountain called, Tlacateccan, burned and flared up on its own accord

Third Omen: building of straw at the temple complex of Xiuhteutli, called Tzonmolco was struck by lightning in three parts while the sun was still out

Fifth Omen: water of the lake boiled up

Sixth Omen: a woman would be heard going along weeping and shouting

Seventh Omen: once water-folk were hunting or snaring and caught an ash-like bird, like a crane

Eighth Omen: many times, people appeared, thistle-people with 2 heads but 1 body

FIRST OMEN

SECOND OMEN

First Omen: flame or tongue of fire

Second Omen: house of the devil, Huitzilpochtli, in his mountain called, Tlacateccan, burned and flared up on its own accord

Third Omen: building of straw at the temple complex of Xiuhteutli, called Tzonmolco was struck by lightning in three parts while the sun was still out

Fourth Omen: Shooting stars

Fifth Omen: water of the lake boiled up

Sixth Omen: a woman would be heard going along weeping and shouting

Seventh Omen: once water-folk were hunting or snaring and caught an ash-like bird, like a crane

Eighth Omen: many times, people appeared, thistle-people with 2 heads but 1 body

THIRD OMEN

FOURTH OMEN

As mentioned before, Book 12 shows the arrival of the conquerors as how locals or the natives saw it, through omens that began 10 years prior to their arrival.

First Omen: flame or tongue of fire

Second Omen: house of the devil, Huitzilpochtli, in his mountain called, Tlacateccan, burned and flared up on its own accord

Third Omen: building of straw at the temple complex of Xiuhteutli, called Tzonmolco was struck by lightning in three parts while the sun was still out

Fourth Omen: Shooting stars

M Z O I E U
M M N T A C

Answer: Montezuma

MONTEZUMA

leader of the Aztecs from 1502 to 1520

ninth tlatoani or ruler of Tenochtitlan

depicted as unfavorably weak-willed, superstitious and indulgent by Sahagun

"When Montezuma saw this, he took fright."

Moctezuma or Montezuma.

- leader of the Aztecs; ninth tlatoani or ruler of Tenochtitlan, reigning from 1502 to 1520.

- in Book 12, the astonishment and fright of the people are clearly described with the omens and signs of incoming trouble

- "When Montezuma saw this, he took fright."

- [line above as proof] Sahagun depicted Montezuma unfavorably as a weak-willed, superstitious, and indulgent ruler

- These legends are likely a part of the post-conquest rationalisation by the Aztecs of their defeat, and serve to show Moctezuma as indecisive, vain, and superstitious, and ultimately the cause of the fall of the Aztec Empire

Answer: Hernan Cortez

HERNAN CORTEZ

LEADER OF THE CONQUISTADORS

- easily conquered and defeated the Aztecs
- use of firearms and horses
- ruthlessness in battle which determined the Spanish victory
- landed on the coast with over a hundred men

-leader of the conquistadors: Hernan Cortez

-despite being heavily outnumbered by the natives, still managed to easily conquer Mexico with the use of firearms and horses, both of which the Aztecs have never encountered before, rendering their spears and generally melee weapons useless

-Among the key factors that determined the Spanish victory were the ruthlessness of the Spanish soldiers and of Cortés in particular, the use of horses and firearms, which the Mesoamericans had never seen, and Cortés's intuition that the peoples of the Aztec Empire were prepared to join forces with him to shake off Aztec rule.

Answer: Philippines

RELIGION

AS COLONIZING TOOL

- Use of the Catholic religion
- Parallelism of the Spanish colonisation of
- Sahagún's preparation for the creation of the Florentine Codex began shortly after his arrival in 1529 to New Spain
- Sagahun's motive was primarily religious

ADVERTENCIAS PERTINENTES

La ortografía del maya es tradicional. Para su pronunciación hay que tomar en cuenta lo siguiente:

c ante toda vocal tiene valor de *k* o *qu*, es decir, que ante *e* o *i* debe leerse *que* o *quí*.

h es siempre aspirada como en inglés, excepto en *ch* que suena como el diagrama del español y del inglés y en *th* cuyo sonido se explica más abajo.

s y *z* suenan como la *s* del inglés o del español de América.

th representa un sonido de *t* glotalizado.

' (un apóstrofo) arriba y después de una consonante hace que suene glotalizada; y arriba y después de una vocal tiene valor de consonante glotal (*glottal stop*).

dz representa un sonido africado glotalizado sordo que debiera representarse así: *ts'*, usándose tres signos. Es el sonido glotalizado del diagrama tradicional *tz* (*ts*). Antiguamente se representó con *c* invertida (ɿ).

Los paréntesis cuadrados [] encierran inclusión del autor y los paréntesis angulares < > restituyen o corrigen.

INTRODUCCIÓN GENERAL

LOS LIBROS DE CHILAM BALAM

Los llamados Libros de Chilam Balam forman una de las secciones más importantes de la literatura indígena americana. Fueron redactados después de la conquista española, por lo que su escritura y su forma material son europeos. Es decir, su escritura es la que los frailes españoles adaptaron a la fonología de la lengua maya en Yucatán y el papel usado —por lo menos en las copias ahora existentes— es también europeo, formando cuadernos. Algunos, si no todos, tuvieron tapas de vaqueta. El material que contienen es heterogéneo. De modo general puede clasificarse así: 1) Textos de carácter religioso: *a)* puramente indígena; *b)* cristiano traducido al maya. 2) Textos de carácter histórico, desde crónicas con registro cronológico maya a base de la "cuenta corta" (katunes en series de 13) hasta simples asientos de acontecimientos muy particulares sin importancia general. 3) Textos médicos, con o sin influencia europea. 4) Textos cronológicos y astrológicos: *a)* tablas de series de katunes con su equivalente cristiano; *b)* explicaciones acerca del calendario indígena; *c)* almanaques con o sin cotejo con el Tzolkin maya, incluyendo predicciones, astrología, etc. 5) Astroonomía según las ideas imperantes en Europa en el siglo xv. 6) Rituales. 7) Textos literarios; novelas españolas, etc. 8) Miscelánea de textos no clasificados.

Como se ve, la diversidad de su contenido abarca todas las fases culturales por que fue pasando el pueblo maya de Yucatán hasta que cesaron de compilarse. Es indudable que gran parte de sus textos religiosos e históricos puramente nativos provienen de los antiguos libros jeroglíficos, de los cuales solamente existen disponibles en el mundo tres, todos en Europa (véase Villacorta y Villacorta, 1933). Otra porción de sus tex-

tos ha sido registrada de fuente oral y el resto de impresos europeos.

Vinieron a llamarse Libros de Chilam Balam, no sabemos desde cuándo. No consta este nombre como título original de ninguno actualmente, aunque Pío Pérez asienta en una de sus transcripciones: "Hasta aquí termina el libro titulado Chilambalam que se conservó en el pueblo de Maní..." (Códice Pérez, Ms., p. 137.) De todos modos, el nombre es ya una denominación técnica aceptada para designar este tipo de libros yucatecos.

Balam es el nombre del más famoso de los Chilames que existieron poco antes de la venida de los blancos al continente. Balam es un nombre de familia, pero significa jaguar o brujo, en un sentido figurado. Chilam (o chilan) es el título que se daba a la clase sacerdotal que interpretaba los libros y la voluntad de los dioses. La palabra significa "el que es boca" (véase Landa, 1938, ed. yuc., p. 50 y Diccionario de Motul, Ms., *sub voce*). Chilam Balam predijo el advenimiento de una nueva religión y de allí su fama. Vivió en Maní en la época de Mochan Xiu poco antes de la conquista española.

Cómo llegaron a organizarse y multiplicarse los Libros de Chilam Balam, lo suponemos así: Algún sacerdote (o varios sacerdotes simultáneamente) recibiría instrucción de los frailes, aprendiendo a leer y escribir en su propia lengua. Aprovechando esta nueva adquisición de su cultura, transcribiría textos religiosos e históricos contenidos en sus libros jeroglíficos, incluyendo los de las predicciones de Chilam Balam. De una o varias fuentes saldrían copias que pasarían a manos de los sacerdotes nativos de otros pueblos, viniendo así a incluir en su denominación el nombre del lugar de procedencia: Chumayel, Maní, Tizimín, etc. En cada poblado al núcleo original se le fue adicionando otro material de acuerdo con el criterio del curador y según los acontecimientos locales. Como se les tenía por libros sagrados, que eran leídos en ciertas ocasiones, había el interés de conservarlos para la posteridad y fueron copiados y recopiados cuando se deterioraban. Los copistas cometieron errores de lectura, por lo que en veces, sea por

desgaste, mala escritura anterior, manchas, etc., no entendieron alguna palabra correctamente, la transcribieron mal, o la sustituyeron por otra, en ocasiones correcta según el contexto, pero no exactamente igual a la que se sustituía, sino sinónima; cometieron algunos errores de escritura; dejaron de poner palabras faltantes completamente o agregaron de su cosecha otras, etc. El tiempo destruía los libros materialmente y destruía a su vez el entendimiento que sus curadores deberían tener de su contenido al modificar su propia cultura. Así pues, las copias hoy existentes no son las originales del siglo xvi en sus textos de fondo, sino copias de copias muy posteriores, algunas del siglo xvii y otras aun del presente siglo. Gran parte de estos textos que llamamos de fondo aparecen repetidos una o más veces en los Libros, pero en cada ocasión las versiones no son idénticas, por las razones apuntadas.

Puede entonces decirse que los Libros contienen dos tipos de texto, en lo que respecta a la posibilidad de su exégesis: 1) los susceptibles de ser reconstruidos por cotejo de sus varias versiones y 2) los que no son susceptibles de reconstrucción porque son singulares. Algunos de estos últimos, debido a su asunto, simplicidad y época no lejana, obviamente no necesitarían reconstrucción. De ahí que hayamos preferido hacer un Libro de Libros de Chilam Balam, en lugar de hacer traducciones aisladas de cada uno, y que hayamos preferido los textos del tipo 1 para hacerlo, dejando para más adelante los del tipo 2, pues es posible que sean hallados nuevos Libros donde aparezcan textos paralelos de algunos que actualmente son singulares. Por de pronto, hasta 1936, el texto de "El Lenguaje de Zuyua", incluido en esta obra, no tenía paralelo, pero en ese año fue descubierto el Libro de Chilam Balam de Tusik en donde vino una versión que ha servido mucho para aclarar algunos pasajes.

Así pues, la presente obra contiene la traducción de los textos de los cuales existe más de una versión. Las traducciones se han hecho sobre la reconstrucción realizada mediante una cuidadosa colación de las varias versiones, siguiendo un método riguroso, como puede verse

en nuestra edición crítica de la Crónica publicada por la Carnegie Institution of Washington en 1949, con un comentario por el Dr. Sylvanus G. Morley.

Al presente hay listados más de una docena de Libros de Chilam Balam, pero los disponibles para estudio son los siguientes: 1) Chumayel, 2) Tizimin, 3) Káua, 4) Ixil, 5) Tekax, 6) Nah, 7) Tusik y 8) Códice Pérez (Maní).

Hay noticias de otros: el de Teabo, que parece ser el mismo de Tekax y los de Peto, Nabulá, Tihosuco, Tixkokob, Hocabá y Oxkutzcab, pero nadie los ha descrito, ni se sabe dónde se encuentran.

Se dio en llamar Chilam Balam a la Crónica de Calkiní de carácter puramente histórico, traducida por nosotros y publicada, con el nombre de Códice de Calkiní, en 1957.

La referencia clara de la existencia de los Libros de Chilam Balam en los principios del siglo XVII la tenemos en Sánchez de Aguilar, que dice en su informe (ed. 1937, p. 181): "Ultra que sería muy útil que hubiese impresos en la lengua de estos Indios, que tratasen del Génesis y creación del mundo; porque tienen fábulas, o historias muy perjudiciales, y algunos las han hecho escribir, y las guardan, y leen en sus juntas. E yo huue un cartapacio destos que quité a un Maestro de Capilla, llamado Cuytun del pueblo de Çucop, el cual se me huyó, y nunca le pude auer para saber el origen deste su Génesis..." Cogolludo (1867-1868, vol. I, p. 310), después de citar las palabras de Sánchez de Aguilar, agrega: "Recién venido yo de España oí decir a un religioso llamado Fr. Juan Gutiérrez, y era gran lengua de estos indios, que había visto otro escrito semejante al dicho..." También menciona Cogolludo (*ibid.*, p. 183) "un librito..." que fue seguramente —o es— una crónica histórica del tipo de las de los Pech o de la de Calkiní.

El Dr. D. Agustín de Echano, canónigo que fue de la Catedral de Mérida (Yucatán), en la aprobación de una obrita en maya, impresa en 1758, asienta: "La experiencia de manejar tan incesantemente a los indios en cerca de doce años que les serví, me enseñó que el motivo de estar todavía muchos tan apegados a sus antigüedades era porque siendo los naturales muy curiosos, y aplicán-

dose a saber leer, los que esto logran, cuanto papel tienen a mano tanto leen; y no habiendo entre ellos más tratados en su idioma que los que sus antepasados escribieron, cuya materia es sólo de sus hechicerías, encantos y curaciones con muchos abusos y ensalmos" (en Domínguez, 1758). Damos inmediatamente una breve reseña de cada uno de los ocho más conocidos:

1. *El Chilam Balam de Chumayel*

Procede del pueblo de Chumayel, Yucatán. Fue propiedad del Sr. Obispo Crescencio Carrillo y Ancona. En 1868, siendo ya propiedad de éste, fue copiado a mano por el Dr. Berendt y en 1887 fotografiado por Teoberto Maler. George B. Gordon, director del Museo de la Universidad de Pennsylvania, lo fotografió y editó en forma facsimilar en 1913. Pasó a la Biblioteca Cepeda de Mérida en 1915 de donde fue sustraído juntamente con otros manuscritos, antes de 1918. En 1938 apareció en venta en los Estados Unidos en la suma de siete mil dólares. Más tarde, fue de nuevo ofrecido en venta al Dr. Sylvanus G. Morley por la suma de cinco mil dólares.

Partes de él han sido traducidas y publicadas desde 1882, pero la primera traducción completa la publicó Antonio Médez Bolio en Costa Rica en 1930, en español. La segunda, en inglés, la hizo Ralph L. Roys quien la publicó en 1933.

2. *El Chilam Balam de Tizimín*

Procede de la villa de Tizimín, Yucatán, y fue hallado allí a mediados del siglo XIX. El párroco de este lugar lo donó al Obispo Carrillo y Ancona en 1870, quien originalmente lo llamó Códice Anónimo. Fue copiado por Berendt posiblemente poco después de 1870. De la copia de Berendt se valió Brinton para hacer la primera traducción de una parte del código. Compañero del Chumayel, siguió la misma suerte que éste, hasta que procedente de los Estados Unidos fue donado por la señorita Laura Temple al Museo Nacional de Arqueología (hoy

Museo Nacional de Antropología), en donde se conserva juntamente con el de Ixil.

La única traducción completa del Chilam Balam de Tizimin es obra de Maud Worcester Makemson, quien con el título de *The Book of the Jaguar Priest* la publicó en 1951.

3. *El Chilam Balam de Káua*

Este también fue de la colección del Obispo Carrillo y Ancona y formó parte del grupo de manuscritos que fue extraído de la Biblioteca Cepeda de Mérida, poco después de haber sido depositado en ella en 1915. No se conoce su actual paradero. Es tercero en importancia, el más voluminoso sin embargo, con 282 páginas; nunca ha sido totalmente traducido ni publicado. Sólo se le han sacado copias manuscritas o fotográficas y traducido algunas de sus recetas médicas por Roys en 1931.

4. *El Chilam Balam de Ixil*

Pío Pérez, en su miscelánea de extractos de Libros de Chilam Balam conocida ahora como "Códice Pérez", describe este documento y menciona que el lugar de su procedencia es el pueblo de Ixil. No se sabe cómo pasó a manos del Obispo Carrillo y Ancona. Estuvo incluido en el mismo legajo del Libro de Tizimin e identificado por nosotros, se halla ahora separado de éste en la Biblioteca del Museo Nacional de Antropología en la ciudad de México. No ha sido traducido, ni publicado, salvo en pocas copias fotostáticas y manuscritas. Contiene un recetario médico.

5. *El Chilam Balam de Tekax*

Es semejante al de Káua, pero mucho más corto, pues solamente contiene 36 páginas. Es calendárico y médico. Nunca ha sido traducido ni parcialmente. Formó parte de la Colección de William Gates. Ignoramos cuál sea ahora su paradero. Existen de él copias fotográficas en algunas bibliotecas.

6. *El Chilam Balam de Nah*

Procede de Teabo, Yucatán. Es también del mismo tipo del Káua, con 64 páginas e igualmente formó parte de la Colección de Gates. El material médico que contiene fue traducido por Ralph L. Roys al inglés y publicado en 1931. Se ignora dónde pára actualmente.

7. *El Chilam Balam de Tusik*

Fue descubierto en la aldea de Tusik, Quintana Roo, México, en 1936. Consiste en un cuaderno de sólo 29 hojas. Contiene algunos textos semejantes a los del Chilam Balam de Chumayel. Uno de éstos ha servido para cotejar la única copia que existía en el Chumayel del Lenguaje de Zuyua que se incluye en este libro. Posiblemente se encuentre aún en Tusik. Ha sido fotografiado, transcrito y traducido parcialmente, pero no publicado.

8. *Códice Pérez*

Por su importancia este Manuscrito debería ocupar uno de los primeros lugares; si se coloca aquí, es porque en sí mismo ni es copia hecha por indígenas mayas, ni lo es de un solo libro, sino un conjunto de fragmentos de varios, principalmente de los Libros de Maní (ahora desaparecidos), Ixil y Káua, recopilado por D. Juan Pío Pérez alrededor del año de 1840. El manuscrito original está en manos de una familia Escalante de Mérida. Ha sido copiado varias veces y una de sus copias se halla en la Biblioteca Nacional de México; otra existe en la Colección Berendt en la Universidad de Pennsylvania, una más en el Middle American Research Institute y otra en la Biblioteca del Instituto Yucateco de Antropología e Historia. El Dr. Ermilo Solís Alcalá la tradujo al español, habiéndose publicado su traducción en 1949. Contiene cerca de 200 páginas. El nombre de Códice Pérez se lo asignó el Obispo Carrillo y Ancona en 1870. Fue compilado entre 1837 y el siguiente año. Juan Pío Pérez lo dividió en dos partes que aquí se citan como Pérez I y Pérez II.

La lista de los textos incluidos en la presente obra y su procedencia pueden verse en el Cuadro Sinóptico respectivo.

Algunos de los textos que aquí se incluyen han sido publicados antes por otros autores, pero solamente en una de sus versiones, de modo que, si se les coteja, nuestra traducción nunca será idéntica a la de aquéllos, ya que se ha hecho sobre la reconstrucción de los textos, colacionando cada versión conocida.

LA CRÓNICA MATICHU

En los Libros de Chilam Balam 1) de Maní (Pérez I) a páginas 134-137; 2) de Tizimín a folios 18v-19r, y 3) de Chumayel a páginas 74-77 de la edición Gordon, aparecen tres versiones de un mismo texto que se habían venido tomando como tres crónicas distintas, aunque de contenido semejante. Un cuidadoso cotejo de las tres versiones vino a demostrar que realmente se trata de una sola crónica que puede dividirse en cuatro partes, que por primera vez se editan por separado.

La que aquí llamamos Parte I es una historia de las emigraciones de los Xiues, desde su salida de Nonoual en un Katun 3 Ahau (10.2.0.0.0: 849-869) hasta su establecimiento en Chacnabitón, que duró hasta el fin de un Katun 5 Ahau (10.14.0.0.0: 1086-1106). La Parte II es una historia itzá que abarca desde el "descubrimiento" de la provincia de Siyan Can Bakhallal en un Katun 8 Ahau (9.0.0.0.0: 415-435) hasta el retorno de este grupo a Chichen Itzá en un 4 Ahau (10.8.0.0.0: 968-987). Dentro de este lapso se incluyen los acontecimientos del "descubrimiento" de Chichen Itzá en un Katun 6 Ahau, el siguiente al del "descubrimiento" de Bakhallal; la ocupación de Chichen Itzá en el Katun 13 Ahau (9.4.0.0.0: 495-514), el mismo en que se "ordenaron las esteras"; el primer abandono de Chichen, acaecido en el Katun 8 Ahau, el decimotercero después del Katun 8 Ahau, inicial de esta Parte (9.13.0.0.0: 672-692); el arribo a Chakanputún, sea en el Katun 6 Ahau siguiente o en el Katun 4 Ahau que sigue inmediatamente (9.15.0.0.0: 711-731). El abandono de Chakanputún ocurre en el Katun 8 Ahau, el decimotercero después del primer abandono de Chichen Itzá (10.6.0.0.0.: 928-948), y duran los emigrantes en su penosa peregrinación para "establecer sus hogares de nuevo" en Chichen Itzá, 2 katusnes: el 6 Ahau y el 4 Ahau (10.7.0.0.0 y 10.8.0.0.0.: 948-987). La Parte III es la historia de la época llamada

del "Nuevo Imperio" y abarca un periodo a partir del Katun 2 Ahau (10.9.0.0.0: 987-1007), en que Ah Mekat Tutul Xiu se establece en Uxmal, hasta llegar al Katun 2 Ahau (11.15.0.0.0: 1500-1520), en que se realiza el descubrimiento de Yucatán por los europeos. Dentro de este periodo queda la alianza llamada "Liga de Mayapán", que duró diez katunes: del mencionado 2 Ahau (10.9.0.0.0: 987-1007) hasta el 10 Ahau inclusive (10.18.0.0.0: 1165-1185); el segundo abandono de Chichen Itzá por los itzaes a causa del complot de Hunac Ceel de Mayapán contra Chac Xib Chac, jefe de Chichen, lo cual aconteció en el Katun 8 Ahau (10.19.0.0.0: 1185-1204), precisamente en el décimo año Tun (10.18.10.0.0: 1194), con la ayuda de mercenarios chichimecas, capitaneados por siete jefes cuyos nombres se dan; el ataque al Señor Ulmil de un lugar no mencionado a causa de sus "banquetes" con el Señor Ulil de Izamal, acontecimiento que ocurrió durante el mismo Katun 8 Ahau en que fue atacado Chichen Itzá; la represalia de los itzaes, de Ulmil y de los izamalenses contra Mayapán, lo cual ocurrió en el Katun 4 Ahau (11.1.0.0.0: 1224-1244), treinta años después de su derrota (aunque el texto dice que treinta y cuatro) "por causa del gobierno múltiple en el interior" (lo cual parece indicar que la llamada "hegemonía de Mayapán" comenzó a raíz del triunfo de Hunac Ceel), y la destrucción total de Mayapán en el Katun 8 Ahau (11.12.0.0.0: 1441-1461) por la misma causa anterior. Se callan aquí los acontecimientos ocurridos durante el transcurso de los Katunes 6 Ahau (11.13.0.0.0: 1461-1480) y 4 Ahau (11.14.0.0.0: 1480-1500), que corresponden a la época en que se establecieron los pequeños reinos o cacicazgos que hallaron los españoles al ocupar la península. La Parte IV y última está dividida en dos series: una que es una enumeración corrida de los Katunes 13 Ahau a 8 Ahau (11.16.0.0.0: 1520-1539 a 12.5.0.0.0: 1697-1717), es decir, que cierran el ciclo de Trece Katunes, pero sin mencionar otros acontecimientos, y otra serie repetida, aunque incompleta, que comienza con el Katun 6 Ahau, el siguiente después de la destrucción de Mayapán, ya mencionado (11.13.0.0.0: 1461-1480) y termina con el 3 Ahau

(12.1.0.0.0: 1618-1638), registrando la peste sufrida durante el Katun 4 Ahau (11.14.0.0.0: 1480-1500), en que "los zopilotes entraron a las casas", y la viruela grande que apareció en el Katun 2 Ahau (11.15.0.0.0: 1500-1520), el mismo de la aparición de los europeos, lo que significa que fueron los introductores. En el Katun 13 Ahau (11.16.0.0.0: 1520-1539) se fija la fecha de la muerte del ofrendador del agua, Ah Pulá. El Katun 11 Ahau (11.17.0.0.0: 1539-1559) se señala como el de la llegada de los españoles, pero que naturalmente se refiere a su definitivo establecimiento, pues su primera aparición fue en el Katun 2 Ahau (11.15.0.0.0: 1500-1520). En los siguientes se enumeran diversos hechos históricos de la colonia, siendo el último el del censo levantado por Diego Pareja en el año 1610, durante el Katun 5 Ahau (12.0.0.0.0: 1599-1618). El último katun registrado, el 3 Ahau (12.1.0.0.0: 1618-1638), no tiene asignado acontecimiento alguno.

La Parte I aparece completa en la versión del Maní, incompleta en la del Tizimín y falta enteramente en la del Chumayel. El hecho de que tanto en la versión del Maní como en la del Tizimín aparezca en posición inicial de la Crónica ha dado lugar a confusiones en las exégesis que anteriormente se habían hecho de ella. Algunos autores (cf. Tozzer, 1941) habían interpretado correctamente la cronología, por deducciones, pero no se habían dado cuenta de que se trata de un relato fuera de lugar.

La Crónica Matichu ofrece en términos generales una cronología aceptable que se compadece con los datos aportados por otras fuentes, tales como la Relación de Landa. Landa, por su parte, habla de algunos hechos que no se consignan de modo directo en estas crónicas, sino indirecto o con una concisión extrema. Algunos hechos se callan completamente en ellas. De todos modos, el valor aceptable de la Crónica Matichu en su aspecto cronológico radica en que reside el cotejo de otras fuentes tenidas por veraces. Algunos de sus datos, naturalmente, sólo pueden cotejarse con los datos de la arqueología. Y aun en este terreno resiste muy bien

la prueba, con poquísimas excepciones en las que puede haber duda.

Landa se refiere claramente a la ocupación de Chichen Itzá por un Quetzalcóatl-Kukulcán, asentando que "entró por la parte Poniente, y que difieren en si entró antes o después de los itzaes o con ellos". Menciona también que "partido Cuculcán, acordaron los señores, para que la república durase, que tuviese el principal mando la casa de los Cocomes, por ser más antigua o más rica, o por ser el que la regía entonces hombre de más valor" y especifica que la capital sería Mayapán. Por otra parte, más adelante se refiere al despotismo ejercido por los Cocomes y a su constante importación de mercenarios mexicanos e Xicalanco, lo cual dio origen a una revolución que terminó con la destrucción de Mayapán, revolución que capitanearon los Xiues. La Crónica Matichu no habla de Quetzalcóatl-Kukulcán ni de los Cocomes. Da el nombre de los siete capitanes que atacaron a Chac Xib Chac de Chichen Itzá en 1194 y estos nombres son nahuas; al señor de Mayapán que hizo la guerra a Chichen Itzá con estos capitanes no se le llama Cocom sino Hunac Ceel, que en otras fuentes aparece como Hunac Ceel Cauich. Ahora bien, es evidente que Chichen Itzá, Mayapán, Tulum, Ichpatún y otras ciudades menos importantes muestran una clara influencia de la cultura tulense llamada tolteca, o dentro de la arqueología maya, "mexicana". Esta influencia no pudo tener otro origen que la invasión de elementos humanos provenientes de la meseta central, es decir, que lo sustentado por Landa de la venida de un Quetzalcóatl a Yucatán y de la contratación de mercenarios mexicanos por los Cocomes de Mayapán son hechos que tienen prueba de veracidad en la arqueología directamente y en la Crónica, por cuanto a los mercenarios, también directamente.

Así pues, en la Crónica se mencionan dos grupos emigrantes de un modo directo; los Itzaes y los Xiues. No se habla de la emigración de los Cocomes, ni de Quetzalcóatl-Kukulcán. Es de suponerse que los Cocomes eran gente de Quetzalcóatl-Kukulcán.

El grupo más importante, según las crónicas, era el Itzá, el cual ya no estaba presente en el norte de Yucatán cuando se realizó la conquista de los europeos, sino que habitaba en la Laguna de Petén en Guatemala desde hacía varios siglos. Allí fue conquistado en 1697. La región norte estaba señoreada por varios jefes, divididos en parcialidades, y entre éstos se hallaban como enemigos incorregibles los Xiues y los Cocomes, fuera de sus antiguos asientos.

Según se desprende de lo que la Crónica Matichu registra, la historia del norte de Yucatán se puede sintetizar así: En el ciclo 9.0.0.0. de la cronología maya, Katun 8 Ahau de la Cuenta Corta, corrido del año 415 al 435 de la era cristiana, un grupo de hombres llamados Itzaes, portadores de la cultura maya —definida ésta, según Morley, como aquella que incluye la escritura jeroglífica llamada maya, el sistema cronológico igualmente llamado maya, la arquitectura pétrea con la bóveda de arco mensulado y la cerámica llamada tzakol—, llegó, procedente del Sur —seguramente de la región conocida hoy como El Petén, Guatemala— a la laguna de Bakh'alal —hoy Bacalar—, en el actual territorio de Quintana Roo, "descubriéndola". Desde allí, el mencionado grupo "descubrió" también el lugar que vino a llamarse Chichen Itzá, donde se estableció durante diez katunes, durando su paso de Bakh'alal a Chichen Itzá otros tres katunes. En el siguiente Katun 8 Ahau (9.15.0.0.0: 672-692), sin que se asiente la causa, Chichen Itzá es abandonado, yendo las Itzaes a Chakanputún, lugar que alcanzan, según una versión de la Crónica Matichu, en el Katun 6 Ahau (9.14.0.0.0: 692-711) y según otra en el siguiente, 4 Ahau (9.15.0.0.0: 711-731). Allí permanecen, sin mención en la Crónica de algún acontecimiento ocurrido en el lapso, hasta el siguiente Katun 8 Ahau (10.6.0.0.0: 928-948), que es cuando a su vez Chakanputún es abandonado, regresando los Itzaes a Chichen Itzá; duró su peregrinación cuarenta tunes, por lo que Chichen Itzá es reocupado el Katun 4 Ahau (10.8.0.0.0: 968-987).

Hasta el momento de la reocupación de Chichen Itzá

por los Itzaes, parece que en el norte de Yucatán no había otra cultura superpuesta a la milpera (que aún subsiste hasta ahora) que la llamada técnicamente "maya". Pero a partir de entonces la influencia tolteca-chichimeca se hace presente. Entra en Yucatán Quetzalcóatl-Kukulcán. Landa dice que no se sabía si entró a Chichen Itzá antes que los Itzaes, con ellos o después de ellos. La Crónica que aquí se publica no menciona ni una sola vez esta migración, según ya dijimos antes.

Algunos estudiosos han creído que los Itzaes mismos eran "mexicanos". Véase a este respecto Tozzer (1941, p. 20, n. 123; p. 32, n. 172). Este autor hace notar que las versiones de la Crónica Matichu claramente asientan que cuando los Itzaes abandonan Chakanputún van en busca de sus hogares *de nuevo*, lo cual significa que antes habían estado en Chichen Itzá. Menciona otras fuentes tales como Sánchez de Aguilar, Francisco Hernández, las *Relaciones de Yucatán*, etc., en las que se menciona la penetración de Quetzalcóatl-Kukulcán entre seiscientos y ochocientos años atrás del siglo xvi. Seiscientos años se acercan más a la fecha, señalada en la Crónica, del retorno de los Itzaes a Chichen Itzá; ochocientos le parecen fecha muy temprana para la penetración "mexicana". Acaba Tozzer por ofrecer dos soluciones: o los Itzaes eran mayas de habla chontal procedentes de Chakanputún, o "mexicanos" que se mayanizaron. Estas soluciones dejan a un lado el hecho de que los Itzaes estuvieron en Chichen Itzá en fecha anterior al siglo x y, según nosotros creemos, por la evidencia de la Crónica Matichu, desde el siglo v. Naturalmente que el origen étnico puede ser cualquiera, pero lo importante es la cultura que el grupo trajo con su advenimiento en el norte de la península. Es evidente que culturalmente, antes del siglo x, no existía allí influencia tolteca-chichimeca, en la forma en que es palpable en la arqueología de la región. Ahora bien, es indudable que la influencia cultural de los altos de México se efectuó al mismo tiempo que los Itzaes regresaron a Chichen Itzá y que si la Crónica calla la entrada de Quetzalcóatl-Kukulcán, otras fuentes la mencionan

y fijan más o menos la misma época para esa entrada. Durante la estancia de los Itzaes en Chakanputún, es posible: 1) que hubiesen cambiado su dialecto del norte de Yucatán por otro del Sur (Chontal); 2) que hubiesen recibido influencias culturales de los altos de México por contacto con los nonoualcas colindantes; 3) que se hubiesen aliado a Quetzalcóatl-Kukulcán, para convivir en Chichen Itzá.

En la misma época en que los Itzaes regresan por segunda vez a Chichen Itzá según nuestra Crónica, aparece en la península el grupo Xiu. Procedió de Nonoual, el clásico Nonoualco, que vagamente se sitúa al sur de México, desde Oaxaca hasta Tabasco, en los linderos mayas. Agrega la Crónica que "la tierra de donde vinieron es Tulapan Chiconautlan", claramente la región de Tula de Hidalgo, de donde partieron en el mismo Katun 8 Ahau en que los Itzaes abandonaron Chakanputún. Los Xiues llegan a Chacnabitón, una región no claramente identificada de la península —Morley cree que estaba situada al sur de Chakanputún—, en el primer tun del Katun 13 Ahau (10.10.0.0.0: 1007-1027), es decir, en 1008, después de una peregrinación que duró 81 años tunes. Esto reza la Parte I de la Crónica, dando el nombre del caudillo Chan Tepeu. La Parte II, sin embargo, pone a otro caudillo: Ah Suytok Tutul Xiu, estableciéndose en Uxmal en el Katun 2 Ahau (987-1007), inmediatamente anterior al 13 Ahau. El grupo de Chan Tepeu duró en Chacnabitón hasta el Katun 5 Ahau (10.14.0.0.0: 1086-1106), pero no dice el documento adónde se dirigió después.

A partir del establecimiento de Tutul Xiu en Uxmal, la Crónica dice que éste reinó en compañía de los gobernadores de Chichen Itzá y Mayapán, por espacio de diez katunes, es decir, desde el Katun 2 Ahau mencionado hasta el Katun 10 Ahau (10.18.0.0.0: 1165-1185). Éste es el periodo de lo que se ha llamado "Confederación o Liga de Mayapán". Ahora bien, ya hemos mencionado antes cómo se estableció la dinastía Cocom en Mayapán. La influencia tolteca-chichimeca no se encuentra únicamente en Chichen Itzá y en Mayapán,

como también hemos indicado antes, sino en varios otros lugares, especialmente en la costa caribe, hasta el Sur. A este respecto, algunas fuentes coloniales dan alguna referencia, como por ejemplo un documento de Valladolid, citado por Brinton (1882, p.118), que dice que vinieron de México a Yucatán a fundar pueblos; que algunos se establecieron en Chichen Itzá, un grupo fue a establecerse a Bacalar (Bakhalal) y otro a Cozumel. Agrega el documento que uno de los jefes de nombre Tanupolchicbul fue pariente de Moctezuma (citado por Tozzer, 1941, p. 21, n. 123). Landa, como hemos dicho, da el dato concreto de que Mayapán fue cultural y políticamente obra de Quetzalcóatl-Kukulcán, habiendo éste vivido en la ciudad, de donde partió a Champotón cuando regresó a los altos de México. La alianza o liga, como se la ha llamado, pues no sólo sería entre Mayapán, Uxmal y Chichen Itzá, sino entre otras varias ciudades-estados. Unas Itzaes, como Itzmal, y otras de Quetzalcóatl-Kukulcán, como Tulum, Ichpatún, etc. Tres grupos culturales aparecen en juego: 1) el Itzá, que aunque aliado con Quetzalcóatl-Kukulcán y con alguna influencia de los altos, seguramente conservó las líneas fundamentales de su cultura especialmente en el aspecto religioso, a pesar de su convivencia con Quetzalcóatl-Kukulcán en Chichen Itzá; 2) el Xiu, que siendo nonoualca proveniente de Tulapan Chiconautlan, parece que participó poco de la cultura tolteca-chichimeca, por lo menos en cuanto a las artes materiales se refiere, pues no aportó en Uxmal, ni en todo el Puuc, sino algunos elementos que aparecen aplicados —no estructuralmente combinados— en la arquitectura, que es a todas luces típicamente maya, aunque con fisonomía particular en algunos rasgos: 3) en cambio, Chichen Itzá, Mayapán, Tulum, Ichpatún, etc., muestran hibridez clara de elementos de los altos.

La llamada Liga de Mayapán duró hasta el Katun 8 Ahau (10.1.0.0.0: 1118-1204) en que aconteció el episodio de Hunac Ceel, el jefe Cocom de Mayapán a la sazón. Según Landa, los Xiues no participaron en esta lucha, pero simpatizaron con los Itzaes. Vino la venganza de los

Itzaes, de la cual hemos hablado ya. Nuevamente los Cocomes, con el auxilio de gente de Xicalanco, establecieron una hegemonía, haciendo que los gobernantes de las otras parcialidades viviesen dentro de las murallas de Mayapán, desde donde ejercían su gobierno por medio de diputados. Por último, los de fuera de la muralla arrasaron a Mayapán en el Katun 8 Ahau (11.12.0.0.0: 1441-1461), auxiliados por los Xiues, quedando después dividida la península en las parcialidades que hallaron los españoles. Los Itzaes refugiados en El Petén fueron conquistados por éstos, 137 días antes del retorno del Katun 8 Ahau (12.5.1.0.0: 1697-1717), es decir, el día 13 de marzo de 1697.

Choca esta rítmica sucesión de hechos históricos calamitosos para los Itzaes y aun para los otros grupos. Morley (1947, pp. 486-90) trata este fenómeno llamándolo "los *idus* de marzo de los mayas".

La respuesta a la pregunta de quiénes fueron los Itzaes parece que la da la Crónica Matichu. Vinieron del Sur, del Viejo Imperio, en el ciclo 9.0.0.0.0: ¿Eran, pues, "mayas" del Viejo Imperio? Por lo menos, su nombre revela un origen maya. Su análisis filológico es el siguiente:

Itzá es un compuesto de dos elementos: *its* + *a'*. El primero, *its*, lo tomamos por *brujo* o *mago* y *a'* por agua. El nombre Itzá, pues, se traduce por Brujo-del-agua.

El nombre completo no parece corresponder al dialecto del norte de Yucatán, donde *its* tiene un significado de: "leche, lágrima, sudor, resina o goma por cuaxar de árboles y de matas y de algunas yervas... lo que corre de la candela... herrumbre que tiene el cuchillo y el hierro", según el Diccionario de Motul, de donde se ha sacado la interpretación clásica de las palabras de Itzamná: *Itzen caan*, *Itzen muyal*, "que era decir: Yo soy el rozio, o sustancia del Cielo y nubes" (según Lizana, 1893, p. 4). En la misma página, Lizana da una de las variantes del nombre de Itzamná y su supuesto significado: "*Itzamatul*, que quiere decir el que recibe y posee la gracia, o rocío, o sustancia del Cielo". Según la definición del Motul, *its* en yucateco no es gracia, ni sustancia, ni rocío, aunque de modo marginal

puede extenderse el significado, ya que se refiere a algo que brota o surge por gotas o pequeñas partículas, líquido o no. De todos modos la definición que da Lizana está relacionada con agua, con el agua de las nubes. El *its* yucateco es homónimo del *its* de *itsá* y de sus derivados.

El morfema *its* de *Itzá*, forma parte de una familia de variantes existentes en las lenguas mayances, inclusive el maya yucateco como veremos. Aparece sin o con modificación en cakchiquel: "*its*... hechicería, brujería, encantamiento. *Ajits*, hechicero". En el maya yucateco aparece en la variante *its'* y únicamente en el compuesto *its'at* (*ic'at* o *idzat*), que significa: "astuto, cauteloso, mañoso, ábil, artista, industrioso, ingenioso, para bien y para mal, y sabio así", según el Diccionario de Motul. En ese dialecto la variante *its'* tiene varios homónimos.

Otra de las variantes de *its* es *is* (*ix* o *ish*), que en la cronología antigua de Yucatán es el nombre de uno de los días de la veintena, el que corresponde exactamente a *océlotl* de la veintena nahua. Tampoco esta forma *is* aparece en el dialecto yucateco con el significado de jaguar, que es el de *océlotl* en nahua. Pero la tenemos en *quekchí* precisamente con el doble significado de pluma y de jaguar (según Stoll, 1938). Otras variantes son: *ih* en *pokomchi*, que según Zúñiga vale por: "...espaldas... Dízese también en orden, a toda la circunferencia del cuerpo... Dízese también por la piel, el pellejo, el despojo así del hombre como del animal... Dízese también por las plumas del ave. Dízese por el enbez de algo lo contrario de la haz... dízese por la lana de la oveja y de aquí llaman *rih chicop* al escapolul de lana que usan por capa y a las frezadas... Dízese por el pelo del animal... Dízese también por la corteza del árbol... y por la corteza y cáscara de huevo y de cualquier cosa... Dízese también por los pálpados de los ojos... Dízese también por los lavios de la boca..."; *ism* (*izm*) en el cakchiquel, que tiene significación semejante según Varela: "...cabello o pelo de cualquier cosa, o de lana, o de algodón... o las plumas de las aves..."

Ahora bien, ¿qué tiene que ver piel, pelo, pluma, corteza, etc., con jaguar y brujo, mago o sabio? Varela trae un ejemplo en el cual equipara *balam* e *itz* para significar hechicero: "Balam Ah ytz lae atit", esto es: "aquella vieja es hechicera". Balam es otro nombre del jaguar y también denota brujería, y es porque se refiere a lo oculto, a lo envuelto. *Bal* en el maya yucateco, según el Motul, significa "esconder y abrigar y encubrir debajo de algo o detrás de algo". Los dos morfemas *its* y *bal* se relacionan: mientras que *its* es la cosa que cubre y envuelve, *bal* se refiere a la acción de envolver u ocultar. *Balam* es un nombre compuesto de *bal* + *am*. Este último elemento denota *actor*, de modo que *balam* quiere decir "el que se esconde, se oculta", en otros términos "el misterioso". Balam en cackchiquel es sinónimo de *its*, significado de hechicero, además de ser el nombre del jaguar. La expresión *balam ah itz* es pleonástica. Esta relación entre jaguar y pluma o "cosa que envuelve" está aprovechada precisamente en el jeroglífico de *ix* (*hix*) (véase Barrera Vásquez, 1941, pp. 81-85).

Lo que Itzamná o Itzamatul, como Lizana lo llama, quiso decir fue seguramente: "soy el mago, brujo o hechicero de los cielos, el mago, brujo o hechicero de las nubes", es decir, el que hace llover, deidad del agua.

El elemento *-a'* en *itsa'* significa agua y esta forma sí es común en Yucatán. Aparece en los toponímicos con harta frecuencia: Ch'och'ola'; "agua salada"; Panaba'; "agua que cava"; Sotuta'; "agua que gira", etc.

El hecho de que Chichen Itzá haya sido capital Itzá por excelencia y que ésta se distinga precisamente por su culto al agua y en ella exista el más famoso cenote, donde se ejercía el rito del sacrificio a las deidades acuáticas; y de que, además, Itzamná o Itzamatul se dijera asimismo mago o brujo del cielo, mago o brujo de las nubes, viene a corroborar la interpretación del nombre *itsa'* o Itzá como Brujo del Agua.

Al pasar los Itzaes por Bakh'alal o Bacalar, tuvieron la laguna para sus ritos y si estuvieron en Tulum, tuvieron allá cenotes. En las cercanías de Champotón no

existen cenotes, pero hay un río, y tierra adentro existe aún el culto al agua. En el Petén, su último refugio fue la laguna.

LAS FECHAS REGISTRADAS EN LA CRÓNICA MATICHU

Las fechas registradas en la traducción de la Crónica Matichu, corresponden a tres sistemas:

1) El llamado de la "cuenta corta" que se usó en el norte de la Península de Yucatán posiblemente desde principios del siglo X de nuestra Era. Se llama cuenta corta, porque sus fechas se repiten cada 260 años tunes (de 360 días) y se caracteriza porque numera y nombra los katunes (periodos de 20 años tunes) mediante una fórmula de un número seguido del nombre del día en que termina el periodo que es siempre el día Ahau. Los números siguen invariablemente el siguiente orden: 8, 6, 4, 2, 13, 11, 9, 7, 5, 3, 1, 12, 10, un ciclo de trece, que hace el total de 260, para volver a empezar repitiéndose las mismas fechas. Como no se lleva la cuenta de cada ciclo a partir de una era, las fechas resultan equívocas a medida que pasan los ciclos. Equivale a nuestra data abreviada, digamos: 2-X-62, en donde 2 corresponde al número de orden del día en el mes; X al número de orden del mes (octubre) y 62 al número de orden del año, pero únicamente dentro de las decenas. Después de varios siglos no se sabrá a qué centena corresponde y mucho menos a qué millar. El sistema de la "cuenta corta" es el único que aparece en los documentos mayas poscortesianos.

2) El llamado sistema de la "cuenta larga" que se pone entre paréntesis equiparada a fechas cristianas. Está indicada con una fórmula de números separados por puntos, que corresponden a periodos diversos. El primero señala el número de baktunes (periodos de 20 katunes) transcurridos desde la fecha era; el segundo representa el número de katunes; el tercero dice el número de años tunes; el cuarto el número de uinales (periodos de 20 días) y el último el número de días que no alcanzan a ser un uinal. Como las fechas no

se repiten en este sistema sino después de un lapso de 374 440 nunca pueden ser equívocas dentro de lo que duró la historia del pueblo maya.

3) El sistema cristiano, incluido entre los paréntesis, señala el año cristiano en que comienza y en el que termina el katun a que se refiere. Tanto la fecha de la "cuenta larga" como la cristiana vienen a ser el cotejo correlacionado de la "cuenta corta" y se basa en la correlación Goodman-Martínez Hernández-Thompson que pone la conquista española (1539) en la fecha 11.16.0.0.0 de la "cuenta larga".

CRÓNICA MATICHU*

PARTE I

Éste es el orden de los katunes desde cuando salieron de su tierra, de su hogar de Nonoual:

Cuatro katunes estuvieron los Tutul Xiu [10.2.0.0.0. 10.5.0.0.0: 3 Ahau-10 Ahau: 849-928] al poniente de Zuyua.

* La que aquí se llama Crónica Matichu es la traducción de la reconstrucción de tres versiones de un mismo documento que se encuentran en los Libros de Chilam Balam de Maní, Tizimín y Chumayel, como ya se dijo. Don Juan Pío Pérez fue el descubridor, el primer traductor y también el primer divulgador en el mundo, de la versión del Maní, al entregársela a John L. Stephens en 1842, traducida y comentada. Éste, Stephens (1843), publicó en inglés dicha versión por primera vez. Su publicación no fue completa. Por su parte Stephens tampoco incluyó todo el estudio de Pérez, publicándolo por primera vez completo Carrillo y Ancona (1878-82 y 1883). Este autor incluyó la traducción española de la versión del Maní hecha por Pérez, sin el texto maya. En 1868, Berendt copió en Mérida el trabajo de Pérez, y esta copia fue publicada por Valentini (1880), incluyendo el texto maya, pero no todo el estudio de Pérez, y agregando comentarios suyos. Una nueva edición fue la de Thomas (1882). Brasseur de Bourbourg (1864) reproduce el texto maya con traducción suya al francés. La edición de Brasseur es reproducida por Charencey (1874). La mejor edición inglesa, incluyendo comentarios muy atinados, es la de Brinton (1882), que ha sido la más citada desde entonces. Palma y Palma (1901) incluye el texto español de Pérez. La traducción y estudio de Pérez en español fueron superados por Martínez Hernández (1909, 1926, 1927 y 1940). Médez Bolio (1930), usando el texto maya de la edición de Stephens, tradujo e interpretó de nuevo algunos pasajes. Escalona Ramos (1935) publica una "interpretación a las traducciones del Obispo Carrillo y Ancona [sic], Martínez Hernández y Médez Bolio" y Jakeman (1945, pp. 62-68) reproduce el texto maya de la edición de Brinton y la traducción de éste mismo, con algunas modificaciones. Innumerables autores han citado y

La tierra de donde vinieron [es] Tulapan Chiconautlan.

Cuatro katunes caminaron hasta que llegaron aquí, en compañía del caudillo (Holón) Chan Tepeu¹ y sus acompañantes.

Cuando salieron de la región (Petén) era el 8 Ahau [10.6.0.0.0: 928-948], 6 Ahau [10.7.0.0.0: 948-968], 4 Ahau [10.8.0.0.0: 968-987], 2 Ahau [10.9.0.0.0: 987-1007].

Cuatro veintenas más un año [81], porque era el primer tun² del 13 Ahau cuando llegaron [10.10.0.0.0: 1007-1027; primer tun, 1008] aquí a esta región (Petén); cuatro veintenas de años y un año en total caminaron desde que salieron de sus tierras y vinieron aquí a la región (Petén) de Chacnabitón, los

utilizado esta famosa versión. Tozzer (1921, pp. 184-186) hace una excelente revista de sus traductores, editores y comentaristas hasta 1909. De entonces acá el número ha crecido. La última traducción española es la de Solís Alcalá (1949). Pío Pérez tituló su trabajo "Traducción y juicio crítico de un manuscrito en lengua maya que trata de las principales épocas de la historia de esta península antes de su conquista". Y a la versión misma la tituló: "Principales épocas de la historia antigua de Yucatán". Stephens tradujo: "Principal Epochs of the Ancient History of Yucatan". Brinton la llamó: "The Series of the Katuns". Martínez Hernández: "Crónica del Maní". Méndiz Bolio: "Serie de los Katunes del Ms. de Maní, llamada Épocas Mayas". Tozzer (1921) le aplica el confundible nombre de "Pérez Codex" agregándole entre paréntesis la primera frase maya con que comienza: "Lai u tzolan katun". "Pérez Codex" es la traducción al inglés de "Códice Pérez", nombre que Carrillo y Ancona dio a la colección completa de copias que Pío Pérez sacó de varios Libros de Chilam Balam, siendo el principal el de Maní. Por esta causa justamente se le suele llamar "Crónica de Maní". El mismo nombre de Códice Pérez para todo el conjunto de copias de D. Juan Pío, es confundible con el que da a un códice jeroglífico maya que se encuentra en París: el "Codex Peresianus" (ver Introducción).

La versión que procede del Chilam Balam de Tizimín la

años años son éstos: 81 años [928-1008]. 13 Ahau [10.10.0.0.0: 1007-1027], 8 Ahau [10.6.0.0.0: 928-948], 6 Ahau [10.7.0.0.0: 948-968], 4 Ahau [10.8.0.0.0: 968-987], 2 Ahau [10.9.0.0.0: 987-1007], fue cuando llegó a Chacnabitón Ah Mekat Tutul Xiu [y los suyos].

Un año faltando para las cinco veintenas estuvieron a Chacnabitón; éstos son los años: 99 [hasta el último día del 5 Ahau, 10.14.0.0.0: 1086-1106].

PARTE II

8 Ahau [9.0.0.0.0: 415-435], fue cuando se descubrió la provincia de Siyan Can Bakhalal.³

6 Ahau [9.1.0.0.0: 435-455], fue que se descubrió Chichen Itzá.

4 Ahau [9.2.0.0.0: 455-475], 2 Ahau [9.3.0.0.0: 475-495].

editan, traducen y comentan por primera vez Brinton (1882) en inglés y Martínez Hernández (1927 y 1940) en español. El primero le dio el título de "The Series of the Katuns" y el segundo "La Crónica del Tizimín". La última traducción es la de Makemson (1951, pp. 68-70).

Menos conocida que la versión del Maní pero más que la del Tizimín, es la del Chumayel. Brinton (1882) fue el primero en editarla, traducirla y comentarla, con el nombre de "The Record of the Count of the Katuns". Martínez Hernández (1927 y 1940) y Médez Bolio (1930, pp. 88-91) son sus traductores en español; Roys (1933, pp. 135-138) es el más reciente traductor y comentador en inglés. Martínez Hernández la llama: "La Primera Crónica del Chumayel"; Médez Bolio: "Libro de la Serie de los Katunes", y Roys: "The First Chronicle". Es, en efecto, la primera de las tres que trae el Chilam Balam de Chumayel.

La versión del Maní que sirvió para este trabajo fue tomada de fotografías directas del original del Códice Pérez que se guarda en Mérida, Yuc.; la versión del Tizimín proviene de una reproducción fotostática del original que se encuentra en el Museo Nacional de Antropología de la ciudad de México, y la versión del Chumayel se tomó de la edición facsimilar de Gordon (1913).

13 Ahau [9.4.0.0.0: 495-514], se ordenaron las esteras⁴ y se ocupó Chichen.

Tres veintenas de años reinaron en Siyan Can y bajaron aquí [¿en Chichen Itzá?].

En los mismos años que reinaron en Bakhalal, la laguna, fue que se descubrió Chichen Itzá;⁵ 60 años [6 Ahau, 2 Ahau: 435-495].

11 Ahau [9.5.0.0.0: 514-534], 9 Ahau [9.6.0.0.0: 534-554], 7 Ahau [9.7.0.0.0: 554-573], 5 Ahau [9.8.0.0.0: 573-593], 3 Ahau [9.9.0.0.0: 593-613], 1 Ahau [9.10.0.0.0: 613-633], 12 Ahau [9.11.0.0.0: 633-652], 10 Ahau [9.12.0.0.0: 652-672], 8 Ahau [9.13.0.0.0: 672-692].

Diez veintenas de años reinaron en Chichen Itzá y fue abandonada.

Transcurrieron trece dobleces de katun [desde el descubrimiento de Bakhalal].

Y fueron a establecerse a Chakanputún.⁶

Allí tuvieron su hogar los Itzaes, hombres religiosos.

Éstos son los años: 200.

En el Katun 6 Ahau [9.14.0.0.0: 692-711] fue alcanzada la tierra de Chakanputún.

4 Ahau [9.15.0.0.0: 711-731], fue alcanzada la tierra, por ellos, de Chakanputún.

2 Ahau [9.16.0.0.0: 731-751], 13 Ahau [9.17.0.0.0: 751-771], 11 Ahau [9.18.0.0.0: 771-790], 9 Ahau [9.19.0.0.0: 790-810], 7 Ahau [10.0.0.0.0: 810-830], 5 Ahau [10.1.0.0.0: 830-849], 3 Ahau [10.2.0.0.0: 849-869], 1 Ahau [10.3.0.0.0: 869-889], 12 Ahau [10.4.0.0.0: 889-909], 10 Ahau [10.5.0.0.0: 909-928], 8 Ahau [10.6.0.0.0: 928-948], fue abandonada Chakanputún.

Trece veintenas de años reinaron en Chakanputún los hombres Itzá y vinieron en busca de sus hogares, de nuevo.⁷

Trece dobleces de katun residieron en Chakanpu-

tún, sus hogares, y perdieron el camino de Chakanputún.

Éste es el katun cuando fueron los Itzaes bajo los árboles, bajo la maleza, bajo los bejucos sufriendo.

Éstos son los años corridos: 260 [692-948].

6 Ahau [10.7.0.0.0: 948-968], 4 Ahau [10.8.0.0.0: 968-987]; dos veintenass de años [anduvieron errantes] y vinieron a establecer sus hogares, de nuevo,⁸ después de que perdieron Chakanputún.

Éstos son los años: 40 [948-987].

PARTE III

En el Katun 2 Ahau [10.9.0.0.0: 987-1007] se estableció Ah Suytok Tutul Xiu en Uxmal.

2 Ahau [10.9.0.0.0: 987-1007], 13 Ahau [10.10.0.0.0: 1007-1027], 11 Ahau [10.11.0.0.0: 1027-1047], 9 Ahau [10.12.0.0.0: 1047-1066], 7 Ahau [10.13.0.0.0: 1066-1086], 5 Ahau [10.14.0.0.0: 1086-1106], 3 Ahau [10.15.0.0.0: 1106-1125], 1 Ahau [10.16.0.0.0: 1125-1145], 12 Ahau [10.17.0.0.0: 1145-1165], 10 Ahau [10.18.0.0.0: 1165-1185].

Desde que se estableció Ah Suytok Tutul Xiu [y los suyos] en Uxmal, diez veintenass de años reinaron (diez veintenass hacía que se habían establecido en Uxmal) en compañía de los gobernadores de Chichen Itzá y de Mayapán.

Éstos son los años que corrieron cuando esto aconteció: 200 años [987-1185]...

8 Ahau [10.19.0.0.0: 1185-1204], abandonó el gobernante de Chichen Itzá, de los hombres Itzá, Hunac Ceel Cauich, a Chac Xib Chac⁹ de Chichen Itzá; por la traición de Hunac Ceel, gobernante de sus hogares de nuevo, por causa de la traición de Mayapán-Ichpá.¹⁰

Cuatro veintenass de años y diez más hace: El

décimo tun del 8 Ahau [10.18.10.0.0: 1194], fue el año en que se dispersaron por causa de Ah Sintcut Chan, Tzontecum, Taxcal, Pantemit, Xuchueuet, Itzcuat, Cacaltecat.¹¹ Estos eran los nombres de los individuos, siete mayapanenses, 7.

En el mismo 8 Ahau [10.19.0.0.0: 1185-1204] fueron a destruir [los de Mayapán] al Rey Ulmil¹² por sus banquetes con el Rey Ulil de Itzmal.

Trece dobleces de katun hacía que estaban establecidos [los Itzaes] cuando se dispersaron por causa de Hunac Ceel, para darles lección a los Itzaes.

6 Ahau [11.0.0.0.0: 1204-1224], cuando se terminó.

Una veintena de años más catorce.

Éstos son los años que corrieron: 34.

6 Ahau [11.0.0.0.0: 1204-1224], 4 Ahau [11.1.0.0.0: 1224-1244].

Dos veintenas de años; cuando fue apresada la tierra de Ichpá-Mayapán por los hombres Itzá que salieron de sus hogares con el Rey Ulmil, y por los de Itzmal, por causa de la traición de Hunac Ceel.

2 Ahau [11.2.0.0.0: 1244-1263], 13 Ahau [11.3.0.0.0: 1263-1283], 11 Ahau [11.4.0.0.0: 1283-1303], [han transcurrido desde que] fue apresada la tierra de Ichpá-Mayapán por los de fuera de la muralla —por causa del gobierno múltiple en el interior de Mayapán—, por los hombres Itzá y el Rey Ulmil.

Dos veintenas de años más tres años cuando entró el 11 Ahau [tres tunes del 11 Ahau anterior: 1286], desde que fue abandonada Mayapán por los extranjeros montañeses¹³ [que ocupaban] el interior de Mayapán: 43 años.

9 Ahau [11.5.0.0.0: 1303-1323], 7 Ahau [11.6.0.0.0: 1323-1342], 5 Ahau [11.7.0.0.0: 1342-1362], 3 Ahau [11.8.0.0.0: 1362-1382], 1 Ahau [11.9.0.0.0: 1382-1401], 12 Ahau [11.10.0.0.0: 1401-1421], 10 Ahau [11.11.0.0.0:

1421-1441], 8 Ahau [11.12.0.0.0: 1441-1461]; fue cuando se abandonó y destruyó Ichpá-Mayapán por los de extramuros, los de atrás de la muralla, por causa del gobierno múltiple en el interior de Mayapán.

6 Ahau [11.13.0.0.0: 1461-1480], 4 Ahau [11.14.0.0.0: 1480], 4 Ahau [11.14.0.0.0: 1500-1520].

En el decimotercero tun, el año que corría [1513],¹⁴ fue cuando primeramente pasaron los extranjeros españoles a ver por primera vez nuestra tierra, esta provincia de Yucatán.

Tres veintenass de años más trece años después que había sido despoblada Ichpá: 73 años.

PARTE IV

13 Ahau [11.16.0.0.0: 1520-1539], 11 Ahau [11.17.0.0.0: 1539-1559], 9 Ahau [11.18.0.0.0: 1559-1579], 7 Ahau [11.19.0.0.0: 1579-1599], 5 Ahau [12.0.0.0.0: 1599-1618], 3 Ahau [12.1.0.0.0: 1618-1638], 1 Ahau [12.2.0.0.0: 1638-1658], 12 Ahau [12.3.0.0.0: 1658-1677], 10 Ahau [12.4.0.0.0: 1677-1697], 8 Ahau [12.5.0.0.0: 1697-1717]...

[Hace que] fue abandonada la ciudad de Mayapán, por los extranjeros montañeses, diez veintenass más cuatro veintenass de años.

6 Ahau [11.13.0.0.0: 1461-1480], 4 Ahau [11.14.0.0.0: 1480-1500]: hubo mortandad súbita [peste], los zopilotes entraron en las casas de Ichpá [Mayapán].

2 Ahau [11.15.0.0.0: 1500-1520]: hubo epidemia de viruela grande.

13 Ahau [11.16.0.0.0: 1520-1539]: fue cuando murió el Ofrendador del Agua (Ah Pulá); faltaban seis años para terminarse la cuenta del 13 Ahau [1533].

El año que contaban por el oriente; en 4 Kan cayó Poop al oriente.

He aquí que yo hago la correlación precisa de los años del katun: 15 de Sip y 3 más [18 Sip], 9 Imix.

Es el día en que murió el Ofrendador del Agua Napoot Xiu.

El año que corría era —cuando se supo esta cuenta de los números de los años— 1536.

Tres veintenass hacía que se había despoblado Ichpá [por la peste].

Asimismo, aún no terminaba de contarse 11 Ahau [11.17.0.0.0: 1539-1559], cuando llegaron los españoles, hombres arrojados.¹⁵

Del oriente vinieron cuando llegaron por primera vez aquí hasta esta tierra de nosotros los hombres mayas, en el año *domini* 1513.

9 Ahau [11.18.0.0.0: 1559-1579], comenzó el cristianismo; se verificó el Bautismo.

Dentro de este mismo katun llegó el primer Obispo de nombre Toral.¹⁶

También cesó el Colgamiento.¹⁷

Este es el año *domini* que transcurría: 1546.

Era el 7 Ahau [11.19.0.0.0: 1579-1599], cuando murió el gran Obispo De Landa.¹⁸

Dentro del Katun 5 Ahau [12.0.0.0.0: 1599-1618], fue que hubo Padres en Maní: fue el año de 1550.

Este es el año que corría cuando los Padres se establecieron en Yokhá: 1552.¹⁹

Este es el año que corría cuando llegó el Oidor y se fundó el Hospital: 1599.²⁰

Este es el año que corría cuando llegó el Doctor Quijada, gran Gobernador aquí en esta tierra: 1560.²¹

Este es el año que corría cuando aconteció el Colgamiento: 1562.²²

Este es el año que corría cuando llegó el Mariscal Gobernador [Luna y Arellano], y se hicieron las cisternas: 1563.²³

Este es el año que corría cuando hubo viruela grande: 1609.

Este es el año que corría cuando fueron ahorcados los de Tekax: 1610.²⁴

Este es el año que corría cuando [fue registrada por] escrito la población [se censó] por el Juez Diego Pareja: 1611.

3 Ahau [12.1.0.0.0: 1618-1638].

LOS TEXTOS PROFÉTICOS

En relación con el tiempo, los mayas de Yucatán tenían a raíz de la conquista, según los datos existentes, tres clases de predicciones de carácter fatal, a saber: 1) las katúnicas; 2) las tónicas; 3) las diurnas.

Las predicciones katúnicas y las tónicas se presentaban en ruedas cíclicas manteniendo el concepto de que los acontecimientos de un período dado se repetirían al repetirse la misma fecha en que se registraban. En las predicciones de los katunes en los Libros de Chilam Balam la cuenta se inicia con el once, de modo que el orden es once, nueve, siete, cinco, tres, uno, doce, diez, ocho, seis, cuatro, dos, trece. La razón de que la cuenta se inicie con el once es que tal era el katun que corría cuando la conquista española se realizó. El acontecimiento inició una nueva era en la historia. En las crónicas el ciclo terminaba o comenzaba en un 8 Ahau. El ciclo completo se denominaba *Uudz Katunob*, es decir, Doble de los Katunes. Véase en Landa (1938, ed. yuc., p. 107) una rueda de katunes, que Morley reproduce (1947, p. 325). Se conocen dos series completas de profecías katúnicas y una incompleta, todas las cuales están contenidas en esta obra.

Las predicciones tónicas son las que corresponden a cada una de las divisiones de un katun, que son veinte periodos de trescientos sesenta días cada uno llamados tun (Katun es una palabra compuesta de *kal*, que significa veinte, y *tun*). Se conoce únicamente una rueda que incluye los veinte tunes y que corresponde a un Katun 5 Ahau. El nombre que se le da en los Libros de Chilam Balam es Cuceb, que significa ardilla, pero que quiere decir "lo que gira". La serie se incluye también en este trabajo.

El Cuceb enumera años de trescientos sesenta y cinco días, a partir del Trece Kan. En la época de la conquista, el "Cargador", es decir, el nombre del primer día del año civil, era uno cualquiera de los siguientes cua-

tro: Kan, Muluc, Ix, Cauac. El año se iniciaba en el mes Pop y precisamente eran estos días los que caían en el primero de Pop, en el orden indicado; el número del día dentro de la serie de Trece, del Tzolkin, completaba el nombre que recibía cada año. Según el Cuceb, en el año 13 Kan se "tomó" el ídolo del Katun 5 Ahau y la fecha de su designación (5 Ahau) cayó en posición 15 del mes Tzeec, es decir, el día 5 Ahau fue el decimoquinto de dicho mes Tzeec, contando desde uno. Pero la realidad es que la posición del 5 Ahau no fue 15 sino 17, primer error que se nota. Martínez Hernández ([1940], pp. 3 y 11) dice que la posición debe ser 18. Este mismo autor también asienta que el año 13 Kan corrió de julio de 1541 a julio de 1542, mientras que el Cuceb fija su transcurso del año 1593 al de 1594, segundo error notable. La serie termina con el año 7 Kan, lo cual es un error más, debido a que se había omitido completamente el segundo, el que sigue a 13 Kan, que es el 1 Muluc, cuya profecía había quedado incluida por descuido en el tercero, 2 Ix, que se tomó por segundo. Este error queda corregido en la traducción presente. La sección del 7 Kan sale sobrando. El último año en el cual terminó la cuenta de 7 200 días que contiene un katun es realmente el anterior a 7 Kan, o sea el 6 Cauac, cuyo segundo día del mes Uayeb fue 3 Ahau, nombre del siguiente katun. El día anterior, el primero de Uayeb, fue 2 Cauac, y es al que se refiere la última sección del Cuceb, que se titula *Check Oc Katun*, o sea la Pisada del Katun. Parece que en esta serie no se sigue la regla de nombrar al katun con el día en que termina, sino que se toma al día Ahau como el del comienzo. Esto se deduce del texto del Chek Oc Katun, ya que explica que el katun pisará el 2 Cauac desde 13 Oc o sea diez días antes y que entonces dejará su trono y su estera, caerá su carga y dará vuelta el doblez del katun. El 2 Cauac es el último día, el número 7 200, contando a partir del día siguiente a 5 Ahau, 17 Tzeec, del Año 13 Kan, y el 3 Ahau, el primero de un nuevo katun, según este sistema. Del otro modo las predicciones corresponderían no al Katun 5 Ahau sino al Katun 3 Ahau, iniciado al

día siguiente a la fecha 5 Ahau 17 Tzeec ya mencionada.

Landa (1938, ed. yuc., p. 108), refiriéndose al mecanismo de la función de los ídolos de los katunes, explica que cada ídolo correspondiente a un katun comenzaba a regir diez años antes de que comenzara su propio katun y terminaba su regencia al fin del décimo de éste, viniendo a ocupar su lugar el del siguiente, de modo que durante su propio katun solamente ejercía función diez años, o sea la mitad de la duración del periodo; sin embargo, agrega que, no obstante, los diez últimos años, aunque el ídolo fuera otro, seguían rigiendo los pronósticos del que ya había salido. Pone un ejemplo así: "Verbi gratia. Dicen los indios que acabaron de llegar españoles a la cibdad de Mérida el año de la Natividad del Señor de MDXLI, que era un punto en el primero año de la era de Buluc-Ahau [Katun 11 Ahau]... Si no hubiera españoles, adoraran ellos el ídolo de Buluc Ahau hasta el año LI que son diez años; y al año décimo pusieran otro ídolo, a Bolon-Ahau [Katun 9 Ahau], y honráranle, siguiéndose por los pronósticos de Buluc-Ahau hasta el año de LXI [*sic*], y entonces, quitáranla del templo y pusieran a Uuc-Ahau [al ídolo del Katun 7 Ahau] y siguiéranse por los pronósticos de Bolon-Ahau otros X años, y así daban a todos vuelta..." La explicación no es clara porque hay error en donde hemos marcado *sic*, pues en lugar de LXI debió escribirse LXXI. Lo que es claro es que el ídolo estaba en el templo veinte años: diez del katun anterior y diez de su propio katun; también es claro que aunque lo quitasen del templo al final del décimo año de su propio katun, los diez siguientes seguía rigiendo el pronóstico del mismo katun, aunque ya el ídolo presente fuese el del siguiente. El pronóstico, pues, correspondía a la duración del katun. Sin embargo, en el Cuceb el mecanismo no es como lo explica Landa, sino que el ídolo de un katun dado ocupa su lugar en el templo para ser reverenciado, no a la mitad del katun anterior, sino a los tres cuartos, es decir, no comienza su función al iniciarse el undécimo año, sino al iniciarse el decimosexto y dura hasta el último día del decimoquinto de su propio katun para dejar-

le su lugar al del katun siguiente. Hay duda sobre si efectivamente dejaba su lugar o permanecía juntamente con el siguiente, al cual tendría como huésped, habiendo sido a su vez huésped del anterior. (Véase, sin embargo, la p. 204, donde se asienta que un katun es huésped del anterior.)

Las predicciones diurnas son de dos clases: *a*) las del *Sansamal Kin Xoc*, o sea de La Cuenta Diaria de los Días de un año, que únicamente enuncia si el día es bueno o malo y tiene una función general para normar las actividades humanas, y *b*) las del *Chuenil Kin Sansamal*, o sea del Artificio Diario de los Días, es decir, de la veintena, dentro del libro horóscopo llamado en náhuatl *Tonalámatl*, abstractamente, según el propio significado y atributos del nombre del día. La clase *a*) no se incluye en el presente trabajo; la clase *b*) sí. (Véase la nota introductoria particular del *Chuenil kin*.)

Existe aún un tipo de textos que es precisamente el que ha dado nombre a los Libros de Chilam Balam, llamados desde antaño *las profecías* y así tituladas en los manuscritos. Es el que aquí se publica con el título general de Jaculatorias de los Ah Kines y que Roys (1933, p. 164) llama Profecías de una Nueva Religión. El carácter de estos textos es un poco distinto del de las otras profecías: tienen un tono de resignada admisión de hechos inevitables. Véase Roys (1933, apéndice D).

PRIMERA RUEDA PROFÉTICA DE UN DOBLEZ DE KATUNES *

Se asienta el 11 Ahau con el 13 Ahau. Ésta es su palabra y lo que manifiesta el contenido de su carga: Ichcaansiho, Faz-del-nacimiento-del-cielo,¹ es el asiento del Katun 11 Ahau, presente estará allí su Estera, presente estará allí su Trono.² Allí mostrará su palabra, allí mostrará su dominio.

Yaxal Chac, Lluvia-verde, es la cara del katun que dominará en el cielo.³ Bajarán abanicos del cielo, bajarán enramadas de hojas del cielo, bajarán ramilletes perfumados del cielo. Sonará el atabal, sonará la sonaja.⁴ Ah Bolon Yocteil, El-nueve-de-la-pata-de-palo, Ah Buluc Ahau ti Yocte Tok, El-once-señor-pata-de-palo-pedernal, Yubté Takin, Palio-de-oro. Entonces será el tiempo en que Yax Cutz Guajolote-verde-silvestre, esté en Sulim Chan, Serpiente-mojada, en Chakanputun, Sabana-de-chiles. Árboles serán la comida, piedras serán la comida; estéril alimento, esto será lo que venga en el 11 Ahau.

El 11 Ahau es el que comienza la cuenta porque es el katun que transcurría cuando llegaron los extranjeros que vinieron del oriente cuando llegaron; los que trajeron el cristianismo que hizo terminar el poder en el oriente y llorar al cielo y llenar de pesadumbre el pan de maíz del katun. Degollado será en su época Yaxal Chuen, Gran-mono-artífice, Ixkanyultá, Preciosa-garganta.⁵ Dispersados serán por el mundo las mujeres que cantan y los hombres que

* De estos textos han sido publicados únicamente las versiones del Chilam Balam de Chumayel en Médez Bolio (1930) y en Roys (1933). Por primera vez se edita la serie completa en la forma que se hace ahora.

cantan y todos los que cantan. Canta el niño, canta el viejo, canta la vieja, canta el hombre joven, canta la mujer joven.⁶

Cuando lleguen vuestros Hermanos Menores, cuando lleguen vuestros Hermanos Mayores,⁷ cambiarán entonces vuestros bragueros-ceñidores, cambiará vuestra ropa, cambiará el blanco del braguero-ceñidor, cambiarán los colores blancos de vuestras ropas los malditos extranjeros barbudos. En Ichcaansihó, Faz-del-nacimiento-del-cielo, se establecerán. Sus sacerdotes adoran a un Dios encarnado que será adorado por todos los confines del mundo cuando venga y extienda su poder sobre los huérfanos de madre, sobre los huérfanos de padre. De jaguar será su cabeza, de venado su cuerpo. Extendido por todos los pueblos principiará el gobierno dañoso en Ichcaansihó, Faz-del-nacimiento-del-cielo. Ésta es la carga del 11 Ahau. En el año de 1848 saldrá el 11 Ahau.

9 AHAU

Termina el 11 Ahau Katun para que se asiente el 9 Ahau Katun entrelazándose con el 13 Kan, Piedra-preciosa, hasta que quede el 13 Ahau solo.

Uucil Yabnal, Siete-aguas-suyas,⁸ es el asiento del 9 Ahau. Durante su transcurso vendrá tristeza, pero dirá el Halach Uinic, Jefe, que no estérilmente se harán Batabes, Los-del-hacha, y se harán Ah Kines, Sacerdotes-del-culto-solar, y Nacomes, Sacrificadores, porque otra presencia vendrá a la Estera y al Trono, y otra voluntad hará que se pongan cuerdas en el 9 Ahau. De culpa es su palabra, de culpa es su boca, de culpa es su mirada, katun es de culpa por el reinado de Ah Bolon Kin, El-nueve-sol, Ah Bolon Am, El-nueve-piedra-labrada.⁹

Bajo el poder de Ah Uuc Kin, El-siete-sol, cometa

en el katun, será que vengan las cuerdas y el pan de ceiba negra y el pan de maíz negro como pan del Katun 9 Ahau cuando Ca Kinchicul, Dos-sol-signo, Sac Uacnal, Blanco-prominente, sea el rostro que gobierne. Entonces será que se lleve el agua y se lleve el pan de maíz del katun. De espanto y de guerra será su sustento, de guerra su bebida, de guerra su andar, de guerra su corazón y voluntad. Pero poco será el poder que tenga de su criado el 9 Ahau, el Halach Uinic, Jefe, por el poder de Ah Bolon Kin, El-nueve-sol, el deshonesto de la noche, el deshonesto del katun que se entregará a osadas palabras de discordia. Será al final de su tiempo cuando haya muchísimos procuradores de oficio, enredadores; al final será cuando tenga su pan y su agua, cuando tendida esté la Estera para que sea honrada por el adulterio y la falsedad.

Esta es la palabra de lo que acontecerá en la carga del 9 Ahau como lo dijo el gran Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-intérprete. En el año de 1822 terminará el 9 Ahau Katun.

7 AHAU

Termina el 9 Ahau Katun para que se asiente el 7 Ahau Katun. Esta es la palabra y la carga de este Ahau Katun, la palabra de su carga. Mayapan, Estandarte-venado, es el asiento del Katun 7 Ahau. Ek Chuuah, Negro-escorpión,¹⁰ es el rostro que reinará en la Estera y en el Trono. Amayte Kauil, Cuadrado-deidad,¹¹ será el rostro en el cielo. En su reinado será cuando termine de brotar Ix Bolon Yol Nicté, La-nueve-corazón-flor-de-mayo, Ix Dziban Yol Nicté, La-flor-de-mayo-de-corazón-pintado. De Flor de Mayo¹² será el pan del 7 Ahau, de Flor de Mayo será su agua. En ella se hundirán los Halach Uiniques, Jefes de la tierra; en ella se hundirá el Ah

Kin, Sacerdote-del-culto-solar; en ella se hundirá el **Ah Bobat**, Profeta, trastornados por la Flor de Mayo. Nadie se librará, nadie se salvará. El aguijón de su palabra les caerá encima de los ojos y del corazón por todos los ámbitos del mundo. Mucho y completo adulterio será la ocupación de todos; el pensamiento durante la noche será pecado de noche, el pensamiento durante el día será pecado de día. Será la debilidad de voluntad de los **Halach Uiniques**, Jefes, y de los **Ah Kines**, Sacerdotes-del-culto-solar, y de los **Ah Bobates**, Profetas; será la amenaza de palo y piedra para los huérfanos de madre y padre; será el perseguirse como bestias de cuatro patas los hombres del **7 Ahau Katun**. De lascivia y locura será su palabra, de lascivia y locura su andar. En **Ichcaansihó**, Faz-del-nacimiento-del-cielo, principiará la destrucción de los ámbitos del mundo. De nueve grados será su pan, de nueve grados será su agua cuando venga el agua al **Quetzal**, el agua al pájaro verde **Yaxum**,¹³ varada en el pantano, varada en el agua anegada, hermosa aun sin belleza. Despertarán los no despiertos, los que están sin despertar todavía en este tiempo de siete días de reinado efímero, de reinado pasajero, de siete soles de reinado. El aspecto de sus hombres será de **Holil Och**, **Zarigüeyas**-rattones, pero inútilmente gobernarán disfrazados con piel de jaguar y Máscara de Venado y Conejo el cuerpo, pues se manifestarán sus rostros en los pueblos y provincias en que reinan éstos de Estera prestada, de Trono prestado, de Señoría prestada. Así será durante su gobierno que menosprecien a los **Halach Uiniques**, Jefes de los pueblos, los codiciosos señores.

Esto es lo que regirá en el **7 Ahau Katun**. En el año de 1896 saldrá el **7 Ahau**. Aquí está su cara, al sur queda en la rueda.

5 AHAU

Termina el 7 Ahau para que se asiente el 5 Ahau. Ésta es su palabra y lo que manifiesta, lo que trae en su carga para que se cumpla.

Sodzil, Murciélago-su-lugar, es el asiento del Katun 5 Ahau. Bizca será la mirada de los señores terrenos; lisiados estarán los señores terrenos de todas categorías, mas no por deformidad sino porque se harán Ch'maques, Zorras, los que son columnas del pueblo, los que son puntales del pueblo. Escondido tendrán el pensamiento los Halach Uiniques, Jefes. Nadie tendrá confianza en los señores terrenos y yendo y viniendo se verán solitarios. Ahogados serán los que escupen el pan, los que escupen el agua. Devoradas entre sí serán las Zarigüeyas-ratones, los codiciosos de gobernar. Llena de culpa viene la sustancia del katun porque de Flor de Mayo es el pan, de Flor de Mayo es el agua. Por parejas de dos en dos grandes adulterios vendrán a causa de la perversidad de los hombres por todos los ámbitos de la tierra, porque este katun no tendrá sustancia sino destinos de lascivia en las palabras que relajarán la gravedad de los viejos, que relajarán la gravedad de las viejas del 5 Ahau. Más allá del monte, más allá de las lomas rocosas, Thuul Can Chac, El-chac-que-chorrea-serpientes, se alzarán con sequía por todas partes, pero su carga de hambre no será muy hambrienta porque el agua en canales dará pan más allá del monte, más allá de las lomas rocosas. Este tiempo trae hambre espantosa, pero no en todas partes.

En este 5 Ahau llegará nuevo poder, nueva palabra a Ichcaansihó, Faz-del-nacimiento-del-cielo, con otros hombres. Mutuamente se devorarán Víboras y Jaguares, mutuamente se devorarán las Zarigüeyas.

yas-ratones. Acabado será el poder de los Batabes, Los-del-hacha, plebeyos en el 5 Ahau, los hijos de mendigo, los mendigos de ralea, de gente sin nobleza, los cuerpos muertos que están frente al 5 Ahau, los de Estera prestada, los de Trono prestado, los hijos de padres abominables, los de ojos vendados que no verán cuando estén en la Estera, cuando estén asentados en el Trono. Cesará su poder cuando alce el cuello el Jaguar, cuando alce el cuello la Vibora ponzoñosa al fin del 5 Ahau, cuando sea expulsada la semilla del Itzá, Brujo-del-agua, el ávido de gobernar. Entonces morderán a sus amos los Pek, Perros, pues no está lejano el día en que sobre ellos se vuelvan, sobre el que desprecia a su madre, sobre el que desprecia a su padre. Discordia en el Trono nuevamente destruida con piedras cuando acabe la codicia y sean sofocadas las gargantas y se hagan saltar los ojos al que gobierna, cuando impere Hahal Ku, Verdadera-deidad. Ésta es la carga: por muerte súbita, violenta, acabarán. Podrá ser o no podrá ser, sólo Dios [*sic*] sabe la verdad de las cosas, si ocurrirá por la furia de las Holil Och, Zarigüeyas-ratones, así dice el Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete.

Ordenanzas se llaman las que dio el llamado *Xuch Uuet*,¹⁴ Primero-Flor, desde el mero principio que vino cuando llegó. En el año de 1921 saldrá el 5 Ahau.

3 AHAU

Termina el 5 Ahau Katun para que se asiente el 3 Ahau Katun. Durante su reinado se cumplirá su palabra. Aquí está lo que manifiesta: Zuyua es el asiento del Katun 3 Ahau, allí hablará y obrará cuando sea tiempo el reinado del 3 Ahau, lo que

ocurrirá lo dice. Zuyua es el asiento del reinado. Extendida estará la piel de la Serpiente venenosa, extendida estará la piel del Jaguar en Ichcaansihó, Faz-del-nacimiento-del-cielo. Por tres días volverá al cielo Ekel Nok Caanal, Paño-de-estrellas-celestiales, en Zuyua, asiento del reinado de este 3 Ahau. Yax Coc Ah Mut,¹⁵ El-del-anuncio-tortuga-verde, es el rostro que tiene el reinado del 3 Ahau Katun. De frutos del árbol ramón¹⁶ será su pan porque estériles serán sus años en que sólo el viento pasará y sólo se verá en el cielo la majestad venerada de Buluc Ch'abtan, Once-ayunador. Entonces serán asentados los Señores de los pueblos en sus Esteras y Tronos y le será cortada la garganta al que detenta la Estera y el Trono, al Jaguar del pueblo, al Tigre rojo, al Gato Montés rojo, al Gato Montés blanco. Sufrimientos y gemidos quedarán tras de ellos, y tristeza de las Moscas por los caminos vecinales. Visto será en todo lugar poblado Buluc Ch'abtan, Once-ayunador. Vendrá la miseria para los perversos rojos, para los perversos blancos que no respetan a los Señores, que desprecian a su madre y a su padre; será el fin de su codicia cuando ocurran fenómenos celestiales que, sin embargo, no ocurrirán en todas partes, porque Hunab Ku, Unica-deidad, conoce cómo llegará el llanto a Ichcaansihó, Faz-del-nacimiento-del-cielo. Por toda la tierra habrá relajamiento y se dispersarán los pueblos, se dispersarán las ciudades; se desatará la cara, se desatarán las manos, se desatarán los pies del mundo¹⁷ al terminar la codicia, cuando ocurra el despoblamiento, cuando sea la ruina, la destrucción de los pueblos por el colmo de la codicia.

El milagro celestial que dijimos ocurrirá en la época del 3 Ahau Katun, así lo dice el Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete, que los

que tienen la Estera, los que tienen el Trono, los de Estera prestada, los de Trono prestado, han de echar lo que tragarón; vomitarán las gargantas de los que fueron Señores de tres días, los del Trono de tres soles; los del pan de tres días andarán a pie por los caminos a diario. Muy dulce, muy sabroso fue aquello que tragarón pero lo vomitarán los codiciosos usurpadores, los extorsionadores que cobran los tributos, los intrusos. Llanto de las Moscas, llanto de los pobladores por los caminos vecinales. Llanto por el Trono; llanto por la Estera a causa de los que desprecian a los Señores, a causa de los que menosprecian a sus creadores, por los que reniegan de su madre, por los que se rebelan contra su madre. Este 3 Ahau tendrá el rostro, la palabra y la obra de Pauahtun, La-erguida-columna-de-piedra.¹⁸ Esto lo manifestó el Ah Kin, Sacerdote-del-culto-solar, Chel, Chilam, Intérprete, que vendrán generaciones perversas, que entonces vendrán; así está en la piedra, así lo dice Chilam, Intérprete, lo dijo el Chilam, Intérprete, para que se realice y se cumpla a su término la desaparición de las generaciones perversas.

Mucha miseria en los años del imperio de la codicia, gran sufrimiento que terminará con la dispersión y la ruina de los pueblos. Aquí termina la palabra del Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete, así lo explicó la carga de este 3 Ahau Katun.

1 AHAU

Termina el 3 Ahau Katun para que se asiente el 1 Ahau en la Estera, en el Trono. Ésta es su palabra y lo que manifiesta: Emal, La-Bajada es el asiento del Katun 1 Ahau en que bajarán cuerdas

y presidirá Ix Pucyolá, La-señora-destructora-del-corazón-del-agua,¹⁹ Ix Ual Icim, La-señora-tecolote-de-alas-extendidas.²⁰ Muy mal aspecto tiene, mal se ve; mala voluntad durante su reinado y malo el pensamiento de su reinado. Los que entonces vivieren verán la maldad de los Señores en el 1 Ahau Katun. Amayté Kauil, Cuadrado-deidad, será su rostro. Perturbación en el cielo, perturbación en las provincias, perturbación en el mundo, perturbación en el centro de los poblados y cabeza del país, Ichcaansihó, Faz-del-nacimiento-del-cielo. Llanto a causa de los usurpadores, de los mendigos pedigüños, de los que andan pidiendo ser substitutos, los de Trono prestado, los de Estera prestada. Durante este tiempo ocurrirá que el terrenazgo común de todos acabe junto con la codicia de gobierno de los hijos de los Ah Kines, Sacerdotes-del-culto-solar, y de las Ixtitibe, Maestras. Llanto de las Moscas, llanto de las gentes del pueblo. Entonces se despoblará el mundo encogiéndose, haciéndose escaso y pobre, empequeñecido y humillado a causa del rigor de la palabra de este katun. De una noche y un día será el gobierno en la provincia de Maycu, Venado-tecolote, de los usurpadores de Estera, de los usurpadores de Trono, de los que arrojan calumnias, perversos rojos, perversos blanqueados de apariencia de sapos,²¹ los de grandes testículos, los del pederual, colmo de la codicia. En el 1 Ahau regresará el terrenazgo de los terratenientes a los Hermanos Menores y en toda la tierra quedarán colmados los años de los perversos engendrados, de los hijos de mujeres Tórtolas, de los hijos de hombres Tórtolas. Entristecerán entonces estos Señores cuando venga nuevo poder. Así es la carga del 1 Ahau, como lo dijo el Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-intérprete, cuando explicó la

carga del Katun, éstas son sus palabras para este tiempo.

12 AHAU

Termina el 1 Ahau para que se asiente el 12 Ahau; aquí está lo que manifiesta su carga: Saclactun Mayapan, Piedras-blancas Estandarte-venado, es el asiento del Katun 12 Ahau. Yaxal Chuen, Gran-mono-artífice, es el rostro que tendrá durante su reinado en el cielo. Habrá grandes maestros, grandes sabios, grandes magos. Sale lo que está en el cielo en el 12 Ahau: será el Ah Kin, Sacerdote-del-culto-solar, quien se asiente en la Estera y en el Trono con la máscara de Jaguar. De seis generaciones será su gobierno; habrá buenos Batabes, Los-del-hacha, para alegría de los pueblos, buenos gobernantes, buenos hombres, buenos nobles en todo el mundo. Se irán los Holil Och, Zarigüeyas-ratones, abandonando la Estera prestada, el Trono prestado; se irán a las lejanías extremas, a los confines del agua. Felices serán los hombres del mundo prosperando los pueblos de toda la tierra; se acabarán los Osos Mele-ros, Cabcoh,²² las Zorras Ch'amacob, las Comadreja que chupan la sangre del vasallo. No habrá gobernantes mezquinos, no habrá gobierno mezquino; no habrá ya lambiscones de príncipes ni habrá quien pida sustitutos. Ésta es la carga, lo que manifiesta este 12 Ahau Katun. Tendrá gobierno que será respetado, pero no tendrá pan. Despoblamiento hacia el fin por muerte súbita, por perversidades de bellacos. Pero acabarán los ambiciosos destructores.

Seis años serán buenos, seis años serán malos que nuevamente se mezclarán con los años buenos para ajustar el katun. Justas y obedecidas serán

las órdenes de los Señores legítimos para alegría del mundo. No habrá Zorras, no habrá Osos Meleros, no habrá Comadreas, no habrá devoradores de hombres; serán arrancadas las garras del Puma y del Jaguar; tendrán vida pueblos y provincias en el 13 doblez del katun del 12 Ahau Katun. Éste es el destino y la palabra que explicó el gran Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete; ocurrirá en el tiempo de los balbuceadores descendientes del futuro. Así dijo, explicó el Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete, en épocas pasadas.

10 AHAU

Termina el 12 Ahau Katun para que se asiente el 10 Ahau. Esta es la palabra, lo que manifiesta la carga de sus años: Lahun Chablé, Diez-hoja-es-camosa,²³ es el asiento del Katun 10 Ahau.

Lahun Chaan, Diez-poderoso,²⁴ es su rostro. Cit Bolon Ua, Decidor-grandes-mentiras, su rostro en el cielo. Cit Bolon Ua, Decidor-grandes-mentiras,²⁵ el Ah Kin, sacerdote-del-culto-solar, que ata los palos al juntar las cuatro partes del cielo. Años estériles en que no habrá pan; de frutos del árbol ramón y jícama silvestre serán su pan y su agua. Malo su aspecto, malo su imperio en el cielo; malos los Halach Uiniques, Jefes, y sus súbditos. Hambre es su carga: Entrará el pecado en el mundo al sonar los atabales, al sonar las sonajas agitadas por los cuatro Bacabes, Vertedores,²⁶ cuando rasguñen las espaldas las ceibas de la tierra, cuando hagan salir por completo la lengua al que le corten el resuello. Verdad será que la Estera estará arrollada y que entonces vendrá la mácula sobre lo que reste de bueno en el mundo. Hunab Ku, Única-deidad, sabe las cosas.

Esta es la carga, el rostro del Katun 10 Ahau, así dice el Chilam Balam, Brujo-Intérprete; tristeza habrá en el reinado de la carga de sus años por obra y deseo de Hunab Ku, Única-deidad.

8 AHAU

Este Katun 8 Ahau se asentó en el cargador de año cuando fue despoblada Mayapan, Estandarte-venado, que da al sur. Lahun Chablé, Diez-hoja-escamosa, es el asiento del Katun 8 Ahau. Amayté Kauil, Cuadrado-deidad, es el rostro que reina en su pan y en su agua. Tristeza habrá entonces. Cit Bolon Ua, Decidor-grandes-mentiras, es su rostro en el cielo. Pan de Pedernal, agua de pedernal; ruda palabra guerrera que no temerá de nadie el pan ni el agua; que empobrecerá la llanura, que empobrecerá la sierra hollada en busca de alimento. No tendrá agua la llanura, ni tendrá agua la montaña porque en todos los pueblos y provincias no estarán los Bacabes, Vertedores, y entonces vendrá Kinich Kakmó, Guacamaya-de-fuego-de-rostro-solar,²⁷ a reinar.

Entonces vendrán los extranjeros y habrá venganzas a causa de los irreverentes, de los destructores, de los que se levantan en contra de su madre, en contra de su padre, suplantadores del Señorío en Chichen, Orilla-de-los-pozos, y del Señorío a la orilla del mar. Al norte del mundo estará el Bacab, Vertedor, cuando llegue la hora de la culpa a todos los que estuvieron reinando. Entonces vendrán dados, vendrán escudos para los advenedizos, los echados de sus hogares, los Señores plebeyos que usurpan la Estera, que usurpan el Trono, los hijos bastardos, los Itzaes, Brujos-del-agua, hijos sin linaje materno,²⁸ engendrados en mujeres de placer. De pecado, de culpa habla este katun y de des-

trucción por piedras y despoblamiento al final por causa de los ambiciosos de gobernar. Así se manifiesta. Llegará Ah Kinich Kakmó, El-guacamaya-de-fuego-de-rostro-solar, en el Katun 8 Ahau. Despoblamiento será lo que haga venir Ah Kinich Kakmó, El-guacamaya-de-fuego-de-rostro-solar. Se volteará el cielo y dará vuelta la tierra. Cuando ocurra este cambio se hará manifiesto el pecado de los Halach Uiniques, Jefes de los pueblos, y entonces alzarán el cuello los Príncipes cuando se les sumerja en el agua por usurpadores del Trono, por usurpadores de la Estera, cuando se volteen hacia la tierra los soberbios, los renegados, los faltos de nobleza, los plebeyos. Llanto de las Moscas, llanto de los pobladores que llorarán en los caminos vecinales.

Ésta es la palabra del 8 Ahau Katun, el mismo en que fue despoblado Mayapan, Estandarte-venado. Mala es la palabra del katun pero así acontecerá, es su palabra cuando de nuevo regrese, según dijo el gran Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete, cuando escribió los signos en la faz del Katun del 8 Ahau.

6 AHAU

Termina el 8 Ahau Katun para que se asiente el 6 Ahau. De este 6 Ahau Katun son estas palabras que se cumplirán en su tiempo, ello sucederá o no. Dijimos arriba que no era bueno creerlo sino para que se entienda cómo contaban los días dentro de sus años, no porque vivan sus animales, pero es bueno su consejo. Ésta es la palabra y el orden que manifiestan los jeroglíficos de la casa del 6 Ahau Katun. Ésta es la palabra y el orden en que viene el tiempo y años del katun.

Uucil Yabnal, Siete-aguas-suyas, es el asiento del

Katun 6 Ahau. Kinich Kakmó, Guacamaya-de-fuego-de-rostro-solar, de Uxmal,²⁹ será su rostro en el cielo durante este reinado que será de miradas desvergonzadas y de hablar desatinado. Vendrá la tristeza cuando se establezcan los usurpadores de la Estera, los usurpadores del Trono. Tristeza en el cielo; estrellas habrá que traigan peleas violentas y pleitos ocultos entre los hombres sus súbditos, manifiesta el 6 Ahau. Se comerán árboles, se comerán piedras; grandísima hambre será su carga, la muerte estará sentada en su Estera y en su Trono; serán degollados los Halach Uiniques, Jefes de los pueblos, que andan sentados junto a las cercas de piedra exhibiéndose, fuera de las casas, los que desconocen su oficio y función porque no son nobles, sino plebeyos. Esto manifiesta su palabra, que no tienen límites sus ambiciones; irán por el monte, por los pedregales.

Acontecerá por tres veces que no habrá sino pan de jícama silvestre y frutos del árbol ramón; tremenda hambre y despoblamiento y destrucción de pueblos. Ésta es la carga del Ahau Katun el 6 de que se habla, muy malo es su tiempo: tres usurpadores de Trono, usurpadores de Estera, y en el cuarto año Tun reincidirán nuevamente.

Habrá poderosos y habrá Príncipes hasta el fin solamente, pues no está ya lejano el día en que la tierra se voltee para ver el cielo y luego se voltee de nuevo. Entonces no pasará día en que no alcen el cuello los usurpadores de la Estera, los usurpadores del Trono, nada será provechoso para los Señores de la tierra aunque lo deseen.

Eso significa la palabra del 6 Ahau Katun que viene y éstas son las letras de sus signos del 6 Ahau Katun.

Termina el 6 Ahau Katun para que se asiente el 4 Ahau Katun. Ésta es la palabra que está en la carga de sus años según los antiguos nombres. Uucil Yabnal, Siete-aguas-suyas, es el asiento del 4 Ahau Katun en Siete Aguas de Chichen. Uac Chuuahnal, Seis-vertedor-de-calabazas, en su rostro; está al sur.

El alba, el amanecer será por la cola de Ah Bococol, El-vertedor-de-vasijas-de-cuello-angosto, pero su rostro estará cubierto; muerta estará su mirada; llanto por su pan, llanto por su agua porque se le negarán devociones y reverencias. Tembloroso, tembloroso y moribundo estará su poder por falta de reverencia de los Señores Príncipes, de los que rigen y gobiernan. Esto es lo que manifiesta el 4 Ahau Katun: mezquindad de pan, mezquindad de agua también, terminará la obediencia y el respeto porque habrá otra voluntad distinta y no será más respetada, porque dulce fue a su garganta que se le obedeciera pero no querrá respetar. Hacia el poniente tiene su Estera y su Trono; muerte repentina será su carga. Entonces habrá Batabes, Los-del-hacha, extranjeros y advenedizos y será el asfixiar por el cuello a los Halach Uniques, Jefes de los pueblos, haciéndoles vomitar sangre. Ésta es la carga del katun.

Durante su época serán blancos sus bragueros-ceñidores, blancas sus ropas; pan es la divisa del katun. Entonces estará el Kub, Quetzal, estará el Yaxum, pájaro verde, en las ramas del árbol Kaxté o del árbol Hoben.³⁰ Estará el ave anunciadora; llegarán entonces los espantajos de a caballo, cuando llegue Cristo; llegarán los jinetes. Los tributos se ocultarán entonces guardados en sacos en Chichen, Orilla-de-los-pozos.

La mitad del katun buena y la mitad no buena. Esplenderá Ah Chicum Ek, El-estrella-guiadora, en el cielo, Yax Aclam, Verde-tortuga, Yax Ah Coc Mut, El-del-anuncio-tortuga-verde, Ah Ahsah, El-despertador-estrella-de-la-mañana.³¹ Pero nadie se dará cuenta de las señales porque sordos estarán a todas las cosas.

Manifiesta el 4 Ahau Katun muerte súbita y entradas de zopilotes a las casas, y sucederá de nuevo cuando vuelva otra vez el doblez del katun a regir.

Así dijo el gran Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-Intérprete, para la carga del Katun 4 Ahau.

2 AHAU

Este 2 Ahau que se asienta en el 1 Cauac, Trueno, se inicia en el segundo día después de 1 Poop, Estera. Ésta es la palabra contenida en su carga y lo que manifiesta en sus años: Morirá el 4 Ahau Katun y entonces se asentará el 2 Ahau Katun. Aquí está la palabra contenida en la carga, todo, totalmente, y el orden en que dirá su palabra.

En Maycú, Venado-tecolote, Sacyapan, se asentará el Katun 2 Ahau; en Saclactun, Piedras-Blancas, Maycú, Venado-tecolote, Mayapan, Estandarte-venado.³² Katun triste; katun de llanto porque entonces bajarán cuerdas, bajará agonía, bajará angustia y tristeza de ánimo. Entonces habrá muerte súbita y grandes montones de calaveras. Estériles serán sus años. Ésta es la carga; esto es lo que deja ver. En este 2 Ahau atará su carga Buluc Ch'abtan, Once-ayunador, y nacerá Hun Yoppol Ik, Viento-reseco, De frutos del árbol ramón será el pan, de jícama silvestre será. La mitad de la carga viene buena, tendrá un pan, tendrá su agua, su poder, su reinado.

La mitad tendrá grandes miserias; empero habrá Trono, habrá Estera y respeto al pan y al agua para los Señores de la tierra y sentirán la marca del pie, la huella del pie, los extranjeros.

Este es el katun en que vendrán los de color claro, los hombres barbudos, así lo dijo, así lo supo el Ah Kin, Sacerdote-del-culto-solar, Chilam, Intérprete: "Es el tiempo en que llegarán vuestros padres; vuestros hermanos." Así le fue dicho a los Grandes Itzaes, Brujos-del-agua: "Iréis a alimentarlos; vestiréis sus ropas, usaréis sus sombreros; hablaréis su lenguaje. Pero sus tratos serán tratos de discordia." Surgirá también la Flor de Mayo, el botón de la flor de Mayo, y nadie habrá que no caiga cuando esté la presencia de Ix Dziban Yol Nicté, La-flor-de-mayo-de-corazón-pintado. Cuando llegue, de Flor de Mayo será la palabra del 2 Ahau Katun.

Esta es la carga del 2 Ahau. En el año de 1800 será el fin del 2 Ahau Katun y entonces se unirá al Katun 11 Ahau. Este 2 Ahau está asentado en el 1 Cauac, Trueno, como está puesto.

13 AHAU

Termina el 2 Ahau Katun para que se asiente el 13 Ahau Katun. En el sexto año tun del 9 Ahau termina el 13 Ahau, que acompañará al 11 Ahau en el conjunto de las Ahaues hasta la sexta unidad de tiempo, el sexto año del 9. Esta es su palabra. Kin-chil Cobá, Chachalaca-de-rostro-solar,³⁴ es el asiento del 13 Ahau Katun, Maycú, Venado-tecolote, Mayapan, Estandarte-venado.

Dice su palabra, muestra su rostro para decir su palabra este katun que tiene por cara a Itzamná, Brujo-del-agua, a Itzamtzab, Las-cabrillas-del-brujo-del-agua. Hambre tremenda trae su carga; de jícamas

silvestres será el pan; durante cinco años bajarán jí-camas silvestres y frutos del árbol ramón, bajarán años de langosta, pan de langosta y agua de langosta; diez generaciones, trece generaciones de langosta tendrá su carga. Pero habrá respeto para su pan y su agua; sostendrán en sus manos el abanico, el ramillete, el ramillete de los celestiales, los Señores de la tierra.

Yaxal Chac, Lluvia-verde, es el cargador de este katun en el cielo, en las estrellas; y llegará entonces Ixma Chucbeni, La-incompleta, la que comerá el Sol y comerá la Luna. Muy pesada es la carga del katun. Batabes, Los-del-hacha, impotentes y perdidos, Ah Kines, Sacerdotes-del-culto-solar, impotentes y perdidos por causa de Ixma Chucbeni, La-incompleta. Perdición de los Halach Uiniques, Jefes; perdición del Ah Bobat, Profeta, y del Ah Naat, docto: embriaguez del Ah Bobat, Profeta, y del Ah Kin, Sacerdote-del-culto-solar, por causa de la Ix Dziban Yol Nic-té, La-flor-de-corazón-pintado. Mucho desvarío de lascivia y adulterio comienza en los Batabes, Los-del-hacha, corrompidos cuando entre el reinado de Ah Bacocol, El-vertedor-de-vasijas-de-cuello-angosto, que quiere devoción y reverencia solamente para él, cuando desprecian a los Halach Uiniques, Jefes, en los pueblos, en el monte y el pedregal, los engendrados de lascivos y perversos, despreciadores de sus mayores, los que se olvidan de su creador, los hijos de Ah Bacocol, El-vertedor-de-vasijas-de-cuello-angosto. Mas no será completo el pan de este katun porque sus hombres estarán también bajo Ah Bolon Yocte, El-nueve-pata-de-palo, los de la Estera de dos días, los del Trono de dos días, los sin madre, los sin padre, los engendrados de locos lascivos enredadores y embaucadores. Devorado será el rostro de su Sol y devorado será el rostro de su Luna;

y hablará el Balam, Jaguar, hablará el Ceh, Venado, que recibirá el palo gimiendo y dará su paga al mundo con muertes repentinas arrebatadas y sin motivos. No será una solamente la carga de muertes repetinas y violentas cuando se cumpla la tremenda hambre. Esto es lo que guarda la carga del 13 Ahau Katun en la séptima unidad de tiempo del 9 Ahau cuando acaba el 13 que acompaña al 11 Ahau Katun en el grupo de los Ahaues hasta el sexto año del 9 Ahau. Deja a estos dos: el 13 Ahau y el 9 Ahau.

Así lo dijo el Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-Intérprete. Al oriente está en la rueda y en el año de 1824 termina el 13 Ahau.

SEGUNDA RUEDA PROFÉTICA DE UN DOBLEZ DE KATUNES*

11 AHAU

El 11 Ahau Katun, primero que se cuenta, es el katun inicial. Ichcaansihó, Faz-del-nacimiento-del-cielo, fue el asiento del katun en que llegaron los extranjeros de barbas rubicundas, los hijos del sol, los hombres de color claro.

¡Ay! ¡Entristezcámonos porque llegaron!

Del oriente vinieron cuando llegaron a esta tierra los barbudos, los mensajeros de la señal de la divinidad, los extranjeros de la tierra, los hombres rubicundos..., [*texto destruido*] ...comienzo de la Flor de Mayo. ¡Ay del Itzá, Brujo-del-agua, que vienen los cobardes blancos del cielo, los blancos hijos del cielo! El palo del blanco bajará, vendrá del cielo, por todas partes vendrá, al amanecer veréis la señal que le anuncia.

¡Ay! ¡Entristezcámonos porque vinieron, porque llegaron los grandes amontonadores de piedras, los grandes amontonadores de vigas para construir,¹ los falsos *ibteeles*² de la tierra que estallan fuego al extremo de sus brazos, los embozados en sus sabaños, los de reatas para ahorcar a los Señores! Triste estará la palabra de Hunab Ku, Unica-deidad, para nosotros, cuando se extienda por toda la tierra la palabra del Dios de los cielos.

¡Ay! ¡Entristezcámonos porque llegaron! ¡Ay del

* La serie completa aparece en los Libros de Chilam Balam de Chumayel de Tizimín. Sólo han sido publicadas las versiones del primero en Médiz Bolio (1930) y en Roys (1933).

Itzá, Brujo-del-agua, que vuestros dioses no valdrán ya más!

Este Dios Verdadero que viene del cielo sólo de pecado hablará, sólo de pecado será su enseñanza. Inhumanos serán sus soldados, crueles sus mastines bravos. ¿Cuál será el Ah Kin, Sacerdote-del-culto-solar, y el Bobat, Profeta, que entienda lo que ha de ocurrir a los pueblos de Mayapan, Estandarte-venado, y Chichen Itzá, Orillas-de-los-pozos-del-brujo-del-agua? ¡Ay de vosotros, mis Hermanos Menores, que en el 7 Ahau Katun tendréis exceso de dolor y exceso de miseria por el tributo reunido con violencia y antes que nada entregado con rapidez! Diferente tributo mañana y pasado mañana daréis; esto es lo que viene, hijos míos. Preparaos a soportar la carga de la miseria que viene a vuestros pueblos porque este katun que se asienta es katun de miseria, katun de pleitos con el diablo, pleitos en el 11 Ahau. ¡Oh vosotros, Hermanos Menores, oh vosotros, Hermanos Mayores, la palabra de Dios [*sic*] del cielo y de la tierra, recibid a vuestros visitantes, a los llegados barbudos, a los mensajeros de la señal de Dios [*sic*] que vienen a establecerse como vuestros Hermanos Mayores, a los Señores que marcarán la piedra ahora, los Ah Tantunes,³ los que os pedirán generaciones de Dios a vosotros!

Éstos son los nombres de los Ah Kines, Sacerdotes-del-culto-solar: Ah Misnilacpec, El-que-mueve-barriendo-con-las-narices, el Anticristo, ése es el rostro del tiempo que viene a nosotros ahora. ¡Ay, se acrecentará la miseria, hijos míos! Esta es la palabra de Nuestro Señor: "Arderá la tierra, se harán círculos blancos en el cielo durante este katun, así acontecerá." Viene de boca del Dios Padre [*sic*], no es palabra de engaño. ¡Ay! ¡Muy pesada es la

carga del katun en que acontecerá el cristianismo! Esto es lo que vendrá: poder de esclavizar, hombres esclavos han de hacerse, esclavitud que llegará aun a los Halach Uiniques, Jefes de Trono de dos días, de Estera de dos días, hijos de los días de locura lasciva. Será su final por obra de la palabra de Dios [*sic*]; de once medidas será su jícara y por todas partes se verá la señal de Su rostro durante Su reinado. Reunión de piedras será Su enseñanza, reunión de piedras será Su hablar. Si habréis de morir, si habréis de vivir, ¿quién habrá de saber la verdad de estos signos reales? ¡Ah de Mayapan, Estandarte-Venado! Se hace pequeña por sí sola la justicia que pone en los calabozos, que saca las amarras, los azotes y látigos. Cuando se asiente, dobles serán las orejas de Su Hijo, tendrá Su sombrero en la cabeza y Su calzado en los pies, anudado tendrá el cinturón a la cintura cuando ellos vengan.

9 AHAU

El 9 Ahau Katun es el segundo que se cuenta. Ichcaansihó, Faz-del-nacimiento-del-cielo, será su asiento.

En su época recibirán el tributo los extranjeros que vengan a la tierra, en la época en que lleguen los amos de nuestras almas y congreguen a los pueblos en grupos según la cabeza de sus Esteras, cuando comience a enseñarse la Santa Fe del cristianismo, cuando comience el echar agua en las cabezas en bautismo por todas las partes de esta tierra, cuando se asienten los cimientos y comience a construirse la Santa Iglesia Mayor, la prominente casa de Dios [*sic*] que está en el centro del pueblo de

Tihoó, Mérida, el recinto de la casa de Dios Padre [sic].

Enorme trabajo será la carga del katun porque será el comenzar de los ahorcamientos, el estallar del fuego en el extremo del brazo de los blancos, los ibtecles de la tierra que llegarán con sus sabaños y sus reatas aquí sobre el mundo, cuando caiga sobre la generación de los Hermanos Menores el rigor de la pelea, el rigor del tributo, cuando les venga la gran entrada del tributo en la gran entrada del cristianismo, cuando se funde el principio de los Siete Sacramentos, cuando comience el mucho trabajar en los pueblos y la miseria se establezca en la tierra.

Dicen que Ixanom, Eva [sic], provino de la palabra de Dios Padre. Vino la joven blanca del cielo, mujer Virgen se llama, madre de las siete estrellas rojas, estrellas que sostendrá en el noveno año el 9 Ahau que traerá el cristianismo. Así fue interpretada por Chilam Balam, Brujo-intérprete, la piedra de los nueve sellos que está arriba; el trece Etznab es el día allá arriba como acá en la tierra. De las sonajas del cielo, de los abanicos del cielo será bajado el cordel. Es la palabra de Dios [sic] que vino de arriba a toda la extensión de la tierra. De nueve grados es su plato, de nueve grados es su jícara.

¡Ay, preparaos, Itzaes, Brujos-del-agua, a recibir a vuestros huéspedes! Los habréis de alimentar pero también os alimentarán. Vienen nuestros Hermanos Mayores.

7 AHAU

El 7 Ahau Katun es el tercero que se cuenta. Ichcaansihó, Faz-del-nacimiento-del-cielo, será su asiento. Yaxal Chac, Lluvia-verde, será su rostro

durante su reinado de sabiduría. Sonarán atabales abajo, sonarán sonajas arriba. De Flor de Mayo será el pan, de Flor de Mayo será el agua que trae en su katun. Será entonces cuando comiencen a man-cillarse los labios con las mujeres y llamen con las manos a la Flor de Mayo, llamen durante el katun con la mirada de lado porque habrá resonar de música por todas las partes de la tierra. De Flor de Mayo será el vestido, de Flor de Mayo el rostro, de Flor de Mayo el calzado, de Flor de Mayo el andar: par-padeando los ojos; escupiendo saliva, ofreciendo mujeres a los Batabes, a los Justicias, a los Jefes, a los Escribanos, a los maestros, a los grandes, a los humildes. No habrá grandes enseñanzas ni ejem-plos sino mucha perdición sobre la tierra y mucha desvergüenza. Será entonces cuando sean ahorca-dos los Halach Uniques, Jefes, los Ahaues, Señores-príncipes, los Bobates Profetas y los Ah Kines, Sacerdotes-del-culto-solar, de los hombres y de los pueblos mayas. Perdida será la ciencia, perdida será la sabiduría verdadera.

Preparaos, ¡oh Itzaes, Brujos-del-agua! Porque vuestros hijos verán, al término del juego del ka-tun, cesar la ruina del Quetzal y de los Amaite Uitz, Montañas-angulosas,⁵ sus asientos, en ese tiem-po. De lascivia y mentira serán sus palabras, de lascivia su mirada cuando reine entre los Halach Uniques, Jefes, el Chac del rojo bellaco. Pero siete serán sus platos, siete sus jícaras; vendrá mucho ahorcamiento de Zarigüeyas bravas, de Zorras bra-vas. No habrá ningún lugar donde no pese la pala-bra y la carga de este katun en que comenzará el resonar de la música y venga el llamar con la mano de la Flor de Mayo.

Recibid generosamente a vuestros huéspedes. Yo

he venido a vuestros pueblos, vengo a pedir que os cristianicéis a tiempo.

5 AHAI

El 5 Ahau Katun es el cuatro que se cuenta. Ichcaansihó, Faz-del-nacimiento-del-cielo, es su asiento. Reino será de monos, U maaxil katunoob, Monos-en-el-katun. Será el ahorcar a los hombres de edad avanzada⁶ y será la muerte a los grandes linajes. Dura será su mirada, duro el signo de su reinado cuando comiencen los devoradores de infantes de mujer, los devoradores de infantes de hombre, de los infantes de la lascivia de mujer, de los infantes de la lascivia de los hombres, cuando venga al mundo el comienzo de las discordias del diablo y se vaya la presencia de Ku, Deidad, al cuarto descansadero del cielo, cuarto descansadero del camino, por el comienzo del pleito con el diablo. Entonces será el ahorcamiento en el tiempo de los jueces rojos, y el comienzo de la miseria por todos los ámbitos del mundo. Cuando alcen el cuello las Zari güeyas-ratones para morder, cuando alcen el cuello las Víboras rojas, venenosas y bravas para morder, en el comienzo del Trono de dos días, de la Estera de dos días.

Pero generaciones escasas vendrán de mujer, generaciones escasas vendrán de hombre cuando aparezca la cabeza del cometa que destruya a los Señores de la tierra. En su época será cuando se escuche el ruego del Ah Bobat, El-profeta, y se agiten y rebullan las carniceras hormigas rojas Xu lab,⁷ las carniceras hormigas rojas Chac Uayah Cab, las grandes destructoras de la miel, y se escondan las sonajas, por causa de aquél a quien se

entregan nuestros corazones, dentro del tributo. Rigor vendrá para la miseria y la discordia.

Batabes, Los-del-hacha, serán las Zarigüeyas; Batabes, Los-del-hacha, serán las Zorras; Batabes, Los-del-hacha, serán las Piques insectos dañinos (chinchas voladoras), los chupadores, los extorsionadores de los pueblos, éstos serán los que sean establecidos. De Pek, Perro, será su aspecto, de corazón cerrado, dientes mellados, cuerpo fiero. Triste estará el rostro del Sol en la época de la carga del katun. Ku, Deidad, hablará en el cielo diciendo: "Será preciso que golpee vuestras espaldas, ¡oh vosotros, hermanos, los que estáis a cuatro patas, los que sois el fruto del katun de las Zarigüeyas-ratones!" De Flor de Mayo será el Trono en que se sienta y se exhiba en medio de la plaza en su Estera de dos días, en su Trono de dos días. Se establecerán en el pueblo los funcionarios que vienen de dos en dos: Batabes, Los-del-hacha, Zarigüeyas. A cuatro patas darán la muerte, pero el tiempo en que puedan llamar con silbidos será poco.

Sonará la sonaja del katun su fuerza y su pecado en el centro del pueblo de Mayapan, Estandarte-venado. Por el gran tributo de Zuyua los Jaguares y los Osos Meleros, Cabcoh, se desgarrarán las espaldas mutuamente devorando el tiempo del katun deseosos de poder. Grandes ahorcamientos es la carga del katun. Pero será el fin del padecimiento de los hombres mayas cuando vengan violentamente los de Uyamil, Lugar-de-los-nahuales, a hacer justicia al pueblo.

3 AHAU

El 3 Ahau Katun es el quinto que se cuenta. Ichcaansihó, Faz-del-nacimiento-del-cielo, es su asiento; Ek

Coc Ah Mut, El-estrella-tortuga-anuncio, será su rostro en el reinado de gran sabiduría; el Anticristo es su rostro. Bravura tendrá su cara, fuerte será su vista, poder tendrá su vista. Regateadora será la pelea con el Cisin, Diablo, cuando bajen del cielo las grandes hojas del silil⁸ con la fuerza de Hunab Ku, Deidad-única.

Años vendrán de langostas, años fieros de lluvias fingidas, de lluvias de hilos delgados, escasa. Guerras y apedreamientos. Suspendidas estarán las vasijas⁹ de barro durante la carga que soporte la generación de Maax, Mono, cuando haya llegado el juez del cielo a cargar el katun y haga doler durante siete años las grandes hojas del silil y haga arder con fuego de llamaradas los cuernos del Yuc, Venadito,¹⁰ en Ichcaansihó, Faz-del-nacimiento-del-cielo. Extendida estará entonces la piel del Chacbolay,¹¹ pero volteada, en el medio de la plaza. Pek, Perro, será su aspecto. Lluvia colgada del cielo, lluvia de lo muy alto, lluvia del zopilote celestial, lluvia angulosa, lluvia de venado [víctimas], cuando bajen las grandes hojas del silil; bullir de guerra y años de langosta. Suspendidas tendrá sus vasijas de barro durante la gran carga, el linaje de Maax, Mono.

Grandes serán los montones de calaveras y habrá *Ixpom kakil*, Viruelas-gruesas.¹² Mucho ahorcar habrá en este katun y mucha será la carga de miseria; torcida tendrá la mirada el Señor de la Estera de dos días, el Señor del Trono de dos días cuando acabe el poder del katun. No es mentira sino la palabra de Ku Likul Caanal, Deidad-del-cielo. ¡Oh, vosotros, Hermanos Menores! Llanto de los pobladores, llanto de las Moscas en los cuatro caminos que se cruzan cuando golpee el katun destructor y griten las almas en las afueras de los poblados de los grandes Itzaes, Brujos-del-agua.

Hérne aquí yo el 3 Ahau Katun que me asentaré en el pueblo de Ichcaansihó, Faz-del-nacimiento-del-cielo. Heme aquí yo, César Augusto [Carlos V], vengo a recibir mi limosna. Del Corazón del Monte recibe su limosna Ah Uc Yolsip,¹³ El-siete-corazón-ofrenda.

1 AHAU

El 1 Ahau Katun es el sexto. Emal, La-Bajada, será el asiento donde venga Ix Puc Yolá, La-estructora-del-corazón-del-agua, contra Ix Ual Cuy, La-tecolote-de-alas-extendidas. Entonces bajarán sogas y cuerdas; del cielo bajará la fuerza. No son cosas inventadas o fingidas sino que vienen en su orden y con el poder de U Yumil Caan, Señor-del-cielo, sin fingimientos ni mentiras. Pek, Perro, su señal; Ak Kuch, Zopilote, su señal. Rotos tendrá los dientes, fiero será su cuerpo. De Zarigüeyas serán las caras durante su reinado, de pésima palabra, de pésima piedra, pésimo pedernal, pésimo corazón su voluntad para los sabios.

Amayte Kauil, Cuadrado-deidad, será el rostro presente, cuando venga otra palabra y otra enseñanza que pondrá tristeza en el corazón de la tierra y alborotará los brazos de la tierra, alborotará el centro de la tierra al bajar la justicia del cielo con el poder de Hahal Ku, Deidad-verdadera, verdadera verdad del mundo. Llegarán entonces innumerables (ocho mil) Axes¹⁴ a morder a Jaguares y Serpientes, llegarán los devoradores, los aniquiladores del alimento, los que agotan el alimento. Durante siete años morderán los innumerables (ocho mil) Axes, siete años morderán a la Serpiente al bajar la carga a la llanura levantando la guerra que muestra el katun.

Entonces será cuando venga la justicia de Dios Nuestro Señor [sic] sobre la Flor de Mayo; vendrán los blancos ibteeles a los pueblos sobre los rojos bellacos, sobre Maax, Mono. Ese será el tiempo en que venga distinto poder y enseñanza; pero no será creída por los hombres mayas cuando se pregone entre ellos la palabra de Dios [sic] el Señor de las Alturas, para que corrijan y arrojen la maldad de sus vidas, porque los hombres mayas de edad no querrán oír la palabra de Dios porque, sin embargo, parecerán ser padres de los mismos que juzgan. Tristeza habrá en las almas de los Halach Uiniques, Jefes de la tierra. Pocos creerán, o no creerán. Así desaparecerá por completo la alegría de los oficiales de gobierno. Encendido será el fuego en honor de la Virgen maya, y de Hunab Ku, Deidad-única, en la Santidad de la Iglesia [sic] única. Allí gritarán para que sean oídas sus voces por el Señor de las Alturas, el Señor del Mundo. Tristeza habrá en las almas por todos los ámbitos cuando se agiten los brazos de la tierra, cuando se agite el centro de la tierra en el tiempo en que sea la sujeción a los extranjeros devastadores. Es la palabra de Dios [sic].

En grandes montones estarán los restos de los guardianes de las playas, de los guardianes de las orillas del mar cuando baje el Señor Eterno, el Señor Justiciero, cuando baje la justicia de Nuestro Señor sobre el pueblo, cuando venga la gran pelea de los blancos ibteeles a los pueblos y se conozca si realmente son esforzados.

Entonces vendrá el saltar los ojos al gobernante, al Tecolote de los pueblos y a los Maax, Monos, del katun, y el cortar las garras al ave de rapiña y a la Zorra del pueblo, y al Cabcoh, Oso Melero. Bajará entonces la carga del tributo cuando venga el cris-

tianismo; bajará la cuerda y la fuerte codicia vendrá con el Señor Eterno; cortará las ataduras de la carga de miseria el Señor Justiciero cuando baje la culpa para lo que es del cielo, para lo que es de la tierra entera. Días de sequía han de seguir en su tiempo a las provincias de la tierra cuando se ocultan los restos de los guardianes de las playas, de los guardianes del mar en Uaymil, Lugar-de-los-nahuales, y en Emal, La-Bajada, cuando en enormes montones estén sus restos frente al mar. Cuando acabe el katun así acontecerá en el doblez de los katunes, que sea engañada Mayapan, Estandarte-Venado, y terminen las exigencias del Cisin, Diablo, del Anticristo: exigencias de lancear con pedernales; exigencias de arrebatarse talegas o alforjas; peleas con estallidos de odio; peleas en los pueblos con ollas y piedras. Al término del katun, del Corazón del Monte recibirá su limosna, su parte, César Augusto [Carlos V], en muertes por hambre, en zopilotes en las casas, en muertes súbitas y vómitos de sangre. Tremenda hambre será la carga del 1 Ahau cuando éntre el zopilote a las casas. Llanto de las Moscas, llanto de los pobladores en los caminos vecinales, en los descansaderos de los caminos vecinales cuando se sepulte la Flor de Mayo con la carga del katun.

Hermanos Menores nacidos de mujer, hijos vencidos nacidos de hombre, ésta es la carga que viene al mundo: Vendrá entonces el amo que nos someterá a prueba, el de rostro de Nacom, Sacrificador, el hijo de Ku, Deidad, Su Obispo [*sic*], lo que llaman la Santa Inquisición, en compañía de Saúl a pedir fe y cristianismo. Colmo será de la codicia, colmo de los despojos de los mercaderes, colmo de la miseria en todo el mundo. Así acabará el poder del gran katun. Se alzarán espectacularmente los

cinco estados del país llano¹⁵ para pelear. Éste es el espectáculo del 1 Ahau Katun. Lluvia de furiosos torbellinos será su carga, lluvia angulosa, lluvia de hilos delgados en el más malo de los katunes; de un golpe del palo de sembrar será la siembra.

Vendrá el pleito y la exigencia del tributo y se pedirán pruebas [sic] de las siete medidas de a braza del cordón umbilical de la tierra; entonces se hará muy dura la adoración de Dios. Entonces dejará de recibir oro el Anticristo y no vendrá más el Anticristo porque no lo quiere Dios [sic] Nuestro Señor para la salvación de este katun y de estas provincias, porque Él fue el creador de estas provincias y el origen del Anticristo fue la avaricia.

Cuando todavía no habían venido los hombres religiosos, entonces no había despojos, no había codicia ni ofensas a la sangre de los otros hombres. Con su propio esfuerzo comía el pobre, pero cuando llegaron los arrasadores, de cinco frutos de árboles comieron los Cabcoh, Osos Meleros.

¡Ay! Dolor existe en Yumil Caan, Señor-del-Cielo, y viruelas gruesas es lo que manda el katun. Se alzará guerra en la Habana con 13 veces 400 barcos.

12 AHAU

El 12 Ahau Katun es el séptimo de la cuenta; Saclactun, Piedras-blancas, es su asiento. Yaxal Chuen, Gran-mono-artífice, es su signo presente en el cielo. Rojo será su rostro en su reinado; manifiesto estará en el cielo durante el día, manifiesto estará en el cielo durante la noche. Grandes maestros, grandes artífices, magníficos Halach Uniques, Jefes, magníficos Batabes, Los-del-hacha; de regocijo será el poder en todos los ámbitos del mundo; enriquecerá el pobre si se cumple la promesa del katun.

Años serán de riqueza; en abundancia de riquezas y propiedades será también bueno. Los Chaques, Dioses-de-la-lluvia buenos, harán producirse los frutos aun en los pedregales.

Con el cristianismo que traerá Dios se acabarán las Ch'amac, Zorras, y los Cabcoh, Osos Meleros mordedores; acabarán las Zarigüeyas-ratones y acabarán también los Buitres que sacan los ojos a Maax, Mono, en el katun.

Temblorosos, trémulos estarán los corazones de los Señores de los pueblos por las señales difíciles que trae este katun: Imperio de guerra, época de guerra, palabras de guerra, comida de guerra, bebida de guerra, caminar de guerra, gobierno de guerra. Será el tiempo en que guerreen los viejos y las viejas; en que guerreen los niños y los valientes hombres; en que guerreen los jóvenes por los ambiciosos Batabes, Los-del-hacha. De un día y una noche serán el Trono y la Estera; correrá guerra e imperará discordia. Entonces se levantará el palo y la piedra para la pelea.

La mitad viene buena, la otra mitad mala; seis años serán malos, seis serán buenos hasta que se alcancen doce grados de la cuenta del katun. Entonces vendrá el exigir la Fe a los gobernantes de los pueblos y se abrirán las puertas doradas [iglesias del culto católico] y vendrá el casar al pueblo en la Casa de las Cuatro Divisiones en donde se pedirá que no nos descalcemos. Ésa es la cristianidad, ése es el amanecer del cristianismo.

Aquí decimos ahora cómo acabará el katun de la Flor de Mayo: acabará traicionado por la voz, por el poder que viene. Cuando llegue Uuc Uitzil Chac Ek, Estrella-Chac-de-las-siete-montañas, Tupem Caan, Atronador-de-los-Cielos, Pahool Chac, Chac-destructor, en el decimoséptimo año tun. Entonces nos

será pedido el cordón umbilical de la tierra de siete medidas y será pedido el libro de los pueblos a los gobernantes por la palabra del Dios que viene. Recibid a vuestros huéspedes; a la distancia de una jornada, a la distancia de un grito vienen ya. Enorme es la carga del katun porque muy mala será la voluntad y muy mala será la enseñanza, porque dará pelea a su padre y a su madre según señala el enmarañamiento del katun. Cambios y recambios de padres, cambios y recambios de madres por exigencias de Hunab Ku, Deidad-única.

Llorará su asiento en la Estera el 12 Ahau, el katun rico. Yacerán en descanso los arcos sobre la tierra, los arcos del país llano; volteadas estarán las flechas en el centro del país llano. Entonces para los Señores del mundo mucho será el trabajar, mucha la burla a los gobernantes de los pueblos con la guerra rápida, violenta, la guerra de cerbatanas de fuego y tendrán también cerbatanas de fuego los hijos de mujer deshonestas y los hijos de hombre deshonesto. Perdidos serán en la guerra los hijos de las Ixtitibe, Maestras. Entonces vendrá el tributar y el Señor de las dos cabezas vendrá a burlarse de los gobernantes de los pueblos ennegrecidos con las difíciles señales del katun. Entonces será dividida la carga del mundo y se pedirá el oro a los Señores y a los grandes maestros, a los grandes sabios, cuando venga por los bosques y por los pedregales el Señor Justiciero a cortarles las garras al ave de presa y a desgarrar las espaldas de los Cabcoh, Osos Meleros, y los Ch'amac, Zorras, sean quemadas en sus propias guaridas de piedra. Así dejará de haber Zorras y no existirá más el Cabcoh, Oso Melero.

Gran pan es la sustancia del katun con riqueza y magníficos Batabes, Los-del-hacha, y regocijos

para el mundo. De las orillas del mar tomará su sustento el Corazón del Monte que vencerá al katun de sequías y vómitos de sangre, el katun que da fin al regocijo y trae el pedir la comida por medio de enigmas y acertijos.

No habrá miseria sino regocijo en el tiempo de este katun.

10 AHAU

El 10 Ahau es el octavo katun que se cuenta; Saclactun, Piedras-blancas, Lahun Chablé, Diez-hoja-escamosa, es su asiento. Llegará a sus pobladores, hará que griten cuatro veces los que atan los palos de las palizadas y cercas y que lloren los Señores de los pueblos. De frutos del árbol ramón será su pan. Arderán las pezuñas de los animales, arderá la arena en las orillas del mar, arderán los nidos de las aves, estallarán las lajas. Sequía es la carga del katun. Es la palabra de Ku, Deidad, de Nuestro Señor Dios Padre [sic] y la de U Colel Caan, Señora-de-los-cielos, se cumplirá por detrás y por delante del filo del katun. Nadie hará calmar la palabra de Dios Nuestro Señor, del Dios Hijo del Señor de los Cielos y de la Tierra. Nadie escapará de su rigor en toda la extensión del mundo. Llegará el Santo Cristiano trayendo a su sacerdote para convertirnos a los bárbaros de nuestro error. Nadie podrá calmar tampoco la sequía, poderoso será el poder de los Ah Kines, Sacerdotes-del-culto-solar, de los mayas.

8 AHAU

El 8 Ahau Katun es el noveno que se cuenta; Itzmal, Lugar-de-Itzman-mago-del-agua, es el asiento

del katun. Regresarán los de Kinich Kakmo, Guacamaya-de-fuego-de-rostro-solar; bajarán escudos, bajarán flechas tras los Señores de la tierra y en Chakanputún, Sabanas-de-chiles-putun, serán fijadas las cabezas en los muros, de los advenedizos de la tierra; será el término de su codicia, el término del sufrimiento que causan al mundo.

Con la palabra de Dios Padre mucha guerra hará entre los pobladores Kinich Kakmó, Guacamaya-de-fuego-de-rostro-solar, en el asiento de este katun.

6 AHAU

El 6 Ahau Katun es el décimo que se cuenta; Uxmal es su asiento en el cual se fija por sí mismo. Ardoroso es el poder del rostro de su reinado que mentirá con desatinadas palabras de lascivia, ocasión de que baje Dios Padre a culpar y a cortar el cuello por las falsedades de palabra, para después hacer resucitar y esperar la justicia de Nuestro Padre Dios, para hacer que entren al cristianismo todos los súbditos, porque todos los nacidos en esta tierra han de entrar al cristianismo. Ésta es la carga del 6 Ahau que se asienta en este katun.

4 AHAU

El 4 Ahau Katun es el undécimo que se cuenta: Chichen Itzá, Orillas-de-los-pozos-del-brujo-del-agua, es su asiento. Llegará el Quetzal, llegará el pájaro verde Yaxum, llegará Ah Kantenal, El-del-árbol-amarillo; llegará el vómito de sangre por cuarta vez. Llegará Kukulcan, Serpiente-quetzal, en persegimiento de los Itzaes, Brujos-del-agua. La cuarta vez que habla el katun, la cuarta vez que le llega al Itzá, Brujo-del-agua.

2 AHAU

El 2 Ahau es el decimosegundo katun que se cuenta; Maya Uas Cuzamil, Golondrina-maya-su-lugar, Maya Tsucpom, Árboles-de-goma-copal-maya-agrupados, es el asiento del katun. A la mitad se reducirá su pan, a la mitad se reducirá su agua en este tiempo del Katun 2 Ahau. Es la voluntad de Dios [*sic*] que a la mitad se reduzca su templo durante su imperio; será el colmo de la palabra de Dios [*sic*].

13 AHAU

El 13 Ahau Katun es el decimotercero que se cuenta; Cabal Ixbach, Chachalaca-poblado; Kinchil Cobá, Chachalaca-de-rostro-solar, es el asiento del decimotercer katun. Se ennegrecerá el ramillete de los señores de la tierra por la universal justicia de Dios [*sic*] Nuestro Señor. Se volteará el Sol, se volteará el rostro de la Luna; bajará la sangre por los árboles y las piedras; arderán los cielos y la tierra por la palabra de Dios Padre, del Dios Hijo y del Dios Espíritu Santo. Santa justicia, santo juicio de Dios Nuestro Señor.

Nula será la fuerza del cielo y de la tierra cuando entren al cristianismo las ciudades grandes y los pueblos ocultos, la gran ciudad llamada Maax, Mono, y también la totalidad de los pequeños pueblos en toda la extensión del país llano de Maya Cusamil Mayapan, Golondrina-maya-su-lugar Estandarte-venado. Será el tiempo en que se alcen los hombres de dos días en el rigor de la lascivia; hijos de ruines y perversos, colmo de nuestra perdición y vergüenza. Dedicados serán nuestros infantes a la Flor de Mayo y no habrá bien para nosotros.¹⁶ Será el origen de la muerte por la mala sangre al salir la Luna,

y al entrar la Luna llena acontecerá la sangre entera. También los astros buenos lucirán su bondad sobre los vivos y sobre los muertos.

Resucitarán los muertos, acontecerá el hundimiento de los cielos. Irán los virtuosos al cielo y bajarán los malos al centro de la tierra; será el fin al término del katun por la palabra de Yumil Caan Yetel Luum, Señor-del-cielo-y-de-la-tierra. Esto es lo que hay en la carga del 13 Ahau. Para el tiempo que termine este katun vendrán a implorar las aguas del renacer, para renacer; serán almas santas las que reciban el santo óleo sin violencia sino por voluntad de Dios [sic].

TEXTOS PROFÉTICOS DE KATUNES AISLADOS

PROFECÍA EN UN 13 AHAU *

El 13 Ahau cae con su carga en Emal, La-Bajada, Holtun Zuyua, Cavernas-de-Zuyua, Hotzuc Chakan, Llanura-de-las-Cinco-Parcialidades.

Disputada será la Máscara de Madera,¹ tal es la carga para Hotzuc Chakan, Llanura-de-las-Cinco-Parcialidades. Sufrirá padecimientos Ah Canul, El-guardián,² entonces será cuando se tiñan de añil³ unos y otros por el padecimiento de Ah Canul, El-guardián; estucarán con pintura⁴ los Canules, Guardianes; con ellos soltará su carga.

En Saclactun, Piedras-blancas, se establecerá Ah Ek Uilo, El-Negro-Uilo. Aumentada será, acrecentada será la carga al extremo de la sierra; de siete medidas será la sobrecarga de la carga que allá exista. Terminará el poder del katun con siete años de poder de Kin, Sol. Siete años serán de guerra, siete años de muertes violentas. Pero todo se aquietará cuando termine la palabra del katun. Cuidará entonces de los siete apastes recipientes de tortillas de maíz Ix Saclactun, La-que-está-en-Piedras-Blancas, Bolon Ch'ooch', Nueve-Amargo, la que está asentada en medio de la isla de Cuzamil, Golondrinas-su-lugar; entonces será el fin y término del poder de los Ah Kines, Sacerdotes-del-culto-solar, los intérpretes de los signos, de los unos y los otros, de los que sean. Entonces será cuando humille, cuando marque con el pie, Ah Mucen Cab, El-que-guarda-la-miel, cuando transcurra el 13 Ahau, por-

* Se publica por primera vez.

que el 13 Ahau es el tiempo en que se juntarán y coincidirán el Sol y la Luna; será la noche y al mismo tiempo el amanecer de Oxlahun Tiku, Trece-deidad, y de Bolon Tiku, Nueve-deidad. Será cuando cree, haga nacer Itzam Cab Ain, Brujo-del-agua-tierra-cocodrilo, vida perdurable en la tierra. Se derrumbará el cielo y se volteará la tierra, retumbará Oxlahun Tiku, Trece-deidad. Se inundará el mundo cuando se levante el gran Itzam Cab Ain, Brujo-del-agua-tierra-cocodrilo. Grandes inundaciones trae el mensaje del katun a su término, grandes inundaciones vendrán hacia el fin del poder del katun; en los 16 para los 4 cuatrocientos más 17 años entonces es cuando muere el poder de este katun.

Bolon Tiku, Nueve-deidad, no querrá el degüello de Itzam Cab Ain, Brujo-del-agua-tierra-cocodrilo, cuando se apodere del país llano aquel llamado Ah Uooh Puc, El-signo-destructor, que arrojará con ímpetu su nombre teniendo el rostro vendado, durante su reinado.

PROFECÍA LLAMADA DE LAS FLORES EN UN KATUN 11 AHAU*

El 11 Ahau será el tiempo del poder de Ah Bolon Dzacab, El-Nueve-fecundador, el sabio. El doblez de la vuelta del katun será cuando se manifieste el lugar de su carga, que será de nueve medidas. El día cuatro Kan, Piedra-preciosa, ligará su carga terminándola. Cuando baje, del Corazón del Cielo sacará su consagración, su nueva vida, su renacer;

* Se ha publicado únicamente la versión del Libro de Chilam Balam de Chumayel en Médez Bolio (1930) y en Roys (1933).

bajará a su acicalada casa con Bolon Mayel, Nueve-perfumado.⁵ Dulces son sus bocas, dulces las puntas de sus lenguas y dulces tienen los sesos estos dos grandes y nefastos murciélagos que vienen a chupar la miel de las Flores: la roja de hondo cáliz, la blanca de hondo cáliz, la oscura de hondo cáliz, la amarilla de hondo cáliz, la inclinada, la vuelta hacia arriba, el capullo, la marchita, la campánula recostada de lado, la mordisqueada del cacao, la pegajosa flor de pedernal, la flor de hueso, la *Macuilxúchit*, cinco-flores, la de corazón colorido, la Ixlaul, flor de laurel, la flor de pie torcido; a todas éstas vinieron los Ah Con Mayeles, Los-ofrecedores-de-perfume.

Las madres de las flores serán olidas por el Ah Kin, Sacerdote-del-culto-solar, por el Ahau, Señor-príncipe, por el Holcan, Soldado, por el Halach Uinic, Jefe. Tal será la carga del katun florido cuando venga. "Pero no habrá otro, ya no se verá otro", dijo. No traerá pan en su carga el katun florido sino flores de cizaña por el pecado cometido por Bolon Tikú, Nueve-deidad. A tres años aún no llegará la presencia del dios infernal Bolon Dzacab, Nueve-fecundador, cuando se manifestará en las flores *Pizlímtec* [Pilzintecuhtli]⁶ el infante inmaturo, cuando se disfrace de colibrí y venga a chupar la miel de la flor de nueve pétalos, de la flor de nueve corazones. Entonces querrá marido la flor marchita cuando le arranquen el corazón.

De cuatro pétalos será el cáliz de las flores cuando tengan asentada en su centro la presencia del Ah Kin Xocbil Tun, Sacerdote-del-culto-solar, Xocbil Tun, Piedra-preciosa-que-se-cuenta, cuando tenga la presencia de Oxlahun Tikú, Trece-deidad, cuando vean cómo baja el pecado hacia la Estera, cuando hasta allí llegue el poder de la Flor de Mayo. De

Flor de Mayo será la Estera, de Flor de Mayo el Trono, de Flor de Mayo la sustancia. De envidia será su asiento, de envidia será su caminar, de envidia será su plato, de envidia su jícara, de envidia su corazón, de envidia será su entendimiento, de envidia su pensamiento, de envidia su boca. Desvariado de lascivia será el poder en su época cuando pida a gritos su comida y su bebida, cuando por la comisura de la boca coma su sustento que estará sobre los dedos de sus pies mientras mordido tenga el palo y sostenga la piedra. Grande será la lascivia durante la presencia de Lahun Chaan, Diez-Poderoso. De pecado será su rostro, de pecado su entendimiento, de pecado su palabra, de pecado su enseñanza durante su presencia, de pecado su caminar; porque tuvo vendados los ojos su presencia; peligrosa será su situación en la Estera durante su imperio porque se olvidará de su madre, se olvidará de su padre, y querrá ignorar al padre que lo ha engendrado y querrá ignorar a la madre que lo ha parido; olvidadiza será su voluntad y tendrá orfandad que ofenderá a su padre y querrá ir en orfandad de madre. Como de borracho serán sus señales porque perderá el entendimiento ante su madre y ante su padre y será falto de virtud, y de bondad despojado estará su corazón y sólo un poco de bondad tendrá en la punta de la lengua. Ignorará cómo va a acabar e ignorará lo que habrá al final de su época cuando sea el término del tiempo de su poder, cuando pesadamente cargue su limosna Bolon Tikú, Nueve-deidad, Uuc Satay, Siete-Muerte, cuando pierda su ánimo y espíritu y sea degollado después que él mismo se haya ahorcado. Pecadora será la palabra del Ah Bobat, Profeta, pecador será el Ah Kin, Sacerdote-del-culto-solar, pecador el Ahau, Señor-príncipe, pecador el Holcan, Guerrero.

Terminará su poder embrocando los escudos y colocando las lanzas con la punta para abajo. De diez pétalos será la enemistad que se levante. Pero no sabrán lo que viene al final del poder del katun: Holcanes, Guerreros, que cuando lleguen, colgada traerán del brazo a Ix Tab, La-de-la-cuerda.⁷ Entonces no estará vendado el rostro del katun sino que pondrán sus pechos para ser alanceados por los de la Flor de Mayo y morirán por los Ah Kines, Sacerdotes-del-culto-solar, los sabios, en compañía de los Ahaues, Señores Príncipes, y de los Holcanes, Guerreros. Este mensaje sale en otro katun en el noveno año tun en cuyo tiempo se establecerán Batabes, Los-del-hacha, y Ahaues, Señores-príncipes, hijos de Ah Kinchil Cobá, El-Chachalaca-de-rostro-solar, y de Ah Miscit, El-barredor, por el poder de Oxlahun Tiku, Trece-deidad, antes de que transcurran, según mi entender, tres dobleces, vueltas, duraciones de hombre sobre la tierra.

En la tercera vuelta del katun será el tiempo de escalar las montañas⁸ por la sequía y los grandes padecimientos del hijo del gran Itzá, Brujo-del-agua. Pero no acabarán por completo el tiempo de la Flor de Mayo y los hombres de la Flor de Mayo dentro del cristianismo.

PROFECIA LLAMADA "EPISODIO DE AH MUCEN CAB EN UN KATUN 11 AHAU" *

En el 11 Ahau es cuando salió Ah Mucen Cab, El-que-guarda-la-miel,⁹ a poner vendas en los ojos de Oxlahun ti Ku, Trece-deidad. Solamente sus herma-

* Se ha publicado únicamente la versión del Libro de Chilam Balam de Chumayel en Médiz Bolio (1930) y en Roys (1933).

nas y sus hijos lo sabían; el Santo Señor, Su Hijo y el Espíritu Santo también lo sabían. Con las vendas de su rostro terminó el amanecer para ellos y no supieron ya lo que vendría cuando fue apresado Oxlahun ti Ku, Trece-deidad, por obra de Bolon ti Ku, Nueve-deidad.

Entonces será cuando bajen cuerdas, y fuego y piedra y palo y sea el golpear con palo y piedra, cuando sea apresado Oxlahun ti Ku, Trece-deidad; entonces será cuando se le rompa la cabeza y se le abofetee el rostro, y sea escupido y cargado a cuestras y despojado de sus insignias y cubierto de tizne;¹⁰ y el Quetzal, el pájaro verde Yaxum, sea molido y tomado como alimento juntamente con su corazón, con Sicil, pepitas molidas de calabacitas, y con Top', pepitas molidas de calabazas grandes, y con frijoles molidos y tamales, por Yax Bolon Dzab, Gran-nueve-fecundador, quien se posesionará del trece piso del cielo, y quien hará que sea permanente el tamo de las semillas y la punta del olote, hueso del maíz, aquí sobre la tierra, lugar de su corazón, porque Oxlahun ti Ku, Trece-deidad, no respeta el corazón del sustento. Será el flechar entonces a los huérfanos de padre, al miserable, a la viuda,¹¹ para sustentar su corazón; y será el sepultar en las arenas de las orillas del mar azotadas por las olas, de las insignias despojadas. Se hundirá el cielo y se hundirá la tierra también cuando los extremos del doblez del katun se unan y muera el hijo menor.

El doblez del katun llegará aquí en el día 3 Oc; 1 Cimi es el día en que morirá el poder del katun y se alzarán Cantul ti Ku, Cuatro-deidad; los cuatro Bacabes, Vertedores, que arrasarán la tierra.

Al terminar el arrasamiento se alzarán Chac Imix Che, la ceiba roja, columna del cielo, señal del ama-

necer del mundo, árbol del Bacab, Vertedor, en donde se posará Kan Xib Yuyum, Oropéndola-amarilla-macho. Se alzará también Sac Imix Che, Ceiba-blanca, al norte; allí se posará Zac Chic, Blanco-remedador, Zenzontle; soporte del cielo y señal del aniquilamiento será la ceiba blanca. Se alzará también Ek Imix Chec, Ceiba-negra, al poniente del país llano; señal del aniquilamiento será la ceiba negra; allí se posará Ek Tan Picdzoy, Pájaro-de-pecho-negro. Se alzará también Kan Imix Che, Ceiba-amarilla, al sur del país llano, como señal del aniquilamiento; allí se posará Kan Tan Picdzoy, Pájaro-de-pecho-amarillo, Kan Xib Yuyum, Oropéndola-amarilla-macho, Ah Kan Oyal Mut, Ave-vencida-amarilla. Se alzará también Yaax Imixche, Ceiba-verde, en el centro de la provincia como señal y memoria del aniquilamiento. Ella es la que sostiene el plato y el vaso; la Estera y el Trono de los katunes por ella viven.

PROFECÍA LLAMADA "LA PALABRA DE OXLAHUN TIKU" EN UN KATUN 13 AHAU*

Esta es su palabra de Oxlahun Tiku, Trece-deidad, como fue explicada por el Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-intérprete: A su tiempo será —dijo— que coman, que coman su maíz comprado; que beban, que beban su agua comprada, cuando sea el tiempo en que se encorven sobre la tierra, cuando sea el tiempo en que la tierra se les acerque a la faz. Entonces escalarán las nubes y escalarán las montañas; será el tiempo en que su-

* Se ha publicado únicamente la versión del Libro de Chilam Balam de Chumayel en Médiz Bolio (1930) y en Roys (1933).

fran la derrota, el tiempo de las revueltas y motines; será cuando se enrosque el cogollo del henequén ch'elem,¹² cuando venga el remedarlos y el burlarlos; cuando el tronco de la ceiba sea resellado, cuando venga la pesada carga al hijo de Maax, Mono.

Será entonces el ahorcarlos y el enjuiciarlos y el colocarles trampas de cuerdas tensas bajo las malezas. Entonces bajará su hambre y cuatro serán los caminos del katun. Limpio estará el norte y el poniente¹³ para el paso de los hijos de Ku, Deidad. Perdidos quedarán en sus matorrales llenos de miserias y padecimientos los hijos del gran Itzá, Brujo-del-agua. Arderán sus playas, arderán sus orillas arenosas: Subirá a los árboles Ah Masuy, El-agostador, arderán las pezuñas cuando dé comienzo el poder [de Ku]. Para los de Dzidzontun, Piedras-puntudas-como-pezuñas, de trece grados será su carga.

Entonces vendrá la castidad y la abstinencia para los grandes meleros lascivos y libidinosos de Lahun Chaan, Diez-Poderoso. Soplará en su flauta Chactenel Ahau, Señor-de-la-flauta-roja, encenderá fuego con las raíces de sus pies, hará enrojecer la savia de la Flor de Mayo, hará enrojecer las alas de la tórtola Mucuy. Resplandecerá el cielo enrojecido cuando haga su algazara Chactenel Ahau, Señor-de-la-flauta-roja, y haga música Sactenel Ahau, Señor-de-la-flauta-blanca, en el 13 Ahau.

Aquella Chichen Itzá, Orillas-de-los-pozos-del-brujo-del-agua, tendrá su fardo de trece grados. Barriada será la provincia de Chichen, Orillas-de-los-pozos, y arderá el fuego en el centro del pueblo y podrán hablarse unos a otros los Ah Kines, Sacerdotes-del-culto-solar. Podrá escucharse al Ah Bobat, Profeta, se escucharán sus ocarinas. "Le llegó su día al agua", dirán los Ah Kines, Sacerdotes-del-culto-so-

lar. Caerá el agua como dicen, y escucharán el ale-
tear de las alas de la tórtola Mucuy¹⁴ en el oriente
y el ruido de la savia de la Flor de Mayo cuando
haga su música Sactenel Ahau, Señor-de-la-flauta-
blanca, cuando mida el camino del katun y vaya
por el atajo rodeando la llanura Ix Kan Citam Thul,
La-piedra-preciosa-jabalí-conejo, de Sulim Chan, Ser-
piente-mojada, huyendo de la carga del katun. De
trece grados será la carga de la llanura que atará el
corazón del país llano. Atravesada quedará la car-
ga en Emal, La-Bajada, arrollada estará su Estera
durante el tiempo del katun por sus excesivos pade-
cimientos y sufrimientos. Se regocijará Ah Ektenel,
El-de-la-flauta-negra, frente a los grandes montones
de calaveras y vendrá el zopilote ávido y voraz a
sacar los ojos a sus Señores en medio de violentas
muertes. Será cuando venga para Ahau Can, Señor-
serpiente, y Sinic Balam, Hormiga-brava, la guerra.
Años desiguales son los que trae para ellos el katun.
Será entonces cuando griten las ranas Uoes a
medio día y caiga la servidumbre en Emal, La-Baja-
da, Holtun Zuyua, Cavernas-de-Zuyua; cuando se
regocije Chactenel Ahau, Señor-de-la-flauta-roja, y
haga música Sactenel Ahau, Señor-de-la-flauta-blan-
ca.¹⁵ Ésta es la predicción para el 13 Ahau.

PROFECÍA LLAMADA "MEMORIA DE CÓMO VINO HUNAB KU A DECIR SU PALABRA A LOS AH KINES" *

Ésta es la memoria de cómo vino Hunab Ku, Dei-
dad-única, Oxlahun Tikú, Trece-deidad, deidad in-
mensa (deidad de 8 000 veces) a decir su palabra

* Sólo se ha publicado la versión del Libro de Chilam
Balam de Chumayel en Médiz Bolio (1930) y en Roys (1933).

a los Ah Kines, Sacerdotes-del-culto-solar, profetas [sic], Chilames Balames, Brujos-intérpretes; al Ah Xupan Nauat, El-nahua-del-estandarte-de-turquesa; al Ah Kin, Sacerdote-del-culto-solar, Ah Napuctun, Señor-Piedra-fina-de-línea-materna-llamada-Puc; al Ah Kin, Sacerdote-del-culto-solar, Nahau Pech, Garrapata-de-línea-materna-llamada-Hau, y al Ah Kin, Sacerdote-del-culto-solar, Ah Kauil Ch'el, El-santo-pájaro-ch'el. Se reunieron en la casa del Ah Nacom Balam, El-sacrificador-que-saca-corazones-brujo, que era Chilam, Intérprete; entonces aconteció el hablar en la casa del Chilam, Intérprete; les fueron dichas palabras de aviso y consejo, les fue revelada la medida de las palabras. Pero no entendieron estas palabras que les fueron dichas.

La razón de por qué se le llama Chilam, Intérprete, es porque el Chilam Balam, Brujo-intérprete, se acostaba tendido,¹⁶ sin moverse ni levantarse de donde se echaba, en su propia casa. Pero no se veía el rostro ni la forma y tamaño de quien hablaba encima del edificio de la casa, a horcajadas sobre ella.

Comenzó a ser pronunciada la palabra cuando estaban reunidos los Ah Kines, Sacerdotes-del-culto-solar, en la casa del Chilam, Intérprete. Les fue dicha la palabra a ellos, pero no sabían quién la decía; decían que Hunab Ku, Deidad-única, Ahau Caan, Señor-del-cielo, eso decían. Se postraron sobre la tierra cuando comenzaron a oír la palabra; se echaron de bruces: "Oh Chilam, Intérprete, gran Ah Kin, Sacerdote-del-culto-solar, haz de saber que llegó el día en que llega su katun. Despertaos, amaneceros, que se asienta ya el katun de la Flor de Mayo. Tres lunas hace que está ya presente el Yuma Netziuit Kuk Yaxum, Señor-del-agua-arruinador-de-la-cola-del-Quetzal, del-pájaro-verde-Yaxum;

presente está ya su rostro en el ave, presente está ya el Bolon Uitz, Nueve-cerros, el Yuma Netziuit Kuk Yaxum, Señor-del-agua, Arruinador-de-la-cola-del-Quetzal, del-pájaro-verde-Yaxum. Nadie entenderá los días de penitencia que se manifestarán en el poder que viene. Nadie entenderá cómo vienen ahora las penitencias que privarán en el poder del decimosegundo katun que dice ya su nombre. Será cuando venga el juez [*sic*] de Ebula, Agua-que-inunda-la-escalera; será el tiempo del bastón de oro¹⁷ y será el tiempo de la cera blanca. Su sustancia será cera y por la cera bajará la justicia [*sic*] del cielo, ocasión de que suban los cristianos. Cuando os hundáis y os amanezca, entonces lo vendréis a entender, cuando sea el moverse del cielo y la tierra al término del katun de la Flor de Mayo que llega ahora a regaros con sus Flores y a hacer nacer una sola voluntad de que pidáis mujeres para cohabitar."

Entonces habló el Chilam Balam, Brujo-Intérprete: "Desde ahora, Oh Halach Uiniques, Jefes, llega el día en que dice su nombre el decimosegundo katun. Vedlo, de Jaguar es su cabeza, rotos tiene los dientes; de Conejo su cuerpo, de Perro su cuerpo. Atravesada tiene la lanza en su cuerpo y en su corazón. Sin embargo, dulce es su bebida, sabrosa su comida; de nada hablará, de nada escuchará sino de desvarios de lascivia, tal es su palabra. En ninguna parte han de entregarse las hijas de Cuchlum Idzinil, Hermandad-de-hermanas-menores; saldrán de esta provincia, habrán de irse las hijas de Cuchlum Idzinil, Hermandad-de-hermanas-menores,¹⁸ porque va a ser el tiempo en que paran las mozas doncellas, las no casadas, un día tras otro.

"Preparaos, apercibíos, vosotros, Hermanos Mayores, y vosotros, Hermanos Menores, a padecer y

a sufrir la carga del katun, porque si no la padecié-
seis caería sobre vuestros pies, se enredaría en vues-
tros pies y vosotros haríais el papel de venado¹⁰
[víctima]. Si no la padeciéseis roeríais las raíces
y el tronco de los árboles y las hojas de los yerba-
zales. Si no la padeciéseis, serían las mortandades
de venados [víctimas] para que pudiera brotar el
pan de maíz del pueblo.

"Cuando venga ese tiempo, aquí, al centro del
país llano Maycu, Venado-tecolote, Mayapan, Estan-
darte-venado, la dicha Siyancaan, La-famosa, a esta
provincia que tendrá el nombre de Yucatán como
se le dirá cuando venga distinta enseñanza en otro
katun que ha de pasar de regreso por vuestros pue-
blos. Pero no sólo ha de ser su lugar aquí, sino
también entrará el zopilote a las casas y será tam-
bién el tiempo de la muerte violenta a las gentes
animales.

"Cuando se asiente en su Estera este poder, de
sólo pecado será su palabra, de sólo pecado será
su enseñanza; katun será de pecado, de tres por-
ciones será la sustancia de los frutos del árbol ra-
món que será el pan del katun de la Flor de Mayo.
Ésta es la carga para el día que se asiente: de trece
capas será la Estera del gran mamador adúltero.
Será el tiempo en que venga la burla de seis partes
y de tres veces vendrá la burla de la llegada del
juez [sic] en el tiempo en que el bastón de oro sea
el símbolo de la justicia, y sea la cera blanca lo
que trueque, y sea la cera blanca por donde baje
la justicia del cielo, ocasión de que suban los cris-
tianos ante su justicia. Esto será entendido cuan-
do en seco se muevan el cielo y la tierra.

"Muy doloroso viene el término del katun de la
Flor de Mayo, porque aún no habrá acabado cuan-
do se volteen hacia arriba las raíces de los árboles

y tiemble toda la provincia. Traicionada terminará la palabra del katun de la Flor de Mayo, así que no hay razón para que deis vuestros infantes a su arzobispo [*sic*]; cuando venga, iréis a esconderos al monte. Pero si los entregáis, que sea siguiendo al verdadero Dios del Cielo [*sic*], Cristo llamado, que estará presente cuando sea el término de la visita del katun a vosotros, y el término de esparcir flores y tomar esposas [*sic*].²⁰ Ese día lo conoceréis porque se muevan los cielos, y la tierra camine.

"Muy dolorosamente terminará la humanidad de la Flor de Mayo según dicen las pinturas de las superficies de los muros;²¹ entonces diréis que también son santas y creeréis en su santidad. Aquel que sea sabio entre nosotros será el que comprenda esto; aquel que finalice su existencia gozando del cristianismo cuando éste sea comprendido por la gente. Quizás sólo 14 años (o katunes) sean Batabes, Los-del-hacha, las Zarigüeyas-ratones, Zarigüeyas-ratones Batabes, Los-del-hacha, porque entonces llegará para siempre el hijo." Dijo y sacó el libro de sus Siete-generaciones, para que lo leyesen los Ah Kines, Sacerdotes-del-culto-solar, durante tres días, pasándoselo mutuamente los Ah Kines, Sacerdotes-del-culto-solar. Primeramente el Yaax-che libro, Libro-de-la-ceiba, le fue dado a Ah Xupan Nauat, El-nahua-del-estandarte-de-turquesa; a Ah Kin Ch'el, Sacerdote-del-culto-solar-pájaro-Ch'el; a Ah Napuctun, El-Piedra-fina-de-línea-materna-llamada-Puc, y a Nahau Pech, Garrapata-de-línea-materna-llamada-Hau. Estaba puesto el libro de las siete generaciones en el gran altar, el altar donde oraban Ah Kin Pech, Sacerdote-del-culto-solar-Garrapata, y Ah Kauil Ch'el, El-santo-pájaro-Ch'el, cuando oraban en el gran altar, en la gran mesa. Al término del katun

se juntará otra vez el doblez de los katunes que vienen. "Eternamente se oirá mi voz, la del Chilam Balam, Brujo-intérprete, explicando la palabra de Hahal Ku, Verdadera-deidad."

Así será el fin de los hombres de la Flor de Mayo: se les pedirán las pruebas a sus Señores que gobiernen la tierra; si no las supieren, saldrán al monte y al pedregal a buscar su fuerza. Entrarán en calma los pueblos cuando ya no haya Ch'amaques, Zorras mordedoras, sino hasta que llegue el 9 Ahau Katun. Cinco años faltan para que termine mi mensaje y llegue el día en que baje el tributo y la agonía de la miseria a los restos de los hijos del gran Itzá, Brujo-del-agua, para que sea el mero final de los mamadores.

"No habrá Ah Kin, Sacerdote-del-culto-solar, que declare la carga del katun; ciega tendrán su vista por obra del katun de la Flor de Mayo; el pensamiento y el entendimiento, la sabiduría, el día y la noche serán del katun de la Flor de Mayo. Esto es lo que os interpreto. De llanto fueron mis palabras, yo, el Chilam Balam, Brujo-intérprete de Hahal Ku, Deidad-verdadera del cielo. Recordadas serán cuando llegue el tiempo del katun en que se alivie la miseria que quede de los hijos del Itzá, Brujo-del-agua."

PROFECÍA LLAMADA "INTERPRETACIÓN DE LA LLEGADA DE LOS EXTRANJEROS ESPAÑOLES POR LOS AH KINES EN UN KATUN 13 AHAU"*

La interpretación de los Ah Kines, Sacerdotes-del-culto-solar, las profecías de los grandes sabios, los

* Sólo ha sido publicada la versión del Libro de Chilam Balam de Chumayel en Médiz Bolio (1930) y en Roys (1933).

grandes Ah Kines, Sacerdotes-del-culto-solar, el augurio y pronóstico de los Ah Bobates, Profetas, y del Chilam Balam, Brujo-intérprete, Ah Xupan Nauat, El-nahua-del-estandarte-de-turquesa, para el 13 Ahau.

Ah Xupan, El-del-estandarte-de-turquesa, es el nombre del que tenía a su cuidado el gran libro de los siete linajes por cuya causa vino, le echó culpa el Señor del Universo. El libro de los siete linajes le fue despojado por el Precioso Señor Celestial en el imperio de la esclavitud, mundo de abajo de Luzbe, cuando fue el comienzo del Señor del Universo. ¡Ay! En el octavo año del 13 Ahau los Ah Kines, Sacerdotes-del-culto-solar, profetizaron porque comprendieron cómo habrían de venir los extranjeros españoles; lo leyeron en los signos de sus papeles y por eso comenzaron a decir: "Verdaderamente los haremos amigos nuestros y no les haremos guerra", diciendo además: "A ellos se les pagará el tributo". Así declararon los Ah Kines, Sacerdotes-del-culto-solar, y los Ah Bobates, Profetas, por la lectura en sus papeles de las ruedas y monumentos del katun, diciéndolo a los pobladores y a los guerreros. Tres años faltaban para que llegaran cuando habló Ku, Deidad, a los Ah Bobates, Profetas. Ese demonio les dijo: "Holcanes, Guerreros, cuando sea el amanecer del 13 y del 7, alzáad vuestra guerra." Así les dijo el demonio llamado Ah Uuc Satay, El-siete-muerte, obispo [sic] del demonio, el que reside en Chuncaan, Base-del-cielo, Ichcaansihó, Faz-del-nacimiento-del-cielo, lugar en que residía el consejo, en Chuncaan, Base-del-cielo,²² lugar de Ah Uuc Satay, El-siete-muerte. Les dolía el corazón porque vendrían los extranjeros y terminaría el imperio del demonio, por eso leían sus papeles los nefastos Ah Kines, Sacerdotes-del-culto-

solar, falsos curas, buscando cómo vendría la culpa por la voluntad del Señor Universal, el que está Arriba, el universal Dios de la tierra según dicen, porque comprendían el mensaje del katun y la totalidad de la sobrecarga que vendría sobre las vidas del Itzá, Brujo-del-agua, porque miseria y dolor es lo que conquista Su alma y vive para el bien recreándose en la miseria y en el sufrimiento de todas las cosas.

Xupan Nauat, Nahua-de-estandarte-de-turquesa, es el nombre de quien explicó el orden del mundo, juntamente con Ah Kin Ch'el, Sacerdote-del-culto-solar Ch'el, y de Nahau Pech, Garrapata-de-línea-materna-nombrada-Hau, y de Ah Napuctun, El-piedra-fina-de-línea-materna-nombrada-Puc, y de Nacom Balam, Sacrificador-que-extrae-corazones-brujo, y de Chilam Balam, Brujo-intérprete. Ésta es la memoria de los Ah Kines, Sacerdotes-del-culto-solar. Cómo supieron el orden de las cosas del katun y del primer año tun del katun. Mayapan, Estandarte-venado, será el asiento del Trece Ahau.

CUCEB O RUEDA PROFETICA DE LOS AÑOS TUNES DE UN KATUN 5 AHAU*

AÑO [1º] 13 KAN

13 Kan, Piedra-preciosa, 1 Poop, Estera. Entonces fue tomado el ídolo de barro del Katun 5 Ahau en el año cristiano de 1593. El día 15 Tzeec dice su nombre y aquí declaramos la carga que viene. El día que se tome este katun, Mayapan, Estandarte-venado, será el lugar donde se cambie el katun, donde

* Véase la nota introductoria a los textos proféticos.

baje el agua del Quetzal, del pájaro verde Yaxum, cuando serán devorados hijos de mujer, hijos de hombre; será el tiempo de los grandes amontonamientos de calaveras, y del amanecer y del permanecer alertas cuando vengan las grandes destrucciones de las albarradas y será resellada la superficie del tronco de la ceiba.¹ Será entonces cuando se sequen las fuentes de agua y será entonces cuando Thuul Caan Chac, El-Chac-que-chorrea-serpientes, se yerga hasta el fin de las aguas profundas y en los pantanos. Triste estará Ix Dziban Yol Nicté, La-flor-de-corazón-pintado, durante el transcurso del katun, porque otro poder vendrá a manifestarse, poder nacido en el cielo. Esto acontecerá durante el transcurso del año tun 13 Kan entre los años de 1593 y 1594.

Año [2º] 1 MULUC

Cuando se asiente 1 Muluc, Inundación, se hablarán entre sí las montañas sobre la redondez de la tierra, por sobre Uuc Chapat, Siete-ciempies-escolopendra.² Siete será su carga, de siete grados su sobrecarga. En este segundo año tun se perderán las bragas-ceñidores, se perderán las ropas, ropa será de generaciones estériles. Arrebatado será su pan, arrebatada el agua de su boca.

Año [3º] 2 Ix

2 Ix, Jaguar, será el tiempo de la pelea violenta, el tiempo en que arda el fuego en medio del corazón del país llano, en que ardan la tierra y el cielo; en que haya de tomarse el espanto como alimento; el tiempo en que se implore a los cielos. Perdido será el pan, perdida la limosna; llorará Cuy, Lechuza,

lloverá Icim, Buho, en los caminos vecinales por toda la extensión de la tierra, por toda la extensión de los cielos. Se alborotarán las avispas, se alborotarán los míseros en el imperio de Ah Bolon Yocté, El-nueve-pata-de-palo, Ah Bolon Kanaan, El-nueve-precioso. Decaída estará la faz de la sabana, destruidas las murallas. Será el tiempo en que se corte el linaje de los descendientes falsos cuando se yerga sobre la tierra, se yerga sobre el país llano, Buluc Ch'abtan, Once-ayunador, el hijo de Ah Uuceb, El-siete-montañas. A las orillas del mar tendrá abiertas sus fauces el terrible Ayin, Cocodrilo; tendrá abiertas sus fauces el maligno Xooc, Tiburón. Será el tiempo en que se amontonen las Xuxob, Avispas, sobre los restos del agua, sobre las sobras de alimento. Hasta el tercer doblez del katun reinará el 5 Ahau del tercer año tun.

AÑO [4º] 3 CAUAC

3 Cauac, Trueno, será el tiempo en que salgan de su pozo, de su gruta. Irán a solicitar su limosna, irán sus voces recorriendo la noche para mendigar su agua. ¿Dónde beberán su agua? ¿Dónde comerán siquiera sobras de pan? Sobrecojidos estarán sus corazones por Ah Uucte Cuy, El-siete-lechuza, Ah Uucte Chapat, El-siete-ciemplés-escolopendra. Será el tiempo en que se coman árboles y se coman piedras. Llorarán los del pozo, llorarán los de la gruta. Pero la Flor de Mayo se señalará y de Flor de Mayo será el pan cuando tome su carga el tercer año tun, del trece Ahau. Buluc Ch'abtan, Once-ayunador, será el que quite la carga del 9 Ahau cuando termine de ir golpeando con su carga cabeza abajo al terminar de reinar. Así acontecerá en el 3 Cauac, Trueno.

AÑO [5º] 4 KAN

4 Kan, Piedra-preciosa, será el día en que decline el Katun 5 Ahau. Será el tiempo en que se amontonen las calaveras y lloren las Moscas en los caminos vecinales y en los descansaderos de los caminos vecinales. Cuando se alce su poder, llorará Cuy, Lechuza, llorará Icim, Buho, llorará Ah I, Cuculillo. Vendrá la mofa al maligno Xooc, Tiburón; hundidos estarán los árboles, hundidas estarán las piedras. Cuando esté presente Ah Uuc Chuah, El-siete-alacrán,³ arderá la cara de la tierra, y croarán las ranas Uo al mediodía en sus pozos. El 4 Kan, Piedra-preciosa, tomará su palabra cuando venga el otro poder sobre el Jaguar blanco, sobre el Jaguar rojo, sobre Maycuy, Tecolote-venado, cuando en el quinto año tun del 5 Ahau venga Al Buluc Ch'abtan, El-once-ayunador, a decir la palabra del Sol, la palabra que surgirá del signo jeroglífico para que acontezca el llanto de los grandes Itzaes, Brujos-del-agua. Entonces dirá su carga, cuando rija el hilo del día y de la noche. Entonces será cuando se devoren entre sí las Zarigüeyas-ratones, y los Jaguares, cuando llegue este nuevo poder en el 4 Kan, cuando se mueva el cielo y se mueva la Tierra, cuando se arrimen entre sí el Sol y la Tierra sobre el Petén, país llano, ombligo del katun. Cuando llegue, esto será lo que merezca el tiempo del katun.

AÑO [6º] 5 MULUC

5 Muluc, Inundación, será el tiempo en que tome camino, en que desate su rostro y hable y vomite lo que tragó y suelte su sobrecarga el 5 Ahau en 5 Muluc. Entonces será el tiempo en que haya pan de maíz aun más allá de la provincia; sólo reinará

el poder del agua según declara su palabra. Licenciosa será su carga y despótico su imperio; presente estará en el pantano, presente en los charcos. Flor de Mayo será la bebida en el día, en la noche, en el agua profunda, sobre la faz del mundo, cuando reine totalmente. Entonces saldrán de su pozo y de su gruta. Así acontecerá a los Itzaes, Brujos-del-agua, cuando se alcen del rigor de su miseria y salgan por las tierras boscosas y los pedregales a decir su palabra a la justicia del Sol, a la justicia del katun.

AÑO [7º] 6 Ix

6 Ix, Jaguar, será el tiempo en que caiga el orden de las unidades del katun, cuando sea el despojar-se de bragueros-ceñidores, el despojarse de ropas, días de ayuno y penitencias.⁴ Será entonces el tiempo en que contemple el cielo desde la faz de la tierra el Jaguar; habrá llegado el tiempo en que las pléyades sean vistas por el que tiene la Estera y por el que tiene el Trono; el tiempo en que vomite lo que tragó, lo que pasó por su garganta cuando todavía no se le obstruya con las limosnas que reciba, cuando traicionen los hijos de Ah Maax Cal, El-Mono-vocinglero. Cuando voltee sus bragas Maax Kin, Mono-del-sol, Maax Katun, Mono-del katun, estantigua, monigote del mundo. Cuando digan su palabra los de las bragas rojas por el norte y por el poniente, y cuando se venda a los hijos de Uuc Suhuy Sip, Siete-virgen-ofrenda.

Licenciosa será la palabra, licenciosa la boca. Será el tiempo en que se haga música en la tierra y sue-
nen las sonajas en el cielo al irse ordenando las unidades de que consta el tiempo del katun. Pero a la vuelta completa del katun se desgarrarán, se

romperán violentamente los cielos, y las nubes quedarán frente al Sol juntamente con la Luna, totalmente.

A nadie haz de entregarte tú, huérfano de madre, tú, huérfano de padre,⁵ en el doblez del término del katun. Perdido será el signo jeroglífico y perdida será la enseñanza que está detrás de él; entonces será cuando se recoja la hojarasca de encima de nosotros y se quiten los bragueros-ceñidores y la ropa, y no se presten máscaras ni casas.

AÑO [8º] 7 CAUAC

El 7 Cauac, Trueno, será el octavo año tun en Uno Poop, Estera, cuando sea el doblez. Entonces será cuando tome tizne Maax Kin, Mono-del-sol, Maax Katun, Mono-del-katun, y sea el amontonar calaveras, y sea cuando se desgarran las espaldas mutuamente los Jaguares rojos; el tiempo en que se les destrocen los dientes y el tiempo en que se le zafen las garras al Oso Melero Cabcoh. Hincado estará de rodillas y pondrá a la vista las plantas de sus pies y de sus manos, deseando pan, ansiando agua. Rabioso estará el rostro de Buluc Ch'abtan, Once-ayunador, cuando se levante y apague con fuego lo que reste de los Itzaes, Brujos-del-agua, en el tercer doblez del katun.

AÑO [9º] 8 KAN

8 Ahau en Uno Poop, Estera, noveno año tun del Cinco Ahau. Será el tiempo en que se esté encucillado en su gruta porque arda lo alto de los cerros, y arda la superficie de la tierra, y ardan los barrancos, y se encienda el fuego en los grandes zacatales, y ardan las orillas arenosas del mar, y ardan las

semillas de la calabaza Sicil y ardan las semillas de la calabaza K'um; y arderá también el Macal, Name, en este término del katun. Será en Ichcaansihó, Faz-del-nacimiento-del-cielo, donde se encoja para soportar su carga Ah Itzam, El-brujo-del-agua, en donde reciba carga dura y dolorosa. Estallarán las lajas, silbará la perdiz, silbará el venado en la faz de la sabana. Esparcida será Ix Kan Itzam Thul, La-preciosa-bruja-del-agua-a-chorros, en las sabanas, en las montañas, a la vista de los sabios; presente estará Ah May Cuuc, El-venado-ardilla, presente estará en las montañas en este tiempo del katun. Blanqueada será la carga del año, blanqueada la ropa, blanqueados los bragueros-ceñidores.

Tendrá agua para que beba y pedirá a gritos su lugar en los restos del Sol, el Buluc Ch'abtan, Once-ayunador, en el oncenno tun. En el oncenno año tun acontecerá.

AÑO [10?] 9 MULUC

9 Muluc, Inundación, en Uno Poop, Estera. Entonces tomará nombre el 5 Ahau y dirá su palabra Ah Uuc Yol Sip, El-siete-corazón-ofrenda.⁶ Entonces será la época en que se multipliquen los recién nacidos y se multipliquen los mozos; será el tiempo en que engendren los ancianos y conciban las ancianas. Tiempo será de muertes, destructor será el poder en toda la redondez de la tierra de Maax Kin, Mono-del-Sol, Maax Itzaob, Mono-de-los-Itzaes-brujos-del-agua. Entonces será el imperio de Tzintzin Coc Xul, Concha-de-tortuga-musical-de-vara, y de Tzintzin Bac Toc, Hueso-musical-tostado, los de llo-roso rostro, los de rostro descarnado. Ensangren-tados quedarán los caminos al norte y al poniente. Con la mirada en alto, erguido el cuello, estará Ahau

Can, Serpiente-Señor. Alzado tendrá el palo, alzada la piedra sobre su madre y su padre Ah Uuc Yol Sip, El-siete-corazón-ofrenda, el siete grados envidioso, el siete grados pedigüeño y mendigo. De doble culpa será el rostro del katun. El regocijo y el desorden serán manifiestos, pero cuando termine, diferente será lo que se manifieste a la juventud recorriendo la noche, recorriendo el día por la superficie de los cielos cuando venga el noveno año tun.

Año [11?] 10 Ix

10 Ix, Jaguar, en Uno Poop, Estera, del 5 Ahau. Bajarán del cielo los abanicos y los ramilletes celestiales para que huelan los Señores. Apuntará con el dedo, se erguirá el día que tome posesión de su imperio, del vaso, del Trono, de la Estera, del Banco, Amayte Ku, Cuadrado-deidad. Cuando se siente a comer arrebatará el poder, arrebatará el vaso, arrebatará el plato; así se declarará en la superposición de los años tunes, cuando sea el tiempo en que su Estera y su Trono cambien y salgan por las tierras boscosas y por los pedregales a decir su palabra y su enseñanza.

Nacerá entonces otra jícara en la cual beba, y el día en que desate su rostro, amarga será su jícara, amarga será su bebida cuando venga el orden a las Esteras y beba el Jaguar de otra agua y sea Pilttec [*Piltzintecuhli*] quien reciba la limosna cuando las serpientes se anuden unas a otras de las colas. Entonces Ah Uuc Yol Sip, El-siete-corazón-ofrenda, Ah Toc Dzudzil, El-bastardo-marchito, conocerán el fuego. Perdida será su agua y perderá por arrebatamiento el resto de su Estera, de su vaso y de su plato, cuando impere la durísima rodilla⁷ del Ah Kin, Sacerdote-del-culto-solar, de Ah Coctun Numya,

El-pedernal-que-da-desgracia-y-dolor. Cuadrado será entonces el rostro del padre de los Señores de la Estera y del Trono, los que darán su lugar al cielo. Esto será lo que contemple Buluc Ch'abtan, Once-ayunador: cómo el alma de Ah Siyah Tun Chac, El-Chac-de-los-manantiales-labrado-en-jade, llora totalmente al tiempo del regreso del katun; cómo llora Ahau Tun, Señor-de-jade, Ah Nitoc, El-bastardo-narigudo, Ah Ni Poop, El-de-la-nariz-como-estera, Ah Maycuy, El-tecolote-venado. Será entonces el amanecer y la bajada de Ah Kinchil, El-de-rostro-solar, Ah Chac Chibal, El-gran-devorador-de-carne.

Será en el 10 IX cuando lleguen los grandísimos padecimientos y miserias para los Itzaes, Brujos-del-agua, y de todos sus hijos, aquí en la provincia de Siyancan Mayapan, La-famosa-del-estandarte-venado; allí será cuando se acaben y consuman. Al fin del año tun 10 IX, vestirá cortezas y sentirá la sobrecarga Yal Maax, Generación-de-Monos; resellado será el tronco de la ceiba y suspendidas estarán las cazuelitas de barro cuando le toque pedir su limosna a Ah Piltec [*Piltzintecuhli*]; cuando venga a tomar su limosna de los mendigos, del miserable, cuando tome su limosna en los caminos vecinales, en los descansaderos de los caminos vecinales. Entonces será cuando baje la carga a las montañas y a Maycuy, Tecolote-venado. Acontecerá aquí en Mayapan, Estandarte-venado, aquí en May Ceh, Pezuña-del-venado, en Xau Cutz, Garra-del-guajolote-silvestre; aquí pasará todo hasta el fin. Éste es el katun en que danzará Chac Dzidzib, Pájaro-cardenal, Chactun Pilix, Cola-roja, en la mesa pétrea, la que está en medio de la llanura; así ocurrirá en el katun porque son éstas las aves que anuncian al Halach Uinic, Jefe. Será cuando brinque y dé volteretas el Quetzal, el pájaro verde Yaxum, el ave

de los Señores. Terminará entonces el poder de Buluc Am, Once-piedra-labrada. Aquí será cuando acabe May Ceh, Pezuña-del-venado; acabará todo y dirán: "Pasó aquí el pueblo de los Itzaes, Brujos-del agua."

Les había sido dicho por *Moctezuma Utunil Itzaob*, *Moctezuma-la-piedra-labrada-de-los-brujos-del-a-g-u-a*, porque Ah Buluc Am, El-once-piedra-labrada,⁸ era el nombre que le daban, que en aquel katun se irían, porque en ese katun pasó lo de Hapai Can, Serpiente-tragadora.⁹ Fue entonces cuando se amontonaron unas con otras y gritaron las Bech'ob, Codornices, en la rama de la ceiba.¹⁰ Será entonces el fin de la mendicidad y de la codicia en la época del 5 Ahau, será entonces cuando se asiente boca arriba el vaso y se extienda la Estera y será cuando el gobierno se cambie a los Ah Kines. Secerdotes-del-culto-solar. Entonces cambiarás tus bragas-ceñidores, cambiarás tu ropa, cambiarás tu vestido. Esta será la carga del oncenno año tun cuando salgan de su pozo, de su gruta.

AÑO TUN [12º] 11 CAUAC

11 Cauac, Trueno, en Uno Poop, Estera, el decimoséptimo año tun. Este será el tiempo en que impere Ah Cakin Poop, El-de-la-Estera-de-dos-días, y Ah Cakin Dzam, El-del-Trono-de-dos-días. Asentado estará el vaso de Ah Okol Koh, El-de-la-máscara-que-llora, porque se erguirá Ah Koh Bacab, El-vertedor-de-la-máscara, Ah Cantzicnal, El-de-los-cuatro-rincones, cuando venga. En el decimoséptimo año tun del katun, visible estará Ah Cantzicnal, El-de-los-cuatro-rincones, Ah Can Ek, El-cuatro-oscuridad,¹¹ Ah Sac Dziu, El-tordo-blanco. Será el tiempo en que se manifieste Ah Cantzicnal, El-de-los-cuatro-rinco-

nes, y tome su oficio Ix Tol Och, La-ventruda-zari-güeya; será el tiempo en que el katun remoje la corteza para el vino; pero en el once Xul, entonces saldrá otra palabra, otra enseñanza, y se implorará entonces a Ku Caan, La-deidad-del-cielo, y será entonces el tiempo en que las serpientes se unan unas a otras por la cola y se tomen nuevas bragas-ceñidores y nuevas ropas y nuevos Señores de la Estera y nuevos Señores del Trono a la faz del cielo.

El reinado que viene ahora en camino tomará el oficio de Chac Bolay Can, Gran-carnicera-serpiente, Chac Bolay Ul, Gran-carnicero-caracol-terrestre; será cuando se manifieste el Itzá, Brujo-del-agua, en el Corazón del Monte, en el corazón de la maleza, y cuando grite el alma de Siyah Tun Chac, Chac-labrado-en-jade-de-los-manantiales; serán los días de miseria en el katun por el exceso de dolor que hagan sufrir los hijos de los Itzaes, Brujos-del-agua, a los hijos del día, los hijos de la noche. Entonces será el tiempo en que se amontonen las Xux, Avispas, arriba de los árboles y de la maleza, y se amontonen las Chac Uayab Cab, Rojas-dañinas-hormigas-mele-ras, sobre vosotros los abejas Ah Num y los abejas Sactanil.

AÑO [13º] 12 KAN

12 Kan, Piedra-preciosa, en Uno Poop, Estera. En el decimotercero año tun será el día que diga su palabra el Sol, cuando se hablen mutuamente los zopilotes; los hijos del día a los hijos de la noche, en el cielo y en la tierra; será en este decimotercero año tun cuando ardan los cielos, y la tierra tenga fin de la codicia. Así ha de suceder por el exceso de soles; y vendrán los ruegos a Hunab Ku, Deidad-única, para que su majestad tenga compa

sión. Siete serán los años de sequía: estallarán entonces las lajas, arderán los nidos de las aves arriba, arderá la savia del zacatal en la llanura y en los barrancos de la sierra. Entonces volverán a la gruta y al pozo a tomar su comida de espanto, y entonces rogarán a los Ah Kines, Sacerdotes-del-culto-solar, que se ajusten la preciosa manta a la espalda, con el cinturón de trece nudos. Cuadrado será entonces el rostro del Ah Kin, Sacerdote-del-culto-solar, cuando en este katun entren de nuevo a su pozo, a su gruta, y hagan más intensas sus imploraciones en la gruta, y den muerte martirizándolo al Señor que tiene la Estera, que tiene el Trono, como fin de la codicia y el robo; será cuando regresen a su gruta, a su pozo de nuevo y venga nueva sabiduría, nueva palabra. Así lo dijo el gran Chilam Balam, Brujo-intérprete. Así como puede suceder puede no suceder, pero lo verán por detrás y por delante los del linaje de los Itzaes, Brujos-del-agua, en la gravísima miseria que se asentará y acontecerá en la tierra Sacnichteil Mayapan Cuzamil, Lugar-de-las-golondrinas, Estandarte-venado, Lugar-de-la-flor-de-mayo-blanca; cuando les acontezca en la boca del pozo, en la boca de la gruta y en la extensión de las sabanas. Será el tiempo en que se desbaraten las albarradas y venga la destrucción sobre la grandeza del mundo, sobre la superficie de las montañas por la avidez del Maax Kin, Mono-del-sol, del Maax Ah Itzá, Mono-de-los-Itzaes, Brujos-del-agua. Entonces será cuando diga su palabra el sin padre y el sin madre en el tiempo del katun, en que diga su palabra el linaje Itzá, Brujo-del-agua, durante el cinco Ahau en el decimotercero año tun, cuando acontecerá la adoración de Sum Ci, Cuerda-de-henequén,¹² como divisa que ha de admirarse en el katun. Reirá la Máscara de Madera. Cuatro

serán sus vasos asentados, cuatro serán sus platos asentados, cuatro serán sus bancos asentados en el 5 Ahau Katun, en el decimotercero año tun.

AÑO [14º] 13 MULUC

El decimocuarto año tun 13 Muluc, Inundación, en Uno Poop, Estera. Uno Oc será el día en que el poder baje de la Estera y baje del Trono. En el decimocuarto año tun será cuando venga el gobierno de muchos en los restos de la sabiduría. Grandes serán sus jícaras, grandes sus vasos, grandes sus platos en los que tomen en común las sobras de agua que andan pidiendo de limosna, las migajas de las sobras del pan de maíz, las sobras de la limosna, eso será lo que coman en común. En este 5 Ahau Katun estará presente el enorme Ayín, Cocodrilo; entonces será cuando se asiente la presencia de Ho Habnal Tok, Cinco-pedernales-afilados, en el katun. Sucederá en Chacnacultun Ichcaansihó, Lugar-de-los-grandes-montones-de-piedras-labradas-recostadas, Faz-del-nacimiento-del-cielo, Saclactun, Piedras-blancas, en medio de la llanura, en el corazón de Chakan, país llano. Será el tiempo en que el katun señale con el dedo la provincia Itzá, Brujo-del-agua; caerá en el centro de la llanura, buscarase entonces a los hijos del día y a los hijos de la noche. Como puede no suceder, puede suceder. Ésta es la palabra para ti, el sin madre; para ti, el sin padre.

AÑO [15º] 1 IX

El decimoquinto año tun en Uno Poop, Estera, en el katun. Entonces será cuando se encrespe Ah Xixteel Ul, El-rugoso-caracol-de-tierra, juntamente

con el maligno Xooc, Tiburón, porque el fuego les pegará y será entonces cuando se anuden unos a otros los tiburones de la cola, y pegue el fuego en el cielo y en las nubes. Será entonces cuando se mueva el cielo y se cubra la faz del Sol y se cubra la faz de la Luna. En este decimoquinto año tun morirá Xiuit, Yerba,¹³ para la Máscara de Madera, porque insolente fue con su madre, insolente fue con su padre e insolente fue su numeroso linaje de infantes y mozos. Morirán sus restos de Halach Uiniques, Jefes; no tendrá ya sustitutos la nobleza ni tendrá sustitutos el jade, piedra preciosa. Morirá el maligno Xooc, Tiburón. Será entonces cuando se padezca y cuando se amontonen las calaveras. Nadie volverá a pensar en días festivos y de regocijo durante el katun, cuando desaparezcan los Itzaes, Brujos-del-agua, por el norte y por el poniente; porque discordia y oposición devoran los jaguares de los cerros. En el decimoquinto año tun será el padecimiento del katun cuando vengan las Xulab, Hormigas-carniceras, y las Chacuayabcab, Hormigas-carniceras-meleras, a causar la ruina de los del pozo, la ruina de los de la gruta, para que caiga la carga de su Halach Uinic, Jefe. Así lo dicen las sagradas pinturas y signos que los Ah Kines, Sacerdotes-del-culto-solar, vieron en las piedras enhiestas, estelas de los katunes, cuando examinaron cómo venía la carga del katun que libraría a Hun Ahau, Uno-señor, cuando les dio a leer el libro de los siete linajes a los idólatras de Ah Buluc Am, El-once-piedra-labrada. En el decimoquinto año tun acontecerá. Perdidos serán entonces los Batabes, Los-del-hacha, advenedizos, y caerán de su cargo los Halach Uiniques, Jefes, advenedizos, en el decimoquinto año tun.

El decimosexto año tun día 2 Cauac, Trueno, en Uno Poop, Estera, serán medidos los katunes porque es el fin del 5 Ahau. Bajarán entonces navajas, bajarán piedras y estará patente la cuerda y la flecha en este decimosexto año tun. Entonces andarán a cuatro patas en sus milpas, a causa de la mirada de águila de Ah Tzay Kanche, El-certero-escabel, Ah Kay Kin Bak, El-que-vende-carne-de-día, Ah Tooc, El-quemador, Ah Dzuudz, El-enjuto. Entonces será cuando termine de molerse el jade, termine de molerse la piedra preciosa. Y se pudrirán las flechas cuando esté presente Kinich, Rostro-del-Sol, con Buluc Ch'abtan, Once-ayunador, para contemplarlos. Asentado estará su linaje sobre los dominadores extranjeros, sobre los del vestido de fiesta de los cerros. No tomarán ya su limosna las Ix Titibe, Maestras. Entonces será el tiempo de la muerte súbita, la que pega y derriba, la que derriba y golpea sacando vómitos de sangre, la que ablandará las amarras del katun. En 5 Ahau caerá este katun y en este mismo año será la destrucción de las milpas del Itzá, Brujo-del-agua. Atado quedará a un árbol Co Kin, Burla-del-Sol,¹⁴ del Itzá, Brujo-del-agua; no caminará de día ni caminará de noche, sino que vuelcos dará el corazón del burlador del katun. Será entonces cuando le sean quitadas sus insignias a Ah Cantzicnal Bacab, El-vertedor-de-los-cuatro-rincones, entonces acabará su poder en el 2 Cauac, Trueno, cuando tiemble la tierra y salga de cabeza el katun, el katun de Ix Tol Och, La-ventruda-Zari-güeya, de la cuenta del juego del katun. Esto se entenderá si hubiere un Ah Kin, Sacerdote-del-culto-solar, con alma íntegra y santa.

AÑO [17º] 3 KAN

El decimoséptimo año tun 3 Kan, Piedra-preciosa, en Uno Poop, Estera, ata la carga del katun. Vendados también tendrán sus rostros los Señores de la tierra durante su reinado porque no conocerán el juego del Katun 3 Kan. Despojados serán de sus manchas los jaguares rojos y los jaguares blancos, arrancadas les serán las uñas y los dientes a los jaguares de los Itzaes, Brujos-del-agua. Esto será cuando vengan grandes inundaciones y poderosos vientos y patente esté el rostro de Ku, Deidad, en la Estera y en el Trono y vaya y contemple su imagen en el árbol y en la piedra, y se marchen su Jícara y su Banco y su Estera, cuando tome su camino el 3 Ahau y venga el cambio de poder en su reinado y se cambien los Ah Kines, Sacerdotes-del-culto-solar, en el cambio del katun, y venga el cambio del vaso y el cambio del plato y el cambio del gobierno, cuando se unan los Ah Mol Box, Los-juntadores-de-cortezas-para-preparar-el-vino-ceremonial,¹⁵ al venir otra palabra, otro poder por el norte y por el poniente. En el decimoséptimo año tun regresará nuevamente al país el reinado del Katun 5 Ahau por detrás y por delante.

AÑO [18º] 4 MULUC

El decimoctavo año tun 4 Muluc, Inundación, es el tiempo en que el katun se agrega a otro, el tiempo en que se hace un conjunto de katunes para enterrarlos. Blanquearán entonces los huesos porque éstos serán años fieros y amontonará calaveras Ah Ox Kokol Tzek, El-tres-amontonador-de-cráneos, el barredor del país llano. Asolarán el país soles excesivos y muertes súbitas, días de sed, días de hambre. Faltará el agua, se secarán los manantiales y

las venas de la tierra. Ensangrentados quedarán los caminos, ensangrentados quedarán los descansaderos, gritará la gente a la puerta de sus poblados por causa de Buluc Ch'abtan, Once-ayunador. Buluc Chuen, Once-mono-artífice, será el patrono en el poder. Llorará Ku, Deidad, llorará el mundo; será cuando recuerden sus linajes maternos y sus linajes paternos y los tres dobleces de katun pasados desde que murieron perdidos en los bosques y bajo las malezas por causa del poder del Sol según sus historias y tradiciones. Así ocurrirá en el decimo-octavo año tun, así aparecen los signos en el libro de los siete linajes que vio el Ah Kin, Sacerdote-del-culto-solar, Chilam Balam, Brujo-intérprete, cuando leyó la rueda de los katunes en compañía del Ah Kin, Sacerdote-del-culto-solar, Napuctun, Piedra-labrada-de-línea-materna-llamada-Puc, Ah Kin, Sacerdote-del-culto-solar, de Hun Uitzil Chac, Uno-chac-de-las-montañas, de Uxmal. Eso fue lo que dedujo de los signos pintados en el libro, según su entender, el Ah Kin, Sacerdote-del-culto-solar, Ch'el, gran autoridad. Allí vieron cómo caería la carga según dijo el Chilam Balam, Brujo-intérprete, que estaba ordenado por Hunab Ku, Única-deidad, Oxlahun ti Ku, Trece-deidades, que caería un año de reyertas y un solo pleito se oiría, según la explicación que dan los signos pintados. Podrá ser o podrá no ser lo que ocurrirá sobre los árboles de Chapat, Ciempiés-escolopendra. Si nos aconteciese a nosotros, ocurriría sobre el pan de maíz y sobre el agua, porque inmensa es la carga de este katun según aparece en los signos del libro y del katun, por el norte y por el sur del mundo. Aquí en Mayapan, Estandarte-venado, se hará espantable Ah Uuc Chapat, El-siete-ciempiés-escolopendra, y se hará espantable Ah Uuc Yol Sip, El-siete-corazón-ofrenda.

Llega la carga del 5 Ix en el decimonoveno año tun en la agonía del katun cuando se ata la carga del 5 Ahau, cuando pasa Ah Cap Uah Tun, El-que-ordena-los-tunes, con su exceso de miseria. Entonces será cuando resuenen los instrumentos musicales de madera que se golpean y hable Ix Tan Yol Ha, La-que-está-en-el-corazón-del-agua. Será el tiempo en que se burle a sí misma Ix Tol Och, La-ventruda-zarigüeya, por el cambio de palabra y de asiento. En el decimonoveno año tun hablará Ah Uuc Tut, El-siete-de-la-ocarina, cuando retornen al país los Itzaes, Brujos-del-agua, y camine la estatua con máscara de cera y sea el colmo sangriento de Ix Tan Yol Chulul, La-que-está-en-el-corazón-del-agua-llovediza. Atrás quedarán los Señores estériles al término del poder porque otros Señores erigirán otro vaso y otra ropa con que azoten y descompongan la Máscara de Madera. En el 11 Ahau será el disputar la Estera; cuando las Máscaras de Madera se miren cara a cara, al término de la burla y de su apresamiento en los dos días, en los tres días del regreso al pozo y a la gruta, a la vuelta al ayuntamiento carnal en los linajes. El golpe seco de las tibias señalará el retorno de su poder, la vuelta del Itzá, Brujo-del-agua, a causa del dolor excesivo y de la sed excesiva; regresarán pidiendo sus lugares y sus nuevas grutas. Será cuando tiemblen los cielos y la tierra y retumben Chaac, Lluvia Ix Chuah, La-llenadora, en el pozo y en la gruta. Retrocederá la Máscara de Madera para ser la burla del bellaco rojo, para ser la burla del bellaco blanco. Ah Maben Tok, El-de-la-caja-de-pedernal, será el poderoso del katun.

6 Cauac, Trueno, es el día del vigésimo año tun; llega el tiempo en que se toma de la mano. Durante su transcurso habrá muerte súbita y disputas de Ah Uucte Cuy, El-siete-tecolote, Chacmitan Choc, Gran-podredumbre, cuando se golpeen los katunes. A la orilla del mar estará Ah Maycuy, El-tecolote-venado; en Dzidzontun, Lugar-de-las-piedras-puntudas-como-pezuñas; y Chac Hubil Ahau, Señor-muy-revoltoso, en Sihomal, Lugar-de-amoles. Será el tiempo en que se extiendan las tripas de Kukulcan, Serpiente-quetzal, será el katun en que recule Ah Chichic Soot, El-que-agita-la-sonaja; agitará la sonaja pidiendo su limosna y llamando con la mano al vigésimo año tun. Sonará la sonaja por segunda vez en compañía de Ix Tan Yol Ha, La-que-está-en-el-corazón-del-agua, para que tome su limosna de lascivo semen recogido en las hijas y en los hijos de Tzintzin Coc Xul, Concha-de-tortuga-musical-de-vara, pero sólo dirán su palabra hasta el 6 Cauac, Trueno, porque entonces se levantará Amayte Ku, Cuadrado-deidad, y se extenderá sobre la ceiba el Quetzal, y se arrojarán los restos del katun echando por delante a los lisiados y corcovados y por atrás al maligno Xooc, Tiburón. Entonces se hará presente Ah Piltec [*Piltzintecuhli*] a tomar su limosna. Por el poniente será que se encuentren y se devoren entre sí y al terminar el poder del 5 Ahau se yerga para ser reverenciado. En el vigésimo año tun acontecerá el apresarse los unos a los otros. Profunda cosa es decir lo que está en la sobrecarga del katun.

AÑO 7 KAN

7 Kan, Piedra-preciosa, es el día del término y camino del katun que tiene la Estera y el Trono. Dejará el vaso colmado de miseria el katun. Grande será el hambre que erija Ah Uaxac Yol Kauil, El-ocho-corazón-sagrado, cuando llegue su tiempo al katun y cuatro caminos se formen en el cielo, y se abra la tierra, y el cielo se volteee al poniente y al oriente entristecido. Tal será la carga de su reinado. Vendado tendrá su rostro, perdido será el Trono y perdida la Estera cuando finalice el siete Kan al final del katun en el día de su muerte. Pero tendrá su pan y pedirá su pedernal de sacrificio, pedirá su limosna cuando se mueva el día 7 Kan, Piedra-preciosa.

CHEK OC KATUN. PISADA DEL KATUN

13 Oc, Coyote, será el día en que pise el katun al 2 Cauac, Trueno, cuando dé vuelta en el doblez del katun, cuando deje la Estera y el Trono y venga el cambio del vaso y del reinado, el cambio de la Estera y el cambio del Trono, cuando caiga la carga del 5 Ahau y mire hacia atrás para recoger su limosna. Sin vaso y sin Estera arrojará su poder y se levantará hacia otro mundo, pero esto sólo ocurrirá al final de la carga del katun sobre las divisiones de las ceibas en la tierra. Entonces llorará Mayapan, Estandarte-venado, Maycú, Tecolote-venado; asentará sus linajes en el pozo y en la gruta. Entonces será cuando haya muerte de venados [víctimas] por muerte súbita y gusaneras de Moscas, al fin de los katunes, en el doblez del katun.

U MUTIL CHUENIL KIN SANSAMAL O PRONOSTICOS DE LOS SIGNOS DIARIOS¹

Kan

Ix Kan, Señora-del-maíz. Rico también. Maestros de todas artes. Ix Kokobta, El-pájaro-Merula, es su anuncio. Los preciosos cantores, su ave. Chac Imix Che, El-árbol-de-la-ceiba-roja, es su árbol. Sabio.

Chicchan

Ah Tzab Ti Can, La-serpiente-del-crótalo, es su anuncio que viene juntamente con su árbol. Habin, El-ichtyomethia, es su árbol. De fuego es su ánimo. Malo es su destino. Asesino.

Cimi

Ah Cuy Manab, El-tecolote-agorero. Torpe su anuncio que viene con su árbol. Asesino. Muy malo su destino igualmente.

Manik

Ah Xop, El-loro, Ah Yaxum, El-pájaro-verde (Quetzal), Ah Uitz, El-de-la-montaraz, es su anuncio. El Cacao, el verdadero Cacao, es su árbol. Sangrientas sus garras. Malo también.

Lamat

Borracho. Disforme perro es su anuncio. De jaguar es su cabeza, de perro su trasero. Entrometido. Hablador. Dishonesto en el hablar. Experimentador de aborrecimiento mutuo. Sembrador de cizaña. Grande.

Muluc

Ah Xoc, El-tiburón, y Ah Balam, El-jaguar, son su anuncio. Devorador de sus hijos. Devorador de sus esposas. Mortecinos niños. Mortecinas esposas. Rico. Matador de zarigüeyas también.

Oc

Ah Cen, el-adornado; Ah Zuli, El-de-vida-regalada, son sus anuncios. Ix Kili, El-lorito-Conorus, es su ave, su anuncio. Adúltero. Desfalleciente. Sin juicio. Cizañero también. Sin entendimiento.

Chuen

Artífice de la madera. Artífice del tejer es su anuncio. Maestro de todas artes. Muy rico toda su vida. Muy buenas todas las cosas que hiciere. Juicioso.

Eb

Ah Uitz Dziu, El-serrano-tordito-de-ojos-colorados, es su anuncio. Rico cuya riqueza es de la comunidad. Buen rico. Lo de la comunidad es su hacienda. Dadivoso. Buen hombre. No será cicatero. Muy bueno.

Been

Ah Kauil, El-mendigo, es su anuncio. Ah Kuklis, El-pobre, es su anuncio. Mísero. Plebeyo. Pobre.

Ix

Bravo jaguar. Sangrienta su boca. Sangrientas sus garras. Carnicero. Devorador de carne. Asesino.

Men

Ah Dzunacat, El-alegre-y-regocijado, es su anuncio.

Maestro de todas las artes. Muy bueno. Hablará pronto. De palabra santa también.

Cib

Ah Sip, El-ofrenda (venado), es su anuncio. La-drón. Temperamento de cazador. Valiente. Ase-sino también. Sin buen destino. Malo.

Caban

Ah Colomte, El-pájaro-carpintero, es su anuncio. Sabio y prudente comerciante. Sangrador y cu-randero. Bueno. Juicioso.

Edznab

Sangrador de fiebres. Pedernal tallado. Toh, El-pájaro-momoto es su anuncio. Sano. Sangrador y curandero. Valiente.

Cauac

Ah Kukum El-quetzal, es su anuncio. Cuando es cargador de año anuncia enfermedad y miseria. El cacao es su árbol, el verdadero cacao. Muy imaginativo. Noble.

Ahau

Rapaz águila es su anuncio. Devoramiento y muerte de niños. Rico. Juicioso. Valiente. Bueno.

Imix

El pan de maíz. Nicté, La-flor-de-mayo, es su anuncio. Nicté, La-flor-de-mayo, es su árbol. El cometa es su anuncio. Pecador libidinoso. Des-honesto. El más bellaco hombre. Indeciso, dudoso.

Ik

Los vientos son su anuncio. Aire de muy bellaco.

Aire de cometa. Nicté, La-flor-de-mayo, es su árbol. Deshonesto. Hombre muy lascivo. Malo es su destino.

Akbal

Ah akbal Yalam, El-noche (estrellado)-cervatillo, es su anuncio. Mísero. Plebeyo. Sin porvenir. Pobre. Cazador.

JACULATORIAS DE LOS AH KINES*

PALABRAS DEL AH KIN NAPUCTUN

Palabras del Ah Kin, Sacerdote-del-culto-solar, Napuctun, Piedra-preciosa-de-línea-materna-llamada-Puc: "Arderá la tierra, se harán círculos en el cielo durante la potencia de Kauil, Deidad, que erguida estará en el tiempo que está por venir. Arderá la tierra, arderán las pezuñas en el katun que viene. Cuando diga su palabra sus almas lo verán y llorarán su miseria en el tiempo que viene, cuando sobrepujadas sean sus almas por el sufrimiento y reciba su galardón aquel que la sobrepasará con padecimientos".

* Estos textos, llamados "Las Profecías", han sido publicados por Lizana (1633 y 1893), Cogolludo (1688 y ediciones siguientes), Brasseur de Bourbourg (1857-59 y 1869-70: la primera vez da el texto de Lizana y la segunda el mismo de Lizana con traducción francesa), Castillo (1866: la versión de Cogolludo), Carrillo y Ancona (1870 y 1872: la versión del Pérez), Brinton (1868: da en inglés una versión basándose en las de Lizana y Brasseur), Charencey (1873: la versión de Lizana, la de Brasseur y la suya propia en francés), De Rosny (1875 y 1904: su propia traducción francesa, comparada con las de Lizana y Brasseur), Orozco y Berra (1880: la de Napuc Tun y parcialmente las otras), Carrillo y Ancona (1883: da una nueva traducción), Brinton (1882: la de Nahau Pech, que reproduce Troncoso, 1883, agregando la versión de Lizana), Brinton (1882c: la versión de Kauil Chel del Chumayel), Brinton (1890a: nuevamente la de Nahau Pech). Tozzer (1921, pp. 120-30) publicó un cotejo de las versiones de la de Chilam Balam que aparecen en los Libros de Chilam Balam de Tizimín, Chumayel y en Lizana, con traducciones de él mismo y de Martínez Hernández. Otros autores las han comentado o publicado par-

PALABRAS DE AH KAUIL CHEL,
SACERDOTE IDÓLATRA [sic]

Palabras de Ah Kauil Ch'el, El-santo-Ch'el: "Salen las pinturas del katun, ¡oh padre! No habrá quien entienda cómo vienen; ni aun quien las puso en la rueda de los katunes, ¡oh padre! El rigor de la miseria vendrá para el norte y para el poniente cuando esto sea, ¡oh padre!; ¿quién será el Ah Kin, Sacerdote-del-culto-solar, el Bobat, Profeta, que pueda explicar el sentido de los signos, oh padre, aquellos que caen dentro del 9 Ahau? No se entenderá en toda la extensión del mundo. ¡Con qué regocijo reinabais antes y cómo lloraréis vosotros los que señoreáis la tierra! Tenedlo presente, ¡oh Itzaes, Brujos-del-agua!"

PALABRAS DE NAHAU PECH,
GRAN SACERDOTE [sic]

"Cuando se entienda ese tiempo, ¡oh padre!, llorarán los poderosos, será en el tiempo del cuarto katun cuando venga la verdadera ofrenda, cuando sea el día de Ku, Deidad. Entonces será cuando recordemos llorando lo que te entregamos a ti, ¡oh padre!

"Mirad ya en el camino a vuestros huéspedes, los Itzaes, Brujos-del-agua; ellos serán los amos y señores de la tierra cuando lleguen; considerad esto, ponedlo en vuestro entendimiento, os lo dice Nahau Pech, Garrapata-de-línea-materna-llamada-Hau, Ah Kin, Sacerdote-del-culto-solar. Hacia el fin del

cialmente. Recientemente han sido publicadas las versiones del Libro de Chilam Balam de Chumayel en Médiz Bolio (1930) y en Roys (1933), quien llama a estos textos Profecías de una Nueva Religión (cf. Tozzer, 1921, pp. 192-94).

katun, ¡oh padre!, perdidos serán los Sinic Uinic, Hormigas-hombres, perdidos serán los que vigilan el sustento, los que husmean el sustento, las aves de rapiña del sustento, las Siniques, Hormigas, los Dz'iués, Torditos-de-ojos-rojos, los Kaués, Tordos-grandes, los Piches, Tordos-negros, los Xpuciles, Ratonés-domésticos!"

PALABRAS DE NATZIN YABUN CHAN, AH KIN

"Acontecerá la palabra de Hahal Ku, Verdadera-Deidad, en el Petén, País-llano. Ésta es la enseñanza que muestra, el provecho que dará, ¡oh padre!: Los Ah Kines, Sacerdotes-del-culto-solar, serán los destructores en el tiempo que viene; consideradlo, ponédlo en vuestro entendimiento. El rigor del fuego vuestras almas lo recibirán verdaderamente. Apartaos ya, dejad ya a vuestras deidades, Itzaes, Brujos-del-agua, olvidaos ya de vuestras perecederas y miserables deidades; postraos en adoración de Hahal Ku, Verdadera-deidad, la poderosa sobre todas las cosas, ¡oh padre!, la creadora del cielo y de la tierra en toda su extensión. Dolorosas han de serte mis palabras, ¡oh Maya Itzá, Brujo-del-agua-maya!, a ti que no quieres oír de otro Dios [sic], a ti que crees que tus deidades valen, pero habrás de creer las palabras de mi prédica!"

PALABRAS DE CHILAM BALAM, AH KIN,
QUE ES CANTOR EN CABALCHIÉN MANÍ

"El 13 Ahau es cuando se asentará el katun que será el tiempo de los Itzaes, Brujos-del-agua, que será el tiempo en que esté erguido el Itzá, Brujo-del-agua, en el medio de los pueblos, ¡oh padre! La señal de Hunab Ku, Única-deidad del cielo, se hará

manifiesta con el Uaom Ché, Madero-enhiesto,¹ que se mostrará al mundo cuando sea el amanecer, ¡oh padre! Acabadas serán las contiendas, acabadas serán las perfidias cuando llegue el mensajero de la señal de Ku, Deidad, en el tiempo que venga.

"A la distancia de un grito, a la distancia de una jornada están ya, ¡oh padre!, los hombres Ah Kines, Sacerdotes-del-culto-solar. ¡Veréis entonces al ave sobresalir por encima del Uaom Che, Madero-erguido, en el despertar del mundo en el norte y en el poniente! ¡Despertad ya a Itzamná Kauil, Sagrado-brujo-del-agua! Adorad ya la señal de Ku, Deidad, en el tiempo que venga.

"A la distancia de un grito, a la distancia de una jornada están ya, ¡oh padre!, los hombres Ah Kines, Sacerdotes-del-culto-solar. ¡Veréis entonces al ave sobresalir por encima del Uaom Che, Madero-erguido, en el despertar del mundo en el norte y en el poniente! Despertad ya a Itzamná Kauil, Sagrado-brujo-del-agua, que ya viene vuestro padre, ¡oh Itzaes, Brujos-del-agua! Vienen ya vuestros Hermanos Mayores, los de las piedras jades; recibid a vuestros huéspedes los de las barbas, los del oriente, los que traen la señal de Ku, Deidad, ¡oh padre!

"Bueno es el poder de Ku, Deidad, que viene a nosotros a vivificarnos, no atemorices al mundo, ¡oh padre!, tú que eres Hunab Ku, Única-deidad, el creador, nuestro creador; bueno será tu poder, Ku, Deidad, ¡oh padre!, cuidador de nuestra alma, el que al recibirnos no recibe sino lo que él mismo crea, el que tiene al cielo tras de él! ¡Entonces será el tiempo y el comienzo de la humanidad del signo Dos Sol, erguid su señal ahora, contemplad su señal ahora, levantad el Uaom Che, Madero-enhiesto!

"El cambio que hoy se anuncia, el sustituto que se muestra tras la ceiba al mundo, es la señal de

Hunab Ku, Única-deidad, la que viene de los cielos, la que habréis de adorar, ¡oh Itzaes, Brujos-del-agua! Adorad ya la señal de Ku, Deidad, la del cielo, poned vuestra voluntad para adorarla, adorad a Hahal Ku, Verdadera-deidad, creed en el poder de Hunab Ku, Única-deidad del cielo, que viene a hablarnos, avivad vuestros corazones, ¡oh Itzaes, Brujos-del-agua! Amanecerá el mundo para los que crean en él dentro del otro katun, ¡oh padre!; llanto es mi palabra, yo, Chilam Balam, Brujo-intérprete, al explicar la palabra de Hahal Ku, Deidad-verdadera, a todo el mundo cuando voy por todas las provincias de la tierra explicando la palabra de Hahal Ku, Deidad-verdadera.

"En el año noveno del 1 Ahau, el señor de los cielos y la tierra hará buena su palabra celestial, ¡oh padre!, vendrá sobre nosotros, sobre nuestras almas Hahal Ku, Deidad-verdadera; ellos son los que lo habrán querido, ¡oh padre! Muy pesada es la carga que soportarán los Ixcuch luum idzinil, Los-hermanos-menores-que-soportan-la-carga-de-la-tierra; aplacadas, dominadas, sometidas estarán sus voluntades; muerto el corazón de la Flor de Mayo, de los disputadores, de los deslenguados, de los ofrecedores de mujeres, flor de perversidades, de deshonestos desvaríos, los de poder de dos días los que ponen deshonestidad en los Tronos, los desvergonzados de la Flor de Mayo, los de abominables amores, los de poder de dos días, los de bancos de dos días, los de jícaras de dos días, los de tocados sombreros de dos días, los lascivos del día, los lascivos de la noche, los Maax, Monos del mundo, los que tuercen la garganta, los que parpadean los ojos, los que tuercen la boca a los Señores de la tierra, ¡oh padre!, los que carecen de verdad en sus palabras, los extranjeros del pueblo,

los que dicen que son verdaderamente respetables, los hijos del hombre de las Uuc Tocoynaob, Siete-casas-desiertas, los hijos de las mujeres de las Uuc Tocoynaob, Siete-casas-desiertas, ¡oh padre!

"¿Quién será el Ah Bobat, Profeta, quién será el Ah Kin, Sacerdote-del-culto-solar, que pueda explicar rectamente las palabras de estos signos jero-glíficos?"

EL LENGUAJE DE ZUYUA Y SU SIGNIFICADO*

PARTE I

El lenguaje de Zuyua y su significado. Para nuestro señor capitán Mariscal establecido en Tzucua-xim al oriente de Ichcaansihó, Faz-del-nacimiento-del-cielo. Allí tiene su tierra, allí tiene sus huertos y su solar en donde él reside hasta que llegue el día en que finalice su empleo. También se pone cómo dan el poder los Halach Uiniques, Jefes de gran poder, de gran vestido también.

Hoy día cuatro del mes de septiembre del año de 1628 hemos compuesto lo que aquí está escrito en lengua maya para que cualquiera que viese este papel escrito sepa entender lo que es la palabra de Zuyua, la que usan los Batabes, Los-del-hacha de los pueblos, con los hombres que son alcaldes [*sic*] y regidores [*sic*].

Este era el lenguaje que solicitaban los Halach Uiniques, Jefes de los pueblos, al llegar al término del poder del 3 Ahau Katun cuando se asienta el otro, el 1 Ahau Katun. Era lo que había dentro del otro katun, así se decía.

Cuando el katun presente es el 3 Ahau, éstos son los años que le faltan: 3 años para que deje de reinar,¹ mientras tanto, el 1 Ahau Katun reside en el interior de la casa del 3 Ahau, lo está visitando y está recibiendo los agasajos del 3 Ahau Katun.

Éstos son los acertijos y adivinanzas que tenía el

* Se ha publicado la versión del Libro de Chilam Balam de Chumayel en Médez Bolio (1930) y en Roys (1933).

katun que hoy termina y llega hoy el tiempo en que que sean interrogados con acertijos los Batabes, Los-del-hacha, de los poblados, para ver si saben cómo es que merecen el Señorío, si es que lo saben por generación, si es cierto que lo saben y comprenden los Batabes, Los-del-hacha, y Halach Uiniques, Jefes, como jefes que son. Si es cierto que descienden los Batabes, Los-del-hacha, de Ahaues, Señores Príncipes, de Halach Uiniques, Jefes, realmente, han de demostrarlo. Éste es el primer acertijo que se les hace: Se les pedirá la comida. "Traedme el Sol", dirá el Halach Uinic, Jefe, a los Batabes, Los-del-hacha. "Traedme el Sol, hijos míos, para tenerlo en mi plato. Hincada ha de tener la lanza de la alta cruz en el centro de su corazón en donde tiene asentado a Yax Bolon, Jaguar-verde, bebiendo sangre. Esto es habla de Zuyua." Esto es lo que se les pide: el Sol es un gran huevo frito y la lanza con la alta cruz hincada en su corazón a que se refiere, es la bendición, y el jaguar verde sentado encima bebiendo sangre, es el chile verde cuando comienza a ponerse colorado.² Así es el habla de Zuyua.

El segundo acertijo que se les hace es que vayan en busca de los sesos del cielo para que el Halach Uinic, Jefe, los vea y sepa de qué tamaño son. "Tengo deseos de verlos, debo mirarlos", les dice. Los sesos del cielo son el copal, así es el habla de Zuyua.

El tercer acertijo que se les hace es pedirles que construyan una gran casa de siete horcones de alto y de una sola columna. Esta gran casa es el Yahau P'ooc, gran tocado señorial. Se les dirá también que suban sobre Yahau Sasac Tzimin, el caballo³ [tapir] de vestiduras blancas señoriales, con una manta blanca, y que en la mano lleven la sonaja blanca haciéndola sonar al Tzimin, caballo, y que la

flor de la sonaja tenga sangre cuajada. Habla es que viene y sale de Zuyua. El caballo blanco que se les pide es la sandalia de fibra de henequén y la sonaja blanca dicha y la manta blanca, son las Flores de Mayo de centro blanco, y la sangre cuajada en la flor de la sonaja que se les pide, es el amarillo de oro que tiene en medio la flor y simboliza que de la Flor de Mayo proviene la sangre de ofrendas, la sangre de los huérfanos de madre, de los huérfanos de padre, de los miserables. Así es el habla de Zuyua.

El cuarto acertijo que se les hace es que vayan a sus hogares diciéndoles: "Hijos míos, cuando vengáis a verme, ha de ser precisamente cuando el Sol está en el medio del cielo, seréis dos y vendréis muy juntos vosotros, muchachos, y cuando lleguéis aquí, vuestro perro doméstico ha de venir tras de vosotros y que traiga cogida con sus dientes el alma de Cilich Colel, Sagrada-Señora, cuando vengáis. Habla es de Zuyua." Los dos muchachos de que se les habla que han de venir juntos justamente en el mediodía, es él mismo cuando venga pisando su sombra, y el perro que se pide que venga con ellos es su propia esposa, y el alma de Cilich Colel, Sagrada-señora, son las grandes candelas [*sic*], hachas [*sic*] de cera. Tal es el habla de Zuyua.

El quinto acertijo que se les hace es pedirles que busquen el corazón de Ku Citbil ti Caan, Señor-deidad-del-cielo, y cuando lo traigan, que de trece capas extendidas sea su lecho y que venga envuelto en vestiduras toscas de color blanco. El corazón de Ku Citbil, Señor-deidad, que se les pide es la piedra Kan,⁴ el Maíz, la piedra preciosa, y su estrado de trece capas extendidas son los Yahau Uah, Pastel-de-tortilla-de-maíz-de-trece-capas-rellenas-de-frijoles,⁵ y la tosca manta blanca en que viene envuelto es la servilleta blanca.

El sexto acertijo que se les hace es pedirles que busquen las ramas del Cho, Pochote-espinoso, y la cuerda de tres hilos y el bejuco vivo. "Quiero que le dé sabor a mi comida mañana, tengo deseos de comerlo, hace tiempo que no veo que se mastique el tronco del pochote espinoso", esto es lo que se les dirá. El tronco del pochote espinoso es Chop, Lagartija; la cuerda de tres hilos es la cola de Huh, Iguana, y el bejuco viviente son las tripas del Keken, Cerdo (Pecari), el tronco del pochote espinoso es el tronco del rabo del Chop, Lagartija; así es el habla de Zuyua.

El séptimo acertijo que se les hace es decirles: "Id a reunir para mí las tapas del fondo de los cenotes, que dos sean blancas y dos amarillas, tengo deseos de comerlas." Las tapas del cenote que se les pide son jícamas, dos jícamas blancas y dos jícamas amarillas; esto, en Zuyua se entiende.

Los Batabes, Los-del-hacha, que no cumplan el contenido de estas palabras, que no sean por ellos comprendidas ante los Halach Uiniques, Jefes, que son los que tienen la mayor importancia entre los naturales, serán aprehendidos, y tristeza y espanto caerá sobre sus casas, y tristeza y dolor llorará el pueblo en el centro de los poblados, y en las casas de los nobles entrará la muerte, no quedando ninguno vivo. Esto es lo que habrá sobre los Batabes, Los-del-hacha, de los pueblos, según el ejemplo que está en la pintura para que sepan cuán dolorosamente terminará para ellos el señorío de este Ahau. Con las manos atadas serán conducidos delante de su padre el Ahau Halach Uinic, Señor-Príncipe-Jefe; ése es el término de los falsos Batabes, Los-del-hacha, de los desvariados de Kin, Sol, de los impuros de la época. Al término de su batabilado es cuando

sentirán el dolor, ésta es la orden para cuando termine el poder del katun.

Cuando termine el poder del 3 Ahau Katun se aprehenderán los Batabes, Los-del-hacha, de los pueblos, que carezcan de entendimiento, por eso se les aprehende, ésta es la memoria de por qué se les aprehende; porque no dieron de comer a los Halach Uiniques cuando éstos les pidieron su comida con acertijos; por eso son ahorcados y por eso les son cortadas las puntas de las lenguas y por eso les son arrancados los ojos en el tiempo en que termina el poder del katun. Sus descendientes se presentan ante los Ahaues Halach Uiniques, Señores-príncipes-Jefes, de rodillas, a pedir clemencia y prudencia, y si tienen entendimiento, les entregan la Estera y el Trono. Esto es lo que muestra la pintura. Felices se ven los descendientes de los Halach Uiniques, Jefes de la tierra, los que tienen ánimo, que son los que reciben la Gran Vara [*sic*]. Así es como establecían en sus puestos a los descendientes de los linajes reales los hombres mayas, aquí en esta tierra de Yucatán, en toda su redondez, y que Dios [*sic*] mediante ha de seguirse cumpliendo en la tierra. El Señor que viene a nuestro gobierno, a nuestro poder y que es auténtico Señor, inquirirá por Ku, Deidad nuestra, y por nuestras piedras labradas Tunes y por nuestras piedras preciosas Kanes y por el árbol que da el vino Balché, y aquel que no lo hiciere será muerto y aquel que lo hiciere y nos respete tendrá a Dios [*sic*] con él. No quiera Dios [*sic*] que todo lo que aquí está pintado acontezca.

PARTE II

Ésta es la cosa más importante que asiento: Cómo los nobles que descienden de Batabes, Los-del-ha-

cha, saben cómo llega su linaje a la realeza y al gobierno y se regocijan de su juicio y prudencia y se sujetan respetuosamente a los grandes Halach Uiniques, Jefes, quienes les entregarán la Estera y el Trono; la Estera y el Trono que les había sido traicionada; la Estera y el Trono que había sido enterrada en la casa que está bajo el suelo,⁶ que había sido pisoteada y arrastrada por la tierra por los desvariados de Kin, Sol, los impuros del katun, los hijos de las mujeres de la Luna, los hijos de mujeres deshonestas, los hijos de los hombres bellacos, los de Estera de dos días, los Maax Ahaues, Monos-Señores-príncipes, los Maax Katun, los Monos-del-katun, los que estuvieron caminando dentro del 3 Ahau Katun; cesará ya el poder de Bolon Buthi, Nueve-ahíto, en el corazón del linaje de la nobleza, de sus hombres y señores que no pasarán ya si no saben decir todo, si no lo saben todo, cuando se les diga que vayan a tomar su cargo de Batabes, Los-del-hacha, de los pueblos, que vayan a buscarlo y a tomarlo. Que se les diga: "Hijo mío, búscame la flor de la noche, tráela aquí", así dirán, y entonces irán de rodillas ante el Halach Uinic que lo pida. "Padre, amo, he aquí la flor de la noche que me pides; trae la luz de la noche, aquí está conmigo", así dirá. "Así pues, hijo mío, si está contigo, ¿acaso está detrás de ti Ix Dzoy, La-flaca, en el gran amate?"⁷ "Padre, amo, está conmigo, vino conmigo." "Así pues, hijo mío, si está contigo, si vino contigo, llama pues a tus parientes, al viejo de nueve hijos y a la vieja de nueve hijos." "Padre—dirá cuando responda—, vinieron conmigo, aquí están detrás de mí, delante de mí estaban cuando venía a verte." "Así pues, hijo, si están detrás de ti, reúne las piedras de la sabana y tráelas en una brazada contra tu pecho si realmente eres de la

raza de los Halach Uiniques, Jefes, y de la raza de los Ahaues, Señores-príncipes de esta tierra, si puedes comprender el habla de Zuyua." La flor de la noche que se le pide es la estrella del cielo y la luz de la noche que la acompaña es la Luna. La *Ix Dzoy* es el amate llamado Copó. El gran amate es el Ah Cuch Cab, El-de-los-bienes-de-la-comunidad, el tesorero, al cual llaman Otlomcabal, Consejero; el viejo que se pide, el de nueve hijos, el dedo gordo del pie; la vieja que se pide, la de nueve hijos, es el dedo gordo de la mano. Las piedras de la sabana que se le piden diciéndole que debe de traer a sus hijos abrazados contra su pecho, son las codornices; esto se entiende en Zuyua. Así también: "Hijo mío, ¿dónde está tu primer tío hermano de madre, aquel de quien te dije que no deberías de mirarle a la cara?" "Aquí está detrás de mí, oh padre." Otra vez le dice: "Así pues, hijo mío, ve a buscarme el cordón umbilical del cielo y tráemelo aquí; has de venir por el oriente y debes de traerlo a tus espaldas." La respuesta es: "Así ha de ser, oh padre", y se irá. Habla es ésta de Zuyua. El primer tío hermano de madre que viene con él es su propio colodrillo y el cordón umbilical del cielo que se le pide es el copal elaborado en figuras de trece modos distintos, y cuando se le dice que lo traiga a sus espaldas se refiere a su sombra cuando el Sol declina. Esto, se entiende en Zuyua.

Hijo mío, si eres Halach Uinic, Jefe, si eres poderoso príncipe, búscame las cuentas [*sic*] verdes con que tú oras." Estas cuentas verdes que se le piden son sus cuentas verdes, y luego le pregunta: "¿Cuánto tiempo oras?" "Oh padre —dirá—, en el día 1 yo oro y en el día 10 también oro." "¿Y en qué días es cuando alzas tu oración?" "Oh padre, los días 9 y los días 13; oro a Bolon ti Ku, Nueve-

deidad, y a Oxlahun Citbil, Trece-ordenador;⁸ entonces es cuando cuento y repaso mis cuentas" [sic]. Habla es ésta de Zuyua.

"Hijo mío, tráeme tu braguero-ceñidor para que yo lo huela; más que el centro del cielo quiero sentir su olor, el olor de tu ropa, el olor de tu carne, más que el olor del centro del cielo y más que el olor del centro de las nubes, y tráeme mi primer desayuno, el que está en la jicarita blanca labrada, si eres realmente Halach Uinic, Jefe." "Oh, padre, lo traeré", dirá. El olor del braguero-ceñidor que se le pide, aquel que es más oloroso que el centro del cielo, es el copal encendido cuando arde, y su primer alimento es el cacao molido, su chocolate. Habla es de Zuyua.

"Hijo mío, tráeme la preciosa sangre de tu hija, su cabeza y sus entrañas, sus fémures y sus brazos que te dije encerraras en la olla nueva y la taparas, y tráeme también el precioso banco de tu hija, enséñamelo, tengo deseos de mirar todo eso; hace tiempo te lo di, cuando ante mí gemiste, cuando ante mí estalló tu llanto." "Así ha de ser, ¡oh padre!, vendré a traerte las antenas de Ah Bol, Abeja-montesa-melera-sin-aguijón, para que se ahuyente." La preciosa sangre de su hija que se le pide es el Balché, Vino-ceremonial-de-miel;⁹ las entrañas de su hija son las bolsitas de miel de la colmena, y la cabeza de su hija es la olla nueva en que se fermenta el Balché, Vino-ceremonial-de-miel. El precioso banco de su hija que se le pide es la piedra fina llamada Couoh, de la miel [¿ámbar?]. Y cuando de las orejas o antenas de Ah Bol, Abeja-montesa-melera-sin-aguijón, se habla, es dar el fermento del Balché, Vino-ceremonial-de-miel, y el fémur de la hija son las cortezas del árbol Balché que sirven para fermentar el vino Balché, y los brazos de la

hija, las ramas del árbol Balché y cuando se le dijo que había llorado, menciona la embriaguez que le viene, cuando se contorsiona y murmura reverencias como corresponde a los grandes Señores. "He aquí a mi hija, la que me diste para que yo cuidase, de la que me hablas, padre; tú, Ah Tepal, El-poderoso." Así dirá a su hijo, el siervo: "Oh tú, hijo, Halach Uinic, Jefe, como yo; Ah Tepal, El-poderoso, como yo; conqué tú sabes esto, conqué tú lo recuerdas", dirá. La preciosa sangre de la hija que pide es que trece veces lo pase [el vino ceremonial], y trece veces lllore acostado afuera; mientras está tendido llorando dice: "¡Oh, hijo mío, verdaderamente eres Halach Uinic, Jefe; hijo mío, verdaderamente eres Ah Tepal, El-poderoso, al igual enteramente que yo; te entrego tu Estera, te entrego tu Trono, te entrego tu Señorío a ti, que eres mi hijo; para ti será el poder, para ti será el Señorío, oh tú, mi hijo!" Habla es de Zuyua.

Así es como se hace entrega del poder a los Batabes, Los-del-hacha, de los poblados. Hasta entonces es cuando salen de la presencia de los grandes Halach Uiniques, Jefes, que están en la cabecera del país llano; hasta entonces pueden marchar a sus lugares e irse a sus casas. Allí les solicitan su comida los Halach Uiniques de esta manera:

"Hijo mío, tráeme cuatro Chac Dzidzib, Pájaros-cardenales, aquellos que están a la entrada de la cueva, y tráelos parados sobre mi precioso alimento. Que les vea enrojecidos sus copetes y que vengan erguidos sobre mi precioso alimento cuando llegues ante mí." "Así ha de ser, ¡oh padre!" Esto que pide es el Ciui, Achiote-en-pasta; los copetes de que habla es la espuma del chocolate, y su precioso desayuno es el cacao acabado de moler. Habla es de Zuyua.

"Hijo mío, has de traerme los Ch'ich'il Akab, Pájaros-nocturnos, y el brillo de la noche, juntamente con los sesos del cielo; tengo muchos deseos de mirarlos aquí." "Así ha de ser, señor." Lo que se le pide es el recipiente en el cual se quema el copal y el brillo de la noche que se le pide es la piedra preciosa, y los sesos del cielo, el copal.¹⁰ Habla es de Zuyua.

"Hijo mío, tráeme los huesos de tu padre, aquellos que enterraste hace tres años; tengo muchos deseos de mirarlos." "Así ha de ser, ¡oh padre!" Lo que se le pide es la yuca cocida bajo tierra para comida del Halach Uinic, Jefe. Habla es de Zuyua.

"Hijo mío, tráeme un viejo que no tenga abrochados los botones [*sic*], en su jubón [*sic*], el llamado Hom To Chac, Hundido-en-la-lluvia." "Así ha de ser, ¡oh padre!" Lo que se le pide es el Ibach Huech, Armadillo.¹¹ Habla es de Zuyua.

"Hijo mío, trae para mí tres rayas del cielo; tengo deseos de comerlas." "Así ha de ser, ¡oh padre!" Lo que se le pide es el Sacab, Bebida-de-maíz-sin-cal.¹² En el lenguaje de Zuyua se pedirá todo.

"Hijo mío, tráeme un tronco de henequén, un tronco sin brazos pero con corazón, que venga muy adornado con tallos y flores de dzidzil." "Así ha de ser, ¡oh padre!" Lo que se le pide es la cabeza del Keken, cerdo silvestre, cocida bajo tierra, hecha para el servicio del Halach Uinic, Jefe. El corazón a que se refiere es la lengua, porque su lengua es como su corazón. Habla es de Zuyua.

"Hijo mío, tráeme el Cos, Gavilán, que anda en la noche, para que yo lo coma." "Así ha de ser, ¡oh padre!" Lo que pide son pollos [*sic*] de cresta. Habla es de Zuyua.

"Hijo mío, di a Ix Dzoy, La-flaca, la que nombran Otloom Cabal, Consejera,¹³ que me traiga una canasta

de Pich'umes, Tordos-negros, que los recoja de debajo de la gran higuera en donde están tendidos, debajo del gran Copó, Higuera." "Así ha de ser, ¡oh padre!" Lo que se le pide son frijoles negros, los que están en la casa del Ah Cuch Cab, El-que-guarda-los-bienes-de-la-comunidad, tesorero. Yax Dzoy, Gran-flaca, Otlomcabal, Consejero, es lo que dicen. Habla es de Zuyua.

"Hijo mío, agarra el jaguar de la gruta; lo quiero para dar sabor a mi comida, tengo deseos de comerlo." "Así ha de ser, ¡oh padre!" El jaguar que se le pide es el Haleu,¹⁴ Tepezcuintle. Habla es de Zuyua.

"Hijo mío, tráeme a los huérfanos de padre envueltos en siete capas; tengo deseos de comerlos porque éste es el día en que deben comerse." "Así ha de ser, ¡oh padre!" Lo que se le pide es el Dzotob Chay, Tamalitos-rellenos-de-huevo-en-salsa-de-semilla-de-calabaza-envueltos-en-hojas-de-chaya.¹⁵ Habla es de Zuyua.

"Hijo mío, tráeme la claridad que alumbra el Petén, País llano, tengo deseos de comerla." "Así ha de ser, ¡oh padre!" Lo que pide es la miel líquida. Habla es de Zuyua.

"Hijo mío, tráeme la piedra ardiendo del horno de la cal, trae también el agua para que la apague; aquí ante mí ha de reventar." Habla es de Zuyua. Lo que se le pide es el Macal, Name, cocido bajo tierra, y el agua que pide para apagarlo es la miel líquida. Habla es de Zuyua.

"Hijo mío, trae para mí la luciérnaga de la noche, aquella que al norte y al poniente deja pasar su olor; que venga lamida por la lengua del Balam, Brujo." "Así ha de ser, ¡oh padre!" Lo que pide son cigarros y la lamida de la lengua del Balam, Brujo, es el fuego que necesitan. Habla es de Zuyua.

"Hijo mío, tráeme a tu niña, la del albo rostro, para que yo la vea, la de bella toca blanca, la de moño anudado, tengo deseos de ella." "Así ha de ser, ¡oh padre!" Lo que pide es la jícara blanca llena de Sacab, Agua-de-maíz-sin-cal. Habla es de Zuyua.

"Hijo mío, tráeme lo que se llama Sabel, Melones [sic], para que yo los coma, los de delicado perfume que trasciende." "Así ha de ser, ¡oh padre!" Lo que pide son melones [sic]. Habla es de Zuyua.

"Hijo mío, tráeme las lombrices retorcidas y azulosas, tengo deseos de comerlas." "Así ha de ser, ¡oh padre!" Lo que pide son pescuezos de guajolote. Habla es de Zuyua.

"Hijo mío, tráeme una doncella de blancas y relucientes pantorrillas aquí, quiero alzarle su enagua hasta los muslos." "Así ha de ser, ¡oh padre!" Lo que pide es la jícama; alzarle la enagua hasta los muslos es quitarle la cáscara. Habla es de Zuyua.

"Hijo mío, tráeme una bella muchacha de cara blanca, que tengo deseos de ella. Aquí le quitaré su enagua y camisa huipil; aquí ante mí ha de ser." "Así ha de ser, ¡oh padre!" Lo que pide es una guajolota para comer. Quitarle su enagua y su camisa huipil es desplumarla para asarla y comerla.

"Hijo mío, tráeme aquí un guardián de milpa anciano; tengo deseos de mirar su rostro." "Así ha de ser, ¡oh padre!" Lo que pide es un Macal, Name, para comer. Adivinanza es de Zuyua.

"Hijo mío, tráeme aquí una vieja que cuide milpas, que tenga el cuerpo negro y las nalgas de siete palmos; tengo deseos de mirarla." Lo que pide es el fruto de la calabaza. Es habla de Zuyua.

Que no llegue el día en que sea ofendido nuestro amo el Halach Uinic, Jefe, al llegar a esta tierra, la

tierra de Yucaltepen, cuando venga a llamar a los Batabes, Los-del-hacha, para que acudan a él. "¿Vosotros sois Batabes, Los-del-hacha?" "Lo somos, ¡oh padre!", dirán. "Oh hijos míos, si es que sois Halach Uiniques, Jefes, aquí os será dicho: Buscad al Balam, Brujo, que tiene alas, traédmelo aquí para comer, vestido con sus collares, adornado con sus tocados cuando lo traigáis; id pronto y regresad luego, hijos míos; tengo muchos deseos de comerlo. Oh vosotros, mis hijos, vosotros los hijos del Halach Uinic, los que no supiereis lo que os pido, tendréis pobre el pensamiento y pobre la mirada, y ¡ay, nada más podréis decir!" Aquellos que saben, felices van a buscar al Balam, Brujo, que tiene alas, para traerlo. "¿Eres tú mi hijo, eres tú de linaje noble?" "¡Oh padre!" "¿Eres acaso tú de linaje, de raza, hijo mío?" "Lo soy, ¡oh padre!" "¿Dónde están tus familiares, hijo mío?" "Oh padre, por los bosques andan buscando al Balam, Brujo; no hay Balam, según dicen, para ellos." Este Balam que pide es el Tzimin, Caballo [Tapir], de los Batabes; lo que quiere comer y quiere admirar es el robusto caballo [sic]. Su collar son los cascabeles [sic], y su tocado, su penacho, es el hilo rojo de algodón que tiene bien colocado en la silla [sic] y en el freno [sic]. Habla es de Zuyua para que sean entendidas sus palabras.

Gran pueblo de Santa Cruz, julio 10 de 1875, el año en que terminé de hacer la copia [sic] de este lenguaje maya para que pudiera ser comprendido. Marcos Balam, rúbrica.

ALZAMIENTO DE DON ANTONIO MARTÍNEZ Y SAÚL*

Don Antonio Martínez y Saúl, éstos fueron sus nombres cuando nació en Tzimintán, Frente-a-los-tapires.¹

Estaba en Tzimintán, Frente-a-los-tapires, cuando lo vio una señora cacica y murió un Nacom, Sacrificador. Le dijo la señora cacica que la desposase y siete años después de que la recibiera en matrimonio, le fueron abiertas las Puertas de Oro [iglesia del culto católico] y la Casa de Cuatro Divisiones [*idem*] le fue mostrada.

Construyó barcos innumerables [13 × 400] para alzar guerra en la tierra de la Habana en donde estaba el representante del rey, allí en la Habana. Lo comunicó al rey su representante, que andaba detrás de su acusador y fue como oyó que sería aprehendido y por eso se salió y se huyó a Tzimintán, Frente-a-los-tapires, en donde lo aprehendieron. Tres lunas habían transcurrido cuando alcanzó Tzimintán, Frente-a-los-tapires, y fue aprehendido y fue entonces cuando dijo la verdad a su aprehensor, cuando llegó a Tzimintán, Frente-a-los-tapires. Le dijo: "Vete, hombre, le dijo; tres lunas hace que llegué, le dijo; tres días tardó mi venida, le dijo,

* Este texto aparece interpolado en la "Profecía llamada Memoria de cómo vino Hunab Ku a decir su palabra a los Ah Kines", de donde se ha desglosado. Se ha publicado la versión del Libro de Chilam Balam de Chumayel en Mérida Bolio (1930) y en Roys (1933). El héroe de la narración es un personaje misterioso, desconocido en las otras fuentes clásicas de la historia de Yucatán.

y tres días hace que tú llegaste." A su llegada fue encerrado en un calabozo. "Vengo a sacarte del calabozo; vosotros, Nacomes, Sacrificadores, venid dos conmigo", dijo. "Suban nueve sillas para sentarnos." "Arderá el mar cuando yo me alce; incendio y fuego ha de verse al final. Se levantarán las arenas y las espumas del mar taparán la cara del Sol durante la tempestad."

Entonces se ataviaron los Nacomes, Sacrificadores, y se desmoronaron las piedras y la tierra cuando el viento se sentó en su banco de piedra fina. Vinieron tres veces cuatrocientos barcos y se atavió como el rey el Nacom, Sacrificador. "Así pues, preparaos señores, para cuando vengan los franceses", dijo.

"Moriremos a causa de ellos", así dijo. —"No desmayéis, hombres, y que a hombres como tú se os diga: «Estaos allá»; iré yo mismo a poner las proas de los barcos al centro para que se alcen conmigo los vientos", dijo. —"Se anublará la faz del cielo y arderá el mar al irme; y cuando lo haga será en presencia de todos, en presencia de todos perderé los barcos." —"Pero, ¿quién es este hombre?", dirán. —"Yo soy el que no es creyente, el que duda de ti, soy el que tienes que hacer renacer [bautizar]"; y dijo también: —"Probaré cuál es mi nombre de Martínez, Dios Padre, Dios Hijo y Dios Espíritu Santo es mi nombre." Así fue como murieron los oficiales de gobierno.

Dijo entonces que daría su pueblo con la mitad de sus hombres: —"¿Dónde está tu pueblo?" —"Mi pueblo es todo", dijo. —"¿Entonces me pagarás con mi pueblo a mí que soy Saúl?" —"Te digo que ha bajado la justicia del cristiano y de los bienaventurados del cielo."

En el katun decimotercero 4 Ahau, quizás enton-

ces se haya acabado de pagar el alzamiento de guerra de nuestros padres. No digáis que son vuestros enemigos los soldados que vienen contra nosotros. Son los cargadores de vuestras culpas cuando vengan, el día que vengan los franceses al país llano, los soldados.

Siete días reinará Nuestro Señor Jesucristo, guarda de nuestra alma tanto en este mundo como cuando acoja nuestra alma en su santo cielo también, hijos del Verdadero Dios, Amén.

RELATO LLAMADO "ACONTECIMIENTO HISTÓRICO EN UN KATUN 8 AHAU"*

El 8 Ahau fue cuando Ix Chancab, La-poderosa-mielera, limpió la plaza ciudad para que bajase el poder de Oxlahun Ti Ku, Trece-deidad, en un 8 Ahau, a Chichen, Orillas-de-lós-pozos, en donde estaba Oxlahun Ti Ku, Trece-deidad, en donde fue el rostro más grandemente reverenciado durante el imperio y poder de Oxlahun Ti Ku, Trece-deidad. El 8 Ahau aconteció en Chichen, Orillas-de-los-pozos.

Entonces ocurrió que se puso pintura al Señor de Uxmal y vino a imponer la huella de sus pies en las espaldas del Chac Xib Chac, Rojo-temible-Chac, en Chichen, Orillas-de-los-pozos, en donde imperaba Ah Nacxit¹ Kukulcan, El-Nacxit-Serpiente-quetzal; entonces fue cuando bajó el éxodo del Itzá, Brujo-del-agua, y vino el pleitear ocultamente, el pleitear con furia, el pleitear con violencia, el pleitear sin misericordia.

Entró el pecado, llegó con el 8 Ahau, vino el debilitamiento de la ceiba nuevamente a causa de Ah Xib Chac, El-temible-Chac, de Chichen, Orillas-de-los-pozos. Pero ¿quién sabrá la carga que traerá cuando totalmente dé la vuelta?

Fue en el 8 Ahau que sucedió lo de Ah Ulil, El-del-caracol-de-tierra, de Itzmal, Lugar-del-brujo-del-agua, cuando fue doblegado y atado el Señor Ah

* Se refiere, sin duda, a los acontecimientos que tuvieron lugar en el Katun 8 Ahau, transcurrido precisamente entre 1185 y 1204, según puede verse en la Crónica Matichu, parte III.

Ulil, El-del-caracol-de-tierra, por su pecado cometido con la mujer desposada de su amigo, otro Señor, lo que estableció la guerra en el transcurso del decimosexto o decimoséptimo año tun de ese katun, durante el poder de Ah Kul Itzman Caan, El-santo-brujo-del-agua-celestial, durante la presencia de Ahau Can, Señor-serpiente, Hapai Can, Serpiente-tragadora, cuando fue que ataron al Señor Ul, Caracol-de-tierra, de Itzmal, Lugar-del-brujo-del-agua, en donde pagaban como tributo a los infantes de Itzmal Kauil, Santo-lugar-del-brujo-del-agua, para alimentar a la Hapai Can, Serpiente-tragadora, que hacía violenta guerra. Entonces fue cuando en Itzmal, Lugar-del-brujo-del-agua, aconteció durante el gobierno del Señor Ulil, El-del-caracol-de-tierra, que terminó el poder de la Hapai Can, Serpiente-tragadora, que tenían los de Itzmal Thul, Brujo-del-agua-a-chorros, porque llegaron los grandes carniceros bestiales, los zopilotes celestiales del centro del Corazón del Cielo, Chac Bolay, Gran-fiera, con Chac Xib Chac, Rojo-temible-Chac.

Grande fue el sufrimiento de los de Ah Itzmal Thul, El-brujo-del-agua-a-chorros, grande fue el dolor de su alma. Atado fue por sus pecados Ahau Canul, Señor-príncipe-guardián, porque presentaban como tributo a los infantes a la Hapai Can, Serpiente-tragadora. Por eso fue superado por Ah Kukulcan, El-serpiente-quetzal, para que lo vieses y oyese todos los habitantes de Itzmal Thul, Lugar-del-brujo-del-agua-que-chorrea, quienes daban en ofrenda a los infantes para alimentar a la Hapai Can, Serpiente-tragadora, porque los súbditos cargan las culpas de los Señores.

Entonces fue cuando comenzó la prueba para Ah Itzam Caan, El-brujo-del-agua-celestial, cuando entró el pecado por la causa de Ahau Canul, Príncipe-

guardián, cuando salió Ahau Can, Señor-Serpiente, de Chichen, Orillas-de-los-pozos. De aquí de Maxcanú, Mono-guardián, en el comienzo de las sierras, de aquí salió el Señor. De trece medidas fue su carga cuando fue engendrado por su padre, pero fue valeroso para la guerra y tuvo la Máscara de Madera de Ah Cup Cacap, El-que-quita-el-resuello-apretando, y fue Chan Tokil, Poderoso-del-pedernal. Hubo entonces entrada del zopilote celestial a las casas y muertes repentinas en el imperio de la sequía.

Vendrá el apresurado arrebatarse de bolsas y la guerra rápida y violenta de los codiciosos ladrones: ésta es la carga del katun para el tiempo del cristianismo; la gente de la Flor de Mayo tendrá grandes miserias, grandes padecimientos tendrá el gran Itzá, Brujo-del-agua. En el doblez del katun de este decimotercero 8 Ahau caerá el poder de los Halach Uiniques, Jefes, de los grandes Itzaes, Brujos-del-agua. Pero no por completo acabará la gente de la Flor de Mayo, porque en el 9 Ahau se aparejarán escudos en el cierre, se aparejarán flechas en el cierre, cuando el katun cierre totalmente.

EXPLICACIÓN DEL CALENDARIO MAYA

Al terminarse el 10 Ahau termina un doblez de katunes y se repiten de nuevo 13 katunes;¹ están pintadas sus figuras en la rueda del katun.²

Décimo doblez del katun se llama cuando termina su duración y se asienta otro. Al terminar el 8 Ahau comienza de nuevo, y entonces comenzamos a escribir para que se asiente otro katun, y al terminarse el 8 Ahau, comienza de nuevo.

Pero lo que escribo no es nada meritorio, sólo para que sepan las cosas en que pasaban su vida nuestros antepasados en la época de su ceguera. Lo que habían de soportar según los pronósticos, que tampoco eran ciertos, sino falsedades, porque en lo único en que debe creerse es en Dios Nuestro Señor Único Todopoderoso y Sus Mandamientos [*sic*].

Éste es el calendario de nuestros antepasados: cada 20 días hacen un mes, según decían. 18 meses era lo que contaban un año; cada mes lo llamaban "un uinal" que quiere decir mes; de 20 días era la carga de un mes; "mes uinal" decían. Cuando se cumplían los 18 por cada vez que pasaba su carga era un año; luego se asentaban los cinco días sin nombre, los días dañosos del año, los más terribles,³ los de mayor pena por el temor de muertes inesperadas y peligros de ser devorados por el jaguar. En ellos todo era malo: mordeduras de serpientes venenosas en el monte y golpes de ramas ponzoñosas a los hombres, según decían. Ésta es la razón de por qué se decía que eran los dañosos del año, los días más malos estos días sin nombre.

Pero tenían un dios que adoraban, que reverenciaban, que acataban durante cuatro de estos días. Grande era el regocijo que se le ofrecía al recibirlo el primer día; se le daba gran importancia y era un día festivo. Pero al cuarto día ya no era cara su presencia, ni se le daba la importancia del primer día a su imagen, era ya otro al tercer día y no el centro de la casa; al cuarto día se le colocaba en las afueras de la casa para que allí le amaneciera; al quinto día se le echaba para que se fuese. El sexto día entonces que era el primero, el día cargador del año, en el que se asentaba el comienzo del año, del nuevo año y del primer mes llamado otra vez Poop, Estera.⁴

He aquí las letras mayas escritas para contarse o leerse los meses como en el calendario de los romanos cuya cuenta lleva la Santa Madre Iglesia para que se sepa la cuenta completa de sus días y de sus meses y la cuenta de los años del calendario de los cristianos. Tres son las columnas de mi escritura que se encontrarán aquí abajo con los doce meses del calendario; la primera parte es en castellano, allí se ven los días que hay en cada mes; la segunda parte son las figuras de las letras; los jeroglíficos de cada día que se van contando son las que tienen punto y rayas detrás. Un punto vale un año; si son dos, dos años o días; si son tres puntos así también se cuenta; si son cuatro puntos se cuentan cuatro como si son tres puntos así también. Las rayas que están encima también, si es una raya vale cinco años; si son dos rayas diez; si la raya que está encima tiene un punto se cuentan seis; si son dos los que hay sobre la raya, son siete; si tres puntos hay encima son ocho; si cuatro puntos hay sobre la línea se cuentan nueve; si son dos rayas con un punto encima son once si es

uno; si son dos puntos, doce; si son tres puntos, trece. La cuarta sección son las letras que he pintado y que representan los nombres de los signos de los días de las veintenas mayas que he copiado. Entendía muy bien estas cosas el señor Don Juan Xiu de Oxtutzcab.⁵ Lo copié yo, Diego Chi, escribano de la cofradía de aquí de Maní el 16 de julio de 1689, el día que fueron de Oxtutzcab a Mérida, porque iban a entrar Lorencillo y los ingleses allí, el capitán Diego Balan Gobernador, Pedro Puc y Diego Tuin alcaldes y Pascual Noh el regidor principal.

312 años hay sobre un doblez de katun⁶ para que se asiente en su comienzo de nuevo tal como comenzó. Estas pinturas que copié no son todas sino solamente la explicación del transcurso del 8 Ahau que corre parejo con la carga del cargador del año del Katun 2 Ahau; transcurrido el octavo año falta aún la carga de trece para que termine el 4 Ahau en que estamos, pero yo copié los trece. No es todo, sino solamente el calendario de ellos que cotejo con el calendario romano que llevan los cristianos según el nacimiento de nuestro Salvador Jesucristo, dentro del cual caen cuantas festividades se celebran dentro de los días de la cuenta de los cristianos y de la Santa Madre Iglesia. Hice la separación de la cuenta de los años y de la de los meses. Lo ajustarán mis Señores, mis padres y maestros. Que me perdonen a mí de sus hijos el peor, si no está correcto como queda explicado; si hay error lo corregirán porque no es mucha mi inteligencia, por esto es que les pido que perdonen mis yerros en el nombre de Nuestro Señor Dios dentro de mi falta de entendimiento.

Hoy al finalizar el mes, 20 Seec en el signo 6 Chichan del año de cargador 9 Muluc, es 14 de febrero

de 1793; fue cuando terminé de aprender a escribir los meses uinales mayas, del calendario que los antiguos hombres mayas tenían cuando aún no comenzaba el cristianismo. Que me perdonen mis yerros mis señores padres y los altos entendidos maestros, los astrólogos acéntricos [sic] y los concéntricos [sic], los grandes sabios que saben cómo caminan el Sol, la Luna y las estrellas y todas las cosas creadas por nuestro Padre Dios.

NOTAS

CRÓNICA MATICHU

¹ El texto dice *Holon Chan Tepeu*, pero *Holon* significa "el que es cabeza". Véase cakchiquel (Sáenz de Santa María, 1941): "*jolom*... cabeza; jefe, capitán". En maya yucateco *ho'ol* significa cabeza; *om* es sufijo que denota al actor. *Chan* es voz que en varios dialectos mayas vale por serpiente (tzeltal, chol, etc.). Es aún nombre personal en Yucatán, donde la variante *can* significa serpiente. *Tepeu* es voz que en Pokomchí, según Zúñiga, significa "grande, admirable, magestuoso, poderoso..." y cosa semejante en cakchiquel, según Sáenz de Santa María, ya citado. En maya yucateco registra el Diccionario de Motul como "vocablo antiguo" *tepenal* con significado de "reinar" y *tepal* con el de "reinar, mandar, señorear, prosperidad", etc. En náhuatl *tepeua* vale por "conquistar". ¿Es un mayismo en el náhuatl, un nahuatlismo en maya, o en ambas lenguas es préstamo de una tercera lengua?

² De aquí en adelante, hasta la mención de la muerte del Ofrendador del Agua Napot Xiu, al final de la Parte III, los años que se cuentan son *tunes*, periodos de 360 días, y las veintenas son de estos periodos, o sea *katunes* de 7 200 días.

³ *Siyan Can Bakhatal* es la moderna Bacalar del actual Territorio de Quintana Roo. *Siyan Can* es un adjetivo que aparece unido a otros nombres de lugar y significa "famoso, de abolengo". Véase Diccionario de Motul; *çitan can*: "cuentos y palabras de historias de sabios graves" (f. 101v).

⁴ "Se ordenaron las esteras" es una manera de decir "se ordenaron las comunidades", porque en maya *poop* no solamente significa estera, sino la comunidad, el conjunto total de personas de una jurisdicción, y el objeto mismo, la estera, era símbolo de la jurisdicción del señor que la hollaba. Ver Diccionario de Motul (Ms. Ff. 381r) *sub voce poptan* y Sáenz de Santa María (1940, pp. 314-315). Además, en las "Ruedas Proféticas de un Doble de Katunes" en esta obra, *passim*, la mención constante de la estera y el trono durante el reinado de alguna deidad. Sobre otras interpretaciones ver Brinton (1882, pp. 146 y 150) y Roys (1933, pp. 72 y 135).

⁵ Chichen Itzá se traduce "orilla-de-los-pozos-del-brujo-del-agua" (o del Itzá). Véase la nota introductoria a las Cróni-

cas, donde se discute el nombre Itzá, *Chi'* es boca u orilla y *ch'en* es pozo.

⁶ *Chakanputún*, que puede no ser el antiguo nombre de la moderna Champotón, de la costa sur de Campeche, se traduce en esta obra "sabana-de-chiles" porque hay una clase de chiles que se da en las sabanas cuyo nombre es *puntun* o *p'utun*. Pero *p'utun* pueden significar también pequeño, enano. Sin embargo, no es adjetivo en Chakanputún, porque no antecede a Chakan, que significa sabana.

⁷ Nótese cómo se dice que regresaron en busca de sus hogares de nuevo y es claro que estos hogares estuvieron antes en Chichen Itzá.

⁸ Ver nota anterior.

⁹ *Chac Xib Chac*, que aquí aparece como gobernante de Chichen Itzá, se presenta también como una deidad, un *Chac rojo* correspondiente al oriente en Landa (1938, ed. yuc., p. 14) y en otros textos ("Acontecimiento histórico en un 8 Ahau"). Véase Roys (1933, p. 67).

¹⁰ *Ichpá* es uno de los sobrenombres de Mayapán. Significa "entre-las-murallas". Mayapán era una ciudad amurallada, característica de ciudad no maya. Otro de sus sobrenombres es *Sactactun*, que significa "piedras-blancas".

¹¹ Los siete jefes de Mayapán que atacaron a Chichen Itzá en el Katun 8 Ahau (10.9.0.0.0: 1185-1204), ostentan nombres mexicanos de toda evidencia: *Ah Sintéut Chan*, *Tzontécum*, *Táxcal*, *Pantémit*, *Xuchúeuet*, *Itzcuat*, *Cacaltécat*.

Ah Sintéut Chan es una forma híbrida maya-mexicana compuesta por el elemento pronominal masculino maya *ah*; el vocablo mexicano *sintéut*, compuesto de *cin(tli)*, maíz seco en mazorca, y *teu(hc)it(tli)*, señor o jefe, más la voz maya *chan*, que significa serpiente. La traducción podría intentarse por la serpiente-del-señor-del-maíz.

Tzontécum es vocablo mexicano que significa cabeza humana cortada y separada del tronco.

Táxcal es vocablo mexicano que significa "torta", según Molina, pero también podría venir de *texcal(tli)*, peñascos o roquedal.

Pantémit es vocablo mexicano, formado por *pan(itl)*, estandarte, más *te(tl)*, piedra, más *mit(tl)*, flecha; la traducción podría intentarse por la-enseña-de-flecha-de-pedernal.

Xuchúeuet es vocablo mexicano formado de *xúch(itl)*, flor, y *uéuet(tl)*, viejo (véase n. 45).

Itzcuat es vocablo mexicano formado por *Itz(tli)*, obsidiana y *cuat(tl)*, culebra, serpiente-de-obsidiana.

Cacaltécat es vocablo mexicano formado por *cacal(ottl)*, cuervo, más *tecatl*, forma desinencial para los gentilicios;

significa el-de-los-cuervos, el individuo cuervo, el individuo del apellido cuervo. *Cacálotl* significa también, según Molina, "tenazuela de palo para dispaular candelas, o para comer granos de mayz tostado en el rescoldo".

¹² *Ulmil* es un personaje cuyo territorio no está señalado en ningún texto.

¹³ *Ah uitzil dzul*, dice el texto maya; "los extranjeros montañeses", alusión a su procedencia de los altos de México.

¹⁴ No fue el año 1513 el de la primera aparición de los españoles en la península. Los primeros en llegar forzosamente fueron los náufragos de Valdivia en 1511, los segundos fueron la gente de Hernández de Córdoba. Desde luego, los nativos continentales tuvieron noticias de los españoles desde 1502, cuando Cristóbal y Bartolomé Colón se encontraron con una canoa maya frente a la costa norte de Honduras, no lejos de la Isla de Guanaja, que Colón bautizó con el nombre de Isla de Pinos.

¹⁵ La referencia es al establecimiento definitivo de los españoles en la península.

¹⁶ El primer obispo de Yucatán, Fray Francisco Toral, llegó a la península en 1562, en el Katun 9 Ahau.

¹⁷ El "colgamiento" (no ahorcamiento) a que se refiere el cronista es sin duda la tortura impuesta por Landa en 1562. Ver Scholes y Adams (1938, *passim*).

¹⁸ Landa, siendo obispo de Yucatán, murió en Mérida el 19 de abril de 1579.

¹⁹ Los Pech se refieren también al establecimiento de los Padres en Yokhá en 1552. Ver Martínez Hernández (1926, p. 21).

²⁰ Hay aquí un error, pues sin duda se refiere al oidor Tomás López, que llegó a Yucatán en 1562, y a la fundación del Hospital de Nuestra Señora del Rosario, que se verificó el mismo año de 1562.

²¹ Nuevo error: el Dr. Diego Quijada, alcalde mayor de Yucatán y auxiliador de Landa en sus aventuras inquisitoriales, llegó en 1562 y fue depuesto en 1565. Véase Scholes y Adams (1938).

²² Otra alusión al "colgamiento". Véase n. 17. Además Lizana (1893, f. 9r).

²³ Otra vez se nota error. El mariscal D. Carlos de Luna y Arellano llegó a Mérida, como gobernador de Yucatán, en agosto de 1604 y gobernó hasta marzo de 1612. A las cisternas que mandó construir se refieren Cogolludo (1868, vol. II, pp. 141-142) y Sánchez de Aguilar (1937, p. 186).

²⁴ Véase Sánchez de Aguilar (1937, pp. 138-139), que se refiere a la conspiración de los indios en Tekax en 1610.

LOS TEXTOS PROFÉTICOS

PRIMERA RUEDA

¹ *Ichcaansiho* es el antiguo nombre de la actual ciudad de Mérida. Si históricamente no tiene este lugar la importancia que tienen otros sitios, religiosamente es uno de los más importantes, especialmente como "asiento" del Katun 11 Ahau, por ser el lugar que escogieron los españoles para capital de su dominio precisamente en un Katun 11 Ahau. El nombre ha sufrido cambios. Una vez aparece como *Siho'* en el texto del Cuceb (Año 8 Kan). Los cronistas españoles y aun algunos indígenas, registran *Ti Ho'* o *T'ho'*. Esta última forma es la que actualmente usan los nativos. La traducción de *Ichcaansiho* ha sido siempre un problema. Además de significar Faz-del-nacimiento-del-cielo, puede significar Entre-los-altos-siños, tomando *siho* como el nombre de un árbol aún no identificado; sin embargo, el *Amole Sapindus saponaria*, árbol muy común en la península, tiene un nombre que varía mucho ahora, pero siempre conserva el elemento *sih* en las menciones más antiguas. El Diccionario de Motul registra *cihom* (*Zihom* en la edición de 1929); actualmente se escucha *sihom*, *sibul*, *subul* y otras. Landa también escribe *cihom* al referirse a la función que tenía la planta en la ceremonia de la pubertad que él llama bautizo (véase Landa, ed. yuc., 1938, p. 46, escrito *cihom*). Esta ceremonia se llamó, según el mismo Landa, *caputsihil*, es decir, segundo nacimiento o renacimiento. *Si(h)* es la parte que significa nacer o nacimiento y de ahí la relación de *Sihom* con la ceremonia. *Siho* en *Ichcaansiho*, puede ser otra variante de *Sihom*. La *m* que falta estaría suplida por la clausura glotal con que se pronuncia *siho*: (*siho'*). Existen actualmente varios lugares en la península con el nombre *siho* y *sihomal*. *Ich* puede significar rostro o el lugar donde hay abundancia de algo, y *caan*, alto o cielo.

Ichcaansiho viene a veces acompañado de uno cualquiera de estos otros nombres antecediéndolo: *Chacnacultun* o *Sactactun* (Cuceb, Año 13 Muluc). *Chacnacultun* se traduce Lugar-de-las-grandes-piedras-labradas-recostadas, y *Sactactun*, Piedras-labradas-blancas.

² Cada katun tenía un "asiento", el lugar donde reinaría, el lugar de su trono, de su estera, signos de dominio. El lugar parece que tenía relación con algún acontecimiento histórico, acaecido en él durante el transcurso de un katun previo de igual denominación, como en el caso del 11 Ahau, que

tuvo por asiento a Ichcaansihó porque allí se consumó la conquista española. Por esta misma razón se comenzó a contar el primero en la serie de trece.

³ Así como tuvo cada katun un lugar de asiento en la tierra, tuvo también un rostro en el cielo, que generalmente sería una deidad celestial, posiblemente una estrella o constelación. En este caso *Yaxal chac*, el rostro del Katun 11 Ahau, pudo no ser estelar sino la deidad de la lluvia, *Chac*, de color verde. Hay que recordar que los chaques eran cinco: uno rojo del oriente, uno amarillo del sur, uno negro del poniente, uno blanco del norte y uno verde del centro. *Yax*, verde, no solamente significaba el color, sino preciosidad, calidad primordial y perfección.

⁴ "Sonará el atabal, sonará la sonaja..." En relación con esta doble expresión, Roys (1933, p. 78) reproduce, tomado de Gann (1900) parte de los frescos de Santa Rita, Honduras Británica, en la que un personaje, ricamente ataviado, agita una sonaja con una mano en alto y con la otra hace resonar un *huéhuettl* que lleva en su cuerpo una calavera de cuya boca surge una doble corriente de volutas que representan el sonido, una baja y otra sube; además, del parche del atabal sube una tercera corriente que alcanza el sol. Detrás del personaje aparece la fecha 7 Ahau.

⁵ *Yaxal Chuen*, Gran-mono-artifice, *Ixkanyulta*, Preciosa-garganta, una deidad que nos recuerda a uno de los dos héroes quichés Hun Batz y Hun Chouén, que "eran flautistas, cantores, tiradores con cervatana, pintores, escultores, joyeros, plateros...", según el *Popol Vuh* (Recinos, 1947, p. 122). Estos hermanos gemelos tuvieron a su vez dos hermanos también gemelos quienes los convirtieron en monos. Se menciona muchas veces en el libro citado la habilidad que para las artes tuvieron aquéllos. Al final de la narración respectiva se dice: "...eran invocados por los músicos y los cantores..." "Invocabálos también los pintores y talladores en tiempos pasados. Pero fueron convertidos en animales y se volvieron monos porque se ensoberbecieron y maltrataron a sus hermanos... Habían vivido siempre en su casa; fueron músicos y cantores e hicieron también grandes cosas cuando vivían con la abuela y con su madre" (pp. 146-147). Según hace notar Recinos (p. 146), el P. Las Casas (1909, p. ccxxv) refiere que los pintores y talladores de Yucatán invocaban a *Hunchouen* y a *Hunahau* y que eran hijos de *Ixchel* e *Itzamna*.

Yaxal es un adjetivo que denota "bienaventuranza, beatitud, dicha, ventura... premio, galardón de las buenas obras, mérito, gracia", según Zúñiga (véase *Raxal*, el equivalente

pokomchí). *Chuen* es el nombre del día del calendario maya que corresponde al día *Ozomatli* del nahua, que significa mono, y al día *Batz* del calendario quiché, que también significa mono. *Chuen* en maya yucateco, según el Diccionario de Motul, significa artífice: "*ah chuen*: artífice oficial de algún arte".

En la arqueología de Yucatán se encuentran vasos-sonajas y flautas decoradas con monos.

⁶ En otra nota se explica el significado de *Nicté*, que es el nombre de la Flor de Mayo —*Plumeria*—. *Kay Nicté* significa Cantar-a-la-flor o Canto-de-la-flor, es decir, Cantar-al-amor. Es un rito que practican las mujeres, en noche de luna, en un *chaltun* —depósito de agua en la roca— o en un cenote. Es para atraer al hombre esquivo o al que abandonó a su amada. Esta es la paciente en la ceremonia, que consiste en una danza en la que se recitan unas fórmulas mágicas ordenando al hombre venir o regresar a ella "como manso animal doméstico". La danza se hace alrededor de la paciente que se sumerge en el agua, desnuda, recibiendo puñados de flores *Plumeria*, especialmente de una especie silvestre llamada en maya *Thulunhuy*. Oficia como sacerdotisa una mujer, generalmente anciana, iniciada en el rito. Las danzantes no deben ser menos de cinco y dan nueve vueltas en un sentido y nueve en el otro. Al salir la paciente, terminado el acto, debe recoger alguna de las flores y un poco del agua para preparar alimentos y amuletos para el amante.

⁷ Esta expresión es muy frecuente en los textos indígenas. No se refiere a hermanos en sentido biológico, sino que es una forma política y elegante para designar, tal vez, clases sociales, al parecer, cuando el que habla se dirige a grupos no homogéneos de población.

⁸ *Uucil Yabnal*, Siete-aguas-suyas, es sin duda uno de los nombres de Chichen Itzá. Es también asiento del Katun 6 Ahau y del Katun 4 Ahau, en donde se muestra la relación con Chichen Itzá. Cf. Roys (1933, p. 133).

⁹ En el Cuceb se da el nombre de *Ah Buluc Am*, El-once-piedra-labrada, a Moctezuma. Véase n. 8, en p. 183. *Am* significa también araña.

¹⁰ *Ek Chuah*, Negro-escorpión. *Ek Chuah* es variante de *Ek Chuen*, "alacrán negro que cría en las paredes" (Diccionario de Viena, f. 9r). Landa (1938, ed. yuc., p. 99) cita a esta deidad como uno de los patrones de los cacaoteros: "En el mes de Muan hacían los que tenían cacahuatales una fiesta a los dioses *Ekchuah*, *Chac* y *Hobnil* que eran sus abogados; ibanla a hacer a alguna heredad de uno dellos,

donde sacrificaban un perro, manchado por la color del cacao, y quemaban a los ídolos su encienso, y ofrecíanles iguanas de las azules y ciertas plumas de un pájaro y otras cazas; y daban a cada uno de los oficiales una mazorca de la fruta del cacao." Cogolludo (1867, vol. I, pp. 305-306) menciona a Ek Chuah, como patrón de los mercaderes, citando a Remesal: "Dice [Remesal], pues, que cuando el obispo D. Fr. Bartolomé de las Casas pasó a su obispado... encomendó a un clérigo que halló en Campeche llamado Francisco Hernández... que sabía la lengua de los indios, que los visitase con cierta instrucción de lo que les había de predicar, y a poco menos de un año le escribió el clérigo. Que había hallado un señor principal, que preguntándole de su religión antigua que observaban, le dijo: Que ellos conocían y creían en Dios, que estaba en el cielo, y que aqueste Dios era Padre, Hijo y Espíritu Santo, y que el Padre se llamaba Ixona [Itzamna] que había criado los hombres, y el Hijo tenía por nombre Bacab, el cual nació de una doncella Virgen llamada Chiribias [Ixchebelyax], que está en el cielo con Dios, y que la madre de Chiribias se llamaba Ixchel, y al Espíritu Santo llamaban Echvah [Ek Chuah]. De Bacab, que es el Hijo, dicen que le mató e hizo azotar, y puso una corona de espinas, y que lo puso tendido los brazos en un palo, y no entendían, que estaba clavado sino atado, y allí murió, y estuvo tres días muerto, y al tercero día tornó a vivir, y se subió al cielo, y que está allá con su Padre. Y después de esto luego vino Echvah, que es el Espíritu Santo, y hartó la tierra de todo lo que había menester. Preguntado, qué quería significar aquellos tres nombres de las Tres Personas, dijo que Yzona quería decir el gran Padre, y Bacab, hijo del gran Padre, y Echvah Mercader, Chiribias suena Madre del Hijo del gran Padre."

En el Cuceb, Año Tun 4 Kan, se menciona una deidad con el nombre de Ah Uuc Chuuah, que puede ser otra manera de nombrar a Ek Chuah.

11 Se ha traducido *Amayte Kauil* como Cuadrado-deidad en el sentido de Deidad de los cuatro ángulos del cielo, aunque en realidad no aparece en el nombre elemento alguno que se refiera al numeral cuatro. Para los mayas, igual que para otros pueblos de América, el cielo es cuadrado y esta deidad es del plano celestial. *Amay* en el maya yucateco significa esquina o cantero. *Amay* significa en pokomchí, según Zúñiga, "una especie de cañas montesas huecas y los canutos largos con que hacen flautas"; lo mismo en pokoman, según Morán. *Kauil* no aparece en los diccionarios yucatecos signi-

ficando deidad, pero en pokoman sí, según Morán. Sin embargo, lo tenemos en el nombre de *Itzamna Kauil* y en dos frases sinónimas en el Tizimín (f. 16v): *u binel u uich ku*, *u uich kauil*, donde *ku* y *kauil* valen ambas por deidad.

Por otra parte, la voz *Amayte* parece tener su traducción en nahua con la forma *Náuh-yotl*, que expresa el mismo concepto, ya que la etimología de *Náuh-yotl* viene de *nahui*, cuatro, más el elemento desinencial *-yotl*, que sirve para la formación de nombres abstractos. La traducción de *Náuh-yotl* es aproximadamente El-que-es-cuatro, o El-cuadrado, el de lo cuadrado, que, como se ve, corresponde al concepto encerrado en *Amayte*.

¹² *Nicté* es la *Xóchitl* de México, *Plumeria* sp. Las flores prehispánicas en relación con el ritual para la fecundidad. Sahagún da noticias sobre este tema en los altos de México, en su capítulo VII, que intitula "Del cuarto signo llamado *Ce Xochitl*": "Los hombres que nacían en él decían que eran alegres, ingeniosos y inclinados a la música y a placeres, y decidores, y las mujeres grandes labranderas y liberales de su cuerpo."

¹³ "...cuando venga el agua al Quetzal, el agua al pájaro verde Yaxum..." El texto maya reza: *ca tali vemel u yaal Ix Kuk, yaal Ix Yaxum...* El nombre del Quetzal en maya de Yucatán es *Kuk* (compárese Sáenz de Santa María 1940, p. 231: "*k'uk'*... quetzal, perica, guacamaya; plumas verdes con que bailan"), aunque no aparezca en los diccionarios de esta lengua; pero *kuk* es raíz de "*kukum*: pluma de ave en general", según el Diccionario de Motul. Además se encuentra en el compuesto *Kukulcan*. En los textos no aparece nunca el nombre *Ix Kuk* sin estar acompañado de *Ix Yaxum*, que está como sinónimo, aunque en algunos vocabularios de otros dialectos mayances aparezca la variante *raxom* como nombre de pájaro azul no identificado (Sáenz de Santa María, 1940, p. 328). Sin embargo, Recinos (1947) identifica, al anotar (p. 89) una frase paralela del *Popol Vuh*, el raxon de este texto como el ave *Cotinga amabilis*, de color azul celeste y pecho y garganta morados, sustentándose en Basseta, que registra *raxom*, un pájaro de pecho musgo y alas azules y en que el nombre de la *Cotinga* mencionada en la lengua vulgar de Guatemala se llama *ranchon*. De todos modos, nos parece que en la fórmula *Ix Kuk Ix Yaxum* del maya y su paralela quiché *pa guc pa raxón*, se hace referencia a una sola ave, al quetzal. *Yax* y su equivalente *rax* del quiché y del cakchiquel significan primariamente verde y el sufijo

de vocal más *m* (-um u -om) es signo de nombres de acción o sustantivos. *Yaxum* o *raxom* significan el que es verde.

¹⁴ *Xuch Ueuet* es nombre de la lengua nahua, aparentemente del dialecto olmeca mexicano (-t en lugar de -tl). Está compuesto de *Xuch(itt)*, flor, y de *Ueuetl*, viejo o antiguo en su sentido lato, pero que cuando aparece combinado con nombres de personajes indica que al tomar el nombre de referencia otro individuo de la misma familia, al primero se le ha designado automáticamente con la voz *Ueute* en composición con su nombre para indicar que él fue el primero que llevó tal nombre. A los demás individuos del mismo nombre se les llama, al segundo, cuando hay un tercero, fulano *teomeca*, que quiere decir segundo de nombre tal. Al tercero, fulano tercero, etc. Estas formas de diferenciación se conocen en los documentos únicamente en relación con individuos de familias nobles y sólo funcionan cuando éstos toman cargos públicos de gran importancia (véase n. 11, en p. 155).

¹⁵ *Yax Coc Ah Mut* es sin duda el nombre de una estrella o grupo de estrellas. Aparece juntamente con *Yax Aclam*, Verde-tortuga; *Ah Chicum Ek*, Estrella-guiadora, y *Ah Ahsah*, Estrella-de-la-mañana, en el Katun 4 Ahau. No hay duda respecto de *Yax Aclam*; *ac* es tortuga en maya de Yucatán y el Diccionario de Motul registra "*ac ek*: las tres estrellas que están en el signo de Géminis, las cuales, con otras, hacen forma de tortuga". Tampoco hay duda en el nombre *Chicum Ek*, donde *ek* es estrella, y tampoco en *Ah Ahsah*, que también lo registra el Motul: "*Ah ahçahcab*: lucero de la mañana." *Yax Coc Ah Mut* se toma por El-del-anuncio-tortuga-signo, porque *yax* significa verde; *coc* es nombre de una tortuga terrestre, generalmente llamada *coc ac*; *ah* es signo del actor masculino, y *mut* vale por anuncio, fama, señal.

Esta deidad es mencionada por Avendaño y Loyola (Ms., f. 29r/v): "...está un pedaso de pilar, de piedra[s] redonda[s], cujo circulo, como tres quartas de ancho y una quarta de alto: es de piedras collocadas, con mescla de cal y çahcab que por acá se acostumbra y el medio rehinchido y envetunado, de suerte que es como una mesa redonda su peaña, sobre la cual y del simiento de d[if]ic[il]ha columna de piedra, hacia la parte del poniente, sale ynserta una carátula de piedra muy mal formada, a la qual adoran junto con la columna de piedra... llámase la tal columna con el título que le dan culto, yax cheel cab que quiere desir en su Ydioma, el primer arbol del mundo, y como en sus cantares antiguos e entendido (que ai pocos que los entiendan) quieren dar a entender que le dan culto por aver sido aquel

el árbol de cuio fruto comió nuestro primer Padre Adan, que en su ydioma se llama X Anom, por lo poco que se conservó en gracia, y la carátula que está en dñclho simiento de la dñclha columna, le dan culto, con el título del hijo de Dios muy savio. En su lengua le llaman Ah cocahmut."

Landa (1938, ed. yuc., pp. 68-69) menciona tres veces a nuestra deidad: "Este año en el que la letra Muluc era dominical y el Bacab Canzianal reinaba, tenían por buen año, ca decían que era éste el mejor y mayor destos dioses Bacabes, y así le ponían en su oraciones el primero. Pero, con todo eso, les hacía el demonio hiciesen un ídolo llamado Yaxcocahmut y que le pusiesen en el templo y quitasen las imágenes antiguas, y hiciesen en el patio de delante del templo, un bulto de piedra en el cual quemasen de su encienso, y una pelota de la resina o leche Kik, haciendo allí oración al ídolo y pidiéndole remedio para las miserias que aquel año tenían, las cuales eran: poca agua y echar los maíces muchos hijos, y cosas desta manera; para cuyo remedio, les mandaba el demonio ofrecerle ardillas y un paramento sin labores, el cual tejiesen las viejas que tienen por oficio el bailar en el templo, para aplacar a Yaxcocahmut.—Tenían otras muchas miserias y malas señales, aunque era bueno el año, si no hacían los servicios que el demonio les mandaba; lo cual era hacer una fiesta y en ella bailar en muy altos zancos, y ofrecerle cabezas de pavos, y pan y bebidas de maíz; habían de ofrecerle perros hechos de barro con pan en las espaldas; y habían de bailar con ellos en las manos las viejas, y sacrificarle un perrito que tuviese las espaldas negras y fuese virgen; y los devotos dellos habían de derramar su sangre y untar la piedra de Chacacantún demonio con ella. Este servicio y sacrificio tenían por agradable a su dios Yaxcocahmut." —En algunos textos aparece *Yax Cocay Mut*. *Cocay* es el nombre de la luciérnaga en el maya yucateco, pero, aunque conviene el nombre a una estrella, nos parece más probable que la forma *Yax Coc Ah Mut* —que es la que más se repite— sea la correcta.

Brinton (1894, pp. 37-38) identifica a esta deidad con Itzamna y Thompson (1939, p. 161) traduce el nombre como "el pájaro Coc verde". En otro texto aparece una variante *Ek Coc Ah Mut*, cuyo elemento *Ek* lo toman Thompson y Roys como negro, pero ya vimos que también significa estrella. Cf. Tozzer (1941, p. 145).

¹⁶ El ramón, una morácea, *Brosimum alicastrum* Swartz, es un árbol de gran importancia económica actualmente en la península de Yucatán, especialmente porque sus hojas son utilizadas como forraje de bestias, especialmente caballos,

mulos, cabras y, en ocasiones, ganado bovino. El hombre maya es *ox*; aparece en los textos como planta que es utilizada en las épocas de hambre —es decir, cuando falta el maíz— para suplir la falta del cereal base de la alimentación indígena, aprovechando sus frutos. Ciertamente, sus frutos son comestibles y alimenticios y se tienen como lactógenos en algunas regiones del occidente del país donde la planta se llama capomo (Jalisco, Nayarit, etc.). En la actualidad se suele comer la semilla, que es una nuez redonda dicotiledónea de calidad harinosa, cubierta de una cáscara pulposa y dulce cuando madura. Esta cáscara se come cruda, no así los cotiledones, que se cuecen en agua agregándoseles azúcar o miel o friéndoseles después de molidos. En Honduras Británica se mezcla el fruto de ramón cocido y molido a la masa de maíz para preparar tortillas, según Thompson (1930). En la Antigüedad tuvo el ramón tanta o más importancia que ahora, pues es árbol que generalmente existe en los lugares que fueron poblados, inclusive los que hoy son lugares arqueológicos.

Juntamente con el ramón se menciona en el textos el *cup* o jícama cimarrona —*Calopogonium coeruleum* (Benth.) Hemsl.— como una de las plantas que se comían en épocas de hambre.

¹⁷ Es de notarse que en los *Anales de Quauhtinchan* o *Historia Tolteca Chichimeca* (1947, p. 68) aparece una expresión similar a ésta, cuando el texto refiere que "las manos y los pies" de la Gran Tollan estaban formados por las veinte ciudades que le eran sujetas.

En relación también con estas referencias a los brazos y al centro de la tierra, debemos agregar aquí que en varios documentos mayas aparecen dibujos de tipo geográfico en los que se señalan lugares que son cabeza, corazón, brazos, etc. de una región. Véase por ejemplo en Chumayel (Roys, 1933, p. 86). Avendaño y Loyola (Ms., f. 59r) relata que halló unos edificios que estaban en la mitad de una provincia "que llaman el ombrigo de la tierra".

¹⁸ *Pahuahtun*, Las-erguidas-columnas-de-piedra. Como se ha dicho ya, los Pahuahtunes eran deidades relacionadas con los puntos cardinales, las lluvias y los vientos. El nombre puede descomponerse así: "*paa* [pa']: muralla o baluarte, castillo, torre o fortaleza"; *uah*, erguido; compárese "*uahom*: ha de pararse"; *tun*, piedra. Los ejemplos entre comillas son del Diccionario de Motul (véase Roys, 1930, apéndice A).

¹⁹ *Ix Puc yolá*, La-señora-destructora-del-corazón-del-agua. *Puc* lo define el Diccionario de San Francisco (Ms.) así:

"deshacer como cosas de barro con la mano"; y es pronombre posesivo de tercera persona; -ol, corazón y -a, agua.

²⁰ *1x Ual Icim*, La-señora-tecolote-de-alas-extendidas. *Ual* es término que significa extendido como hoja y con él se designa a las hojas de papel, a los abanicos y a las hojas grandes como las del plátano; *icim* es el tecolote de orejas *Bubo*, sp.

²¹ La referencia a individuos con apariencia de sapos o a que "gritarán las ranas uoes a mediodía", son claras alusiones a cierta ceremonia del culto agrícola practicada hasta nuestros días que recibe el nombre de *Ch'achac*, que significa crear o tomar lluvia. De Basauri (1931) son estas líneas ilustrativas de la ceremonia, efectuada por indígenas mayas de Quintana Roo: "A espaldas de la milpa escogen y aplanan una extensión de terreno como de veinte metros cuadrados y en cada una de las esquinas levantan tablado sobre el cual se para un indio que representa una divinidad. En el centro de dicho espacio se congregan los demás asistentes, quienes tienen la misión de imitar el grito de los sapos y de las ranas, para atraer la lluvia..." Por su parte, Pacheco Cruz, un maestro de escuela yucateco, autor de un *Estudio etnográfico de los mayas del ex Territorio de Quintana Roo*, da una descripción del rito *ch'achac* ocurrido en Valladolid, Yuc., en que expone cómo ciertos individuos que intervienen en ella representan ranas y sapos: "Pero la escena más culminante e imponente fue a las tres en punto de la tarde; la hora suprema para ellos; observé que en cada uno de los cuatro palos que servían de columna al altar fueron atados por los pies a niños que deberían imitar a perfección el croar de la rana; fueron bautizados con los nombres de bez-much, uómuch, lec-much, i cárrillo-much..." (Mérida, 1937, p. 71).

²² Entre los animales que simbolizan a los opresores, todos depredadores, se cuenta el oso melero, *cabcoh*, también llamado kinkaju o martica, un prociónido del género *Potos*; es nocturno, de cola prensil. Come aves, huevos, miel, insectos y frutas. Gaumer (1917, p. 220) dice de él: "Cuando se halla libre este animal, es algo cruel y sanguinario, aunque parece preferir el alimento vegetal."

²³ *Lahun Chable*, Diez-hoja-escamosa. *Lahun* es el numeral diez; *chab*, según el Diccionario de Motul, es "caspa muy espesa o sudor de la cabeza y mal olor de hedor de la muger"; *le'* es hoja. Existió un lugar llamado Chablé en la región de Bacalar (véase Cogolludo, 1867, vol. 1, p. 132) y existe ahora en Tabasco. En Yucatán igualmente existen otros pequeños lugares con este nombre. Es también nom-

bre de familia en la península y aun en Tabasco. Cf. Roys (1930, p. 159).

²⁴ *Lahun Chan*, Diez-poderoso. El nombre de esta deidad ha sido traducido "el dios del décimo cielo" por Roys (1930, pp. 100-101), quien lo identifica con una deidad que aparece en el Códice de Dresden, la cual está relacionada con el planeta Venus. Aun cuando es verdad que *Chan* significa cielo y serpiente en chol (*can* en maya yucateco por serpiente, *caan* para cielo), *chaan* (así con doble a) en Yucatán, según el Diccionario de Motul, es: "cosa bastante, suficiente y poderosa". Enumerando las deidades mayas, Cogolludo (1867, p. 317) dice: "Otro ídolo tenía los dientes muy disformes, llamado *Lakunchan*." Sin duda, como cree Roys, esta deidad es la misma que el *Lahun Chaan* aquí mencionado. Lo de los dientes disformes es porque en maya yucateco *chaam* es muela, pero nunca aparece en los textos que estudiamos escrito el nombre de la deidad con *m* final, sino siempre con *n*, por lo que Cogolludo sufrió un error.

²⁵ *Cit Bolon Ua*, Decidor-grandes-mentiras. Aun cuando *cit* se ha traducido por padre en otros nombres y *bolon* por nueve, este término no solamente es numeral sino también intensivo y el primero puede ser una forma de decir. *Ua* lo define el Diccionario de Motul como "mentir y tramar". De otro modo podría traducirse El-padre-nueve-mentiras.

²⁶ De los cuatro Bacabes dice Landa (1938, ed. yuc., pp. 64-65) que eran "cuatro hermanos a los cuales puso Dios, cuando crió el mundo, de las cuatro partes del, sustentando el cielo no se cayese. Decían también destos Bacabes, que escaparon cuando el mundo fue del diluvio destruido. Ponen a cada uno destos otros nombres y señalanle con ellos a la parte del mundo que Dios le tenía puesto, teniendo el cielo; y aprópiante una de las cuatro letras dominicales a él y a la parte que está; y tienen señaladas las miserias o felices sucesos que decían habían de suceder en el año de cada uno destos, y de las letras con ellos... La primera, pues, de las letras dominicales, es *kan*; el año que esta letra servía, era el agüero del Bacab que, por otros nombres llaman *Hobnil*, *Kanalbacab*, *Kanpauhtún*, *Kanxibchac*; a éste señalaban a la parte del medio día. La segunda letra es *Muluc*: señalábanle al oriente; su año era agüero el Bacab que llaman *Canzienal*, *Chacalbacab*, *Chacpauhtun*, *Chacxibchac*. La tercera letra es *Ix*: su año era agüero el Bacab que llaman *Zaczini*, *Zacalbacab*, *Zacpauhtún*, *Zacxibchac*; señalábanle a la parte del norte. La cuarta letra es *Cauac*: su año era agüero el Bacab que llaman *Hozanek*, *Ekelbacab*, *Ekpauhtún*, *Ehxibchac*; a éste señalaban a la parte

del poniente". El nombre Bacab significa vertedor. Véase Diccionario de Motul: "*baac*: derramar agua o otro licor de vasija angosta". El sufijo *-ab* es instrumental.

²⁷ *Kinich Kakmó*, Guacamaya-de-fuego-de-rostro-solar, es una deidad que fue adorada en Itzamal, como contraparte de Itzamna, aunque los datos sean por hoy confusos. Véase lo que Lizana (1893, f. 11r) dice de la deidad: "...Ytzamal, donde en la Gentilidad avia un templo donde adoravan un idolo con figura del Sol, llamado en esta lengua de Maya Kinich Kakmó, que en la nuestra quiere decir, Sol con rostro, que sus rayos de varios colores, como las plumas de Guacamaya, qual fuego abrasavan los sacrificios. Y a este dios consultaban, como dicho es, para los temporales, enfermedades, pestes, y todas las cosas menesterosas para la vida humana; y del dizen recibian consuelo para lo que avian menester."

El nombre se descompone así: *kin* significa sol; *ich*, rostro; *kak*, fuego y *mo'* es el nombre de la guacamaya roja.

En el *Popol Vuh* (Recinos, 1947, pp. 103 ss.) aparece una deidad Vucub-Caquix, Siete-guacamaya, que se creía el sol, antes de que este astro brillase, y así decía: "Yo soy el sol, soy la claridad de la luna... grande es mi esplendor. Por mí caminarán y vencerán los hombres... y la faz de la tierra se ilumina cuando salgo frente a mi trono. Así, pues, yo soy el sol, yo soy la luna, para el linaje humano."

²⁸ "Hijos sin linaje materno" es una expresión ofensiva. Actualmente, en Yucatán se conserva el significado de la falta de madre. Una persona sin sentimientos humanitarios, que no respeta las instituciones sociales, que le falta buena educación, es una persona "que no tiene madre". Landa (1938, ed. yuc., p. 58), hablando de la educación de las mujeres, dice a este respecto: "Dicen, por mucho baldón y grave reprensión a las mozas mal disciplinadas, *que parecen mujeres criadas sin madre*."

²⁹ El nombre de Uxmal puede ser aquí un error por Itzamal, que era lugar de Kinich Kakmó.

³⁰ Las dos plantas aquí mencionadas son de difícil identificación. Existen registrados los nombres *Kax*, una *Randie* e *Ixhouen*, una *Spondias*.

³¹ Sobre los nombres de estas estrellas véase n. 15, en la p. 162.

³² *Maycu*, Venado-tecolote, *Mayapan*, Estandarte-venado. Siempre ha sido un problema la interpretación del elemento *may* formativo de Maya y sus derivados. Pero *may* es forma derivada de una vieja raíz relacionada con la idea de apresar, coger, y de ahí que entre en la formación de va-

rias palabras que significan la acción de coger con las manos o la extremidad misma, mano o pie, del hombre y de los animales. Así tenemos que *mach* es coger con la mano y *may* es pezuña hendida, como *moch'* es pata de ave y *mool* garra de mamífero, etc. Con *may*, pezuña, se nombra al venado, aunque el Diccionario de Motul dice que se aplica al "venadillo pequeño criado en casa" (véase *ah may*), como con *mool* se designa al jaguar (*chacmool* o simplemente *mool*). Recuérdese que en los tonalámatl de la altiplanicie el día *mazatl*, venado, se representa a veces con sólo la pezuña del ciervo y que su correspondiente día maya *manik*, se representa con una mano en actitud de agarrar. El elemento *-cu* en *Maycu* lo tomamos como tecolote, pero puede ser un locativo, en cuyo caso significaría Venado-lugar. El nombre *maya* podría significar, por otra parte, Venado-agua, es decir, Venado del agua, ya que *-a* en los nombres mayas siempre se refiere al líquido. *Maycu* es uno de los nombres que acompañan a Mayapan que se discute en otro lugar.

³³ "Marca del pie" y "huella del pie" parecen ser frases hechas en los documentos escritos por indígenas. Chimalpahin Quauhtlehuanitzin usa decir "con los cabellos aminorados les decir, en plan de guerra! a imponer la huella del pie", para explicar la conquista de alguna población por los conquistadores y la humillación sufrida por los vencidos.

³⁴ *Kinchil Cóbá*, Chachalaca-de-rostro-solar, es aquí claramente un lugar. Sin embargo, Avendano y Loyola (Ms., I. 29v) menciona este nombre como el de una deidad que es para los Itzaes, en 1690, "su vijía y sentinela que los defiende de todos sus contratiempos". Es posible, como creen Thompson (Thompson, Pollock, Charlot, 1932, p. 6) y Roys (1930, p. 82), que el nombre corresponda a la actual Cóbá arqueológica. Es también posible que la principal deidad allí adorada en tiempos antiguos haya sido Kinchil Cóbá. El nombre ha sido traducido Chachalaca-de-rostro-solar, en virtud de que *Kinchil* es forma reducida de *kin-ich-il*, siendo *kin*, sol; *ich*, rostro; *-il*, sufixo de genitivo. Cóbá es uno de los nombres de la chachalaca, *Ortalis*, sp. Puede verse el Diccionario de Motul: "*ahcoba*: especie de faisanes llamados bach". En efecto, *bach* es el nombre más conocido del ave. Por otra parte, en la versión del texto de la profecía del mismo 13 Abau que aparece en la Segunda Rueda, correspondiente al Libro de Tizimin, el lugar del asiento se llama *cabal ix bach*, el-pueblo-de-la-chachalaca, mientras que la versión de Chumayel tiene Kinchil Cóbá allí como aquí. Esta ave es diurna, anuncia con sus gritos

tanto la salida como la puesta del sol y tiene en el rostro unas membranas rojas como las gallinas.

SEGUNDA RUEDA

¹ Se hace referencia aquí al excesivo trabajo a que fueron sometidos los nativos cuando se construyeron los templos, especialmente la Catedral de Mérida.

² El texto maya dice *sac ibteeloob cab*. *Sac* denota blanco, pero también falso; *ibteel* se ha dejado sin traducir, porque es de muy difícil interpretación. El morfema *ib*, aislado, nombra a cierta clase de frijol, posiblemente *Phaseolus lunatus* L., frijol lima pequeño, pero aparece en algunos otros nombres como componente: *ibach*, el mamífero desdentado, *Dasypus* sp., llamado popularmente armadillo o armado en español; *ibin*, *ibnel* o *ibnil*, la placenta y el cordón umbilical de los mamíferos. También entra a formar parte del nombre de la víbora coralillo: *chac ib can*, que puede traducirse por serpiente-frijol-rojo. El segundo componente de *ibteel*, *teel*, puede significar "pierna o espinilla de la pierna"; "ser necesario", "la mucha o vieja costumbre, o maña que uno tiene de hazer algo", según el Diccionario de Motul, pero en estos casos no está unido sufijamente a otro nombre. Aparece antes de otro en el compuesto *teelchac*, que significa "raíces largas y gruesas de árboles que suelen estenderse mucho y descubrirse por el campo y caminar", según el Diccionario citado, pero que etimológicamente dice: las piernas o espinillas de Chac. Parece que hay un significado no accesible por hoy de *ib*, que se refiere a opresión o maldad.

³ En un texto sin paralelo del Chumayel, Tantun está relacionado con Cozumel. Véase Roys (1933, p. 66). Tantun puede significar ante-la-piedra-preciosa.

⁴ *Ixanom*, que aquí aparece como Eva, se tiene como Adán en varios otros documentos: en el Diccionario de Motul se lee una vez: "*anom*: el primer hombre, Adán", y otra: "*ix anom*: nuestro primer padre. *Vide yax cheel cab*". Es importante notar que envía al lector a ver *yax cheel cab*, pero no registra el artículo. Sin embargo, Avendaño y Loyola, precisamente al tratar del *yax cheel cab* es cuando se refiere a *Ixanom* (x Anom), "nuestro primer padre", con las mismas palabras del Diccionario. Ver *supra*, n. 15. Según Sáenz de Santa María (1940), *anom*, en cakchiquel, significa "el que se escapó" y *poi anom*, "el mortal".

⁵ Montañas angulosas, es decir, las pirámides.

⁶ Esta referencia a "ahorcar a los hombres de edad avan-

zada" durante el predominio de signos que propicia el Sol Nueve, es decir, el ritual agrícola, se encuentra también en Avendaño y Loyola (1696), en que refiere que entre los Itzaes era costumbre matar a los viejos cuando llegaban a la edad de 50 años, para que no aprendiesen a ser brujos y a matar, costumbre que resulta lógica si se tiene en cuenta que la deidad rival del agua, el fuego, se representaba mediante un hombre viejo y con barbas, llamándose éste, por antonomasia, "el dios viejo", lugar que en nuestros días parece haber ocupado, entre otros varios, el Señor San José del culto católico, por representarse con la imagen de un hombre viejo y barbado.

⁷ De las hormigas que arruinan el maíz o destruyen "a las abejas meleras", trae Landa (1938, p. 71) una referencia al parecer inocente, pero de hecho llena del carácter hierático de todas las noticias que provenían de labios indígenas, particularmente cuando se referían a sus ideas religiosas: "Este año en que la letra era *Cauac* y reinaba el *Bacab Hozanek*, temían allende de la pronosticada mortandad por ruin, porque decían les habían los muchos soles de matar los maizales, y comer las muchas hormigas lo que sembrasen y los pájaros..."

⁸ *Silit* (o *Zilit*) lo toma Roys (1933, p. 54) por una forma de *zil*, nombre que, según Martínez Hernández le informó, se aplica a una palmera no identificada.

⁹ Sobre este particular es de interés conocer lo que dice Del Granado Baeza, cura de Yaxcabá, en su *Informe...* de 1813 (Mérida, 1937, pp. 7-8): "La segunda [superstición] es la que llaman *Kex*, que quiere decir cambio, y se reduce a colgar ciertas comidas y bebidas alrededor de la casa de algún enfermo, para el yuncimil, que quiere decir, para la muerte, o señor de la muerte, con lo que piensan rescatar la vida del enfermo. La tercera es colgar ciertas jicaras de bebidas, que llaman *sacá*, bajo las casas de colmenas para que no desamparen los corchos, o para que traigan mucha miel, o porque no enfermen sus dueños."

¹⁰ *Yuc* es el corzo americano, *Mazama pandora*, Merriam, cérvido de pequeño tamaño de color rojizo y cuernos sin ramificaciones.

¹¹ *Bolay*, según el Diccionario de Motul, es el "nombre genérico a todo animal bravo y que mata"; *chac* vale por rojo o fuerte. Pero *Chacbolay*, conforme al mismo Diccionario, se aplica específicamente al "tigre bermejo y bravo".

¹² *Ix pom kakil* dice el texto maya y esta fórmula, que literalmente significa La-del-fuego-de-copal, personificando,

quiere decir, según el Diccionario de Motul, "enfermedad de viruelas grandes" (el diccionario no antepone a *pom* el signo personal femenino). Las viruelas se llaman *kak*, fuego; actualmente son enfermedad santa; se las llama *santo kak*, fuego-santo, y están relacionadas con Cristo, por lo que también se las llama *u kakil cichcelem yum*, El-fuego-del-bello-Señor, y en español viruelas del Señor. La forma benigna está relacionada con la Virgen María y se la llama *u kakil cichpam colet*, El-fuego-de-la-bella-Señora, y en español viruelas de la Virgen.

Acerca de la santidad de la viruela, Baqueiro Anduze (1937, p. 61) dice: "...ésta no se llama, por ejemplo, viruela sino precisamente la Santa Viruela. Si alguien cometiese la imprudencia de llamarla de otro modo, pondría en grave peligro la vida del enfermo, o se expondría él mismo a contraerlas, porque los *Yumil-Kak*, los tres duendecillos *dueños* o señores de esta enfermedad y a los que se les da la figura de tres niños, se sentirán profundamente disgustados..."

En Comitán, Chiapas, los tojolabales, según Basauri (1931, pp. 42 ss.), adoran a un santo, San Caralampio, como "abogado contra la peste y aire contagioso", especialmente contra la viruela, ya que surgió al culto popular a consecuencia de una epidemia de dicha enfermedad que hubo en la región comiteca el año de 1862 y desde entonces se convirtió su santuario en uno de los más famosos del país, a pesar de la oposición del clero por no figurar San Caralampio en el martirologio.

Es importante considerar la relación que existe entre la viruela y el fuego, palpable, no solamente en su nombre—fuego, copal—sino en su dedicación a Cristo y en algunos hechos colaterales como el que refiere Basauri que aconteció cuando un sacerdote, en 1910, se atrevió a aseverar desde el púlpito que el santo abogado de la enfermedad, San Caralampio, no figuraba en el martirologio cristiano: "pues esa misma noche, al tratar de encender una lámpara de alcohol, se inflamó todo el contenido del depósito, y el sacerdote recibió quemaduras en el rostro".

¹³ Véase n. 9, en p. 182.

¹⁴ *Ax*, otro término cuyo significado es de difícil interpretación. Significaba y significa aún ahora verruga y no se le conoce otra acepción.

¹⁵ "...los cinco estados del país llano." El texto maya dice *hotzuc chakan*, literalmente las-cinco-divisiones-de-la-sabana. El Katun 1 Ahau de que aquí se trata tuvo como asiento a Emal, un lugar que posiblemente sea el mismo

que se encuentra en la costa norte de Yucatán un poco al oriente del meridiano de Tizimin. En aquellas regiones hay abundantes sabanas o "países llanos", en el sentido de llanura sin árboles. Sin embargo, Mérida, la antigua Ichcaansihó, está en un territorio que perteneció a la provincia o pequeño Estado de Chakan, que significa sabana, porque está rodeada de tal clase de terreno.

¹⁶ Respecto al sacrificio de infantes en relación con el culto agrícola, obsérvese lo que dice Sahagún (1938, pp. 119-121) de los altos de México: "Al tercero mes llamaban *tozotontli*: en el primero día de este mes hacían fiesta al dios llamado *Tlaloc*, que es dios de las lluvias. En esta fiesta mataban muchos niños sobre los montes; ofrecíanlos en sacrificio a este dios y a sus compañeros para que los diesen agua...

"En este mes Atlcahualo mataban muchos niños: sacrificábanlos en muchos lugares y en las cumbres de los montes, sacándoles los corazones a honra de los dioses del agua, para que les diesen agua o lluvias.

"A los niños que mataban componíanlos con ricos atavíos para llevarlos a matar, y llevábanlos en unas literas sobre los hombros, y las literas iban adornadas con plumajes y con flores: iban tañendo, cantando y bailando delante de ellos.

"Cuando llevaban a los niños a matar si lloraban y echaban muchas lágrimas, alegrábanse los que los llevaban, porque tomaban pronóstico de que había de tener muchas aguas ese año...

"En las calendas del primer mes del año, que se llamaba *quauitlecá*, y los mexicanos le llamaban *atlcahualo*, el cual comenzaba segundo día de febrero, hacían gran fiesta a honra de los dioses del agua o de la lluvia llamados *Tlaloque*; para esta fiesta buscaban muchos niños de teta, comprándolos a sus madres; escogían aquellos que tenían dos remolinos en la cabeza y que hubiesen nacido en buen signo: decían que éstos eran más agradable sacrificio a estos dioses, para que diesen agua en su tiempo. A estos niños llevaban a matar a los montes altos, donde ellos tenían hecho voto de ofrecer; a unos de ellos sacaban los corazones en aquellos montes, y a otros en ciertos lugares de la laguna de México. El un lugar llamaban *Tepetzinco*, monte conocido que está en la laguna; y a otros en otro monte que se llama *Tepepulco*, en la misma laguna; y a otros en el remolino de la laguna que llaman *Pantitlan*. Gran

cantidad de niños mataban cada año en estos lugares; [y] después de muertos los cocían y comían.

"En esta misma fiesta, en todas las casas y palacios levantaban unos palos como varales, en las puntas de los cuales ponían unos papeles llenos de gotas de *ulli*, a los cuales papeles llamaban *amatetéuilli*; esto hacían a honra de los dioses del agua. Los lugares donde mataban los niños son los siguientes: el primero se llama *Quauhtépetl*; es una sierra eminente que está cerca de Tlatelolco. A los niños, o niñas que allí mataban poníanlos el nombre del mismo monte, que es *Quauhtépetl*; a los que allí mataban componíanlos con los papeles teñidos de color encarnado. Al segundo monte sobre el que mataban niños llamaban *loaltécatl*; es una sierra eminente que está cabe Guadalupe; ponían el mismo nombre del monte a los niños que allí morían, que es *loaltécatl*, [y] componíanlos con unos papeles teñidos de negro con unas rayas de tinta colorada. El tercer monte sobre que mataban niños se llama *Tepetzinco*; es aquel montecillo que está dentro de la laguna frontero del *Tlatelolco*; allí mataban una niña y llamábanla *Quetzdioxoch* porque así se llamaba también el monte por otro nombre; componíanla con unos papeles teñidos de tinta azul. El cuarto monte sobre que mataban niños se llama *Poyauhilla* [y] es un monte que está en los términos de Tlaxcala, y allí, cabe Tepetzinco, a la parte de oriente tenían edificada una casa que llamaban *ayauhcalli*, en esta casa mataban niños a honra de aquel monte y llamábanlos *Poyauhilla*, como al mismo monte, que está acullá en los términos de Tlaxcala; componíanlos con unos papeles ravados con aceite de *ulli*. El quinto lugar en que mataban niños era el remolino o sumidero de la laguna en México, al cual llamaban *Pantitlan*; a los que allí morían llamaban *epcóatl*; el atavío con que los aderezaban eran unos atavíos que llamaban *epnepaniuhquí*. El sexto lugar o monte donde mataban estos niños se llama *Cócotl*; es un monte que está cabe Chalco Atenco; a los niños que allí mataban llamábanlos *Cócotl*, como al mismo monte, y aderezábanlos con unos papeles la mitad colorados y la mitad leonados. El séptimo lugar donde mataban los niños era un monte que llaman *Yiauhqueme*, que está cabe *Atlacuihuaya*; poníanlos el nombre del mismo monte; ataviábanlos con unos papeles de color leonado.

Estos tristes niños antes que los llevarán a matar aderezábanlos con piedras preciosas, con plumas ricas y con mantas y *maxtles* muy curiosas y labradas, y con cotaras muy labradas y muy curiosas, y poníanlos unas alas de

papel como ángeles y teñíanles las caras con aceite de *ulli*, y en medio de las mejillas les ponían unas rodajitas de blanco; y poníanlos en unas andas muy aderezadas con plumas ricas y con otras joyas ricas, y llevándolos en las andas, ibanles tañendo con flautas y trompetas que ellos usaban. Y por donde los llevaban toda la gente lloraba, cuando llegaban con ellos a un oratorio que estaba junto a *Tepetzinco*, de la parte del occidente, al cual llamaban *Tozocan*; allí los tenían toda una noche velando y cantábanles cantares los sacerdotes de los ídolos, porque no durmiesen. Y cuando ya llevaban los niños a los lugares a donde los habían de matar, si iban llorando y echaban muchas lágrimas, alegrábanse los que los veían llorar porque decían que era señal que llovería muy presto. Y si topaban en el camino algún hidrópico, teníanlo por mal agüero y decían que ellos impedían la lluvia."

KATUNES AISLADOS

¹ Landa refiere que los ídolos de madera eran apreciados sobre los de cualquier otro material, y asimismo considerados como lo más valioso en las herencias. Entre estos "ídolos" hay que considerar las máscaras de madera, que parecen haber sido insignias que usaban los príncipes, con los atributos de determinada deidad. En el testimonio de Juan Dzul de Hocabá, obtenido en la información contra la idolatría por Fray Francisco Toral, primer Obispo de Yucatán, en 1562, que reproducen Scholes y Adams (1938, vol. 1, p. 137), se lee: "Preguntado si este declarante ha tenido ídolos y libros, dijo que es verdad que ha tenido ídolos y libros y máscaras, y cuatro máscaras trajo... El testigo Francisco Cen, en la misma ocasión, declaró "que cuando sacrificaron y mataron a la dicha muchacha tenían presentes treinta o cuarenta ídolos de barro pequeños y más de veinte máscaras de palo, los cuales tenían con rama aderezados".

² *Ah Canul*, El-guardián. A la gente "mexicana" que los Cocom tuvieron en Mayapan para su protección se les llamó *Ah Canul*. Según Landa (1938, ed. yuc., p. 18), "porque eran extranjeros, y que así los dejaron dándoles facultad para que poblasen pueblo apartado para si solos o se fuesen de la tierra, y que no pudiesen casar con los naturales de ella sino entre ellos, y que éstos escogieron quedarse en Yucatán y no volver a las lagunas y mosquitos de Tabasco, y poblaron en la provincia de Canul que les fue señalada, y que allí duraron hasta las guerras segundas de los españo-

les". Esta provincia estaba situada en la parte occidental de la península comprendiendo la región de Calkini y la costa adyacente.

³ La referencia a "entonces será el teñirse de añil" halla confirmación, como costumbre, en Landa, pareciendo que el embadurnamiento con la pasta azul hecha de añil llamada en maya *ch'oh*, se relacionaba con ritos de la fecundidad, es decir, con el ritual agrícola. Refiere Landa (1938, ed. yuc., pp. 51-52, 85 y 97), en su capítulo "Sacrificios y Mortificaciones Cruels y Sucios de los yucatanenses. Víctimas Humanas Matadas a Flechazos y Otros", una especial manera de matar en la cual entraba el embadurnarse con pasta azul de añil:

"Y llegado el día, juntábanse en el patio del templo; y si había de ser sacrificado a saetadas, desnudábanle en cueros y untábanle el cuerpo de azul, con una corozza en la cabeza; y después de alanzado el demonio, hacía la gente un solemne baile con él, todos con arcos y flechas alrededor del palo; y bailando, subíanle en él y atábanle, y siempre bailando y mirándole todos. Subía el sucio del sacerdote vestido y, con una flecha en la parte verenda, fuese mujer o hombre, le hería y sacaba sangre; y bajábase y untaba con ella los rostros al demonio; y haciendo cierta señal a los bailantes, le comenzaban a flechar por orden, como bailando pasaban a priesa, al corazón, el cual tenía señalado con una señal blanca; y de esta manera poníanle todos, los pechos en un punto, como erizo de flechas.

"Si le habían de sacar el corazón, le traían al patio con gran aparato y compañía de gente y, embadurnado de azul y su corozza puesta, le llevaban a la grada redonda, que era el sacrificadero; y, después que el sacerdote y sus oficiales untaban aquella piedra con color azul y echaban, purificando el templo, al demonio, tomaban los *chaces* al pobre que sacrificaban, y con gran presteza le ponían de espaldas en aquella piedra y asíanle de las piernas y brazos todos cuatro, que le partían por medio."

También da el mismo cronista noticias de la pasta azul de añil en las ceremonias del mes *Yaxkín*: "En este mes de *Yaxkín*, se comenzaban a aparejar como solían, para una fiesta que hacían general en *Mol*, en el día que señalaba el sacerdote, a todos los dioses; llamábanla *Olob-Zab-Kamyax*. Lo que después, juntos en el templo y hechas las ceremonias y sahumerios que en las pasadas hacían, pretendían era untar, con el betún azul que hacían, todos los instrumentos de todos los oficios, desde el sacerdote hasta los husos de las

mujeres y los postes de sus casas"; y finalmente, en ceremonias del ritual agrícola efectuadas en el mes *Mac*: "Esto hecho con su devoción acostumbrada, untaban el primero escalón del montón de las piedras con lodo del pozo, y los demás escalones con betún azul, y echaban muchos sahumerios y invocaban a los Chaces y a Izamná con sus oraciones y devociones, y ofrecían sus presentes."

⁴ La referencia "estucarán con pintura", atañe a la costumbre que parece haber existido de pintar y remozar las casas habitaciones en los pueblos sometidos, por sus moradores, como indicación de rebeldía y preludio de dificultades para los caciques que tenían sumisa la población. En Chimalpahin Quauhtlehuanitzin se encuentra que estando los mexicas en Culhuacán, Cerro de la Estrella, sometidos a los señores culhuas, estucaron con pintura sus casas "durante cuatro años", como manifestación de su rebeldía contra el gobierno culhua, tutela de la que al fin se independizaron y aun sojuzgaron (Silvia Rendón, 1947, Ms.).

⁵ *Bolon Mayel*, según el Diccionario de Motul, es "qualquier olor suavísimo y trascendente".

Bolon Dzacab, según el Diccionario de Motul, es "cosa perpetua". *Dzacab* significa generalmente generación, grado de parentesco.

⁶ *Piltzintecuhltli* es vocablo mexicano. Se le identifica como "el sol joven". Está compuesto de *pil(li)* infante, más la forma reverencial *tzin*, y la palabra *tecuhltli*, príncipe, señor. Su papel en la mitología es oscuro y bastante confuso.

⁷ *Ixtab* fue la deidad patrona de los que se ahorcaban. Véase lo que asienta Landa (1938, ed. yuc., p. 62): "Decían también, y tenían por muy cierto, iban a esta su gloria los que se ahorcaban; y así había muchos que con pequeñas ocasiones de tristezas, trabajos o enfermedades, se ahorcaban para salir dellas, y ir a descansar a su gloria, donde decían los venía a llevar la diosa de la horca que llamaban *Ixtab*." En efecto, en el Códice de Dresden 53a, aparece una deidad femenina con una cuerda en la garganta, de la que pende. La palabra *tab*, en maya de Yucatán, significa, según el Diccionario de Motul: "cordel o cuerda con que los indios atan y llevan las cargas a cuestras", "atadero, cuerda, rama con que se ata algo", y también: "horca donde ahorcan a los malhechores; *unde tab ca!* ahorcarse uno mismo". Cita Landa también (*op. cit.*, p. 79), como diosa de la caza, a *tabai* (en la edición mencionada mal transcrito, acoplándose dos nombres: *Zipitibai* que debe leerse *Zip* y *Tabai*). Sin duda se refiere a la misma deidad, quizás como pa-

trona de la caza con lazos. La forma *tabal* está compuesta de *tab* más el sufijo *-ai* o *-ay*, que denota acción, ejercicio. Es importante hacer notar que actualmente la deidad *tabai*, llamada más comúnmente *Ixtabai* o *Xtabai*, se ha transformado en un demonio con función de profilaxis social, pues aparece como una bella mujer con el cabello suelto, en los caminos, para atraer a los hombres, que la siguen engañados para recibir sólo la muerte. Vive en las ceibas o en las grutas; en ocasiones se convierte en un nopal o en una serpiente de doble cola, al ser abrazada por el hombre que la sigue. En algunas versiones de sus hazañas las víctimas son ahorcadas, ahogadas por la doble punta de la cola de la serpiente, apuñaladas o simplemente se vuelven locas.

8 La mención constante de que "se escalará lo alto de los montes" o "arderá lo alto de los montes" durante el predominio de los símbolos celestiales hace pensar desde luego en el culto agrícola de los altos de México, que se celebraba en la cima de los cerros donde se juntaban nubes, a honra de Tlaloc, de quien dice Sahagún (1938, pp. 17, 48-51 y 102):

"Este dios llamado Tlaloc Tlamacazqui era el dios de las lluvias. Tenían que él daba las lluvias para que regasen la tierra, mediante la cual lluvia se criaban todas las yerbas, árboles y frutas y mantenimientos; también tenían que él enviaba el granizo y los relámpagos y rayos, y las tempestades del agua, y los peligros de los ríos y de la mar. En llamarse Tlaloc Tlamacazque quiere decir que es dios que habita en el paraíso terrenal, y que da a los hombres los mantenimientos necesarios para la vida corporal: los servicios que se le hacían están en el segundo libro, entre las fiestas de los dioses."

9 *Ah Mucen Cab*, El-que-guarda-la-miel. Aparece a veces como *Ah Muzen Cab*. Actualmente existen entre los mayas de Quintana Roo, según Redfield, los *Mulzen Cab*, deidades apícolas residentes en Cobá. Véase Roys (1933, p. 64).

10 Según las noticias que se tienen en las fuentes sobre el tizne y el entiznamiento, tal rito se efectuaba en ocasión de penitencias. Aquí, sin embargo, su sentido es el de haberse usado como afrenta y vergüenza.

11 Respecto al sacrificio de "huérfanos de madre, huérfanos de padre", es decir, de gentes que carecían de protección, véase lo que dice Landa (1938, ed. yuc., p. 51): "Que sin las fiestas en las cuales, para la solemnidad de ellas, se sacrifican personas, también, por alguna tribulación o necesidad, les mandaba el sacerdote o chilanes sacrificar personas; y para esto, contribuían todos para que se comprasen esclavos."

vos, o algunos de devoción daban sus hijitos, los cuales eran muy regalados hasta el día y fiesta de sus personas, y muy guardados que no se huyesen o ensuciasen de algún carnal pecado..."

12 "...se enrosque el cogollo del henequén *ch'elem*." El *ch'elem* es uno de los agaves nativos de Yucatán —¿*Agave ixtli*?—. Crece silvestre, sobre todo en los terrenos pedregosos y, naturalmente, es de gran resistencia a las sequías. La expresión, pues, se refiere a un exceso tal de calor solar que ni siquiera las plantas como el *ch'elem* podrían soportar.

13 El norte y el poniente son regiones de donde vienen males. De ambas soplan vientos que enferman, el *xaman caan*, viento del norte, y el *chikin ik*, viento del poniente, son temidos, porque producen enfermedades. El primero porque es frío y el segundo porque de esa región viene todo lo malo. Cuando sopla el *chikin ik*, las madres ocultan a sus niños para que ese viento no los dañe.

14 *Mucuy* es el nombre maya de Yucatán de la tortolilla *Columbigallina* de cualquier especie. Es término aplicado a veces a las mujeres, especialmente a las púberes, actualmente.

15 *Ah Ektenel Ahau*, El-Señor-de-la-flauta-negra; *Chactenel Ahau*, El-Señor-de-la-flauta-roja; *Sactenel Ahau*, El-Señor-de-la-flauta-blanca. Los elementos que en estos nombres se refieren al color son *Ek*, *Chac* y *Sac*. *Ahau* vale por Señor. *Tenel* está traducido por flauta, aunque pudiera ser músico. En los diccionarios yucatecos no existe el término *tenel*, pero en el huasteco de Tapia Zenteno (p. 85) se halla: "Tocar instrumento, *Teney*." El que los toca: *Tenel*. Cf. cakchiquel *tunau*, tocar la trompeta (Sáenz de Santa María, 1940, p. 374). En el maya yucateco, *chul* es el nombre de la flauta. En la región huasteca de San Luis Potosí se le suele llamar *ten* a la flauta.

16 Aquí hay una interpretación, al parecer popular, del nombre *chilan* que es como a veces viene escrito. Según el maya moderno, *chil* es el morfema que denota la idea de echarse, acostarse, y *chila'an* significa acostado, tendido. Pero en el siglo xvi, según los diccionarios conocidos, este morfema tenía la forma *chel* y el participio correspondiente era *chela'an* y no *chila'an*. El nombre *chilam* viene de boca, en el sentido de habla, según se ha explicado en la introducción general.

17 Obsérvese el paralelismo que presenta esta oscura expresión: "será el tiempo del bastón de oro y será el tiempo

de la cera blanca", con una escena descrita en los *Anales de Quauhtinchan* en que uno de los personajes, el sacerdote *Quetzaltehuéyac*, "hundió su bastón en el interior de la cueva del cerro de Colhuaca y de adentro vino pegada a su bastón una abeja de miel, al sacar él su bastón. Por este motivo se llamó Xicotopilli (bastón de abeja)" (1947, p. 90). Siguiendo la relación del texto, se ve que la "abeja de miel" que salió pegada al bastón del personaje es uno de los propios individuos que dentro del "Cerro de Colhuaca" estaban reunidos, y que éstos, por otra parte, se llaman a sí mismos "abejitas montesas de miel", todo lo cual parece colocar nuevamente al estudioso frente a otro de los frecuentes problemas derivados del uso de nombres y símbolos totémicos del México antiguo, en este caso abejas y bastones que llevarían insignias apícolas, que según parece serían abejas auténticas, tales como la cera.

18 Compárese lo que dice Cogolludo (1867, p. 284): "...junto al edificio del templo en algunas partes hay otro, donde vivían unas doncellas, que eran como monjas, al modo de las vírgenes vestales de los romanos. Tenían su superior, como Abadesa... por la guarda de su virginidad, y de los que estaban a su cargo. Tenían portera para guarda de su recogimiento, y cuidaban del fuego que había continuo en los templos, y si se apagaba, tenían pena de la vida, a quien le cabía tener cuidado de ello."

19 "Harfais el papel de venado", es decir, serfais sacrificados como venados. Véase lo que Juan Magaña dice en su "Relación de Zotuta y Tibolon", en Landa (1938, ed. yuc., pp. 269 ss.) a respuesta 14: "Adoraban a ídolos hechos de piedra y palo y de barro, que ellos propios hacían: y tenían sus sacerdotes que ellos llaman *alquines* [*ah kines*], que hacían el sacrificio por el pueblo, quera dalles sangre de venados y otros animales; quieren decir que sacrificaban sangre y corazones de hombres, quemándoles incienso de la tierra, que acá llaman *copal*."

Cuando la conquista española se verificó, existía la tradición de que antes de la penetración del culto a Quetzalcóatl, los mayas no eran idólatras. Juan de la Cueva Santillán, en su "Relación de Isamal y Santa María", incluida en la obra ya citada (pp. 187 ss.), en la misma respuesta 14 dice: "Dícese que los primeros pobladores de Chichenizá no fueron idólatras hasta que *Kukulcan*, capitán mexicano, entró en estas provincias, el cual enseñó la idolatría como ellos dicen que éste les enseñó". Por su parte, Pedro de Santillana, en la "Relación de Quinacama o Moxopipe (ac-

tual Muxupip)" (*op. cit.*, pp. 195 ss.), a la misma respuesta 14 asienta: "Dicen los antiguos desta provincia, que antiguamente, cerca de ochocientos años ha en esta tierra no idolatraban, y después que los mexicanos entraron en ella y la poseyeron, un capitán que se decía Quetzalcuat en la lengua mexicana... y este capitán susodicho introdujo en esta tierra la idolatría y usó de ídolos por dioses, los cuales hacían hacer de palo y de barro y de piedra, y los hacía adorar y les ofrecían muchas cosas de caza y de mercaderías y, sobre todo, la sangre de sus narices y orejas y corazones de algunos que sacrificaban con sahumerios de copal, que es el encienso desta tierra..."

²⁰ Esta expresión, "flores y tomar esposas", corresponde en sentido a la de *kam nicté* que el Diccionario de Motul trae por "casarse y el matrimonio", cuando de hombres se trata, porque casarse para mujeres se dice *kam uinic*, que el citado léxico explica que significa "desposado, o esposo que otorga para casarse y condescender de la parte del varón para este efecto". *Kam* significa recibir, y *uinic* varón. *Nicté* es nombre genérico para flor o rosa y en particular de la variedad llamada actualmente en Yucatán Flor de Mayo (Plumeria); además, según el Motul, *Nicté* significa "deshonestidad, vicio de carne y travezuras de mujeres", y *nictéil than*, "palabras deshonestas y lascivas", y *nictéil uinic*, "mala mujer de su cuerpo", etc., de donde se ve que la voz *nicté*, además de indicar flor, es una forma sinónima para indicar sexo femenino.

²¹ La mención de las pinturas de las superficies de los muros, la trae Landa (1938, ed yuc., p. 35) al referirse a las casas: "...y que la otra mitad blanquean de muy gentil encalado, y que los señores las tienen pintadas de muchas galanterías, y que esta mitad es el recibimiento y aposento de los huéspedes..." Por su parte, Sánchez de Aguilar (1937, p. 1940), al referirse a los "famosos, grandes, y espantosos edificios de cal y canto, y sillería, y figuras y estatuas de piedra labrada, que dexaron en Oxumal [Uxmal] y en Chichinatzá, que oy se veen, y se pudieran habitar", dice que "...en las paredes destos dexaron los Mexicanos muchas figuras pintadas de colores vivos, que oy se veen de sus sacrificios, y bailes..."

²² Acerca de *Chunucan*, el Diccionario de Motul dice: "*ah chun can*: ydolo de los indios antiguos de Mérida. Item el cerro grande que está tras Sant Francisco de Mérida". Por su parte, Cogolludo (1867, vol. 1, p. 319) relata: "Los de Tihoo, donde está la ciudad de Mérida [tenían] otro [ídolo]

llamado *Añchun caan*. Y así se llama el cerro, que está al oriente de nuestro convento, que debía de estar en él."

CUCUB

¹ La constante alusión, en el culto acuático, al árbol *yaxché*, ceiba, recuerda los "Árboles de la Abundancia", establecidos por las deidades de la lluvia en alguna de las ocasiones de su predominio, como símbolos de su poderío. Del *Yaxché* dice Landa (1938, ed. yuc., pp. 61-62): "Esta vida futura decían que se dividía en buena y mala vida, en penosa y llena de descansos. La mala y penosa, decían era para los viciosos; y la buena y delectable, para los que hubiesen vivido bien en su manera de vivir; los descansos que decían habían de alcanzar, si eran buenos, eran ir a un lugar muy delectable donde ninguna cosa les diese pena, y donde hubiese abundancia de comidas y bebidas de mucha dulzura, y un árbol que allá llaman *Yaxché*, muy fresco y de gran sombra, que es ceiba, debajo de cuyas ramas y sombra descansasen y holgasen todos siempre." Núñez de la Vega (1702, p. 9, n.º 32, § XXIX, preámbulo) dice de la ceiba: "...oy en día en los Calendarios más modernos está corrupto el nombre latino de Nino en Ymox, pero colocado siempre en primer lugar, y su adoración alude a la Seiba, que es un árbol, que tienen en todas las plazas de sus pueblos a vista de la casa del Cauildo, y debajo de ella hacen sus elecciones de Alcaldes, y la sahuman con braseros, y tienen por muy asentado, que en las raíces de aquella Seiba son por donde viene su linage, y en vna manta muy antigua la tienen pintada, y algunos Maestros Nagualistas grandes, que se han convertido han explicado lo referido, y otras muchas cosas". Chimalpahin Quauhtlehuanitzin usa la expresión *in pochottl in ahuehuettl*, "la ceiba (pochote en mexicano), el ahuehuete", como insignia tribal de un grupo que llama *teotlixcas nonohualcas*, que, provenientes de una región marina no especificada, aparecen en los altos de México, según sus noticias, hacia mediados del siglo XIII. Teotlixca quiere decir El-del-rostro-del-sol, nombre que, según Chimalpahin Quauhtlehuanitzin, lo tomaron porque adoraban al Sol y hacia él se volvían cuando le reverenciaban. *Nonohualca* es gentilicio de *Nonohualco*, cuya etimología parece venir de *nonohu(ian)*, "por todas partes, por todos lados", más *al*, agua, en el dialecto olmeco mexicano, con una forma desinencial -co que existe en ciertos toponímicos. El significado de la expresión es algo así como

En-donde-hay-agua-por-todas-partes. La etimología popular de *nonohualco* está derivada de *nonlli*, mudo.

² *Ah Uuc Chapat* o *Ah Uucte Chapat*; este nombre, que aparece algunas veces sin el signo de masculino *Ah*, es el de una deidad nocturna, íntimamente relacionada con la tierra. Beltrán (1859, p.-228) describe el *chapat* como "Sabandija que entra en el oído y mata"; la sabandija no es otra que el ciempiés (*Scolopendra* Sp.).

Este miriápodo aparece en los códices en relación con el tocado de la deidad "D" de Schellhas, que se toma como lunar. Tozzer y Allen hacen notar que la cabeza del *chapat*, en sus representaciones del Códice de Dresden, se asemeja al signo *Akbal*, que significa noche.

³ Véase n. 10, en p. 159.

⁴ Esta referencia a "despojarse de ropas en los días de ayuno y penitencia", halla confirmación como costumbre en la noticia que da Chimalpahin Quauhtlehuanitzin sobre los mexicanos, que, derrotados y fugitivos, se refugiaron en Aztacalco Tulla, en donde desnudos, por penitencia, se pusieron solamente un faldellín de ortigas.

⁵ Esta expresión o sus equivalentes se encuentran con gran frecuencia en los documentos indígenas. No parece referirse a la madre y el padre en sentido biológico, sino a los príncipes y gobernantes, que son como la madre y el padre del *macehual*.

⁶ Landa (1938, ed. yuc., p. 77), al referirse al rito de los cazadores, que tenía efecto precisamente el día Siete del mes *Sip*, dice que invocaban "...a los dioses de la caza *Acanum*, *Zuhuy Sip i Tabai* y otros". Nótese que el numeral del nombre *Ah Uuc Suhuy Sip* es siete. *Sip* es todavía una deidad protectora de los venados en Yucatán y es descrita como un ciervo de gran tamaño que nunca puede ser cogido y que aparece ante el cazador para hacerle errar sus tiros. El morfema *sip* en el maya yucateco está en relación con ideas de errar, librar, morir y ofender (para este último significado véase *kuil* en el Diccionario de Motul; véase también *sip* en Sáenz de Santa María, p. 345). El venado era la víctima máxima que se cazaba para ofender. Una variante de *Ah Uuc Suhuy Sip* es *Ah Uuc Yol Sip*.

Otro mes maya tenía el propio nombre vulgar del venado, *Ceh*, y los cazadores no hacían en él ninguna ceremonia, sino en el inmediato anterior, llamado *Sac*, que propiciaban nuevamente a las deidades de la caza.

⁷ Esta es una alusión al sacrificio de sacar corazones

abriendo el pecho de las víctimas con navajones de piedra. Ya hemos transcrito (*supra*, p. 175) una descripción de Landa (1938, ed. yuc., p. 52) de tal sacrificio, y aun cuando no menciona que el sacrificador apoyara su rodilla en el cuerpo de la víctima, parece necesario que así fuera, para, con tal apoyo, abrirle mejor de un solo golpe el pecho: "Si le habían de sacar el corazón, le traían al patio con gran aparato y compañía de gente y... En esto llegaba el sayón *nacón* con un navajón de piedra, y dábale con mucha destreza y crueldad una cuchillada entre las costillas del lado izquierdo, debajo de la tetilla, y acudíale allí luego con la mano y echaba la mano del corazón, como rabioso tigre; y arrancábaselo vivo y, puesto en un plato, lo daba al sacerdote, el cual iba muy aprisa y untaba a los ídolos los rostros con aquella sangre fresca."

⁸ *Ah Buluc Am* se ha traducido El-once-piedra-labrada, aunque también pudiera traducirse El-once-araña. Se ha escogido la primera forma porque el texto del Cuceb dice que se le llamó así en virtud de que era "la piedra preciosa de los Itzaes". *Am*, según el Diccionario de Motul, significa *araña* y también "dados para jugar". Landa describe *am* como "pedrezuelas de las suertes que echan" y estas pedrezuelas o dados sin duda debían ser cúbicas, ya que *am* es raíz de *amay*, "esquina o cantero". Por qué Moctezuma fue, según el texto mencionado, la piedra preciosa (*tunil*) de los Itzaes, es cosa que no podemos explicar.

⁹ *Hapai Can*, Serpiente-tragadora, es deidad aún conocida entre los lacandones, como un espíritu malvado que absorbe gente con su propio aliento, según Tozzer (1907, p. 94).

¹⁰ A *Itzamná*, deidad agrícola, dice Landa que hacían ofrendas de "empanadas de codornices". A *Tlazoltéotl*, divinidad de las "suciedades sexuales", se la representa en las pinturas indígenas de la altiplanicie con una codorniz en la boca. Tozzer (1941, n. 1111) da *Bolon Chac* como uno de los nombres mayas de la codorniz.

¹¹ *Ah Can Ek* es un nombre que puede interpretarse de varios modos ya que *can*, además de numeral, vale por serpiente y *ek* tiene el significado de estrella, aparte del de negro u oscuro.

¹² Compárese lo que dice Tozzer (1907, p. 153) sobre la "soga viva" (*cuxaan z'um*), nombre con que se designa a una imaginaria senda celestial que une a Chichen Itzá con Cobá y Tulum, al oriente, y con Uxmal, al sur.

¹³ *Xiuñt* es vocablo mexicano; *xihuñt* según la escritura

tradicional. Significa yerba verde, turquesa y año. En este caso parece estar usado en el primer sentido, como amenaza de los Ah Kines hacia los del culto agrícola: "se marchitará la yerba".

¹⁴ Esta expresión, "atado quedará a un árbol la burla del sol", recuerda el sacrificio a saetazos que se verificaba teniendo a la víctima atado a un tronco, columna o árbol, sacrificio que describe Landa (1938, ed. yuc., pp. 51-52) diciendo que había "en los patios de los templos unos altos maderos y labrados y enhiestos, y cerca de las escaleras del templo tenían una peana redonda, ancha, y en medio una piedra de cuatro palmos o cinco de alto, enhiesta, algo delgada; arriba de las escaleras del templo había otra tal peana..." "Y llegado el día, juntábanse en el patio del templo..."

Esta misma ceremonia aparece en "Canción de la Danza del Arquero Flechador", una canción indígena en lengua maya dada a conocer por Barrera Vásquez (1944), en la cual se ve la siguiente descripción de la ceremonia:

*Da tres ligeras vueltas
alrededor de la columna pétrea pintada,
aquella donde atado está aquel viril
muchacho, inpoluto, virgen, hombre.
Da la primera; a la segunda
coge tu arco, ponle su dardo,
apúntale al pecho; no es necesario
que pongas toda tu fuerza para
asaetearlo; para no
herirlo hasta lo hondo de sus carnes
y así pueda sufrir
poco a poco, que así lo quiso
El Bello Señor Dios.
A la segunda vuelta que des a esa
columna pétrea azul, segunda vuelta
que dieres, fléchalo otra vez.*

¹⁵ Según noticia de Barrera Vásquez, los *hmenes* mayas, brujos del culto agrícola, aun en nuestros días, llaman *moiboxob*, "juntadores de cortezas", a los individuos que efectúan la tarea de reunir las cortezas del *balché* para la preparación del vino ceremonial. Es curioso saber que tal expresión se considera sagrada, que el vulgo la desconoce y que solamente los *hmenes* son quienes la utilizan y la entienden.

¹ El Tonalámatl o Libro de los Días sirvió a los principales pueblos que habitaron México y Centroamérica como un horóscopo para la predicción del carácter, oficio y otros futuros aspectos de la vida de los recién nacidos, sólo que no eran los astros los que ejercían su buena o mala influencia en el individuo, sino el carácter mismo del signo del día en que nacía, el cual estaba en relación con ciertos atributos asignados al ser o cosa que representaba el signo. Entre los aztecas (véase Sahagún, 1829, libro cuarto: *Arte Adivinatoria*, pp. 279 ss.), y posiblemente entre otros pueblos, influía la posición del signo dentro de la trecena; así sabemos que cada signo "gobernaba" trece días inclusive el suyo propio. Si su pronóstico, debido a su carácter esencial, no era favorable, entonces podía contrarrestarse "bautizando" al niño, según Sahagún, en un día de buen pronóstico que se siguiera, que generalmente era el tercero, el séptimo o cualquiera de los cuatro últimos, es decir, del décimo al decimotercero inclusive. Todos éstos de fijo eran buenos por su posición, aparte de sus caracteres esenciales. Las otras posiciones podían ser buenas, malas o indiferentes.

También sirvió el Tonalámatl para la asignación del nombre a los recién nacidos. Desde luego sabemos que los aztecas (Sahagún, *op. cit.*, p. 284), los zapotecas y los mixtecas acostumbraban dar a las personas nombres calendáricos. Torquemada e Ixtlilxóchitl hacen referencia a algunos personajes totonacas llevando nombres calendáricos, aunque traducidos al náhuatl. Deidades del panteón azteca y algunas del quiché (recuérdese que en el *Popol-Vuh* aparecen Hun Camé y Ucub Camé, "Uno Muerte" y "Siete Muerte", etc.) llevaban también esta clase de nombres. De que hubieran practicado los mayas de Yucatán la costumbre de dar nombres calendáricos a los niños hay algunas noticias (véase Roys, 1940, donde aparecen los nombres calendáricos siguientes: Ah Chuen May y Ah Chuen Kaul). Por otra parte, puede deducirse de un párrafo de Landa que, cuando menos hasta cierta edad, los niños llevaban nombres calendáricos: "Nacidos los niños los bañan luego, y quando ya los avían quitado del tormento de allanarles las frentes, y cabezas ivan con ellos a los sacerdotes para q. les viesse el hado, y dixesse el officio q. avía de tener, y pusiese el nombre q. avía de tener el tiempo de su niñez, porq. acostumbravan llamar a los niños nombres diferentes hasta q. se

baptizaban, o eran grandecillos, y después dexaban aquellos y comenzaban a llamarlos el de los padres hasta q. los casaban q. se llamaban el del padre y de la madre" (Landa, Ms., ff. 26v. y 27f.; copia fotostática, pp. 53 y 54). Otros grupos mayas, como los cakchiqueles (cf. Sáenz de Santa María, 1940, *passim*), sí usaban nombres calendáricos.

Sahagún nos ha legado en el libro cuarto de su *Historia* todo el mecanismo de las veinte trecenas y sus pronósticos, según el sistema que siguieron los aztecas. Los sacerdotes que tenían a su cargo el Tonalámatl se llamaron tonalpouhque, es decir, los que llevan la cuenta de los días, "a los cuales acudía como a profetas, cualquiera a quien les nacía hijo o hija, para informarse de sus condiciones, vida y muerte", según palabras del fraile.

Los mayas de Yucatán llamaron a los mismos sacerdotes, *Ah Kin*, término de significación semejante al del nahua y que dice: el del día, y al acto mismo de la adivinación llamaron *kinyah*. El mismo nombre *Ah Kin* dieron los indios de Yucatán a los sacerdotes católicos, perdurando hasta ahora esta denominación.

Sobre el método de hacer la predicción por medio del Tonalámatl entre los mayas, no tenemos datos tan precisos como los de Sahagún. Ximénez (1929, vol. I, p. 102) nos transcribe sucintamente: "y cumplido aqueste número los 20 días, vuelven a empezar hasta dar vueltas a ajustar 360 [sic] días, dando a cada uno el bien o el mal que a ellos se les antoja, señalando si es buen día o malo para el que nacía en él; y si por aquí veían sus adivinos el día en que el niño nacía y según eso le pronosticaban lo que había de suceder". Como se ve, no nos habla de la intervención del cabalístico trece ni de otros números dentro de la serie. Las crónicas de Yucatán dicen menos que Ximénez. La lista de la veintena con sus respectivos pronósticos no la tenemos de pluma española, pero sí de pluma indígena, aunque anónima y muy elíptica, tal como si sus frases escuetas fueran justamente el equivalente pronunciado de algunos jeroglíficos.

Cuatro versiones diferentes conocemos hasta hoy de la lista de los veinte días y sus pronósticos. Tres en un solo documento: el Chilam Balam de Kaua. Las numeramos por su orden:

Núm. 1. Se encuentra en las páginas 11 y 12 del original (Kaua I).

Núm. 2. En las páginas 15 y 14 (Kaua II).

Núm. 3. No conservamos la numeración de las páginas (Kaua III).

Para su estudio, desgraciadamente, no tuvimos las listas directamente del original, sino de un volumen manuscrito que se conserva en la Universidad de Tulane, intitulado originalmente "Crónicas mayas" y posteriormente, en inglés, "Copies of Maya Documents", y que es una compilación de varios de los más importantes documentos originales mayas (véase su descripción en Gropp, 1933, pp. 265 ss.). Nuestras listas están en los folios 75v. a 76v., 77v. a 78r. y 81r/v., respectivamente, de dicho volumen.

La cuarta lista es casi idéntica a la tercera del Kaua. Se halla en el Chilam Balam de Maní (Códice Pérez), en las pp. 94 y 95. De las cuatro versiones, la primera está menos condensada que las tres últimas.

La primera tiene por encabezamiento: "U mutil chuen(n)il kin sansamal u kabaob yahalcab hun kalob u xocolob yahalcab huiunpel kin"; Los pronósticos diarios del Artificio de los Días. Los nombres de los "amaneceres" (signos horoscópicos diarios) son veinte. Se lee (o cuenta) cada "amanecer" (o signo), uno para cada día.

Esta primera lista es meramente la de los nombres sin relación con diferentes periodos, como sucede con las otras tres. Comienza con Kan y termina con Akbal. Cada nombre, con el correspondiente numeral que le toca en las treceñas, siendo Kan el primero (hunil) de la primera treceña, y por consiguiente Caban el primero de la segunda. Después del vigésimo nombre, que es el Uucil Akbal, simplemente para indicar que el movimiento iniciado continúa, está repetido Kan con el numeral uaxac que le tocaría en la segunda repetición de los nombres. Sin embargo, aparte del numeral de la treceña, los días están numerados al margen conforme a la veintena. Así pues, el segundo Kan de la lista vuelve a tener también el número uno. Una nota explica el proceso de continuidad: "Cuando se alcance otra vez 21 signos regrésese atrás (repítase), así como lo hacen los entendidos."

La segunda lista está en relación con los "cargadores de años" de una serie que comienza con el de 1796 y termina con 1821. Los cargadores son Kan, Muluc, Ix y Cauac, que se van sucediendo en su orden hasta cubrir los veintiséis años, que también tienen señalada su correspondiente Letra Dominical cristiana. Paralela a las columnas de años y cargadores está la coincidente de los días y sus pronósticos,

LOS VEINTE DÍAS Y SUS

DÍA	ANIMALES	PLANTA
Kan.	Pájaro Merula.	Ceiba roja.
Chicchan.	Serpiente Crótalo.	Ichtyomethia.
Cimi.	Tecolote.	
Manik.	Loro. Quetzal.	Cacao.
Lamat.	Disforme, perro.	
Muluc.	Tiburón. Jaguar.	
Oc.	Lorito Conorus.	
Chuen.		
Eb.	Tordito.	
Been.		
Ix.	Jaguar.	
Men.		
Cib.	Venado-Deidad.	
Caban.	Pájaro carpintero.	
Edznab.	Pájaro Momoto.	
Cauac.	Quetzal.	
Ahau.	Aguila rapaz.	
Imix.		Maíz. Flor Plumeria.
Ik.		Flor Plumeria.
Akbal.	Cervatillo.	

ATRIBUTOS Y PRONÓSTICOS

OTROS ATRIBUTOS	PRONÓSTICOS
Preciosas aves canoras.	Sabio. Iracundo. Criminal. Criminal.
Sangre.	Malo. Borracho. Hablador. Ciza- ñero.
Devoramiento de hijos y de esposas.	Rico hipócrita. Adúltero. Sin juicio. Ciza- ñero. Inteligente. Tejedor. Carpin- tero. Rico. Rico, dadivoso. Bueno. Proletario. Plebeyo. Sanguinario. Asesino.
Sangre. Alegria.	Maestro de hacer y de decir. Ladrón. Asesino. Cazador. Traficante. Curandero. Jui- cioso. Bueno.
Salud. Pedernal afilado.	Curandero. Sangrador. Va- liente. Bueno.
Enfermedad si Cargador de Año.	Imaginativo. Noble.
Devoramiento de niños.	Rico. Juicioso. Valiente. Bueno.
Cometa.	Libidinoso. Indeciso.
Vientos.	Lascivo. Malo. Miserico. Plebeyo. Cazador

comenzando con 2 Kan. Esta vez los nombres están acompañados únicamente de su numeral de treceena.

La tercera lista parece el desarrollo de una rueda, ya que los días están agrupados de cinco en cinco, cada grupo para un punto cardinal. Encabeza la lista esta nota: "Cuenta de los días. Veinte son los pronósticos del uinal: *xoc kin hunkaltuba mutil uinal*". Al final está esta otra: "Para que sea visto diariamente el pronóstico de cualquier persona que nace dentro del Artificio de los Días. Se le cuenta un día de los veinte, sea hombre o mujer. *Licil yilabal u mutil uinic hemax cu sihilob ychil u chuenil kin sansamal. U xocol ti kin hunkaltuba lae ua xiblal uaix chuplal xan*".

La cuarta lista es una versión casi idéntica a la anterior encabezada así: "El atributo pronóstico diario del nombre: *U mutil uinic zanzamal*".

No nos interesa por el momento la clasificación de las listas ni sus relaciones con la cronología, sino desde luego su contenido horoscópico. Todas, esencialmente, contienen lo mismo. Como hemos dicho antes, la primera es la que contiene más texto, es menos elíptica y nos sirvió para la interpretación de las otras. Relacionados con los pronósticos aparecen ciertos animales y plantas que indudablemente constituyen el nahualli y forman la tona de la persona nacida bajo un signo del Chuenil Kin. (Para una discusión completa sobre los términos nahualli, nagual o nual y tona, y el hualismo en general, véase Brinton, 1894; y entre otros no citados por este autor, Ruiz de Alarcón, *Anales del Museo Nacional*, 1900, pp. 131-134; además, Seler, 1900, p. 5.) La muy completa lista de Sahagún no incluye animales ni plantas en relación con los días. Pero en los Tonalámatl pintados, como el de Aubin y el Borbónico, sí aparecen animales (aves) y dioses, aunque no plantas.

Algunas otras listas han sido publicadas como provenientes del Arca Maya. Fuentes y Guzmán (1933) da una (reproducida por Brinton, 1894), que corresponde a enero, en la cual aparecen 31 elementos diferentes (animales, plantas y otras cosas), uno para cada día. No hay en ella nombres de los días, y los elementos que pudieran estar relacionados con ellos, como serpiente, cocodrilo, conejo, etc., no tienen un orden que pudiera establecer la identidad. La Farge II y Byers (1931) incluyeron en su libro sobre los jacaltecas varias listas en que se conservan los nombres de los días, pero sus pronósticos no son nagualísticos o personales, sino que se refieren a la influencia del día en las actividades y bienes de la comunidad.

Lo notable de las listas que estudiamos es precisamente su carácter puramente horoscópico. En ciertos casos aparece una relación íntima entre los atributos y el supuesto significado de los nombres de los días.

La presente traducción ha sido publicada antes por Barrera Vásquez (1939 y 1943), con mayor amplitud.

JACULATORIAS DE LOS AHI KINES

¹ "La señal de *Hunab Ku* se hará manifiesta con el *Vaom Che*, Madero enhiesto", o bien, "Veréis entonces al ave sobresalir por encima del *Vaom Ché*"; son expresiones que parecen referirse a la ceremonia en honra del fuego conocida en las fuentes nahuas por "*Quauhtlicac*, Arbol o palo, o madero enhiesto." Del *Vaom Ché* habla Landa (1938, ed. yuc., p. 21), relatando "la virtud de un palo que en su lengua llamó *Vahomché*, que quiere decir palo enhiesto de gran virtud contra los demonios".

EL LENGUAJE DE ZUYUA

¹ Según la correlación más admitida, un Katun 3 Ahau terminó precisamente el día 7 de junio de 1638, de modo que en 4 de septiembre de 1628 faltarían 9 años y poco más de 9 meses para que terminase.

² *Balam* es el nombre del jaguar: "*balam ien ic*, cuando el axi o chile comienza a colorear", dice el Diccionario de Motul.

³ Antes de la conquista española, *tzimin* era el nombre aplicado al tapir; después se aplicó también al caballo.

⁴ *Kan* es el nombre de las cuentas de concha roja, que tuvieron gran valor entre los mayas.

⁵ En los ritos agrícolas, los mayas ofrendan diversos tipos de pan. La mayor parte de estos panes son a manera de pasteles formados por tortillas de maíz superpuestas en un número dado, que entre una y otra llevan pasta de pepitas de calabaza (*sicil*) o de frijoles (*bu'ut*). El número de tortillas es simbólico y depende de la función que en el rito tiene el pastel. El nombre del pan lo determina en unos casos el número; en otros la función o alguna otra característica. Baeza (1937, p. 9) lo cita con estas palabras: "... entretanto que se están cociendo bajo tierra, unos panes grandes de maíz, que llaman *cantahuntaz*, esto es, de catorce tortillas o cosas, entreveradas con frijol, cuyo misterio no me han declarado". Los pasteles no se cuecen nunca en comal sino a la barbacoa, es decir, zanjas-hornos.

Para mayores datos véase Redfield y Villa Rojas (1934) y Villa Rojas (1941).

⁶ La referencia a la Estera y el Trono enterrados en la casa que está bajo el suelo, durante el predominio de los signos acuáticos, parece referirse al hecho de que el ritual a las divinidades terrenas o "infernales" había de ser efectuado en lugares absolutamente oscuros, en excavaciones bajo tierra, en cavernas oscuras, en la parte inferior y más oculta de los adoratorios, para que ni el menor rayo de luz anulase la magia del ritual ofrecido a las divinidades no luminosas. Las ceremonias del *Ch'a-chac*, efectuadas a plena luz del Sol, y otras similares, recuérdese que son hechas para impetrar piedad del Sol por las sequías.

⁷ *Amate* es el nahuatlismo con que se nombra en México al árbol de cuya corteza fabricaban papel los mesoamericanos. Es una morácea, género *Ficus*, llamada en maya *copo'*.

⁸ Este nombre es sin duda una variante de *Oxlahun ti Ku*. *Citbil* se ha tomado por Padre Eterno. En el lenguaje cristiano las personas de la Trinidad, hasta el siglo XVIII, se llamaban Dios Citbil, Dios Mehenbil y Dios Espíritu Santo. Beltrán de Santa Rosa (1912, pp. 9, 15 y 16) propuso el cambio de Citbil por *Yumbil*, porque con Citbil "significan los Indios a un ídolo, el principal de los que aún idolatran". La etimología de *Citbil* es un poco oscura, pero parece referirse a quien crea con la palabra.

⁹ *Balché* es el nombre maya peninsular del árbol de cuya corteza se hacía —y continúa haciéndose— el vino que lleva el mismo nombre, el cual, a diferencia del pulque de la altiplanicie mexicana, no tiene ahora usos profanos. La planta es una leguminosa, árbol de poca altura, que rinde unas flores de color lila de suave olor. Perteneció al género *Lonchocarpus* y la especie yucateca es *longistylus* Pittier. El vino se prepara haciendo fermentar la corteza, previamente secada al sol, en miel de abejas nativas —*Melipoma*— y agua. La preparación es siempre hecha por el *Ah men* y nunca por profanos; sólo usa de la miel de la melipoma y de agua "virgen" (*suhuy*), recogida de cenotes secretos. Para el maya, agua virgen es aquella que no ha sido vista por mujer. Cuando falta algún cenote secreto, el *Ah men* recurre a los pozos comunes, pero el líquido ha de ser extraído en la madrugada, antes de que las mujeres inicien su cotidiana ocupación de extraerlo.

Actualmente el *balché* se usa en los ritos agrícolas para asperjarlo en la tierra hacia los cuatro puntos cardinales;

para purificar, dándoselo a beber por el pico, a las aves que se sacrifican y para libarlo como parte final de las ceremonias. En algunos festivales públicos muy importantes se suele distribuir a los asistentes, pero estos festivales, tienen siempre un motivo religioso. Véase Redfield (1941, pp. 96, 106, 107, 121, 275 y 296).

Existen muchas menciones del *balché* en las fuentes antiguas y modernas. Landa (1938, ed. yuc. p. 38) informa mal al decir que se hacía de "cierta raíz de un árbol". Sánchez de Aguilar (1937, p. 38), también erróneamente, dice: "Para sus ritos y ceremonias, beben por voto vino, (Balché) que elaboran de la raíz de un árbol especial y de un trigo a propósito..." Sucedió entonces (Landa escribió en 1566 y Sánchez de Aguilar en 1613) que los indios tenían bien guardado el secreto de la fabricación de su vino. Sin embargo, algunas fuentes antiguas dan el dato correcto, como las *Relaciones de Yucatán*, por ejemplo la de Valladolid, escrita en 1579 y reproducida en Landa (*op. cit.*), que asienta (p. 230): "Para estos sacrificios y sus areitos, usaban beber y emborracharse con un vino que ellos hacían de una corteza de un árbol que llaman *balché* y miel de agua"; y agrega: "este vino dicen les causa sanidad, porque con él se purgaban los cuerpos y lanzaban por la boca muchas lombrices; criábanse robustos y los viejos vivían mucho tiempo y frescos... y del vino dicho no se sabe si usan los naturales de él al presente". Menciones modernas se hallan en Tozzer (1907), Thompson (1930), Gann (1918), el mencionado Redfield, etc. Véase también Barrera Vásquez (1941). Hay que hacer notar que este vino sólo se encuentra en uso actualmente entre los mayas de Yucatán y Belice y los lacandones de Chiapas.

¹⁰ El uso del copal en Landa es confuso, pues suele referirse en términos generales "a sus enciensos y zahumerios", sin especificar en cada caso cuál era la materia que ardía. Menciona, sin embargo, dos clases de copal, *zacáh* y *chal-halté*, y dice que el copal se disponía en tablillas, y también que en la ceremonia *Tup Kak* (apagamiento del fuego) hacían corazones de animales con incienso (copal) que eran arrojados al fuego. Expresa asimismo, con frecuencia, que el copal era quemado en las ceremonias de sacar lumbre nueva. Del árbol dice que su flor hacía negra la cera. En nuestros textos, también, el uso del copal se presenta en conexión con el culto al Sol. Por otra parte, en las fuentes nahuas se encuentra una interesante dualidad entre el uso del *Copalli* y el *Ulli*. El primero, como en nuestros textos,

se dedica preferentemente al ritual del fuego o del Sol; el segundo, a los dioses de las aguas y de la fecundidad.

¹¹ Armadillo, *Dasipus* sp.

¹² *Sacab*, *Saca'* o *Zaca'* es el nombre de una bebida refrescante hecha de maíz cocido sin cal, molido y luego disuelto en agua fría; se bebe endulzada con miel o azúcar o sin endulzar, mordiendo al tomarla un trozo de sal. No es bebida de uso común, sino religioso. Es para ofrendar a los malos vientos a fin de evitar enfermedades. Véase Redfield y Villa Rojas (1934) y Redfield (1941, *passim*). *Sacá* significa agua blanca, de *sac*, blanco, y (*h*)*t'*, agua.

¹³ *Pich'um*, los tordos negros, *Dives*, *dives*.

¹⁴ *Haleu* o *haleb* es el *Dasyprocta punctata* Goldman, un despractido.

¹⁵ *Chaya* es el nombre castellanizado de la *chay* maya, euforbiácea cuyas hojas tienen los mismos usos que la espinaca en la cocina yucateca.

ALZAMIENTO DE DON ANTONIO MARTÍNEZ Y SAÚL

¹ Lugar no identificado.

ACONTECIMIENTO HISTÓRICO EN UN KATUN 8 AHAU

¹ *Nacxit* es vocablo mexicano. Significa "cuatro patas", de *nahut*, que quiere decir cuatro, e *ixitt*, que quiere decir pie o pata. Es variante de *Náuhuyotl*, "el cuatro". En las fuentes históricas del centro de México, el nombre aparece asociado con príncipes del linaje culhua durante la prianza de un numen Quetzalcoatl, "Serpiente quetzal".

EXPLICACIÓN DEL CALENDARIO MAYA

¹ Se refiere claramente al periodo de 13 Katunes que en esta obra se llama Rueda de Katunes. Según el autor de esta explicación, la cuenta comienza con el 8 Ahau, que es como se contaba antes de la conquista española.

² Se menciona la Rueda, que debió estar pintada en el documento original; las copias existentes actualmente no ostentan ilustración alguna.

³ "...*catur culac ixmakaba kin hop'el kin u uayeb haab; u yail kin*." Los cinco días aciagos recibían varios nombres y se suelen citar con ellos; *ixmakaba kin* significa días sin nombre, aunque el significado es metafórico, porque sí tenían nombre. *U uayeb haab*, también escrito *uayeyab*, significa la ponzoña del año; véase Diccionario de Motul: "*uaay*..., emponzoñar y hacer llagas y desollar la leche de algunos

árboles cuando los tocan"; "*uayaan*, cosa emponzoñada, inficionada o dañada..." *U yail kin* es como decir los más dañosos y dolorosos días. Véase ya en el Diccionario de Motul.

⁴ Véase en Landa (1938, ed. yuc., pp. 62-72) la explicación del rito de los días aciagos y del año nuevo.

⁵ Don Juan Xiu de Oxkutzcab es el mismo que firma en 1685 la página 66 de los documentos de la familia Xiu, reproducida en Morley (1920, p. 417).

⁶ No pueden ser 312 años los que formaban una Rueda de Katunes, porque cada katun era un periodo fijo de 20 tunes de 360 días, pero está claro que aquí se cuentan katunes de 24 años, cuya autenticidad se ha puesto en duda. Véase Tozzer (1941, pp. 166-167).

La COLECCIÓN POPULAR significa un esfuerzo editorial —y social— para difundir entre núcleos más amplios de lectores, de acuerdo con normas de calidad cultural y en libros de precio accesible y presentación sencilla pero digna, las modernas creaciones literarias de nuestro idioma, los aspectos más importantes del pensamiento contemporáneo y las obras de interés fundamental para nuestra América.

EL LIBRO DE LOS LIBROS DE CHILAM BALAM

Los textos que comprende esta obra constituyen una de las secciones más importantes de la literatura indígena americana. Redactados después de la Conquista, recogen todas las fases culturales por las que pasó el pueblo maya de Yucatán. Su material lo componen múltiples escritos religiosos, históricos, médicos, cronológicos y astrológicos, astronómicos, literarios, etc. Los religiosos e históricos provienen de los antiguos libros jeroglíficos, y los demás han sido registrados de fuente oral o proceden de impresos europeos. Mediante el cotejo de las varias ediciones, los mayistas Alfredo Barrera Vásquez y Silvia Rendón han organizado el presente libro que, con vivacidad y sin repeticiones inútiles, confirma la continuidad de esa gran cultura del nuevo continente.

Introductory Essay: The Huarochirí Manuscript

Frank Salomon

The manuscript as testament

The Huarochirí manuscript alone of all colonial sources records a prehispanic religious tradition of the Andes in an Andean language. It tells us of a remote age when cannibal deities preyed on otherwise immortal humans, of the mountain deity Paria Caca who emerged to expel the fire deities of antiquity, of the human groups that traced their victories from Paria Caca's five simultaneous avatars, of Paria Caca's brotherhood with the fivefold female power Chaupi Namca, and of the society ritually organized in their names around a grand complementarity of male and female superhumans. It unfolds the splendor of ceremonies that prehispanic priests devoted to a landscape alive with the diverse sacred beings called *huacas*. It recalls memories of Inca rule and of how unknown invaders, the Spanish, brought new gods to displace the children of Paria Caca and of Chaupi Namca. Nothing else in all the sources from which we seek the Andean "vision of the vanquished" (Wachtel 1971) rivals it for immediacy, strangeness, and beauty.

But the voices we hear in its pages do not relay to us a verbatim record of what was said and believed before the Spanish invasion. It is true that when Father Francisco de Avila reworked part of the same or similar testimony to make his 1608 *Treatise on the False Gods* . . . (hereafter referred to as *Tratado*), he judged that the narrative "does not refer to the present but to history" (Arguedas and Duviols 1966: 198). Yet the way people recalled their ancient tradition and the occasion of their recalling it were themselves facets of a colonial situation the tellers had already endured throughout their whole lives. The telling could not but be influenced by the seventy preceding years of colonial turbulence, during which one potent innovation

was the art of writing itself. Andean peoples used no writing before the Spanish "Vira Cochas" arrived. So the process of capturing their culture as text in the alphabet of the padres and bureaucrats was inextricably bound up with forced conversion and persecution, even when the actual authors were themselves Andean and the actual narrators at least partly faithful to the old *huacas*.

The manuscript is a complex composite testimony of these changes as well as a compendium of ancient memories. The research it contains was apparently sponsored by a clerical persecutor, Father Francisco de Avila, who seems to have used it as secret intelligence for his assault on American deities from 1608 onward. The text does contain opportune denunciations of "idols" (as the Spanish called the sacred beings of the Andes) and of those who steadfastly fed and served them in secret long after official conversion. Yet at least one of the actual makers of the text seems to have thought of the task as one of historical remembrance. The untitled preface to the manuscript looks to a future in which the ancient deities would be remembered with pride, promising a monument of Andean greatness to match Spanish chronicles:

If the ancestors of the people called Indians had known writing in earlier times, then the lives they lived would not have faded from view until now.

As the mighty past of the Spanish Vira Cochas is visible until now, so, too, would theirs be.

But since things are as they are, and since nothing has been written until now,

I set forth here the lives of the ancestors of the Huarochiri people, who all descend from one forefather;

What faith they held, how they live until now, those things and more.

Village by village it will all be written down: how they lived from their dawning age onward.

One gets a strong impression that the creator of these lines was engaged in reconceptualizing the Andean mythic tradition rather than destroying its memory.

The exact process of composition is unknown, but this passage differs from the wholeheartedly anti-Andean viewpoint that Avila expressed in other writings. It may contain the words of a native writer or editor to whom Avila gave some leeway in compiling the text. A measure of unselfconscious candor would have increased its intelligence value. Whether or not he was present at its composition, Avila did read and annotate at least part of it; his devastating subsequent attacks on the deities mentioned suggest that the stratagem of leaving the witnesses some freedom of expression succeeded. But the text's partly intra-Andean genesis also had a paradoxical long-term effect: because it was composed in relative independence from Spanish preconceptions about native religion, it has in the end provided a uniquely authentic monument of the very beliefs Avila meant to destroy.

Whoever composed the untitled preface thought of the manuscript as a totalizing book about inherited tradition, custom, and lifeways that would give Andean memory, like Spanish literate memory, immortal visibility. The usual genre term by which the text identifies the separately remembered and narrated traditions could hardly be more oral; it is *simi*, which the greatest Quechua lexicographer of the age glossed as "mouth, language, commandment, law, mouthful, news, the word and its answer" (González Holguín [1608] 1952: 326). Clearly the testimonies are products of a culture in which orality encompassed the weightiest functions of language. But the book is not conceived simply as a body of speech on paper. It partakes of the assumption that written language, and specifically book language, should subsume and subordinate orality. The conception of a totalizing book that underlies the manuscript seems to be influenced at one or more levels by the Hebrew or Old Testament Bible and to some extent by the New Testament. Of course, few Indians studied the Vulgate. But the Huarochirí area had been missionized with special intensity by Jesuits in 1570–1571, with the conscious intent of popularizing Christian lore in Quechua. In the late sixteenth century, both officially promulgated catechetical summaries and popular-

ized summaries of Bible stories called *historias sagradas* were widely read by or read to laypeople. Literate Indians c. 1600 usually knew traditions from both Hebrew antiquity and the New Testament through publications of the Third Council of Lima. Those who had access to churchmen's libraries or discussions could learn much more.

Although the manifest content of the manuscript only rarely syncretizes biblical material with Andean, the text as a whole has an "astonishingly Biblical" overall architecture (Turner 1988: 249). Like the Bible, the manuscript begins with myths that contrast the human condition with an imagined alternative, a time when the relations between humans and deity were radically different (chaps. 1, 2). A flood myth (chap. 3) signals the end of this era. Like the Bible, the manuscript pictures antiquity as the story of hero-ancestors who share a common descent and a covenantlike relation to an ethnic deity (including an episode resembling Abraham's averted sacrifice of Isaac; chap. 8, secs. 99–103). Its collective subject is a set of groups, each of which considered itself the progeny of a focalized ancestor. As with the biblical tribes, these groups relate to each other, at least in ideology, approximately as a phratry. As in the biblical redactions, their disparate traditions of origin and separate cults have been welded *ex post facto* onto the unifying argument of kinship and imperfectly articulated with apical priestly cults. Their story, like that of the biblical tribes, is intensely concerned with control over specific resources in a sacralized landscape; many of its myths encode political struggles with surrounding peoples and even internecine struggles as mythic combats with superhuman intervention. Also like the Bible, the manuscript is greatly concerned with the relation between the local *sacra* and the leaders and priests of immense invading empires—first the Inca, later the Spanish. The manuscript shares the biblical tendency to accrete genre within genre. Texts about priesthood, sacrifice, ritual law, and prophecy jostle with vernacular myth, claims concerning land and water, and mythicized remembrance of historic events. Bits of oracular response, religious formulas, and perhaps songs have become embedded in the text, too. And finally, as in the Bible, particularly the Deuteronomic books and later prophets, one clearly senses the pressure of contemporary political defeat on religious testimony.

We do not know all the reasons for the resemblances. One possibility is that Father Avila imposed European opinions on the text itself or indirectly on others who processed it (for example, by

preparing a questionnaire or by overseeing the editing). Much European opinion of the time held that pagan myths, Andean ones included, reflected ancient traces of "true" (that is, biblical) religious and historical knowledge, which Satan's deceptions had distorted in intervening centuries. The tendency to force non-Christian testimony into patterns congruent with "universal history" and a unified Bible-based chronology is conspicuous in many Peruvian chronicles, both indigenous and Spanish, and Avila's *Tratado* shows that he partook of it (Arguedas and Duviols 1966: 206–208). The person who arranged or edited the myths expressed frustration at the difficulty of arranging episodes into one scheme of chronology (e.g., chap. 14, sec. 189; chap. 15, sec. 199), a step required for correlation with Bible-centered history. This literal-minded historicist reading of myth, which seems misleading to modern readers, was then thought to be a correct way of restoring American data to their "true" place in a unified world scheme of salvation history.

But above and beyond this exogenous process, the myths themselves seem Bible-like in their style of mythifying. Like the biblical writers, and unlike some myth-tellers from more "tribal" Amazonian societies, the Huarochirí narrators tend to intertwine mythic (miraculous) processes with social causation, rather than locating them in a primordial age before the world began to be as it is. Perhaps the likeness is multilayered or overdetermined: it may result in part from intra-Andean facts distinguishable from the European influences that also affected it. Such forms of synthesis may arise endogenously in societies of a certain scale, setting, and organizational form. Terence Turner (1988) offers a complex argument that a generically rather than locally biblical type of mythology occurs in societies whose status is intermediate between autonomy and complete subsumption in larger states; certainly this was the condition of Huarochirí-area societies for many centuries before the European invasion.

There is a third possibility for explaining the biblical parallel. After seven decades of exposure to European culture, Andean people had consciously or unconsciously gone far in reconceptualizing their mythology as a systematic response to imposed belief. By 1600 this reconceptualization seems to have coalesced into a distinctive ideology. Andean literati of the first generation born after conquest—Felipe Guaman Poma de Ayala and Joan de Santa Cruz Pachacuti Yamqui Salcamaygua—were not simple nativists; they partook of a Renaissance consensus in arguing that Andean people had

already passed through ages of antiquity strictly parallel to those of pre-Christian biblical antiquity. But they dissented from the Spanish in their evaluation of the Andean achievement as a part of it. Where writers like Avila, Cabello Valboa, or Antonio de Calancha saw in Andean myth only a deteriorated and diabolically confused memory of original connections with biblical humanity, and therefore a culture worthy of being forgotten, some native intellectuals believed their history and its memory to be not only parallel with that of the Spanish, but equal in value. The theories of these bicultural "native chroniclers" shored up waning hopes of Andean privilege under Christian rule and appear characteristic of Andean natives descended from noble families but deprived of colonial power. Although we do not know the identity of the person(s) who selected the oral material for inclusion and/or wrote the ethnographic and editorial material in the manuscript, the final redaction of the text does seem to partake of this mentality.

And what of those who actually told the myths to the book creators? What revisions of religious thought had occurred among less bicultural natives during these decades? It is important to remember that by the date when the manuscript was written the cults of the *huacas* had coexisted with Christianity for a whole lifetime. If *huaca* priests had retained the loyalty of people officially bound to Christianity, it was in all likelihood because they had succeeded, under the adverse conditions of clandestinity and church hegemony, in presenting *huaca* religion as comparable in cogency with the church's teachings. It is possible that by 1600 local thinkers and perhaps priests had been engaged (consciously or not) in remobilizing and reconceptualizing the inheritance of *huaca* religion so as to construe it as a *religion*, a "faith" (as the preface to the manuscript says, using the Spanish word) whose overall claims and dimensions could bear comparison with those of the imposed church. It is not beyond possibility that the welding of the Andean deities into a unified kindred partook of post-1532 efforts. Individual *huaca* myths seem to accord the *huaca* cults many of the same attributes as Christian religion: for example, a covenantal concept of obligation, an image of superhuman action as law giving, a notion of history as the continuing interaction of deity and society, and a tendency to express "moral economy" norms in terms of prophetic action. As has been suggested, it is likely that any or all of these may be overdetermined facts, arising from preexisting, and now remobilized, prototypes in aboriginal culture as well as

from European models. Perhaps there would have been an Andean story like the rescue of Isaac even if Spaniards had never invaded. Nonetheless, it would be unrealistic not to consider apologetic processes arising in *huaca* priests' efforts to match Catholic priests in the breadth of their claims while at the same time maintaining distinctness from Catholicism. The importance of such interactive processes in sustaining *huaca* religion is attested by Father Avila's remark that the *huaca* cults thrived most not in the areas where they had remained unmolested, but in the villages where Catholic priests had been most zealous (Arguedas and Duviols 1966: 205).

Despite the importance of all these factors, in the end nothing could be more wrong than to think of the manuscript as merely an Andean counter-Bible. For one thing, obviously, the mythic material overall is radically foreign to Europe; few books in the world give the Western reader such a powerful sense of encountering a cultural unknown. Another and more fundamental reason is that the structuring of myth—the formal architecture of event and process that gives each story internal regularity and resolution—owes everything to Andean patterns and resembles biblical ones little if at all. The dominant model in the stories is that of passage from mere difference (for example, the juxtaposition of antagonistic deities strange to each other) to complementary difference (for example, a revised juxtaposition in which the deities become male and female spouses or siblings embodying opposite ecological principles). This pattern occurs at the greatest and smallest levels of the mythology, in domains from the cults of apical deities Paria Caca and Chaupi Ñamca to the household relationship between in-laws. To imagine this pattern consistently applied to the battles of biblical Adonai is difficult. Comparison with non-Andean South American material (a task scarcely begun) may offer another path to the isolation of underlying prehispanic content. R. Tom Zuidema (1977: 44–47) argues that some Huarochirí myths share specific structures with a myth of the Brazilian Bororo, presumably because the two mythologies share roots much older than Spanish domination.

Andean religion and "Inca religion"

Much of what is published (especially in English) about prehispanic and colonial Andean religion treats the terms "Inca" and "Andean" as near synonyms. Vira Cocha, popularized as the invisible

"creator god of the Incas" (Demarest 1981; Pease 1986; Rowe 1960; Szemiński 1985b; Urbano 1981) fascinated colonial Spaniards who thought they detected in him a possible intuition via "natural religion" (MacCormack 1985) of Christendom's supreme deity. This idea still absorbs modern scholars captivated by the sophistication of Tawantinsuyu, the Inca Empire. The Incas partly persuaded non-Inca Andean people, too. As we learn from chapters 18, 19, 20, 22, and 23, the Incas tried to reorganize local cults into a hierarchy capped by Inca numina, and partly succeeded. Indeed, their persuasions lasted longer than their sovereignty. By the mid-colonial era, when Inca rule had receded into the golden mists of ideological nostalgia, many Peruvian Indians themselves came to recall the deified Sun and his incarnation the Inca god-king as compelling symbols of native identity and native glory (Flores Galindo 1987).

But in order to interpret the Huarochirí manuscript one must appreciate that the equation between Inca religion and Andean religion is an ideological sleight. The invisible Vira Cocha relates to Andean religious life somewhat as the Prime Mover Unmoved does to Mediterranean saint cults. At the summit of priestly and imperial society, prayers like Pachacuti Yamqui's stirring Inca invocations ([1613] 1968: 287–288, 292, 294) to the unseen source of order and beauty may have voiced metaphysical questions that we define as preeminently religious. But the religious life of most of the people who made up Tawantinsuyu's innumerable subject "nations" had little to do with abstract or universalizing expressions. Worship usually focused on sacred beings peculiar to particular kin groups, villages, mountains, canals, and so forth. In fact, religious particularism, expressed in terms of place and descent, lies at the heart of much Andean myth. No doubt discourse of this sort can embody philosophical concerns, no less readily than overtly metaphysical expressions do. But the content is only available by a route that leads through the study of what particular places or mummies (etc.) meant.

This village-based, particularistic version of Andean religious thinking saturates the Huarochirí text. The world that the Huarochirí myth-tellers imagined was structured in terms of grass-roots geography and of genealogy—their pastures and valley lands, their mythicized family tree. The unity of the text, such as it is, is achieved by an attempt (perhaps on the part of the priests called *yancas*) to locate the historically diverse *huacas* and their cults in Paria Caca's and Chaupi Ñamca's regional hierarchy and genealogy. Other traditions—the

lordly priesthood of the Incas, the onset of Catholicism—are seen through the filter of such local and regional concerns. For long stretches the viewpoint belongs to one group, one collective ego: a group called the Checa, devotees of the ceremonial center Llacsa Tambo, resident (at least nominally) in and around the Spanish resettlement village of San Damián, who considered themselves children of Paria Caca while retaining origin myths apparently separate from his cult (chap. 24). Some of the ritual complexes and myths attached to local features—especially to springs, lakes, and canals—have survived with great vitality into modern times and have been studied by ethnographers (Gelles 1984; Ortiz Rescaniere 1977). For example, the modern descendants of the Concha, who live in an outlying hamlet of San Damián de Checa, still maintain today both the myth and the ritual attached to the lake that feeds their irrigation canals (see chap. 31).

The durability of these myths reflects the Huarochiri people's tenacious attachment to the local resources on which they depend. But it is possible after all to exaggerate the local quality of the myths. Paria Caca was not uniquely the deity of the peoples who speak here; he and his sanctuary were renowned throughout a wide swath of the central and southern Andes. It is likely that, when worshipers from Llacsa Tambo went on pilgrimage to him, they met worshipers from many other places and that their own practice had something in common with that of different kinds of "people called Indians." The same applies to the great coastal shrine Pacha Camac and to Cuni Raya, sometimes called Vira Cocha. Even when the names, episodes, and personalities seem peculiar to Huarochiri, the tellers' general religious concepts (e.g., classes of shrines, types of action attributed to deities and heroes, duties of humans to *huacas*) are shared among a wider spectrum of Andean societies, including, for example, groups in the Arequipa and Cuzco areas. In these limited senses, while it is mistaken to take the Huarochiri myths as expressions of a pan-Andean religion, one may take them as representative of broader Andean cultural premises and tendencies that are manifest even in apical Inca cults. The sharing of underlying concepts makes possible ethnographic comparison with societies beyond the bounds of Huarochiri Province, both as seen in past times (for example, via the "extirpation of idolatry" trials that postdate the manuscript; see Duviols 1986) and as witnessed by modern ethnographers (see, for example, Valderama and Escalante 1988, who have studied in distant Arequipa a complex resembling the water cults in chapter 31).

General outline of the Huarochiri manuscript

The Huarochiri manuscript appears not to be the product of polished editing, but neither is it a jumble. With the possible exception of the two unnumbered chapters here called supplements I and II, it seems to be a fair copy edited and in the process of further editing for coherence as a unified narrative. The unification is, however, in many respects incomplete and imperfect. The editor's original intent seems to have been to treat ancient matters earlier in the text and recent ones later, but sometimes when turning to a new source (e.g., at the beginnings of chaps. 13, 24, and 31) he is forced to return to a different origin story. Recollections of past ritual practice and interpolated bits of current ethnographic observation further complicate the text by introducing into many narrations, with specious smoothness, references to times other than the time of the main narrated story. Moreover, the manuscript is full of second thoughts (cross-outs and interlineations, marginalia), tangents, overlaps, cross-references, marginal queries (probably by Father Avila), and cryptic allusions. For all these reasons, to appreciate the coherence of a theme one often must pull together partial accounts from disparate chapters. For this purpose the index supplied by the translators may be useful.

Early times and peoples

The preface (untitled in the original) promises to tell the achievements and beliefs of "the people called Indians" from their "dawning age" up to the present, village by village.

The first chapter sketches the world as it was before the present human race appeared. People lived forever (after a five-day temporary death), at the price of sacrificing half their children to the fire-monster Huallallo Caruincho. At that time, too, the subtropical abundance of the lower valleys extended far up into the heights. This whole rich and cruel world order would be destroyed with the advent of Huarochiri's great deity Paria Caca.

Huallallo's dominion is grouped with other stories of remote antiquity: chapter 2 tells how the Trickster-demiurge Cuni Raya, who "almost matches" the figure of Vira Cocha, passed through the landscape and through the lives of the female deities he seduced. In a Christian-influenced interlude (chap. 15), Cuni Raya, as Vira Cocha, is credited, almost parenthetically, with originally creating nature in an empty universe. Chapter 3, telling the myth of the deluge, and chapter 4, telling of the

Sun's disappearance, end the section dedicated to remote antiquity.

The Paria Caca cycle and the myths of group identity

The mythic cycle that forms the unifying core of the text tells the apparition of Paria Caca (chap. 1, sec. 6; chap. 5, secs. 72–73), the fivefold deity who symbolized inclusive ethnic unity among the tellers' various residential and kinship groups. Like many great Andean deities, he is a mountain, a majestic double-peaked snowcap visible on the eastward horizon from the heights of Huarochirí. Many groups venerated him. We hear most about the Checa who gathered at Llacsá Tambo, but chapter 13 concentrates on a relatively distant cluster of villages, the Mama region in the lower Rímac valley. Chapter 30 is a myth of the Allauca, and chapter 31 copiously recounts the viewpoint of the Checa's neighbors, the Concha.

Paria Caca first appeared as five eggs that became five falcons that became five men, the founders of the human groups who appear as the main collective protagonists. These groups are sometimes spoken of in ways suggesting clanlike or sib-like qualities and together, within Paria Caca's cultic organization, are seen as a phratrylike collectivity of groups who "all descend from one forefather" (pref., sec. 2). But before calling them clans one should be careful to note that the text uses no term clearly translatable as 'clan' and that, although the manuscript uses the unilineal idiom for certain limited purposes, other principles of descent, marriage, and residence appear to play at least as important a role in defining groups.

Paria Caca was a stormy being of the heights. He made himself known to humans by favoring a poor man with power to defeat the rich (chap. 5), or, in another tradition, by saving a Huallallo worshiper from the obligation to sacrifice his child (chap. 8). He first appeared on a mountain in what was formerly the domain of the lowland aborigines called Yunca, which was dominated by the (possibly Huanca) deity Huallallo (chap. 5, secs. 38, 55). Once his bond with some of these people was formed, Paria Caca ascended to Huallallo's seat on the high cordillera. There he attacked and expelled the ancient cannibal deity in a world-shaking combat between storm water and volcanic fire (chap. 6, sec. 74; chap. 8; chap. 9, sec. 110; chap. 16, secs. 203–209; chap. 17, secs. 214–219). He carved out in this struggle the titanic landscape of snowcaps

and lakes that is his seat and his likeness. It became the sanctuary on the icy heights to which his pilgrims brought their llamas (chap. 9, secs. 119, 127, 138–139; chap. 24, secs. 309–310; chap. 28, sec. 364). Huallallo, exiled, was left to the care of a rival ethnic group called the "dog-eating Huanca" (chap. 9, secs. 110–111; chap. 16, sec. 209). The victorious Paria Caca in his multiple incarnations swept down from the windy heights through the various fertile valleys of the Pacific slope (chap. 8). As he went, he subjected the Yunca to his own people, expelling many of them, reorganizing their lands, creating a cultic order in which both victors and vanquished would participate, and winning the Yunca wealth (e.g., chaps. 9, 25).

What human movements does the Paria Caca mythology allegorize? In a series of highly original studies María Rostworowski de Diez Canseco (1978: 31–147) has interpreted the narratives as reflections of a large and gradual prehistoric movement in which pre-Incaic highlanders of the ethnic group called Yauyo worked their way downward and southwestward, from their early home on the high tundras at the Cañete River headwaters, through various warm irrigated valleys (including the Mala, Lurín, and Rímac valleys, which form the heartland of the mythology), toward the Pacific shore and its rich deltas. Using independent and ostensibly non-mythical bureaucratic records she has been able to document Yauyo populations all over the territory of the manuscript and has mapped their major territorial divisions as understood in the mid- to late sixteenth century (Rostworowski 1988: 56–57). One of these Yauyo populations (that of Chaclla) attested a folk history closely resembling stories in the manuscript (Rostworowski 1988: 54–57).

Linguistic indices are less clear but also suggest some association between Paria Caca's mythology and a Yauyo expansion. Traces of Aymara-like lexicon and phonology in the Huarochirí manuscript indicate that the informants knew or were influenced by the same ethnic language whose modern forms persist as residual "islands" in old Yauyo territory (Gentile Lafaille 1976: 14).

In Inca and early colonial times those natives who classed themselves as Yauyo regarded the focal area of the manuscript, especially what later became the parish of Santa María Jesús de Huarochirí, as the very core of Yauyo political space. The early colonial Yauyo do not seem to have had a king or center of political command, but Yauyo witnesses said that in conducting intranative diplomacy their ancestors had recognized the Ninavilca lords of Huarochirí village as paramount authorities for sev-

eral generations. In 1558, Cristóval Malcachagua of Huarochirí gave unambiguous testimony that the Ninavilcas meant to rally "all the Yauyos" in defending Yauyo coca claims in the middle Chillón valley against Huamantangas and Spaniards (Rostworowski 1988: 94). "Yauyo" is the only term the manuscript uses in categorical contrast to the ethnic terms for foreign neighbors (the various Yunca groups, the Huaman Tanca, and the Huanca; supp. II, sec. 485). All this evidence seems a *prima facie* reason for treating the manuscript as substantially an artifact of Yauyo culture.

On first inspection Paria Caca does appear to be simply the chief deity of these Yauyo populations, ennobled by Inca patronage but still very much an ethnic symbol. Felipe Guaman Poma de Ayala thought of him so ([1615] 1980: 1:241). And when Maca Uisa himself, one of Paria Caca's "sons," asked the Inca to dance a priestly dance essential to the Paria Caca cult, he told the Inca to dance it "the way our children from the Yauyo do" (chap. 23, sec. 297).

Nonetheless, one must account for some striking slippages in the association between Paria Caca and Yauyo identity. The predominant tellers of the Huarochirí myths, the Checa, thought the ancient founders of their leading kindreds were not Yauyo but Yunca. They scorned the Yauyo kindreds in Checa as half-wild nomads and barely tolerated their presence in the pilgrimage to Paria Caca (chap. 24, secs. 305–309) until Paria Caca himself taught them to respect the newcomers. In neighboring Concha, "Yauyo country" was a byword for a remote and fruitless backwater (chap. 31, secs. 391, 408). Perhaps such scorn reflects the fact that by 1586 the self-identified Yauyo had shrunk to a tiny ethnic minority comprising only about 5% of the 7,000 tributary households in the huge province to which they gave their name (Dávila Brizeño [1586] 1965: 155).

How should one read these seeming contradictions? One clue is that although the Checa narrator applied the word "Yauyo" to immigrants whose exact place of origin in Yauyos Province was still remembered, and who were considered nomads only recently attached to Checa, he also credited higher-ranking kindreds in Checa with invader origins. The difference was that the higher-ranking kindreds had arrived of old and had inserted themselves in the agricultural social structure created by the ancient Yunca founders in the days of Huallallo Caruíncho. A Concha teller gave much the same account of his group in chapter 31.

Apparently the Checa and Concha used the

term "Yauyo" to refer to recent herder migrants, while regarding their own ancestry, which might well have been historically no less Yauyo, as quasi-autochthonous because it had been grafted by ritual and marriage onto the regimen that included "village-owning," valley-oriented agricultural *huacas*. Perhaps they saw no paradox in scorning people of the very sort that Paria Caca favors in his myths—impoverished wanderers from the heights—because they regarded their own ancestors as more powerful "children of Paria Caca." The proof of their superiority was that these ancestors had won dominion over Yuncas and the right to aggregate Yunca *huacas* into their religion while their compatriots still wandered the heights in monoethnic pastoral groups.

As a working hypothesis, one may imagine that Paria Caca's cult as recorded here—that is, in a state of bipolar coordination with Chaupi Ñamca's cult and with Yunca components generally—is the precipitate of, and a commentary on, a long and apparently still continuing series of migrations or incursions from the southerly highland fringes of the manuscript's territory. As in other world areas where pastoralists penetrated the edges and eventually the centers of agricultural societies (e.g., China under Mongol rule), the assimilated descendants of early invaders came to inhabit preexisting social and ritual forms and champion them against later invaders.

The crux of Checa and Concha religion appears to be a systematic priestly synthesis that exalts early invader groups by placing their origin myths, eloquent of a mostly pastoral highland way of life and a kinship-based social ideology (that is, the myths of Paria Caca's "children"), into a dyadic relation with ancient macroregional cults rooted in coastal agropastoral society (those of Chaupi Ñamca, Pacha Camac, etc.). It does so by interpreting the deity who was taken to represent the sum total of invader origins, namely, Paria Caca, as Chaupi Ñamca's brother and wife-giver to Pacha Camac. In this way Paria Caca was imbued like Pacha Camac and Chaupi Ñamca with a power and an identity transcending immediate ethnicity and locality.

The spokesmen of the system, perhaps Yanca priests belonging to Caca Sica *ayllu* or their followers, defined Checa cultural identity as descent from the creators of one local instance of such highland-valley fusion. To be an ancestrally entitled worshiper of *both* Chaupi Ñamca and Paria Caca, and of their local affiliated cults, was the crux of belonging. The term "Yauyo" in Checa and Concha accordingly connoted neither 'foreigner' nor 'com-

patriot' but 'parvenu': immigrants not yet fully inserted into the regional-scale cultic order and its local apparatus.

This view helps us understand a problem of belief, namely, why outsiders like Guaman Poma saw the Paria Caca religion as a Yauyo cult par excellence, while the people of Checa used the word "Yauyo" to label a group barely admitted to Paria Caca's pilgrimage. To characterize the historical connection between Yauyos and Yuncas objectively is much harder. Whether the early highland aggressors whom the tellers identified with the mummified heroes called "children of Paria Caca" were in fact exclusively Yauyo, or whether such groups can be dated and archaeologically linked to Yauyo populations at all, remains unknown. For these reasons in the introduction we shall simply call the mythic protagonists "invaders" except where there is a specific warrant for using the term "Yauyo."

Rostworowski identifies the Yunca or coastal groups at whose expense the children of Paria Caca purportedly expanded as the two large politically unified collectivities (*señoríos*) closest to modern Lima. One, occupying the lower Rímac and Lurín valleys, was called Ychma locally and Pacha Camac in Inca usage; it housed the mighty shrine of Pacha Camac and enjoyed great religious prestige even after Yauyo and Inca depredations reduced its political reach. The other was the domain of the lord called Colli Capac, whose people the Huarochirí narrators called the Colli and whose seat the Spanish called Collique. It was based in the lower Chillón valley (Rostworowski 1988: 60–62). The Checa thought the Colli had founded the highland settlements their own ancestors conquered (chap. 24, sec. 341; chap. 25).

Chapters 11, 12, 17, 24, 25, and 26 contain what appear to be "charter" myths of specific invader groups that identified their founders as "children" of Paria Caca. If they have a unified thrust, it is that Paria Caca's fivefold self, ambiguously developed as a union of brother-*huacas* (chap. 8, secs. 99, 105; chap. 16, sec. 202) or of Paria Caca's human "children" (chap. 9, sec. 113), through many victories created a regional order embracing both victors and vanquished. By a combination of warfare and courtship at superhuman and human levels, Paria Caca turned his relation with the rich aborigines of the valleys, the Yunca, from one of strangeness and enmity into one of coordinated worship, in-law kinship, and interdependency (though certainly not without an abiding tension between groups). The Paria Caca heroes' victories over the Yunca, whom the myths picture as wealthy but im-

moral, fill several chapters. Chapter 31, the charter of the lineages of the Concha (neighbors to the Checa; see especially secs. 388–403) pictures the invaders as trying to assimilate to the aboriginal norms of their in-laws. Paria Caca's complementarity of form and function with the local female (possibly Yunca) *huaca* Chaupi Ñamca suggests that, overall, the mythology of Huarochirí construes a folk memory of conquest as an ideology of affinal interdependence.

How does this happen? The memorable fifth chapter is the *locus classicus* of a theme repeated many times in the manuscript: the poor ragamuffin who, because he is privy to a superhuman secret, carries within him a future power that his rich and splendid contemporaries cannot see. In chapter 5 it is the Baked Potato Gleaner, a byword for poverty, who makes Paria Caca's potential power real by a twofold action: he overturns the extant order's hierarchy (curing but simultaneously humbling a Yunca lord) and at the same time he becomes literally wedded to it (marrying the humbled lord's daughter). Empowered, he introduces Paria Caca's cult to a society transformed by combat and courtship.

The manuscript's ideological image of the invader-aborigine interaction as a passage from hostility to symbiosis may be seen as a one-sided rendering of, rather than a mere fiction about, the politics of coexistence between highlanders and coastal peoples. The dynamic it mythically expresses seems to have been driven by the highlanders' need for cultivable land, which they sought by downward invasion and establishment of "vertical" outliers in the mid-altitudes. Lowlanders in turn sought to capture more water sources by extending their canals upward and exerting political power over the lakes and streams of the heights (Torero 1974: 73–79). The 1558 lawsuit involving the Yauyo of Chaclla and the Yunca of Collique (among others) shows how in prehispanic times the downward penetration of Yauyo "vertical archipelagos" (Murra [1972] 1975a) led to conflicts so mutually costly that Yunca and highlanders reached a *modus vivendi* including cooperation on shared irrigation work and ritual reciprocity between leaders. The Huarochirí text glorifies some roughly comparable *modus vivendi* in mythic idiom. But the lawsuit also shows what the Huarochirí manuscript deemphasizes: that such arrangements were delicate and unstable, liable to lapse into prolonged violence when politically stressed. Even under Inca pacification, the Yauyo of Chaclla, their non-Yauyo Cantarivals, and the Colli Yunca incessantly tried to cheat and coerce each other. When the Spanish in-

vasion unleashed the resulting tensions, the fights and suits that followed did much to drive several polities into helpless poverty (Rostworowski 1988: 83–291).

Chaupi Ñamca and the mythology of gender

Several passages detail the priesthoods, games, sacrifices, *huaca*-impersonating dances, and oracles that ritually organized the interlaced aboriginal-invader societies that the tellers saw as the product of their ancestors' victories. Although the relationships among groups and deities are complex and often far from obvious, one unifying motif is clear: the union between invaders and aborigines is ideologized in terms of a fraternal tie between the highest male deity of the invaders and the highest female deity of the aborigines. The link is taken to warrant marriage alliance between their respective human progenies. In this scheme female deities play an enormous role.

Chaupi Ñamca, supreme among female *huacas*, was a land and river deity of the lower Rímac whose great temple at Mama symbolized her ancient standing as Pacha Camac's wife (Dávila Brizeño [1586] 1965: 163). Her name means 'center Ñamca' and she may, like her spouse, have had a following across various valleys; in 1562, Mama was the place chosen for a summit meeting of native lords from the whole region (Murra 1980: xviii). The devotees of Paria Caca have conceptualized her component cults as a fivefold sisterhood, so as to match the form of Paria Caca (chap. 10, sec. 147; chap. 13, secs. 175–183). In the synthesis that dominates the manuscript, Paria Caca and Chaupi Ñamca are made into siblings (chap. 13, sec. 172; Avila [1645] 1918: 64). These claims apparently mirror increased Yauyo penetration of domains in which her marriage to Pacha Camac had once formed a dominant cultic axis. Indeed, in one version the newcomers' claim goes beyond fraternal symmetry to imply superiority: Chaupi Ñamca's five selves are styled "daughters" of Paria Caca, whereas Paria Caca's selves are never said to be her children (chap. 8, sec. 101). The "children of Paria Caca" have also expressed their conviction of political superiority by making their father-*huaca* wife-giver in relation to Pacha Camac.

In establishing a sibling relation between male mountain-*huaca* and female valley-*huaca*, the Paria Caca priests may have followed an earlier prototype. A partially obscured tradition (chap. 8, secs. 106–107; chap. 10, sec. 143) allows us to glimpse Mana Ñamca or Mama Namca, a synonym or com-

ponent of Chaupi Ñamca who was once a lowland female counterpart to the male highland *huaca* Huallallo Caruincho (and who, like him, was a fiery power expelled by Paria Caca).

Within the dominant synthesis, ritual order richly embodied the idea of male-female symmetry at the apex of *huaca* genealogy. Paria Caca's priesthoods and his great festival the Auquisna (chap. 9, secs. 117–140) find their explicit counterpart in Chaupi Ñamca's festival the Chaycasna (chap. 9, sec. 122; chap. 10, secs. 149–151), so that the ritual and mythical order opens out in a grand sexual complementarity on the pattern Invader : Paria Caca : Male :: Aborigine : Chaupi Ñamca : Female. The fraternal treatment of the male-female apical deities tends to express ideals of harmony or equilibrium between groups at a totalizing, whole-society level.

However, as one passes from the supreme powers to their *huaca* offspring and their human descendants, the dominant gender metaphor changes from brother-sister fraternity to marriage. A repetitive motif concerns invaders, sons of Paria Caca, who marry Yunca-descended women, implicitly daughters of Chaupi Ñamca (chap. 5; chap. 24, secs. 305–314). Thus the sons of Paria Caca become indebted wife-takers to Yunca groups and their *huacas*.

This conviction of indebtedness parallels what was remembered as invader expropriation of the female and Yunca element in nature, namely, irri-gable land. On the ecological plane the relationship between invader and aborigine is likened to the union of wild water from the heights (Yauyo-like, male) with the soil of the valleys (Yunca-like, female). The motif is discussed in the section below on the concept *pacha*. Because this union—irrigation—was in fact the greatest agrarian wealth of the western Andes, many myths can also be read as combined cosmic and political charters for local groups' rights to specific lands and canals. The abundance of landmark detail in the text, which we have tried in notes to key to modern cartography, reflects the function of myth as a memory bank of information about the tellers' generally invasion-based claims on resources.

The conjugal metaphor for invader-aboriginal relations carries a different symbolic load from the fraternal one. Whereas the siblinghood of the apical *huacas* is a static, merely classificatory relation, marriage myths are myths of social dynamics. They express not only an ideal of productive and reproductive union, but also an image of the many tensions involved in creating such union. For example, Collquiri, a water-*huaca* from the heights (chap. 31,

secs. 408–436), must fight with his prospective in-laws and submit to their humiliating discipline before his desire for their beautiful land-*huaca* daughter can turn from destructive lust (flooding) into productive marriage (irrigation). Indeed, all the myths related to marriage treat it as an image of social stress and change latent in union. In chapter 5 Paria Caca's protégé Huatya Curi, a foreign male who wants to marry a human incarnation of Chaupi Ñamca, garners the hatred of his brother-in-law and establishes himself in his new household only by fighting within it (secs. 49–70). On the political level, accepting a foreign spouse is always a gesture of submission that one accepts at peril to one's autonomy, and for this reason Paria Caca's son Maca Uisa turns down the Inca's honorific gift (chap. 23, sec. 300). Even the Inca himself forfeited his empire by accepting a bride from a secret power that turned out to be the Spanish (chap. 14). While one may read these texts as comments on marriage as such, they also give voice in kinship idiom to fundamental doubts about the political stability of conquest-based agropastoral society.

In sum, the gender mythology of Huarochirí, though centered on an idealized complementarity, is at the same time emphatically a conflict model of society. It envisions every complementarity, whether marital, ritual, ecological, or political, as shadowed by submerged conflicts that had to be repressed in order to institute it. The inseparability of complementarity from conflict is implied to be a motor force in the mutability (what we would call the historicity) of west Andean society.

The Incas as seen from Huarochirí

Chapters 18, 19, 20, 22, and 23 vividly illustrate how the Inca conquest looked to provincial natives and give important clues as to how Incas manipulated the local pantheon. The Inca himself was said to have acknowledged and even subsidized local *huacas*—both those that local people thought of as ancient, like Paria Caca (chap. 18, sec. 220), and those newly emerging, like Llocllay Huancupa (chap. 20, sec. 243). This policy may be related to the fact that the Yauyos were reputed to be generally pro-Inca. Early evidence from the northernmost part of the Huarochirí orbit indicates that the Incas favored Yauyo efforts to penetrate the Yunca and gradually enlarged Yauyo enclaves based at Chaclla to the detriment of the anti-Inca Yunca of Collique and rival non-Yauyo highland groups (Rostworowski 1988: 148, 161, 178). Guaman Poma ([1615] 1980:

1:240–241) drew a picture of the Inca adoring an image of Pacha Camac in the shrine of Paria Caca.

The tellers of the manuscript likewise expressed their alliance with Incas in the idiom of ritual, adoring and helping finance some of the pan-Andean deities that Inca propaganda promoted. Among these figured Pacha Camac, the originally Yunca 'World Maker and World Shaker' whose shrine-citadel lay at the western edge of the mythic landscape (chap. 22, secs. 276–284; Patterson 1984[?]). So thoroughly had the Incas intercalated regional and local cults with royal religion that the Huarochirí people thought the Incas themselves owed some of their victories to help from Paria Caca's offspring (chap. 19, secs. 228–229; chap. 23).

The tendency to equate Cuni Raya, a coastal Trickster-demiurge embodying the transformation of landforms by water, with the invisible Vira Cocha fostered by Inca cult may also have been heightened by interaction with Incas. But for the Huarochirí narrators, this *huaca* stood over and against Inca power as against all other human power. Chapter 14 recounts an enigmatic Cuni Raya Vira Cocha myth alluding to the fall of the Incas. It apparently refers to the fact that the Incas had divided their domains in dynastic struggle just before the Spaniards arrived. The narrator tells how Cuni Raya Vira Cocha inveigled the Inca king with a beautiful bride and then, inducing him to "draw a line across the world" (chap. 14, sec. 196), made him fatally retreat from his sacred center at Cuzco. During the resultant outbreak of chaos, "people scrambled for political power, each saying to the others, 'Me first!' 'Me first!'" (chap. 14, sec. 197). While they wrangled uselessly in civil warfare the Spanish appeared at Cajamarca.

The Spanish invasion as seen from Huarochirí

Even more remarkable are the unique chapters that give us a glimpse of how natives, after a lifetime of colonial afflictions, looked back on the first confused moments of their contact with the Spanish. The first inkling of the epochal events arrives in the same way that the prophecy of Paria Caca's imminent victory had arrived long before (chap. 5), as a secret that Paria Caca vouchsafed to a despised ragamuffin from the heights. This time the prophet of the coming crisis is the "Mountain Man" Llacuas Quita Pariasca (chap. 18). The same chapter tells how one *huaca* priest survived the Spaniards' attempt to burn him alive and became a leader in preserving and sheltering the *huacas* amid Spanish at-

tacks. Many references (e.g., chap. 9, secs. 122, 125, 136, 137; chap. 10, secs. 144, 148, 149; chap. 13, sec. 175; supp. I, secs. 449, 469, 473) show that those who rescued the *huacas* succeeded in hiding their cults (sometimes, a censorious voice warns, by camouflaging them in Catholic ritual) far into the colonial era. At least one of the contributors to the text regularly obliges Father Avila by warning that many Indians' conversion was a façade (chap. 9, secs. 133–134). Other chapters (20–21) reveal that even Father Avila's most obsequious ally, Don Cristóbal Choque Casa, in a certain sense still believed in—was even dominated by—the “evil ancient demons.” These chapters tell with astonishing vividness and intimacy of Cristóbal's visionary combat with the *huaca* Llocllay Huancupa and of how Llocllay returned to battle Cristóbal once more in a dream. Cristóbal's dilemma—the need to validate his Christianity by conquering *huacas*, combined with inability to conquer them convincingly without invoking the same mythic paradigm he proposed to replace—adds up to a uniquely moving image of the Andean convert's stressful and compromised position.

Specialized chapters

The manuscript contains some specialized chapters perhaps given in reply to questions about arts that Tridentine Catholicism forbade as diabolically inspired, heretical, or superstitious. Chapter 29, short but important, sketches Andean astronomy or astrology. It suggests that the tellers thought of certain “black” constellations and certain star clusters as the celestial prototypes of the earthly beings they resembled. Visionaries saw these constellations “descend” to earth and shower their protégés with specific vital force.

Chapters 27 and 28 treat the cult of the dead. Chapter 27, a droll explanation of why the dead no longer come back, echoes a motif from chapter 1, namely, that humans must accept irremediable death as the alternative to Malthusian disaster. Chapter 28 recounts funeral and commemorative custom, somewhat evasively in the crucial matter of how ancestors' bodies were treated. Perhaps the tellers hoped to avoid setting persecutors on the trail of their beloved and (ideally) everlasting ancestral mummies.

Two “supplements” (which may be rough drafts) lay down the ritual duties of couples who give birth to magical children—twins or babies with small birth defects. These unusually difficult sections af-

ford an idea of the complex ritual obligations embedded in in-law ties, with emphasis on the ritual exchange of immense amounts of coca and other wealth.

The Huarochirí region's people and their historic situation

These myths relate intimately to the real-life landscape and the historic conjuncture that generated them. For one thing, the deities themselves are land features and local climatic forces. For another, these priesthoods and celebrations themselves organized productive work, so that the religious regimen encodes practical as well as ideological information. Finally, every facet of religious organization—spatial, calendric, and hierarchical—reflects the pressure of colonial circumstance.

The westernmost range of the high Andes runs northwest-southeast, parallel to Peru's Pacific shore. The long slope from its icy crests down to the desert beaches forms a rugged watershed cut at intervals by many small rivers carrying melt-off from the heights to the ocean. The scene of the Huarochirí mythology is a segment of that slope. Most of the places mentioned in it are close to three valleys: the Rímac River valley, on whose lower banks the Spanish built Lima, but whose upper tributaries, the Chaclla and Mama rivers of the manuscript, were still mostly native territory in 1600; to the south, the Pachacámac River valley, today called the Lurín, on whose headwaters stood the colonial parish of San Damián; and still farther south the “River of Huarochirí,” today the Mala, which gave its name to a colonial parish as well as to the province and to the manuscript. The people who made the manuscript also seem to have included in their range of meaningful geography one valley to the north of Lima, the Chillón, and two more to the south of Huarochirí, the valleys of the Omas and Lunaguaná (today Cañete) rivers.

Karen Spalding's *Huarochirí: An Andean Society under Inca and Spanish Rule* (1984) meticulously reconstructs the colonial society from which the manuscript emerged. Spalding (1984: 3) cautions us that colonial Huarochirí Province was no huddle of hamlets but a region the size of Massachusetts. Yet neither is the landscape whose meanings the myths unfold too huge for Andean travelers to have absorbed from personal experience. Taylor's map (1987b: 39) suggests that the widest span of the mythic landscape reaches about 85 air km (53

miles) from ocean to mountaintops, and about 120 air km (74.5 miles) from north to south. A separate reckoning by John Treacy (1984) estimates the main mythic scene as about 108 air km (67 miles) east to west and about 56 air km (35 miles) north to south. Of course, estimates using air kilometers hardly simulate the twisting paths pedestrians and llamas actually followed across the contorted mountain landscape. Even on foot, highland travel involves innumerable hairpin turns up and down the faces of river chasms. Yet, even allowing for steep climbs and zigzags, these distances would hardly have discouraged Andean travelers. Averaging Cotler's (1958: 113–114) and Spalding's (1984: 31) statements on walking speed over the Huarochirí terrain yields 2.4 km/hour as a usual rate for the area. If so, a person walking eight hours a day might have descended from the high shrines of Paria Caca to the Pacific shores in about four days. These are only order-of-magnitude estimates, but they suffice to remind us that the world pictured in the Huarochirí text is mostly a world of experienced rather than imagined landmarks and spatial relations.

Ecologically, the mythic scene spans a remarkable spectrum of "vertical tiers" (Murra [1972] 1975a; ONERN 1976). The uppermost points mentioned are icy peaks more than 5,000 m above sea level. The myths clearly take as their backdrops the "pluvial tundra" of Mullucocha (5,000–4,300 m above sea level) where Paria Caca annihilated a mountain. The heroes' downward course traversed the "very humid páramo" (4,500–3,900 m above sea level; *páramo* means high grassland) and the "humid woodland" (3,800–2,300 m above sea level). This is all high, seasonally rainy and snowy country with numerous lakes and probably included the llama-herding lands of the ancient peoples up to 4,600 m above sea level. The tellers of many myths identified with the splendor of the heights and with their product, camelid wealth on the hoof. One of the major ceremonies was a llama race to the sacred heights, with the first llama acclaimed and given a sacred name (chap. 9, secs. 120–122, 128).

Agriculture belonged to lower tiers, four cultivation zones compressed within narrow valleys: the "montane steppe" at San Damián, and three increasingly lower, dryer grades of "desert scrub" (*matorral desértico*). The colonial resettlement villages in which the manuscript seems to have been made stood in the upper part of this range, 3,000 to 3,500 m above sea level. The agricultural terraces immediately around them were and are irrigated, but on the "montane steppe" above them dry farming of high-altitude crops is also possible. There

people cultivated tubers, especially potatoes, and the Andean grain *Chenopodium quinua*, which one tradition mentions as a mythic plant that gave birth to people (chap. 24, sec. 302).

Irrigable crops grew best in places where canal water fertilized pockets of sun-warmed soil amid the rocky river canyons. Irrigated valley lands symbolized abundance, and access to warm land with water was seen as the limiting factor in winning wealth. The tellers of the myths especially associated maize with irrigation, for example, in the poignant figure of the young woman who stood in her field and cried as she watched her insufficiently watered maize shrivel up (chap. 6, sec. 83). Chapters 30 and 31 are vivid mythic renderings of the struggle between water-poor and water-rich groups.

Still further down-valley but short of the coastal plain, at altitudes around 1,000 m above sea level, irrigation takes place in small patches of warm river-bank land commonly called *chaupi yunca* ('mid-yunca' or 'semi-yunca'). These sheltered, garden-like river margins were coca lands in antiquity, prized for the abundance of the sacred leaf that Huarochirí natives ceremonially lavished on each other and on their superhuman patrons. The manuscript is especially detailed in explaining how coca cultivators fit into Paria Caca's cult regimen (e.g., chap. 8, sec. 109).

Where the fertile valleys meet the sea, a rich fishing industry combined with delta and riverbank agriculture to yield wealth that awed even the Incas. Prehispanic seaboard dwellers developed pisciculture intensively (Espinoza Soriano 1974). Although the myth-tellers thought of themselves as highland-descended, they, too, imagined salt water as part of the humanized and culturalized landscape. Fish-farming was so familiar that the teller of chapter 2 thought of ocean fish as runaways turned wild:

At that time there wasn't a single fish in the ocean.

Only Urpay Huachac used to breed them, at her home, in a small pond.

It was these fish, all of them, that Cuni Raya angrily scattered into the ocean . . . (chap. 2, sec. 26)

At the time when the manuscript was written, much of the prehispanic technology and some of the prehispanic land tenures that once governed use of these productive zones still functioned. But the Yunca, Yauyo, and Inca claims were no longer the only factors. The social organization of land—administrative divisions of territory, settlement patterns, and legal land rights—had become an even more complex, multilayered scheme com-

posed of native and colonial elements. Diego Dávila Brizeño's ([1586] 1965) report on the "Province of the Yauyos" and Karen Spalding's monograph (1984) afford valuable clues to the *de facto* world the myth-tellers inhabited.

The most modern part of the settlement pattern was the one Dávila Brizeño himself had helped impose—concentration into forced resettlement villages (*reducciones*). Each village gathered together numerous non-nucleated settlements scattered up and down the valleys to make a conveniently taxable package on the model of a planned Spanish village (see the section on the concept *llacta* below). These parishes inorganically merged fragments of various units earlier defined by the Inca and aboriginal political orders. One of the things that makes the Huarochirí manuscript hard to read is the fact that the tellers are constantly comparing the (to them) arbitrary *reducción* map against the (to them) intelligible distribution of groups and deities that their hidden ritual still commemorated. Thus their toponymy refers to both ancient and current mental maps.

Nonetheless, the Spanish administrative plan did still make use of some older orderings. A map made by Dávila Brizeño representing Spanish administrative geography of the 1580s in the context of native toponymy (Rostworowski 1988: unpaginated insert) shows the Yauyos Province bisected by what appears to be an Inca-style moiety dividing line: the southern half is called Anan ('upper') Yauyos and the northern Lorin ('lower') Yauyos. This feature the Spanish apparently retained or at least recognized. Colonial Huarochirí Province corresponded to Lorin Yauyos. And when it came to sharing out the right to rule and tax Andean people, the Spanish availed themselves of other Inca demographic and organizational schemes. The Spanish *repartimiento*, or political apportionment of tributary subjects, proceeded by assigning each established native lord to a Spanish *encomendero*. The patterning of colonial lordship thus legalized appears to echo Inca rules albeit with innovations and distortions. So the initial colonial system, while it functionally overturned many native norms, retained the gross anatomy of Inca political divisions, and some of these are detectable in the Huarochirí manuscript even after subsequent reorganizations.

The Incas saw each half of the region as composed of large blocs of people (perhaps ethnically defined), each comprised of several *huarangas* or 'thousands' of tributary households. In what Dávila Brizeño called Lorin Yauyos, which housed the ancestors of the manuscript's authors, the Incas

recognized and the Spanish retained three major groupings:

LURIN YAUYOS

Huarochirí People

Huaranga Colcaruna
Huaranga Quinti
Huaranga Langasica
Huaranga Chaucarima
Huaranga Checa

Chaclla People

Huaranga Chaclla
Huaranga Carampoma
Huaranga Casta

Mamaq People

Huaranga Matucana
Huaranga Huanchor

ANAN YAUYOS

(Spalding 1984: 54)

Each "thousand" had a native lord, or *curaca*. An overlord or *curaca principal* was recognized by the Spanish, on purported Inca or aboriginal precedent, as lord of all *huarangas* in the bloc. This was the highest office held by a non-Inca lord. By such a title the Ninavilca lords of Huarochirí (chap. 7, sec. 93; chap. 19, sec. 230) were recognized as having precedence among, if not power over, the *huarangas* most prominent in the manuscript.

Finally, within these Inca-influenced political arrangements there remained elements of a still older order. The pre-Inca (or non-Inca) settlements that the informants called their *llactas*, some already reduced to ghost towns, were still the points of mythic reference. At the microscopic level, a system of partly localized extended kinship reckoning, discussed below, remained the matrix for relations within and among households. To what degree the large, purportedly hereditary categories that dominate the overall scheme of the myths corresponded to any territorial reality or to any practical pattern of residence by 1600 is uncertain. But it is likely that the large, purportedly genealogical formations whose founders are the greatest heroes of the text, and the *ayllus* or ancestor-focused kindreds, still counted, at least theoretically, as the corporate holders of important rights in productive assets (see below, especially on the concepts *yumay* and *ayllu*).

In the later sixteenth century the Huarochirí people were not numbered among the poor. They were heavily taxed, and Spaniards vied for chances to exploit them. Far from being an obscure hinter-

land, their region lay astride the best-known route from the Spanish capital, Lima, to the Inca one, Cuzco. But their relative wealth did not protect them, and in some respects the inhabitants of Huarochirí were an afflicted people. Epidemics of the 1550s, 1580s, and 1590s, within the living memory of myth-tellers, had mowed down a huge share of a population with weak immunological defenses. "If we accept Dávila Brizeño's estimate of approximately 6,000 household heads in Huarochirí in the 1540s, shortly after the entry of the Europeans, then the province lost . . . almost 30 percent of its adult male population in the quarter century between 1545 and 1571" (Spalding 1984: 173). The rest of the century was a period of continuing severe population decline in Huarochirí as in many Andean regions (Spalding 1984: 176). Around 1560 and again in the 1580s, survivors of the epidemics in some parts of the Andes (including southerly Yauyos) had asked the *huacas* to defend them, but suffered bitter disappointment in the failure of nativist movements (Taki Onqoy, Moro Onqoy, and others; Curatola 1978; Stern 1982: 51–71). When Jesuit fathers conducted a conversion campaign in Huarochirí in 1577, they reported finding many people sick in their fields (Arguedas and Duviols 1966: 244). Missionaries routinely procured conversions by exploiting the desperation of the mortally ill.

Some of the myth-tellers were probably old enough to remember other calamities. When Spanish forces crushed the forty-year-old neo-Inca redoubt in Vilcabamba and then in 1572 executed the last independent sovereign of Inca blood, Túpac Amaru, Andean people everywhere went into mourning. The administrative overhaul that followed increasingly reduced native chiefs to the compromised status of tribute enforcers and cultural brokers. Some of the myth-tellers may have been among those routed from their homes and chased into strategic hamlets by Spanish functionaries in the 1580s. The "people called Indians" also had to comply with increasingly exhausting tribute regimens. Meanwhile, the authorities allowed Spaniards to appropriate landholdings that the natives lacked enough population to defend and sometimes let clerics exploit parishioners outrageously.

So by the probable date of the manuscript—1608—the inhabitants of the Huarochirí region had reason to wonder, like Quita Pariasca the Mountain Man (chap. 18, sec. 221), whether the world itself had turned bad. Several passages in the manuscript are colored by anxiety about sickness and depopulation (chap. 19, sec. 233; chap. 25, sec. 345; chap. 26,

sec. 357). Observing that the natives of the rocky heights seemed to be holding their own even as the aborigines of the coast were perishing (and indeed became entirely extinct, through both depopulation and assimilation), the tellers of chapter 9 (sec. 140) wondered whether perhaps the rustic highlanders did not owe their vitality to greater faithfulness to the Andean religious tradition.

Into the world of the *huacas*

Some of the basic terms in Huarochirí myths embody unfamiliar Andean assumptions or categories. While glosses cannot capture their full senses, a reader at least needs some idea of what is lost in translation. The following paragraphs comment minimally on the most important ones.

Pacha: 'earth, world, time, place'

Huarochirí people called the world and time together *pacha*, an untranslatable word that simultaneously denotes a moment or interval in time and a locus or extension in space—and does so, moreover, at any scale. In chapter 18 (sec. 221) the Mountain Man, foreseeing the arrival of those destroyers who would turn out to be the Spanish, says, "Alas, brothers, the *pacha* is not good." He could have meant anything from 'this is not a good situation' (or 'moment' or 'conjuncture') to an idea as grand as 'the world is no longer good' or 'the epoch is no longer good'. The same word *pacha* is also the name of earth in general and in modern folk religion means Earth as a personified female being.

Cosmological ideas are not spelled out in the Huarochirí manuscript. Despite the use of solar gnomons for calendric astronomy (chap. 9, sec. 108), the Sun appears as a person in Checa lore only tangentially (chap. 4; chap. 13, secs. 172, 188). Sun worship figures as an Inca idea (chap. 22, secs. 276, 279) and as a motif in the genealogy of the *huacas* as the people of the lower Rímac valley imagined it (chap. 13, sec. 172). The moon is not personified anywhere. The Andean cosmos can be partly understood from these myths, but not because the myths explicitly describe it. We deduce what we can by noticing what the tellers take for granted. To some degree the picture can be augmented with data from other written sources and from recent ethnographic research that offers conceptual analogies. (Earls and Silverblatt 1978 propose a synthetic model.)

Two pervading generalities seem to order the

data. One is that earth has predominantly female associations and water predominantly male. The second, partially overriding the first, is that altitude and motion connote maleness, while depth and stability are associated with femaleness.

Earth's living mass was imagined rising up from the waters of the surrounding ocean. (Whether the waters circled earth like Saturn's rings or whether earth's base was immersed like a boat's hull is not clear.) Especially in local instances, particularly when visualized as the green irrigable valley lands, earth is usually female. But the land's highest points, the great peaks whose ice-cruled crowns overtower the habitable earth, are usually male. One of them is Paria Caca. Roughly, the solid part of the world might be imagined as a single world mountain made of all the Andean ranges, rising from femalelike valleys to malelike snowcapped heights.

Water—rainstorms and mudslides, snow and glacial runoff, tiny irrigation canals and mighty rivers, even that astral river we call the Milky Way—is the kinetic part of the world. Water moves over *pacha* in a circular path. It rides up from the ocean into the sky along the Milky Way "river." Chapter 29 (sec. 375) tells us that water rises because a celestial llama constellation carries water up from below by drinking before ascending. Then water washes down onto the heights of the earth as storm and rain, bathing and fecundating earth as it descends to the ocean. People worshiped the great snowcapped peaks "because that is where their water comes from" (Avila [1645] 1918: 83). Water is often male, especially storm water and downward-flowing water. Several myths liken the chasm-cutting power of rivers in spate, or the storm and flash flood that create disastrous mudslides, to warlike male violence:

As soon as they brought him up a hill, Maca Uisa, child of Paria Caca, began to rain upon them, gently at first.

The natives of that country said, "What could this mean?" and began to ready themselves.

When they did so, Maca Uisa reduced all those villages to eroded chasms by flashing lightning and pouring down more rain, and washing them away in a mudslide. (chap. 23, secs. 295–296)

Although the Pacific Ocean plays a key part in organizing mythic space, it is not personalized in the manuscript. In modern Andean myth, the ocean (*Mama Cocha* 'mother lake') is usually female. The *huaca* most closely associated with the sea is Pacha Camac (chap. 22, secs. 276–284), but this great force is not clearly defined as a maritime deity.

The hydraulic embrace of moving water and enduring earth was imagined as sex. Their embrace yielded a biotic system (Dumézil and Duviols 1974–1976) in which life forms emerge from mixed earth and water. Hydraulic sex was sometimes imagined as a turbulent affair. The myth-tellers, who seem to have faced the harrowing vicissitudes of a water-poor irrigation economy with a good deal of humor, likened its hazards to the comical chaos of undisciplined desire. In four myths (chap. 6, secs. 82–90; chap. 12, sec. 170; chap. 30; and chap. 31, secs. 406–432) voluptuous earth-women offer their parched bodies to the virile water-*huacas* who rush down from the heights. The earth-women's self-serving tricks and the water-men's lecherous ineptitude can turn their meetings into comic disasters. In chapter 31, when the lake-*huaca* Collquiri rushes downhill to his earth-lover Capiyama, the bursting pressure of his virility squirts out of every channel and sprays destructive floods all over Capiyama's people:

... Capiyama's elders shouted at Collquiri from their <crossed out> [spring] village:

"Son-in-law, everybody's mad at us! Don't send us so much water!"

"Shut it off!"

"Hey, Collquiri! Hold back on the water!" they yelled.

With them shouting like that, Collquiri plugged the hole with a blanket and other stuff.

But the more he plugged it the more the barrier crumbled and the more the water kept bursting through over and over again.

Meanwhile the people from down below kept yelling at him nonstop:

"PLUG IT UP!!!" (chap. 31, secs. 425–426)

Pacha, the world as a given arrangement of time, space, and matter, is not supratemporal. It clearly admits change, even cataclysm. There have been times when *pacha* "wanted to come to an end," and the manuscript tells us how this can happen. Water might fail to ascend into the astral "river" and the world might drown as the ocean rose (chap. 3; chap. 29, sec. 375). Or Pacha Camac Pacha Cuyuchic, the 'World Maker and World Shaker' who sleeps under the ruined shrine that still bears his name, might turn over in his dreams and pulverize the world in an earthquake (chap. 22, sec. 284); the region is in fact subject to devastating earthquakes. Everything, including humanity, has been crushed and refashioned. The social order, too, is constructed and transformed in superhuman violence; the tellers imagine the original theophany that was their group birth as one of many cataclysms that simultaneously gave form to the land and to society.

In gross terms, then, the Huarochirí world opposes the qualities of still centrality—depth, solidity, dryness, stability, potential fecundity, womanliness—to those of a restlessly moving outer orbit—height, fluidity, wetness, movement, potential for insemination, virility. As the outer waters wash over the inner earth, these two fundamental lives mix in the circulation of water over soil. Lives that are both watery and earthy emerge: plants, animals, people. Born fat, wet, and juicy, all beings eventually—in the space of a dry season or a long life—separate out again into their original substances (Allen 1982). Moisture departs as vapor, leaving a weatherbeaten husk and the dry seeds of a future cycle. Nature and ritual combine to return the parts to their sources so the cycle can start anew. Humans like all others emerge fat and wet, but at the end of life their dried husk containing the potential for future life goes as a mummified ancestor (*mallqui*) back to earth. In chapters 27 and 28, a dry, seedlike being that emerges from the dead human husk—a fly—is the living residue of a dead generation. The function of ritual and sacrifice is to ensure a steady circulation of biological energy through *pacha* by conducting social exchange among its living parts.

Camay: a concept of specific essence and force, 'to charge with being, to infuse with species power'

The act by which *huacas* bring other entities into being is not expressed with the plain word meaning 'to make' (*ruray*), nor with the verb *huallpay*, which González Holguín took to mean a divine act of creation ([1608] 1952: 174), but with a different verb: *camay*. *Camay* escapes the seemingly handy glosses 'to create' (because 'create' connotes an *ex nihilo* act, while *camay* connotes the energizing of extant matter) and 'to fashion' (because 'fashion' suggests only an initial shaping of inert matter, whereas *camay* is a continuous act that works upon a being as long as it exists). But what does *camay* mean? The astronomical or astrological chapter 29 gives a crucial clue: it labels a llama-shaped constellation the *camac* (agentive form, 'camay-er') of llamas. On descending to earth this constellation infuses a powerful generative essence of llama vitality, which causes earthly llamas to flourish. All things have their vitalizing prototypes or *camac*, including human groups; the *camac* of a human group is usually its *huaca* of origin. Religious practice supplicates the *camac* ever to vitalize its *camasca*, that is, its tangible instance or manifestation. Taylor (1974–1976) has likened this idea to Platonic idealism, an insight that helps one understand the profoundly

plural and ongoing nature of Andean creation but also minimizes its earthiness. *Camac* in the manuscript seems to suggest a being abounding in energy as physical as electricity or body warmth, not an abstraction or mental archetype.

Huacas could be *camac* to great or small categories of beings. The great coastal deity Pacha Camac bears in his very name—'Camac of space and time'—an all-embracing function as the vitalizer of worldwide realities, while local *huacas* animate smaller entities. Likewise, ordinary beings could be *camasca* (participial form; 'infused with *camay*') to different degrees. An *ancha camasca* person is a 'very powerful' one. But one can clearly see that *camay* means specific form and force, not general potency. In chapter 14 (sec. 191) three men boast of their speed, saying:

"I am a condor shaman!" some men answered.

"I am a falcon shaman!" said others.

"I am one who flies in the form of a swift!" replied still others.

What they said more literally is:

"I am the *camasca* of the condor!"

"I am the *camasca* of the falcon!"

"I am one who flies as a swift!"

The point appears to be that these men are three shamans whose patrons, the archetypes of birds who symbolize speed, have infused in them the species powers of speed and range of the condor, the falcon, and the swift.

Huaca: 'superhuman person, shrine, holy and powerful object'; huaca priesthood

The Huarochirí manuscript is in large measure a reading-out of its space. The horizon, not the cosmos—geography, not metaphysics—poses the questions to which its most vibrant deities give answers. Andean numina lodge in places or placed objects: mountains, springs, lakes, rock outcrops, ancient ruins, caves, and any number of humanly made objects in shrines: effigies, mummies, oracles, and so forth.

Like all the other persons English forces us to call "deities," Paria Caca is a *huaca*. The half-Andean historian Garcilaso Inca de la Vega tried in 1609 to convey the sense of this all-important term by telling us that:

huaca . . . means "a sacred thing," such as . . . idols, rocks, great stones or trees which the enemy [i.e., Satan] entered to make the people believe he was a god.

They also give the name *huaca* to things they have offered to the Sun, such as figures of men, birds, and animals. . . . *Huaca* is applied to any temple, large or small, to the sepulchers set up in the fields, and to the corners in their houses where the Devil spoke to their priests. . . . The same name is given to all those things which for their beauty or excellence stand above other things of the same kind, such as a rose, an apple, or a pippin, or any other fruit that is better or more beautiful than the rest. . . . On the other hand they give the name *huaca* to ugly and monstrous things . . . the great serpents of the Antis . . . everything that is out of the usual course of nature, as a woman who gives birth to twins . . . double-yolked eggs are *huaca* . . .

They use the word *huaca* of the great range of the Sierra Nevada. . . . The same name is given to very high hills that stand above the rest as high towers stand above ordinary houses, and to steep mountain slopes . . . (Garcilaso Inca de la Vega [1609] 1966: 1:76–77; Livermore's translation)

A *huaca* was any material thing that manifested the superhuman: a mountain peak, a spring, a union of streams, a rock outcrop, an ancient ruin, a twinned cob of maize, a tree split by lightning. Even people could be *huacas*. Modern ethnography tells us that one extraordinary ethnic group, the Uru of Bolivia, was collectively called *haqe huaca* 'a human *huaca*' by Aymara-speaking neighbors because the Aymara thought the Uru had survived from primordial times (Manelis de Klein 1973: 143). In the manuscript, too, people can become *huacas*. Mummified ancestors of high rank (see below) could be *huaca*. The Inca rite of Capac Hucha (chap. 22, sec. 280) turned live humans—spotless children and youths—into new *huacas* by burying them alive. The discovery of new *huacas* never ceased. Avila recalled that when one native brought home a black silk button with gold thread, which he had found in a garbage heap in Lima, a "master" of *huaca* worship revealed to him that it should be enshrined as a household *huaca* ([1645] 1918: 74). Chapter 20 details the discovery and career of another new-found *huaca*.

People owed *huacas* reverence and also plenty of goods: llama and guinea pig meat, brilliantly colored mineral powders, thorny oyster shell, clothing, coca leaf, maize dumplings, and maize beer. The Huarochiri manuscript lays down the priestly regimen for sacrifice and gives examples of the responses priests delivered on *huacas'* behalf:

They [*huaca* priests] gave people advice, telling them all sorts of things:

"You are to bathe in the confluence of two streams."

"You must sacrifice one of your llamas."

People were more than happy to obey their dicta. (chap. 13, sec. 186)

The Huarochiri manuscript tells a good deal about priesthoods, but not much about rules regulating lay worshipers' individual or group affiliation to *huacas*. People appear to have belonged to the cults of *huacas* considered as apical ancestors of their patrilineages, of their *ayllus*, and of the clanlike large groups identified with major founder-*huacas*. Apparently, heredity was a primary determinant of local religious duty, because when people went on their own initiative to consult the *huaca* oracle of the five Namca sisters, the Namcas would ask if the petitioners had properly consulted their hereditary *huacas* beforehand:

. . . these *huacas* would ask those who went to them, "Have you come on the advice of your own Con Churi [hereditary household deity], your father, or your elders?"

To those who answered "No," the *huacas* would reply, "Go back, return, consult your Con Churi first." (chap. 13, sec. 185)

Huaca shrines were powerful social and political corporations. When a *huaca* gained legitimacy, we learn from the "biography" of the *huaca* Llocllay Huancupa (chap. 20), worshipers built it a temple precinct and offered costly service. Politically sponsored *huacas* had endowments of both herds and fields that common people were required to serve:

The Incas worshiped these two *huacas* [the Sun and Pacha Camac] most, beyond all the others, exalting them supremely and adorning them with their silver and gold, putting many hundreds of retainers at their service, and placing llama herds for their endowments in all the villages.

The llamas of Pacha Camac sent from the Checa people stayed at Sucya Villca. (chap. 22, sec. 277)

Huacas also had human servitors and even spouses. Avila in 1645 reminisced about having met a good-looking eighteen-year-old girl, crippled and walking on two staves, who had "been dedicated as a woman of an idol" (the *huaca* Maca Uisa). Maca Uisa lived with her in the form of a sacred blue stone, "no bigger than the palm of a hand," which she kept in a basket with tiny but luxurious garments to dress it ([1645] 1918: 69–70). He also mentions that a "*sacerdotisa* [priestess] very celebrated among the Indians" was known as a "woman of Pariacaca's" ([1645] 1918: 65). Both examples use the Spanish term *muger*, meaning 'woman' literally

and 'concubine' or 'secondary wife' more freely, rather than the legal Spanish term for 'wife'. Because the Spanish terminology of marriage implies a sacrament, Father Avila might have scrupled to use it in connection with *huaca* marriage no matter how natives regarded the matter; so we cannot tell whether these unions counted as full marriages in the native system.

Some *huaca* priests clearly enjoyed class privileges. For example, common people did all the agricultural work on fields belonging to the *yanca* priests who had hereditary authority over a lake and its irrigation water (chap. 31, sec. 435) and they gave priests huge amounts of meat (chap. 24, sec. 335). Water priests are credited in the manuscript with almost dictatorial power over some of the processes by which society reproduced itself, including vital decisions about people's rights and duties in basic subsistence agriculture:

Because he was the *yanca* for this purpose, all the arrangements of the season were made in compliance with his commands.

When it came to irrigation he'd be the only one to give orders about it, saying, "It'll take place now" or "It'll be so many days." And all the Concha obeyed him to the last word. (chap. 31, sec. 434)

Early in his extirpation campaign, Father Avila imprisoned an important priest of Chaupi Ñamca in Mama village named Hernando Paucar (who may be a source of the distinctive subregional mythology contained in chapter 13) and wrung from him a confession about the privileged life of *huaca* priests. It should be read with caution, since it comes to us via a paraphrase composed four decades after the event:

... it is true that I've been a priest [*sacerdote*] of Chaupiñamocc since I was a youngster, and I inherited [the priesthood] from my father, and in all these villages of this parish and others, they've respected me a great deal, and I used to come visit them twice every year, and if I was late they used to send someone to call on me, and they would send me horses, and people to serve me on the road, and whenever I entered a village they would erect arches, and they would come out dancing, with the women beating their drums, and they would give me lodging, and fed me, and served me, and they gave me so much that I didn't know what to do with it all. At my rear they made something like a cabin of boughs, and they would cover it and close it off with cloaks, and the floor used to be covered with fresh straw, and I would enter into it alone, by day or by night as I preferred. There they

would come to consult me, and I responded, and sacrificed guinea pigs, pouring out maize beer, and I used to perform other ceremonies in view of those who attended, and some used to say that they wanted to hear a response given by Chaupiñamocc, and I used to make her speak by placing there a little idol that represented her, and sometimes I would talk in a very high voice and other times very low. . . . And for this everyone respected me, as much as they do you [Father Avila], and much more. On the third or fourth day they would bring together maize, potatoes, and a lot of food for me, and they would dispatch it to my wife in my village. In this village I'd be lodged in one fellow's house the first time, a different fellow's the next . . . (Avila [1645] 1918: 68–69)

Through oracles and through their privileges in ratifying rites of passage, the *huacas'* priestly representatives closely governed the ongoing business of society. Another sort of priesthood, the nonhereditary *huacsa* office, rotated among members of appropriate kin groups. *Yancas* seem to function as calendric and technical authorities, oracles and mediators, while the *huacas'* main duty was to impersonate the great *huacas* in festivals and reenact their myths. Some of the narratives may be verbal "scripts" of *huacsa* performances.

In comparison to the priesthoods, the manuscript has little to say about the power of nonpriestly leaders such as the political "native lords" called *curacas* or the native magistrates (*alcaldes*) appointed by Spanish colonial officials. It mentions several postconquest *curacas* by name, often commenting on their attitudes toward *huacas* or as a device for setting a chronological context. Several passages imply that the *curaca* was expected to take a prominent part in *huaca* ceremonies (chap. 13, secs. 173–174, 176), and that he could exert leadership over a community's decision to adopt or neglect particular *huacas* (chap. 19, sec. 231; chap. 20, secs. 244–245).

Huacas had vibrantly individual personalities. Paria Caca, whether in his incarnation as the hailstorm of the icy heights or as the five-in-one hero who beat the Yunca down toward the sea, seems haughty, brilliant, and cold, a driving deity. Llocllay Huancupa (chaps. 20 and 21) lurks in the dark like an inarticulate beast, roaring dully over his immolated meal. Chuqui Suso, the sexy agricultural *huaca* (chap. 6, secs. 82, 88–90), and her sister who seduced the Paria Cacas into irrigating her (chap. 12, sec. 170), as well as the great maternal *huaca* Chaupi Ñamca, were associated with sensuality and playful ease:

"Chaupi Ñamca enjoys it no end when she sees our <crossed out:> [cocks] private parts!" they said as they danced naked.

After they danced this dance a very fertile season would follow. (chap. 10, sec. 151)

They used to stay there all night long, staying awake till dawn, drinking and getting drunk. They got real happy performing the dance called Ayllia, and danced that night drinking and getting drunk until dawn.

After that they went out to the fields and simply did nothing at all. They just got drunk, drinking and boozing away and saying, "It's our mother's festival!" (chap. 13, sec. 174)

Clearly *huacas* are living beings, persons in fact. Avila and other Christian seventeenth-century observers seem to think of the *huacas* as real beings, material in form but animated by demonic spirit. When Avila applied the terms "god" and "goddess" to *huacas* (for example, Cuni Raya's beloved Caui Llaca; Arguedas and Duviols 1966: 202–203), he seemed to be thinking of them as linked to natural forms, anthropomorphic and tangible, something like the deities of Greco-Roman mythology and the "demons" of medieval Europe whose lore he apparently knew in some detail (Arguedas and Duviols 1966: 207, note 3). In this partly Greco-Roman sense, the word "deity" might fit the *huacas*. But one must be careful; the dualism of substance enfolded in the Christian usage of the words "god" and "divine" seems superfluous for understanding Andean worship. The world imagined by the Checa does not seem to have been made of two kinds of stuff—matter and spirit—like that of Christians; *huacas* are made of energized matter, like everything else, and they act within nature, not over and outside it as Western supernaturals do.

The tellers give *pacha* shape by mapping onto it a society of *huacas* that mimics idealized human social structure, mainly genealogical and affinal. Earth forms, superhumanity, and society match each other in a structure of correspondences. Great snowcaps are great creators. Their myths are often shared among large populations (perhaps tens or hundreds of thousands before the Spanish conquest) united by language and other markers of public identity; often they are the groups called "nations" by some Spanish authors and "ethnic groups" by modern students of Inca polity. Paria Caca, whose body was a double-peaked snowcap high in the rugged western range, was known to Guaman Poma ([1615] 1980: 241) as one of the greatest deities. The pilgrimage to his shrine (Bonavia et al. 1984) united

thousands of people in a trek over the last lap, a race up the "steps of Paria Caca" still visible today. The pilgrims visited the lake where Paria Caca quenched the Huanca deity Huallallo's fires, sacrificed llamas at Paria Caca's dwelling, and, according to Dávila Brizeño ([1586] 1965: 161), "climb[ed] the peak of the snowcap to offer their sacrifices."

The Huarochirí narrators explained their various ancestor *huacas* as heroic offspring of this great regional *huaca*. In the Huarochirí manuscript Paria Caca is said to consist of five beings who are, in various contexts, equal or ranked component selves of a fivefold being. In the overall textual architecture, which seeks to weld *huacas* of diverse origin into a single ideological kindred, the five heroes were felt to have established what were apparently large fraternal sections of society. The main teller of the Paria Caca mythology thinks of the landscape as divided into domains of influence corresponding to the various large highland-derived groups, each defined by putative descent from a persona or child of Paria Caca. These domains are not said to be contiguous territories. They emerge in the form of mythic trajectories: the paths of heroes, along which the heroes achieved society-defining deeds and left areas of dominion over specific lands and people in the scattered or "archipelago" form known from secular and bureaucratic sources.

Yuri/yumay: concepts of human birth and descent

Colonial Andeans imagined human descent groups as continuations of the genealogy of *huacas*. Intermediate-sized, named ascriptive groups like the Checa "thousand" (whose viewpoint often dominates the text) were fitted into a unified regional ideology by defining their founders as the progeny of Paria Caca's component heroes. Paria Caca's followers thus construed the "original" organization as sib- or clanlike. The spacial foci of superhuman and human genealogy seem to have been symbolized by shrines called *pacarinas* or 'dawning places' that represented founders' and heroes' appearances on earth. *Pacarina* myths are by their very nature peculiar to each group; since the Huarochirí mythology as a whole sometimes seeks to coordinate the mythic legacies of several "originally" separate groups, it is not surprising that *pacarinas* are the theme on which Paria Caca mythology is least consistent. One example is the *pacarina* where a people-producing *quinua* plant grew (chap. 24, sec. 302); the person who composed the chapters seems

uncertain how to reconcile this myth (which Taylor [1987b: 163] takes as a component predating the subsumption of origins in Paria Caca) with other accounts of emergence.

Andeans traced the descent lines of actual humans from revered ancestors, whom they credited with living on as guardians of fertility and order as long as their mummified bodies endured. We know from "idolatry" trials and the testimony of chroniclers that the cult of mummies (*mallquis*) formed the link between the mythology of *huacas* and the purportedly known genealogy of named groups of the living. One witness on trial for "idolatry" explained: "This *mallqui* [the mummy Guaman Cama] was a nephew of the idols Caruatarqui Urau, and Ticlla Urau, and the progenitor of this *ayllo* Chacas, and he was a son of Libiac ['Lightning'], and he nurtured people, multiplied them, guarded their fields and gave them money and wealth" (Huertas 1981: 104–105). Mummified ancestors lived in caves or special houses (chap. 11, sec. 155). Their progeny dressed them richly, periodically "embraced" and feted them, served them with food and sacrifices, and petitioned their approval of major transactions (Guaman Poma [1615] 1980: 1:262–271; Polo de Ondegardo [1571] 1916: 116–119). Garcilaso ([1609] 1966: 1:76–77) mentioned that mummies of special importance were *huacas* and in Huarochirí it seems to be mummified leaders of successful invasions who achieved this role. The two Huarochirí chapters about the fate of the dead (chaps. 27 and 28) are evasive about mummification but difficult to understand unless one assumes that people preserved human remains in some way. A few Huarochirí passages seem to refer to mummy *huacas*:

The one [*huaca*] called Ñan Sapa was a human being.

Later on, the Inca took away the *huaca* himself.

But they made another one to be his proxy.

This is the one that we know Señor Doctor Francisco de Avila carried away.

They say Ñan Sapa, when he was human, wore the *quisay rinri* in his ears and bore the *canah yauri* scepter in his hands. (chap. 24, secs. 319–320)

In connecting ancestors to living humans, unilineal principles play an explicit role. The myths employ a concept of patrilineage (*yumay* 'sperm') used in relation to a concept of sibling or birth group (*yuriy* 'birth'). The preface tells us that the peoples whose story is to be told here constitute a group by virtue of sharing a father: "I set forth here the lives of the ancestors of the Huaro Cheri people, who all

descend from one forefather" (pref., sec. 2). The vocative *yaya* 'father' as a form of address is used to express deference to any male authority, human or superhuman.

The most prominent collective ego of the myths, the Checa, thought of their group as defined by mythic descent from one of the component Paria Caca persons; it is not stated to be patrilineal, but the Yauyo subgroup called Morales as a whole is treated as male relative to the Yunca, and the persons whose acts define it are males. Within such clanlike categories, there appear to have been more clearly genealogical patrilineages uniting people with specific rights and duties. Portions of society characterized as patrilineages (*yumay* 'sperm') are mentioned as the holders of hereditary water rights and priesthoods (chap. 7, sec. 91; chap. 31, sec. 445).

When comparisons among sectors of a collectivity are made, whether at a vague clanlike or a more genealogical lineagelike level, they are usually made in terms of birth order within an original sibling set (*yuriy*). Genealogical myths from all over the world "justify existing stratifications by denying them (we are all brothers) while at the same time providing detailed guidance to inequality by distinguishing between 'elder' and 'younger' branches. They also record alliances by tying allied groups into common genealogies" (Vansina 1985: 103). The concept *yuriy* 'sibling group' carries exactly this contradiction. In all cases, siblinghood seems to imply rank even more saliently than it implies solidarity. "The Quinti thoroughly despised the Checa because the Checa were born last" (chap. 11, sec. 153). The notion of unranked kin solidarity is treated as an abstraction or mystique at the highest level of mythic generality: Paria Caca, the union of all Huarochirí-area invader groups, came into being as five unnumbered eggs. The set of eggs could be considered a sibling set, but one without birth order because not yet born. No such transcendent paradox occurs among humans. The transition from power *in ovo* to power in action is also the transition to rank order.

As in many Andean contexts (for example, the political organization of colonial Andean communities), the firstborn or leading member of a set (e.g., noble heads of a village's component *ayllus*) functions within the set as first among equals, but outside the set as the totalizing representative of it. (The political authority of *curacas* over *ayllus*, for example, seems to have worked on this principle.) So, too, among *huacas*. Paria Caca can be considered the first among five brothers (chap. 8, sec. 99), yet at the same time as the overarching deity of

which the five are only parts. In this latter function Paria Caca is often spoken of as the father rather than the brother of the heroes. Chaupi Namca has the same structure (chap. 10, sec. 147).

So thoroughly does the ideology of genealogical inequality govern ritual order that the birth of human siblings whose rank order closely approached equality—that is, twins—was seen as a major anomaly warranting the immense expiatory efforts that occupy supplement I.

Naturally there is some tension between rank ascribed by descent and rank achieved through warfare. The “children of Paria Caca” fought for the military supremacy of their ethnic group, but also for precedence among themselves, and this produces anomalies; chapter 17 expresses the Checa claim to have risen above their Quinti rivals by their achievements. Sometimes a group’s junior standing seems to reflect its lesser achieved power. The Concha, a local group described as an *ayllu* (see below), were said to have originally been a *yuriy* of five brothers and a sister; the resulting five groups’ unequal land resources are explained as the result of the first three brothers’ having conquered energetically while the last two lagged or got lost:

... these two [Hualla and Calla] fell somewhat behind.

So, lagging behind, they missed the trail and headed instead toward the Yauyo country, thinking, “Maybe our brothers went over there.”

A long time afterward, only after the other three brothers had finished dividing up the fields and other goods among themselves, they did come back. (chap. 31, sec. 391)

Patrilineal grouping and birth-order ranking do not exhaust the kinship content of the ideology expressed in the manuscript. Some episodes suggest that descent through females also played a large part in the tellers’ idealized vision of social organization. No named principle used in myths of group origin offers a matrilineal counterpart to *yumay*. Yet, in rituals, there is a strong tendency to treat the engendering of females as a separate type of partentage from the begetting of males. In the fertility-giving ritual game of spearing giant dummies called *yomca* and *huasca*,

Once they’d prepared everything, they named one of the effigy bundles Yomca and set it as a target symbolizing males.

The other, the one called Huasca, they set as a target symbolizing females.

After they set them up, the men would put on their best clothing and feather ruffs called *tamta*, and they’d begin to let fly at the targets. (chap. 24, sec. 328)

Then they threw spears at the Huasca effigy for females, saying,

“She’ll give me daughters and all kinds of food!”

and then at the Yomca effigy, saying,

“He’ll give me sons, agave fiber goods, and all kinds of animals!” (chap. 24, sec. 334)

Separate female *huacas* were credited with being great producers of female offspring: “Chaupi Namca was a great maker of people, that is, of women; and Paria Caca of men” (chap. 13, sec. 172). *Mama* ‘mother’ was a term of honorific address strictly parallel to *yaya* ‘father’. Certain priestesses held rank apparently equal to that of priests (chap. 13, sec. 178; chap. 31, sec. 417; see also Avila [1645] 1918: 65). Overall, the implicit suggestion seems to be that male and female fertility run through separate channels, which cross over each other in a braidlike pattern as each generation reproduces itself sexually. The female channel of fertility was fortified by a priestly religious structure, as was the male. The Huarochirí data seem compatible with—but do not declare the existence of—inheritance of some religious identity or obligation through parallel descent (Lambert [1977] 1980: 37; Silverblatt 1987: 20–39).

Ayllu: corporate landholding collectivity self-defined as ancestor-focused kindred

The tellers of the myths habitually described their society as built of collectivities called *ayllus*. In many passages the *ayllu* figures as the basic unit of ritual action:

... in the old days, people used to go to consult Paria Caca at night, taking along llamas or other things.

They used to go taking turns, *ayllu* by *ayllu*. (chap. 24, sec. 309)

A person’s immediate religious responsibility was to his or her *ayllu*’s senior members. When Lanti Chumpi discovered what she guessed might be a new *huaca* (perhaps a buried figurine or unusual stone), her first thought was to take the find to them (chap. 20, sec. 237). We know that each *ayllu* made its own claim to religious authority because each told its own version of certain myths (chap. 13, sec. 187).

But what was the makeup of the *ayllu*? The classic sources look unhelpful at first glance. The great lexicographer Diego González Holguín ([1608] 1952: 39–40) gives a definition of *ayllu* so broad as to include virtually all kinds of descent, kinship, and even territorial solidarity. Avila thought an *ayllu*

was something like the Spanish kin group defined by a shared surname (Arguedas and Duviols 1966: 257), which would suggest patrilineal bias.

Internal evidence from the manuscript, however, suggests something other than a corporate unilineal principle. Chapter 7 (sec. 91) says, "There is within this *ayllu* a patrilineage [*yumay*] which bears the name Chauincho." From this we infer, first, that *ayllu* is a separate concept from patrilineage, and second, that an *ayllu* could contain more than one patrilineage. *Ayllu* is therefore not the minimal or the only unit of descent ideology. However, the fact that the passage just cited goes on to speak of the Chauincho patrilineage as an *ayllu* (with a cross-ing-out eloquent of hesitation on someone's part) suggests that the term *ayllu* could subsume the concept of lineage. This makes it difficult to distinguish the two in certain instances.

We also know, because chapter 13 (sec. 187) implies as much, that a given territorial settlement (*llacta*; see below), which we usually gloss 'village', could have multiple *ayllus*: "in each village, and even *ayllu* by *ayllu*, people give different versions . . ." People understood the internal dynamics of their local communities as a play of more or less rival *ayllus*.

The tellers saw rights to land and other immovable assets as lodged in the *ayllus*: "As soon as Tutay Quiri's children had expelled those Yunca, they began to distribute among themselves, according to their own *ayllus*, the fields, the houses, and the *ayllu* designations" (chap. 24, sec. 316). This passage then tells us that even the invaders felt bound to redefine their own organization on the pattern of preexisting local *ayllus*, which suggests they had a high degree of corporate definition and legitimacy as well as important functions. Since it goes on to say the Yasapa *ayllu* people were silver-smiths, one may further speculate that some *ayllus* practiced, or at least were traditionally associated with, occupational specialties.

So it is relatively safe to think of the *ayllu* as a named, landholding collectivity, self-defined in kinship terms, including lineages but not globally defined as unilineal, and frequently forming part of a multi-*ayllu* settlement. But what exactly were the kinship criteria of inclusion? This question, an ancient mare's nest in Andean research, yields partly to Karen Spalding's exploration (1984: 28–30, 48–52; see also Castelli, Koth, and Mould de Pease 1981). González Holguín shows us that the most general sense of *ayllu* and its derived words is "that of grouping elements or persons together on the basis of similarity or species, or dividing up a larger

group on the basis of the same criteria" (Spalding 1984: 29). "Similarity or species" could mean taxa such as animal or plant species, but, when applied to people, *ayllu* usually meant "descendants of a common ancestor." "The term was commonly defined as any group—family, lineage, or generation—whose members were related to one another through their descent from a common ancestor" (Spalding 1984: 28–29), that is, an ancestor-focused bilateral kindred. Zuidema (1973: 16–21) has developed the argument toward a detailed model of ancestor classification and cultic organization.

Spalding's definition has useful corollaries. First, it reminds us that, like such spatial terms as *pacha*, *ayllu* is the name of a concept of relatedness and not of an entity with specific dimensions. It has no inherent limits of scale; in principle, it applies to all levels from sibling groups to huge kindreds, clanlike groups, or even whole ethnic groups defined by reference to common origin and territory. An *ayllu* can readily be understood as consisting of multiple patrilineages (or, in principle, matrilineages) insofar as any given member can trace descent from the "founder" or apex via a given child of the "founder" (and so forth, in potentially segmenting ramifications). Platt ([1978] 1986: 230–231) has clearly demonstrated a varied-scale usage among modern Bolivian highlanders, who reckon upward from the "minimal *ayllu*"—small clusters of patrilocal rural neighborhoods—up through "minor," "major," and finally "maximal" *ayllus* that ascend to include the entire ethnic group. The various levels of *ayllu* organization may each have specific terminologies, typically referring to their political functions. For example, in Platt's area, the "minimal" *ayllu* was called *cabildo* (civic council) in its political functioning, and Spalding (1984: 51) adduces a Spanish witness who understood the Inca decimal term *pachaca* ('hundred') to mean an *ayllu* of a hundred households or over, suitable by its size for treatment as an administrative entity in its own right. In the Huarochirí manuscript, the usage of *ayllu* terminology becomes less confusing if one recognizes that an *ayllu* may be part of a larger *ayllu*. In this sense, the "children of Paria Caca," the large (perhaps ethnic) group that forms the mythology's collective subject, a group of people "who all descend from one forefather" (pref., sec. 2), is a "maximal *ayllu*."

Second, as Spalding also emphasizes, for practical purposes it was not precise genealogy that finally decided who belonged to an *ayllu*, but rather social conduct—including political alliance—befitting a genealogically connected person. As with

many concepts in the domain of kinship, *ayllu* may be understood partly as an ideology built up to explain patterns of behavior rooted in the residence rules, which in turn often reflect the demands of a given geographical, technological, and demographic reality. Access to *ayllu*-held assets (and claims to collective *ayllu* ownership continued far into the colonial era) was given in return for exchanged labor and exchanged ritual participation on a kinship model. One can see in the myths of Concha *ayllu* (chap. 31, sec. 391) that genealogical connection alone was insufficient to bestow land on the two Concha lineages that had become politically disconnected. But adoption combined with political or marital alliance was seen as sufficient to create *ayllu* entitlements even when there was no genealogical tie (chap. 31, sec. 403). *Ayllu* was a political fact, and cultic practice lodged in it regulated practical matters of economy and power.

Llacta: 'village' as cultic and territorial unit

By the time the Huarochirí manuscript was written, colonial coercion had overhauled the relationships between people and territory. If the prehispanic Huarochirí region resembled those known elsewhere in the Peruvian Andes, each of its major settlements probably controlled "archipelagos" of mostly non-nucleated residence spread over the various productive tiers of the mountain slope and the coast. But by 1608 the parishes where Avila was working—for example, San Damián de Checa, focal point of the manuscript—no longer entirely followed this model. Villages like San Damián had been carved out in a scheme of forced resettlement (*reducción*) that Viceroy Francisco de Toledo had begun almost forty years earlier. When administrators herded Andean peasants into resettlement villages (Gade and Escobar 1982; Spalding 1984: 214–216) they fused together multiple Andean settlements—the ones called *llacta* in prehispanic usage—into a larger, more accessible, more governable and exploitable "Indian town" on a Spanish plan with plazas, churches, and streets laid out on a grid. Most of the places with Spanish (saint) names in the manuscript belong to this Toledan reordering of territory.

Why, then, did people keep orienting their religion around a map that no longer strictly fit the productive space of politics and economy? After the initial coercions of resettlement, from the 1580s on, older relations to the landscape partly reasserted themselves both in practice and in ideology. In practice, productive efficiency and the chance to

hide from tribute collectors enticed people back upward into the non-nucleated pastoral hamlets of the heights and downward into relatively hidden farming settlements in river canyons (Málaga 1974). Nor, in imagination, did the establishment of a Christian sacred geography centered on parish churches empty the landscape of non-Christian meaning. The Huarochirí storytellers c. 1600 saw all around them their parents' ruined "old settlements" (*pueblos viejos*, a common term in papers of the period) and their ancestors' stone "houses of the dead." The pre-resettlement scheme of territoriality, a mental map of social groups attached to place-deities and localized ancestors, still formed a complete and intelligible shadow-geography projected onto the landscape that colonial organizations had already reshaped *de facto*. Immense *huaca*-studded spaces of canyons and high tundra, fields and trails, embodied an Andean world view at least as cogently as the small, dense space inside the new churches figured Christianity. Since outdoor space was also the space of work and livelihood, the very cycles of herding and farming continuously retaught what Sunday sermons sought to erase.

The commonest term for the anciently defined settlement, *llacta*, is not the simple equivalent of 'town' or 'village', which denote a portion of territory or the legal corporation that governs it. A *llacta* in its old sense might be defined as a triple entity: the union of a localized *huaca* (often an ancestor-deity), with its territory and with the group of people whom the *huaca* favored. The word *llacta* could thus be used to mean the deity that was master of a settlement. In chapter 24 (sec. 325), where the original text says that the "*llactas*" divided up the llama herds among themselves, a marginal note clarifies that this means the "idols," that is, the *huacas* that defined the *llactas*, and our translation uses the latter sense.

The word *llactayuc* (glossed 'aborigine', 'native', or 'founder') therefore means something more complex than 'original resident'. It implies both being possessor of a local *huaca*'s sanctum and being possessed by it. When the heroes of the myths conquered lands and peoples, they also acquired local ritual obligations and even, it seems, grafted themselves into the genealogical categories reckoned from the *huaca*: "As we said in another chapter, this land was once all full of Yunca. As soon as Tutay Quiri's children had expelled those Yunca, they began to distribute among themselves, according to their own *ayllus*, the fields, the houses, and even the *ayllu* designations" (chap. 24, sec. 316).

The chain of human movements and transformations by which the Checa people explained their social organization emphasizes at every stage a pattern of *huacas* among whose territories human groups move and fight. *Huacas* might travel on the way to establishing their dwellings but once victorious they had—they *were*—their locales, and it was the deity-locale that gave wealth and identity to human groups. The Checa explained all changes, both prehispanic and recent, with reference to the geography and the relative fortunes of *huacas*. To the tellers, the explanation of society and its genesis was written out in the landscape—even where Spaniards had wrecked every visible monument or substituted crosses for *huacas*.

Even now *llacta* is essentially the name of a relationship, not of a type of settlement. Like *ayllu*, the term implies no particular scale. In modern Quechua one calls any unit from one's hamlet to one's country "my *llacta*." Since the word gives no suggestion of size, either demographic or spatial, the manuscript usually leaves us guessing as to whether a given *llacta* is a hamlet, village, town, city, region, or country. The answer will come, if at all, from archaeological work as yet undone. Most of the actions in the myths seem from context to concern agricultural villages, and in most cases we have glossed *llacta* as 'village'. But 'town', 'city', 'region', and 'country' are hardly out of the question. When one visits the immense ruined city of Cajamarquilla, within the space of the manuscript but predating it, one wonders if the mythic scene could not have been far more urban than generally imagined.

The original text

The Huarochirí manuscript is ff. 64r–114r of manuscript number 3169 of the Biblioteca Nacional, Madrid. The original lacks title, date, and author. It is the fourth item among six manuscripts about Andean religion, from Francisco de Avila's own collection, all bound together. Among these writings are whole texts and abstracts from some of the most important sources on the subject, such as the *Relación de las fábulas y ritos de los Incas* ([1575?] 1959) of Cristóbal de Molina "cuzqueño" and the original of Joan de Santa Cruz Pachacuti Yamqui Salcamaygua's partly Quechua *Relación de antigüedades deste reyno del Perú* ([1613] 1968) as well as works by Juan Polo de Ondegardo and Garcilaso Inca de la Vega. It also contains the manuscript of Francisco de Avila's *Tratado*, a translation, or more accurately a paraphrase with digressive commen-

tary, of the same material contained in chapters 1–7 of the Huarochirí manuscript.

The Huarochirí manuscript is written in an ordinary competent scribal handwriting. The chapter divisions and titles used here are from the original. But the original does not have a consistent system of paragraph divisions or sentence divisions: some sentence boundaries are ambiguous. Various pen strokes resembling parentheses, commas, and other small symbols occur in the text, but they do not seem to add up to a consistent system of punctuation. (Scribal papers of the period normally lack consistent punctuation.) The text is in a variety of Quechua with the exception of the Spanish chapter headings of chapters 1–6, some borrowed Spanish words, and some marginal queries and annotations, probably by Father Avila. Irregular pagination and handwriting size indicate that the manuscript may have been compiled in noncontinuous bursts of effort. The text comes "from the hand and pen of Thomás," according to a marginal note over half-way through the text (chap. 23, sec. 291), but we do not know anything about "Thomás" save that he seems (from his Quechua-influenced errors in Spanish) not to have been a native—or a particularly accomplished—Spanish speaker. Whether he was only an amanuensis or was also the compiler of the testimonies is unknown. Thomás' practiced handwriting suggests he may have been an *escribano de naturales* (bilingual scribe), village council scribe, or other native functionary of the colonial regime.

The date of the Huarochirí manuscript is debatable. Avila's *Tratado* partially paraphrases the manuscript, or a draft of it, and bears the date 1608, so the manuscript seems *prima facie* to predate the end of 1608. But by how much? In chapter 9 (sec. 133) a narrator tells us it is *cay pisi huatallarac*, which at first glance seems to mean 'scarcely a year', since Father Avila came onto the San Damián scene. Were that reading unambiguous, we could agree that the date must be 1598 because, as Duviols ascertained, Avila arrived in Huarochirí in 1597 (Arguedas and Duviols 1966: 235). But *cay pisi huatallarac* could also mean 'just a few years', admitting a later date. And as Antonio Acosta's important researches (1987a, 1987b), summarized in the next section, suggest, there are strong reasons to consider dates considerably later than 1598.

The possible genesis of the text in the local conjuncture

The common attribution of the manuscript to Father Francisco de Avila is erroneous, but he cer-

tainly was a key figure in the local conjuncture that forced the manuscript into being. The following paragraphs summarize recent research by the Spanish historian Antonio Acosta, whose archival inquiry (1987b: 551–616) brings the local crisis into clearer focus and suggests a more plausible genesis for the text than the self-serving version available from Avila's own testimony.

The pioneer of seventeenth-century anti-*huaca* persecution was born in Cuzco probably in 1573, the abandoned, perhaps illegitimate baby of an unknown couple. The Spanish couple who found him at their doorstep gave him the Spanish name Francisco de Avila Cabrera. Avila later, but dubiously, claimed he knew his ancestry to be noble; others claimed he was half-Indian, and to his misfortune this became the common opinion. Acosta (1987b: 557–558) finds reason to question it. If Avila thought himself mestizo, it would have been against his interest to say so given the racial impediment to ordination during his youth, so his silence on the point cannot be decisive. One witness in 1610 called him mestizo, without proof, and a 1641 witness thought he looked Indian (Acosta 1987b: 556–557, note; Spalding 1984: 253–254). But these accusations of mixed birth came after Avila had risen to prominence and could well have been falsehoods intended to sabotage his career. Such doubts leave room to question the common supposition that his vengeful attitude to Indian religion grew from the pain of mixed (therefore impure and stigmatized) birth or from resultant abandonment.

Avila showed talent in a Cuzco Jesuit school and went to Lima to study at San Marcos University in 1592. In 1596 he was ordained and in 1597 posted as curate to San Damián de Checa, one of the *reducción* parishes near Huarochirí. It was a plum appointment. Avila's Jesuit connections probably had much to do with his career there, for the Jesuits over twenty years earlier had pioneered what they recognized as an unusually rich mission field—one where Andean religion had already shown strong resistance to some forty years of intermittent Catholic intervention. One passage (chap. 20, secs. 244–247) sketches the fluctuating, but never extinguished, fortunes of the *huaca* priesthood through three generations of colonial leadership.

Even within normal limits of law, a curate like Avila had access to ample native labor. But, in addition, by the date of Avila's arrival it had become usual though illegal for priests serving Indian parishes to parlay their ecclesiastical holiday levies and salaries, combined with legal leverage over native nobles, into business enterprises large enough to rival the incomes of rural Peru's opulent semi-

feudal civil elite (Lavallé 1982). In time, it seems, this sort of practice led Avila into controversy. When he was a new curate, in 1598, an inspection praised his pastoral work. But a sign of conflict appeared in a 1600 "secret inspection and hearing" that turned up accusations of commercial abuses. Although he was officially cleared, the inspection reveals that like many rural clerics he had begun to make local enemies.

Four later inspections left Avila's record superficially restored. In 1607 Avila gathered testimonies on his "life and morals" to buttress his continuing appeal for a higher post. At the last minute, however, he met a fateful opposition: a faction of his native parishioners mounted an ecclesiastical lawsuit against him. Both colonial chieftains and commoners accused him, and their accusations were more numerous than in ordinary cases of this sort (frequent, to be sure, in the period). They accused him of absences from his parish (perhaps, Acosta suggests, he went to Lima in connection with his studies toward the doctorate; 1987b: 574), of charging excessive fees, and of exacting illegal labor levies. Like many other curates, he was said to collect huge amounts of native crops and sell them for private profit. Maybe natives tolerated this because priests of the Andean *huacas*, too, had enjoyed huge gifts of produce (Acosta 1987b: 576). But Avila may have gone too far in helping himself to his parishioners' labor, which he used to support his partly illegal business enterprises in gunpowder, charcoal, and textile manufacture and to build himself a house in Lima using beams he made his parishioners remove from the roofs of their pre-resettlement village. In a period of declining native population, curates' rising and increasingly arrogant expectations of cheap or unpaid labor acutely angered some natives. It was apparently Avila's project to open a new textile factory at native expense that finally provoked chiefs of the "thousand" of Chau-carima to litigate against him.

The Indians went beyond economic grievances to introduce a doubt about Avila's religious and moral regularity, alleging sexual abuses of various native women (some married) and the fathering of an illegitimate son. He even forced Indian women, "under physical threats, to suckle at their breasts the same puppies which . . . when grown, chased and killed the Indians' chickens" (Acosta 1987b: 574). He beat up villagers, including his sacristan, for not serving his desires zealously enough. Once at a christening he hurled the oil at his sacristan's chest. Accusers said he encouraged Indians to give their venerated ancestors silver (see chap. 21, sec. 262) and then himself collected some of it (Acosta 1987b: 572).

If true, this suggests that in the early days of his curacy Avila had no urgent scruples about a *modus vivendi* with "idolatrous" religion. Apparently co-existence entailed the curate's acquiring traditional privileges of *huaca* priests—access to women, labor donations, crop gifts—and, in return, tolerating (or even profiting from) worship of *huacas* on Catholic holidays (see chap. 7; chap. 9, sec. 125).

Avila spent some time in a church prison while charges were pending. But his emissaries pressed the natives to recant their accusations, and some did. The record of the trial contains a neat sheaf of the recantations, witness by witness, each with a cover sheet bearing Avila's elegant handwriting. One of Avila's allies in collecting these was the same Cristóbal Choque Casa whose visionary combats chapters 20 and 21 glorify, at that time an obscure son of native nobles. He prepared one of the recantations in Quechua (Taylor 1985: 180). In Acosta's judgment (1987b: 596), "It is believable that the narrative [i.e., the Huarochirí manuscript] could have been compiled at Avila's order in 1608, when his lawsuit with his Indians was in full swing, maybe on his emergence from prison and as a part of his reaction against the Indians who had accused him." Avila probably secured the testimony through one or more native cat's-paws who either interviewed anti-*huaca* natives or else secured the testimony of *huaca* believers by lulling them into unawareness of their testimonies' future utility. Cristóbal Choque Casa probably played a key role. It is hard to guess what parts fear, self-interest, and sincere conversion (Cristóbal's or others') played in the extraction of testimonies. Certainly intimidation played a part; for example, Avila made a point of interrogating Indians made vulnerable by frightening illnesses (Acosta 1987b: 600–601, 603). Although in later years Avila never mentioned the manuscript's existence, he probably did use it in hunting down *huacas*.

When the court responsible for the Indians' suit took depositions in San Damián, a decision only minimally damaging to Avila appeared likely. But instead of letting procedure take its course, he seized the offensive by asking the Ecclesiastical Chapter of Lima to authorize an inquiry into "idolatries" under canon law. Avila, according to his own much later testimony written in 1645 (1918), then led the ecclesiastical judges to the *huacas* Llacsay Huancupa (perhaps equivalent to Llocllay Huancupa, chaps. 20 and 21), Qqelccas Ccassu (probably *quillcas caxo* or 'Engraved Rod', chap. 24, sec. 320), and Maca Uisa (chaps. 18, 19, 23). In later testimonies Avila claimed his campaign had arisen only from disinterested zeal, but Acosta's research makes it

believable that the campaign was undertaken in revenge against the natives who had accused him of venality and immorality.

According to the 1645 testimony (Arguedas and Duviols 1966: 220), it was Cristóbal Choque Casa's revelation that the feast of the Assumption in Huarochirí for 1608 would be used to cover a rite of Paria Caca that provoked Avila to undertake massive anti-*huaca* campaigns. It is likely, of course, that in reality nothing new was being revealed. The only new element was Avila's urgent need for favorable publicity. Avila intensified his sleuthing in 1608 and procured public confessions of "idolatry" in a parish meeting that stirred and mobilized his pro-Christian allies. He asked the Jesuits for assistance in confessing a deluge of penitents and was sent two helpers. They pioneered the routine of breaking images, burning mummies, extracting public confessions, and punishing believers that was to become the periodic scourge of Lima archdiocese Indians until at least the 1660s. Avila was able to collect a great deal of stolen religious gear and forced testimony. By September 1609 he was amply ready to dictate his answer to the native accusations, laying the groundwork for a false autobiography that painted the accusations as a reaction to his anti-*huaca* zeal.

It was also during this crisis that Father Avila prepared the *Tratado*, that unfinished pamphlet retelling and commenting on the same myths that make up chapters 1 through 7 of the Huarochirí manuscript. The relation between the redaction of the Huarochirí manuscript and Avila's work on the 1608 *Tratado* has been debated between Hartmann (1981) and Taylor (1982, 1987b: 17–18). The former thinks it probable that Avila based his treatise on the manuscript, while the latter thinks that the two are separate workings of a prior source probably consisting of interview notes. In either case, it is likely that Avila intended the *Tratado* as a readable exposé designed to win Spanish support for his career. At the time of the *Tratado*'s composition Avila needed public support because the archbishop of Lima, Toribio Mogrovejo, had set policy against the aggressive persecutions that Avila favored.

But, luckily for him, an opponent of gradualist policy toward "backsliding" Indians and a bitter foe of *huaca* religion, Bartolomé Lobo Guerrero, succeeded to the Archbishopric of Lima in October 1609. According to Taylor (1987b: 18), Avila left continued compilation of anti-*huaca* intelligence to an Indian associate. Although he did read and annotate part of the product, the Huarochirí manuscript, he never fully edited it.

A bare ten days after Lobo Guerrero's accession,

Avila seized the moment to make his case behind the archbishop's closed Lima doors. Shortly afterward he staged a public propaganda spectacular. Avila had carted a load of *huacas* and mummies "800 years old" into Lima, perhaps the ones he tracked down thanks to the testimonies recorded in the manuscript. Amid immense pomp and publicity he directed a giant auto-da-fé in Lima's great cathedral square on December 20, 1609. Thousands of natives were forced to attend. A spectacle of music, Quechua sermons, and whipping of believers culminated in public sentencing. Among the victims was Hernando Paucar, the same ex-priest of Chaupi Namca and early denouncer of *huacas* whose confessions had opportunely helped Avila. Paucar was tied to a post, lashed two hundred strokes, and condemned to confinement among Jesuits in faraway Chile. Avila then burned the *huacas* and the ancestral mummies, to the inconsolable grief of those who felt themselves orphaned.

Four days later an ecclesiastical judge absolved Avila of all the accusations pending. Moreover, he was granted the title of "*visitador* [traveling judge] of idolatries."

These events marked the opening salvo of the "extirpation of idolatry" campaigns, in which Avila and his Jesuit allies developed standardized methods to destroy the partly clandestine forms of Andean religion that had grown out of the long confrontation with Christianity (Duviols 1972). Within a year of becoming *visitador*, he executed repressive campaigns in the main parishes that the Huarochirí manuscript mentions and collected, as he claimed, some 5,000 "idols." In 1611 he went with a Jesuit crew to climb the heights via Yampilla just outside Huarochirí (chap. 31, sec. 409). The climbers trekked for several days up what may have been the ancient pilgrimage route. After the ascent they followed a stairway hewn into the rock (Bonavia et al. 1984), up to what Avila believed to be the shrine of Paria Caca himself. They demolished everything they could. Then the extirpators "put in its place a cross and in the afternoon they returned to San Lorenzo de Quinti, where [local people] received him with illuminations, and the Indians said in their own language, 'Paria Caca has died'" (Duviols 1966: 224).

Avila continued to campaign widely and became an influential figure in the Jesuit-centered anti-indigenous movement that intermittently lashed the archbishopric for most of the seventeenth century. While legally separate from the Inquisition, and in some respects different from it, the "extirpations" were to inflict on Andean society some of the same sufferings, and the same clandestinity,

that the Inquisition visited on Iberian heterodoxy. Avila's track of destruction crossed the wanderings of the great native chronicler Felipe Guaman Poma de Ayala ([1615] 1980: 3: 1017, 1022–1023), who met some of his victims and, notwithstanding his own dislike of *huaca* religion, cursed Avila for his greed and mercilessness: "Oh what a fine doctor, where is your soul? What serpent is eating you?"

But if many of "the people called Indians" had reason to hate Avila, many of the Spanish, and not just his Jesuit allies, had cause to rejoice at his success. One reason was that *huaca* hunting appealed to clerics' and laymen's greed for treasure. Spanish law allowed confiscation of pagan deities' wealth, and the persecutory movement that Avila promoted opened a rich vein. Guaman Poma was among those who suspected that Avila's motives included the theft of precious objects belonging to *huaca* cults ([1615] 1980: 3: 1022–1023). The anti-Andean campaigns also offered career opportunities to Peru's numerous churchmen at a time when the church was hugely overstuffed relative to its parish infrastructure.

Avila built a long and prosperous career on these campaigns and was to win renown for his anti-*huaca* scholarship as well as for his militancy in missionizing. In 1611, at Archbishop Lobo Guerrero's request, he wrote a report on "idolatrous" domestic rituals and local deities. After a series of attacks on deities mentioned in the Huarochirí manuscript and in other places, in 1615 he wrote at the request of the new viceroy, Príncipe de Esquilache, a project on the means to achieve "real conversion." The next year he conducted a gigantic tour of repression affecting some 35,000 persons. He wrote extensively on ways to influence and intimidate *huaca* worshipers, emphasizing both intimate persuasion and institutional ways to confine those sorts of Indians (notably the sons of native nobles) thought prone to lead or protect clandestine worship.

In 1618 he won a mid-ranking post in the Archbishopric of La Plata (seated in Chuquisaca, now Sucre, Bolivia) and held the job for fourteen years. Why the church hierarchs decided to employ him in a place so far from his political base is unknown; nor is much known about his career there. In 1632 he returned to the Cathedral of Lima to serve the newly appointed archbishop, Hernando Arias de Ugarte, an old acquaintance, as a canon of the Lima Cathedral. He came to be known as a durable eminence of the church, popular among Spaniards for his charitable donations. Almost at the end of his life, he petitioned to enter the Jesuit order, but his alleged mestizo background was used to thwart him. When in 1641 Archbishop Pedro Villagómez

saw fit to remobilize the old persecutor as instructor for what was to become the second great wave of "extirpation," Avila seized the occasion to build his own monument as the "discoverer" of crypto-Andean heterodoxy. The self-portrait he painted in the 1645 preface to his *Tratado de los Evangelios* (Treatise on the Gospels) enduringly and, as Acosta shows, misleadingly influenced his historic image. The treatise reached the press in 1648, the year after his death. Its two volumes of Quechua and Spanish sermons, a little-known monument of literary Quechua's Baroque florescence, memorialize Avila's vision of a Counter-Reformation culture in Quechua.

Some twenty-three years after the making of the manuscript, Don Cristóbal still figured in a Concha lawsuit as a minor native official (Taylor 1983: 266, note; the date of Choque Casa's signature is 1631, not c. 1660 as Taylor holds). Certain of the *curacas* mentioned in the manuscript appear in tribute records and lawsuits both before and after the manuscript. In general the careers of Cristóbal Choque Casa and the other Indian makers of the Huarochirí manuscript remain obscure.

Among provincial religious sources the Huarochirí text has no peer, but it has many companions. Detailed testimonies about peasant and provincial belief appear, for example, in the "extirpation of idolatry" trials of which the Huarochirí crisis (chaps. 20–21) was a forerunner (Acosta 1987a; Duviols 1972, 1986; Millones 1967; Silverblatt 1987). Some of the Catholic priests who organized "extirpation" themselves wrote monographs on the Andean provincial religions and how to persecute them (Albornoz [1583?] 1984; Arriaga [1621] 1968; Avila [1608] 1966). Many missionary treatises and reports from the field reveal local cults and the memories of older practice in vivid detail (for example, Calancha [1638] 1974–1982; Hernández Príncipe [1613] 1919, [1622] 1923). After the waning of the "extirpation" campaigns, the record becomes thinner but still workable through, for example, trials of shamans implicated in political assassinations via magic (Dammert Bellido 1974, 1984; Millones 1984; Salomon 1983).

There may be room for doubt about some extirpators' personal sincerity, but little doubt that they played on widely believed ideological propositions. Local social conflicts like those of Huarochirí c. 1598 conspired with endemic conflicts arising from challenges to the Spanish state's commercial and religious hegemony to infuse in Jesuits and other anti-Andean militants a grim seriousness. Fear of "heresy" (meaning Protestantism and the

northern European powers beginning to rival Spain) and enduring hatred against Iberia's Muslim and Jewish cultures, long since driven into clandestinity, helped clerics persuade the state that the fight against Andean religion contributed to a decisive world-historical struggle. The papers born of this effort offer ethnographic evidence, but because of their heavy ideological freight must be read with caution.

Given these facts, one might expect to find the particulars of Andean religion, and eventually the very fact of Andean worship, distorted in the direction of familiar European fantasies of anti-Christianity: satanism, the black mass, and so forth. Such distortions did happen, especially at later dates and more urban locations than those of the Huarochirí manuscript (Silverblatt 1987: 159–196). Likewise, one might expect that missionaries would picture Peruvian *huacas* in the image of more familiar "gentile" deities or "idols"—for example, the *dei* of Greco-Roman antiquity. This also did occur (MacCormack 1985).

But to a surprising degree the testimonies of the victims retain freshness and unfamiliarity that give *prima facie* evidence of an origin other than Iberian demonology or the classical legacy as enshrined in seminary curricula. Perhaps because many of them were provincials lacking the know-how to package and process their culture in terms familiar to Spanish speakers, the myth-tellers in the Huarochirí manuscript created an image still largely framed by conceptual categories proper to local thought. The Huarochirí stories retain for us a certain irreducible strangeness, resistant to translation because, unlike the preprocessed Inca lore available in chronicles, they were seized by Spain but not made for it.

Previous editions of the Huarochirí manuscript

The following are the extant complete editions of the text. No attempt is made to cover excerpts, re-translations, or popularizations. (For critical discussion, see Hartmann 1975, 1981; Taylor 1982.)

- Adelaar, Willem F. H. 1988. *Het boek van Huarochirí: Mythen en riten van het oude Peru zoals opgetekend in de zestiende eeuw voor Francisco de Avila, bestrijder van afgoderij*. Amsterdam: Meulenhoff. Dutch translation (no Quechua) with introduction and glossary.
- Arguedas, José María (trans.) and Pierre Duviols (ed.). 1966. *Dioses y hombres de Huarochirí: Narración quechua recogida por Francisco de Avila [¿1598?]*.

- Lima: Instituto Francés de Estudios Andinos/Instituto de Estudios Peruanos. [Republished 1975] México: Siglo XXI.
- First full and published Spanish translation. Includes Quechua. Although less accurate than Taylor's translation of 1987, Arguedas' translation is esteemed for literary merit. Duviols' biobibliographical essay on Avila, questioned by Acosta, remains important for its pioneering historic inquiry and for its primary source appendices. These include Avila's *Tratado* and other papers relevant to Avila, such as extracts of important Huarochirí reports by mostly Jesuit observers. Mexican republication is incomplete.
- Galante, Hipólito (ed. and trans.). 1942. *Francisco de Avila de priscorum Huaruchiriensium origine et institutis* . . . Madrid: Instituto Gonzalo Fernández de Oviedo.
- Contains the thirty-one chapters but not the appendices. Introduction in Latin, facsimile, transcription, critical notes, glossary of hispanisms, Latin translation, Spanish retranslation by Ricardo Espinosa M. Mejía Xesspe, Toribio [unpublished translation]
- Toribio Mejía Xesspe, a bilingual scholar who worked closely with Julio C. Tello in the pioneering days of Peruvian prehistoric archaeology, left in his posthumous estate an as yet unpublished version of the thirty-one chapters of the Huarochirí manuscript. Prepared in 1941–1943, it includes a rephonologization, a Spanish translation attempting morpheme-by-morpheme correspondence, an incomplete "literal translation," and an incomplete "free translation" with pictorial sketches (Szemiński 1989).
- Szemiński, Jan (ed. and trans.). 1985. *Bogowie i ludzie z Huarochirí*. Cracow/Warsaw: Wydawnictwo Literackie.
- Polish translation with brief introduction and general glossary. The title means 'Gods and Men from Huarochirí'.
- Taylor, Gerald (ed. and trans.). 1980. *Rites et traditions de Huarochirí: Manuscrit quechua du début du 17^e siècle*. Série Ethnolinguistique Amérindienne. Paris: Editions l'Harmattan.
- Bilingual edition containing introduction, transcription with variorum notes, and French translation with interpretative notes providing original solutions to some dialectological and lexical problems. Interpretative glossary, bibliography, and supplementary notes follow.
- Taylor, Gerald (ed. and trans.), with Antonio Acosta. 1987. *Ritos y tradiciones de Huarochirí del siglo XVII*. Historia Andina, no. 12. Lima: Instituto de Estudios Peruanos/Instituto Francés de Estudios Andinos.
- Bilingual edition containing interpretative introduction, transcription, "phonological reconstitution," Spanish translation, bibliography, several indices (to Quechua words in the translation, hispanisms in original, names of places and groups, names of huacas and heroes, names of rites, and names of historical personages). Copious critical, variorum, and interpretative notes closely address dialectological, geographical, and lexical problems. The preferred study edition.
- Trimborn, Hermann (ed. and trans.). 1939. *Francisco de Avila: Dämonen und Zauber im Inkareich*. Quellen und Forschungen zur Geschichte der Geographie und Völkerkunde, vol. 4. Leipzig: K. F. Koehler Verlag. [Republished with additional introduction and notes as] Hermann Trimborn and Antje Kelm (eds. and trans.). 1967. *Francisco de Avila. Quellenwerke zur Alten Geschichte Amerikas Aufgezeichnet in den Sprachen der Eingeborenen*, vol. 8. Berlin: Ibero-Amerikanisches Institut/Mann Verlag.
- The earlier (1939) edition was the first publication of the original Quechua. Research for the 1939 edition was interrupted by the Spanish civil war, later bombing destroyed most copies. Contains preface, bibliography, introduction, transcription, German translation with notes, glossary, exegesis (1967), index of proper nouns. Hartmann (1975, 1981) judges that superior accuracy justifies the republication.
- Urioste, George (ed. and trans.). 1983. *Hijos de Pariya Qaqa: La tradición oral de Waru Chiri (mitología, ritual, y costumbres)*. 2 vols. Foreign and Comparative Studies, Latin American Series, no. 6. Syracuse: Maxwell School of Citizenship and Public Affairs, Syracuse University.
- Bilingual Quechua-Spanish edition: introduction, transcription with variorum notes and marginal material, translation with variorum and interpretative notes, indices (to proper nouns, Quechua words in the translation), bibliography.
- An unreliable English version of Avila's *Tratado* by Clements R. Markham (Avila [1608] 1875) was the first modern edition of the Huarochirí mythology.

The character of the present translation

This book is a fresh working not based on any previous translation (including Urioste's 1983 Quechua-Spanish edition). Our study started from a newly made transcription from microfilm (reproduced here), collaboratively rendered into English by the co-authors. It is meant as a reader's edition rather than a study text. Scholars in need of a study edition should turn to Gerald Taylor's Quechua-Spanish version (1987b), which offers abundant apparatus as well as fuller contextual references. The 1966 Arguedas and Duviols edition also contains indispensable primary sources and bibliographic detail. The present version refers to other translations by way of mentioning some significant discrepancies, difficulties, or contextual findings but does not provide full coverage of alternative renderings.

We hope to address nonspecialists and have striven not only for accuracy but also for immediacy. We have intentionally left enough unresolved

strangeness on the surface to keep a reader aware that this text is untranslatable in all the usual senses, and perhaps a little more untranslatable than most.

Aside from the hazards intrinsic to all translations, Huarochirí readers face some specific ones.

Language substrates and non-Quechua languages

Oddly enough, it is not known exactly what relationship obtained between the Quechua of the manuscript and the language in which Huarochirí religious life was conducted. Many dialectological and linguistic questions about the manuscript remain pending.

Even the origin of the Quechua dialect used in the text itself is less than obvious. Its general affiliation is clear: it is one of the many and far-flung kinds of Quechua grouped as Quechua A or Quechua II. At least one member of this group spread widely through Andean America long before the Incas, and the Incas promoted a Quechua II dialect (probably not identical to Cuzco Quechua) as their administrative tongue. Perhaps working from this precedent, the Spanish invaders styled a widespread Quechua II (or perhaps several overlapping Quechua II dialects) the "general language" (Cerrón-Palmino 1985: 552–553; Taylor 1985: 158–160). In ecclesiastical councils especially, Spaniards promoted it for colonial use through efforts such as standardizing orthography and providing norms for translation and nontranslation of religious concepts.

"General" Quechua functioned c. 1600 as a *lingua franca* shared by many linguistically diverse peoples including Spaniards, among them clergymen who used it to simplify missionary work in a dialect landscape already reverting to pre-Inca diversity. Colonial native chiefs and others who traded on relationships with the Spanish also relied on it. On the whole, this church-influenced "general" Quechua is the language of the manuscript. The person who actually did the writing appears to have learned the art of Quechua writing for ecclesiastical purposes. But precisely because it was a partly artificial *lingua franca*—many speakers' second or third language and few if any speakers' first language—specific examples of "general" Quechua would normally be affected by underlying patterns of local speech. Linguists disagree on whether the text's peculiarities indicate an attempt to render speech similar to Cuzco Quechua (Urioste 1973: 4) or similar to the Quechua of modern Ayacucho (Hartmann 1981: 189). Mannheim (1991: 195) notes phonological reasons for questioning whether the

manuscript records any member of the group of south highland dialects to which both Cuzco and Ayacucho belong.

The question actually goes far beyond Quechua dialectology. There is room for doubt about whether any Quechua was the language of religious practice or of the original testimony. In Huarochirí the particular version of Quechua that functioned as a "general language" for such churchmen as Father Avila still, at the probable date of the manuscript, thinly overlay at least one non-Quechua Andean tongue. Twenty-two years before the manuscript, Diego Dávila Brizeño ([1586] 1965: 155) noted that the common folk did not all know Quechua. A 1577 Jesuit report tells us that missionaries needed to have Quechua sermons repeated in a local language "because the women there don't know the general language" (Arguedas and Duviols 1966: 245). Almost two centuries after the Huarochirí manuscript, another visitor observed that local use of the "general language" sounded peculiar and "mixed" (Taylor 1983: 270, 273). It is therefore highly likely that the religious life of the generation Avila persecuted had been conducted at least partly in a language other than Quechua.

So the text probably stands at some distance from habitual and traditional usages in religious speech. We do not have any specific proof that the texts were translated from a local tongue into Quechua, but the possibility cannot be discarded. At a minimum it seems likely that processing of local discourse by a person fluent in "general" Quechua played a role in creating the text.

The following are languages that appear to influence and in some cases to underlie the Quechua text.

Quechua other than the "general" dialect

"Thomás" the scribe (or persons dictating to him) probably knew at least one dialect of Quechua other than the one the church promoted as "general." It may have been influenced by an Aymara-like tongue (see below). It is also a possibility, though a difficult one to demonstrate, that local Quechua was influenced by a coastal speech proper to the Yunca people whom Huarochirí folk considered aboriginal; their language, too, may have been a Quechua different from the "general." Finally, some usages in the Quechua of "Thomás" (e.g., *chacuas* 'old lady'; chap. 21, sec. 261) are attested in Quechuas of the Quechua I or Quechua B group native to the central Peruvian highlands. Quechua I languages differ widely from the Quechua of the text, but other colonial examples of mutual influ-

ence are known. In some cases the writer has hesitated between words of the Quechua II or A group, as, for example, in the repeated crossings-out of *punchao* 'sun' and substitutions of another word for 'sun': *ynti*. The discrepancy may have to do with Inca versus non-Inca religious vocabulary.

Language(s) of the Jaqi (Aymara) family

The terms "Jaqi" and "Aru" denote a group of languages today represented most notably by Aymara, an important language spoken from the Lake Titicaca basin southward into Bolivia. Jaqi tongues share some lexicon with Quechua but are entirely separate languages. Although Quechuas have displaced Jaqi tongues from a large part of their formerly enormous range, certain Jaqi languages (Kawki and Jaqaru) were and to some degree still are spoken in two areas close to the Huarochirí terrain (Briggs 1985: 546). Both areas are in Yauyos Province, from which Huarochirí people were thought to have immigrated (chap. 23, sec. 297; chap. 24, secs. 305–309; chap. 31, secs. 391, 408, 443). Taylor has argued that some of the testimony may have been given in a Jaqi tongue, because Aymarisms are common in the ritual terminology (e.g., the names of the two greatest celebrations described, *Auquisna* and *Chaycasna*). He also notes that certain "Aymara-type" phonetic alternations (*ñamca/ñamoc*, etc.; Taylor 1985: 162) commonly occur in words connected with Huarochirí religion, suggesting Jaqi interference. These Jaqi-like phenomena offer the strongest clue for identifying the ethnic language of the myth-tellers. It is probable that at a minimum the text has been modified from a more Jaqi-influenced speech toward "general" Quechua.

Non-Quechua, non-Jaqi native lexicon?

A few common nouns and many names of persons and places do not seem to derive by any evident route from Quechua, Jaqi, or Spanish. There may be an additional influence from an unknown ethnic tongue, perhaps predating the supraethnic Jaqi and Quechua diffusions. Huallallo Caruíncho's name, the *hugi* monster he created, and the untranslated common nouns *calcallo* (chap. 31, secs. 413, 415) and *llaullaya* (chap. 21, sec. 271) may be examples. If so, the persistence of such words in both Quechua and Jaqi cultic vocabulary may eventually yield a clue to the antiquity of Huarochirí religious categories.

Spanish

Father Avila reported that most Huarochirí people knew at least some Spanish (Arguedas and Duviols 1966: 255). However, as Urioste notes, not all of the

many Spanish words that found their way into the manuscript are there for obvious reasons. Some words do lack Quechua equivalents and are therefore hardly surprising: *cauallo* 'horse', *yglecia* 'church'. Others overlap Quechua terms but "cover a different semantic space" (Urioste 1982: 106). For example, *animalcona* ('animals'; Spanish with a Quechua plural marker) combines categories of wild and domestic beasts that, in Quechua, are named with separate words. But a few do have close Quechua counterparts and are not used out of any obvious necessity: *doze año* 'twelve years' (in Quechua a plural numeral obviates the need for a pluralizing suffix on the head of the phrase, hence the singular form *año*), *gato montés* 'wildcat', and so forth, which have close and obvious Quechua equivalents. It is not known why the writer chose them.

Although the text was probably made as a tool for excising Andean belief from the religion of converts, it sometimes uses Christendom's lexicon to name Andean religious categories. All the seven occurrences of *saçerdote* and *saçerdotisa* (Spanish for 'priest'/'priestess'; chap. 13, secs. 178, 183; chap. 18, sec. 224; chap. 20, sec. 252; chap. 21, sec. 273; supp. I, secs. 462, 466) refer to priests of *huacas*. *Saçerdotisa* suggests an analogy from the Renaissance lore of Greco-Roman antiquity, but some usages are more markedly Christian: the preface (sec. 2) categorizes the regional belief system as a *fe* 'faith', implying that as a whole it is an entity comparable in scale and kind with the True Faith. Given the tellers' and writers' free use of specialized Andean religious terminology, they probably did not include these words for the convenience of Spanish readers. It is more likely that there already existed some habitual code of correspondences perhaps arising unconsciously from the habit of expressing Andean ideas in a fashion responsive to Christian hegemony.

Sometimes the influence of Spanish norms operates in a hidden fashion by affecting choice between Quechua words. This is especially notable in sexual lexicon, where the pro-Christian speaker substitutes shame-oriented and therefore Spanish-like phrases for plainspoken Quechua ones. For example, in chapter 10 (sec. 151), the word *ollonchicta* 'our cocks' has been crossed out in favor of *pincayninchicta* 'our private parts' or, more literally, 'our shame'.

The problem of redaction

An editing process has given the manuscript a veneer of organizational unity. But no one has yet subjected it to text criticism detailed enough to uncover the "seams" where testimonies have been

stitched together or to determine how many voices enter in. For the time being, this can only be recognized as an unknown requiring future study. It appears likely that the myth-tellers and retellers are multiple, probably from a minimum of three different places. Whether a separate translator beside the scribe and/or editor intervened is unknown. We neither know whether the interviewer used a written questionnaire (a common Spanish practice) nor whether the edited text as we find it was organized by a native researcher, by the scribe Thomás himself, or by someone employing native informants (Avila?).

It is highly likely that chapters 1–31 are rewritten and edited text, because they are fair copy (standardized at thirty-six lines per page) already augmented with contextual material, especially at beginnings and ends of chapters (Urioste 1973: 7–10). These chapters, however, appear to be an intermediate draft because editorial work continues in the form of interlinear and marginal comments and corrections (some seemingly in Avila's hand). Supplements I and II differ in grammar from the body of the manuscript, are written in a less polished handwriting, and come after a word meaning 'the end'. They may be surviving fragments of less-processed testimony. Or they may be a set of rough notes prepared by the editor/redactor on the basis of personal knowledge, apart from the compiled testimonies.

The problem of validation

One property of the text that may yield clues about the editing process if closely studied is the problem of validation. Quechua, like many American languages, requires the speaker to attach suffixes that clarify his or her relationship to the data conveyed. When conveying data learned from personal experience, the speaker uses the witness validator *-mi* (alternatively *-m*, *-n*), which implies that the content of the sentence or (sometimes) larger speech unit is something learned through direct sense experience. When passing on data learned secondhand—for example, an account heard from somebody else—the speaker will switch to the reportive (sometimes called "hearsay") validator *-si* (alternatively *-s*). We suspect that predominant reportive validation may reflect the intervention of a *re*-teller, perhaps a translator, but when speaking of legendary events, original informants might well have used it, too. When speculating without evidence, or when uncertain, the speaker employs the conjectural validator *-cha*.

There are two types of passage in the manuscript in which witness validation predominates. One is the contextual remarks and interpolated comments that appear to be supplied by someone other than the myth-telling informants, probably the editor/redactor. Sentences with *-mi* often introduce or end a chapter, stating with witness validation the relation of a *huaca* or ritual to a narrative or geographic context. Witness validation is normal in chapter titles. The preface has predominant *-mi*. Also, at least one contributor often uses *-mi* witness validation to report apparently contemporary local circumstances, as opposed to mythic or ancient events. For example, a mythic place name will be identified with a modern landmark using *-mi*. Accusations that local people are secretly carrying on some of the rites that the myths explain carry *-mi*: for example, *ynatacmi musiasca tucoy ynantin llactacunapipas rurancu* 'those who are privy to these customs do the same in all the villages' (chap. 9, sec. 133). The other passages in which *-mi* witness validation predominates are the two supplements, which appear to be rough notes. Perhaps their witness validation is related to their focus on contemporary ceremonies (and not ancient rites or myths of the past), which the writer or informant might have seen. Or perhaps, if they are transcriptions of unprocessed testimony, the validation is the original informant's own.

In the remainder of the text (the great majority of it), which consists of mythic narratives and descriptions of rites and rules of the past, reportive *-si* validation predominates. It is the usual validation of narrative passages: *cay chaupi ñamca sutiocsi huc runa anchi cochapi apo tamta ñamca sutiocpac churin carcan* 'the one called Chaupi Ñamca was the daughter of a man in Anchi Cocha, a lord named Tamta Ñamca' (chap. 10, sec. 142). Because it contains *-si*, this sentence could be rephrased 'Chaupi Ñamca was, they say, the daughter of . . .' Such locutions might be expected of any person telling a myth with a slight authorial distance. But *-si* could also come from a translator or reporter paraphrasing or repeating, without necessarily endorsing, an informant's words. A rendition using that assumption would be 'Chaupi Ñamca was, (s)he says, the daughter of . . .' These rephrasings are overtranslations insofar as the original does not contain the verb 'say' or imply anything one way or the other about who does the saying.

The exceptions to predominant *-si* reportive validation in narrative passages occur mostly in dialogue, where the characters speak what is putatively their own experience, and also in utterances

that are not dialogue but performative speech (i.e., speech that actually changes the world rather than telling something about it): *camca vinaymi causanque tucuy hinantin sallcacunamanta huañuptinca huanacuctapas viconactapas yma ayca cactapas camllam micunque chaymanta camta pillapas huañoichi sonque chayca paipas huañuncatacmi ñispas ñircan* 'You'll live a long life. You alone will eat any dead animal from the wild mountain slopes, both guanacos and vicuñas, of any kind and in any number. And if anybody should kill you, he'll die himself, too' (chap. 2, sec. 19).

There are passages and even whole chapters (e.g., chap. 9) in which it appears that the editor/redactor validates substantive content (as opposed to expository asides) with *-mi*, as if telling what he had seen with his own eyes. These passages tend to be descriptions of ritual, typically set in explicitly colonial context. A good example is the explanation of how Chaupi Ñamca's ritual dances were scheduled into a purportedly Catholic calendar (chap. 10, secs. 148–151). The authorial voice claims witness knowledge of incriminating facts, but coyly slips into reportive where naked dancing is concerned.

There are also passages in which significant mythic material is witness-validated. The crucial passage in chapter 9 (secs. 112–116) where Paria Caca lays down the fundamental rule of his cult is one. This validation may relate to the convictions expressed in the preface, which credits the narrative tradition with evidential worth comparable to that of Spanish writing. It is difficult, however, finally to decide whether such validation indicates belief in the factuality of the Paria Caca myth (on a witness's part or on the editor/redactor's part?) or only signals that some passages, the parts in the editor/redactor's own words, contain a true rendering of a story that may or may not finally be true.

Validation presents frustrating problems for translation, because nothing in English has rhetorical force similar to it. Added phrases like 'It's a fact that' (*-mi*), 'It's said that' (*-si*), or 'It could be that' (*-cha*) do convey validators' informational function, but at such expense to narrative quality as to falsify the text (by making it sound hesitant and colorless) more than they clarify it. We have availed ourselves of the regularities already noted in order to establish norms that minimize encumbrances on the text, while also alerting readers to each significant validation shift. (Some particulars of validation completely escape translation or are difficult to interpret, such as the many instances of a witness-validated discourse marker introducing a reportively validated sentence.) The redactor/editor's

stage-managing contributions routinely have witness validation, so the reader may assume its presence in sentences that are obviously editorial, even if they lack explicitly translated validation, unless an overtranslated phrase such as 'it's said that', 'they say', or 'reportedly' suggests otherwise. Such passages occur at the beginnings and ends of chapters. Mid-chapter editorial asides such as 'we told this story in the fifth chapter' (chap. 10, sec. 142) also routinely carry witness validation. In the chapter titles, too, readers should assume *-mi* witness validation. At mid-chapter validation shifts, notes signal how far the new validation extends. The two supplements are exceptions to these rules. In them the reader can assume witness validation throughout unless reportive validation is explicitly indicated.

Following such curtain-raising editorial formulas as 'the story goes like this' validation regularly shifts to reportive. 'In ancient times' and similar formulas also herald reportive passages. Generally, in the narrative passages of chapters 1–31, except in direct quotations, *-si* reportive validation may be assumed unless a phrase such as 'it's a fact that', 'in fact', or 'as we know' suggests otherwise. In direct quotations and performative utterances within the narratives, *-mi* can normally be assumed and is not specially marked. Readers interested in explicitly translated validation should look at Taylor's 1987b Spanish version, which translates validation more fully than we do (though still less than universally).

Translation of style

Validation is not the only respect in which the manuscript varies somewhat in tone and "feel" from passage to passage. Despite the likelihood that coerced elicitation, editing, and translation (or at least "correction" away from a local dialect of Quechua) put us at considerable distance from the myths' oral embodiment, and despite the probability that some of the testimony's oral qualities have been blurred as a result, nonetheless there do seem to be identifiable variations of oral-derived styles within the manuscript. We have tried to suggest them in the translation, giving the more bookish and editorial sentences a slightly different sound from utterances that probably replicate storytelling, ritual speech, and maybe even verse or song.

Framing sentences

An editorial voice intervenes particularly at the beginnings and ends of chapters as a stage manager of

testimonies: 'we have already told', 'now we shall tell', and so forth. In the translation we have sought to make this "framing" verbiage easily recognizable by its semiformal and faintly pompous diction. Perhaps the person who composed the framing sentences is the same one who occasionally obtrudes with politically opportune comments:

... no matter how people behave, neither the *alcalde* nor anybody else would ever try to stop them by asking, "Why do you do these things?"

On the contrary, they dance and drink right along with them until they get drunk. And as for the Catholic priest, they fool him, saying, "Padre, I'm back from cleaning the canal, so I'm going to dance, I'm going to drink."

As far as that goes, all the people do the same thing. True, some don't do it anymore because they have a good padre.

But others go on living like this in secret up to the present. (chap. 7, sec. 95)

One possible source of such language is Cristóbal Choque Casa, Avila's political ally, who glorifies his own struggle against the *huacas* in chapters 20 and 21. The same voice or pen may well be the source of the many passages that tell about non-Christian rites surviving clandestinely at the time of writing.

Narrative passages

The bulk of the chapters consists of myths and descriptions of past ritual practice. Often the "framer" alerts us to the shift to mythic discourse and the recalling of past practices with a formula such as *chay simire caymi* 'that story goes like this'. On the whole what follows is vivid and powerful narration, with *-si* reportive or "hearsay" validation predominating.

It is hardly accidental that translators differ on how "oral" or how "bookish" the manuscript is. Adelaar called his Dutch translation (1988) *Het boek van Huarochirí*. Our introduction also emphasizes the likelihood that its redaction was influenced by a European concept of the book and that the redactor thought of myth as material for the making of history books. On the other hand, Urioste gave his 1983 Spanish version a subtitle meaning 'The oral tradition of Huarochirí', and Taylor says that the manuscript "preserves the spontaneous composition of its oral informants" (1987b: 9). Arguedas, sensitive to both qualities, described it as "the voice of antiquity transmitted . . . through the mouths of common people," yet also called it "a little regional bible" (Arguedas and Duviols 1966: 9–10).

Taken separately, both the oral and the bookish emphases can easily turn into distortions that obscure the text's peculiar qualities. We see the intersection of orality and literacy as essential. Rather than filtering out bookish traits the better to approximate oral sources, we seek to capture a form of literacy in the act of engulfing one or more oral genres. This approach has the advantage of faithfulness to the manuscript's historic function. But it entails technical problems.

Something would be lost by simply leaving the translated text in solid blocks of page-filling prose like those of the scribal page. It would be a sacrifice of authenticity not to make at least some use of Dennis Tedlock's ([1971] 1983) and Dell Hymes' ([1977] 1981) demonstrations of how internal evidence helps the translator restore qualities of spoken performance to transcriptions that bury performance rules in prose conventions, because some qualities of oral genre do shine through the editorial veils.

It might even be feasible to produce a fully ethnopoetic rendering of at least some Huarochirí texts (that is, one whose goal is to restore oral organization, with versification, by detecting written correlates of pauses, turns, etc.). We have not followed this method entirely, because, for reasons already mentioned, we doubt our ability to create a hypothetical likeness of the performances from which the manuscript was compiled (or, more likely, recompiled from earlier notes). Also, to make explicit the features that warrant line and stanza breaks (etc.) requires putting into the English text many particles that impede fluent reading of narrative content. Finally, it may be that some of the pauses marked with *chaymanta* 'and next' and the like do not reflect local norms of oral performance but rather are effects of making the speaker (translator?) wait for the scribe to catch up.

Though inhibited by these caveats, we have sought to indicate, partially and tentatively, some performance qualities of the Huarochirí material detectable within the bookish frame that is also part of its substance. Like most Native American narrative texts, the Huarochirí manuscript is spotted with innumerable "empty" words or discourse markers, especially at the beginnings of sentences, that add no literal content to the flow of action. Common ones include, for example, *chaymanta* 'and next' or 'after that', *chaysi* 'so' (with reportive validation), and *chaymi* 'so' (with witness validation). Translating these words directly gives an effect the very opposite of oral. It makes the text sound hesitant and finicky, disrupted. But they are,

of course, not "empty" in spoken performance; they serve to separate utterances in a patterned way, imparting a quality of measure and helping the listener keep pace. We believe they served this function in the oral performances that the manuscript partly mimics and have tried to convey as much. Some words that we read this way are sentence-initial *cay* 'this'/'chay' 'that'; *ychaca* 'however'; *yna*, *ynaspa*, and other derivatives of *yna* 'thus'; *ña* and *ñatac* 'already', 'then', 'so', 'again'; *huc* . . . *huc* and *huaquin* . . . *huaquin* 'some . . . others'. Certain other touches, such as emphasized changes of topic or words indicating change of time or setting, also are taken as signaling a new "turn." Many sentences begin with clauses whose informational contribution is minimal (*chay yna captinsi* 'while it was like that') but which similarly seem to serve a function of measure or pace, introducing a new burst of the storyteller's speech.

Our objective is a compromise, an attempt to make a likeness of the manuscript that suggests its "feel" as a manuscript: that is, a prose presentation following norms of book organization, which for long stretches subsumes oral performances without strictly transcribing them. Stopping short of an attempt to reconstruct the oral performances that the writers heard, but also stopping short of an undivided prose that would silence their clearly audible echo, we have chosen to render the above-mentioned discourse markers and other devices of measure into prose divisions that somewhat suggest the quality of turn or strophe, namely, short indented paragraphs. (The section numbers alongside them are only meant as aids to correlating with the transcription.)

Another "oral" characteristic of the Huarochirí manuscript is heavy reliance on direct quotation and dialogue. Quechua *ñispa* . . . *ñin* 'saying . . . (s)he said' delimits quotations, but instead of translating the formula we have simply used 'said' and quotation marks (unlike Taylor 1987b, who often favors indirect quotation). Because the Quechua verb *ñiy* can mean 'to think' or 'to intend' as well as 'to say', some direct quotations are rendered as quotations of thought: *ñocaracpas ñaupac umanman chayaiman ñispa* 'thinking, "I mean to get to the summit first!"' (chap. 9, sec. 120).

In order to clarify the dialogue structure of many passages, we have placed each turn of quoted speech in a separate indented paragraph, even when the original quotes more than one speaker within a single sentence. Most Huarochirí dialogue (and narration) sounds lifelike and colloquial, and to convey this quality we freely use English contractions ('isn't',

etc.). In some cases, a quotation contains several sentences that sound like simultaneous comments on the same point, and in these cases we have interpreted the effect as a chorus of comments:

Then they derided Quita Pariasca with spiteful words:
"That smelly mountain man, what could he know?"

"Our father Paria Caca has subjects as far away as the limits of the land called Chinchay Suyu. Could such a power ever fall desolate?"

"What does a guy like that know?" (chap. 18, sec. 223)

Question marks in the translation securely reflect Quechua grammar, but exclamation points are supplied. Parentheses are also supplied.

Versified speech in semantic couplets

A few passages clearly employ the Andean oral device called "semantic coupling" or "thought rhyme" (Mannheim 1985), and we have rendered them as couplets. They appear inset in the translation. The semantic couplet is a pair of sentences that express closely related ideas phrased in related (sometimes syntactically parallel) fashion. Semantic coupling is common in modern Andean folk poetry and song, as in many of the world's oral traditions. Huarochirí examples include:

We go in Tutay Quiri's steps,
We go in the path of his power. (chap. 11, sec. 158)

Tell me, I beg: what have I done to make them ill?
For what fault of mine do I live in suffering? (chap. 13, sec. 179)

Semantic coupling typically occurs in invocations to, or sayings of, sacred beings—*huacas* themselves, legendary ancestors, priests and oracles delivering responses, or Christian deities. Cristóbal Choque Casa's moving prayer to the Virgin Mary (chap. 20, secs. 254–255) consists largely of couplets. It might be an example of those "devout and elegant" religious songs that Jesuits in Huarochirí heard "idolatry" defendants sing in their cells at night c. 1620 (Arguedas and Duviols 1966: 259–260). Much earlier witnesses, the Jesuits who conducted the path-breaking mission of 1571, found out that such songs were reworkings of prehispanic hymns: "The same [hymns of praise] which in former times they used to give to the sun and to their king, they have converted into praise of Jesus Christ by taking material from what they heard preached" (Arguedas and Duviols 1966: 243). Some couplets are brief ritual

formulas rather than hymns and a few might be humbler bits of folk song or familiar sayings.

Margot Beyersdorff (1986: 219) comments that in the Huarochirí manuscript "intercalated fragments of sacred verse . . . follow the same norms of versification as the 'prayers' of [Cristóbal de] Molina ["cuzqueño"] and [Felipe Guaman] Puma de Ayala, and can be included in the genre *wayllina*." She does not identify the fragments. Beyersdorff infers from Molina that *wayllina* denominated a specific verse form unique to sacred speech. Husson (1985: 330–331), on the contrary, emphasizes Guaman Poma's couplets' affinities to popular and profane song.

Other translation conventions

In addition to translation problems arising from idiosyncrasies of the Huarochirí text, the translation reflects some decisions that face anyone working from Quechua. Readers who want to avoid spurious accuracy in using the translation should take note of them.

This book does not aspire to morpheme-by-morpheme translation, for several reasons. Rendering an agglutinative language morpheme-by-morpheme (to the degree that it is possible at all) yields verbose, obscure formulations. The following example of a translation process uses the slash (/) to signal morpheme boundaries and suggests the sort of problems that occur within a single random and typical clause. The original is *ña chori/n/cuna/pas collo/pti/n/rac/si* . . . Analyzed using Urioste's (1973) terminology, this clause consists of three roots (italicized), each with additional morphemes: *already child* / (3d person) / (plural) / (additive) *perish* / (contrastive adverbial) / (third person) / (continuative) / (reportive validator) . . . This could be rendered, forcing a morpheme-by-morpheme translation, as: *already child* / his / (plural) / even *perish* / (verb with different subject to follow) / they / first / it's said . . . To make intelligible English one must drop a morpheme (*-pti*) that has and needs no English analogue and make choices whether to translate *-pas*, *-raq*, and *-si* explicitly. We chose not to translate most *-si* reportive validators, and the remaining content can be made clear by implication in a simple English form: 'When his children had already perished . . . ' (chap. 19, sec. 233; the referent of 'his' is supplied in the body of the translation).

Our translation generally preserves sentence boundaries, but in some cases the original sentences contain chains of subordinate clauses so long that a single-sentence translation (without Quechua's devices for clarifying switches of sub-

ject) comes out congested. In these cases sentences have been divided. Sometimes the order of clauses has been altered. The order of sentences has not been altered. Where sentence boundaries are significantly uncertain, notes indicate the alternate readings. Where the grammatical subject of a sentence is unstated but unambiguous in the original, an explicit subject has been supplied in English. In cases of ambiguity, we tried for English translations with a similar ambiguity. Where this was not achieved, notes indicate the nature of the ambiguity.

Aside from unique cases, there are generally common sources of ambiguity (as the English reader sees it) in regard to gender, number, and time. Quechua does not have grammatical male-female gender and in some cases the sex of a named person is unclear (for example, the master weaver mentioned in chap. 1, sec. 8). Also, because singular forms may be used to mean plural, Quechua nouns are sometimes indefinite as to singular and plural. Finally, the tense in Quechua that most resembles English present sometimes refers to a (usually recent) past, making certain sentences ambiguous as to whether they describe current reality. Such cases are noted where they cause significant doubt about the meaning of a passage.

A given root, especially a verb root, is not always translated by the same English word because the root with its varied suffixes often gives a net sense that varies from the root sense by a distance that only a different English word can render. In the following example the common verb root *yalli*- ('to exceed, surpass') yields English 'to compete' when coupled with the suffix *-naco*- (denoting reciprocal action) but English 'to win' when not modified: *po-macta aparispa yallinacoson* 'Let's compete in putting on puma skins' (chap. 5, sec. 64); *pomancunacta aparispa yallita munarcan* '[he] wanted to win by wearing the puma skins he had' (chap. 5, sec. 64). However, in passages where repetition appears to be an element of rhetoric or measure, as, for example, with the four-times repeated *canancama* 'until now' in the preface, the translation mimics the repetition.

The numbers given in the margin are added by the translators. Numbered sections are there only to help readers compare the original and the transcription and to facilitate index references and cross-references. They do not define a unit intrinsic to the method of composition.

The translation does not show the small pen strokes and marks (symbols?) scattered in the original manuscript. The punctuation is added. In addition to sentence-, quotation-, and clause-delimiting punctuation, we have added:

- () Parentheses to signal apparently parenthetical remarks in the original text.

(This spring flowed from a large mountain that rises above San Lorenzo village.

This mountain is called Suna Caca today.)

At that time, they say, it was just a big lake. (chap. 6, sec. 81)

- [] Square brackets to signal marginal or crossed-out material on manuscript pages.

< > Angle brackets to identify translators' words referring to marginal or crossed-out material.

<margin, in Quechua:> [Pariá Caca crossed over to the village of the Cupara.] (chap. 6, sec. 80)

We have translated crossed-out material (words or phrases) that adds substantively to the text, but not crossings-out that only change a spelling or crossed-out single morphemes or letters. All these details are reproduced in Taylor's (1987b) study edition.

Note conventions

Unless otherwise noted, English versions of quotes from non-English sources in notes and in this introduction are by Salomon. Sources cited in notes appear in the general bibliography. Notes provide context sufficient only for novice readers and do not contain full comparisons with other translations or exhaustive references to literature.

Transcription conventions

The transcription strives for the nearest simulation of the original page's qualities compatible with easy comparison to the translation.

The page breaks, signaled with *foja* or folio notations *R* for recto and *V* for verso, are those of the original.

In the transcription the following conventions are used:

Uppercase letters stand for large letters in the original. The original does not use uppercase (rare in scribal papers) but does use large lowercase letters in headings.

- [] Square brackets contain the section numbers for keying passages to corresponding parts of the translation.
- < > Angle brackets identify crossed-out material in the original.

- () Parentheses identify the expansion of abbreviations. For example, the original's *capio* is rendered *capi(tul)o*.

Toponymic and onomastic spelling conventions

It is important to note that in the translation (not the transcription) we have standardized the names of persons, places, and *huacas* so that each has (as nearly as possible) only one name in English context, regardless of the often considerable variations in the original. (Exceptions are cross-referenced in the index.) When the original spelling varies, it is standardized in the translation according to the following rules:

- First: If a proper noun appears only once in the manuscript, or if all occurrences are spelled the same way, we have retained the original spelling.
- Second: If a proper noun has multiple spellings in the manuscript, we have chosen one of these and maintained it throughout the translation and index. The criteria for choosing the form are:
1. For words ending alternately in *o* or *u*, we selected the *u* ending.
 2. Wherever *i*, *e*, and *y* vary, *i* was selected.
 3. Wherever *s*, *ss*, *x*, and *ç* vary, *s* was preferred. The manuscript's apparent sound system does not preclude reading *x* as a palatalized fricative different from *s*, nor does it conclusively prove this to be correct.
 4. Wherever *n* and *m* alternate in final position, *n* was selected.
 5. Wherever *ai* and *ay* alternate, *ay* was selected.
 6. Wherever *hua*, *gua*, and *ua* alternate, *hua* was selected.
 7. Wherever *quia* and *quio* alternate with *cya* and *cyo*, the latter spellings were selected.

Some place names as standardized are different from their nearest modern equivalents (identified in notes at the toponym's first occurrence). For example, the modern place is written *Huaro chirí* but the manuscript uses *guaro cheri* and *huaro cheri*. We use the latter in the translation. Such standardizations from the text, not modern toponyms, appear on the map.

In Spanish names (Thomás, Luzía, etc.) we have

conserved the manuscript's spelling and added the acute accents corresponding to their modern forms.

A caution: standardizing is intended to minimize the novice reader's problem in keeping track of the *dramatis personae* and to make the index simpler. But it sacrifices data important to the analysis of the original text's sound system, to its dialectology, and to source criticism. Students who need such data are urged to use the transcription.

In the transcription and translation, we have followed a common Quechua structure of proper names by treating them as two-word phrases (Paria Caca, Huatya Curi, etc.). Large onomastic corpuses such as the 1588 *revisita* of Sisicaya clearly show that Huarochirí names are binomial, whether or not a space separates the elements (Archivo General de la Nación, Buenos Aires, ms. 13-17-5-1). Applying this norm involves some interpretation because word boundaries in the original are sometimes inconsistent or unclear. By normal Quechua syntax rules, the first word would express an attribute applying to the second; some names can be interpreted using this rule (e.g., Sullca Yllapa 'Last-born Lightning'; chap. 8, sec. 108; chap. 16, sec. 202). Indeed, Huarochirí onomastics remains problematic in general; uncertainty about whether all the names are binomial is only one of many ob-

stacles preventing general translation of proper nouns. A few name meanings are nonetheless clear enough and important enough to warrant bringing them into the translation (e.g., Pacha Camac Pacha Cuyuchic 'World Maker and World Shaker').

Index and glossary

The index gives numbered section (not page) references to both proper nouns and topics and themes, classifying many specific items under rubrics common to anthropology (e.g., for material on sibling relationships, look under "kinship"; for the symbolic value of red, see "color"). The references are to the translation, not to the Quechua original. An instance of a proper name supplied in the translation will be indexed even if only a pronoun or an unambiguous implied reference is present in the original. Personal names are alphabetized according to the first term of the native name. For example, *Diego Chauca Huaman* is alphabetized under *Chauca*. The glossary of untranslated words lists all the terms that appear italicized in the translation, giving simple glosses and numbered section references to all their occurrences. Material in notes is not indexed.

Introductory Essay: The Huarochirí Manuscript

Frank Salomon

The manuscript as testament

The Huarochirí manuscript alone of all colonial sources records a prehispanic religious tradition of the Andes in an Andean language. It tells us of a remote age when cannibal deities preyed on otherwise immortal humans, of the mountain deity Paria Caca who emerged to expel the fire deities of antiquity, of the human groups that traced their victories from Paria Caca's five simultaneous avatars, of Paria Caca's brotherhood with the fivefold female power Chaupi Namca, and of the society ritually organized in their names around a grand complementarity of male and female superhumans. It unfolds the splendor of ceremonies that prehispanic priests devoted to a landscape alive with the diverse sacred beings called *huacas*. It recalls memories of Inca rule and of how unknown invaders, the Spanish, brought new gods to displace the children of Paria Caca and of Chaupi Namca. Nothing else in all the sources from which we seek the Andean "vision of the vanquished" (Wachtel 1971) rivals it for immediacy, strangeness, and beauty.

But the voices we hear in its pages do not relay to us a verbatim record of what was said and believed before the Spanish invasion. It is true that when Father Francisco de Avila reworked part of the same or similar testimony to make his 1608 *Treatise on the False Gods* . . . (hereafter referred to as *Tratado*), he judged that the narrative "does not refer to the present but to history" (Arguedas and Duviols 1966: 198). Yet the way people recalled their ancient tradition and the occasion of their recalling it were themselves facets of a colonial situation the tellers had already endured throughout their whole lives. The telling could not but be influenced by the seventy preceding years of colonial turbulence, during which one potent innovation

was the art of writing itself. Andean peoples used no writing before the Spanish "Vira Cochas" arrived. So the process of capturing their culture as text in the alphabet of the padres and bureaucrats was inextricably bound up with forced conversion and persecution, even when the actual authors were themselves Andean and the actual narrators at least partly faithful to the old *huacas*.

The manuscript is a complex composite testimony of these changes as well as a compendium of ancient memories. The research it contains was apparently sponsored by a clerical persecutor, Father Francisco de Avila, who seems to have used it as secret intelligence for his assault on American deities from 1608 onward. The text does contain opportune denunciations of "idols" (as the Spanish called the sacred beings of the Andes) and of those who steadfastly fed and served them in secret long after official conversion. Yet at least one of the actual makers of the text seems to have thought of the task as one of historical remembrance. The untitled preface to the manuscript looks to a future in which the ancient deities would be remembered with pride, promising a monument of Andean greatness to match Spanish chronicles:

If the ancestors of the people called Indians had known writing in earlier times, then the lives they lived would not have faded from view until now.

As the mighty past of the Spanish Vira Cochas is visible until now, so, too, would theirs be.

But since things are as they are, and since nothing has been written until now,

I set forth here the lives of the ancestors of the Huarochiri people, who all descend from one forefather;

What faith they held, how they live until now, those things and more.

Village by village it will all be written down: how they lived from their dawning age onward.

One gets a strong impression that the creator of these lines was engaged in reconceptualizing the Andean mythic tradition rather than destroying its memory.

The exact process of composition is unknown, but this passage differs from the wholeheartedly anti-Andean viewpoint that Avila expressed in other writings. It may contain the words of a native writer or editor to whom Avila gave some leeway in compiling the text. A measure of unselfconscious candor would have increased its intelligence value. Whether or not he was present at its composition, Avila did read and annotate at least part of it; his devastating subsequent attacks on the deities mentioned suggest that the stratagem of leaving the witnesses some freedom of expression succeeded. But the text's partly intra-Andean genesis also had a paradoxical long-term effect: because it was composed in relative independence from Spanish preconceptions about native religion, it has in the end provided a uniquely authentic monument of the very beliefs Avila meant to destroy.

Whoever composed the untitled preface thought of the manuscript as a totalizing book about inherited tradition, custom, and lifeways that would give Andean memory, like Spanish literate memory, immortal visibility. The usual genre term by which the text identifies the separately remembered and narrated traditions could hardly be more oral; it is *simi*, which the greatest Quechua lexicographer of the age glossed as "mouth, language, commandment, law, mouthful, news, the word and its answer" (González Holguín [1608] 1952: 326). Clearly the testimonies are products of a culture in which orality encompassed the weightiest functions of language. But the book is not conceived simply as a body of speech on paper. It partakes of the assumption that written language, and specifically book language, should subsume and subordinate orality. The conception of a totalizing book that underlies the manuscript seems to be influenced at one or more levels by the Hebrew or Old Testament Bible and to some extent by the New Testament. Of course, few Indians studied the Vulgate. But the Huarochirí area had been missionized with special intensity by Jesuits in 1570–1571, with the conscious intent of popularizing Christian lore in Quechua. In the late sixteenth century, both officially promulgated catechetical summaries and popular-

ized summaries of Bible stories called *historias sagradas* were widely read by or read to laypeople. Literate Indians c. 1600 usually knew traditions from both Hebrew antiquity and the New Testament through publications of the Third Council of Lima. Those who had access to churchmen's libraries or discussions could learn much more.

Although the manifest content of the manuscript only rarely syncretizes biblical material with Andean, the text as a whole has an "astonishingly Biblical" overall architecture (Turner 1988: 249). Like the Bible, the manuscript begins with myths that contrast the human condition with an imagined alternative, a time when the relations between humans and deity were radically different (chaps. 1, 2). A flood myth (chap. 3) signals the end of this era. Like the Bible, the manuscript pictures antiquity as the story of hero-ancestors who share a common descent and a covenantlike relation to an ethnic deity (including an episode resembling Abraham's averted sacrifice of Isaac; chap. 8, secs. 99–103). Its collective subject is a set of groups, each of which considered itself the progeny of a focalized ancestor. As with the biblical tribes, these groups relate to each other, at least in ideology, approximately as a phratry. As in the biblical redactions, their disparate traditions of origin and separate cults have been welded *ex post facto* onto the unifying argument of kinship and imperfectly articulated with apical priestly cults. Their story, like that of the biblical tribes, is intensely concerned with control over specific resources in a sacralized landscape; many of its myths encode political struggles with surrounding peoples and even internecine struggles as mythic combats with superhuman intervention. Also like the Bible, the manuscript is greatly concerned with the relation between the local *sacra* and the leaders and priests of immense invading empires—first the Inca, later the Spanish. The manuscript shares the biblical tendency to accrete genre within genre. Texts about priesthood, sacrifice, ritual law, and prophecy jostle with vernacular myth, claims concerning land and water, and mythicized remembrance of historic events. Bits of oracular response, religious formulas, and perhaps songs have become embedded in the text, too. And finally, as in the Bible, particularly the Deuteronomic books and later prophets, one clearly senses the pressure of contemporary political defeat on religious testimony.

We do not know all the reasons for the resemblances. One possibility is that Father Avila imposed European opinions on the text itself or indirectly on others who processed it (for example, by

preparing a questionnaire or by overseeing the editing). Much European opinion of the time held that pagan myths, Andean ones included, reflected ancient traces of "true" (that is, biblical) religious and historical knowledge, which Satan's deceptions had distorted in intervening centuries. The tendency to force non-Christian testimony into patterns congruent with "universal history" and a unified Bible-based chronology is conspicuous in many Peruvian chronicles, both indigenous and Spanish, and Avila's *Tratado* shows that he partook of it (Arguedas and Duviols 1966: 206–208). The person who arranged or edited the myths expressed frustration at the difficulty of arranging episodes into one scheme of chronology (e.g., chap. 14, sec. 189; chap. 15, sec. 199), a step required for correlation with Bible-centered history. This literal-minded historicist reading of myth, which seems misleading to modern readers, was then thought to be a correct way of restoring American data to their "true" place in a unified world scheme of salvation history.

But above and beyond this exogenous process, the myths themselves seem Bible-like in their style of mythifying. Like the biblical writers, and unlike some myth-tellers from more "tribal" Amazonian societies, the Huarochirí narrators tend to intertwine mythic (miraculous) processes with social causation, rather than locating them in a primordial age before the world began to be as it is. Perhaps the likeness is multilayered or overdetermined: it may result in part from intra-Andean facts distinguishable from the European influences that also affected it. Such forms of synthesis may arise endogenously in societies of a certain scale, setting, and organizational form. Terence Turner (1988) offers a complex argument that a generically rather than locally biblical type of mythology occurs in societies whose status is intermediate between autonomy and complete subsumption in larger states; certainly this was the condition of Huarochirí-area societies for many centuries before the European invasion.

There is a third possibility for explaining the biblical parallel. After seven decades of exposure to European culture, Andean people had consciously or unconsciously gone far in reconceptualizing their mythology as a systematic response to imposed belief. By 1600 this reconceptualization seems to have coalesced into a distinctive ideology. Andean literati of the first generation born after conquest—Felipe Guaman Poma de Ayala and Joan de Santa Cruz Pachacuti Yamqui Salcamaygua—were not simple nativists; they partook of a Renaissance consensus in arguing that Andean people had

already passed through ages of antiquity strictly parallel to those of pre-Christian biblical antiquity. But they dissented from the Spanish in their evaluation of the Andean achievement as a part of it. Where writers like Avila, Cabello Valboa, or Antonio de Calancha saw in Andean myth only a deteriorated and diabolically confused memory of original connections with biblical humanity, and therefore a culture worthy of being forgotten, some native intellectuals believed their history and its memory to be not only parallel with that of the Spanish, but equal in value. The theories of these bicultural "native chroniclers" shored up waning hopes of Andean privilege under Christian rule and appear characteristic of Andean natives descended from noble families but deprived of colonial power. Although we do not know the identity of the person(s) who selected the oral material for inclusion and/or wrote the ethnographic and editorial material in the manuscript, the final redaction of the text does seem to partake of this mentality.

And what of those who actually told the myths to the book creators? What revisions of religious thought had occurred among less bicultural natives during these decades? It is important to remember that by the date when the manuscript was written the cults of the *huacas* had coexisted with Christianity for a whole lifetime. If *huaca* priests had retained the loyalty of people officially bound to Christianity, it was in all likelihood because they had succeeded, under the adverse conditions of clandestinity and church hegemony, in presenting *huaca* religion as comparable in cogency with the church's teachings. It is possible that by 1600 local thinkers and perhaps priests had been engaged (consciously or not) in remobilizing and reconceptualizing the inheritance of *huaca* religion so as to construe it as a *religion*, a "faith" (as the preface to the manuscript says, using the Spanish word) whose overall claims and dimensions could bear comparison with those of the imposed church. It is not beyond possibility that the welding of the Andean deities into a unified kindred partook of post-1532 efforts. Individual *huaca* myths seem to accord the *huaca* cults many of the same attributes as Christian religion: for example, a covenantal concept of obligation, an image of superhuman action as law giving, a notion of history as the continuing interaction of deity and society, and a tendency to express "moral economy" norms in terms of prophetic action. As has been suggested, it is likely that any or all of these may be overdetermined facts, arising from preexisting, and now remobilized, prototypes in aboriginal culture as well as

from European models. Perhaps there would have been an Andean story like the rescue of Isaac even if Spaniards had never invaded. Nonetheless, it would be unrealistic not to consider apologetic processes arising in *huaca* priests' efforts to match Catholic priests in the breadth of their claims while at the same time maintaining distinctness from Catholicism. The importance of such interactive processes in sustaining *huaca* religion is attested by Father Avila's remark that the *huaca* cults thrived most not in the areas where they had remained unmolested, but in the villages where Catholic priests had been most zealous (Arguedas and Duviols 1966: 205).

Despite the importance of all these factors, in the end nothing could be more wrong than to think of the manuscript as merely an Andean counter-Bible. For one thing, obviously, the mythic material overall is radically foreign to Europe; few books in the world give the Western reader such a powerful sense of encountering a cultural unknown. Another and more fundamental reason is that the structuring of myth—the formal architecture of event and process that gives each story internal regularity and resolution—owes everything to Andean patterns and resembles biblical ones little if at all. The dominant model in the stories is that of passage from mere difference (for example, the juxtaposition of antagonistic deities strange to each other) to complementary difference (for example, a revised juxtaposition in which the deities become male and female spouses or siblings embodying opposite ecological principles). This pattern occurs at the greatest and smallest levels of the mythology, in domains from the cults of apical deities Paria Caca and Chaupi Ñamca to the household relationship between in-laws. To imagine this pattern consistently applied to the battles of biblical Adonai is difficult. Comparison with non-Andean South American material (a task scarcely begun) may offer another path to the isolation of underlying prehispanic content. R. Tom Zuidema (1977: 44–47) argues that some Huarochirí myths share specific structures with a myth of the Brazilian Bororo, presumably because the two mythologies share roots much older than Spanish domination.

Andean religion and "Inca religion"

Much of what is published (especially in English) about prehispanic and colonial Andean religion treats the terms "Inca" and "Andean" as near synonyms. Vira Cocha, popularized as the invisible

"creator god of the Incas" (Demarest 1981; Pease 1986; Rowe 1960; Szemiński 1985b; Urbano 1981) fascinated colonial Spaniards who thought they detected in him a possible intuition via "natural religion" (MacCormack 1985) of Christendom's supreme deity. This idea still absorbs modern scholars captivated by the sophistication of Tawantinsuyu, the Inca Empire. The Incas partly persuaded non-Inca Andean people, too. As we learn from chapters 18, 19, 20, 22, and 23, the Incas tried to reorganize local cults into a hierarchy capped by Inca numina, and partly succeeded. Indeed, their persuasions lasted longer than their sovereignty. By the mid-colonial era, when Inca rule had receded into the golden mists of ideological nostalgia, many Peruvian Indians themselves came to recall the deified Sun and his incarnation the Inca god-king as compelling symbols of native identity and native glory (Flores Galindo 1987).

But in order to interpret the Huarochirí manuscript one must appreciate that the equation between Inca religion and Andean religion is an ideological sleight. The invisible Vira Cocha relates to Andean religious life somewhat as the Prime Mover Unmoved does to Mediterranean saint cults. At the summit of priestly and imperial society, prayers like Pachacuti Yamqui's stirring Inca invocations ([1613] 1968: 287–288, 292, 294) to the unseen source of order and beauty may have voiced metaphysical questions that we define as preeminently religious. But the religious life of most of the people who made up Tawantinsuyu's innumerable subject "nations" had little to do with abstract or universalizing expressions. Worship usually focused on sacred beings peculiar to particular kin groups, villages, mountains, canals, and so forth. In fact, religious particularism, expressed in terms of place and descent, lies at the heart of much Andean myth. No doubt discourse of this sort can embody philosophical concerns, no less readily than overtly metaphysical expressions do. But the content is only available by a route that leads through the study of what particular places or mummies (etc.) meant.

This village-based, particularistic version of Andean religious thinking saturates the Huarochirí text. The world that the Huarochirí myth-tellers imagined was structured in terms of grass-roots geography and of genealogy—their pastures and valley lands, their mythicized family tree. The unity of the text, such as it is, is achieved by an attempt (perhaps on the part of the priests called *yancas*) to locate the historically diverse *huacas* and their cults in Paria Caca's and Chaupi Ñamca's regional hierarchy and genealogy. Other traditions—the

lordly priesthood of the Incas, the onset of Catholicism—are seen through the filter of such local and regional concerns. For long stretches the viewpoint belongs to one group, one collective ego: a group called the Checa, devotees of the ceremonial center Llacsá Tambo, resident (at least nominally) in and around the Spanish resettlement village of San Damián, who considered themselves children of Paria Caca while retaining origin myths apparently separate from his cult (chap. 24). Some of the ritual complexes and myths attached to local features—especially to springs, lakes, and canals—have survived with great vitality into modern times and have been studied by ethnographers (Gelles 1984; Ortiz Rescaniere 1977). For example, the modern descendants of the Concha, who live in an outlying hamlet of San Damián de Checa, still maintain today both the myth and the ritual attached to the lake that feeds their irrigation canals (see chap. 31).

The durability of these myths reflects the Huarochirí people's tenacious attachment to the local resources on which they depend. But it is possible after all to exaggerate the local quality of the myths. Paria Caca was not uniquely the deity of the peoples who speak here; he and his sanctuary were renowned throughout a wide swath of the central and southern Andes. It is likely that, when worshipers from Llacsá Tambo went on pilgrimage to him, they met worshipers from many other places and that their own practice had something in common with that of different kinds of "people called Indians." The same applies to the great coastal shrine Pacha Camac and to Cuni Raya, sometimes called Vira Cocha. Even when the names, episodes, and personalities seem peculiar to Huarochirí, the tellers' general religious concepts (e.g., classes of shrines, types of action attributed to deities and heroes, duties of humans to *huacas*) are shared among a wider spectrum of Andean societies, including, for example, groups in the Arequipa and Cuzco areas. In these limited senses, while it is mistaken to take the Huarochirí myths as expressions of a pan-Andean religion, one may take them as representative of broader Andean cultural premises and tendencies that are manifest even in apical Inca cults. The sharing of underlying concepts makes possible ethnographic comparison with societies beyond the bounds of Huarochirí Province, both as seen in past times (for example, via the "extirpation of idolatry" trials that postdate the manuscript; see Duviols 1986) and as witnessed by modern ethnographers (see, for example, Valderama and Escalante 1988, who have studied in distant Arequipa a complex resembling the water cults in chapter 31).

General outline of the Huarochirí manuscript

The Huarochirí manuscript appears not to be the product of polished editing, but neither is it a jumble. With the possible exception of the two unnumbered chapters here called supplements I and II, it seems to be a fair copy edited and in the process of further editing for coherence as a unified narrative. The unification is, however, in many respects incomplete and imperfect. The editor's original intent seems to have been to treat ancient matters earlier in the text and recent ones later, but sometimes when turning to a new source (e.g., at the beginnings of chaps. 13, 24, and 31) he is forced to return to a different origin story. Recollections of past ritual practice and interpolated bits of current ethnographic observation further complicate the text by introducing into many narrations, with specious smoothness, references to times other than the time of the main narrated story. Moreover, the manuscript is full of second thoughts (cross-outs and interlineations, marginalia), tangents, overlaps, cross-references, marginal queries (probably by Father Avila), and cryptic allusions. For all these reasons, to appreciate the coherence of a theme one often must pull together partial accounts from disparate chapters. For this purpose the index supplied by the translators may be useful.

Early times and peoples

The preface (untitled in the original) promises to tell the achievements and beliefs of "the people called Indians" from their "dawning age" up to the present, village by village.

The first chapter sketches the world as it was before the present human race appeared. People lived forever (after a five-day temporary death), at the price of sacrificing half their children to the fire-monster Huallallo Caruincho. At that time, too, the subtropical abundance of the lower valleys extended far up into the heights. This whole rich and cruel world order would be destroyed with the advent of Huarochirí's great deity Paria Caca.

Huallallo's dominion is grouped with other stories of remote antiquity: chapter 2 tells how the Trickster-demiurge Cuni Raya, who "almost matches" the figure of Vira Cocha, passed through the landscape and through the lives of the female deities he seduced. In a Christian-influenced interlude (chap. 15), Cuni Raya, as Vira Cocha, is credited, almost parenthetically, with originally creating nature in an empty universe. Chapter 3, telling the myth of the deluge, and chapter 4, telling of the

Sun's disappearance, end the section dedicated to remote antiquity.

The Paria Caca cycle and the myths of group identity

The mythic cycle that forms the unifying core of the text tells the apparition of Paria Caca (chap. 1, sec. 6; chap. 5, secs. 72–73), the fivefold deity who symbolized inclusive ethnic unity among the tellers' various residential and kinship groups. Like many great Andean deities, he is a mountain, a majestic double-peaked snowcap visible on the eastward horizon from the heights of Huarochirí. Many groups venerated him. We hear most about the Checa who gathered at Llacsá Tambo, but chapter 13 concentrates on a relatively distant cluster of villages, the Mama region in the lower Rímac valley. Chapter 30 is a myth of the Allauca, and chapter 31 copiously recounts the viewpoint of the Checa's neighbors, the Concha.

Paria Caca first appeared as five eggs that became five falcons that became five men, the founders of the human groups who appear as the main collective protagonists. These groups are sometimes spoken of in ways suggesting clanlike or sib-like qualities and together, within Paria Caca's cultic organization, are seen as a phratrylike collectivity of groups who "all descend from one forefather" (pref., sec. 2). But before calling them clans one should be careful to note that the text uses no term clearly translatable as 'clan' and that, although the manuscript uses the unilineal idiom for certain limited purposes, other principles of descent, marriage, and residence appear to play at least as important a role in defining groups.

Paria Caca was a stormy being of the heights. He made himself known to humans by favoring a poor man with power to defeat the rich (chap. 5), or, in another tradition, by saving a Huallallo worshiper from the obligation to sacrifice his child (chap. 8). He first appeared on a mountain in what was formerly the domain of the lowland aborigines called Yunca, which was dominated by the (possibly Huanca) deity Huallallo (chap. 5, secs. 38, 55). Once his bond with some of these people was formed, Paria Caca ascended to Huallallo's seat on the high cordillera. There he attacked and expelled the ancient cannibal deity in a world-shaking combat between storm water and volcanic fire (chap. 6, sec. 74; chap. 8; chap. 9, sec. 110; chap. 16, secs. 203–209; chap. 17, secs. 214–219). He carved out in this struggle the titanic landscape of snowcaps

and lakes that is his seat and his likeness. It became the sanctuary on the icy heights to which his pilgrims brought their llamas (chap. 9, secs. 119, 127, 138–139; chap. 24, secs. 309–310; chap. 28, sec. 364). Huallallo, exiled, was left to the care of a rival ethnic group called the "dog-eating Huanca" (chap. 9, secs. 110–111; chap. 16, sec. 209). The victorious Paria Caca in his multiple incarnations swept down from the windy heights through the various fertile valleys of the Pacific slope (chap. 8). As he went, he subjected the Yunca to his own people, expelling many of them, reorganizing their lands, creating a cultic order in which both victors and vanquished would participate, and winning the Yunca wealth (e.g., chaps. 9, 25).

What human movements does the Paria Caca mythology allegorize? In a series of highly original studies María Rostworowski de Diez Canseco (1978: 31–147) has interpreted the narratives as reflections of a large and gradual prehistoric movement in which pre-Incaic highlanders of the ethnic group called Yauyo worked their way downward and southwestward, from their early home on the high tundras at the Cañete River headwaters, through various warm irrigated valleys (including the Mala, Lurín, and Rímac valleys, which form the heartland of the mythology), toward the Pacific shore and its rich deltas. Using independent and ostensibly non-mythical bureaucratic records she has been able to document Yauyo populations all over the territory of the manuscript and has mapped their major territorial divisions as understood in the mid- to late sixteenth century (Rostworowski 1988: 56–57). One of these Yauyo populations (that of Chaclla) attested a folk history closely resembling stories in the manuscript (Rostworowski 1988: 54–57).

Linguistic indices are less clear but also suggest some association between Paria Caca's mythology and a Yauyo expansion. Traces of Aymara-like lexicon and phonology in the Huarochirí manuscript indicate that the informants knew or were influenced by the same ethnic language whose modern forms persist as residual "islands" in old Yauyo territory (Gentile Lafaille 1976: 14).

In Inca and early colonial times those natives who classed themselves as Yauyo regarded the focal area of the manuscript, especially what later became the parish of Santa María Jesús de Huarochirí, as the very core of Yauyo political space. The early colonial Yauyo do not seem to have had a king or center of political command, but Yauyo witnesses said that in conducting intranative diplomacy their ancestors had recognized the Ninavilca lords of Huarochirí village as paramount authorities for sev-

eral generations. In 1558, Cristóval Malcachagua of Huarochirí gave unambiguous testimony that the Ninavilcas meant to rally "all the Yauyos" in defending Yauyo coca claims in the middle Chillón valley against Huamantangas and Spaniards (Rostworowski 1988: 94). "Yauyo" is the only term the manuscript uses in categorical contrast to the ethnic terms for foreign neighbors (the various Yunca groups, the Huaman Tanca, and the Huanca; supp. II, sec. 485). All this evidence seems a *prima facie* reason for treating the manuscript as substantially an artifact of Yauyo culture.

On first inspection Paria Caca does appear to be simply the chief deity of these Yauyo populations, ennobled by Inca patronage but still very much an ethnic symbol. Felipe Guaman Poma de Ayala thought of him so ([1615] 1980: 1:241). And when Maca Uisa himself, one of Paria Caca's "sons," asked the Inca to dance a priestly dance essential to the Paria Caca cult, he told the Inca to dance it "the way our children from the Yauyo do" (chap. 23, sec. 297).

Nonetheless, one must account for some striking slippages in the association between Paria Caca and Yauyo identity. The predominant tellers of the Huarochirí myths, the Checa, thought the ancient founders of their leading kindreds were not Yauyo but Yunca. They scorned the Yauyo kindreds in Checa as half-wild nomads and barely tolerated their presence in the pilgrimage to Paria Caca (chap. 24, secs. 305–309) until Paria Caca himself taught them to respect the newcomers. In neighboring Concha, "Yauyo country" was a byword for a remote and fruitless backwater (chap. 31, secs. 391, 408). Perhaps such scorn reflects the fact that by 1586 the self-identified Yauyo had shrunk to a tiny ethnic minority comprising only about 5% of the 7,000 tributary households in the huge province to which they gave their name (Dávila Brizeño [1586] 1965: 155).

How should one read these seeming contradictions? One clue is that although the Checa narrator applied the word "Yauyo" to immigrants whose exact place of origin in Yauyos Province was still remembered, and who were considered nomads only recently attached to Checa, he also credited higher-ranking kindreds in Checa with invader origins. The difference was that the higher-ranking kindreds had arrived of old and had inserted themselves in the agricultural social structure created by the ancient Yunca founders in the days of Huallallo Caruíncho. A Concha teller gave much the same account of his group in chapter 31.

Apparently the Checa and Concha used the

term "Yauyo" to refer to recent herder migrants, while regarding their own ancestry, which might well have been historically no less Yauyo, as quasi-autochthonous because it had been grafted by ritual and marriage onto the regimen that included "village-owning," valley-oriented agricultural *huacas*. Perhaps they saw no paradox in scorning people of the very sort that Paria Caca favors in his myths—impoverished wanderers from the heights—because they regarded their own ancestors as more powerful "children of Paria Caca." The proof of their superiority was that these ancestors had won dominion over Yuncas and the right to aggregate Yunca *huacas* into their religion while their compatriots still wandered the heights in monoethnic pastoral groups.

As a working hypothesis, one may imagine that Paria Caca's cult as recorded here—that is, in a state of bipolar coordination with Chaupi Ñamca's cult and with Yunca components generally—is the precipitate of, and a commentary on, a long and apparently still continuing series of migrations or incursions from the southerly highland fringes of the manuscript's territory. As in other world areas where pastoralists penetrated the edges and eventually the centers of agricultural societies (e.g., China under Mongol rule), the assimilated descendants of early invaders came to inhabit preexisting social and ritual forms and champion them against later invaders.

The crux of Checa and Concha religion appears to be a systematic priestly synthesis that exalts early invader groups by placing their origin myths, eloquent of a mostly pastoral highland way of life and a kinship-based social ideology (that is, the myths of Paria Caca's "children"), into a dyadic relation with ancient macroregional cults rooted in coastal agropastoral society (those of Chaupi Ñamca, Pacha Camac, etc.). It does so by interpreting the deity who was taken to represent the sum total of invader origins, namely, Paria Caca, as Chaupi Ñamca's brother and wife-giver to Pacha Camac. In this way Paria Caca was imbued like Pacha Camac and Chaupi Ñamca with a power and an identity transcending immediate ethnicity and locality.

The spokesmen of the system, perhaps Yanca priests belonging to Caca Sica *ayllu* or their followers, defined Checa cultural identity as descent from the creators of one local instance of such highland-valley fusion. To be an ancestrally entitled worshiper of *both* Chaupi Ñamca and Paria Caca, and of their local affiliated cults, was the crux of belonging. The term "Yauyo" in Checa and Concha accordingly connoted neither 'foreigner' nor 'com-

patriot' but 'parvenu': immigrants not yet fully inserted into the regional-scale cultic order and its local apparatus.

This view helps us understand a problem of belief, namely, why outsiders like Guaman Poma saw the Paria Caca religion as a Yauyo cult par excellence, while the people of Checa used the word "Yauyo" to label a group barely admitted to Paria Caca's pilgrimage. To characterize the historical connection between Yauyos and Yuncas objectively is much harder. Whether the early highland aggressors whom the tellers identified with the mummified heroes called "children of Paria Caca" were in fact exclusively Yauyo, or whether such groups can be dated and archaeologically linked to Yauyo populations at all, remains unknown. For these reasons in the introduction we shall simply call the mythic protagonists "invaders" except where there is a specific warrant for using the term "Yauyo."

Rostworowski identifies the Yunca or coastal groups at whose expense the children of Paria Caca purportedly expanded as the two large politically unified collectivities (*señoríos*) closest to modern Lima. One, occupying the lower Rímac and Lurín valleys, was called Ychma locally and Pacha Camac in Inca usage; it housed the mighty shrine of Pacha Camac and enjoyed great religious prestige even after Yauyo and Inca depredations reduced its political reach. The other was the domain of the lord called Colli Capac, whose people the Huarochirí narrators called the Colli and whose seat the Spanish called Collique. It was based in the lower Chillón valley (Rostworowski 1988: 60–62). The Checa thought the Colli had founded the highland settlements their own ancestors conquered (chap. 24, sec. 341; chap. 25).

Chapters 11, 12, 17, 24, 25, and 26 contain what appear to be "charter" myths of specific invader groups that identified their founders as "children" of Paria Caca. If they have a unified thrust, it is that Paria Caca's fivefold self, ambiguously developed as a union of brother-*huacas* (chap. 8, secs. 99, 105; chap. 16, sec. 202) or of Paria Caca's human "children" (chap. 9, sec. 113), through many victories created a regional order embracing both victors and vanquished. By a combination of warfare and courtship at superhuman and human levels, Paria Caca turned his relation with the rich aborigines of the valleys, the Yunca, from one of strangeness and enmity into one of coordinated worship, in-law kinship, and interdependency (though certainly not without an abiding tension between groups). The Paria Caca heroes' victories over the Yunca, whom the myths picture as wealthy but im-

moral, fill several chapters. Chapter 31, the charter of the lineages of the Concha (neighbors to the Checa; see especially secs. 388–403) pictures the invaders as trying to assimilate to the aboriginal norms of their in-laws. Paria Caca's complementarity of form and function with the local female (possibly Yunca) *huaca* Chaupi Ñamca suggests that, overall, the mythology of Huarochirí construes a folk memory of conquest as an ideology of affinal interdependence.

How does this happen? The memorable fifth chapter is the *locus classicus* of a theme repeated many times in the manuscript: the poor ragamuffin who, because he is privy to a superhuman secret, carries within him a future power that his rich and splendid contemporaries cannot see. In chapter 5 it is the Baked Potato Gleaner, a byword for poverty, who makes Paria Caca's potential power real by a twofold action: he overturns the extant order's hierarchy (curing but simultaneously humbling a Yunca lord) and at the same time he becomes literally wedded to it (marrying the humbled lord's daughter). Empowered, he introduces Paria Caca's cult to a society transformed by combat and courtship.

The manuscript's ideological image of the invader-aborigine interaction as a passage from hostility to symbiosis may be seen as a one-sided rendering of, rather than a mere fiction about, the politics of coexistence between highlanders and coastal peoples. The dynamic it mythically expresses seems to have been driven by the highlanders' need for cultivable land, which they sought by downward invasion and establishment of "vertical" outliers in the mid-altitudes. Lowlanders in turn sought to capture more water sources by extending their canals upward and exerting political power over the lakes and streams of the heights (Torero 1974: 73–79). The 1558 lawsuit involving the Yauyo of Chaclla and the Yunca of Collique (among others) shows how in prehispanic times the downward penetration of Yauyo "vertical archipelagos" (Murra [1972] 1975a) led to conflicts so mutually costly that Yunca and highlanders reached a *modus vivendi* including cooperation on shared irrigation work and ritual reciprocity between leaders. The Huarochirí text glorifies some roughly comparable *modus vivendi* in mythic idiom. But the lawsuit also shows what the Huarochirí manuscript deemphasizes: that such arrangements were delicate and unstable, liable to lapse into prolonged violence when politically stressed. Even under Inca pacification, the Yauyo of Chaclla, their non-Yauyo Cantarivals, and the Colli Yunca incessantly tried to cheat and coerce each other. When the Spanish in-

vasion unleashed the resulting tensions, the fights and suits that followed did much to drive several polities into helpless poverty (Rostworowski 1988: 83–291).

Chaupi Ñamca and the mythology of gender

Several passages detail the priesthoods, games, sacrifices, *huaca*-impersonating dances, and oracles that ritually organized the interlaced aboriginal-invader societies that the tellers saw as the product of their ancestors' victories. Although the relationships among groups and deities are complex and often far from obvious, one unifying motif is clear: the union between invaders and aborigines is ideologized in terms of a fraternal tie between the highest male deity of the invaders and the highest female deity of the aborigines. The link is taken to warrant marriage alliance between their respective human progenies. In this scheme female deities play an enormous role.

Chaupi Ñamca, supreme among female *huacas*, was a land and river deity of the lower Rímac whose great temple at Mama symbolized her ancient standing as Pacha Camac's wife (Dávila Brizeño [1586] 1965: 163). Her name means 'center Ñamca' and she may, like her spouse, have had a following across various valleys; in 1562, Mama was the place chosen for a summit meeting of native lords from the whole region (Murra 1980: xviii). The devotees of Paria Caca have conceptualized her component cults as a fivefold sisterhood, so as to match the form of Paria Caca (chap. 10, sec. 147; chap. 13, secs. 175–183). In the synthesis that dominates the manuscript, Paria Caca and Chaupi Ñamca are made into siblings (chap. 13, sec. 172; Avila [1645] 1918: 64). These claims apparently mirror increased Yauyo penetration of domains in which her marriage to Pacha Camac had once formed a dominant cultic axis. Indeed, in one version the newcomers' claim goes beyond fraternal symmetry to imply superiority: Chaupi Ñamca's five selves are styled "daughters" of Paria Caca, whereas Paria Caca's selves are never said to be her children (chap. 8, sec. 101). The "children of Paria Caca" have also expressed their conviction of political superiority by making their father-*huaca* wife-giver in relation to Pacha Camac.

In establishing a sibling relation between male mountain-*huaca* and female valley-*huaca*, the Paria Caca priests may have followed an earlier prototype. A partially obscured tradition (chap. 8, secs. 106–107; chap. 10, sec. 143) allows us to glimpse Mana Ñamca or Mama Namca, a synonym or com-

ponent of Chaupi Ñamca who was once a lowland female counterpart to the male highland *huaca* Huallallo Caruíncho (and who, like him, was a fiery power expelled by Paria Caca).

Within the dominant synthesis, ritual order richly embodied the idea of male-female symmetry at the apex of *huaca* genealogy. Paria Caca's priesthoods and his great festival the Auquisna (chap. 9, secs. 117–140) find their explicit counterpart in Chaupi Ñamca's festival the Chaycasna (chap. 9, sec. 122; chap. 10, secs. 149–151), so that the ritual and mythical order opens out in a grand sexual complementarity on the pattern Invader : Paria Caca : Male :: Aborigine : Chaupi Ñamca : Female. The fraternal treatment of the male-female apical deities tends to express ideals of harmony or equilibrium between groups at a totalizing, whole-society level.

However, as one passes from the supreme powers to their *huaca* offspring and their human descendants, the dominant gender metaphor changes from brother-sister fraternity to marriage. A repetitive motif concerns invaders, sons of Paria Caca, who marry Yunca-descended women, implicitly daughters of Chaupi Ñamca (chap. 5; chap. 24, secs. 305–314). Thus the sons of Paria Caca become indebted wife-takers to Yunca groups and their *huacas*.

This conviction of indebtedness parallels what was remembered as invader expropriation of the female and Yunca element in nature, namely, irri-gable land. On the ecological plane the relationship between invader and aborigine is likened to the union of wild water from the heights (Yauyo-like, male) with the soil of the valleys (Yunca-like, female). The motif is discussed in the section below on the concept *pacha*. Because this union—irrigation—was in fact the greatest agrarian wealth of the western Andes, many myths can also be read as combined cosmic and political charters for local groups' rights to specific lands and canals. The abundance of landmark detail in the text, which we have tried in notes to key to modern cartography, reflects the function of myth as a memory bank of information about the tellers' generally invasion-based claims on resources.

The conjugal metaphor for invader-aboriginal relations carries a different symbolic load from the fraternal one. Whereas the siblinghood of the apical *huacas* is a static, merely classificatory relation, marriage myths are myths of social dynamics. They express not only an ideal of productive and reproductive union, but also an image of the many tensions involved in creating such union. For example, Collquiri, a water-*huaca* from the heights (chap. 31,

secs. 408–436), must fight with his prospective in-laws and submit to their humiliating discipline before his desire for their beautiful land-*huaca* daughter can turn from destructive lust (flooding) into productive marriage (irrigation). Indeed, all the myths related to marriage treat it as an image of social stress and change latent in union. In chapter 5 Paria Caca's protégé Huatya Curi, a foreign male who wants to marry a human incarnation of Chaupi Ñamca, garners the hatred of his brother-in-law and establishes himself in his new household only by fighting within it (secs. 49–70). On the political level, accepting a foreign spouse is always a gesture of submission that one accepts at peril to one's autonomy, and for this reason Paria Caca's son Maca Uisa turns down the Inca's honorific gift (chap. 23, sec. 300). Even the Inca himself forfeited his empire by accepting a bride from a secret power that turned out to be the Spanish (chap. 14). While one may read these texts as comments on marriage as such, they also give voice in kinship idiom to fundamental doubts about the political stability of conquest-based agropastoral society.

In sum, the gender mythology of Huarochirí, though centered on an idealized complementarity, is at the same time emphatically a conflict model of society. It envisions every complementarity, whether marital, ritual, ecological, or political, as shadowed by submerged conflicts that had to be repressed in order to institute it. The inseparability of complementarity from conflict is implied to be a motor force in the mutability (what we would call the historicity) of west Andean society.

The Incas as seen from Huarochirí

Chapters 18, 19, 20, 22, and 23 vividly illustrate how the Inca conquest looked to provincial natives and give important clues as to how Incas manipulated the local pantheon. The Inca himself was said to have acknowledged and even subsidized local *huacas*—both those that local people thought of as ancient, like Paria Caca (chap. 18, sec. 220), and those newly emerging, like Llocllay Huancupa (chap. 20, sec. 243). This policy may be related to the fact that the Yauyos were reputed to be generally pro-Inca. Early evidence from the northernmost part of the Huarochirí orbit indicates that the Incas favored Yauyo efforts to penetrate the Yunca and gradually enlarged Yauyo enclaves based at Chaclla to the detriment of the anti-Inca Yunca of Collique and rival non-Yauyo highland groups (Rostworowski 1988: 148, 161, 178). Guaman Poma ([1615] 1980:

1:240–241) drew a picture of the Inca adoring an image of Pacha Camac in the shrine of Paria Caca.

The tellers of the manuscript likewise expressed their alliance with Incas in the idiom of ritual, adoring and helping finance some of the pan-Andean deities that Inca propaganda promoted. Among these figured Pacha Camac, the originally Yunca 'World Maker and World Shaker' whose shrine-citadel lay at the western edge of the mythic landscape (chap. 22, secs. 276–284; Patterson 1984[?]). So thoroughly had the Incas intercalated regional and local cults with royal religion that the Huarochirí people thought the Incas themselves owed some of their victories to help from Paria Caca's offspring (chap. 19, secs. 228–229; chap. 23).

The tendency to equate Cuni Raya, a coastal Trickster-demiurge embodying the transformation of landforms by water, with the invisible Vira Cocha fostered by Inca cult may also have been heightened by interaction with Incas. But for the Huarochirí narrators, this *huaca* stood over and against Inca power as against all other human power. Chapter 14 recounts an enigmatic Cuni Raya Vira Cocha myth alluding to the fall of the Incas. It apparently refers to the fact that the Incas had divided their domains in dynastic struggle just before the Spaniards arrived. The narrator tells how Cuni Raya Vira Cocha inveigled the Inca king with a beautiful bride and then, inducing him to "draw a line across the world" (chap. 14, sec. 196), made him fatally retreat from his sacred center at Cuzco. During the resultant outbreak of chaos, "people scrambled for political power, each saying to the others, 'Me first!' 'Me first!'" (chap. 14, sec. 197). While they wrangled uselessly in civil warfare the Spanish appeared at Cajamarca.

The Spanish invasion as seen from Huarochirí

Even more remarkable are the unique chapters that give us a glimpse of how natives, after a lifetime of colonial afflictions, looked back on the first confused moments of their contact with the Spanish. The first inkling of the epochal events arrives in the same way that the prophecy of Paria Caca's imminent victory had arrived long before (chap. 5), as a secret that Paria Caca vouchsafed to a despised ragamuffin from the heights. This time the prophet of the coming crisis is the "Mountain Man" Llacuas Quita Pariasca (chap. 18). The same chapter tells how one *huaca* priest survived the Spaniards' attempt to burn him alive and became a leader in preserving and sheltering the *huacas* amid Spanish at-

tacks. Many references (e.g., chap. 9, secs. 122, 125, 136, 137; chap. 10, secs. 144, 148, 149; chap. 13, sec. 175; supp. I, secs. 449, 469, 473) show that those who rescued the *huacas* succeeded in hiding their cults (sometimes, a censorious voice warns, by camouflaging them in Catholic ritual) far into the colonial era. At least one of the contributors to the text regularly obliges Father Avila by warning that many Indians' conversion was a façade (chap. 9, secs. 133–134). Other chapters (20–21) reveal that even Father Avila's most obsequious ally, Don Cristóbal Choque Casa, in a certain sense still believed in—was even dominated by—the “evil ancient demons.” These chapters tell with astonishing vividness and intimacy of Cristóbal's visionary combat with the *huaca* Llocllay Huancupa and of how Llocllay returned to battle Cristóbal once more in a dream. Cristóbal's dilemma—the need to validate his Christianity by conquering *huacas*, combined with inability to conquer them convincingly without invoking the same mythic paradigm he proposed to replace—adds up to a uniquely moving image of the Andean convert's stressful and compromised position.

Specialized chapters

The manuscript contains some specialized chapters perhaps given in reply to questions about arts that Tridentine Catholicism forbade as diabolically inspired, heretical, or superstitious. Chapter 29, short but important, sketches Andean astronomy or astrology. It suggests that the tellers thought of certain “black” constellations and certain star clusters as the celestial prototypes of the earthly beings they resembled. Visionaries saw these constellations “descend” to earth and shower their protégés with specific vital force.

Chapters 27 and 28 treat the cult of the dead. Chapter 27, a droll explanation of why the dead no longer come back, echoes a motif from chapter 1, namely, that humans must accept irremediable death as the alternative to Malthusian disaster. Chapter 28 recounts funeral and commemorative custom, somewhat evasively in the crucial matter of how ancestors' bodies were treated. Perhaps the tellers hoped to avoid setting persecutors on the trail of their beloved and (ideally) everlasting ancestral mummies.

Two “supplements” (which may be rough drafts) lay down the ritual duties of couples who give birth to magical children—twins or babies with small birth defects. These unusually difficult sections af-

ford an idea of the complex ritual obligations embedded in in-law ties, with emphasis on the ritual exchange of immense amounts of coca and other wealth.

The Huarochirí region's people and their historic situation

These myths relate intimately to the real-life landscape and the historic conjuncture that generated them. For one thing, the deities themselves are land features and local climatic forces. For another, these priesthoods and celebrations themselves organized productive work, so that the religious regimen encodes practical as well as ideological information. Finally, every facet of religious organization—spatial, calendric, and hierarchical—reflects the pressure of colonial circumstance.

The westernmost range of the high Andes runs northwest-southeast, parallel to Peru's Pacific shore. The long slope from its icy crests down to the desert beaches forms a rugged watershed cut at intervals by many small rivers carrying melt-off from the heights to the ocean. The scene of the Huarochirí mythology is a segment of that slope. Most of the places mentioned in it are close to three valleys: the Rímac River valley, on whose lower banks the Spanish built Lima, but whose upper tributaries, the Chaclla and Mama rivers of the manuscript, were still mostly native territory in 1600; to the south, the Pachacámac River valley, today called the Lurín, on whose headwaters stood the colonial parish of San Damián; and still farther south the “River of Huarochirí,” today the Mala, which gave its name to a colonial parish as well as to the province and to the manuscript. The people who made the manuscript also seem to have included in their range of meaningful geography one valley to the north of Lima, the Chillón, and two more to the south of Huarochirí, the valleys of the Omas and Lunaguaná (today Cañete) rivers.

Karen Spalding's *Huarochirí: An Andean Society under Inca and Spanish Rule* (1984) meticulously reconstructs the colonial society from which the manuscript emerged. Spalding (1984: 3) cautions us that colonial Huarochirí Province was no huddle of hamlets but a region the size of Massachusetts. Yet neither is the landscape whose meanings the myths unfold too huge for Andean travelers to have absorbed from personal experience. Taylor's map (1987b: 39) suggests that the widest span of the mythic landscape reaches about 85 air km (53

miles) from ocean to mountaintops, and about 120 air km (74.5 miles) from north to south. A separate reckoning by John Treacy (1984) estimates the main mythic scene as about 108 air km (67 miles) east to west and about 56 air km (35 miles) north to south. Of course, estimates using air kilometers hardly simulate the twisting paths pedestrians and llamas actually followed across the contorted mountain landscape. Even on foot, highland travel involves innumerable hairpin turns up and down the faces of river chasms. Yet, even allowing for steep climbs and zigzags, these distances would hardly have discouraged Andean travelers. Averaging Cotler's (1958: 113–114) and Spalding's (1984: 31) statements on walking speed over the Huarochirí terrain yields 2.4 km/hour as a usual rate for the area. If so, a person walking eight hours a day might have descended from the high shrines of Paria Caca to the Pacific shores in about four days. These are only order-of-magnitude estimates, but they suffice to remind us that the world pictured in the Huarochirí text is mostly a world of experienced rather than imagined landmarks and spatial relations.

Ecologically, the mythic scene spans a remarkable spectrum of "vertical tiers" (Murra [1972] 1975a; ONERN 1976). The uppermost points mentioned are icy peaks more than 5,000 m above sea level. The myths clearly take as their backdrops the "pluvial tundra" of Mullucocha (5,000–4,300 m above sea level) where Paria Caca annihilated a mountain. The heroes' downward course traversed the "very humid páramo" (4,500–3,900 m above sea level; *páramo* means high grassland) and the "humid woodland" (3,800–2,300 m above sea level). This is all high, seasonally rainy and snowy country with numerous lakes and probably included the llama-herding lands of the ancient peoples up to 4,600 m above sea level. The tellers of many myths identified with the splendor of the heights and with their product, camelid wealth on the hoof. One of the major ceremonies was a llama race to the sacred heights, with the first llama acclaimed and given a sacred name (chap. 9, secs. 120–122, 128).

Agriculture belonged to lower tiers, four cultivation zones compressed within narrow valleys: the "montane steppe" at San Damián, and three increasingly lower, dryer grades of "desert scrub" (*matorral desértico*). The colonial resettlement villages in which the manuscript seems to have been made stood in the upper part of this range, 3,000 to 3,500 m above sea level. The agricultural terraces immediately around them were and are irrigated, but on the "montane steppe" above them dry farming of high-altitude crops is also possible. There

people cultivated tubers, especially potatoes, and the Andean grain *Chenopodium quinua*, which one tradition mentions as a mythic plant that gave birth to people (chap. 24, sec. 302).

Irrigable crops grew best in places where canal water fertilized pockets of sun-warmed soil amid the rocky river canyons. Irrigated valley lands symbolized abundance, and access to warm land with water was seen as the limiting factor in winning wealth. The tellers of the myths especially associated maize with irrigation, for example, in the poignant figure of the young woman who stood in her field and cried as she watched her insufficiently watered maize shrivel up (chap. 6, sec. 83). Chapters 30 and 31 are vivid mythic renderings of the struggle between water-poor and water-rich groups.

Still further down-valley but short of the coastal plain, at altitudes around 1,000 m above sea level, irrigation takes place in small patches of warm river-bank land commonly called *chaupi yunca* ('mid-yunca' or 'semi-yunca'). These sheltered, garden-like river margins were coca lands in antiquity, prized for the abundance of the sacred leaf that Huarochirí natives ceremonially lavished on each other and on their superhuman patrons. The manuscript is especially detailed in explaining how coca cultivators fit into Paria Caca's cult regimen (e.g., chap. 8, sec. 109).

Where the fertile valleys meet the sea, a rich fishing industry combined with delta and riverbank agriculture to yield wealth that awed even the Incas. Prehispanic seaboard dwellers developed pisciculture intensively (Espinoza Soriano 1974). Although the myth-tellers thought of themselves as highland-descended, they, too, imagined salt water as part of the humanized and culturalized landscape. Fish-farming was so familiar that the teller of chapter 2 thought of ocean fish as runaways turned wild:

At that time there wasn't a single fish in the ocean.

Only Urpay Huachac used to breed them, at her home, in a small pond.

It was these fish, all of them, that Cuni Raya angrily scattered into the ocean . . . (chap. 2, sec. 26)

At the time when the manuscript was written, much of the prehispanic technology and some of the prehispanic land tenures that once governed use of these productive zones still functioned. But the Yunca, Yauyo, and Inca claims were no longer the only factors. The social organization of land—administrative divisions of territory, settlement patterns, and legal land rights—had become an even more complex, multilayered scheme com-

posed of native and colonial elements. Diego Dávila Brizeño's ([1586] 1965) report on the "Province of the Yauyos" and Karen Spalding's monograph (1984) afford valuable clues to the *de facto* world the myth-tellers inhabited.

The most modern part of the settlement pattern was the one Dávila Brizeño himself had helped impose—concentration into forced resettlement villages (*reducciones*). Each village gathered together numerous non-nucleated settlements scattered up and down the valleys to make a conveniently taxable package on the model of a planned Spanish village (see the section on the concept *llacta* below). These parishes inorganically merged fragments of various units earlier defined by the Inca and aboriginal political orders. One of the things that makes the Huarochirí manuscript hard to read is the fact that the tellers are constantly comparing the (to them) arbitrary *reducción* map against the (to them) intelligible distribution of groups and deities that their hidden ritual still commemorated. Thus their toponymy refers to both ancient and current mental maps.

Nonetheless, the Spanish administrative plan did still make use of some older orderings. A map made by Dávila Brizeño representing Spanish administrative geography of the 1580s in the context of native toponymy (Rostworowski 1988: unpaginated insert) shows the Yauyos Province bisected by what appears to be an Inca-style moiety dividing line: the southern half is called Anan ('upper') Yauyos and the northern Lorin ('lower') Yauyos. This feature the Spanish apparently retained or at least recognized. Colonial Huarochirí Province corresponded to Lorin Yauyos. And when it came to sharing out the right to rule and tax Andean people, the Spanish availed themselves of other Inca demographic and organizational schemes. The Spanish *repartimiento*, or political apportionment of tributary subjects, proceeded by assigning each established native lord to a Spanish *encomendero*. The patterning of colonial lordship thus legalized appears to echo Inca rules albeit with innovations and distortions. So the initial colonial system, while it functionally overturned many native norms, retained the gross anatomy of Inca political divisions, and some of these are detectable in the Huarochirí manuscript even after subsequent reorganizations.

The Incas saw each half of the region as composed of large blocs of people (perhaps ethnically defined), each comprised of several *huarangas* or 'thousands' of tributary households. In what Dávila Brizeño called Lorin Yauyos, which housed the ancestors of the manuscript's authors, the Incas

recognized and the Spanish retained three major groupings:

LURIN YAUYOS

Huarochirí People

Huaranga Colcaruna
Huaranga Quinti
Huaranga Langasica
Huaranga Chaucarima
Huaranga Checa

Chaclla People

Huaranga Chaclla
Huaranga Carampoma
Huaranga Casta

Mamaq People

Huaranga Matucana
Huaranga Huanchor

ANAN YAUYOS

(Spalding 1984: 54)

Each "thousand" had a native lord, or *curaca*. An overlord or *curaca principal* was recognized by the Spanish, on purported Inca or aboriginal precedent, as lord of all *huarangas* in the bloc. This was the highest office held by a non-Inca lord. By such a title the Ninavilca lords of Huarochirí (chap. 7, sec. 93; chap. 19, sec. 230) were recognized as having precedence among, if not power over, the *huarangas* most prominent in the manuscript.

Finally, within these Inca-influenced political arrangements there remained elements of a still older order. The pre-Inca (or non-Inca) settlements that the informants called their *llactas*, some already reduced to ghost towns, were still the points of mythic reference. At the microscopic level, a system of partly localized extended kinship reckoning, discussed below, remained the matrix for relations within and among households. To what degree the large, purportedly hereditary categories that dominate the overall scheme of the myths corresponded to any territorial reality or to any practical pattern of residence by 1600 is uncertain. But it is likely that the large, purportedly genealogical formations whose founders are the greatest heroes of the text, and the *ayllus* or ancestor-focused kindreds, still counted, at least theoretically, as the corporate holders of important rights in productive assets (see below, especially on the concepts *yumay* and *ayllu*).

In the later sixteenth century the Huarochirí people were not numbered among the poor. They were heavily taxed, and Spaniards vied for chances to exploit them. Far from being an obscure hinter-

land, their region lay astride the best-known route from the Spanish capital, Lima, to the Inca one, Cuzco. But their relative wealth did not protect them, and in some respects the inhabitants of Huarochirí were an afflicted people. Epidemics of the 1550s, 1580s, and 1590s, within the living memory of myth-tellers, had mowed down a huge share of a population with weak immunological defenses. "If we accept Dávila Brizeño's estimate of approximately 6,000 household heads in Huarochirí in the 1540s, shortly after the entry of the Europeans, then the province lost . . . almost 30 percent of its adult male population in the quarter century between 1545 and 1571" (Spalding 1984: 173). The rest of the century was a period of continuing severe population decline in Huarochirí as in many Andean regions (Spalding 1984: 176). Around 1560 and again in the 1580s, survivors of the epidemics in some parts of the Andes (including southerly Yauyos) had asked the *huacas* to defend them, but suffered bitter disappointment in the failure of nativist movements (Taki Onqoy, Moro Onqoy, and others; Curatola 1978; Stern 1982: 51–71). When Jesuit fathers conducted a conversion campaign in Huarochirí in 1577, they reported finding many people sick in their fields (Arguedas and Duviols 1966: 244). Missionaries routinely procured conversions by exploiting the desperation of the mortally ill.

Some of the myth-tellers were probably old enough to remember other calamities. When Spanish forces crushed the forty-year-old neo-Inca redoubt in Vilcabamba and then in 1572 executed the last independent sovereign of Inca blood, Túpac Amaru, Andean people everywhere went into mourning. The administrative overhaul that followed increasingly reduced native chiefs to the compromised status of tribute enforcers and cultural brokers. Some of the myth-tellers may have been among those routed from their homes and chased into strategic hamlets by Spanish functionaries in the 1580s. The "people called Indians" also had to comply with increasingly exhausting tribute regimens. Meanwhile, the authorities allowed Spaniards to appropriate landholdings that the natives lacked enough population to defend and sometimes let clerics exploit parishioners outrageously.

So by the probable date of the manuscript—1608—the inhabitants of the Huarochirí region had reason to wonder, like Quita Pariasca the Mountain Man (chap. 18, sec. 221), whether the world itself had turned bad. Several passages in the manuscript are colored by anxiety about sickness and depopulation (chap. 19, sec. 233; chap. 25, sec. 345; chap. 26,

sec. 357). Observing that the natives of the rocky heights seemed to be holding their own even as the aborigines of the coast were perishing (and indeed became entirely extinct, through both depopulation and assimilation), the tellers of chapter 9 (sec. 140) wondered whether perhaps the rustic highlanders did not owe their vitality to greater faithfulness to the Andean religious tradition.

Into the world of the *huacas*

Some of the basic terms in Huarochirí myths embody unfamiliar Andean assumptions or categories. While glosses cannot capture their full senses, a reader at least needs some idea of what is lost in translation. The following paragraphs comment minimally on the most important ones.

Pacha: 'earth, world, time, place'

Huarochirí people called the world and time together *pacha*, an untranslatable word that simultaneously denotes a moment or interval in time and a locus or extension in space—and does so, moreover, at any scale. In chapter 18 (sec. 221) the Mountain Man, foreseeing the arrival of those destroyers who would turn out to be the Spanish, says, "Alas, brothers, the *pacha* is not good." He could have meant anything from 'this is not a good situation' (or 'moment' or 'conjuncture') to an idea as grand as 'the world is no longer good' or 'the epoch is no longer good'. The same word *pacha* is also the name of earth in general and in modern folk religion means Earth as a personified female being.

Cosmological ideas are not spelled out in the Huarochirí manuscript. Despite the use of solar gnomons for calendric astronomy (chap. 9, sec. 108), the Sun appears as a person in Checa lore only tangentially (chap. 4; chap. 13, secs. 172, 188). Sun worship figures as an Inca idea (chap. 22, secs. 276, 279) and as a motif in the genealogy of the *huacas* as the people of the lower Rímac valley imagined it (chap. 13, sec. 172). The moon is not personified anywhere. The Andean cosmos can be partly understood from these myths, but not because the myths explicitly describe it. We deduce what we can by noticing what the tellers take for granted. To some degree the picture can be augmented with data from other written sources and from recent ethnographic research that offers conceptual analogies. (Earls and Silverblatt 1978 propose a synthetic model.)

Two pervading generalities seem to order the

data. One is that earth has predominantly female associations and water predominantly male. The second, partially overriding the first, is that altitude and motion connote maleness, while depth and stability are associated with femaleness.

Earth's living mass was imagined rising up from the waters of the surrounding ocean. (Whether the waters circled earth like Saturn's rings or whether earth's base was immersed like a boat's hull is not clear.) Especially in local instances, particularly when visualized as the green irrigable valley lands, earth is usually female. But the land's highest points, the great peaks whose ice-cruled crowns overtower the habitable earth, are usually male. One of them is Paria Caca. Roughly, the solid part of the world might be imagined as a single world mountain made of all the Andean ranges, rising from femalelike valleys to malelike snowcapped heights.

Water—rainstorms and mudslides, snow and glacial runoff, tiny irrigation canals and mighty rivers, even that astral river we call the Milky Way—is the kinetic part of the world. Water moves over *pacha* in a circular path. It rides up from the ocean into the sky along the Milky Way "river." Chapter 29 (sec. 375) tells us that water rises because a celestial llama constellation carries water up from below by drinking before ascending. Then water washes down onto the heights of the earth as storm and rain, bathing and fecundating earth as it descends to the ocean. People worshiped the great snowcapped peaks "because that is where their water comes from" (Avila [1645] 1918: 83). Water is often male, especially storm water and downward-flowing water. Several myths liken the chasm-cutting power of rivers in spate, or the storm and flash flood that create disastrous mudslides, to warlike male violence:

As soon as they brought him up a hill, Maca Uisa, child of Paria Caca, began to rain upon them, gently at first.

The natives of that country said, "What could this mean?" and began to ready themselves.

When they did so, Maca Uisa reduced all those villages to eroded chasms by flashing lightning and pouring down more rain, and washing them away in a mudslide. (chap. 23, secs. 295–296)

Although the Pacific Ocean plays a key part in organizing mythic space, it is not personalized in the manuscript. In modern Andean myth, the ocean (*Mama Cocha* 'mother lake') is usually female. The *huaca* most closely associated with the sea is Pacha Camac (chap. 22, secs. 276–284), but this great force is not clearly defined as a maritime deity.

The hydraulic embrace of moving water and enduring earth was imagined as sex. Their embrace yielded a biotic system (Dumézil and Duviols 1974–1976) in which life forms emerge from mixed earth and water. Hydraulic sex was sometimes imagined as a turbulent affair. The myth-tellers, who seem to have faced the harrowing vicissitudes of a water-poor irrigation economy with a good deal of humor, likened its hazards to the comical chaos of undisciplined desire. In four myths (chap. 6, secs. 82–90; chap. 12, sec. 170; chap. 30; and chap. 31, secs. 406–432) voluptuous earth-women offer their parched bodies to the virile water-*huacas* who rush down from the heights. The earth-women's self-serving tricks and the water-men's lecherous ineptitude can turn their meetings into comic disasters. In chapter 31, when the lake-*huaca* Collquiri rushes downhill to his earth-lover Capiyama, the bursting pressure of his virility squirts out of every channel and sprays destructive floods all over Capiyama's people:

... Capiyama's elders shouted at Collquiri from their <crossed out> [spring] village:

"Son-in-law, everybody's mad at us! Don't send us so much water!"

"Shut it off!"

"Hey, Collquiri! Hold back on the water!" they yelled.

With them shouting like that, Collquiri plugged the hole with a blanket and other stuff.

But the more he plugged it the more the barrier crumbled and the more the water kept bursting through over and over again.

Meanwhile the people from down below kept yelling at him nonstop:

"PLUG IT UP!!!" (chap. 31, secs. 425–426)

Pacha, the world as a given arrangement of time, space, and matter, is not supratemporal. It clearly admits change, even cataclysm. There have been times when *pacha* "wanted to come to an end," and the manuscript tells us how this can happen. Water might fail to ascend into the astral "river" and the world might drown as the ocean rose (chap. 3; chap. 29, sec. 375). Or Pacha Camac Pacha Cuyuchic, the 'World Maker and World Shaker' who sleeps under the ruined shrine that still bears his name, might turn over in his dreams and pulverize the world in an earthquake (chap. 22, sec. 284); the region is in fact subject to devastating earthquakes. Everything, including humanity, has been crushed and refashioned. The social order, too, is constructed and transformed in superhuman violence; the tellers imagine the original theophany that was their group birth as one of many cataclysms that simultaneously gave form to the land and to society.

In gross terms, then, the Huarochirí world opposes the qualities of still centrality—depth, solidity, dryness, stability, potential fecundity, womanliness—to those of a restlessly moving outer orbit—height, fluidity, wetness, movement, potential for insemination, virility. As the outer waters wash over the inner earth, these two fundamental lives mix in the circulation of water over soil. Lives that are both watery and earthy emerge: plants, animals, people. Born fat, wet, and juicy, all beings eventually—in the space of a dry season or a long life—separate out again into their original substances (Allen 1982). Moisture departs as vapor, leaving a weatherbeaten husk and the dry seeds of a future cycle. Nature and ritual combine to return the parts to their sources so the cycle can start anew. Humans like all others emerge fat and wet, but at the end of life their dried husk containing the potential for future life goes as a mummified ancestor (*mallqui*) back to earth. In chapters 27 and 28, a dry, seedlike being that emerges from the dead human husk—a fly—is the living residue of a dead generation. The function of ritual and sacrifice is to ensure a steady circulation of biological energy through *pacha* by conducting social exchange among its living parts.

Camay: a concept of specific essence and force, 'to charge with being, to infuse with species power'

The act by which *huacas* bring other entities into being is not expressed with the plain word meaning 'to make' (*ruray*), nor with the verb *huallpay*, which González Holguín took to mean a divine act of creation ([1608] 1952: 174), but with a different verb: *camay*. *Camay* escapes the seemingly handy glosses 'to create' (because 'create' connotes an *ex nihilo* act, while *camay* connotes the energizing of extant matter) and 'to fashion' (because 'fashion' suggests only an initial shaping of inert matter, whereas *camay* is a continuous act that works upon a being as long as it exists). But what does *camay* mean? The astronomical or astrological chapter 29 gives a crucial clue: it labels a llama-shaped constellation the *camac* (agentive form, 'camay-er') of llamas. On descending to earth this constellation infuses a powerful generative essence of llama vitality, which causes earthly llamas to flourish. All things have their vitalizing prototypes or *camac*, including human groups; the *camac* of a human group is usually its *huaca* of origin. Religious practice supplicates the *camac* ever to vitalize its *camasca*, that is, its tangible instance or manifestation. Taylor (1974–1976) has likened this idea to Platonic idealism, an insight that helps one understand the profoundly

plural and ongoing nature of Andean creation but also minimizes its earthiness. *Camac* in the manuscript seems to suggest a being abounding in energy as physical as electricity or body warmth, not an abstraction or mental archetype.

Huacas could be *camac* to great or small categories of beings. The great coastal deity Pacha Camac bears in his very name—'Camac of space and time'—an all-embracing function as the vitalizer of worldwide realities, while local *huacas* animate smaller entities. Likewise, ordinary beings could be *camasca* (participial form; 'infused with *camay*') to different degrees. An *ancha camasca* person is a 'very powerful' one. But one can clearly see that *camay* means specific form and force, not general potency. In chapter 14 (sec. 191) three men boast of their speed, saying:

"I am a condor shaman!" some men answered.

"I am a falcon shaman!" said others.

"I am one who flies in the form of a swift!" replied still others.

What they said more literally is:

"I am the *camasca* of the condor!"

"I am the *camasca* of the falcon!"

"I am one who flies as a swift!"

The point appears to be that these men are three shamans whose patrons, the archetypes of birds who symbolize speed, have infused in them the species powers of speed and range of the condor, the falcon, and the swift.

Huaca: 'superhuman person, shrine, holy and powerful object'; huaca priesthood

The Huarochirí manuscript is in large measure a reading-out of its space. The horizon, not the cosmos—geography, not metaphysics—poses the questions to which its most vibrant deities give answers. Andean numina lodge in places or placed objects: mountains, springs, lakes, rock outcrops, ancient ruins, caves, and any number of humanly made objects in shrines: effigies, mummies, oracles, and so forth.

Like all the other persons English forces us to call "deities," Paria Caca is a *huaca*. The half-Andean historian Garcilaso Inca de la Vega tried in 1609 to convey the sense of this all-important term by telling us that:

huaca . . . means "a sacred thing," such as . . . idols, rocks, great stones or trees which the enemy [i.e., Satan] entered to make the people believe he was a god.

They also give the name *huaca* to things they have offered to the Sun, such as figures of men, birds, and animals. . . . *Huaca* is applied to any temple, large or small, to the sepulchers set up in the fields, and to the corners in their houses where the Devil spoke to their priests. . . . The same name is given to all those things which for their beauty or excellence stand above other things of the same kind, such as a rose, an apple, or a pippin, or any other fruit that is better or more beautiful than the rest. . . . On the other hand they give the name *huaca* to ugly and monstrous things . . . the great serpents of the Antis . . . everything that is out of the usual course of nature, as a woman who gives birth to twins . . . double-yolked eggs are *huaca* . . .

They use the word *huaca* of the great range of the Sierra Nevada. . . . The same name is given to very high hills that stand above the rest as high towers stand above ordinary houses, and to steep mountain slopes . . . (Garcilaso Inca de la Vega [1609] 1966: 1:76–77; Livermore's translation)

A *huaca* was any material thing that manifested the superhuman: a mountain peak, a spring, a union of streams, a rock outcrop, an ancient ruin, a twinned cob of maize, a tree split by lightning. Even people could be *huacas*. Modern ethnography tells us that one extraordinary ethnic group, the Uru of Bolivia, was collectively called *haqe huaca* 'a human *huaca*' by Aymara-speaking neighbors because the Aymara thought the Uru had survived from primordial times (Manelis de Klein 1973: 143). In the manuscript, too, people can become *huacas*. Mummified ancestors of high rank (see below) could be *huaca*. The Inca rite of Capac Hucha (chap. 22, sec. 280) turned live humans—spotless children and youths—into new *huacas* by burying them alive. The discovery of new *huacas* never ceased. Avila recalled that when one native brought home a black silk button with gold thread, which he had found in a garbage heap in Lima, a "master" of *huaca* worship revealed to him that it should be enshrined as a household *huaca* ([1645] 1918: 74). Chapter 20 details the discovery and career of another new-found *huaca*.

People owed *huacas* reverence and also plenty of goods: llama and guinea pig meat, brilliantly colored mineral powders, thorny oyster shell, clothing, coca leaf, maize dumplings, and maize beer. The Huarochiri manuscript lays down the priestly regimen for sacrifice and gives examples of the responses priests delivered on *huacas'* behalf:

They [*huaca* priests] gave people advice, telling them all sorts of things:

"You are to bathe in the confluence of two streams."

"You must sacrifice one of your llamas."

People were more than happy to obey their dicta. (chap. 13, sec. 186)

The Huarochiri manuscript tells a good deal about priesthoods, but not much about rules regulating lay worshipers' individual or group affiliation to *huacas*. People appear to have belonged to the cults of *huacas* considered as apical ancestors of their patrilineages, of their *ayllus*, and of the clanlike large groups identified with major founder-*huacas*. Apparently, heredity was a primary determinant of local religious duty, because when people went on their own initiative to consult the *huaca* oracle of the five Namca sisters, the Namcas would ask if the petitioners had properly consulted their hereditary *huacas* beforehand:

. . . these *huacas* would ask those who went to them, "Have you come on the advice of your own Con Churi [hereditary household deity], your father, or your elders?"

To those who answered "No," the *huacas* would reply, "Go back, return, consult your Con Churi first." (chap. 13, sec. 185)

Huaca shrines were powerful social and political corporations. When a *huaca* gained legitimacy, we learn from the "biography" of the *huaca* Llocllay Huancupa (chap. 20), worshipers built it a temple precinct and offered costly service. Politically sponsored *huacas* had endowments of both herds and fields that common people were required to serve:

The Incas worshiped these two *huacas* [the Sun and Pacha Camac] most, beyond all the others, exalting them supremely and adorning them with their silver and gold, putting many hundreds of retainers at their service, and placing llama herds for their endowments in all the villages.

The llamas of Pacha Camac sent from the Checa people stayed at Sucya Villca. (chap. 22, sec. 277)

Huacas also had human servitors and even spouses. Avila in 1645 reminisced about having met a good-looking eighteen-year-old girl, crippled and walking on two staves, who had "been dedicated as a woman of an idol" (the *huaca* Maca Uisa). Maca Uisa lived with her in the form of a sacred blue stone, "no bigger than the palm of a hand," which she kept in a basket with tiny but luxurious garments to dress it ([1645] 1918: 69–70). He also mentions that a "*saçerdotisa* [priestess] very celebrated among the Indians" was known as a "woman of Pariacaca's" ([1645] 1918: 65). Both examples use the Spanish term *muger*, meaning 'woman' literally

and 'concubine' or 'secondary wife' more freely, rather than the legal Spanish term for 'wife'. Because the Spanish terminology of marriage implies a sacrament, Father Avila might have scrupled to use it in connection with *huaca* marriage no matter how natives regarded the matter; so we cannot tell whether these unions counted as full marriages in the native system.

Some *huaca* priests clearly enjoyed class privileges. For example, common people did all the agricultural work on fields belonging to the *yanca* priests who had hereditary authority over a lake and its irrigation water (chap. 31, sec. 435) and they gave priests huge amounts of meat (chap. 24, sec. 335). Water priests are credited in the manuscript with almost dictatorial power over some of the processes by which society reproduced itself, including vital decisions about people's rights and duties in basic subsistence agriculture:

Because he was the *yanca* for this purpose, all the arrangements of the season were made in compliance with his commands.

When it came to irrigation he'd be the only one to give orders about it, saying, "It'll take place now" or "It'll be so many days." And all the Concha obeyed him to the last word. (chap. 31, sec. 434)

Early in his extirpation campaign, Father Avila imprisoned an important priest of Chaupi Ñamca in Mama village named Hernando Paucar (who may be a source of the distinctive subregional mythology contained in chapter 13) and wrung from him a confession about the privileged life of *huaca* priests. It should be read with caution, since it comes to us via a paraphrase composed four decades after the event:

... it is true that I've been a priest [*sacerdote*] of Chaupiñamocc since I was a youngster, and I inherited [the priesthood] from my father, and in all these villages of this parish and others, they've respected me a great deal, and I used to come visit them twice every year, and if I was late they used to send someone to call on me, and they would send me horses, and people to serve me on the road, and whenever I entered a village they would erect arches, and they would come out dancing, with the women beating their drums, and they would give me lodging, and fed me, and served me, and they gave me so much that I didn't know what to do with it all. At my rear they made something like a cabin of boughs, and they would cover it and close it off with cloaks, and the floor used to be covered with fresh straw, and I would enter into it alone, by day or by night as I preferred. There they

would come to consult me, and I responded, and sacrificed guinea pigs, pouring out maize beer, and I used to perform other ceremonies in view of those who attended, and some used to say that they wanted to hear a response given by Chaupiñamocc, and I used to make her speak by placing there a little idol that represented her, and sometimes I would talk in a very high voice and other times very low. . . . And for this everyone respected me, as much as they do you [Father Avila], and much more. On the third or fourth day they would bring together maize, potatoes, and a lot of food for me, and they would dispatch it to my wife in my village. In this village I'd be lodged in one fellow's house the first time, a different fellow's the next . . . (Avila [1645] 1918: 68–69)

Through oracles and through their privileges in ratifying rites of passage, the *huacas'* priestly representatives closely governed the ongoing business of society. Another sort of priesthood, the nonhereditary *huacsa* office, rotated among members of appropriate kin groups. *Yancas* seem to function as calendric and technical authorities, oracles and mediators, while the *huacas'* main duty was to impersonate the great *huacas* in festivals and reenact their myths. Some of the narratives may be verbal "scripts" of *huacsa* performances.

In comparison to the priesthoods, the manuscript has little to say about the power of nonpriestly leaders such as the political "native lords" called *curacas* or the native magistrates (*alcaldes*) appointed by Spanish colonial officials. It mentions several postconquest *curacas* by name, often commenting on their attitudes toward *huacas* or as a device for setting a chronological context. Several passages imply that the *curaca* was expected to take a prominent part in *huaca* ceremonies (chap. 13, secs. 173–174, 176), and that he could exert leadership over a community's decision to adopt or neglect particular *huacas* (chap. 19, sec. 231; chap. 20, secs. 244–245).

Huacas had vibrantly individual personalities. Paria Caca, whether in his incarnation as the hailstorm of the icy heights or as the five-in-one hero who beat the Yunca down toward the sea, seems haughty, brilliant, and cold, a driving deity. Llocllay Huancupa (chaps. 20 and 21) lurks in the dark like an inarticulate beast, roaring dully over his immolated meal. Chuqui Suso, the sexy agricultural *huaca* (chap. 6, secs. 82, 88–90), and her sister who seduced the Paria Cacas into irrigating her (chap. 12, sec. 170), as well as the great maternal *huaca* Chaupi Ñamca, were associated with sensuality and playful ease:

"Chaupi Ñamca enjoys it no end when she sees our <crossed out:> [cocks] private parts!" they said as they danced naked.

After they danced this dance a very fertile season would follow. (chap. 10, sec. 151)

They used to stay there all night long, staying awake till dawn, drinking and getting drunk. They got real happy performing the dance called Ayllia, and danced that night drinking and getting drunk until dawn.

After that they went out to the fields and simply did nothing at all. They just got drunk, drinking and boozing away and saying, "It's our mother's festival!" (chap. 13, sec. 174)

Clearly *huacas* are living beings, persons in fact. Avila and other Christian seventeenth-century observers seem to think of the *huacas* as real beings, material in form but animated by demonic spirit. When Avila applied the terms "god" and "goddess" to *huacas* (for example, Cuni Raya's beloved Caui Llaca; Arguedas and Duviols 1966: 202–203), he seemed to be thinking of them as linked to natural forms, anthropomorphic and tangible, something like the deities of Greco-Roman mythology and the "demons" of medieval Europe whose lore he apparently knew in some detail (Arguedas and Duviols 1966: 207, note 3). In this partly Greco-Roman sense, the word "deity" might fit the *huacas*. But one must be careful; the dualism of substance enfolded in the Christian usage of the words "god" and "divine" seems superfluous for understanding Andean worship. The world imagined by the Checa does not seem to have been made of two kinds of stuff—matter and spirit—like that of Christians; *huacas* are made of energized matter, like everything else, and they act within nature, not over and outside it as Western supernaturals do.

The tellers give *pacha* shape by mapping onto it a society of *huacas* that mimics idealized human social structure, mainly genealogical and affinal. Earth forms, superhumanity, and society match each other in a structure of correspondences. Great snowcaps are great creators. Their myths are often shared among large populations (perhaps tens or hundreds of thousands before the Spanish conquest) united by language and other markers of public identity; often they are the groups called "nations" by some Spanish authors and "ethnic groups" by modern students of Inca polity. Paria Caca, whose body was a double-peaked snowcap high in the rugged western range, was known to Guaman Poma ([1615] 1980: 241) as one of the greatest deities. The pilgrimage to his shrine (Bonavia et al. 1984) united

thousands of people in a trek over the last lap, a race up the "steps of Paria Caca" still visible today. The pilgrims visited the lake where Paria Caca quenched the Huanca deity Huallallo's fires, sacrificed llamas at Paria Caca's dwelling, and, according to Dávila Brizeño ([1586] 1965: 161), "climb[ed] the peak of the snowcap to offer their sacrifices."

The Huarochirí narrators explained their various ancestor *huacas* as heroic offspring of this great regional *huaca*. In the Huarochirí manuscript Paria Caca is said to consist of five beings who are, in various contexts, equal or ranked component selves of a fivefold being. In the overall textual architecture, which seeks to weld *huacas* of diverse origin into a single ideological kindred, the five heroes were felt to have established what were apparently large fraternal sections of society. The main teller of the Paria Caca mythology thinks of the landscape as divided into domains of influence corresponding to the various large highland-derived groups, each defined by putative descent from a persona or child of Paria Caca. These domains are not said to be contiguous territories. They emerge in the form of mythic trajectories: the paths of heroes, along which the heroes achieved society-defining deeds and left areas of dominion over specific lands and people in the scattered or "archipelago" form known from secular and bureaucratic sources.

Yuri/yumay: concepts of human birth and descent

Colonial Andeans imagined human descent groups as continuations of the genealogy of *huacas*. Intermediate-sized, named ascriptive groups like the Checa "thousand" (whose viewpoint often dominates the text) were fitted into a unified regional ideology by defining their founders as the progeny of Paria Caca's component heroes. Paria Caca's followers thus construed the "original" organization as sib- or clanlike. The spacial foci of superhuman and human genealogy seem to have been symbolized by shrines called *pacarinas* or 'dawning places' that represented founders' and heroes' appearances on earth. *Pacarina* myths are by their very nature peculiar to each group; since the Huarochirí mythology as a whole sometimes seeks to coordinate the mythic legacies of several "originally" separate groups, it is not surprising that *pacarinas* are the theme on which Paria Caca mythology is least consistent. One example is the *pacarina* where a people-producing *quinua* plant grew (chap. 24, sec. 302); the person who composed the chapters seems

uncertain how to reconcile this myth (which Taylor [1987b: 163] takes as a component predating the subsumption of origins in Paria Caca) with other accounts of emergence.

Andeans traced the descent lines of actual humans from revered ancestors, whom they credited with living on as guardians of fertility and order as long as their mummified bodies endured. We know from "idolatry" trials and the testimony of chroniclers that the cult of mummies (*mallquis*) formed the link between the mythology of *huacas* and the purportedly known genealogy of named groups of the living. One witness on trial for "idolatry" explained: "This *mallqui* [the mummy Guaman Cama] was a nephew of the idols Caruatarqui Urau, and Ticlla Urau, and the progenitor of this *ayllo* Chacas, and he was a son of Libiac ['Lightning'], and he nurtured people, multiplied them, guarded their fields and gave them money and wealth" (Huertas 1981: 104–105). Mummified ancestors lived in caves or special houses (chap. 11, sec. 155). Their progeny dressed them richly, periodically "embraced" and feted them, served them with food and sacrifices, and petitioned their approval of major transactions (Guaman Poma [1615] 1980: 1:262–271; Polo de Ondegardo [1571] 1916: 116–119). Garcilaso ([1609] 1966: 1:76–77) mentioned that mummies of special importance were *huacas* and in Huarochirí it seems to be mummified leaders of successful invasions who achieved this role. The two Huarochirí chapters about the fate of the dead (chaps. 27 and 28) are evasive about mummification but difficult to understand unless one assumes that people preserved human remains in some way. A few Huarochirí passages seem to refer to mummy *huacas*:

The one [*huaca*] called Ñan Sapa was a human being.

Later on, the Inca took away the *huaca* himself.

But they made another one to be his proxy.

This is the one that we know Señor Doctor Francisco de Avila carried away.

They say Ñan Sapa, when he was human, wore the *quisay rinri* in his ears and bore the *canah yauri* scepter in his hands. (chap. 24, secs. 319–320)

In connecting ancestors to living humans, unilineal principles play an explicit role. The myths employ a concept of patrilineage (*yumay* 'sperm') used in relation to a concept of sibling or birth group (*yuriy* 'birth'). The preface tells us that the peoples whose story is to be told here constitute a group by virtue of sharing a father: "I set forth here the lives of the ancestors of the Huaro Cheri people, who all

descend from one forefather" (pref., sec. 2). The vocative *yaya* 'father' as a form of address is used to express deference to any male authority, human or superhuman.

The most prominent collective ego of the myths, the Checa, thought of their group as defined by mythic descent from one of the component Paria Caca persons; it is not stated to be patrilineal, but the Yauyo subgroup called Morales as a whole is treated as male relative to the Yunca, and the persons whose acts define it are males. Within such clanlike categories, there appear to have been more clearly genealogical patrilineages uniting people with specific rights and duties. Portions of society characterized as patrilineages (*yumay* 'sperm') are mentioned as the holders of hereditary water rights and priesthoods (chap. 7, sec. 91; chap. 31, sec. 445).

When comparisons among sectors of a collectivity are made, whether at a vague clanlike or a more genealogical lineagelike level, they are usually made in terms of birth order within an original sibling set (*yuriy*). Genealogical myths from all over the world "justify existing stratifications by denying them (we are all brothers) while at the same time providing detailed guidance to inequality by distinguishing between 'elder' and 'younger' branches. They also record alliances by tying allied groups into common genealogies" (Vansina 1985: 103). The concept *yuriy* 'sibling group' carries exactly this contradiction. In all cases, siblinghood seems to imply rank even more saliently than it implies solidarity. "The Quinti thoroughly despised the Checa because the Checa were born last" (chap. 11, sec. 153). The notion of unranked kin solidarity is treated as an abstraction or mystique at the highest level of mythic generality: Paria Caca, the union of all Huarochirí-area invader groups, came into being as five unnumbered eggs. The set of eggs could be considered a sibling set, but one without birth order because not yet born. No such transcendent paradox occurs among humans. The transition from power *in ovo* to power in action is also the transition to rank order.

As in many Andean contexts (for example, the political organization of colonial Andean communities), the firstborn or leading member of a set (e.g., noble heads of a village's component *ayllus*) functions within the set as first among equals, but outside the set as the totalizing representative of it. (The political authority of *curacas* over *ayllus*, for example, seems to have worked on this principle.) So, too, among *huacas*. Paria Caca can be considered the first among five brothers (chap. 8, sec. 99), yet at the same time as the overarching deity of

which the five are only parts. In this latter function Paria Caca is often spoken of as the father rather than the brother of the heroes. Chaupi Namca has the same structure (chap. 10, sec. 147).

So thoroughly does the ideology of genealogical inequality govern ritual order that the birth of human siblings whose rank order closely approached equality—that is, twins—was seen as a major anomaly warranting the immense expiatory efforts that occupy supplement I.

Naturally there is some tension between rank ascribed by descent and rank achieved through warfare. The “children of Paria Caca” fought for the military supremacy of their ethnic group, but also for precedence among themselves, and this produces anomalies; chapter 17 expresses the Checa claim to have risen above their Quinti rivals by their achievements. Sometimes a group’s junior standing seems to reflect its lesser achieved power. The Concha, a local group described as an *ayllu* (see below), were said to have originally been a *yuriy* of five brothers and a sister; the resulting five groups’ unequal land resources are explained as the result of the first three brothers’ having conquered energetically while the last two lagged or got lost:

... these two [Hualla and Calla] fell somewhat behind.

So, lagging behind, they missed the trail and headed instead toward the Yauyo country, thinking, “Maybe our brothers went over there.”

A long time afterward, only after the other three brothers had finished dividing up the fields and other goods among themselves, they did come back. (chap. 31, sec. 391)

Patrilineal grouping and birth-order ranking do not exhaust the kinship content of the ideology expressed in the manuscript. Some episodes suggest that descent through females also played a large part in the tellers’ idealized vision of social organization. No named principle used in myths of group origin offers a matrilineal counterpart to *yumay*. Yet, in rituals, there is a strong tendency to treat the engendering of females as a separate type of partentage from the begetting of males. In the fertility-giving ritual game of spearing giant dummies called *yomca* and *huasca*,

Once they’d prepared everything, they named one of the effigy bundles Yomca and set it as a target symbolizing males.

The other, the one called Huasca, they set as a target symbolizing females.

After they set them up, the men would put on their best clothing and feather ruffs called *tamta*, and they’d begin to let fly at the targets. (chap. 24, sec. 328)

Then they threw spears at the Huasca effigy for females, saying,

“She’ll give me daughters and all kinds of food!” and then at the Yomca effigy, saying,

“He’ll give me sons, agave fiber goods, and all kinds of animals!” (chap. 24, sec. 334)

Separate female *huacas* were credited with being great producers of female offspring: “Chaupi Namca was a great maker of people, that is, of women; and Paria Caca of men” (chap. 13, sec. 172). *Mama* ‘mother’ was a term of honorific address strictly parallel to *yaya* ‘father’. Certain priestesses held rank apparently equal to that of priests (chap. 13, sec. 178; chap. 31, sec. 417; see also Avila [1645] 1918: 65). Overall, the implicit suggestion seems to be that male and female fertility run through separate channels, which cross over each other in a braidlike pattern as each generation reproduces itself sexually. The female channel of fertility was fortified by a priestly religious structure, as was the male. The Huarochirí data seem compatible with—but do not declare the existence of—inheritance of some religious identity or obligation through parallel descent (Lambert [1977] 1980: 37; Silverblatt 1987: 20–39).

Ayllu: corporate landholding collectivity self-defined as ancestor-focused kindred

The tellers of the myths habitually described their society as built of collectivities called *ayllus*. In many passages the *ayllu* figures as the basic unit of ritual action:

... in the old days, people used to go to consult Paria Caca at night, taking along llamas or other things.

They used to go taking turns, *ayllu* by *ayllu*. (chap. 24, sec. 309)

A person’s immediate religious responsibility was to his or her *ayllu*’s senior members. When Lanti Chumpi discovered what she guessed might be a new *huaca* (perhaps a buried figurine or unusual stone), her first thought was to take the find to them (chap. 20, sec. 237). We know that each *ayllu* made its own claim to religious authority because each told its own version of certain myths (chap. 13, sec. 187).

But what was the makeup of the *ayllu*? The classic sources look unhelpful at first glance. The great lexicographer Diego González Holguín ([1608] 1952: 39–40) gives a definition of *ayllu* so broad as to include virtually all kinds of descent, kinship, and even territorial solidarity. Avila thought an *ayllu*

was something like the Spanish kin group defined by a shared surname (Arguedas and Duviols 1966: 257), which would suggest patrilineal bias.

Internal evidence from the manuscript, however, suggests something other than a corporate unilineal principle. Chapter 7 (sec. 91) says, "There is within this *ayllu* a patrilineage [*yumay*] which bears the name Chauincho." From this we infer, first, that *ayllu* is a separate concept from patrilineage, and second, that an *ayllu* could contain more than one patrilineage. *Ayllu* is therefore not the minimal or the only unit of descent ideology. However, the fact that the passage just cited goes on to speak of the Chauincho patrilineage as an *ayllu* (with a cross-ing-out eloquent of hesitation on someone's part) suggests that the term *ayllu* could subsume the concept of lineage. This makes it difficult to distinguish the two in certain instances.

We also know, because chapter 13 (sec. 187) implies as much, that a given territorial settlement (*llacta*; see below), which we usually gloss 'village', could have multiple *ayllus*: "in each village, and even *ayllu* by *ayllu*, people give different versions . . ." People understood the internal dynamics of their local communities as a play of more or less rival *ayllus*.

The tellers saw rights to land and other immovable assets as lodged in the *ayllus*: "As soon as Tutay Quiri's children had expelled those Yunca, they began to distribute among themselves, according to their own *ayllus*, the fields, the houses, and the *ayllu* designations" (chap. 24, sec. 316). This passage then tells us that even the invaders felt bound to redefine their own organization on the pattern of preexisting local *ayllus*, which suggests they had a high degree of corporate definition and legitimacy as well as important functions. Since it goes on to say the Yasapa *ayllu* people were silver-smiths, one may further speculate that some *ayllus* practiced, or at least were traditionally associated with, occupational specialties.

So it is relatively safe to think of the *ayllu* as a named, landholding collectivity, self-defined in kinship terms, including lineages but not globally defined as unilineal, and frequently forming part of a multi-*ayllu* settlement. But what exactly were the kinship criteria of inclusion? This question, an ancient mare's nest in Andean research, yields partly to Karen Spalding's exploration (1984: 28–30, 48–52; see also Castelli, Koth, and Mould de Pease 1981). González Holguín shows us that the most general sense of *ayllu* and its derived words is "that of grouping elements or persons together on the basis of similarity or species, or dividing up a larger

group on the basis of the same criteria" (Spalding 1984: 29). "Similarity or species" could mean taxa such as animal or plant species, but, when applied to people, *ayllu* usually meant "descendants of a common ancestor." "The term was commonly defined as any group—family, lineage, or generation—whose members were related to one another through their descent from a common ancestor" (Spalding 1984: 28–29), that is, an ancestor-focused bilateral kindred. Zuidema (1973: 16–21) has developed the argument toward a detailed model of ancestor classification and cultic organization.

Spalding's definition has useful corollaries. First, it reminds us that, like such spatial terms as *pacha*, *ayllu* is the name of a concept of relatedness and not of an entity with specific dimensions. It has no inherent limits of scale; in principle, it applies to all levels from sibling groups to huge kindreds, clanlike groups, or even whole ethnic groups defined by reference to common origin and territory. An *ayllu* can readily be understood as consisting of multiple patrilineages (or, in principle, matrilineages) insofar as any given member can trace descent from the "founder" or apex via a given child of the "founder" (and so forth, in potentially segmenting ramifications). Platt ([1978] 1986: 230–231) has clearly demonstrated a varied-scale usage among modern Bolivian highlanders, who reckon upward from the "minimal *ayllu*"—small clusters of patrilocal rural neighborhoods—up through "minor," "major," and finally "maximal" *ayllus* that ascend to include the entire ethnic group. The various levels of *ayllu* organization may each have specific terminologies, typically referring to their political functions. For example, in Platt's area, the "minimal" *ayllu* was called *cabildo* (civic council) in its political functioning, and Spalding (1984: 51) adduces a Spanish witness who understood the Inca decimal term *pachaca* ('hundred') to mean an *ayllu* of a hundred households or over, suitable by its size for treatment as an administrative entity in its own right. In the Huarochirí manuscript, the usage of *ayllu* terminology becomes less confusing if one recognizes that an *ayllu* may be part of a larger *ayllu*. In this sense, the "children of Paria Caca," the large (perhaps ethnic) group that forms the mythology's collective subject, a group of people "who all descend from one forefather" (pref., sec. 2), is a "maximal *ayllu*."

Second, as Spalding also emphasizes, for practical purposes it was not precise genealogy that finally decided who belonged to an *ayllu*, but rather social conduct—including political alliance—befitting a genealogically connected person. As with

many concepts in the domain of kinship, *ayllu* may be understood partly as an ideology built up to explain patterns of behavior rooted in the residence rules, which in turn often reflect the demands of a given geographical, technological, and demographic reality. Access to *ayllu*-held assets (and claims to collective *ayllu* ownership continued far into the colonial era) was given in return for exchanged labor and exchanged ritual participation on a kinship model. One can see in the myths of Concha *ayllu* (chap. 31, sec. 391) that genealogical connection alone was insufficient to bestow land on the two Concha lineages that had become politically disconnected. But adoption combined with political or marital alliance was seen as sufficient to create *ayllu* entitlements even when there was no genealogical tie (chap. 31, sec. 403). *Ayllu* was a political fact, and cultic practice lodged in it regulated practical matters of economy and power.

Llacta: 'village' as cultic and territorial unit

By the time the Huarochirí manuscript was written, colonial coercion had overhauled the relationships between people and territory. If the prehispanic Huarochirí region resembled those known elsewhere in the Peruvian Andes, each of its major settlements probably controlled "archipelagos" of mostly non-nucleated residence spread over the various productive tiers of the mountain slope and the coast. But by 1608 the parishes where Avila was working—for example, San Damián de Checa, focal point of the manuscript—no longer entirely followed this model. Villages like San Damián had been carved out in a scheme of forced resettlement (*reducción*) that Viceroy Francisco de Toledo had begun almost forty years earlier. When administrators herded Andean peasants into resettlement villages (Gade and Escobar 1982; Spalding 1984: 214–216) they fused together multiple Andean settlements—the ones called *llacta* in prehispanic usage—into a larger, more accessible, more governable and exploitable "Indian town" on a Spanish plan with plazas, churches, and streets laid out on a grid. Most of the places with Spanish (saint) names in the manuscript belong to this Toledan reordering of territory.

Why, then, did people keep orienting their religion around a map that no longer strictly fit the productive space of politics and economy? After the initial coercions of resettlement, from the 1580s on, older relations to the landscape partly reasserted themselves both in practice and in ideology. In practice, productive efficiency and the chance to

hide from tribute collectors enticed people back upward into the non-nucleated pastoral hamlets of the heights and downward into relatively hidden farming settlements in river canyons (Málaga 1974). Nor, in imagination, did the establishment of a Christian sacred geography centered on parish churches empty the landscape of non-Christian meaning. The Huarochirí storytellers c. 1600 saw all around them their parents' ruined "old settlements" (*pueblos viejos*, a common term in papers of the period) and their ancestors' stone "houses of the dead." The pre-resettlement scheme of territoriality, a mental map of social groups attached to place-deities and localized ancestors, still formed a complete and intelligible shadow-geography projected onto the landscape that colonial organizations had already reshaped *de facto*. Immense *huaca*-studded spaces of canyons and high tundra, fields and trails, embodied an Andean world view at least as cogently as the small, dense space inside the new churches figured Christianity. Since outdoor space was also the space of work and livelihood, the very cycles of herding and farming continuously retaught what Sunday sermons sought to erase.

The commonest term for the anciently defined settlement, *llacta*, is not the simple equivalent of 'town' or 'village', which denote a portion of territory or the legal corporation that governs it. A *llacta* in its old sense might be defined as a triple entity: the union of a localized *huaca* (often an ancestor-deity), with its territory and with the group of people whom the *huaca* favored. The word *llacta* could thus be used to mean the deity that was master of a settlement. In chapter 24 (sec. 325), where the original text says that the "*llactas*" divided up the llama herds among themselves, a marginal note clarifies that this means the "idols," that is, the *huacas* that defined the *llactas*, and our translation uses the latter sense.

The word *llactayuc* (glossed 'aborigine', 'native', or 'founder') therefore means something more complex than 'original resident'. It implies both being possessor of a local *huaca*'s sanctum and being possessed by it. When the heroes of the myths conquered lands and peoples, they also acquired local ritual obligations and even, it seems, grafted themselves into the genealogical categories reckoned from the *huaca*: "As we said in another chapter, this land was once all full of Yunca. As soon as Tutay Quiri's children had expelled those Yunca, they began to distribute among themselves, according to their own *ayllus*, the fields, the houses, and even the *ayllu* designations" (chap. 24, sec. 316).

The chain of human movements and transformations by which the Checa people explained their social organization emphasizes at every stage a pattern of *huacas* among whose territories human groups move and fight. *Huacas* might travel on the way to establishing their dwellings but once victorious they had—they *were*—their locales, and it was the deity-locale that gave wealth and identity to human groups. The Checa explained all changes, both prehispanic and recent, with reference to the geography and the relative fortunes of *huacas*. To the tellers, the explanation of society and its genesis was written out in the landscape—even where Spaniards had wrecked every visible monument or substituted crosses for *huacas*.

Even now *llacta* is essentially the name of a relationship, not of a type of settlement. Like *ayllu*, the term implies no particular scale. In modern Quechua one calls any unit from one's hamlet to one's country "my *llacta*." Since the word gives no suggestion of size, either demographic or spatial, the manuscript usually leaves us guessing as to whether a given *llacta* is a hamlet, village, town, city, region, or country. The answer will come, if at all, from archaeological work as yet undone. Most of the actions in the myths seem from context to concern agricultural villages, and in most cases we have glossed *llacta* as 'village'. But 'town', 'city', 'region', and 'country' are hardly out of the question. When one visits the immense ruined city of Cajamarquilla, within the space of the manuscript but predating it, one wonders if the mythic scene could not have been far more urban than generally imagined.

The original text

The Huarochirí manuscript is ff. 64r–114r of manuscript number 3169 of the Biblioteca Nacional, Madrid. The original lacks title, date, and author. It is the fourth item among six manuscripts about Andean religion, from Francisco de Avila's own collection, all bound together. Among these writings are whole texts and abstracts from some of the most important sources on the subject, such as the *Relación de las fábulas y ritos de los Incas* ([1575?] 1959) of Cristóbal de Molina "cuzqueño" and the original of Joan de Santa Cruz Pachacuti Yamqui Salcamaygua's partly Quechua *Relación de antigüedades deste reyno del Perú* ([1613] 1968) as well as works by Juan Polo de Ondegardo and Garcilaso Inca de la Vega. It also contains the manuscript of Francisco de Avila's *Tratado*, a translation, or more accurately a paraphrase with digressive commen-

tary, of the same material contained in chapters 1–7 of the Huarochirí manuscript.

The Huarochirí manuscript is written in an ordinary competent scribal handwriting. The chapter divisions and titles used here are from the original. But the original does not have a consistent system of paragraph divisions or sentence divisions: some sentence boundaries are ambiguous. Various pen strokes resembling parentheses, commas, and other small symbols occur in the text, but they do not seem to add up to a consistent system of punctuation. (Scribal papers of the period normally lack consistent punctuation.) The text is in a variety of Quechua with the exception of the Spanish chapter headings of chapters 1–6, some borrowed Spanish words, and some marginal queries and annotations, probably by Father Avila. Irregular pagination and handwriting size indicate that the manuscript may have been compiled in noncontinuous bursts of effort. The text comes "from the hand and pen of Thomás," according to a marginal note over half-way through the text (chap. 23, sec. 291), but we do not know anything about "Thomás" save that he seems (from his Quechua-influenced errors in Spanish) not to have been a native—or a particularly accomplished—Spanish speaker. Whether he was only an amanuensis or was also the compiler of the testimonies is unknown. Thomás' practiced handwriting suggests he may have been an *escribano de naturales* (bilingual scribe), village council scribe, or other native functionary of the colonial regime.

The date of the Huarochirí manuscript is debatable. Avila's *Tratado* partially paraphrases the manuscript, or a draft of it, and bears the date 1608, so the manuscript seems *prima facie* to predate the end of 1608. But by how much? In chapter 9 (sec. 133) a narrator tells us it is *cay pisi huatallarac*, which at first glance seems to mean 'scarcely a year', since Father Avila came onto the San Damián scene. Were that reading unambiguous, we could agree that the date must be 1598 because, as Duviols ascertained, Avila arrived in Huarochirí in 1597 (Arguedas and Duviols 1966: 235). But *cay pisi huatallarac* could also mean 'just a few years', admitting a later date. And as Antonio Acosta's important researches (1987a, 1987b), summarized in the next section, suggest, there are strong reasons to consider dates considerably later than 1598.

The possible genesis of the text in the local conjuncture

The common attribution of the manuscript to Father Francisco de Avila is erroneous, but he cer-

tainly was a key figure in the local conjuncture that forced the manuscript into being. The following paragraphs summarize recent research by the Spanish historian Antonio Acosta, whose archival inquiry (1987b: 551–616) brings the local crisis into clearer focus and suggests a more plausible genesis for the text than the self-serving version available from Avila's own testimony.

The pioneer of seventeenth-century anti-*huaca* persecution was born in Cuzco probably in 1573, the abandoned, perhaps illegitimate baby of an unknown couple. The Spanish couple who found him at their doorstep gave him the Spanish name Francisco de Avila Cabrera. Avila later, but dubiously, claimed he knew his ancestry to be noble; others claimed he was half-Indian, and to his misfortune this became the common opinion. Acosta (1987b: 557–558) finds reason to question it. If Avila thought himself mestizo, it would have been against his interest to say so given the racial impediment to ordination during his youth, so his silence on the point cannot be decisive. One witness in 1610 called him mestizo, without proof, and a 1641 witness thought he looked Indian (Acosta 1987b: 556–557, note; Spalding 1984: 253–254). But these accusations of mixed birth came after Avila had risen to prominence and could well have been falsehoods intended to sabotage his career. Such doubts leave room to question the common supposition that his vengeful attitude to Indian religion grew from the pain of mixed (therefore impure and stigmatized) birth or from resultant abandonment.

Avila showed talent in a Cuzco Jesuit school and went to Lima to study at San Marcos University in 1592. In 1596 he was ordained and in 1597 posted as curate to San Damián de Checa, one of the *reducción* parishes near Huarochirí. It was a plum appointment. Avila's Jesuit connections probably had much to do with his career there, for the Jesuits over twenty years earlier had pioneered what they recognized as an unusually rich mission field—one where Andean religion had already shown strong resistance to some forty years of intermittent Catholic intervention. One passage (chap. 20, secs. 244–247) sketches the fluctuating, but never extinguished, fortunes of the *huaca* priesthood through three generations of colonial leadership.

Even within normal limits of law, a curate like Avila had access to ample native labor. But, in addition, by the date of Avila's arrival it had become usual though illegal for priests serving Indian parishes to parlay their ecclesiastical holiday levies and salaries, combined with legal leverage over native nobles, into business enterprises large enough to rival the incomes of rural Peru's opulent semi-

feudal civil elite (Lavallé 1982). In time, it seems, this sort of practice led Avila into controversy. When he was a new curate, in 1598, an inspection praised his pastoral work. But a sign of conflict appeared in a 1600 "secret inspection and hearing" that turned up accusations of commercial abuses. Although he was officially cleared, the inspection reveals that like many rural clerics he had begun to make local enemies.

Four later inspections left Avila's record superficially restored. In 1607 Avila gathered testimonies on his "life and morals" to buttress his continuing appeal for a higher post. At the last minute, however, he met a fateful opposition: a faction of his native parishioners mounted an ecclesiastical lawsuit against him. Both colonial chieftains and commoners accused him, and their accusations were more numerous than in ordinary cases of this sort (frequent, to be sure, in the period). They accused him of absences from his parish (perhaps, Acosta suggests, he went to Lima in connection with his studies toward the doctorate; 1987b: 574), of charging excessive fees, and of exacting illegal labor levies. Like many other curates, he was said to collect huge amounts of native crops and sell them for private profit. Maybe natives tolerated this because priests of the Andean *huacas*, too, had enjoyed huge gifts of produce (Acosta 1987b: 576). But Avila may have gone too far in helping himself to his parishioners' labor, which he used to support his partly illegal business enterprises in gunpowder, charcoal, and textile manufacture and to build himself a house in Lima using beams he made his parishioners remove from the roofs of their pre-resettlement village. In a period of declining native population, curates' rising and increasingly arrogant expectations of cheap or unpaid labor acutely angered some natives. It was apparently Avila's project to open a new textile factory at native expense that finally provoked chiefs of the "thousand" of Chau-carima to litigate against him.

The Indians went beyond economic grievances to introduce a doubt about Avila's religious and moral regularity, alleging sexual abuses of various native women (some married) and the fathering of an illegitimate son. He even forced Indian women, "under physical threats, to suckle at their breasts the same puppies which . . . when grown, chased and killed the Indians' chickens" (Acosta 1987b: 574). He beat up villagers, including his sacristan, for not serving his desires zealously enough. Once at a christening he hurled the oil at his sacristan's chest. Accusers said he encouraged Indians to give their venerated ancestors silver (see chap. 21, sec. 262) and then himself collected some of it (Acosta 1987b: 572).

If true, this suggests that in the early days of his curacy Avila had no urgent scruples about a *modus vivendi* with "idolatrous" religion. Apparently co-existence entailed the curate's acquiring traditional privileges of *huaca* priests—access to women, labor donations, crop gifts—and, in return, tolerating (or even profiting from) worship of *huacas* on Catholic holidays (see chap. 7; chap. 9, sec. 125).

Avila spent some time in a church prison while charges were pending. But his emissaries pressed the natives to recant their accusations, and some did. The record of the trial contains a neat sheaf of the recantations, witness by witness, each with a cover sheet bearing Avila's elegant handwriting. One of Avila's allies in collecting these was the same Cristóbal Choque Casa whose visionary combats chapters 20 and 21 glorify, at that time an obscure son of native nobles. He prepared one of the recantations in Quechua (Taylor 1985: 180). In Acosta's judgment (1987b: 596), "It is believable that the narrative [i.e., the Huarochirí manuscript] could have been compiled at Avila's order in 1608, when his lawsuit with his Indians was in full swing, maybe on his emergence from prison and as a part of his reaction against the Indians who had accused him." Avila probably secured the testimony through one or more native cat's-paws who either interviewed anti-*huaca* natives or else secured the testimony of *huaca* believers by lulling them into unawareness of their testimonies' future utility. Cristóbal Choque Casa probably played a key role. It is hard to guess what parts fear, self-interest, and sincere conversion (Cristóbal's or others') played in the extraction of testimonies. Certainly intimidation played a part; for example, Avila made a point of interrogating Indians made vulnerable by frightening illnesses (Acosta 1987b: 600–601, 603). Although in later years Avila never mentioned the manuscript's existence, he probably did use it in hunting down *huacas*.

When the court responsible for the Indians' suit took depositions in San Damián, a decision only minimally damaging to Avila appeared likely. But instead of letting procedure take its course, he seized the offensive by asking the Ecclesiastical Chapter of Lima to authorize an inquiry into "idolatries" under canon law. Avila, according to his own much later testimony written in 1645 (1918), then led the ecclesiastical judges to the *huacas* Llacsay Huancupa (perhaps equivalent to Llocllay Huancupa, chaps. 20 and 21), Qqelccas Ccassu (probably *quillcas caxo* or 'Engraved Rod', chap. 24, sec. 320), and Maca Uisa (chaps. 18, 19, 23). In later testimonies Avila claimed his campaign had arisen only from disinterested zeal, but Acosta's research makes it

believable that the campaign was undertaken in revenge against the natives who had accused him of venality and immorality.

According to the 1645 testimony (Arguedas and Duviols 1966: 220), it was Cristóbal Choque Casa's revelation that the feast of the Assumption in Huarochirí for 1608 would be used to cover a rite of Paria Caca that provoked Avila to undertake massive anti-*huaca* campaigns. It is likely, of course, that in reality nothing new was being revealed. The only new element was Avila's urgent need for favorable publicity. Avila intensified his sleuthing in 1608 and procured public confessions of "idolatry" in a parish meeting that stirred and mobilized his pro-Christian allies. He asked the Jesuits for assistance in confessing a deluge of penitents and was sent two helpers. They pioneered the routine of breaking images, burning mummies, extracting public confessions, and punishing believers that was to become the periodic scourge of Lima archdiocese Indians until at least the 1660s. Avila was able to collect a great deal of stolen religious gear and forced testimony. By September 1609 he was amply ready to dictate his answer to the native accusations, laying the groundwork for a false autobiography that painted the accusations as a reaction to his anti-*huaca* zeal.

It was also during this crisis that Father Avila prepared the *Tratado*, that unfinished pamphlet retelling and commenting on the same myths that make up chapters 1 through 7 of the Huarochirí manuscript. The relation between the redaction of the Huarochirí manuscript and Avila's work on the 1608 *Tratado* has been debated between Hartmann (1981) and Taylor (1982, 1987b: 17–18). The former thinks it probable that Avila based his treatise on the manuscript, while the latter thinks that the two are separate workings of a prior source probably consisting of interview notes. In either case, it is likely that Avila intended the *Tratado* as a readable exposé designed to win Spanish support for his career. At the time of the *Tratado*'s composition Avila needed public support because the archbishop of Lima, Toribio Mogrovejo, had set policy against the aggressive persecutions that Avila favored.

But, luckily for him, an opponent of gradualist policy toward "backsliding" Indians and a bitter foe of *huaca* religion, Bartolomé Lobo Guerrero, succeeded to the Archbishopric of Lima in October 1609. According to Taylor (1987b: 18), Avila left continued compilation of anti-*huaca* intelligence to an Indian associate. Although he did read and annotate part of the product, the Huarochirí manuscript, he never fully edited it.

A bare ten days after Lobo Guerrero's accession,

Avila seized the moment to make his case behind the archbishop's closed Lima doors. Shortly afterward he staged a public propaganda spectacular. Avila had carted a load of *huacas* and mummies "800 years old" into Lima, perhaps the ones he tracked down thanks to the testimonies recorded in the manuscript. Amid immense pomp and publicity he directed a giant auto-da-fé in Lima's great cathedral square on December 20, 1609. Thousands of natives were forced to attend. A spectacle of music, Quechua sermons, and whipping of believers culminated in public sentencing. Among the victims was Hernando Paucar, the same ex-priest of Chaupi Namca and early denouncer of *huacas* whose confessions had opportunely helped Avila. Paucar was tied to a post, lashed two hundred strokes, and condemned to confinement among Jesuits in faraway Chile. Avila then burned the *huacas* and the ancestral mummies, to the inconsolable grief of those who felt themselves orphaned.

Four days later an ecclesiastical judge absolved Avila of all the accusations pending. Moreover, he was granted the title of "*visitador* [traveling judge] of idolatries."

These events marked the opening salvo of the "extirpation of idolatry" campaigns, in which Avila and his Jesuit allies developed standardized methods to destroy the partly clandestine forms of Andean religion that had grown out of the long confrontation with Christianity (Duviols 1972). Within a year of becoming *visitador*, he executed repressive campaigns in the main parishes that the Huarochirí manuscript mentions and collected, as he claimed, some 5,000 "idols." In 1611 he went with a Jesuit crew to climb the heights via Yampilla just outside Huarochirí (chap. 31, sec. 409). The climbers trekked for several days up what may have been the ancient pilgrimage route. After the ascent they followed a stairway hewn into the rock (Bonavia et al. 1984), up to what Avila believed to be the shrine of Paria Caca himself. They demolished everything they could. Then the extirpators "put in its place a cross and in the afternoon they returned to San Lorenzo de Quinti, where [local people] received him with illuminations, and the Indians said in their own language, 'Paria Caca has died'" (Duviols 1966: 224).

Avila continued to campaign widely and became an influential figure in the Jesuit-centered anti-indigenous movement that intermittently lashed the archbishopric for most of the seventeenth century. While legally separate from the Inquisition, and in some respects different from it, the "extirpations" were to inflict on Andean society some of the same sufferings, and the same clandestinity,

that the Inquisition visited on Iberian heterodoxy. Avila's track of destruction crossed the wanderings of the great native chronicler Felipe Guaman Poma de Ayala ([1615] 1980: 3: 1017, 1022–1023), who met some of his victims and, notwithstanding his own dislike of *huaca* religion, cursed Avila for his greed and mercilessness: "Oh what a fine doctor, where is your soul? What serpent is eating you?"

But if many of "the people called Indians" had reason to hate Avila, many of the Spanish, and not just his Jesuit allies, had cause to rejoice at his success. One reason was that *huaca* hunting appealed to clerics' and laymen's greed for treasure. Spanish law allowed confiscation of pagan deities' wealth, and the persecutory movement that Avila promoted opened a rich vein. Guaman Poma was among those who suspected that Avila's motives included the theft of precious objects belonging to *huaca* cults ([1615] 1980: 3: 1022–1023). The anti-Andean campaigns also offered career opportunities to Peru's numerous churchmen at a time when the church was hugely overstuffed relative to its parish infrastructure.

Avila built a long and prosperous career on these campaigns and was to win renown for his anti-*huaca* scholarship as well as for his militancy in missionizing. In 1611, at Archbishop Lobo Guerrero's request, he wrote a report on "idolatrous" domestic rituals and local deities. After a series of attacks on deities mentioned in the Huarochirí manuscript and in other places, in 1615 he wrote at the request of the new viceroy, Príncipe de Esquilache, a project on the means to achieve "real conversion." The next year he conducted a gigantic tour of repression affecting some 35,000 persons. He wrote extensively on ways to influence and intimidate *huaca* worshipers, emphasizing both intimate persuasion and institutional ways to confine those sorts of Indians (notably the sons of native nobles) thought prone to lead or protect clandestine worship.

In 1618 he won a mid-ranking post in the Archbishopric of La Plata (seated in Chuquisaca, now Sucre, Bolivia) and held the job for fourteen years. Why the church hierarchs decided to employ him in a place so far from his political base is unknown; nor is much known about his career there. In 1632 he returned to the Cathedral of Lima to serve the newly appointed archbishop, Hernando Arias de Ugarte, an old acquaintance, as a canon of the Lima Cathedral. He came to be known as a durable eminence of the church, popular among Spaniards for his charitable donations. Almost at the end of his life, he petitioned to enter the Jesuit order, but his alleged mestizo background was used to thwart him. When in 1641 Archbishop Pedro Villagómez

saw fit to remobilize the old persecutor as instructor for what was to become the second great wave of "extirpation," Avila seized the occasion to build his own monument as the "discoverer" of crypto-Andean heterodoxy. The self-portrait he painted in the 1645 preface to his *Tratado de los Evangelios* (Treatise on the Gospels) enduringly and, as Acosta shows, misleadingly influenced his historic image. The treatise reached the press in 1648, the year after his death. Its two volumes of Quechua and Spanish sermons, a little-known monument of literary Quechua's Baroque florescence, memorialize Avila's vision of a Counter-Reformation culture in Quechua.

Some twenty-three years after the making of the manuscript, Don Cristóbal still figured in a Concha lawsuit as a minor native official (Taylor 1983: 266, note; the date of Choque Casa's signature is 1631, not c. 1660 as Taylor holds). Certain of the *curacas* mentioned in the manuscript appear in tribute records and lawsuits both before and after the manuscript. In general the careers of Cristóbal Choque Casa and the other Indian makers of the Huarochirí manuscript remain obscure.

Among provincial religious sources the Huarochirí text has no peer, but it has many companions. Detailed testimonies about peasant and provincial belief appear, for example, in the "extirpation of idolatry" trials of which the Huarochirí crisis (chaps. 20–21) was a forerunner (Acosta 1987a; Duviols 1972, 1986; Millones 1967; Silverblatt 1987). Some of the Catholic priests who organized "extirpation" themselves wrote monographs on the Andean provincial religions and how to persecute them (Albornoz [1583?] 1984; Arriaga [1621] 1968; Avila [1608] 1966). Many missionary treatises and reports from the field reveal local cults and the memories of older practice in vivid detail (for example, Calancha [1638] 1974–1982; Hernández Príncipe [1613] 1919, [1622] 1923). After the waning of the "extirpation" campaigns, the record becomes thinner but still workable through, for example, trials of shamans implicated in political assassinations via magic (Dammert Bellido 1974, 1984; Millones 1984; Salomon 1983).

There may be room for doubt about some extirpators' personal sincerity, but little doubt that they played on widely believed ideological propositions. Local social conflicts like those of Huarochirí c. 1598 conspired with endemic conflicts arising from challenges to the Spanish state's commercial and religious hegemony to infuse in Jesuits and other anti-Andean militants a grim seriousness. Fear of "heresy" (meaning Protestantism and the

northern European powers beginning to rival Spain) and enduring hatred against Iberia's Muslim and Jewish cultures, long since driven into clandestinity, helped clerics persuade the state that the fight against Andean religion contributed to a decisive world-historical struggle. The papers born of this effort offer ethnographic evidence, but because of their heavy ideological freight must be read with caution.

Given these facts, one might expect to find the particulars of Andean religion, and eventually the very fact of Andean worship, distorted in the direction of familiar European fantasies of anti-Christianity: satanism, the black mass, and so forth. Such distortions did happen, especially at later dates and more urban locations than those of the Huarochirí manuscript (Silverblatt 1987: 159–196). Likewise, one might expect that missionaries would picture Peruvian *huacas* in the image of more familiar "gentile" deities or "idols"—for example, the *dei* of Greco-Roman antiquity. This also did occur (MacCormack 1985).

But to a surprising degree the testimonies of the victims retain freshness and unfamiliarity that give *prima facie* evidence of an origin other than Iberian demonology or the classical legacy as enshrined in seminary curricula. Perhaps because many of them were provincials lacking the know-how to package and process their culture in terms familiar to Spanish speakers, the myth-tellers in the Huarochirí manuscript created an image still largely framed by conceptual categories proper to local thought. The Huarochirí stories retain for us a certain irreducible strangeness, resistant to translation because, unlike the preprocessed Inca lore available in chronicles, they were seized by Spain but not made for it.

Previous editions of the Huarochirí manuscript

The following are the extant complete editions of the text. No attempt is made to cover excerpts, re-translations, or popularizations. (For critical discussion, see Hartmann 1975, 1981; Taylor 1982.)

- Adelaar, Willem F. H. 1988. *Het boek van Huarochirí: Mythen en riten van het oude Peru zoals opgetekend in de zestiende eeuw voor Francisco de Avila, bestrijder van afgoderij*. Amsterdam: Meulenhoff. Dutch translation (no Quechua) with introduction and glossary.
- Arguedas, José María (trans.) and Pierre Duviols (ed.). 1966. *Dioses y hombres de Huarochirí: Narración quechua recogida por Francisco de Avila [¿1598?]*.

Lima: Instituto Francés de Estudios Andinos/Instituto de Estudios Peruanos. [Republished 1975] México: Siglo XXI.

First full and published Spanish translation. Includes Quechua. Although less accurate than Taylor's translation of 1987, Arguedas' translation is esteemed for literary merit. Duviols' biobibliographical essay on Avila, questioned by Acosta, remains important for its pioneering historic inquiry and for its primary source appendices. These include Avila's *Tratado* and other papers relevant to Avila, such as extracts of important Huarochirí reports by mostly Jesuit observers. Mexican republication is incomplete.

Galante, Hipólito (ed. and trans.). 1942. *Francisco de Avila de priscorum Huaruchiriensium origine et institutis* . . . Madrid: Instituto Gonzalo Fernández de Oviedo.

Contains the thirty-one chapters but not the appendices. Introduction in Latin, facsimile, transcription, critical notes, glossary of hispanisms, Latin translation, Spanish retranslation by Ricardo Espinosa M.

Mejía Xesspe, Toribio [unpublished translation]

Toribio Mejía Xesspe, a bilingual scholar who worked closely with Julio C. Tello in the pioneering days of Peruvian prehistoric archaeology, left in his posthumous estate an as yet unpublished version of the thirty-one chapters of the Huarochirí manuscript. Prepared in 1941–1943, it includes a rephonologization, a Spanish translation attempting morpheme-by-morpheme correspondence, an incomplete "literal translation," and an incomplete "free translation" with pictorial sketches (Szemiński 1989).

Szemiński, Jan (ed. and trans.). 1985. *Bogowie i ludzie z Huarochirí*. Cracow/Warsaw: Wydawnictwo Literackie.

Polish translation with brief introduction and general glossary. The title means 'Gods and Men from Huarochirí'.

Taylor, Gerald (ed. and trans.). 1980. *Rites et traditions de Huarochirí: Manuscrit quechua du début du 17^e siècle*. Série Ethnolinguistique Amérindienne. Paris: Editions l'Harmattan.

Bilingual edition containing introduction, transcription with variorum notes, and French translation with interpretative notes providing original solutions to some dialectological and lexical problems. Interpretative glossary, bibliography, and supplementary notes follow.

Taylor, Gerald (ed. and trans.), with Antonio Acosta. 1987. *Ritos y tradiciones de Huarochirí del siglo XVII*. Historia Andina, no. 12. Lima: Instituto de Estudios Peruanos/Instituto Francés de Estudios Andinos. Bilingual edition containing interpretative introduction, transcription, "phonological reconstitution," Spanish translation, bibliography, several indices (to Quechua words in the translation, hispanisms in original, names of places and groups, names of huacas and heroes, names of rites, and names of historical personages). Copious critical, variorum, and interpretative

notes closely address dialectological, geographical, and lexical problems. The preferred study edition.

Trimborn, Hermann (ed. and trans.). 1939. *Francisco de Avila: Dämonen und Zauber im Inkareich*. Quellen und Forschungen zur Geschichte der Geographie und Völkerkunde, vol. 4. Leipzig: K. F. Koehler Verlag. [Republished with additional introduction and notes as] Hermann Trimborn and Antje Kelm (eds. and trans.). 1967. *Francisco de Avila. Quellenwerke zur Alten Geschichte Amerikas Aufgezeichnet in den Sprachen der Eingeborenen*, vol. 8. Berlin: Ibero-Amerikanisches Institut/Mann Verlag.

The earlier (1939) edition was the first publication of the original Quechua. Research for the 1939 edition was interrupted by the Spanish civil war, later bombing destroyed most copies. Contains preface, bibliography, introduction, transcription, German translation with notes, glossary, exegesis (1967), index of proper nouns. Hartmann (1975, 1981) judges that superior accuracy justifies the republication.

Urioste, George (ed. and trans.). 1983. *Hijos de Pariya Qaqa: La tradición oral de Waru Chiri (mitología, ritual, y costumbres)*. 2 vols. Foreign and Comparative Studies, Latin American Series, no. 6. Syracuse: Maxwell School of Citizenship and Public Affairs, Syracuse University.

Bilingual Quechua-Spanish edition: introduction, transcription with variorum notes and marginal material, translation with variorum and interpretative notes, indices (to proper nouns, Quechua words in the translation), bibliography.

An unreliable English version of Avila's *Tratado* by Clements R. Markham (Avila [1608] 1875) was the first modern edition of the Huarochirí mythology.

The character of the present translation

This book is a fresh working not based on any previous translation (including Urioste's 1983 Quechua-Spanish edition). Our study started from a newly made transcription from microfilm (reproduced here), collaboratively rendered into English by the co-authors. It is meant as a reader's edition rather than a study text. Scholars in need of a study edition should turn to Gerald Taylor's Quechua-Spanish version (1987b), which offers abundant apparatus as well as fuller contextual references. The 1966 Arguedas and Duviols edition also contains indispensable primary sources and bibliographic detail. The present version refers to other translations by way of mentioning some significant discrepancies, difficulties, or contextual findings but does not provide full coverage of alternative renderings.

We hope to address nonspecialists and have striven not only for accuracy but also for immediacy. We have intentionally left enough unresolved

strangeness on the surface to keep a reader aware that this text is untranslatable in all the usual senses, and perhaps a little more untranslatable than most.

Aside from the hazards intrinsic to all translations, Huarochirí readers face some specific ones.

Language substrates and non-Quechua languages

Oddly enough, it is not known exactly what relationship obtained between the Quechua of the manuscript and the language in which Huarochirí religious life was conducted. Many dialectological and linguistic questions about the manuscript remain pending.

Even the origin of the Quechua dialect used in the text itself is less than obvious. Its general affiliation is clear: it is one of the many and far-flung kinds of Quechua grouped as Quechua A or Quechua II. At least one member of this group spread widely through Andean America long before the Incas, and the Incas promoted a Quechua II dialect (probably not identical to Cuzco Quechua) as their administrative tongue. Perhaps working from this precedent, the Spanish invaders styled a widespread Quechua II (or perhaps several overlapping Quechua II dialects) the "general language" (Cerrón-Palmino 1985: 552–553; Taylor 1985: 158–160). In ecclesiastical councils especially, Spaniards promoted it for colonial use through efforts such as standardizing orthography and providing norms for translation and nontranslation of religious concepts.

"General" Quechua functioned c. 1600 as a *lingua franca* shared by many linguistically diverse peoples including Spaniards, among them clergymen who used it to simplify missionary work in a dialect landscape already reverting to pre-Inca diversity. Colonial native chiefs and others who traded on relationships with the Spanish also relied on it. On the whole, this church-influenced "general" Quechua is the language of the manuscript. The person who actually did the writing appears to have learned the art of Quechua writing for ecclesiastical purposes. But precisely because it was a partly artificial *lingua franca*—many speakers' second or third language and few if any speakers' first language—specific examples of "general" Quechua would normally be affected by underlying patterns of local speech. Linguists disagree on whether the text's peculiarities indicate an attempt to render speech similar to Cuzco Quechua (Urioste 1973: 4) or similar to the Quechua of modern Ayacucho (Hartmann 1981: 189). Mannheim (1991: 195) notes phonological reasons for questioning whether the

manuscript records any member of the group of south highland dialects to which both Cuzco and Ayacucho belong.

The question actually goes far beyond Quechua dialectology. There is room for doubt about whether any Quechua was the language of religious practice or of the original testimony. In Huarochirí the particular version of Quechua that functioned as a "general language" for such churchmen as Father Avila still, at the probable date of the manuscript, thinly overlay at least one non-Quechua Andean tongue. Twenty-two years before the manuscript, Diego Dávila Brizeño ([1586] 1965: 155) noted that the common folk did not all know Quechua. A 1577 Jesuit report tells us that missionaries needed to have Quechua sermons repeated in a local language "because the women there don't know the general language" (Arguedas and Duviols 1966: 245). Almost two centuries after the Huarochirí manuscript, another visitor observed that local use of the "general language" sounded peculiar and "mixed" (Taylor 1983: 270, 273). It is therefore highly likely that the religious life of the generation Avila persecuted had been conducted at least partly in a language other than Quechua.

So the text probably stands at some distance from habitual and traditional usages in religious speech. We do not have any specific proof that the texts were translated from a local tongue into Quechua, but the possibility cannot be discarded. At a minimum it seems likely that processing of local discourse by a person fluent in "general" Quechua played a role in creating the text.

The following are languages that appear to influence and in some cases to underlie the Quechua text.

Quechua other than the "general" dialect

"Thomás" the scribe (or persons dictating to him) probably knew at least one dialect of Quechua other than the one the church promoted as "general." It may have been influenced by an Aymara-like tongue (see below). It is also a possibility, though a difficult one to demonstrate, that local Quechua was influenced by a coastal speech proper to the Yunca people whom Huarochirí folk considered aboriginal; their language, too, may have been a Quechua different from the "general." Finally, some usages in the Quechua of "Thomás" (e.g., *chacuas* 'old lady'; chap. 21, sec. 261) are attested in Quechuas of the Quechua I or Quechua B group native to the central Peruvian highlands. Quechua I languages differ widely from the Quechua of the text, but other colonial examples of mutual influ-

ence are known. In some cases the writer has hesitated between words of the Quechua II or A group, as, for example, in the repeated crossings-out of *punchao* 'sun' and substitutions of another word for 'sun': *ynti*. The discrepancy may have to do with Inca versus non-Inca religious vocabulary.

Language(s) of the Jaqi (Aymara) family

The terms "Jaqi" and "Aru" denote a group of languages today represented most notably by Aymara, an important language spoken from the Lake Titicaca basin southward into Bolivia. Jaqi tongues share some lexicon with Quechua but are entirely separate languages. Although Quechuas have displaced Jaqi tongues from a large part of their formerly enormous range, certain Jaqi languages (Kawki and Jaqaru) were and to some degree still are spoken in two areas close to the Huarochirí terrain (Briggs 1985: 546). Both areas are in Yauyos Province, from which Huarochirí people were thought to have immigrated (chap. 23, sec. 297; chap. 24, secs. 305–309; chap. 31, secs. 391, 408, 443). Taylor has argued that some of the testimony may have been given in a Jaqi tongue, because Aymarisms are common in the ritual terminology (e.g., the names of the two greatest celebrations described, *Auquisna* and *Chaycasna*). He also notes that certain "Aymara-type" phonetic alternations (*ñamca/ñamoc*, etc.; Taylor 1985: 162) commonly occur in words connected with Huarochirí religion, suggesting Jaqi interference. These Jaqi-like phenomena offer the strongest clue for identifying the ethnic language of the myth-tellers. It is probable that at a minimum the text has been modified from a more Jaqi-influenced speech toward "general" Quechua.

Non-Quechua, non-Jaqi native lexicon?

A few common nouns and many names of persons and places do not seem to derive by any evident route from Quechua, Jaqi, or Spanish. There may be an additional influence from an unknown ethnic tongue, perhaps predating the supraethnic Jaqi and Quechua diffusions. Huallallo Caruíncho's name, the *hugi* monster he created, and the untranslated common nouns *calcallo* (chap. 31, secs. 413, 415) and *llaullaya* (chap. 21, sec. 271) may be examples. If so, the persistence of such words in both Quechua and Jaqi cultic vocabulary may eventually yield a clue to the antiquity of Huarochirí religious categories.

Spanish

Father Avila reported that most Huarochirí people knew at least some Spanish (Arguedas and Duviols 1966: 255). However, as Urioste notes, not all of the

many Spanish words that found their way into the manuscript are there for obvious reasons. Some words do lack Quechua equivalents and are therefore hardly surprising: *cauallo* 'horse', *yglecia* 'church'. Others overlap Quechua terms but "cover a different semantic space" (Urioste 1982: 106). For example, *animalcona* ('animals'; Spanish with a Quechua plural marker) combines categories of wild and domestic beasts that, in Quechua, are named with separate words. But a few do have close Quechua counterparts and are not used out of any obvious necessity: *doze año* 'twelve years' (in Quechua a plural numeral obviates the need for a pluralizing suffix on the head of the phrase, hence the singular form *año*), *gato montés* 'wildcat', and so forth, which have close and obvious Quechua equivalents. It is not known why the writer chose them.

Although the text was probably made as a tool for excising Andean belief from the religion of converts, it sometimes uses Christendom's lexicon to name Andean religious categories. All the seven occurrences of *saçerdote* and *saçerdotisa* (Spanish for 'priest'/'priestess'; chap. 13, secs. 178, 183; chap. 18, sec. 224; chap. 20, sec. 252; chap. 21, sec. 273; supp. I, secs. 462, 466) refer to priests of *huacas*. *Saçerdotisa* suggests an analogy from the Renaissance lore of Greco-Roman antiquity, but some usages are more markedly Christian: the preface (sec. 2) categorizes the regional belief system as a *fe* 'faith', implying that as a whole it is an entity comparable in scale and kind with the True Faith. Given the tellers' and writers' free use of specialized Andean religious terminology, they probably did not include these words for the convenience of Spanish readers. It is more likely that there already existed some habitual code of correspondences perhaps arising unconsciously from the habit of expressing Andean ideas in a fashion responsive to Christian hegemony.

Sometimes the influence of Spanish norms operates in a hidden fashion by affecting choice between Quechua words. This is especially notable in sexual lexicon, where the pro-Christian speaker substitutes shame-oriented and therefore Spanish-like phrases for plainspoken Quechua ones. For example, in chapter 10 (sec. 151), the word *ollonchicta* 'our cocks' has been crossed out in favor of *pincayninchicta* 'our private parts' or, more literally, 'our shame'.

The problem of redaction

An editing process has given the manuscript a veneer of organizational unity. But no one has yet subjected it to text criticism detailed enough to uncover the "seams" where testimonies have been

stitched together or to determine how many voices enter in. For the time being, this can only be recognized as an unknown requiring future study. It appears likely that the myth-tellers and retellers are multiple, probably from a minimum of three different places. Whether a separate translator beside the scribe and/or editor intervened is unknown. We neither know whether the interviewer used a written questionnaire (a common Spanish practice) nor whether the edited text as we find it was organized by a native researcher, by the scribe Thomás himself, or by someone employing native informants (Avila?).

It is highly likely that chapters 1–31 are rewritten and edited text, because they are fair copy (standardized at thirty-six lines per page) already augmented with contextual material, especially at beginnings and ends of chapters (Urioste 1973: 7–10). These chapters, however, appear to be an intermediate draft because editorial work continues in the form of interlinear and marginal comments and corrections (some seemingly in Avila's hand). Supplements I and II differ in grammar from the body of the manuscript, are written in a less polished handwriting, and come after a word meaning 'the end'. They may be surviving fragments of less-processed testimony. Or they may be a set of rough notes prepared by the editor/redactor on the basis of personal knowledge, apart from the compiled testimonies.

The problem of validation

One property of the text that may yield clues about the editing process if closely studied is the problem of validation. Quechua, like many American languages, requires the speaker to attach suffixes that clarify his or her relationship to the data conveyed. When conveying data learned from personal experience, the speaker uses the witness validator *-mi* (alternatively *-m*, *-n*), which implies that the content of the sentence or (sometimes) larger speech unit is something learned through direct sense experience. When passing on data learned secondhand—for example, an account heard from somebody else—the speaker will switch to the reportive (sometimes called "hearsay") validator *-si* (alternatively *-s*). We suspect that predominant reportive validation may reflect the intervention of a *re*-teller, perhaps a translator, but when speaking of legendary events, original informants might well have used it, too. When speculating without evidence, or when uncertain, the speaker employs the conjectural validator *-cha*.

There are two types of passage in the manuscript in which witness validation predominates. One is the contextual remarks and interpolated comments that appear to be supplied by someone other than the myth-telling informants, probably the editor/redactor. Sentences with *-mi* often introduce or end a chapter, stating with witness validation the relation of a *huaca* or ritual to a narrative or geographic context. Witness validation is normal in chapter titles. The preface has predominant *-mi*. Also, at least one contributor often uses *-mi* witness validation to report apparently contemporary local circumstances, as opposed to mythic or ancient events. For example, a mythic place name will be identified with a modern landmark using *-mi*. Accusations that local people are secretly carrying on some of the rites that the myths explain carry *-mi*: for example, *ynatacmi musiasca tucoy ynantin llactacunapipas rurancu* 'those who are privy to these customs do the same in all the villages' (chap. 9, sec. 133). The other passages in which *-mi* witness validation predominates are the two supplements, which appear to be rough notes. Perhaps their witness validation is related to their focus on contemporary ceremonies (and not ancient rites or myths of the past), which the writer or informant might have seen. Or perhaps, if they are transcriptions of unprocessed testimony, the validation is the original informant's own.

In the remainder of the text (the great majority of it), which consists of mythic narratives and descriptions of rites and rules of the past, reportive *-si* validation predominates. It is the usual validation of narrative passages: *cay chaupi ñamca sutiocsi huc runa anchi cochapi apo tamta ñamca sutiocpac churin carcan* 'the one called Chaupi Ñamca was the daughter of a man in Anchi Cocha, a lord named Tamta Ñamca' (chap. 10, sec. 142). Because it contains *-si*, this sentence could be rephrased 'Chaupi Ñamca was, they say, the daughter of . . .' Such locutions might be expected of any person telling a myth with a slight authorial distance. But *-si* could also come from a translator or reporter paraphrasing or repeating, without necessarily endorsing, an informant's words. A rendition using that assumption would be 'Chaupi Ñamca was, (s)he says, the daughter of . . .' These rephrasings are overtranslations insofar as the original does not contain the verb 'say' or imply anything one way or the other about who does the saying.

The exceptions to predominant *-si* reportive validation in narrative passages occur mostly in dialogue, where the characters speak what is putatively their own experience, and also in utterances

that are not dialogue but performative speech (i.e., speech that actually changes the world rather than telling something about it): *camca vinaymi causanque tucuy hinantin sallcacunamanta huañuptinca huanacuctapas viconactapas yma ayca cactapas camllam micunque chaymanta camta pillapas huañoichi sonque chayca paipas huañuncatacmi ñispas ñircan* 'You'll live a long life. You alone will eat any dead animal from the wild mountain slopes, both guanacos and vicuñas, of any kind and in any number. And if anybody should kill you, he'll die himself, too' (chap. 2, sec. 19).

There are passages and even whole chapters (e.g., chap. 9) in which it appears that the editor/redactor validates substantive content (as opposed to expository asides) with *-mi*, as if telling what he had seen with his own eyes. These passages tend to be descriptions of ritual, typically set in explicitly colonial context. A good example is the explanation of how Chaupi Ñamca's ritual dances were scheduled into a purportedly Catholic calendar (chap. 10, secs. 148–151). The authorial voice claims witness knowledge of incriminating facts, but coyly slips into reportive where naked dancing is concerned.

There are also passages in which significant mythic material is witness-validated. The crucial passage in chapter 9 (secs. 112–116) where Paria Caca lays down the fundamental rule of his cult is one. This validation may relate to the convictions expressed in the preface, which credits the narrative tradition with evidential worth comparable to that of Spanish writing. It is difficult, however, finally to decide whether such validation indicates belief in the factuality of the Paria Caca myth (on a witness's part or on the editor/redactor's part?) or only signals that some passages, the parts in the editor/redactor's own words, contain a true rendering of a story that may or may not finally be true.

Validation presents frustrating problems for translation, because nothing in English has rhetorical force similar to it. Added phrases like 'It's a fact that' (*-mi*), 'It's said that' (*-si*), or 'It could be that' (*-cha*) do convey validators' informational function, but at such expense to narrative quality as to falsify the text (by making it sound hesitant and colorless) more than they clarify it. We have availed ourselves of the regularities already noted in order to establish norms that minimize encumbrances on the text, while also alerting readers to each significant validation shift. (Some particulars of validation completely escape translation or are difficult to interpret, such as the many instances of a witness-validated discourse marker introducing a reportively validated sentence.) The redactor/editor's

stage-managing contributions routinely have witness validation, so the reader may assume its presence in sentences that are obviously editorial, even if they lack explicitly translated validation, unless an overtranslated phrase such as 'it's said that', 'they say', or 'reportedly' suggests otherwise. Such passages occur at the beginnings and ends of chapters. Mid-chapter editorial asides such as 'we told this story in the fifth chapter' (chap. 10, sec. 142) also routinely carry witness validation. In the chapter titles, too, readers should assume *-mi* witness validation. At mid-chapter validation shifts, notes signal how far the new validation extends. The two supplements are exceptions to these rules. In them the reader can assume witness validation throughout unless reportive validation is explicitly indicated.

Following such curtain-raising editorial formulas as 'the story goes like this' validation regularly shifts to reportive. 'In ancient times' and similar formulas also herald reportive passages. Generally, in the narrative passages of chapters 1–31, except in direct quotations, *-si* reportive validation may be assumed unless a phrase such as 'it's a fact that', 'in fact', or 'as we know' suggests otherwise. In direct quotations and performative utterances within the narratives, *-mi* can normally be assumed and is not specially marked. Readers interested in explicitly translated validation should look at Taylor's 1987b Spanish version, which translates validation more fully than we do (though still less than universally).

Translation of style

Validation is not the only respect in which the manuscript varies somewhat in tone and "feel" from passage to passage. Despite the likelihood that coerced elicitation, editing, and translation (or at least "correction" away from a local dialect of Quechua) put us at considerable distance from the myths' oral embodiment, and despite the probability that some of the testimony's oral qualities have been blurred as a result, nonetheless there do seem to be identifiable variations of oral-derived styles within the manuscript. We have tried to suggest them in the translation, giving the more bookish and editorial sentences a slightly different sound from utterances that probably replicate storytelling, ritual speech, and maybe even verse or song.

Framing sentences

An editorial voice intervenes particularly at the beginnings and ends of chapters as a stage manager of

testimonies: 'we have already told', 'now we shall tell', and so forth. In the translation we have sought to make this "framing" verbiage easily recognizable by its semiformal and faintly pompous diction. Perhaps the person who composed the framing sentences is the same one who occasionally obtrudes with politically opportune comments:

... no matter how people behave, neither the *alcalde* nor anybody else would ever try to stop them by asking, "Why do you do these things?"

On the contrary, they dance and drink right along with them until they get drunk. And as for the Catholic priest, they fool him, saying, "Padre, I'm back from cleaning the canal, so I'm going to dance, I'm going to drink."

As far as that goes, all the people do the same thing.

True, some don't do it anymore because they have a good padre.

But others go on living like this in secret up to the present. (chap. 7, sec. 95)

One possible source of such language is Cristóbal Choque Casa, Avila's political ally, who glorifies his own struggle against the *huacas* in chapters 20 and 21. The same voice or pen may well be the source of the many passages that tell about non-Christian rites surviving clandestinely at the time of writing.

Narrative passages

The bulk of the chapters consists of myths and descriptions of past ritual practice. Often the "framer" alerts us to the shift to mythic discourse and the recalling of past practices with a formula such as *chay simire caymi* 'that story goes like this'. On the whole what follows is vivid and powerful narration, with *-si* reportive or "hearsay" validation predominating.

It is hardly accidental that translators differ on how "oral" or how "bookish" the manuscript is. Adelaar called his Dutch translation (1988) *Het boek van Huarochirí*. Our introduction also emphasizes the likelihood that its redaction was influenced by a European concept of the book and that the redactor thought of myth as material for the making of history books. On the other hand, Urioste gave his 1983 Spanish version a subtitle meaning 'The oral tradition of Huarochirí', and Taylor says that the manuscript "preserves the spontaneous composition of its oral informants" (1987b: 9). Arguedas, sensitive to both qualities, described it as "the voice of antiquity transmitted . . . through the mouths of common people," yet also called it "a little regional bible" (Arguedas and Duviols 1966: 9–10).

Taken separately, both the oral and the bookish emphases can easily turn into distortions that obscure the text's peculiar qualities. We see the intersection of orality and literacy as essential. Rather than filtering out bookish traits the better to approximate oral sources, we seek to capture a form of literacy in the act of engulfing one or more oral genres. This approach has the advantage of faithfulness to the manuscript's historic function. But it entails technical problems.

Something would be lost by simply leaving the translated text in solid blocks of page-filling prose like those of the scribal page. It would be a sacrifice of authenticity not to make at least some use of Dennis Tedlock's ([1971] 1983) and Dell Hymes' ([1977] 1981) demonstrations of how internal evidence helps the translator restore qualities of spoken performance to transcriptions that bury performance rules in prose conventions, because some qualities of oral genre do shine through the editorial veils.

It might even be feasible to produce a fully ethnopoetic rendering of at least some Huarochirí texts (that is, one whose goal is to restore oral organization, with versification, by detecting written correlates of pauses, turns, etc.). We have not followed this method entirely, because, for reasons already mentioned, we doubt our ability to create a hypothetical likeness of the performances from which the manuscript was compiled (or, more likely, recompiled from earlier notes). Also, to make explicit the features that warrant line and stanza breaks (etc.) requires putting into the English text many particles that impede fluent reading of narrative content. Finally, it may be that some of the pauses marked with *chaymanta* 'and next' and the like do not reflect local norms of oral performance but rather are effects of making the speaker (translator?) wait for the scribe to catch up.

Though inhibited by these caveats, we have sought to indicate, partially and tentatively, some performance qualities of the Huarochirí material detectable within the bookish frame that is also part of its substance. Like most Native American narrative texts, the Huarochirí manuscript is spotted with innumerable "empty" words or discourse markers, especially at the beginnings of sentences, that add no literal content to the flow of action. Common ones include, for example, *chaymanta* 'and next' or 'after that', *chaysi* 'so' (with reportive validation), and *chaymi* 'so' (with witness validation). Translating these words directly gives an effect the very opposite of oral. It makes the text sound hesitant and finicky, disrupted. But they are,

of course, not "empty" in spoken performance; they serve to separate utterances in a patterned way, imparting a quality of measure and helping the listener keep pace. We believe they served this function in the oral performances that the manuscript partly mimics and have tried to convey as much. Some words that we read this way are sentence-initial *cay* 'this'/'chay' 'that'; *ychaca* 'however'; *yna*, *ynaspa*, and other derivatives of *yna* 'thus'; *ña* and *ñatac* 'already', 'then', 'so', 'again'; *huc* . . . *huc* and *huaquin* . . . *huaquin* 'some . . . others'. Certain other touches, such as emphasized changes of topic or words indicating change of time or setting, also are taken as signaling a new "turn." Many sentences begin with clauses whose informational contribution is minimal (*chay yna captinsi* 'while it was like that') but which similarly seem to serve a function of measure or pace, introducing a new burst of the storyteller's speech.

Our objective is a compromise, an attempt to make a likeness of the manuscript that suggests its "feel" as a manuscript: that is, a prose presentation following norms of book organization, which for long stretches subsumes oral performances without strictly transcribing them. Stopping short of an attempt to reconstruct the oral performances that the writers heard, but also stopping short of an undivided prose that would silence their clearly audible echo, we have chosen to render the above-mentioned discourse markers and other devices of measure into prose divisions that somewhat suggest the quality of turn or strophe, namely, short indented paragraphs. (The section numbers alongside them are only meant as aids to correlating with the transcription.)

Another "oral" characteristic of the Huarochirí manuscript is heavy reliance on direct quotation and dialogue. Quechua *ñispa* . . . *ñin* 'saying . . . (s)he said' delimits quotations, but instead of translating the formula we have simply used 'said' and quotation marks (unlike Taylor 1987b, who often favors indirect quotation). Because the Quechua verb *ñiy* can mean 'to think' or 'to intend' as well as 'to say', some direct quotations are rendered as quotations of thought: *ñocaracpas ñaupac umanman chayaiman ñispa* 'thinking, "I mean to get to the summit first!"' (chap. 9, sec. 120).

In order to clarify the dialogue structure of many passages, we have placed each turn of quoted speech in a separate indented paragraph, even when the original quotes more than one speaker within a single sentence. Most Huarochirí dialogue (and narration) sounds lifelike and colloquial, and to convey this quality we freely use English contractions ('isn't',

etc.). In some cases, a quotation contains several sentences that sound like simultaneous comments on the same point, and in these cases we have interpreted the effect as a chorus of comments:

Then they derided Quita Pariasca with spiteful words:
"That smelly mountain man, what could he know?"

"Our father Paria Caca has subjects as far away as the limits of the land called Chinchay Suyu. Could such a power ever fall desolate?"

"What does a guy like that know?" (chap. 18, sec. 223)

Question marks in the translation securely reflect Quechua grammar, but exclamation points are supplied. Parentheses are also supplied.

Versified speech in semantic couplets

A few passages clearly employ the Andean oral device called "semantic coupling" or "thought rhyme" (Mannheim 1985), and we have rendered them as couplets. They appear inset in the translation. The semantic couplet is a pair of sentences that express closely related ideas phrased in related (sometimes syntactically parallel) fashion. Semantic coupling is common in modern Andean folk poetry and song, as in many of the world's oral traditions. Huarochirí examples include:

We go in Tutay Quiri's steps,
We go in the path of his power. (chap. 11, sec. 158)

Tell me, I beg: what have I done to make them ill?
For what fault of mine do I live in suffering? (chap. 13, sec. 179)

Semantic coupling typically occurs in invocations to, or sayings of, sacred beings—*huacas* themselves, legendary ancestors, priests and oracles delivering responses, or Christian deities. Cristóbal Choque Casa's moving prayer to the Virgin Mary (chap. 20, secs. 254–255) consists largely of couplets. It might be an example of those "devout and elegant" religious songs that Jesuits in Huarochirí heard "idolatry" defendants sing in their cells at night c. 1620 (Arguedas and Duviols 1966: 259–260). Much earlier witnesses, the Jesuits who conducted the path-breaking mission of 1571, found out that such songs were reworkings of prehispanic hymns: "The same [hymns of praise] which in former times they used to give to the sun and to their king, they have converted into praise of Jesus Christ by taking material from what they heard preached" (Arguedas and Duviols 1966: 243). Some couplets are brief ritual

formulas rather than hymns and a few might be humbler bits of folk song or familiar sayings.

Margot Beyersdorff (1986: 219) comments that in the Huarochirí manuscript "intercalated fragments of sacred verse . . . follow the same norms of versification as the 'prayers' of [Cristóbal de] Molina ["cuzqueño"] and [Felipe Guaman] Puma de Ayala, and can be included in the genre *wayllina*." She does not identify the fragments. Beyersdorff infers from Molina that *wayllina* denominated a specific verse form unique to sacred speech. Husson (1985: 330–331), on the contrary, emphasizes Guaman Poma's couplets' affinities to popular and profane song.

Other translation conventions

In addition to translation problems arising from idiosyncrasies of the Huarochirí text, the translation reflects some decisions that face anyone working from Quechua. Readers who want to avoid spurious accuracy in using the translation should take note of them.

This book does not aspire to morpheme-by-morpheme translation, for several reasons. Rendering an agglutinative language morpheme-by-morpheme (to the degree that it is possible at all) yields verbose, obscure formulations. The following example of a translation process uses the slash (/) to signal morpheme boundaries and suggests the sort of problems that occur within a single random and typical clause. The original is *ña chori/n/cuna/pas collo/pti/n/rac/si* . . . Analyzed using Urioste's (1973) terminology, this clause consists of three roots (italicized), each with additional morphemes: *already child* / (3d person) / (plural) / (additive) *perish* / (contrastive adverbial) / (third person) / (continuative) / (reportive validator) . . . This could be rendered, forcing a morpheme-by-morpheme translation, as: *already child* / his / (plural) / even *perish* / (verb with different subject to follow) / they / first / it's said . . . To make intelligible English one must drop a morpheme (*-pti*) that has and needs no English analogue and make choices whether to translate *-pas*, *-raq*, and *-si* explicitly. We chose not to translate most *-si* reportive validators, and the remaining content can be made clear by implication in a simple English form: 'When his children had already perished . . . ' (chap. 19, sec. 233; the referent of 'his' is supplied in the body of the translation).

Our translation generally preserves sentence boundaries, but in some cases the original sentences contain chains of subordinate clauses so long that a single-sentence translation (without Quechua's devices for clarifying switches of sub-

ject) comes out congested. In these cases sentences have been divided. Sometimes the order of clauses has been altered. The order of sentences has not been altered. Where sentence boundaries are significantly uncertain, notes indicate the alternate readings. Where the grammatical subject of a sentence is unstated but unambiguous in the original, an explicit subject has been supplied in English. In cases of ambiguity, we tried for English translations with a similar ambiguity. Where this was not achieved, notes indicate the nature of the ambiguity.

Aside from unique cases, there are generally common sources of ambiguity (as the English reader sees it) in regard to gender, number, and time. Quechua does not have grammatical male-female gender and in some cases the sex of a named person is unclear (for example, the master weaver mentioned in chap. 1, sec. 8). Also, because singular forms may be used to mean plural, Quechua nouns are sometimes indefinite as to singular and plural. Finally, the tense in Quechua that most resembles English present sometimes refers to a (usually recent) past, making certain sentences ambiguous as to whether they describe current reality. Such cases are noted where they cause significant doubt about the meaning of a passage.

A given root, especially a verb root, is not always translated by the same English word because the root with its varied suffixes often gives a net sense that varies from the root sense by a distance that only a different English word can render. In the following example the common verb root *yalli-* ('to exceed, surpass') yields English 'to compete' when coupled with the suffix *-naco-* (denoting reciprocal action) but English 'to win' when not modified: *po-macta aparispa yallinacoson* 'Let's compete in putting on puma skins' (chap. 5, sec. 64); *pomancunacta aparispa yallita munarcan* '[he] wanted to win by wearing the puma skins he had' (chap. 5, sec. 64). However, in passages where repetition appears to be an element of rhetoric or measure, as, for example, with the four-times repeated *canan-cama* 'until now' in the preface, the translation mimics the repetition.

The numbers given in the margin are added by the translators. Numbered sections are there only to help readers compare the original and the transcription and to facilitate index references and cross-references. They do not define a unit intrinsic to the method of composition.

The translation does not show the small pen strokes and marks (symbols?) scattered in the original manuscript. The punctuation is added. In addition to sentence-, quotation-, and clause-delimiting punctuation, we have added:

() Parentheses to signal apparently parenthetical remarks in the original text.

(This spring flowed from a large mountain that rises above San Lorenzo village.

This mountain is called Suna Caca today.)

At that time, they say, it was just a big lake. (chap. 6, sec. 81)

[] Square brackets to signal marginal or crossed-out material on manuscript pages.

< > Angle brackets to identify translators' words referring to marginal or crossed-out material.

<margin, in Quechua:> [Pariá Caca crossed over to the village of the Cupara.] (chap. 6, sec. 80)

We have translated crossed-out material (words or phrases) that adds substantively to the text, but not crossings-out that only change a spelling or crossed-out single morphemes or letters. All these details are reproduced in Taylor's (1987b) study edition.

Note conventions

Unless otherwise noted, English versions of quotes from non-English sources in notes and in this introduction are by Salomon. Sources cited in notes appear in the general bibliography. Notes provide context sufficient only for novice readers and do not contain full comparisons with other translations or exhaustive references to literature.

Transcription conventions

The transcription strives for the nearest simulation of the original page's qualities compatible with easy comparison to the translation.

The page breaks, signaled with *foja* or folio notations *R* for recto and *V* for verso, are those of the original.

In the transcription the following conventions are used:

Uppercase letters stand for large letters in the original. The original does not use uppercase (rare in scribal papers) but does use large lowercase letters in headings.

[] Square brackets contain the section numbers for keying passages to corresponding parts of the translation.

< > Angle brackets identify crossed-out material in the original.

() Parentheses identify the expansion of abbreviations. For example, the original's *capio* is rendered *capi(tul)o*.

Toponymic and onomastic spelling conventions

It is important to note that in the translation (not the transcription) we have standardized the names of persons, places, and *huacas* so that each has (as nearly as possible) only one name in English context, regardless of the often considerable variations in the original. (Exceptions are cross-referenced in the index.) When the original spelling varies, it is standardized in the translation according to the following rules:

First: If a proper noun appears only once in the manuscript, or if all occurrences are spelled the same way, we have retained the original spelling.

Second: If a proper noun has multiple spellings in the manuscript, we have chosen one of these and maintained it throughout the translation and index. The criteria for choosing the form are:

1. For words ending alternately in *o* or *u*, we selected the *u* ending.
2. Wherever *i*, *e*, and *y* vary, *i* was selected.
3. Wherever *s*, *ss*, *x*, and *ç* vary, *s* was preferred. The manuscript's apparent sound system does not preclude reading *x* as a palatalized fricative different from *s*, nor does it conclusively prove this to be correct.
4. Wherever *n* and *m* alternate in final position, *n* was selected.
5. Wherever *ai* and *ay* alternate, *ay* was selected.
6. Wherever *hua*, *gua*, and *ua* alternate, *hua* was selected.
7. Wherever *quia* and *quio* alternate with *cya* and *cyo*, the latter spellings were selected.

Some place names as standardized are different from their nearest modern equivalents (identified in notes at the toponym's first occurrence). For example, the modern place is written *Huarocharí* but the manuscript uses *guaro cheri* and *huaro cheri*. We use the latter in the translation. Such standardizations from the text, not modern toponyms, appear on the map.

In Spanish names (Thomás, Luzía, etc.) we have

conserved the manuscript's spelling and added the acute accents corresponding to their modern forms.

A caution: standardizing is intended to minimize the novice reader's problem in keeping track of the *dramatis personae* and to make the index simpler. But it sacrifices data important to the analysis of the original text's sound system, to its dialectology, and to source criticism. Students who need such data are urged to use the transcription.

In the transcription and translation, we have followed a common Quechua structure of proper names by treating them as two-word phrases (Paria Caca, Huatya Curi, etc.). Large onomastic corpuses such as the 1588 *revisita* of Sisicaya clearly show that Huarochirí names are binomial, whether or not a space separates the elements (Archivo General de la Nación, Buenos Aires, ms. 13-17-5-1). Applying this norm involves some interpretation because word boundaries in the original are sometimes inconsistent or unclear. By normal Quechua syntax rules, the first word would express an attribute applying to the second; some names can be interpreted using this rule (e.g., Sullca Yllapa 'Last-born Lightning'; chap. 8, sec. 108; chap. 16, sec. 202). Indeed, Huarochirí onomastics remains problematic in general; uncertainty about whether all the names are binomial is only one of many ob-

stacles preventing general translation of proper nouns. A few name meanings are nonetheless clear enough and important enough to warrant bringing them into the translation (e.g., Pacha Camac Pacha Cuyuchic 'World Maker and World Shaker').

Index and glossary

The index gives numbered section (not page) references to both proper nouns and topics and themes, classifying many specific items under rubrics common to anthropology (e.g., for material on sibling relationships, look under "kinship"; for the symbolic value of red, see "color"). The references are to the translation, not to the Quechua original. An instance of a proper name supplied in the translation will be indexed even if only a pronoun or an unambiguous implied reference is present in the original. Personal names are alphabetized according to the first term of the native name. For example, *Diego Chauca Huaman* is alphabetized under *Chauca*. The glossary of untranslated words lists all the terms that appear italicized in the translation, giving simple glosses and numbered section references to all their occurrences. Material in notes is not indexed.

Florentine Codex

Historia general de las cosas de nueva España (General history of the things of New Spain) is an encyclopedic work about the people and culture of central Mexico compiled by Fray Bernardino de Sahagún (1499–1590), a Franciscan missionary who arrived in Mexico in 1529, eight years after completion of the Spanish conquest by Hernan Cortés. Commonly called the *Florentine Codex*, the manuscript came into the possession of the Medici no later than 1588 and is now in the Medicea Laurenziana Library in Florence. Sahagún began conducting research into indigenous cultures in the 1540s, using a methodology that scholars consider to be a precursor to modern anthropological field technique. His motives were primarily religious: he believed that to convert the natives to Christianity and eradicate their devotion to false gods, it was necessary to understand those gods and the hold they had on the Aztec people. Sahagún was repelled by much of native culture, but he also came to admire many qualities of the Aztecs. As he wrote in the prologue to Book I of his work, the Mexicans “are held to be barbarians and of very little worth; in truth, however, in matters of culture and refinement, they are a step ahead of other nations that presume to be quite politic.” Sahagún gained the assistance of two important indigenous groups: the elders of a number of towns in central Mexico (*principales*) and Nahua students and former students at the College of Santa Cruz in Tlatelolco, where Sahagún worked for much of his time in Mexico. The *principales* answered questionnaires prepared by Sahagún about their culture and religion, and their responses were recorded in their own pictorial form of writing. The Nahua students interpreted the images and expanded the answers, phonetically transcribing Nahuatl using Latin letters. Sahagún then reviewed the Nahuatl text and added his own Spanish translation. The whole process took almost 30 years and finally was completed in 1575–77, when Sahagún had a new and complete copy of the manuscript prepared. It then was taken to Spain by Fray Rodrigo de Sequera, commissary general of the Franciscans and a supporter of Sahagún’s work. The 12 books of the codex originally were bound in four volumes but later rebound into three. The work is arranged in two columns: on the right is the original Nahuatl text, on the left is Sahagún’s Spanish translation. The 2,468 magnificent illustrations, made by the students, are mostly in the left-hand column, where the text is shorter. The illustrations combine the syntactic and symbolic traits of the ancient Nahua tradition of painting-writing with the formal qualities of European Renaissance painting.

MASONIC AND OCCULT SYMBOLS ILLUSTRATED

1.

WHAT IS A SYMBOL?

What is a symbol? Webster tells us that a symbol is “something that stands for or suggests something else by reason of relationship, association, convention, or accidental resemblance; *esp.*: a visible sign of something invisible.” [Emphasis mine throughout] This is important to know because when we see a symbol we now know that there is a meaning BEHIND what is actually being shown since a symbol is “a visible sign of something invisible.” A related word, symbolism, is “the use of conventional or traditional signs in the representation of DIVINE BEINGS AND SPIRITS.” This, too, is important because many of these symbols also represent gods and goddesses.

Since this book will be covering many occultic and Masonic symbols, a few quotes from Masons about symbols would be in order. Masonic author, George H. Steinmetz, shares the following: “The symbols are *not* used in the commonly accepted meaning. It is ‘NOT BY EXACT RESEMBLANCE’; there *IS* a more recondite [meaning occult or esoteric] interpretation, as we suspected; it is one of ‘SUGGESTIONS OR ASSOCIATION *IN THOUGHT.*’

“There is a SECRET DOCTRINE in Freemasonry. That secret doctrine is concealed, rather than revealed, by the very lectures which, we are told, offer a ‘rational explanation’ of the ceremonies of initiation. If we were to accept these ‘rational explanations’ as final, and seek no further, Freemasonry would be a farce.” [Italics and caps in the original; Boldface added]

Carl Claudy, a Masonic writer, mentions that there are secrets inside secrets in symbolism.

He wrote: **“CUT THROUGH THE OUTER SHELL AND FIND A MEANING; CUT THROUGH THAT MEANING AND FIND ANOTHER; UNDER IT IF YOU DIG DEEP ENOUGH YOU MAY FIND A THIRD, A FOURTH—WHO SHALL SAY HOW MANY TEACHINGS?”**

In an Eastern Star book we are told: “A symbol is a figure of something intellectual, moral or spiritual, a visible object, **REPRESENTING** to the mind the semblance of **SOMETHING WHICH IS NOT SHOWN** but realized by association with it.”

Albert Mackey, a well-known Mason, writes that a symbol is a “sensible image

used to express an **OCCULT** but analogical signification.”

Another book reminds us that “An emblem is a figure or symbol which stands for **SOMETHING ELSE.**” We are also told that there is a **HIDDEN MEANING** to these symbols, so what is presented to the candidate is not what is really meant. Eastern Star writer, Mary Ann Slipper, states “that everyone who becomes a member of the Order of the Eastern Star should be familiar with the **ESOTERIC meaning of every symbol used in the work....**”

One *Short Talk Bulletin*, which was supposed to be read in the Lodge, says: “It may be asserted in the broadest terms that the **FREEMASON WHO KNOWS NOTHING OF OUR SYMBOLISM KNOWS LITTLE OF FREEMASONRY.** He may be able to repeat every line of the ritual without an error, yet, if he does not understand the meaning of the ceremonies, the signs, the words, the emblems and figures, he is a **MASONIC IGNORAMUS.**”

Throughout this book we will be looking at numerous symbols and we’ll discover some of the **HIDDEN MEANINGS** behind these symbols. We will also see how various **symbols represent pagan gods and goddesses.** Additionally, we’ll learn how **many emblems conceal and shroud sexual connotations under the guise of symbolism.** Charles G. Berger explains: “At first, in art, the sex organs were represented by pictures of them, but as man developed and ideas of morals changed, such representations seemed offensive or crude, and they were therefore **GRADUALLY MODIFIED UNTIL THE SYMBOLS COULD SCARCELY BE RECOGNIZED AS SEXUAL in origin. OTHER EXPLANATIONS AND MEANINGS WERE INVENTED FOR THE MASSES,** who were not supposed to understand the **TRUE MEANINGS.** Thus, **SYMBOLS CAME TO HAVE TWO MEANINGS,** the esoteric and the exoteric. The **ESOTERIC** meaning was the true or original meaning. **UNDERSTOOD BY ONLY A FEW** and closely guarded by them. The exoteric meaning was the invented, or modified, explanation intended for the many. The sacred mysteries, which are often mentioned in connection with many ancient religions and which were closely guarded by the initiate, concerned esoteric meanings in the religions of previous times. These sacred mysteries very often were merely continuations of the simpler forms of early sex worship carried on by a select few.”

The Migration of Symbols also states: “Without doubt the symbols that have

attracted in the highest degree the **veneration of** the multitude have been the **representative signs of gods, often uncouth and indecent....**”

Is this really the way we want Him—no longer King of Kings and Lord of Lords, but just another "guest" at the table?

Since the sexual nature of many symbols is now concealed under other guises, the average person no longer realizes the vulgarity behind many of them. Many organizations, however, use particular symbols and logos **INTENTIONALLY**—knowing **PRECISELY** what is being represented thereby. Multitudes of occultists, New Agers, witches, and Satanists understand the meanings of the symbols they use. On the other hand, many people are using these same symbols (or variations of them) today without knowing what they really represent. Hopefully, this book will show numerous symbols and explain the esoteric meaning of many of them so that the average person can be more aware of what is being portrayed behind some of the emblems being used.

We must remember that even though many leaders are aware of symbology, not every one who uses these symbols in their logos, etc., are familiar with the pagan connotations behind them. For example, we cannot just assume that everyone who wears a pentagram is evil and knows that this emblem is used extensively in Satanism and witchcraft. Many people do not know this and they “innocently” wear Satanic and pagan symbols. We must be careful not to accuse everyone who uses these symbols as being an occultist or New Ager. Of course, if we

know that a particular group is an occultic association then the symbol that they use should not be taken lightly. Many of the people who design the logos know **exactly** what they are doing. We will cover many of these logos in this book and give their own explanations about the particular meaning behind the design selected.

Some people try to make some of the occultic symbols into “Christian” symbols such as saying that the pentagram represents the five wounds of Christ or that the triangle is a symbol of the Trinity. We cannot do this for the Bible says in Deuteronomy 4:15-19, 23: “Take ye therefore good heed unto yourselves; for ye saw no manner of similitude on the day that the Lord spake unto you in Horeb out of the midst of the fire: Lest ye corrupt yourselves, and make you a graven image, the similitude of any figure, the likeness of male or female, The likeness of any beast that is on the earth, the likeness of any winged fowl that flieth in the air, The likeness of any thing that creepeth on the ground, the likeness of any fish that is in the waters beneath the earth: And lest thou lift up thine eyes unto heaven, and when thou seest the sun, and the moon, and the stars, even all the host of heaven, shouldest be driven to worship them, and serve them, which the Lord thy God hath divided unto all nations under the whole heaven.... Take heed unto yourselves, lest ye forget the covenant of the Lord your God, which He made with you. and make you a graven image, or the likeness of any thing, which the Lord thy God hath forbidden thee.”

God does not want us to make **ANY** image of Him in any way. “Forasmuch then as we are the offspring of God, we ought not to think that the Godhead is like unto gold, or silver, or stone, graven by art and man’s device” (Acts 17:29).

When the Israelites went into pagan nations, the Lord instructed them to “overthrow their altars, and break their pillars, and bum their groves with fire; and ye shall hew down the graven images of their gods, and destroy the names of them out of that place. Ye shall not do so unto the Lord your God” (Deuteronomy 12:3-4; See also Deuteronomy 7:5).

Deuteronomy 7:25-26 says: “The graven images of their gods shall ye bum with fire: thou shalt not desire the silver or gold that is on them, nor take it unto thee, lest thou be snared therein: for it is an abomination to the Lord thy God. Neither shalt thou bring an abomination into thine house, lest thou be a cursed thing like it: but thou shalt utterly detest it, and thou shalt utterly abhor it; for it is a cursed

thing.”

Although there are numerous symbols given throughout this book, this is definitely not an exhaustive itemization. Many, many other symbols could have been included but because of time and space considerations, they were left out. The symbols included here, however, should give you a good start in being able to identify many occultic logos that are appearing today.

2.

YIN/YANG SYMBOL

The yin/yang symbol can be seen almost any place one looks. It is used in logos, on book covers, in the New Age movement, in the martial arts, and so forth. “Yin and yang are considered to be opposites. Yin represents eternity, dark, feminine, left side of the body, *etc.* Yang is its opposite and represents history, light, masculine, right side of the body, *etc.*” “Yang is male, positive, and represented by the Sun. Yin is female, negative, and represented by the Moon,” says Paul E. Desautels in *The Gem Kingdom*.

“The symbol itself dates back at least to the fourth century B.C., and has been identified with the Eastern philosophical religions of Confucianism, Buddhism, and Taoism. In the Western world it has long been adopted into the symbolism of myth, magic, astrology, and witchcraft.”

A book, *Black Magic, White Magic*, explains the Yin-Yang like this:

“Another ancient magical sign called the yin-and-yang first appeared sometime before the 3rd century B.C. in China. This emblem became a favorite of **SORCERERS** and mystics throughout the Orient because it, too, embodies so many possible meanings.”

One well-known witch, Sybil Leek, who is called the “mistress of the occult,” proclaims that the Yin-Yang theory is:

“...an idea that inspired such things as Chinese boxing, breath control [used in yoga, meditation, *etc.*], the use of special herbs, and some rather erotic sexual exercises designed to nourish the Yang with the Yin.”

She adds: “Crucial to Taoism is the idea of Yin and Yang.”

“According to the ancient Chinese philosophers, in the beginning was Tao. But

then Tao separated into the two prime principles, yang and yin. And from the many combinations of yang and yin everything else that is in the world has emerged.

“Yang and yin produced the ‘five elements’, which are metal, wood, fire, water and earth. Everything in life is in a constant state of flux; in fact, the only thing that you can be sure of is that it will change.”

Another book states:

“The Yang-Yin symbol is one of the easiest to recognize and understand. It represents the two opposite, conflicting forces found in every action, and which are responsible for the dynamic universe.... The Yang and Yin operate in the universe primarily through the agency of the five elements: Earth (Saturn), Water (Mercury), Metal (Venus), Wood (Jupiter), and Fire (Mars). These elements under the guidance of the five planets form, with the Sun and Moon, the seven rulers. Each of the elements may also be Yang or Yin, so that combinations of all these could produce broad number possibilities (sic) and astrological alternatives. Each, of course, has its symbol which can be, and often was, incised into jade.”

The concept of yin and yang (also called Tai-gi-tu), likewise plays an important role in many other occult practices. For instance, *Dictionary of Mysticism* states the following about the practice of shu shu:

“Shu shu: The ancient Chinese system of magic, divination and occult practices, including astrology, dream interpretation, the art of coordinating human affairs by the active and passive principles of the universe (*yin yang*) and the Five Elements (*wu hsing*), fortune telling by the use of the stalks of the divination plant and the tortoise shell, and miscellaneous methods such as dream interpretation, the regulation of forms and shapes of buildings, etc.”
[Emphasis in the original]

Of course, many of the Chinese exercises, medical practices, etc., are also based on the theory of yin and yang. In *Health: A Holistic Approach* we find:

“The techniques of *acupuncture*, *acupressure*, and *moxibustion* apply needle, pressure, or thermal (heat) stimulation respectively to meridian points to effect a

change in the orderly flow of Chi through the meridians. This treatment helps to re-establish the yin-yang balance by initiating normal energy flow in stagnant meridians. The choice of meridian points to be stimulated is arrived at by using specific laws derived directly from the five-element theory and knowing the order of Chi distribution in the meridians. The five-element theory is the practical, tangible application of the complementary opposites—yin and yang.

“The Chinese system of *physiotherapy*, or therapeutic exercises, is represented primarily in the practice of *T'ai Chi Ch'uan*, which is a system of exercises performed in close coordination with regulated breathing. The exercises are comprised of thirty-seven movement patterns, the composition of which is regulated by the principles of yin and yang.” [Emphasis in the original]

“The philosophy of T'ai Chi Ch'uan is rooted in Taoism, which advocates natural effort, and in the I Ching, or Book of Changes. The movements and inner teachings are derived from the complementary relationship between Yin and Yang, two fundamental forces that create and harmonize the Universe by their interaction.

“The interaction of Yin and Yang is vital to the practice of T'ai Chi Ch'uan

since physically and mentally the practitioner is continually shifting between empty and full and soft and hard to achieve a proper and evolving equilibrium.”

In fact, t'ai chi came to be “represented by the circle divided into the light and the dark, yang and yin.”

Other interrelated techniques dependent upon yin/yang are zone therapy, polarity therapy, macrobiotics, Shiatsu, Jin-Shin, Do-In, the martial arts (such as Kung Fu, Chi Kung, Karate, T'ai Chi), *etc.*

Palmistry, the **occult** practice of foretelling the future by reading the hand, is also based on the theories of **yin** and **yang** and the **Five Elements**. In another **OCCULT** book, *The Chinese Art of Healing*, written by a **BUDDHIST monk**, the author explains how the ancients relate **massage**, which **includes REFLEXOLOGY**, to the **Five Elements** and to **palmistry**. He states:

“The thumb, for example, was associated with the spleen, which belonged to the **earth element**, the index finger with the large intestine (**metal element**)...and so on....The form of **massage** known as ‘from the water element to the earth element,’ reminds us of **OCCULT** concepts of this kind.

“According to Oriental **MAGICIANS**, the palm of the hand contains the secrets of life. There was also an ancient Chinese school of thought which maintained that the palm of the hand was a replica of **Yin** and **Yang** and could provide information about illness and good health and one’s entire fate.”

(For more information on Reflexology, see my booklet entitled “Hidden Dangers of Reflexology.” It can be obtained through Sharing by writing to the address in the back of this book.)

Masonry also uses the concept of yin and yang in their symbolism but it is in a disguised form. Albert Pike states that the black and white pavement symbolizes “the Good and Evil Principles of the Egyptian and Persian creed. It is the warfare of Michael and Satan, of the Gods and Titans, of Balder and Lok; between light and shadow, which is darkness; Day and Night; Freedom and Despotism....”

Masons also use the two triangles to represent this idea of opposites. In the *Short Talk Bulletin*, a pamphlet which is to be read in the Lodges, we are told that the triangles “are symbolic of good and evil, day and night, the Chinese **YANG AND YIN**, etc.”

The two triangles joined together to form a hexagram indicate sexual union. This same viewpoint is also associated with the yin/ yang. In *Our Phallic Heritage* we are told:

“But since union of the sexes is necessary to produce offspring, both sexes were represented in most religions. In the crudest forms of worship, representations of the genitalia of both sexes, or of the sex organs in union, were worshiped.

Such was the worship of the phallus-kteis in Greece and Egypt, the lingam-yoni in India, the massebasher of Syria, the yoseki-inseki in Japan, the **YANG-YIN** in China, and the baal-peor of the Canaanites in the Bible.”

Masonic author, George Oliver, states:

“Thus the monad and duad were the phallus and kteis of the Greeks, the lingam and yoni of the Hindoos (sic), the woden and friga of the Goths, and **YANG AND YIN** of the Chinese, and indeed, of the creative and destructive powers of every country under Heaven.”

This thought is reiterated in *Myths and Symbols in Indian Art and Civilization*:

“Lingam and yoni, Shiva and his goddess, symbolize the antagonistic yet co-operating forces of the sexes. Their Sacred Marriage (Greek: *hieros-gamos*) is multifariously figured in the various traditions of world mythology. They are the archetypal parents, Father and Mother of the World, themselves the first-born of the pairs of opposites, first bifurcation of the primal, cosmogonic reality, now reunited in productive harmony. Under the form of Father Heaven and Mother Earth they were known to the Greeks as Zeus and Hera, Uranos and Gaia, to the Chinese as T’ien and Ti, **YANG AND YIN**.” [Italics in the original; Boldface and caps added]

One catalog that sells statues of gods and goddesses as well as many other occultic items states:

“At once the most sacred and the most mysterious path to higher consciousness, Tantra refers to the Divine Union of Opposites. Taoists refer to these energies as *yin* (from *yonis*, the active principle) and *yang* (the recumbent principle).”

Since there is some yin (female) in the yang (male), which is represented by the little dot, and some yang in the yin, the concept of bisexuality is also symbolized. Charles Berger remarks:

“Sometimes efforts were made to make gods bisexual. Hermaphrodite is the best example of this. He was the son of Hermes and Aphrodite and embraced Salmaco, a nymph, who called upon the gods to make them inseparable. The gods heard the plea, and formed of the two a perfect being who possessed the characteristics of both sexes. From this mythical being comes the term *hermaphrodite*. Omphale was a queen of Lydia and the task-mistress of Hercules. She is represented with a lion’s skin and a club, male symbols, while Hercules wears her gown and spins for her. Omphale is thus represented as double-sexed, as is Hercules by his dress and his work. The name Omphale is a bisexual name, coming from ‘Om,’ the Universal Mother, and from *phallus*, the male organ. Likewise, Janus of the Greeks not only had opposite faces but was double-sexed, or hermaphroditic.” [Emphasis in the original]

The New Age movement looks favorably on homosexuality. In fact, in alchemy, the androgyne (meaning male and female in one body) was considered to be “the image of human perfection and wholeness. By some ancient traditions, the original and perfect form of the human being....A fashionable look among some celebrities.” “Bly, Nin, and Jung tell us that each individual must achieve inner marriage of their masculine and feminine natures to encounter true equipoise.”

The assumption of yin/yang also leads to homosexuality. In one issue of the *Whole Life Times* was a letter from David Lang. He wrote:

“For example, macrobiotic theory explains homosexuality as a yin-yang imbalance caused (or at least aggravated) by excess consumption of yin foods (such as raw fruit) on the part of males and excessive ingestion of yang foods (such as animal flesh) on the part of females.”

Texe Marrs explains:

“Homosexuality and bisexuality are accepted, even encouraged by the New Age teacher. The unholy doctrine of reincarnation and the principle of *yin/yang* are perfect excuses and rationale for homosexuality and other forms of sexual immorality. If you are a homosexual or a lesbian in this lifetime, New Age teachers believe that it is probably because you were a person of the opposite sex in a previous incarnation or past life. The residue and influence of that past life is simply retained within your brain and consciousness.

“The *yin/yang* principle, also called *unity*, *integration* or *polarity*, holds that a person is born with both masculine and feminine traits. A man supposedly could have been a man 250 times and a woman 250 times in previous incarnations, and the memory of those past life experiences are said to remain as indelible traces

of consciousness. Thus, we are each a combination of male and female, masculine and feminine. The New Age encourages children and adults to appreciate and practice the harmony of opposites, teaching the individual to merge the two selves, man and woman.”

Many of the gods and goddesses of paganism are shown to have dual sexual natures. Mercury, called the “male-female,” was an androgyne. Even much symbolism contains this dual nature. For instance:

“The serpent’s head and neck is distinctly a masculine symbol, but the serpent is sometime symbolized with its tail in its mouth [oroboros], the body forming a circle which is feminine. Also, the mouth is feminine, while the tail, which is in the mouth, is masculine. Thus for two good reasons the serpent with its tail in its mouth represents both sexes. Sacred fire was often prepared on religious occasions by rotating a realistic wooden representation of the phallus in a wooden representation of the kteis, rotating being done by an apparatus resembling a bow. The cornucopia, or horn of plenty, was double sexed in symbolism. The horn was masculine and the inside was feminine. The fruit inside symbolized productiveness of the female.”

“The four-limbed cross generally had a different meaning, and represented the male and the female in unison, in the act of creation. From time immemorial a perpendicular line or object has been used to symbolize the phallus, and a horizontal line the kteis or vulva. The surface of water, a female element in creation, was horizontal, and women were practically in the horizontal position in the act of creation. Prostitutes were spoken of as ‘women who made their living horizontally,’ and the term was applied to women who were kept in their own room by some wealthy man.

Coitus has been called ‘horizontal exercise.’ *Horizontales* (horizontals) is one of the names which the French apply to women who sell love favors, women of easy virtue. The four-armed cross was an easy figure to make, being an intersection of two straight lines at right angles, and it became a symbol of man’s most lofty and most holy activity, expressing the reverence for the act.

Some of the Asherahs of the Bible represented Baal in union with Astoreth. The results of the union between the sexes resulted in a new life. Separately, man and woman were incomplete, impotent, and barren, but in their union they became a

perfect soul, realizing the immortality of life.”

We’ll cover the symbols mentioned above (the oroboros, cornucopia, and swastika) in more detail later.

One particular group that knows the sexual implications of the yin/yang and intentionally uses it as their official symbol is The Sex Information and Education Council of the United States (SIECUS). This group promotes extensive sex education in schools. SIECUS Position Statements reveal the following:

“It is the position of SIECUS that contraceptive services should be available to all—including minors who should enjoy the same rights of free and independent access to...contraceptive care as do others....It is the position of SIECUS that the use of explicit sexual materials (sometimes referred to as pornography) can serve a variety of important needs in the lives of countless individuals....”

Another group using the yin/yang (knowingly or unknowing) is the Girl Scouts. “On page 66 of the *Girl Scout Badges and Signs* book, the yin/yang symbol is used to represent the World in My Community proficiency badge. In the *Junior Girl Scout Handbook*, yoga exercises are explained. The theme for their 1987 program was ‘The Year of Magic.’”

The I Ching (Book of Changes) is another occult practice that incorporates the use of the yin/yang. Geoffrey Parrinder writes: “The *yin-yang* dualism entered into Confucian orthodoxy by its incorporation into the *I Ching*—a late compilation from, and rational arrangement of, earlier works on **DIVINATION.**”

William Spear teaches astrology and macrobiotics and has been using the I Ching for 20 years. He states:

“Taoism, inseparable from the philosophy of the I Ching, is based on the complimentary yet antagonistic principles of Yin and Yang which mutually create and destroy each other by the ceaseless rearrangements of their relationship. The basic rule they obey is life’s only certainty: change.”

One ad for a book by Diane Stein on the I Ching (also called Kwan Yin) tells us: “*The Kwan Yin Book of Changes* is a wonderful book, finding admirers (sic) with not only **NEW AGERS, AND FEMINISTS, BUT OTHERS SUCH AS PAGANS, DIVINATION FANS, GODDESS WORSHIPPERS**, and those involved with Eastern philosophy.”

Of course Diane Stein isn't the only pagan who uses the I Ching. A witchcraft magazine, *Circle Network News*, gives an extensive ritual to be used in connection with the I Ching. Part of the instructions are:

“An altar should be set up in the middle of a room facing north....Lay the stalks in the middle of the altar along with the I Ching book that you are going to use and your I Ching journal. Include on the altar other ritual tools and symbols that you feel you need. Be sure to include burning incense.

“Ritually purify yourself and the space with techniques of your choosing. Ground and center. Call the quarters and Spirit in a fashion that feels appropriate....

“Once you have determined the hexagram, draw it in your journal. Look it up within the text of your I Ching book....

“When you feel complete with your answer and have recorded all relevant information in your journal, pay respects to the I Ching in whatever way you feel comfortable....**Thank the spirit helpers [demons!] and the quarters for helping with your work.**”

New Ager, Jeffrey S. Stamps, likes to use the yin/yang in a slightly different form. He calls his symbol the “Emergent Tao.” He explains:

“The ridgepole symbolizes the line of the roof, thus separating heaven from earth. As a line, the ridgepole is unity, yet it generates duality—‘above and below, a right and left, front and back—in a word, the world of opposites.’...

“As a symbol of change, tao, too, may change. To compress my thought of many pages to a single symbol, I offer *Emergent Tao*....This symbol extends the traditional t'ai chi symbol of the circle with a ridgepole dividing the complements of yin and yang. I have added the spiral curves between the outer circle and the two inner circles. With these lines, the symbol clearly expresses emergence and levels: the circle of the whole (n) and the ‘higher’ (n+1) and ‘lower’ (n-1) smaller circles/levels. Emergent tao expresses the essence of Holonomy: complements, levels, and unitary process.”

Emergent Tao

The yin/yang symbol is quite appropriate today for humanists, New Agers, witches, Satanists, *etc.* As Michael Tierra, a proponent of the yin/yang theory, states: “The Yin/Yang theory is a teaching method and does not define anything absolute.” There are seven laws concerning the yin/yang, one of which is: “2. Everything changes.”

This is an important item to notice. The idea that “everything changes” does not agree with the Bible. There we find that Jesus Christ is the same yesterday, today, and forever (Hebrews 13:8). He doesn’t change. James 1:17 also states: “Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is **NO VARIABLENESS**, neither shadow

of turning.” Malachi 3:6 tells us: “I am the Lord, I **CHANGE NOT.**”

Another law is: “3. All antagonisms are complementary.” Again, this is contradictory to Scriptures. This would make Jesus and Satan complementary to each other! What blasphemy!

Yet another law is: “6. The extreme of any condition will produce signs of the opposite.” Again applying this to Christ would mean that because He is the extreme in goodness, mercy, compassion, etc., that He will produce signs of hate, injustice, unconcern, *etc.* This also would make Satan eventually become kind, loving, obedient, and so forth. The Bible warns: “Woe unto them that call evil good, and good evil: that put darkness for light, and light for darkness; that put bitter for sweet, and sweet for bitter! Woe unto them that are wise in their own eyes, and prudent in their own sight!...Which justify the wicked for reward, and take away the righteousness of the righteous from him!” (Isaiah 5:20-21, 23).

In addition to the seven laws of yin/yang, there are twelve theorems. One of these is: “8. Nothing is solely Yin or Yang; everything involves polarity.” This is stating that nothing is entirely good or entirely evil. This again contradicts the Scripture for in Habbakkuk 1:13 we find that God is “of purer eyes than to behold evil and canst not look on iniquity.” The Bible also tells us that there is no truth in Satan (John 8:44). Obviously, the yin/yang theory is not consistent with God’s Word.

We’ll cover the sinister aspects of the hexagram later, but it’s interesting to note that *An Illustrated Encyclopedia of Traditional Symbols* tells us that the hexagram is affiliated with the “Chinese **OCCULT** symbol of ying (sic) and yang.” The connotations, therefore, of the hexagram also apply to the yin/yang symbol.

There are probably hundreds upon hundreds of groups that have used the yin/yang in their logo or symbolism. Some groups probably do so innocently, but I believe the majority of them know exactly what they are doing and what the symbolism means. On the following pages are just some of the ways in which the yin/ yang is being used.

3.

THE CIRCLE

The circle is the symbol of the universe. Eastern Star writer, Sarah Terry, mentions that the circle “is derived from the **SUN**.” Masonic author, J. S. M. Ward, explains that the circle also symbolizes God. A *Treasury of Witchcraft* states that “the circle that the magician draws on the ground...[is] to enforce demons to appear.” Shortly we’ll discover who the god of Masonry is, so it will be evident which god the circle represents.

One particular symbol that is prevalent in Masonry utilizes the circle but a point is added inside the circle. It is called the “point within the circle.” Harold Percival in his Masonic book tells us: “The point and the circle are the same, the point is the infinitesimally small circle and the circle is the point fully expressed.” Since the point and the circle are the same, let’s look at what Masons tell us about this specific symbol.

In the *Masonic Quiz Book* we find that this symbol “is from the Egyptian and is a symbolic sign for the **SUN** and the god **OSIRIS**.” Albert Mackey, a 33° Mason, reveals that: “**The point within the circle is an interesting and important symbol in Freemasonry....The SYMBOL IS REALLY A BEAUTIFUL BUT SOMEWHAT ABSTRUSE ALLUSION TO THE OLD SUN-WORSHIP**, and introduces us for the first time to that modification of it, known among the ancients as the **WORSHIP OF THE PHALLUS**.”

While some Masons are now trying to distance themselves from Mackey, he is nevertheless a **HIGHLY RESPECTED MASON** and is still looked up to today by many “higher” level Masons. In one *Short Talk Bulletin* about Mackey, lodge

members were told: “Never did he read into a Masonic symbol a meaning which is not actually there,” so we have every reason, then, to accept his interpretation that the point within a circle actually represents the phallus.

Albert Churchward, a Mason, says that: “The **POINT WITHIN A CIRCLE IS ONE OF THE HIEROGLYPHIC SIGNS OF THE SUN-GOD, RA....**”

The point within the circle represents other gods in other mythologies. In India the dot or the point within the circle represents **SHIVA** and in Egyptian mythology it represents **HORUS** or **OSIRIS**.

The Druids used the point within a circle as the emblem of their Supreme God who was **ODIN**. Masons, by the way, admire the Druids and some of them even claim that Masonry came from Druidism. Of course, the Druids were occultic priests, practiced astrology, and offered human sacrifices.

So, like all the other symbols which we have looked at, we find that the circle and the point within the circle refer to a pagan god. Also, like the previous symbols, the point within the circle has a sexual connotation.

In one *Short Talk Bulletin* entitled “Point Within a Circle,” which was to be read in Lodge meetings, we are told that this symbol is connected with **SUN WORSHIP**. This pamphlet states: “It was believed in India that at the general deluge everything was involved in the common destruction except female Principles or **ORGANS OF GENERATION**, which were destined to produce a new race and to repeople the earth when the waters had subsided from its surface.

The female principle, symbolized by the moon, assumed the form of a lunette, or

crescent, while the male principle, symbolized by the sun, assumed the form of the lingam (or Phallus) and placed himself erect in the center of the lunette, like the mast of a ship. The two principles in this united form floated on the surface of the waters during the period of their prevalence on the earth, and thus became the progenitors of a new race of men.’...

“The Indian interpretation makes the **POINT THE MALE PRINCIPLE, THE CIRCLE THE FEMALE**; the point became the sun and the circle the solar system which ancient peoples thought was the universe because the sun is the vivifying, the life-giving principle, for all that lives.”

Albert Pike writes that Isis and Osiris: “the Active and Passive Principles of the Universe, were commonly symbolized by the generative parts of man and woman....The Indian lingam was the union of both, as were the boat and mast and the point within a circle: all of which expressed the same philosophical idea as to the Union of the two great Causes of Nature, which concur, one actively and the other passively, in the generation of all beings....”

The point within a circle has been employed in some rather unique ways. For instance, one Masonic book states: “The sign of the infamous Mafia or Cosa Nostra is not the ‘black hand,’ as many believe, but the familiar dot within a circle.” We are further informed that: “Because the true purposes of Illuminism were so shocking, Weishaupt constantly encouraged the **SECRETIVE** nature of the order. No member was ever allowed himself to be identified as an Illuminati. The words Illuminism or Illuminati were never to be used in correspondence, but were to be replaced by the astrological symbol for the sun, a circle with a dot in the middle.”

Weishaupt, you’ll probably recall, was a Mason and the founder of the Illuminati.

Another thing we need to look at is a circle surrounding the inverted five-pointed star. In *The Question of Freemasonry* we learn: “The inverted five-pointed star **within a circle** is the **highest form of satanic expression, representing Baphomet**, the God of Mendes, or the embodiment of Lucifer as god.” In fact, the **PENTAGRAM ENCLOSED WITHIN THE CIRCLE IS A SIGN FOR THE GOD AND GODDESS.**

Actually, any occult symbol is considered to be even more powerful whenever a circle is used around another occultic symbol.

4.

THE TRIANGLE

The triangle is a very important symbol to the Masons and Eastern Star members. When a new Eastern Star Chapter is established, the Officers-elect are to form an equilateral triangle around the Altar. The Altar itself “is shaped in the form of a triangle. Traditionally, one angle is directed so that it points toward the East.” The pentagram itself is made up of triangles. Of course, like the pentagram, the triangle can be used in two different positions and each position has a special significance. A triangle, with one point down, represents the deity and is called the “Deity’s Triangle” or the “Water Triangle.” With one point up it is called the “Earthly Triangle,” “Pyramid Triangle,” or the “Fire Triangle,” and this emblem symbolizes “the PERFECT or DIVINE MAN.” [Emphasis in the original]

Manly P. Hall, a 33° Mason, boasts: **“MAN IS A GOD IN THE MAKING....”**
George H. Steinmetz, another Masonic writer, brags:

“‘Be still—and know—that I am God.’”...‘*THAT I AM GOD*’—the final recognition of the All in All, the unity of the Self with the Cosmos—the cognition of the **DIVINITY OF THE SELF!**” [Emphasis in the original]

Joseph Fort Newton, a well-known Mason, claims that the Third Degree of Masonry testifies “to the profoundest insight of the human soul—that God becomes man that man may become God.”

This theme of godhood or the divinity of man can be found in book after book written by Masons, New Agers, witches, and Satanists. Masonic author, J. D. Buck, states: “It is far more important that **MEN SHOULD STRIVE TO BECOME CHRISTS** than that they should believe that Jesus was Christ”.

Arthur Edward Waite writes that “the Master-Builder of the **THIRD DEGREE** does actually rise as Christ....” [Emphasis in the original]

In a book written by a 32° Mason, Charles H. Vail, entitled *The Ancient*

Mysteries and Modern Masonry, we find:

“The consummation of all this was to **MAKE THE INITIATE A GOD**, either by union with a Divine Being without or by the realization of the Divine Self within....

“MAN IS LIKE GOD IN THAT HE BECOMES A GOD.”

This theme of godhood or the divinity of man has to also be the object of the Eastern Star since no one can become an Eastern Star member without having a close relative who has received the third degree of Masonry. It is that degree which is claimed to make a Mason a **“DIVINIZED MAN.”**

There is more symbolism involved in the triangle, though. The triangle with one point up just happens to be the symbol for Set and Shiva. In *Signs and Symbols of Primordial Man*, written by Albert Churchward, a Mason, we find that this **TRIANGLE** with the one point facing upward, was the **SYMBOL FOR SET** (or Sut)! In India, the triangle is “the caste mark of the followers of **SHIVA**...who wear it on their forehead.” Another Masonic writer, J. S. M. Ward, adds:

“With the point upwards the **EQUILATERAL TRIANGLE STANDS FOR SHIVA THE DESTROYER**, and signifies the flame which rises upwards from the funeral pyre toward Heaven. This symbol is familiar to us [the Masons] in several degrees, notably the Thirtieth degree.”

There’s no contradiction here, for Set is the Egyptian devil and Shiva is the Indian god of destruction. Both names, **SET AND SHIVA**, are also listed in *The Satanic Bible* as another name for **SATAN**! Furthermore, Helena Petrovna Blavatsky affirms: “Now, we have but to remember that Siva [Shiva] and the Palestinian Baal, or Moloch, and Saturn are identical....” So, then, when the Masons and Eastern Stars tell us that the triangle represents the deity, we now know **WHICH** deity is being worshiped by the symbolism of the triangle.

Another clue as to which deity is being worshiped may be found in Alice Bailey’s book, *Discipleship in the New Age*. She claims: “It might be said symbolically that ‘the point of the triangle is based in the courts of Heaven (Shamballa) and from that point two streams of power pour forth....’ Shamballa is the mythological place where the “Lord of the World,” Sanat Kumara or Shiva (who is actually Satan), is supposed to live! Bailey is looking forward to the time

when “there can be the inauguration of a new phase of activity in Shamballa. This will enable the Lord of the Word to become the ruler of a Sacred Planet, which, up to date, has not been the case.”

Interestingly, Bailey reminds us that Masonry emanates from Shamballa. Lynn Perkins, a Masonic author, also agrees. He mentions that Shamballa “has a bearing on the ancient origins of Freemasonry and upon its future in the coming Aquarian Age....” He adds:

“Shambhala,—the legendary and mystical home of the Great Masters of the Wisdom...out of which Ancient and modern **FREEMASONRY** sprang...is the site of ‘the Great White Lodge’ of Initiate Masters, which, as a Brotherhood of Mystics and **OCCULTISTS**, is a prototype, an original model, of which every Masonic Lodge is a more or less perfect physical and spiritual replica....That **MASONS OF TODAY ARE OF AWARE OF THE EXISTENCE AND SIGNIFICANCE OF THE ESOTERIC TRADITION**, that encompasses the whole purpose and Destiny of every living Soul, is no proof that it does not exist.”

Yet another meaning for the triangle has to do with a sexual reference. Without going into detail, I’ll just mention that it represents the male and female generative organs. When the two triangles are joined together to form a hexagram (discussed elsewhere in this book), it depicts sexual union between the male and female.

Masonic author, R. H. MacKenzie, states:

“**TRIANGLE**.—An important symbol in Masonry.

1. The equilateral triangle was adopted by all ancient nations as a symbol of Deity, and was regarded as the most perfect of figures. It constantly recurred in Craft Masonry as well as in the Royal Arch.
2. The right-angled triangle was also regarded as an important figure. Among the Egyptians the base represented **OSIRIS, OR THE MALE PRINCIPLE**; the perpendicular, **ISIS, OR THE FEMALE PRINCIPLE**; and the hypotenuse, **HORUS**, their son, **THE PRODUCT**.”

John Yarker, a Mason, writes:

“The basis of the Masonic Jewel of a Master in the Chair is an old Egyptian symbol, for Plutarch informs us that a triangle whose base is 4, perpendicular 3, and hypotenuse of 5 parts, the square of which is equal to the square of those sides, containing the right angle, was an important emblem in Egypt, as a symbol of nature. The base figured **Osiris**, the perpendicular **Isis**, and the hypotenuse **Horus**; the originating and receptive principles, and the offspring of the two.”

Another Masonic writer, reveals:

"The triangle is found variously arranged throughout the Masonic system. In one instance we have the interlaced triangles, one black, the other white, the white triangle has its point up; the black triangle points down. Thus arranged it represents the union of the active and passive forces in nature; it represents the male and female elements. The interlaced black and white triangles represent the forces of darkness and light [yin/yang], error and truth, ignorance and wisdom and good and evil; when properly placed they represent balance and harmony.”

In *The Gods of India*, we find:

“The triangle with its apex upward is also taken to represent fire, identified with the male principle, the *linga* or phallus, symbol of Siva the Progenitor or of the Cosmic-Person (*purusa*)....Its numerical symbol is the number 3.

“The triangle pointing downward represents the force of inertia which pulls downward, and tends to suppress activity. It is associated with the element water, which always tends to come down, to equalize its level. It is the passive aspect of creation and thus is represented by the *yoni* or female organ, the emblem of Energy (*Sakti*) or Cosmic-Nature (*prakrti*). Other symbols

associated with the element water are the arc of a circle, the crescent, and the wave. The corresponding number symbol is the number 2.”

R. Swinburne Clymer, in *The Mysteries of Osiris or Ancient Egyptian Initiation*, writes: “The Phallus or Lingam, and the Yoni, the male and female emblems of generation are found in the triangle and the tau....”

The lesbians and gays like to make use of the triangle symbolism. One catalog catering to lesbians states:

“The Triangle is a symbol of Gay and Lesbian identity, community and pride. It says that we are Out, standing up, unifying across the breathtaking diversity of our kind, and that we are committed to our freedom and our lives. The triangle is also an ancient glyph for vulva, for the Feminine....The triangle was reclaimed by the Gay Liberation movement in the '70s as a symbol both of resistance to oppression (‘Silence=Death’) and of Lesbian and Gay pride.”

Below is a picture of a triangular card that “was designed especially for lesbians!”

The Bible tells us in I Corinthians 6:9-10 that homosexuals shall not inherit heaven:

“Know ye not that the unrighteous shall not inherit the kingdom of God? Be not deceived: neither fornicators, nor idolaters, nor adulterers, nor effeminate, nor abusers of themselves with mankind, Nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners, shall inherit the kingdom of God.”

Closely related to the triangle is the pyramid. One author writes:

“The *pyramid* has a close relationship in symbolic significance to the triangle. Indeed, the pyramid is shaped in triangular form. A number of New Age communities and groups, such as the Institute of Healing Sciences in New York, have erected pyramid-shaped structures. Some New Age churches display small pyramid replicas on their altars.

“New Agers believe in pyramid-power. Some wear miniature pyramids on chains to bring positive energy forces into their bodies; others make cardboard pyramids and place them into close proximity with foodstuffs, believing in the curative and preservative powers of pyramids.” [Emphasis in the original]

We can see that the triangle represents pagan gods and has a sexual connotation. When the upward triangle and the downward triangle are joined, it forms the hexagram or the six-pointed star. We will cover this symbol in the next chapter.

5.

THE HEXAGRAM

The Hexagram is formed by uniting the Water Triangle with the Fire Triangle, which is called the Six-pointed Star, Star of David, Solomon's Seal, *etc.*

When the two triangles (the "Water Triangle" and the "Fire Triangle") are joined together into one symbol, it forms a six pointed star known as a double triangle, hexagram, Crest of Solomon, star of the microcosm and the Shield of David, among other names. It is even called the "talisman of Saturn." Mary Ann Slipper remarks: "This six pointed star is used in masonic work and is also found in other well known secret orders."

The Second Mile, an Eastern Star book, reveals that the "six pointed star is a very ancient symbol, and one of the most powerful." It sure is a powerful symbol—to witches, sorcerers, and magicians! "The hexagram is used in magic, witchcraft, occultism and the casting of zodiacal horoscopes internationally and by all races." "It was considered to possess mysterious powers," says *A Concise Cyclopaedia of Freemasonry*.

It is used as a "stand-by for **MAGICIANS AND ALCHEMISTS**. The **SORCERERS** believed it represented the footprint of a special kind of **DEMON** called a trrud and used it in ceremonies both to **CALL UP DEMONS** and to keep them away."

Former Satanist, Bill Schnoebelen, reminds us: "To the sorcerer, the hexagram is a powerful tool to invoke Satan...." A **HEXAGRAM MUST BE PRESENT TO CALL A DEMON FORTH**. In fact, the word "HEX" comes from this emblem.

Another meaning associated with the hexagram has to do with sexual union and

reproduction. The triangle pointing downward “is a female symbol corresponding to the yoni” and the “upward-pointing triangle is the male, the lingam....” When the two triangles are interlaced, “it represents the union of the active and passive forces in nature; it represents the male and female elements.”

In *The Gods of India*, we find:

“The two complementary principles, the *linga* and the *yonis*, are graphically represented by the fiery triangle with upward apex and the watery triangle with downward apex. When the triangles penetrate one another to form the hexagon, this is taken to show the state of manifestation. When they part, the universe dissolves.”

The *linga* (or *lingam*) and the *yonis* are the male and female sexual parts.

A former witch reveals: “When the male triangle penetrates the female triangle it produces the six pointed crest of Solomon or hexagram, the most wicked symbol in witchcraft.”

The hexagram was also used for communication with the dead as E. A. Wallis Budge states: “Those who believed in the physical significance of the Hexagram taught that communication between the living and the dead was possible, and adopted the dogma of **REINCARNATION**.”

A book entitled *Witchcraft, Magic and Alchemy*, links the hexagram to spiritualism.

The Hexagram was also the sign used in the Royal Arch (in Masonry) and “with the Hindoos (sic) of Trimurti the Trinity in Unity, or Brahma, Vishnu and Shiva in one.” J. S. M. Ward adds:

Trimurti

“The [hexagram] with or without the circle, is strictly the sign of Trimurti, the Three in One, typifying the creative, preservative and destructive natures of the Deity. When Trimurti is depicted, which is seldom, it is as a three-headed man; one head is bearded, as with European mediaeval pictures of God the Father, while the heads which represent Vishnu and Shiva are devoid of a beard.”

Interestingly, this hexagram:

“...certainly has three sixes. It contains a six, within a six, within a six: 666. (Count the sides of each triangle facing the clockwise direction, the sides facing the counterclockwise direction, and the third six—the sides of the inner hexagon.)”

There is still another meaning of the hexagram. One Masonic author states:

“In one instance we have the interlaced triangles, one black, the other white, the white triangle has its point up; the black triangle points down....The interlaced black and white triangles represent the forces of darkness and light, error and truth, ignorance and wisdom and good and evil; when properly placed they represent balance and harmony.”

Another Masonic pamphlet affirms that these triangles that make up the hexagram “are symbolic of good and evil, day and night, the Chinese **YANG AND YIN**, etc.” We’ve already covered the yin/yang symbol, so we can see that the hexagram is not a good symbol and does not have a favorable connotation. It is used to call up demons, communicate with the dead, describe sexual acts, and represent false and pagan gods (such as Brahma, Vishnu, and Siva).

The Bible tells us in Philippians 4:8:

“Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, **THINK** on these things.”

Isn’t there a big difference between what the Scriptures tell us to dwell on and what the occult promotes?

6.

THE PENTAGRAM

Satanists and witches love the pentagram, and we are told that the pentagram is one of the main symbols of witchcraft and occultism. It has always been used in ritual magic and is used for divination, the conjuration of spirits and to summon demoniac help. In the *Dictionary of Mysticism*, we learn that the pentagram: “is considered by occultists to be the most potent means of conjuring spirits. When a single point of the star points upward, it is regarded as the sign of the good and a means to conjure benevolent spirits; when the **SINGLE POINT POINTS DOWN** and a pair of points are on top, it is a *SIGN OF THE EVIL (SATAN)* and is **USED TO CONJURE POWERS OF EVIL.**”

Pentagram

Inverted Pentagram

“The PENTAGRAM is a very important symbol USED IN CALLING DEMONS and as an aid in the casting of spells. When *Book entitled A Witch’s Bible Compleat* pointed skyward, the star symbolizes the power of witchcraft. Most Wiccans—(witches/warlocks) believe that their power comes from such elements as the earth, sky and wind.”

In fact, the Pentagram is called “The Great Rite” in witchcraft. Witches Janet and Stewart Farrar report: “The couple enacting the Great Rite are offering themselves, with reverence and joy, as expressions of the God and Goddess aspects of the Ultimate Source....They are making themselves to the best of their ability, channels for that divine polarity on all levels, from physical to spiritual. That is why it is called the Great Rite.... ‘Ritual sexual intercourse,’ says Doreen Valiente, ‘is a very old idea indeed—probably as old as humanity itself.’...The Great Rite invocation specially declares that the body of the woman taking part is an altar, with her womb and generative organs as its sacred focus, and reveres it as such....The High Priestess then lays herself down towards the altar, and her arms and legs outstretched to form the **PENTAGRAM.**”

Laurie Cabot, a **WITCH**, explains: “It really isn’t that difficult to distinguish the Craft from Satanism. Witches wear the pentacle with the point up. **SATANISTS REVERSE IT WITH THE POINT DOWN....**”

Witches’ pentagram It should be obvious by now that the occultists, New Agers, magicians, Satanists, and witches all claim the pentagram as one of **THEIR** symbols and hold it in high regard. “Symbols,” we are told, “are representative of ownership.” In fact, Fred and Jill Buck from the Magi Craftsmen, announce: “The Pentagram is one of the most powerful symbols for the **NEW AGE.**” A witchcraft magazine was even entitled *Pentagram*.

As is well-known, the pentagram (or five-pointed star) can be drawn in two ways—with one point facing up or with two points facing up (known as the inverted or Satanic pentagram). “When pointing down, as on the front of the Satanic

Bible, the star signifies the Church of Satan, symbolic of power from Hell.” Occultist and 33° Mason, Manly Hall, admits: “In symbolism, an **inverted figure always signifies a perverted power**. The average person does not even suspect the **occult** properties of emblematic **pentacles**.” As can be seen, this star is a crucial ingredient in the occult, Wicca (witchcraft), and Satanism and the fashion in which this star is placed is highly illuminating. Former witch, Mason, Mormon, and Satanist, Bill Schnoebelen, “emphasized that **TO THE MAGICIAN, THE INVERTED PENTAGRAM HAS ONE USE ONLY**, and that is to **CALL UP THE POWER OF SATAN** and bring the Kingdom of the Devil into manifestation on earth.”

An organization called the Continental Association of Satan’s Hope (CASH) advertises that a **“POWERFUL SATANIC PENTAGRAM CAN NOW BE YOURS ABSOLUTELY FREE!”** [Emphasis in the original] It goes on to explain: *“You will find the Satanic Pentagram invaluable and indispensable as you attempt to draw from the infernal power of our lord Satan! This extremely powerful amulet is the sign of the microcosm and is the summation of all the occult forces! In other words, there is no amulet or talisman more powerful or even close to as powerful as the Satanic Pentagram!”* [Emphasis in the original]

Across the bottom of this ad are the words in large letters: “HAIL SATAN!”

The pentagram also plays an important role in **MASONRY AND THE EASTERN STAR**. Granted, many Masons and Eastern Star women are unaware of the connotation of this star (especially in the manner in which it is drawn), but many in the higher echelons of Masonry **KNOW** all about the particular symbol.

Let's turn to a few Masonic writers to see what they tell us about the meaning of the pentagram and the position in which it is drawn. We'll start with a quotation from Manly Hall. He points out that: "The **PENTAGRAM IS USED EXTENSIVELY IN BLACK MAGIC**, but when so used its form always differs in one of three ways: The star may be broken at one point by not permitting the converging lines to touch; it may be inverted by having one point down and two up; or it may be distorted by having the points of varying lengths. When used in **BLACK MAGIC**, the pentagram is called the 'sign of the cloven hoof,' or the **FOOTPRINT OF THE DEVIL**. The star with two points upward is also called the 'Goat of Mendes,' because the inverted star is the same shape as a goat's head. When the upright star turns and the upper point falls to the bottom, it signifies the fall of the Morning Star."

S. R. Parchment, in his book *Ancient Operative Masonry*, states that: "...the **PENTAGRAM** represents the liberated spirit. When the star is shown point upward, it is considered the symbol of the white magician who is able at will to leave the body [an out of the body experience] by way of the head; **WHEN DOWNWARD, BLACK MAGIC.**"

One Masonic pamphlet to be read in the Lodges is the *Short Talk Bulletin*, (reprinted in 1982) entitled "Symbolism." It states: "The five-pointed star—point up—is a very ancient symbol of man, and was used by the old sages to designate

the absolute sign of human intelligence. It refers to the spiritual element predominant in man, while the same figure with **TWO POINTS UP REFERS TO THE GOAT OF MENDES**—or that the beast is in the ascendant.”

Henry L. Stillson and William J. Hughan, in *History of Freemasonry and Concordant Orders*, describe the pentagram like this: “...when turned with one point down it represents EVIL, all that is opposed to the *good, pure, and virtuous*; in fine, it represents the GOAT OF MENDES.” [Emphasis in the original]

The Seeker's Handbook states the following about the inverted pentagram: “Inverted, it presents the abstract figure of a goat's head and is generally taken to represent the exploitation and glorification of the animal drives and erotic forces, as encouraged in SATANISM.” [Emphasis in the original]

Obviously, the inverted pentagram is a sign for evil. It represented Satan and is used for invoking evil spirits.

The pentagram is known by several other names: “Celtic priests called it the **WITCH'S FOOT**. In the Middle Ages it became known in Britain and

elsewhere in Europe as the goblin's cross, **DEVIL'S SIGN**, and the **WIZARD'S STAR**. Among the druids of Great Britain, it was the blasphemous sign of the Godhead."

"It is also Solomon's seal....In ancient times it was a magic charm amongst the people of Babylon."

"It was one of the most important symbols of the Pythagoreans, for whom its mathematical properties were most significant as the pentalpha, but who also fashioned it into trinkets to be used as talismen to ward off evil spirits, ill health, or misfortune. This symbolism persisted throughout the centuries of European history; in Germany, for example, it became the *Druttenfuss*, a **HEX SIGN** to prevent witches and goblins from entering barns and cottages."

The pentagram is also sometimes called a pentacle or pantacle. Webster's Dictionary says that the pentacle (or pentagram) is a "5-pointed or sometimes 6-pointed star used as a **MAGICAL** symbol." Witches Janet and Stewart Farrar describe the pentagram like this: "a five-pointed star, one of the **MAIN SYMBOLS OF WITCHCRAFT AND OCCULTISM** in general." A book on numerology agrees that the pentagram "is used in many ritualistic ceremonies including **witchcraft**."

Witchcraft books entitled Witchcraft: Yesterday and Today and Secrets of a Witch's Coven One witchcraft magazine explains: "The five-pointed star is one

of the world's oldest symbols and it has been used in many cultures since ancient times as an amulet to bring good fortune and ward off harm. Most **WICCAN** [witchcraft] **PRACTITIONERS ALSO WEAR IT** today as a symbol of their religion....In the Wiccan religion, the five points of the **PENTAGRAM REPRESENT THE FIVE ELEMENTS** of Nature—Earth, Air, Fire, Water, and Spirit—with the top point corresponding to Spirit, the unifying element....A Pentagram inscribed on a platter is called a Pentacle. Pentacles are used as ceremonial tools for the Element Earth and placed above windows and doorways to bless and protect a dwelling.”

Sybil Leek, a well-known **WITCH**, declares that the “pentagram has always been used in ritual **MAGIC** and in the **WITCHCRAFT** rites of healing.” New Ager Dick Sutphen agrees that the “pentacle holds an important place in ritual **MAGIC**.” Another book on witchcraft mentions: “The pentacle, the five-pointed figure, contained mystic symbols, used especially in **DIVINATION** and the **CONJURATION OF SPIRITS**. The pentalpha, a design formed by interlacing five A's, was also in similar use. To **SUMMON DEMONIAC HELP**, the pentagram was fashioned: a five-pointed geometric figure.”

International Imports produces an occult catalog. This company sells altar covers with pentagrams on them—a “circled pentagram for white magic occult work; **INVERTED PENTAGRAM FOR BLACK MAGIC RITUALS**.” Elsewhere this catalog advertises occult jewelry with a pentagram. It adds that the pentagram is the “most powerful of all occult talismans....It is alleged that it is more powerful than the cross....” We are also told that the **INVERTED PENTAGRAM IS “A SIGN FOR EVIL.”** Gary Jennings, in his book, *Black*

Magic, White Magic, reveals that: “...the most powerful and respected of all magical symbols was the pentagram—the figure of five sides and five angles....The belief was that if this figure were drawn with a single angle...**POINTING DOWN, THE SIGN REPRESENTED SATAN** and thus was **USED FOR INVOKING EVIL SPIRITS.**”

Since we have been informed several times by Masonic authors that the inverted (or Satanic) pentagram refers to the Goat of Mendes, let's take a look at what this goat represents. In *A Dictionary of Symbols* we notice that the he-goat is associated with the devil. Mendes was an “Egyptian god resembling Pan; he was worshipped in the form of a goat.”

Pan

One witchcraft organization, Nuit Unlimited Imports, sells a Goat of Mendes T-shirt. They mention that this goat is also known as Baphomet. An occult catalog mentions that Baphomet is the “traditional symbol of Pagans, witches, Satanists and mystics.” The *Dictionary of Mysticism* admits: “**Baphomet:** In occultism, the Sabbatic goat, in whose form Satan was said to be worshipped at

the Witches' Sabbath."

The Occult Emporium's catalog sells Baphomet wall plaques. They brag that the plaques are "in appropriate colors of each quarter, and the appropriate qabbalistic **Demonic** name in the circumference. **Officially approved by Rev. Yaj Nomolos, Church of SATAN.**" An earlier catalog stated that one particular **Baphomet** was "**worn by the Priest of Satan....**"

Describing Baphomet, Nuit Unlimited Imports says this: "...art work was drawn by Eliphas Levi, the foremost **OCCULT** authority of the 19th century. Symbols were included relating directly to ceremonial **MAGIC** and identified with Baphomet. Much of the same symbols carry forward as on the **DEVIL CARD** in the Thoth deck of Crowley.

"The **GOAT OF MENDES** itself is known as the '**GOD OF THE WITCHES**'...."

Levi's drawing of Baphomet shows his emphasis on sex, for he made Baphomet as an androgynous (meaning both male and female) figure. Satan, like Baphomet, "is often pictured as a hermaphroditic deity, having a male phallus and the breasts of a woman." "The winged staff between Baphomet represents the phallus."

The goat is one of the symbolical animals of Hermetic magic, says Levi, and it is the “symbol of generation.” In a book on witchcraft, *The Complete Book of Witchcraft and Demonology*, we find a picture of Baphomet. The caption states that he is the “horned god of the witches, symbol of sex incarnate.” This picture, by the way, shows Baphomet making the Devil’s triad with his right hand.

Starhawk, a witch, boasts: “The God of the Witches is sexual—but sexuality is seen as sacred, not as obscene or blasphemous. Our God wears horns—but they are the waxing and waning crescents of the Goddess Moon, and the symbol of animal vitality. In some aspects, He is black, not because He is dreadful or fearful, but because darkness and the night are times of power, and part of the cycles of time....

“The God of the Witches is the God of love. This love includes sexuality, which is also wild and untamed as well as gentle and tender. His sexuality is fully *felt*, in a context in which sexual desire is sacred, not only because it is the means by which life is procreated but also because it is the means by which our own lives are most deeply and ecstatically realized. In Witchcraft, sex is a sacrament, an outward sign of an inward grace.” [Emphasis in the original]

Eliphas Levi wrote: “The star of the microcosm, or the **MAGIC PENTAGRAM**, that star wherein the human figure was represented by Agrippa, with the head in the ascending point and the four members in the four other points—the Burning **STAR, WHICH, WHEN INVERTED, IS THE HIEROGLYPHIC SIGN OF THE GOAT OF BLACK MAGIC**, whose head can then be sketched in the star with the two horns above, the ears on the right and left, and the beard below, sign of antagonism and blind fatality, the goat of lewdness assaulting heaven with its horns, a sign execrated even in the Sabbath by initiates of a superior order.”

He also said:

“The **PENTAGRAM WITH TWO HORNS IN THE ASCENDANT REPRESENTS SATAN**, or the goat of the Sabbath....**IT IS THE FIGURE OF A HUMAN BODY** with the four members and a point representing the head; a human figure **HEAD DOWNWARD NATURALLY REPRESENTS THE DEMON**, that is, intellectual subversion, disorder and folly.”

Of course, one of the most sinister aspects of this star is its correlation with the god Set. “Set was the ancient Egyptian god of evil. He was also known by the names Seth and Sutekh. He was a wicked and powerful god who often used witchcraft to achieve his aims.”

Furthermore, the name **SET** (or Sut) is another name for **SATAN!** Proof of this can be found by turning to Masonic writer, Albert Churchward, in which he states: “Set or Sut, according to Plutarch, is the Egyptian name of Typhon—*i.e.* Satan of the Christian Cult.” John Yarker, another Masonic author agrees when he stated that **SET WAS “A DEVIL** identical with Typhon.” Yet another book, *Freemasonry and the Ancient Gods*, authored by Mason J. S. M. Ward, reveals that Set was “regarded as evil, because he represented darkness.” In *The Adelphi Quarterly*, a New Age magazine, we are notified: “The word ‘Satan’ comes from the Egyptian god of the underworld, Set or Seth.”

Further proof of the relationship between Set and Satan can be found in *The Satanic Bible*, written by Anton LaVey, the founder of the first Church of Satan. Under the enumeration of “The Infernal Names” for Satan is listed “Set.” On another page in this Satanic “bible,” “Set” is described as the “Egyptian devil.” In *Treasury of Witchcraft* is included a listing of other names for Satan, one of which is Set.

Another New Age book (which praises Lucifer) describes Set as “the early Egyptian god of death, evil, and hell.” Additionally, occultist, New Ager, and Theosophist, Helen Petrovna Blavatsky, links Set and Satan together when she writes: “...Hermes, the god of wisdom, called also Thoth, Tat, Seth, Set and *Satan*; and that he was, furthermore, when viewed under his bad aspect, Typhon, the Egyptian Satan, who was also *Set*.” [Emphasis in the original]

In fact, knowing the abominable background of Set, it is no shock to discover that in “ancient Egypt, Set was worshiped with obscene, homosexual rituals.” We are told that the rituals performed for Set and Sirius were so horrible and debased “that later rulers of Egypt defaced their temples and obelisks and tried to drive them from the land.” In mythology we find that Set himself was involved in incest for he married his sister, Nephthys. Set was also involved in adulterous affairs for he had at least two other consorts: Septet and Kheksit.

Set is likewise portrayed as the “Devil of Darkness,” “Prince of Darkness,” and “the Lord of the Underworld.” It is stressed that the “Underworld” of which Set is in charge, is not Hades, but Tartarus, for “Tartarus is the hell of the damned and it was of this world that Set was the Lord.” Set’s symbol is the **INVERTED PENTAGRAM!**

Michael Aquino “has written that Set is the oldest formulation of the being now called Satan, the embodiment of the sense of alienation and loneliness which man feels from the universe.” Aquino was a member of Anton LaVey’s Church of Satan. After leaving LaVey’s church, he started his own organization called the **Temple of Set** and his newsletter is entitled *The Scroll of Set*. The split between LaVey and Aquino was partially due to their individual conception of Satan. LaVey believed that Satan was just a symbol but Aquino contended that Satan, in the form of Set, was an absolute reality.

Michael and Lilith Aquino

In spite of Aquino’s beliefs and his status as a Satan worshipper, he was also a United States Army Lieutenant Colonel who served in Psy-Op operations. When Aquino appeared on the Oprah Winfrey Show, he described Satanists as “very decent, very law-abiding people [with]...a very high set of personal ethics...

[who have] nothing to do with evil.” Yet Aquino seems to contradict himself when he points out “that the essence of Satanism is an arrogant and hostile rebellion against universal law.”

Notice that Aquino uses a plain inverted pentagram (see picture on previous page). This symbol is **called Baphomet with or without the goat’s head** drawn in it. For example see the advertisement for the two Baphomet pieces of jewelry. One has the goat’s head and the other one has a snake wrapped about the pentagram but **BOTH** of them are referred to as Baphomet.

So, the pentagram really has a very evil connotation no matter how it is drawn. With one point up it represents Lucifer and with two points up it depicts Satan.

The Bible tells us that the whole world lies in wickedness at the present time (I John 5:19), but there is coming a day when Satan will be bound. Revelation 20:1-3 states: “And I saw an angel come down from heaven, having the key of the bottomless pit and a great chain in his hand. And he laid hold on the dragon, that old serpent, which is the Devil, and Satan, and bound him a thousand years. And cast him into the bottomless pit, and shut him up, and set a seal upon him, that he should deceive the nations no more....”

The final victor will be Jesus Christ.

7.

THE DREAM NET

The dream net (or dream catcher) is quite popular these days— especially for use in babies’ cribs. However, this is NOT an innocent ornament. It is actually a **charm**. A *Dictionary of Mysticism* reports that a **charm is “any magic word, formula, incantation, object, sign or amulet supposed to possess occult power.”** Webster tells us that a charm is an “incantation,” “the chanting or reciting of a MAGIC SPELL,” “an act or expression believed to have MAGIC power,” “AMULET.” An amulet is: “a charm (as an ornament) often inscribed with a magic incantation or symbol to protect the wearer against evil or to aid him.” A **charmer is called an enchanter or a magician!** (As an aside, many people wear “charm bracelets” and think nothing of it, but they are actually wearing magical symbols which have a tendency to attract evil spirits!) In *Roget’s Thesaurus* we find some interesting synonyms for charm. They are: enchantment, magic spell, spell, hex, amulet, and talisman. The verb form of “charm” means to bewitch or put under a magic spell. Do you want to wear any of these items or put a charm on your baby’s crib?!

One witchcraft magazine, *Circle Network News*, in an article entitled “Amulets, Talismans & Charms,” written by Selena Fox, a witch, explains the dream net like this:

“This **CHARM**, from the Ojibway tribe in Minnesota, is made of sinew stretched over a small hoop of ash. It is designed to bring a good night’s sleep, especially for children, and is hung horizontally over a child’s cradleboard or crib. Tradition says that the air is filled with both good and bad dreams waiting to come to a sleeping child. This net allows good dreams to find their way to the child through the hole in the center, while bad dreams are caught up in the web where they dissolve in the dawn’s light. Dream nets continue to be used by some Ojibway people today as in ancient times.”

One paper explaining the “Legend of the Dream Catcher” states:

“Long ago when the world was young, an old Lakota spiritual leader was on a high mountain and had a vision.

“In his vision, Iktomi, the great trickster and teacher of wisdom, appeared in the form of a spider.

“Iktomi spoke to him in a sacred language that only the spiritual leaders of the Lakota could understand....

“All the while the spider spoke, he continued to weave his web starting from the outside and working towards the center....

“‘If you believe in the great spirit, the web will catch your good ideas—and the bad ones will go through the hole.’

“The Lakota elder passed on his vision to his people and now the Sioux Indians use the dream catcher as the web of their life.

“It is hung above their beds or in their home to sift their dreams and visions.

“The good in their dreams are captured in the web of life and carried with them...but the evil in their dreams escapes through the hole in the center of the

web and are no longer a part of them.

“They believe that the dream catcher holds the destiny of their future.”

Without going into much comment on the above tale, most Christian researchers will recognize the occultic connotations throughout this little story. Notice the fantasy of a spider speaking, the use of visions, the “sacred language,” and the idea that it is the dream catcher that holds each person’s destiny rather than God.

Notice also the phrase “web of life.” The idea of an etheric or planetary web was developed by Alice A. Bailey, an occultist, but initially expressed by Chief Seattle around 1854 in his supposed quote:

“This we know...the earth does not belong to man, man belongs to the earth. All things are connected, like blood which connects one family. Whatever befalls the earth befalls the children of the earth. Man did not weave the **web of life**—he is merely a strand in it. Whatever he does to the web, he does to himself.”

John Lash reveals that it is a “[k]ey idea in New Age philosophy of holistics, central to the new paradigm of GAIA, and major subject of study and exploration in geomancy.” [Emphasis in the original] Geomancy, by the way, is a form of **divination**, which is explicitly forbidden in the Bible. (See Deuteronomy 18:10-12; II Kings 17:17; Jeremiah 14:14; Ezekiel 12:24; 13:6-7; Acts 16:16.)

Returning to the story of the dream net, we find that the spider (Iktomi) was known as a **trickster**. How can you be sure that he didn’t trick the people with his tale of the dream catcher? How can you be sure that the good dreams are

caught and the evil ones are filtered out? A trickster is known for lying, deception, and mischief. Even if the story were true, the spider himself could not be trusted to be telling the truth!

Another catalog that sells lots of occultic materials states:

“THE DREAMCATCHER WEB *Believe in its mystical powers, and you may sleep more peacefully! Through the center spirit hole flow your good dreams; trapped in the web are the ‘bad,’ which disappear with the morning sun.*” [Bold and caps in the original; underlining added]

If you noticed carefully, even the descriptions of this dream net differ from place to place. Some people believe that the bad dreams are caught in the web and others believe that the good dreams are caught. Regardless of the discrepancies, this is not an item that any Christian would want in their home.

We do not need any “protection” from occult sources. Jeremiah 7:8 says: “Behold, ye trust in lying words, that cannot profit.” All we need to do is to pray and ask the Lord to watch over our children and protect them and He will do it. Here are a few verses to ponder and remember:

“It is better to trust in the Lord than to put confidence in man” (Psalm 118:8).

“Blessed is that man that maketh the Lord his trust, and respecteth not the proud, nor such as turn aside to lies” (Psalm 40:4).

“What time I am afraid, I will trust in Thee” (Psalm 56:3).

“I will say of the Lord, He is my refuge and my fortress: my God; in Him will I trust” (Psalm 91:2).

“But let all those that put their trust in Thee rejoice: let them ever shout for joy, because Thou defendest them: let them also that love Thy name be joyful in Thee” (Psalm 5:11).

“Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths” (Proverbs 3:5-6).

8.

ELEMENTALS

Helena Petrovna Blavatsky, Theosophist, occultist, and New Ager, explains about the elementals. She writes:

“ELEMENTAL SPIRITS.—The creatures **evolved** in the four kingdoms of earth, air, fire, and water, and called by the kabalists gnomes, sylphs, salamanders, and undines. They may be termed the forces of nature, and will either operate effects as the servile agents of general law, or may be employed by the **disembodied spirits**—whether pure or impure—and by living adepts of **magic and sorcery**, to produce desired phenomenal results. Such beings never become men.

“Under the general designation of fairies, and fays, these spirits of the elements appear in the myth, fable, tradition, or poetry of all nations, ancient and modern. Their names are legion—peris, devs, jinn, sylvans, satyrs, fauns, elves, dwarfs, trolls, norns, nisses, kobolds, brownies, necks, stromkarls, undines, nixies, salamanders, goblins, ponkes, banshees, kelpies, pixies, moss people, good people, good neighbors, wild women, men of peace, white ladies—and many more. They have been seen, feared, blessed, banned, and invoked in every quarter of the globe and in every age. Shall we then concede that all who have met them were hallucinated?

“These elementals are the principal agents of disembodied but *never visible* spirits at **seances**, and the producers of all the phenomena except the subjective.” [Caps and italics in the original Boldface added]

One New Age catalog sells a tape on nature spirits. It asks:

What is a nature spirit? Oral tradition and literature depict nature spirits as fairies, trolls, leprechauns and angels.

Become acquainted with the qualities and sensitives of these unusual, mysterious creatures, from primitive to complex. This myth-dispelling tape reveals interaction patterns between nature spirits and humans, touching on common conceptions of satanic and demonic-type beings as well. Safely guided through **meditations to contact nature spirits**, you will be captivated as you feel the joyful love abundant in their enchanting realm.”

In the November/December 1989 issue of *Connecting Link* was an article on elementals entitled “Helpers.” This is an article dictated by a **SPIRIT GUIDE (demon)**. Samuel (the spirit guide/ demon) says:

“There’s a group that specializes in the earth. Another in air. Another in water. Another in fire. Another in spirit. The four basic elements, earth, air, water and fire work with specific things of earth. The elementals of spirit work specifically with that creation which has grown beyond simple form and are beings of spirits or humans. All of this group is called the angelic kingdom. It is also called the devic kingdom.

“Deva is a Sanskrit word which means ‘the shining ones.’...Deva is shining one (sic) because it is describing light energy.

“There are very many names within each of these groups and the names that I am using here are your words. Every language has its own words. Legends, childhood stories, will have many differentiations or labels for specific aspects of energy. For instance, earth energy is under a great broad category I am calling gnomes. Under gnomes there are very many species. Each of those species has a particular work to do. And it is the work that is to be done that determines the particular species....

“Perhaps you would prefer to think of earth energy as fairies rather than gnomes. One is perhaps a prettier thought but the idea of a gnome I believe gives a picture that is more earthy....

“Earth elementals, for this, will be called gnomes. Now, of course, you’ve got pixies and brownies. You’ve got dryads. You’ve got all kinds of things in here—elves, leprechauns....

“The devic kingdom is here to help you....

“There is a water energy, that which works with the element of water. They are called undines. Again, these are light beings. The only body that these beings have are the bodies which your thoughts create and they create an actual thought form which these light beings are more than delighted to slip into to try to **communicate with you [spirit communication]**.

“If you are convinced that sea spirits look like women with very pretty long hair and fishy tails, that’s what you’ll see. If you believe that leprechauns wear small green hats and small green suits and have pointed ears, they’ll put that on. If you believe a fairy has lovely translucent wings and long flowing gowns, that is what you will see. Your expectations are creating the body through which that light can manifest in a more easy manner....

“Sylphs are the elementals of air. You go into a city in which the air is quite filled with debris. Perhaps you need to be the only one in the city wise enough to call upon the sylphs to give you an extra dose of pure air.

“The element of fire is perhaps the most powerful of the earth elements. It is often considered the purification element. It is changeable. It is beautiful. Those elementals which work with fire are called salamanders. When you need fire, you call upon the salamanders. When you need fire to stop, call upon the salamanders....

“They’ve got their own work to do, but they are affected by you. When you call them, consciously or not, they are going to do your bidding....[When you meditate and say, ‘heal the planet,’—ed.] you are commanding legions.”

Some of these elementals are once again becoming popular. Take the troll, for instance. A few years ago the troll was a big fad for children. There were the “Treasure Trolls.” One author wrote: “They’re so ugly that they’re cute, but are they as harmless as the (sic) look?”

“Treasure Trolls come with a ‘wishstone,’ a crystal inserted in the belly button. Crystals are important to the New Age theology, as it is believed they possess a life force influence that can be tapped for healing purposes. The belly button is significant because it represents the umbilical connection, or the centre of the life force.

“The gems on the Treasure Troll doll have an additional significance, one not lost on the imagination of children. They are wishstones, **talismans** that can make their every dream come true.”

Another author states:

“The cute-ugly trolls that have captivated American children epitomize today’s

delight in neo-paganism when joined to popular ideals. While the trolls of Scandinavian fairy tales would uproot trees, enslave beautiful women and turn people into stone with cruel spells, today's monsters are environmentally correct. Note how one troll-maker disguises the evil and makes myth sound like truth:

“There was a time when waters were clean and forests were untouched, when ancient legends spoke of Guardians of the Earth...In Scandinavian lands, these mysterious creatures were TROLLS, and were known to guard what was left of the earth's natural treasures... Because they were rarely seen, people believed TROLLS no longer existed. Today, these nearly forgotten creatures are once again in our midst...working their earth magic to help humans.” (‘Troll Kidz’ by Russ Berrie and Co.) [Emphasis in the original]

Of course, children aren't the only ones being attracted to these spirit beings. When an earthquake in October 1989 shook a span of the San Francisco's Bay Bridge, “help” was soon offered in the form of a **talisman**. Webster tells us a talisman is “an object bearing a sign or character engraved under **astrological** influences and thought to act as a **charm** to avert evil and bring good fortune. The talisman put beneath the roadway was a troll with homed head and webbed feet. It is supposed to ward off evil spirits. “The craftsmen plan to offer trolls to other structures damaged by the earthquake, and even to new high-rise office blocks. Meanwhile, troll T-shirts are selling well in San Francisco.”

What most people don't realize is that the “word **troll comes from the Old Norse word for demon** and is defined by some sources as a ‘devil: a person of great wickedness or maliciousness.

So, when your child brings home a troll, he or she has in actuality brought home a representation of a demon!! These demons are also disguised as gnomes, pixies, dwarves, leprechauns, and elves (as well as many other creatures). I'm sure you recall the Keebler elves. Of course, Santa has his elves, too. There's also Snow White with her seven dwarves and Cinderella with her fairy godmother. All these are **demonic representations** but they are presented in such a “cute” way that most people have no idea of the evil character behind these objects.

Another elemental spirit is known as a vetta. There are supposedly evil and good vettas. The vetta was introduced to a host of people during the 1994 Winter

Olympics. “A CBS reporter described the event: ‘We introduce you to the mythical beliefs of the Norwegian people. Popping out of the ground are the Vettas, mythical characters rooted in ancient Nordic folktales and sagas.’” The reporter continued:

“‘We know them as gnomes, pixies, trolls....The vettas are an integral part of Norwegian beliefs...They are said to be knowledgeable and wise...and watch constantly over the activities of mankind. That’s because these are good vettas as opposed to the evil vettas. They say that if you are good to the vettas and consult [them—Ed.] before you build your barn, [they—Ed.] will be good to you.’”

In *The Seeker's Handbook* we are told that elementals are:

“Nature-spirits who inhabit the four elements, widely described in folklore as visible to people of former times who lived in close communion with nature; for instance, leprechauns, fairies, and ‘little people.’ Specifically, gnomes (Earth), undines (Water), sylphs (Air), salamanders (Fire)— all **CREATURES WHO FIGURE STRONGLY IN CEREMONIAL MAGIC AND PRACTICES OF NATURE-WORSHIP, OR WICCA.**”

One occult/New Age organization states:

“ELEMENTALS ARE USED IN HIGH MAGICK, AND OCCASIONALLY IN WITCHCRAFT AND OTHER MAGICAL TRADITIONS, TO GUARD MAGICK CIRCLES AND ASSIST IN MAGICKAL (sic) ACTS.

“In *The Golden Dawn*, Israel Regardie explains how to use elementals within rituals.”

“**Occultists** regard elementals as beings having substance, but visible only to those who have inner sight; some elementals are regarded benign, others as malignant.”

One organization that gained fame in the past 30 years is Findhorn Community. It was founded in 1965 by Peter and Eileen Caddy and Dorothy Maclean.

“[Maclean] made contact with the devas—nature spirits said to be associated with various plant, species, or landscape features....The first contact was made with a pea deva. Maclean was told that the garden would succeed as they cooperated with the devas by seeking their advice and gaining their permission to rearrange the landscape. Some like the pea deva were specific to a species, while others like the landscape deva relate to more general aspects of the garden itself. The garden’s abundance became known throughout the neighborhood and its noteworthy success brought several other followers to the community.

“During the next several years the group continued to follow Eileen’s guidance and the advice of the devas **channeled** through Maclean. Members also established contact with other **theosophical and spiritualist groups**.

In 1965 Peter traveled to a gathering of spiritual groups organized by Sir George Trevelyan, author and head of the Wrekin Trust. They were visited in 1966 by Robert Ogilvie Crombie, an Edinburgh **spiritualist** who, as a result of his visit, contacted the elemental nature spirits who work with the devas. Crombie soon made contact with **PAN, THE GOD OF THE NATURE ELEMENTALS**, and brought what was seen as completeness to the efforts of the Caddys and

Maclean. Findhorn residents began to think of themselves as an experiment in cooperation between devas, nature elementals, and humans.”

Pan

One person who worked with Findhorn was David Spangler. He wrote:

“**LUCIFER** works within each of us to bring us to wholeness, and as we move into a **NEW AGE**, which is the age of man’s wholeness, each of us in some way is brought to that point which I term the **LUCIFERIC INITIATION**, the particular doorway through which the individual **MUST PASS IF** he is to come “fully” into the presence of his light and his wholeness.”

Later in his book, *Reflections on the Christ*, Spangler states: “**LUCIFER** came to give us the final gift of wholeness. If we accept it then he is free and we are free. That is the **LUCIFERIC INITIATION**. It is one that many people now, and in the days ahead will be facing, for **it is an initiation into the NEW AGE.**” People who worship and adore Lucifer are also the ones who believe in elementals!

One elemental or nature spirit that most people would recognize is the

leprechaun. You can see this elemental every St. Patrick's Day. You also see the leprechaun on boxes of **Lucky Charms** cereal. Also, take a good look at the name of the cereal— Lucky Charms. Notice the occult overtone. By the way, the word cereal comes from Ceres—the **GODDESS** of grain.

Another popular creature is called a gargoyle. Although the gargoyle is not considered to be an elemental or a nature spirit, it is supposed to ward off evil. They “were thought to have protective, **SPIRITUAL** and **MAGICAL** qualities.” These creatures are appearing even in very prominent places. Dr. Dennis Cuddy states:

“That the New Age New World Order will include all aspects of life, even athletics, is demonstrated in the closing ceremony of the Olympics, in which ‘happy devils’ dance and figures representing demons writhe on the stadium floor accompanied by eerie music. It is a message to the people of the world. It also reminds us of the rows of grotesque gargoyles or demons’ heads that have recently been painted on the southeast and northeast corridor walls of the Library of Congress’ Thomas Jefferson Building Main Vestibule, **replacing** a group of our nation’s founders kneeling in prayer which has been on the walls since 1897, when the building was constructed. A poster describing the future agenda of the Library of Congress said the Thomas Jefferson Building ‘*now undergoing renovation, will reopen in 1993....Following its renovation, the Thomas*

*Jefferson Building will celebrate the **HUMANISTIC** legacy of the world.”*
[Italics in the original; Caps and boldface added]

A Dictionary of Symbols says that the gargoyles are “Fabulous animals and monsters make their appearance in mediaeval religious art as symbols of the forces of the cosmos, or as **IMAGES OF THE DEMONIAL AND DRAGON-INFESTED UNDERWORLD....**”

Annabel Wharton, a Duke art professor, reveals that:

“A general rise in interest in mysticism, the supernatural and primitive forms of Christianity...help account for the gargoyle fascination....

““We’re now in a period of eclecticism in which we’re mixing various doctrines....”

Marisa Lobe, a woman who makes gargoyles, said “she was intrigued by the idea that **PAGAN RELIGIONS COULD BE BLENDED WITH CHRISTIANITY.**” She “also makes leaf men, the tree spirits worshiped by the **Druids....**”

Another artist, Hope Stewart, is “attracted to the **MYSTICAL AURA** that surrounds” the gargoyles and said that they “give the feeling of a house that **SPIRITS WOULD VISIT.**”

Several years ago, a comic book was named *The Gargoyle*. Here’s one quote

from that book: *“I am the master of the shadows...and I claim that church as my own. I smell blood, the blood of the Lamb. He’s here. DRIVE HIM OUT! (The Gargoyle comic book, Marvel Comics).”* [Emphasis in the original]

In spite of the demonic implications of the gargoyle, one supposedly “Christian” magazine basically told parents not to worry if their child’s Christmas list contained a gargoyle on it. Jolene L. Roehlkepartain said:

“If a satanic-looking gargoyle appears on your teenager’s Christmas list this year, don’t scream. Many of the gargoyle reproductions are made into bookends, candlesticks, statues and even are on T-shirts. These gruesome, grotesque gargoyles are going to the top of most 15-to 30-year olds’ Christmas lists as the latest in new fads.

“Why the infatuation with these snarling figures? ‘They are shocking, forbidden and mysterious,’ said Mark Thomas, of The Alley, a Chicago gargoyle store. ‘These gargoyles,’ he says, ‘are perceived to be good guys who defend your home from evil.’”

Below is a list of some different kinds of nature spirits.

“Brownie: In the **OCCULT** lore of Scotland, the name given to dark-featured nocturnal nature-spirits which haunt country and farm houses; believed to be good-natured and bearers of good omen.”

“Harpy: In classical mythology, a monstrous, evil, rapacious and vengeful creature with the head and breasts of a woman, the body of a bird and the claws of a lion.”

“Fay: Fairy.” Also considered to be an elf..

Fairy: “A tiny imaginary being in human form, depicted as clever, mischievous, and possessing **MAGICAL** powers.”

“Sylph: An *elemental*...of the element Air.” [Emphasis in the original]

“Undine: An *elemental*...of the element Water; undines are believed to appear usually in the shapes of women, but able also to assume the forms of fishes or snakes.” [Emphasis in the original]

“Genie: See: *Jinn*. ”

“Jinn, jinnee: In Arab **OCCULTIC** terminology, one of a race of beings created out of fire, which inhabited the Earth before the advent of man. They can become visible or invisible at will, have many other superhuman and magic powers. Some *jinn*s are good and friendly to humans, others are malignant.” [Italics in the original; Caps added]

“Salamander: An *elemental*...of the element Fire.” [Emphasis in the original]

“Goblin: A mischievous nature-spirit.”

“Banshee: A nature-spirit believed in Ireland and Scotland to take the form of an old woman, to chant a mournful dirge under the windows of a house in which a person is to die soon.”

“Hatif: In pre-Islamic Arabic folklore, an invisible nature-spirit who can be heard by men as he gives advice and warnings.”

“Hobgoblin: A cheerful but very mischievous fairy or nature-spirit who delights in playing pranks on mortal beings.”

“Gnome: An *elemental*...of the element Earth.” [Emphasis in the original] The gnome is one “of a fabled race of dwarflike creatures who live underground and guard treasure hoards.”

“Ifrit: A viciously malignant spirit, of hideous appearance, in Arabic folklore.”

“Satyr: One of a class of woodland deities of Greek-Roman mythology, represented by the Greeks as a human figure with a horse’s ears and tail, and by the Romans as a human figure with a goat’s ears, tail, legs and budding horns.”

“Seiktha: In Burmese folklore, a tree spirit, usually malignant.”

“Pisky: See: *Pixie*.”

“Pixie, pixy: A fairy-like nature-spirit.”

“Yazatas: Nature-spirits or minor deities of Zoroastrianism.”

“Wild-women: Nature-spirits of German folklore.”

“Triton: In Greek mythology, a merman, son of Poseidon and Amphitrite.”

“Nat: In Burmese folklore, a nature-spirit of the forest.”

“Troll: A hideous, evil earth-**demon** of Teutonic mythology, living in caves.”
The troll can be a dwarf or a giant who also lives in the hills and under bridges.

“Water-sprite: A nature-spirit of the water.”

“Peri: In Persian mythology, a fairy-like creature descended from a race of fallen angels.”

“Tengus: Evil tree spirits (Japan), human in form but hatched from eggs.”

“Nenufaremi: In **OCCULT** lore, a name for elementals...of the air.”

“Sprite: A nature-spirit; a ghost or spook.” Also: “A small or elusive supernatural being; an elf or a pixy.”

“Spunkie: A malignant goblin which delights in attracting travellers who have lost their way, by letting them see a light, and lures them into a morass or over a precipice.”

“Spectre: A ghost or ghostly apparition.”

“Spook: A ghostly apparition.”

“Naiad: In **OCCULTISM**, a nature-spirit or elemental of rivers, lakes and springs.” A nymph.

“Oread: A nature-spirit of the mountains.” A nymph.

“Nereid: A sea nymph...as opposed to the *naiads*, the nymphs of sweet waters.”
[Emphasis in the original]

Dryad: “A divinity presiding over forests and trees; a wood nymph.”

“Oceanids: A nature-spirit or elemental...of the class of nymphs, dwelling in the ocean. In Greek mythology, the oceanids were the 4,000 daughters of Okeanos and Tethys.”

“Nymph; nympa: In occultism, little, graceful, gay female nature-spirits, usually friendly; they are generally regarded as water-spirits...but some authors place the *dryads* and *hamadryads*...in this class, too. Nymphs are regarded as long-lived, but not immortal, and possessing certain magical abilities.”
[Emphasis in the original]

“Leprechaun: Nature-spirits of Irish **OCCULT** lore.” A leprechaun is from the race of elves and is supposed to be able to reveal hidden treasure to someone who is able to catch him.

“Nivashi: In the magic lore of the Gypsies of Southeastern Europe, a malignant water-spirit.”

“Nix, nixie: A nature-spirit of the water; a nymph.”

“Kobold: A mischievous nature spirit, living in caves and subterranean places.”
A goblin.

“Ogre: In **OCCULT** lore, and in the folklore of certain races, an evil nature-spirit of hideous appearance, at times a man-eating giant.”

“Faun: A nature spirit, half man, half goat, venerated as a **rural** deity by the ancient Romans. The Fauns were attendants of Pan.”

Elf: “A small, often mischievous creature considered to have **MAGICAL** powers.”

Although some of these creatures may appear cute on the surface, all of them are

nonetheless **demonic entities** that have their origin in the **occult** world. Many Christians bring these items into their home innocently, but they really have no place in a Christian's home since they are representations of demons.

These elementals are also considered to be **spirit guides**, spirit helpers, and familiar spirits. The Bible clearly warns us about these things in numerous passages.

Leviticus 19:31: "Regard not them that have familiar spirits, neither seek after wizards, to be defiled by them: I am the Lord your God."

Leviticus 20:6: "And the soul that turneth after such as have familiar spirits, and after wizards, to go a whoring after them, I will even set My face against that soul, and will cut him off from among his people."

Deuteronomy 18:9-12: "When thou art come into the land which the Lord thy God giveth thee, thou shalt not learn to do after the abominations of those nations. There shall not be found among you any one that maketh his son or his daughter to pass through the fire, or that useth divination, or an observer of times, or an enchanter, or a witch, Or a charmer, or a consulter with familiar spirits, or a wizard, or a necromancer.

For all that do these things are an abomination unto the Lord: and because of these abominations the Lord thy God doth drive them out from before thee."

9.

TAROT AND PLAYING CARDS

With the resurgence of the occult and the New Age movement has come a new interest in the Tarot card deck. The *New Age Almanac* explains:

“The tarot, however, began to take on **OCCULT** associations and to be **USED PREDOMINANTLY FOR CARTOMANCY, DIVINATION, OR FORTUNETELLING** with cards. The person primarily responsible for the new developments in the tarot was a French Huguenot pastor, Antoine Court de Gebelin (1719-1784).

In the 1770s, de Gebelin became active in Parisian **FREEMASONRY** circles and joined the Philalethes, a French **MASONIC OCCULT ORDER** derived from the teachings of Martines de Pasqually (d. 1774). He became an accomplished **OCCULT** scholar. This French **occult** perspective came to be an essential building block in the revolutionary thought that would bring down the French government in a few years.

“Through his social connections, de Gebelin discovered the tarot. He immediately saw in them **OCCULT SYMBOLGY**, and tied them to ancient Egypt. As ancient Egypt disintegrated, the priests developed playing cards to hide their wisdom from the profane and at the same time ensure their survival. He concluded that they had traveled to Rome, kept in the possession of the popes who took them to Avignon. From Avignon they were disseminated throughout Europe.

De Gebelin published his speculations in 1781 in the eighth volume of his multi-volume study of the ancient world, *Le Monde primitif*, in which he begins to designate the occult symbology of the deck. De Gebelin is, for example, the one who originated the idea that the 22 Major cards were to be equated with the 22 letters of the Hebrew alphabet. In an essay by an unknown associate appended to his own account of the tarot, de Gebelin suggested that the **TAROT BE USED AS A METHOD OF DIVINATION**. The idea was adopted by a **fortune-teller** known only as Etteilla, who in 1783 published a book detailing a methodology for tarot cartomancy, and over the next decade authored a host of books and pamphlets on fortune-telling using the tarot and other means. Cartomancy with the tarot grew increasingly prevalent during the decades of post-revolutionary France.

“Etteilla’s students passed the practice of fortune-telling with cards to Alphonse-Louis Constant (better known under his penname, Eliphas Levi). **LEVI, THE FOUNTAIN-HEAD OF MODERN RITUAL MAGIC, INTEGRATED THE TAROT INTO HIS MAGICAL TEACHINGS AND ALIGNED IT WITH THE MASSIVE BODY OF OCCULT SYMBOLISM.** Through Levi’s very popular writings, the use of the tarot flowed into the **occult** groups which flourished in Europe at the end of the nineteenth century, and the **MASTERY OF THE SYMBOLISM OF THE TAROT BECAME A STANDARD PART OF THE TRAINING OF A MAGICIAN.**

The most famous of the accomplished masters of the tarot in France was Dr. Gerard Encausse (1865-1916), who wrote several influential books on the tarot and who was most responsible for lifting up an idea first proposed by de Gebelin, but given some expanded treatment by J. F. Vaillant, of tying *The Tarot to the Bohemians* (1889), written under the pseudonym Papus.

“In England, the tarot was integrated into the symbolism of that most famous of **magical** orders, the Hermetic Order of the Golden Dawn. One degree of the order’s program of advancement included the member’s construction of a complete tarot deck. Two of the order’s members would create the two most popular decks used in the twentieth century. Arthur Edward Waite (1857-1942) was the most scholarly member of the Golden Dawn.

He was responsible for the English translations of several of Levi’s works and he revised the first English translation of Papus’ text. More importantly, with the help of an artist, Pamela Coleman Smith, he devised a new tarot deck complete with all 78 cards (i.e., both the major and minor cards), the first such comprehensive revision in more than one hundred years. He also authored an instruction book, *The Pictorial Guide to the Tarot* (1910), with which anyone could take a deck of cards and master their use as a basic fortune-telling instrument. It was the combination of the deck and the instruction book which gave the Waite deck its dominance in the field through most of the twentieth century.

“The second accomplished student of the tarot was **Aleister Crowley** (1875-1947), the order’s nemesis. In 1909 Crowley began publishing the order’s secrets, including their teaching on the tarot, through an independent journal,

The Equinox. Crowley worked with Freida Harris in the design of a new tarot deck to which he composed a commentary much like Waite's *The Book of Thoth*. It was published in a limited edition in 1944, but the cards were not published until about 1960. Only after a new edition of *The Book of Thoth* appeared in 1969 did the Crowley deck begin to grow in popularity to rival Waite's deck. In choosing to name his deck after the Egyptian deity Thoth, Crowley asserted both his own preference for Egyptian **magical** symbolism and his belief in de Gebelin's claims as to the deck's Egyptian origin."

A Dictionary of Mysticism states:

“Tarot: A deck of playing cards, based on a system of **occult** symbols arranged in a pattern of 78 cards; 22 of these are tarot cards (‘major arcana’), the other 56 are suit cards (‘minor arcana’). These cards can be used for **divination**. The term *tarot* is applied also to designate such divination.” [Italics in the original; Boldface added]

We are further informed by an **occult** organization that the “Tarot has often been interpreted as a **fortune telling** device, but, as Gareth Knight reveals, it is also a profound and powerful system of High Renaissance **MAGIC!**”

Since we’ve already covered the yin/yang symbol and the I Ching, I think it is interesting to note that *The Occult Explosion* states: “The occidental **COUNTERPART TO THE I CHING IS THE TAROT CARD DECK**. The most widely-spread **OCCULT** tradition about the origin of the Tarot is that it

was invented by a great international assemblage of esoteric scholars in Egypt....” It adds: “Tarot and I Ching really have a lot in common....”

What is even more intriguing is that the Tarot is really the ancestor of the standard playing card deck that is used today. For instance one book on the Tarot reveals: “Even the common playing cards we know today are derived from the ancient tarot and vary widely due to their centuries of use as instruments of gambling.”

Stewart Farrar, a witch, indicates:

“The Tarot consists of seventy-eight cards, and is clearly the ancestor of the bridge-player’s pack. Fifty-six of them are divided into four suits—Cups (corresponding to Heart), Swords (Spades), Wands (Clubs), and Pentacles (Diamonds). Each suit has the Ace to Ten and the Knave—in between the Page and the Queen. (The Knight is sometimes called the Prince, and the Page the Princess.) The four suits represent the four **occult** elements—their usual allocation being Cups for Water, Swords for Air, Wands for Fire, and Pentacles for Earth....”

In *The Occult: A History* we are told:

“Apart from the Greater Arcana [in the Tarot deck], there are also the fifty-six cards of the Lesser Arcana, the four suits that have become the ordinary playing cards of today, with its rods, (or wands), cups, swords and shekels (or pentacles) changing into clubs, hearts, spades and diamonds. It is worth observing in passing, that we have here two rod-shaped objects—wands and swords—and two circular objects—cups and money—and since one of the commentators mentions that wands and money were used in mediaeval methods of divination, it would not be inaccurate to see them as related to the yarrow stalks and coins of the I Ching. Each suit has a king, queen, knight and knave, as well as cards

numbered from one to ten.”

In *Our Phallic Heritage* we find that the symbols used on the playing cards are actually sexual connotations. This book explains:

“The symbols used on playing cards are the diamond, heart, club, and the spade, which was often the acorn. In sex symbolism the diamond and heart were female symbols, and the spade and club were male symbols. The two colors represented the sexes; red symbolized the male, and black the female. In the Orient are found the yang-yin (male and female symbols), similar to the Northern Pacific Railroad trademark with these colors. Possibly coincidentally, remember that in certain sections of the cities there were the red-light districts, and they operated in the darkness.

“Both sexes are symbolized on each card by having a symbol of one sex and a color of the opposite sex. The trinity or complete family is seen in the three highest cards, which are the king, queen, and jack or knave. ‘Knave,’ like knave in German, means ‘boy.’ Therefore, in cards, we have the father, mother and child, the natural trinity or perfect family. There are four suits to symbolize the male triad and female unit, forming the Arba-el, or the four gods. The thirteen cards in each suit represent the lunar months or menstruations in a year.

They also represent the weeks in a season, and have been compared to the calendar, the colors red and black representing day and night; the four suits, the four weeks in a month, and four seasons in a year, or the four cardinal points of the compass; the twelve picture cards, the twelve months in a year; the fifty-two cards, the weeks in a year; and counting the jack as eleven, the queen as twelve, and the king as thirteen, the number of spots in the deck equals 364 and, with the joker, 365, the number of days in a year.”

I think it would be informative to give the history and the real meaning of ordinary playing cards. The following is taken from *The Gospel Standard*.

“The first deck of cards was made for Charles of France in the year 1392. King Charles was an insane man. It is not generally known by card players that cards have a secret meaning, but after the following statements were made public, the members of the gambling fraternity of professional gamblers declared that they are absolutely true.

“The *King* card represents the enemy of God, the devil. The *Ten* spot represents the spirit of lawlessness and is in direct opposition to the Ten Commandments of the Bible. Closely associated with the ten spot is the *Club* card. When cards were invented the club was the weapon of the murderer. In those days there were no revolvers or machine guns. The Club card stands for murder. The *Jack* represents the lustful libertine who lives on the gains of the prostitutes. It represents the moral leper. There is a game of cards called ‘the brothel game’ in which the players use the secret obscene language of the cards and converse with each other merely by dropping a card.

“Now we come to the part that is even more shockingly wicked. The *Queen* card represents the Virgin Mary, the mother of our Lord. In the secrets of cards she is called the mother of harlots. The *Joker* in card language represents our Lord Jesus Christ. Joker means fool! Jesus Christ is held up by the card players as a fool. And if this is not bad enough yet, the secret language of a deck of cards goes further and declares that Jesus (the Joker card) is the offspring of a lustful Jack, and the Queen mother, Mary.

“And there you have the true meaning of a deck of so-called innocent playing cards!” [Emphasis in the original]

As a little extra note, I thought it was interesting to find out that the President of the U.S. Playing Card Company (from 1929-1930) and the President of Standard

Playing Card Company (in 1898) was Benjamin C. Hawkes—a Mason.

Many people play or gamble with the regular card deck but is any of this pleasing to Christ—especially in light of the blasphemy that is represented by these cards? Not only do the regular playing cards come from the occultic Tarot card background, but the meaning of the cards are an insult and offense to Christ and the Christian teaching of the Virgin Birth. Jesus did not have an illegitimate birth. Matthew states: “Behold, a virgin shall be with child, and shall bring forth a son, and they shall call His name Emmanuel, which being interpreted is, God with us” (Matthew 1:23).

He was also named Jesus “for He shall save His people from their sins” (Matthew 1:21). He came to give His life as a sacrifice on our behalf so that we may have the privilege of receiving eternal life and having our sins forgiven.

I realize that many people had no idea what the cards which they were using meant, but now that you know, can you still use them?

10.

HUMANIST SYMBOLS

The humanist movement has adopted a number of symbols for their association. One of these symbols is called the “Happy Man.” This one, which was taken from an International Humanist and Ethical Union (IHEU) pamphlet, “is fast becoming the most universal humanist symbol.”

A slight variation of the IHEU’s symbol is also used on the American Humanist Association’s (AHA) literature. In a pamphlet by the AHA entitled “Statement Affirming Evolution As a Principle of Science,” we find:

“For many years it has been well established scientifically that all known forms of life, including human beings, have developed by a lengthy process of **evolution**. It is also verifiable today that very primitive forms of life, ancestral to all living forms, came into being thousands of millions of years ago....

“Creationism is not scientific, but it is a purely religious view held by some religious sects and persons and strongly opposed by other religious sects and persons. Evolution is the only presently known, strictly scientific, and not

religious explanation for the existence and diversity of living organisms. It is therefore the only view which should be expounded in public school courses on science, which are distinct from those on religion.”

Of course, the above statement is not true at all. Evolution **IS** associated with religion. In *Ancient Operative Masonry* we find: “It is the firm belief of students of **OCCULT SCIENCE** that through the slow process of **EVOLUTION**, the whole human family, save those who have elected to follow the left-hand path, shall attain self-mastery and finally **reach perfection.**”

Besides, evolution **IS NOT** scientific. The reason evolution has to be propagated is because the humanist denies God. Without God no creation can take place. Therefore, since they do not believe in God, they are left to create or design their own **THEORY** of how the world began without God. They have failed miserably in their speculations but they continue to maintain that evolution is scientific in spite of having **NO PROOF** whatsoever. Remember the Bible says: “The fool hath said in his heart, There is no God” (Psalm 53:1; 14:1).

Humanist Manifesto signer, Corliss Lamont, said that all “entities are related to one another in respect to gravity, most of them are totally at any one time to most others in most ways. **Every thing has some relations with other things....**” If this is the case, then how did a one-cell amoeba exist or survive when it was **ALONE** and could not be dependent on anything else? He also states:

“No matter how far back, in our analysis, we push the cause-effect sequences of the universe, we are certain to discover a **plurality of event-streams** that can be accurately described only in terms of a plurality of principles. There was no *one* event that started the universe going, and in fact no beginning at all.”

If there is a **PLURALITY** of events, then a **SINGLE** one-celled amoeba could never have existed alone and Lamont’s theory of evolution is **INVALID** on **HIS OWN** statement!

Additionally, **HUMANISM ITSELF IS A RELIGION**. Although humanism is often denied to be a religion, the early documents from humanists clearly show that humanism is a religion. I believe the humanists today are trying to steer clear of the “religious” label because they are heavily involved in the education

of children and religion is supposedly not allowed in the classroom. By hiding behind an erroneous (and deceitful) label, religious humanism has infiltrated the classroom as a religion while at the same time it repudiates it is a religion.

“In fact, the [former] president of the American Humanist Association, Lloyd Morain, has stated that **Humanism is ‘...a religion without God, divine revelation or sacred scriptures.’**”

“The position that Humanism is a religion was confirmed by the U.S. Supreme Court in 1965, when it ruled in the case of U.S. vs. Seeger: ‘A humanistic...belief that is sincerely professed as a religion shall be entitled to recognition as religious under the Selective Service Law.’”

“And again, in the case of Torcase (sic) vs. Watkins, the Court ruled that: ‘Among **religions** in this country which do not teach what would generally be considered a belief in the existence of God are Buddhism, Taoism, Ethical Culture, **Secular Humanism** and others.’”

“So when Madlyn (sic) Murray O’Hair got the Supreme Court to remove the right of the children to open their school day with a simple prayer because she wished to separate ‘Church and State,’ what she was doing was substituting one religion for another: a belief in God with a belief in Humanism. Mrs. O’Hair knew this because she had been the editor of the magazine, *The Free Humanist*, and was elected to the Board of the American Humanist Association in 1965, and was elected in 1973 for a second four-year term.”

Humanist Manifesto I, written in 1933, plainly states that humanism is a religion. In 1973 *Humanist Manifesto II* was written. In the “Preface” to these Manifestos we find: “Humanism is a philosophical, **RELIGIOUS**, and moral point of view as old as human civilization itself.”

Also:

“In 1933 a group of thirty-four liberal humanists in the United States defined and enunciated the philosophical and **RELIGIOUS PRINCIPLES** that seemed to them fundamental. They drafted *Humanist Manifesto I*, which for its time was a radical document. **It was concerned with expressing a general RELIGIOUS and philosophical outlook** that rejected orthodox and dogmatic positions

and provided meaning and direction, unity and purpose to human life. It was committed to reason, science, and democracy.”

Humanist Manifesto I states: “In order that **RELIGIOUS HUMANISM** may be better understood we, the undersigned, desire to make certain affirmations which we believe the facts of our contemporary life demonstrate.” The Manifesto adds:

“We therefore affirm the following:

“*First:* **RELIGIOUS HUMANISTS** regard the universe as self-existing and not created.

“*Second:* Humanism believes that man is a part of nature and that he has emerged as the result of a continuous process [evolution]....

“*Sixth:* We are convinced that the time has passed for theism, deism, modernism, and the several varieties of ‘new thought.’...

“*Eighth:* **RELIGIOUS HUMANISM** considers the complete realization of human personality to be the end of man’s life and seeks its development and fulfillment in the here and now. This is the explanation of the humanist’s social passion.

“*Ninth:* In place of the old attitudes involved in worship and prayer the **HUMANIST FINDS HIS RELIGIOUS EMOTIONS** expressed in a heightened sense of personal life and in a cooperative effort to promote social

wellbeing....

“*Twelfth*: Believing that religion must work increasingly to joy in living, **RELIGIOUS HUMANISTS** aim to foster the creative in man and to encourage achievements that add to the satisfactions of life.

“*Thirteenth*: **Religious humanism** maintains that all associations and institutions exist for the fulfillment of human life. The intelligent evaluation, transformation, control, and direction of such associations, and institutions with a view to the enhancement of human life is the purpose and program of humanism. Certainly religious institutions, their ritualistic forms, ecclesiastical methods, and communal activities must be reconstituted as rapidly as experience allows, in order to function effectively in the modern world....

“So stand the theses of **RELIGIOUS HUMANISM**. Though we consider the religious forms and ideas of our father no longer adequate, the quest for the good life is still the central task for mankind. Man is at last becoming aware that he alone is responsible for the realization of the world of his dreams, that he has within himself the power for its achievement. He must set intelligence and will to the task.”

The “Preface” to *Humanist Manifesto II* once again reiterates that **HUMANISM IS RELIGIOUS**.

“Many kinds of humanism exist in the contemporary world. The varieties and emphases of naturalistic humanism include ‘scientific,’ ‘ethical,’ ‘democratic,’ ‘**RELIGIOUS**,’ and ‘Marxist’ humanism. Free thought, atheism, agnosticism, skepticism, deism, rationalism, ethical culture, and liberal religion all claim to be heir to the humanist tradition.”

Isn’t it interesting to note that the **same** person, Paul Kurtz, who edited the *Humanist Manifesto I and II* testified in an Alabama textbook hearing and said that humanism is “non-religious....It uses science, reason, and evidence to test theory”? Of course, humanists believe that there are no absolutes and lying is okay. In fact, on “NBC’s ‘Today Show,’ January 22, 1990, Dr. Michael Lewis of the New Jersey Robert Wood Johnson Medical School said, ‘*Lying is an important part of social life, and children who are unable to do it are children who may have developmental problems.*’” [Emphasis in the original] You can

tell Lewis doesn't believe the Bible for Revelation 21:8 tells us that **ALL** liars have their part in the lake of fire. Proverbs 12:22 states: "Lying lips are **abomination** to the Lord." (See also Proverbs 13:5 and Ephesians 4:25.)

Corliss Lamont, a humanist and signer of the *Humanist Manifesto II*, also reveals a little of the **RELIGIOUS** background behind the writing of this document. He remarks:

"Approximately a hundred years after the founding of Unitarianism the more advanced members of this sect, most of them from the Middle West, started the movement known as **RELIGIOUS HUMANISM**. Dr. Curtis W. Reese, a Unitarian pastor, precipitated the discussions that led to **RELIGIOUS HUMANISM** by a challenging sermon at Des Moines in 1917 and an address at the Harvard Divinity School in 1920. Philosophers, teachers, writers, and clergymen quickly entered into the debate; and the result was the definite emergence of **HUMANISM IN RELIGION**, eventually culminating in the *Humanist Manifesto* of 1933. This key document was initiated by three Unitarian **ministers**: L.M. Birkhead, Raymond B. Bragg, and Edwin H. Wilson: and by two university teachers, Dr. A. Eustace Haydon, a professor of religion, and Dr. Roy Wood Sellars, a professor of philosophy. Dr. Sellars drew up the *Manifesto*'s first draft, which served as the essential frame and basis for the final formulations....

"A large proportion of the Unitarian churches in the United States are acknowledgedly Humanist."

Just in 1990, the American Humanist Association (AHA) held their annual meeting which was covered in the "**RELIGION**" section of the *St. Petersburg Times*. As Dr. Dennis Cuddy writes:

"...the evidence that humanism constitutes a religion is, in fact, overwhelming. *Webster's New International Dictionary* has defined it as a 'contemporary cult or belief calling itself religious but substitutes faith in man for faith in God.'

"The AHA is described in the *Encyclopedia of American Religions* and former AHA president Lloyd Morain and his wife Mary (who was the director of the International Humanist and Ethical Union which has 4 million members) wrote a book titled *Humanism as the Next Step*, which declared that

‘HUMANISM IS THE MOST RAPIDLY GROWING RELIGIOUS MOVEMENT IN AMERICA TODAY.’

“The AHA also certifies counselors who have the legal status of ordained pastors, priests, and rabbis, and in at least the Supreme Court decision, secular humanism was listed as a non-theistic religion.

“Because humanism clearly constitutes a religion, the promotion of its values in our public schools is unconstitutional, and should therefore be prohibited.”

With churches like the Unitarian churches (and many, many others), we can see the prophecy of Amos 8:11 coming true: ‘Behold, the days come, saith the Lord God, that I will send a famine in the land, not a famine of bread, nor a thirst for water, but of hearing the words of the Lord.’ “For the pastors are become brutish, and have not sought the Lord: therefore they shall not prosper, and all their flocks shall be scattered” (Jeremiah 10:21). “Many pastors have destroyed My vineyard, they have trodden My portion under foot, they have made My pleasant portion a desolate wilderness” (Jeremiah 12:10). “Woe be unto the pastors that destroy and scatter the sheep of My pasture! saith the Lord” (Jeremiah 23:1).

Earlier we mentioned evolution as one of the items promoted by humanists.

“Former Humanist of the Year Sir Julian Huxley said humanism’s ‘keynote, the central concept to which all its details are related, is evolution....’” Of course, evolution is not the only thing that Humanists propagate. *Humanist Manifesto II* states:

“*Sixth:* In the area of sexuality, we believe that intolerant attitudes, often cultivated by orthodox religions and puritanical cultures, unduly repress sexual conduct. The **RIGHT TO BIRTH CONTROL, ABORTION, AND DIVORCE SHOULD BE RECOGNIZED.** While we do not approve of exploitive, denigrating forms of sexual expression, neither do we wish to prohibit it, by law or social sanction, sexual behavior between consenting adults. The many varieties of sexual exploration should not in themselves be considered ‘evil.’ [This would include bisexuality, homosexual, bestiality, etc.]

Without countenancing mindless permissiveness or unbridled promiscuity, a civilized society should be a *tolerant* one. Short of harming others or compelling

them to do likewise, individuals should be permitted to express their sexual proclivities and pursue their life-styles as they desire.” [Italics in the original; Caps and boldface added.]

“*Twelfth*: We deplore the division of humankind on nationalistic grounds. We have reached a turning point in human history where the best option is to *transcend the limits of national sovereignty* and to move toward the building of a world community in which all sectors of the human family can participate. Thus we look to the development of a system of world law and a world order based upon transnational federal government. This would appreciate cultural pluralism and diversity.” [Emphasis in the original]

“Hence extreme disproportions in wealth, income, and economic growth should be reduced [redistribution is being advocated] on a worldwide basis.”

“At the present juncture of history, commitment to all humankind is the highest commitment of which we are capable; it transcends the narrow allegiances of church, state, party, class, or race in moving toward a wider vision of human potentiality. What more daring a goal for humankind than for each person to become, in ideal as well as practice, a citizen of a **WORLD COMMUNITY**. It is a classical vision; we can now give it new vitality.

Humanism thus interpreted is a moral force that has time on its side. We believe that humankind has the potential intelligence, good will, and cooperative skill to implement this commitment in the decades ahead.”

“We believe in equal rights for both women and men to fulfill their unique careers and potentialities as they see fit, free of invidious discrimination.”

“In *Humanist Magazine* (November/December 1980) author Riane Eisler, author of *The Equal Rights Handbook*, says: ‘It is absurd to say...that one is a humanist but not a feminist...feminism is the last evolutionary development of humanism, Feminism is humanism on its most advanced level.’”

Not only is feminism humanism, so is Marxism. “*Karl Marx’s own definition of Humanism reads: ‘Humanism is the denial of God, and the total affirmation of man.... Humanism is really nothing else but Marxism.’*” [Emphasis in the original] He also said: ‘Communism begins from the outset with

atheism...Communism, as fully developed naturalism, equals humanism.”
Another Communist, Leonid Brezhnev, stated: “Soviet society today is the real embodiment of the ideas of proletarian, socialist humanism.”

Brezhnev

Humanism, then, is really based on Feminism, Evolution, Atheism, and Communism.

It is also quite obvious that Humanism certainly has infiltrated the classroom with its philosophy.

“John Dewey, the father of modern American education, signed the first *Humanist Manifesto*, as did C.F. Potter, who wrote in *Humanism, A New Religion* that ‘education is thus a most powerful ally of humanism and every American public school is a school of humanism.

What can the theistic Sunday schools...do to stem the tide of a five-day program of humanistic teaching?’”

Dewey commented: “There is no God and no soul. Hence, there are no needs for the props of traditional religion. With dogma and creed excluded then immutable truth is also dead and buried. There is no room for fixed, natural law or permanent absolutes.”

Dewey, sad to say, was the leading educator named during 1924-1974 in the 1974 issue of *Saturday Review*. One individual who was polled remarked: “No

individual has influenced the thinking of American educators more.”

Once again showing a connection to **RELIGIOUS HUMANISM** and education, was an essay written by John Dunphy which won third place and was printed in the January/February 1983 issue of *The Humanist* (which is the mouthpiece for the American Humanist Association). The essay was entitled “A Religion for the New Age” and said:

“I am convinced that the battle for humankind’s future must be waged and won in the public school classroom by teachers who correctly perceive their role as the proselytizers of a new faith: a religion of humanity that recognizes and respects the spark of what theologians call divinity in every human being. These teachers must embody the same selfless dedication as the most rabid fundamentalist preachers, for they will be ministers of another sort, utilizing a classroom instead of a pulpit to convey humanist values in whatever subject they teach, regardless of the educational level—preschool, day care or large state university. The classroom must and will become an arena of conflict between the old and the new—the rotting corpse of Christianity, together with all its adjacent evils and misery, and the new faith of humanism, resplendent in its promise of a world in which the never-realized Christian ideal of “love thy neighbor” will finally be achieved.

“...It will undoubtedly be a long, arduous, painful struggle replete with much sorrow and many tears, but humanism will emerge triumphant. It must if the family of humankind is to survive.” [Emphasis in the original]

Another humanist, Paul Blanshard, commented in *The Humanist*:

“I think the most important factor leading us to a secular society has been the educational factor. Our schools may not teach Johnny to read properly, but the fact that Johnny is in school until he is 16 tends to lead toward the elimination of religious superstition. The average child now acquires a high school education, and this militates against Adam and Eve and all other myths of alleged history.”

J. J. Blackham, the founder of the International Humanist and Ethical Union (IHEU) wrote in *The Humanist* that if schools would teach dependence on one’s self, “they are more revolutionary than any conspiracy to overthrow the government.”

This is why the symbol of the humanist is the “Happy Man.” Man is supposedly sufficient in and of himself. There is no God in humanist theology. As humanist Corliss Lamont states:

“In the Humanist ethics the chief end of thought and action is to further this-
earthly human interests in behalf of the greater glory of man. The watchword of
Humanism is happiness for all humanity in this existence as contrasted with
salvation for the individual soul in a future existence and the glorification of a
supernatural Supreme Being.”

“For his great achievements man, utilizing the resources and the laws of Nature,
yet without Divine aid, can take full credit. Similarly, for his shortcomings he
must take full responsibility. **HUMANISM ASSIGNS TO MAN NOTHING
LESS THAN THE TASK OF BEING HIS OWN SAVIOUR AND
REDEEMER.**”

“By laying stress on the beauty of Nature, Humanism becomes able to make one
of the most powerful and persuasive of all affirmations....There is no heavenly
Father in or behind Nature....”

Humanism, then, simply is a religion of **SELF**. Man is the redeemer, man is the
creator, man is all there is and all that really counts. The Bible tells us that the
emphasis on self would take place in the last days. Paul wrote: “This know also,
that in the last days perilous times shall come, **FOR MEN SHALL BE
LOVERS OF THEIR OWN SELVES**” (II Tim. 3:1-2a). Christ came to redeem
mankind from their selfish ways and desires. Isaiah 53:6 clearly says: “All we
like sheep have gone astray. **WE HAVE TURNED EVERYONE TO HIS
OWN WAY** and the Lord hath laid on Him the iniquity of us all.”

As mentioned at the beginning of this chapter, the “Happy Man” is the most
universal humanist symbol. I found it quite fascinating that the June 1998 issue
of *The Emergence* (which is the newsletter put out by Benjamin Creme who is
supposed to be the forerunner of the Maitreya) claimed: “Maitreya actually
means ‘**The Happy One**’—the one who brings happiness to the world.” Seeing
that humanism is a religion for the New Age and that Maitreya is the New Age
“Christ,” I think the correlation is noteworthy. Another New Age organization is
the 3HO which stands for “Healthy, **Happy**, Holy.”

In *The Mystical Maze* we find this about the 3HO:

“A *kundalini* yoga sect founded by yogi Bhajan. This sect is based on *sikhism*, a mixture of Hinduism and Islam, and teaches both monotheism and reincarnation. Enlightenment is achieved within this cult through the awakening of the *kundalini* or ‘serpent power’ located at the base of the spine. Through various yoga techniques this mystic power coils its way up the spine eventually uniting with the mind to produce a state of altered consciousness or enlightenment.”
[Emphasis in the original]

A brochure received directly from the 3HO mentions about the Summer Solstice they held in June 1987. It was on “White Tantric [sex] Meditation with Yogi

Bhajan.” They brag:

“It is said that only a few in any generation are fortunate enough to instruct their souls under the guidance of a master. Yogi Bhajan, master of Kundalini Yoga and White Tantric Yoga, has dedicated his life to helping people to see beyond their limitations and find their own creative potential. Daily meditations directed by Yogi Bhajan are the heart of the Summer Solstice experience. **White Tantric Meditation is a powerful means of establishing faith in the SELF**, trust in others and balance in personal relationships.”

Also during this “Summer Solstice” there were “classes in **KUNDALINI YOGA**, marriage and relationships, business and personal success, **NUMEROLOGY**, herbology, and the healing arts.” The 3HO “operates the Kundalini Research Institute, publishes the *Journal of Science and Consciousness for Living in the Aquarian Age*, and is listed in *The First Report and Directory NETWORKING*.” According to the *Encyclopedia of Associations* (1998), there are 265,000 members in this organization and 108 centers in the U.S., Canada, and elsewhere.

“Yogi Bhajan is the founder of the Sikh Dharma and its better known educational arm, the 3HO organization (Healthy, Happy, Holy Organization). Bhajan’s full formal name is Siri Singh Sahib Harbhajan Singh Khalsa Yogi. Siri Singh Sahib is a title conferred on him by the center of Sikh religious authority in Amritsar. He was born Harbhajan Singh in Kot Harkan, Tehsil Wazirabad, India (now Pakistan) on August 29, 1929. Khalsa is an adopted last name that replaces the family name with which he was born. His family name indicates the subcaste of his family in the Hindu caste system, and Sikhism generally opposes that system....

“Bhajan worked as a customs official and Interpol officer from 1954 to 1969, when he came to the United States and founded the 3HO Foundation (1620 Preuss Rd., Los Angeles, CA 90035), which he has continued to direct. Under his leadership, the 3HO Foundation acts as a teaching and outreach organization which combines traditional Sikhism and yoga....

“Bhajan has been co-president of the World Parliament of Religions; cochairperson (sic) of the World Fellowship of Religions; director of the Unity of Man Conference; a member of the Interreligious Council of Southern

California; and a member of the board of directors of the American Council of Executives in Religion....

“The core of Bhajan’s teaching is a synthesis of Sikhism and a type of Kundalini yoga that he assembled from information gathered from many different teachers and practitioners in India and Pakistan.”

Yogi Bhajan even has live classes of Kundalini Yoga and Meditation on the Internet. He states:

*“By better understanding the **SELF** and its mysteries, we gain tolerance and compassion for others. It is in this relaxed state that we can express our infinite potential for love, creativity, and freedom. It is here that we can begin to experience the oneness of all things and the love inherent in all creation.”*
[Emphasis in the original; Caps and boldface added.]

Once again we can see the focus on **SELF**. Also, in the June 1998 issue of *Imprimis* we find that even art puts an emphasis on the human being. The article explains:

“From earliest times, the human figure has symbolized the unknown forces that govern the universe. It has also served as the vehicle for those powers mankind ardently reveres. In one form or another, it has been at the center of ritual throughout the world since prehistoric times, and it has been the medium through which the human and the divine communicated.

“The human figure embodies the universe of human existence and experience. It personifies all that is human and is, therefore, the one form in art with which we totally, uniquely, and immediately identify. That empathy derives from the fact that the figure is the complete expression of the beauty, mystery, and dignity of the human person, the quintessential form of life....

“The ancient Greeks were the first to establish standards of beauty for the human figure based on the perfection of physical development. They recognized that the body’s design is a perpetual marvel of proportion, flesh, and organization....

“...the human figure has been the central theme in art and people’s yearning for immortality its underlying principle.”

Yes, the Greeks did prize the human body—but they drew and sculpted their human figures in the nude. In fact, says Terence D. McLean (in reference to the Greek Olympics), “...once in the stadium, everyone was required to be naked.”

“Olympic athletes served as models for those workmen who were fashioning idol Greek gods and goddesses for the people to worship! Thus, the gods and goddesses were endowed with spectacular physical gifts that resembled those of the Olympic athletes. And the legends built to support these idols were that the Greek gods were almost always immoral and promiscuous.”

Of course, this immoral behavior is fully condoned (and even sometimes supported and promoted) by the humanists. Remember (as mentioned earlier) that the *Humanist Manifesto II* says:

“While we do not approve of exploitive, denigrating forms of sexual expression, neither do we wish to prohibit it, by law or social sanction, sexual behavior between consenting adults. The many varieties of sexual exploration should not in themselves be considered ‘evil.’...a civilized society should be a *tolerant* one. Short of harming others or compelling them to do likewise, individuals should be permitted to express their sexual proclivities and pursue their life-styles as they desire.” [Italics in the original]

A lot of this sexual tolerance (or a better word would be promiscuity) is also being taught in our schools. Remember, as was mentioned in the chapter on the yin/yang, that the Sex Information and Education Council of the United States (SIECUS) stated that contraceptive services should be available to minors. They added: “It is the position of SIECUS that the use of explicit sexual materials (sometimes referred to as **pornography**) can serve a variety of important needs in the lives of countless individuals....” Again, the Bible warns about this in Jude 1:17b-19: “[T]he apostles of our Lord Jesus Christ...told you there should be mockers in the last time, who should walk after their own lusts. These be they who separate themselves, **SENSUAL**, having not the Spirit.”

“In 1933, the Humanist Manifesto declared that ‘social hygiene’ (sex education) would be one of the paths of Humanism for the future. In 1961, Elysium, Inc. was incorporated to purvey **pornography** which would lead to the formation of SIECUS ‘to solve the problem of pornography’ by sex education in schools.”

A 1969 *Ankh* magazine says this about the Elysium Institute:

“The **ELYSIUM INSTITUTE** is a non-profit organization whose purpose is research and dissemination of information in the behavioral sciences relating to nudity and the ‘body taboo’ neuroses so prevalent in our culture. The Elysium Institute promotes self-acceptance and acceptance of others through a wholesome attitude towards the human body and its functions, both physical and emotional, and including man’s sexuality.” [Emphasis in the original]

The “Elysium Credo” states (in part):

“We will implement this credo by aiding as many people as possible through sensitivity-awareness and psychotherapy programs, and through the experience of recreational activities in which nudity is enjoyed on a clothing-optional basis....

“Here, people experience benefits of unencumbrance from clothing in an appropriate setting....The casual acceptance of the naked self brings with it emotional freedom unknown to those uninitiated to social nudism. Benefits of freedom from clothing are enormous for children....A minister who recently visited Elysium Field remarked that, without effort on anyone’s part, these children were getting the most wholesome sex education he could imagine.”

The SIECUS Circle informs us:

“SEECUS itself, in fact, maintains close liaison with the pornography cartel through its connection with Elysium Institute, located in Los Angeles. This hedonistic haven prides itself on the programs of nudism, sensitivity awareness, and group sex activities which it offers to its patrons. SIECUS is listed in the Elysium Institute Directory as pursuing the same objective as, and maintaining an exchange of information with, Elysium, as are also the Sexual Freedom League (of Berkeley); Castalia (Timothy Leary’s “League for Spiritual Discovery”); the Institute for the Study of Non-Violence (whose co-director is Humanist Joan Baez); the Institute for Rational Living (headed by Humanist Albert Ellis); the University of Humanism; and the Underground Press (dedicated to the promotion of drug usage, sex, sensitivity training, and obscenity).

“The published aims of SIECUS and Elysium, which are amazingly similar in phraseology, have been compared on a point-by-point basis in a special newsletter published by a group of physicians opposed to SIECUS-style sex education. Particularly striking is the fact that Elysium Institute’s publishing arm, Elysium, Inc., also prints *Nude Living*, *ANKH*, *Jay Bird*, and *Sun West*—magazines that feature totally unretouched male and female nudes in a variety of lewd and suggestive poses. The physicians’ newsletter further discloses that, while Elysium, Inc., is entrenched in the field of pornography, it nevertheless wishes to retain some semblance of respectability, and thus assumes the fictitious name of “PANU-CO” when advertising certain obscene publications in its magazines.”

A few other names listed in the Elysium Institute Directory include: “the American Humanist Association; Esalen Institute; Kairos; the Sexual Freedom League;...Glide Urban Center; the Neo-American Church; and the Society For Human Abortion—to name just a few!”

It is interesting to notice that both SIECUS and Elysium use the yin/yang as their logo. In fact, a magazine published by Elysium entitled *Nude Living* showed a yin/yang logo on the back cover of their magazine in order to advertise *Nude Living* and *Sundial*.

Another logo that Elysium uses is the ankh. The ankh is described elsewhere in my book.

I find it fascinating that “Elysium” was a term in mythology. It was supposed to be the sacred abode of the deities. Elysium was also an “abode of **happiness.**” (Remember the “Happy Man” symbol of the humanists?) Elysium was “opened to the favourites of the Olympians and the souls of the just.” (Remember the nudity of the Olympians?) Are all these items just “coincidental”?

There’s one other fascinating bit of information about Elysium. The *Treasury of Witchcraft* says that “Elysium” was a name “Invoked in Roman Necromancy”! Necromancy, by the way, is communication with the dead.

Returning to the “Happy Man” symbol, observe the logo of the Communities in Schools of North Carolina. Doesn’t it look like a variation of the “Happy Man”? Remember that our schools are filled with humanistic teachings, so this could be a very applicable logo.

Notice also the logo for *Holistic Education Review*. Their magazine states:

“Holistic Education Review aims to stimulate discussion and application of all **PERSON-CENTERED** educational ideas and methods. Articles explore how education can encourage the fullest possible development of **HUMAN POTENTIALS and PLANETARY CONSCIOUSNESS**. We believe that **HUMAN FULFILLMENT**, global cooperation and ecological responsibility should be the primary goals of education, and we will inquire into the historical, social, and philosophical issues that have prevented them from so becoming.”

The Holistic Health Association of the Princeton Area appears to use a “Happy Man” variation. This isn’t surprising since they state that they integrate the best approaches from **HUMAN POTENTIAL therapies, HUMANISTIC psychology, parapsychology, meditation, visualization, biofeedback psychotherapy, HUMANISTIC gerontology, etc.**

The Society for Individual Liberty, a Libertarian group, also seems to utilize the “Happy Man.”

Even the Youth for Christ group incorporates a design similar to the “Happy Man” in their logo. Is this just coincidental? After all, Dr. Siang-Yang Tan of Youth for Christ International was installed as a Professor of **PSYCHOLOGY** on April 28, 1998. He “will this year be the President of Division 36 (Psychology of Religion) in the world famous American Psychological Association.”

Minirth/Meier New Life Clinics are steeped in psychology, so I guess it’s not surprising to see that they also use a “Happy Man” variation.

Additionally, the Payap University has an interesting logo. There is a 666 variation but if you carefully notice the center of this design, there appears to be a “Happy Man.”

Below are a few more symbols used by humanists.

“Used by The American Humanist Association and The Fellowship of Religious Humanists, these circles were inspired by Edwin Markham’s praise of tolerance: *He drew a circle that shut me out/Heretic, rebel, a thing to flout/But love and I had the wit to win/We drew a circle that took him in.*” [Emphasis in the original]

“The overlapping circles symbolize the merger of Unitarians and Universalists; the lamp, knowledge and the appeal to reason. Used originally by the Unitarian Universalist Service Committee, it has been adopted widely by liberal churches.”

“A conventionalization of the universal man of Leonardo da Vinci; until recently used on the cover of *International Humanism*, this symbol has more recently been used by The American Ethical Union.”

“I.H.E.U. is the International Humanist and Ethical Union organized in Amsterdam in 1952 with 38 Humanist organizations from 23 countries related to it in 1970.”

“Among humanists the peace symbol symbolizes the global hope for a shared world at peace where all men may realize security, brotherhood and creativity.” This symbol is covered more thoroughly in the chapter on “Hand Signals.”

Below are a few other possible representations of the “Happy Man” symbol.

**COUNCIL

SECULAR
HUMANISM**

Cocle

Good Luck Lady

A truly happy person is one who delights himself or herself in the Lord. Psalm 37:4-5 says: "Delight thyself also in the Lord; and He shall give thee the desires

of thine heart. Commit thy way unto the Lord; trust also in Him; and He shall bring it to pass.”

11.

ANIMALS, BIRDS, AND INSECTS

Many animals are used to portray certain meanings. Obviously, not every animal you see has an occultic meaning connected to it. However, the occult world does make use of particular creatures and when they do so, there is a meaning behind it. For instance, let's look at the dolphins. *The Seeker's Handbook* states: "Dolphin stories are a part of planetary folklore."

The dolphin was one of the emblems of the goddesses Ceres and Demeter and one of the favorite animals of the god Dionysus. Melcarth, the god of the sea, is represented as riding on a dolphin. Occasionally the god Apollo would assume the form of a dolphin. Neptune is often portrayed seated in a chariot drawn by dolphins. Eros (or Cupid) was "the boy on the dolphin." The Nereids were fifty nymphs who rode on dolphins and bore tridents. The *Handbook of Ornament* adds: "In symbolic representations he [the dolphin] is the companion of Nymphs, Nereids, and Tritons, and of Arion, Aphrodite, and Neptune, with whose trident he is often combined in ornament." Below are some dolphins. Notice the trident variations on the crown and the tails.

Earlier we covered the Goat of Mendes (a portrayal of Satan). His consort was a dolphin goddess.

A Dictionary of Symbols explains:

“Dolphin The figure of the dolphin can be seen in many allegories and emblems, sometimes duplicated....But the inverted arrangement, that is, with one dolphin pointing upwards and the other downwards, always symbolizes the dual cosmic streams of involution and evolution; this is what the 17th-century Spanish writer Saavedra Fajardo meant by ‘Either up or down.’ **The dolphin by itself is an allegory of salvation**, inspired in the ancient legends which show it as the friend of man. **Its figure is associated with** that of the anchor (another symbol of salvation), with **pagan, erotic deities** and with other symbols. The ancients also held that the dolphin was the swiftest of marine animals, and hence, when, among the emblems of Francesco Colonna, it is shown twined round an anchor, it comes to signify arrested speed, that is, prudence.”

The renewed interest in dolphins took place in 1959 when psychologist John Lilly started doing dolphin research. He was convinced that dolphins were advanced spiritual beings. Many New Agers also feel that dolphins can be communicated with telepathically. “In a 1987 interview Lilly said telepathy is, at least theoretically, the most effective way for human beings and dolphins to communicate....”

Richard O'Barry trained dolphins for the television show *Flipper*. He said:

“I worked with dolphins for seven or eight years. We had five of them on the *Flipper* show, and we did 120 half-hour TV shows and two features in three years. The few dolphins we had were asked to do so much, so many different tricks, that we were teaching them on the spot. At the end, I realized it was *all* psychic! No words were used; they just seemed to sort of understand, anticipate what you wanted them to do, and do it.... If you want to call it telepathy or whatever, it was very much a part of what was going on.” [Emphasis in the original]

Many groups have sprung up that offer workshops where one can swim with the dolphins, *etc.* The Dolphin Data Base has a list of 3,000 organizations and people who are involved in dolphin projects with at least 300 of them attempting to make inter-species communication. One group, the Dolphin Society Church:

“trains persons in out-of-body traveling with dolphin and whale spiritual liberators. Through the practice, the Society’s advertising claims, ‘one can make friends, **spirit helpers** and lovers in the sea, visit alien star systems, learn healing, **levitation**, **teleportation** and shapeshifting.’”

The *New Age Almanac* says:

“New Age fascination with dolphins stems from a romantic nature mysticism

which is expressed in New Agers' concern with ecology and animal rights. Unlike benevolent alien visitors or wise Ascended Masters, whose existence is not supported by an abundance of evidence, there is no doubt dolphins do exist. Nor is their intelligence in doubt, although scientists concede the reach or limitations of their intelligence are unknown. For all of these reasons, dolphins continue to be a source of speculation and fascination for the New Age community."

The dolphin was even incorporated into children's education in the classroom. A self-esteem program, Developing Understanding of Self and Others (DUSO), has a series of 42 guided imagery lessons. When the children relax and close their eyes, they are to imagine that they are journeying to faraway places. There they meet animals such as DUSO the dolphin.

Another animal that became popular in the past decade was the goose. *The Continuum Encyclopedia of Symbols* claims:

"In Egyptian mythology, the goose plays an important role as the primeval goose that either laid the world egg or—according to different versions—was born from it. In Egypt, as in China, wild geese were also regarded as mediaries between heaven...and EARTH.—In Greece, the goose was sacred to Aphrodite

and, in Rome, was sacred to Juno; it was regarded as a symbol of love, fertility, and marital (sic) fidelity, yet also of vigilance....For the Celts, the goose was symbolically closely related to the SWAN and, like the swan, was thought to be a messenger from the spiritual world.” [Emphasis in the original]

The goose was sacred to the Goddess. The Egyptian god Seb (also Geb or Keb) was called the “great cackler” and “the goose that laid the cosmic egg.” He is sometimes depicted with a goose on his head and he sometimes takes on the form of a goose. He is the God of the Earth but he also has authority in the Underworld.

The cosmic egg (or world egg) is encountered in many cultures. It is “a symbol of the totality of creative forces—is thought to have been present at the primeval beginning, when it floated on the Primeval waters and issued from itself the entire world and the elements, or initially at least heaven and earth.” It is also a symbol of perfection. “In alchemy, the philosophical egg played an important role as a symbol of PRIMA MATERIA, from which the Philosophical fire hatched the PHILOSOPHERS’ Stone.”

[Emphasis in the original] Below is a picture of the world egg (portraying Providence) with a snake (representing time) entwined about it. Pike says: “The

Serpent entwined round an Egg, was a symbol common to the Indians, the Egyptians, and the Druids. It referred to the creation of the Universe.” Also, below, is a drawing of Mercury in a philosophical egg.

Returning to the symbolism of the goose, we find in *Treasury of Witchcraft* that the goose was linked to the Indian god Brahma. It is also an emblem of Horus, Osiris, and Isis, and associated with Mars, Priapus (a fertility god), and the goddess Bau.

In *The Pagan Festivals of Christmas and Easter* we learn about the “Christmas goose”:

“Other Christmas customs are the ‘Christmas goose’ (or its equivalent in various parts of the world), and ‘Christmas cakes.’ Both were used in the worship of the Babylonian ‘messiah.’ The goose was sacred in many ancient lands: Rome, Asia Minor, India, Chaldea. In Egypt, the goose was a symbol for a *child*, ready to *die*! In other words, a symbol of the pagan ‘messiah,’ ready to give his life (supposedly) for the world. Blasphemy! A satanic mockery of the truth.”
[Emphasis in the original]

The quail is important in China. There it:

“is a symbol of spring because it is a migratory bird that returns in the spring. It

is closely associated with fire, light and thus with the Yang principle. Its annual coming and going also made the quail a symbol of the alternating influence of the opposing forces.”

The butterfly is also quite popular today. It is used in the 24° of Masonry on the cordon. *A Bridge to Light* states that the cordon “is a broad, watered scarlet ribbon worn from right to left. On the front is embroidered in gold, a **winged-globe** and under it a **scarab**, under which is a brilliant **butterfly**; all are symbols of immortality.”

Along with the symbolism of immortality, the butterfly represents reincarnation, rebirth, and resurrection.

The Japanese use the butterfly as a symbol of womanhood but two butterflies

depict marital happiness.

“To the Aztecs the butterfly symbolized the soul or the breath of life exhaled by the dying. A butterfly fluttering among the flowers represented the soul of the warrior who had fallen on the battlefield....Dead warriors accompanied the Sun on the first half of his visible journey, until midday. They then descended to earth in the shapes of hummingbirds or butterflies....

“Thus the Aztec fire-god wore a pectoral ornament called ‘the OBSIDIAN butterfly.’ Like flint, obsidian is a fire-stone and its use for the blades of

sacrificial knives is well known. In ‘the House of Eagles’ or Warriors’ Temple, the Sun was depicted as a butterfly.

“Symbol of daylight and the solar fire—and hence of the warrior’s SOUL—the butterfly for the Mexicans was also a symbol of the ‘Black Sun’ which passed through the Underworlds during its nightly journey. It was thus a symbol of hidden chthonian fire and associated with ideas of sacrifice, death and resurrection. In Aztec carving, the butterfly became an alternative for the hand as the emblem of the figure FIVE, the number of the centre of the Earth....

“Similarly contemporary psychoanalysis sees the butterfly as a symbol of rebirth.

“In Classical antiquity it was a common belief that the soul left the body in the shape of a butterfly. Psyche is depicted as a little girl with butterfly-wings....”
[Emphasis in the original]

Sherry Hansen Steiger, a New Ager who has an interest in UFOs, evidently knew the meaning associated with the butterfly. She named her organization the Butterfly Center for Transformation.

The phoenix is also making a comeback in today’s society. The printer who produced *What Witches Do* was called **Phoenix** Publishing Company. A television serial was called “Phoenix” which gave “us an extraterrestrial **shaman**

and ‘messiah’ upon whom the salvation of the world may depend. He is endowed with awesome **psychic** powers, not the least of which are **levitation, psychokinesis and acute ESP.**”

“Both King Henry VII and his granddaughter, Queen Elizabeth I (Queen of England, 1558-1603), used the ‘phoenix’ as one of their badges.”

The January 9, 1988 issue of *The Economist* said that a new currency was coming. Its name will be the **phoenix**.

Mason and occultist, Manly Palmer Hall, wrote a book entitled *The Phoenix: An Illustrated Review of **Occultism** and Philosophy*.

Elsewhere he relates:

“Among the ancients a fabulous bird called the Phoenix is described by early writers such as Clement, Herodotus, and Pliny; in size and shape it resembled the eagle, but with certain differences. The body of the Phoenix is one covered with glossy purple feathers, and the plumes in its tail are alternately blue and red. The head of the bird is light in color, and about its neck is a circlet of golden plumage. At the back of its back the Phoenix has a crest of feathers of brilliant color. Only one of these birds was supposed to live at a time, with its home in the distant parts of Arabia, in a nest of frankincense and myrrh. The Phoenix, it is said, lives for 500 years, and at its death its body opens and the new born Phoenix emerges. Because of this symbolism, the **Phoenix is generally regarded as representing immortality and resurrection.**

“All symbols have their origin in something tangible, and the **Phoenix is one sign of the secret orders** of the ancient world and of the initiate of those orders, for it was common to refer to one who had been accepted into the temples as a man twice-born, or re-born. Wisdom confers a new life, and those who become wise are born again.

“The Phoenix symbol is important in another way, as an emblem among nearly all civilized nations of royalty, power, superiority, and immortality. The Phoenix of China is identical in meaning with the Phoenix of Egypt; and the **Phoenix of the Greeks is the same as the Thunder Bird of the American Indians.**”

In yet another book by Hall we find:

“Farther south the thunderbird symbol merged with the quetzal and the serpent feathered with quetzal plumes. The quetzal was identical in meaning with the phoenix of Asia, North Africa, and the Near East. The feathered-serpent symbolism can be traced back to the hooded Nagas, or serpent gods of India, and to the winged serpents which occur in the writings and sculpturings of the Egyptians.”

The phoenix is also “the ancient symbol of human aspiration toward Universal good.” Barbara Walker, a radical feminist, reveals that the Egyptians and Phoenicians believed that the phoenix was the representation of a god who “*rose to heaven in the form of a morning star, like Lucifer, after his fire-immolation of death and rebirth....*”

One former witch explains:

“The Phoenix, or *Bennu* is believed to be a divine bird going back to Egypt....This Phoenix destroys itself in flames and then rises from the ashes. Most occultists believe that the Phoenix is a symbol of Lucifer who was cast down in flames and who (they *think*) will one day rise triumphant. This, of course, also relates to the raising of Hiram Abiff, the Masonic ‘christ.’”
[Emphasis in the original]

With the continual rebirth of the phoenix, it became a symbol of reincarnation and eternity.

E. A Wallis Budge writes: “The **Morning Star** was the ferryman of OSIRIS, or

the Soul of OSIRIS, *i.e.* the Benu (sic) bird, which the GREEKS identified with **the Phoenix.**” [Caps in the original; Boldface added] The sun god, who supposedly created all the other gods, was also pictured in the form of a Phoenix.

One of the symbols in the 32° degree of Masonry is a triangle on which a raven, a dove, and a phoenix are displayed.

The eagle (also called the Bird of Jove) is frequently identified with the phoenix. As is well known, the eagle is used extensively in Masonry. In a Masonic Bible was the question: “What is the symbolism of the Eagle in Freemasonry?” The answer given was: “The eagle has been a symbol among the different peoples of the world from time immemorial. In Egypt, Greece, and Persia **it was sacred to the sun;** among **pagans** it was the **emblem of Jupiter;** among the **Druids** it was the **symbol of their supreme god.**”

This Masonic Bible also asked what an emblem was. The answer was: “An emblem is an **OCCULT** representation of an idea, principle, or truth which cannot be seen with the natural eye, but may be perceived by the mind and heart.”

The 15° in Masonry is called Knight of the Eagle and the 30° is called the Knight of the White and Black Eagle. The white and black on the eagle symbolize the yin/yang.

An ad for a belt buckle said this: “The eagle is also one of the most ancient symbols of the **supernatural and the occult**. In Egypt and Greece it was sacred to the Sun; it was also the venerated bird of Zeus. For the learned Druids it was transcendent, their foremost divinity. The Roman Legions adopted it as a consecrated mascot.”

By the way, the word mascot comes from a French word meaning witch!

The eagle was worshipped by the Greeks as the god of lightning. “They nailed eagles to the peaks of temples to serve as magic lightning rods; these were the precursors of today’s weathercocks seen atop many buildings.” In mysticism, the eagle represents initiation. Masonic author, Rex Hutchens, relates: “Since the eagle also represented the great Egyptian Sun god Amun Ra, it is a symbol of the infinite Supreme Reason of Intelligence.”

Albert Pike reveals that the “*Eagle* was the living Symbol of Egyptian God *Mendes*... and the representative of the Sun....” Remember the Satanic God of Mendes? Well, the eagle is his emblem.

Hall remarks:

“The eagle was also the Hermetic symbol of sulphur, and signified the mysterious fire of Scorpio—the most profoundly significant sign of the zodiac and the *Gate of the Great Mystery*. Being one of the three symbols of Scorpio, the **eagle, like the Goat of Mendes, was an emblem of the theurgic art [magic]** and the secret processes by which the infernal fire of the scorpion was transmuted into the spiritual *light-fire* of the gods.” [Italics in the original; Boldface added]

The eagle was Jupiter's bird. Horus was an eagle. "In Sarmatian art, the eagle is the emblem of the thunderbolt and of warlike endeavour."

In the chapter on "Winged Symbols" we look at the symbolism of Saturn, an old man dying (the old year ending) and a baby bringing in the new year. This is related to the oroboros (which will be covered soon) and in *The Mysteries of Osiris* we find that this symbolism is also connected to the eagle:

"When they [the heathen] desired to express the renewal, or *beginning*, of the year, they represented it in the form of a door-keeper.

"It could easily be distinguished by the attributes of a *key*; a procedure that was copied, without credit, in another *new age* or a *new year of an age*, in the symbolism of Peter and his 'key.' At times they gave it two heads back to back, the one an old man, which marked the expiring year, and the other a young man, which denoted the new. In time, this became the double-headed Eagle of Symbolic Masonry...." [Emphasis in the original]

"Thus arises the two-headed eagle (related to the Janus symbol) which is usually depicted in two colours of great mystical significance: red and white." *A Bridge to Light* adds: "The double headed Eagle is symbolic of the past and future for in this Apartment the candidate sacrifices his own personal ambitions and desires on the altar of Truth."

In *Freemasonry: Ancient Egypt and the Islamic Destiny* we are told:

"It is also believed that the **double-headed eagle alludes to the nature of man**. The head that looks to the East is symbolic of man's spiritual vision, and the looking towards the West refers to his material vision.

"The **Masonic order attempts to initiate** or teach man the material or human science and the spiritual sciences **in imitation of the Ancient Egyptian Mystery Systems** that taught man the 'lesser' and 'greater' mysteries."

James 1:8 says: “A **double minded man** is unstable in all his ways.”

The July 1998 issue of *The Scottish Rite Journal* states that the eagle was also a symbol of regeneration and rebirth. Another Masonic and occultic symbol of regeneration is the serpent. *A Dictionary of Symbols* explains more about the snake:

“Snakes are guardians of the springs of life and of immortality, and also of those superior riches of the spirit that are symbolized by hidden treasure....

“...the serpent is the life-force which determines birth and rebirth and hence it is connected with the Wheel of Life....

“The snake was an important symbol for the Gnostics....Hippolytus...asserted that the snake was said to live in all objects and in all beings. This brings us to the Yoga concept of the Kundalini or the snake as an image of inner strength. Kundalini is represented symbolically as a snake coiled up upon itself in the form of a ring (*kundala*), in that subtle part of the organism corresponding to the lower extremity of the spinal column; this, at any rate, is the case with the ordinary man. But, as a result of exercises directed towards his spiritualization—Hatha Yoga, for instance—the snake uncoils and stretches up through wheels

(*chakras*) corresponding to the various plexuses of the body until it reaches the area of the forehead corresponding to the third eye of Shiva. It is then, according to Hindu belief, that man recovers his sense of the eternal.” [Emphasis in the original]

The word “chakras” was just mentioned.

“In the Hindu/yoga world of ‘reality,’ they believe, as do much of the occult and New Age meditators, that the body contains seven basic energy centers, known as chakras. When these centers are properly aligned by practicing **yoga and meditation**, there will then occur a ‘merging’ of the spinal chakra (the serpent of Kundalini) together with Shiva, located in the frontal chakra (**psychic third eye**) and this ‘spiritual union’ is believed to **increase extrasensory and psychic powers.**”

Representation of the seven chakras

In *The Gods of India* we are told:

“Siva carries a snake around his neck. Snakes always surround his image, and a snake is coiled around his phallus (*linga*)....

“But the main meaning attached to the serpent is to represent the basic dormant energy, akin to the sexual power, which is coiled at the base of the spinal cord and which is the support of the yogi in his attempt to conquer the higher worlds during his inward journey. The energy, source of all spiritual conquests, is called Kundalini (the coiled), the serpent power.”

The Seeker's Handbook mentions that the serpent is also a symbol of infinity. The symbol for infinity is the lazy eight which is covered elsewhere in this book.

“The Druids had a high veneration for the Serpent. Their great god Hu was typified by that reptile; and he is represented by the Bards as ‘the wonderful chief *Dragon*, the sovereign of heaven.’”

Like the eagle, the snake is also a symbol of the sun. Additionally, it denoted fertility. “The tree of life with the serpent entwined around it is also seen, and this symbol also represents the solar and generative processes.”

“In representing the ancient Babylonian Nergal, Lord of the Underworld, the phallus and the serpent were identical. In New Guinea, where tradition connects woman and the serpent sexually, the female idols are invaginated by serpent-like creatures.”

“The union of the female with the male triad, was designated by the sacred mystic number 4, often symbolized by a serpent with its tail in its mouth; two fishes bent to form a circle [yin/yang], and many other figures.”

A snake with its tail in its mouth is called an oroboros (also spelled uroboros). Another form of the oroboros is a dragon with its tail in its mouth.

“In alchemy a dragon, or more often a serpent, eating its own tail is known as the uroboros. The dragon was a symbol of the god Mercury and the circle a powerful symbol of the eternal cycle of nature. Because the uroboros recreates itself by feeding on its own body, it is a symbol of transforming matter, *i.e.* alchemy itself.”

In this form the snake represents “the endless succession of incarnations which form the wheel of life.” In other words, the oroboros is an emblem of reincarnation. It is also a symbol of eternity. In fact, we are told that the oroboros “*actually signifies the beginning and the end of life; the Alpha and Omega.*”

[Emphasis in the original] Of course, this is blasphemous. The Bible clearly tells us that Jesus Christ is the Alpha and Omega. Revelation 22:13 states: "I am Alpha and Omega, the beginning and the end, the first and the last." (See also Revelation 1:8, 11; and 21:6.)

The Alpha and Omega is used in Masonry, but now we can see that it is in reference to the snake, and not Jesus Christ, when these symbols are used.

As Masonic author, George Oliver, states: "The Serpent is universally esteemed a legitimate symbol of Freemasonry." Occultist and Mason, Manly Palmer Hall, brags that "**the serpent is the symbol and prototype of the Universal Savior, who redeems the worlds by giving creation the knowledge of itself and the realization of good and evil.**"

Masonic apron

Do you realize what Hall just admitted? When God placed Adam and Eve in the

garden, He said: “Of every tree of the garden thou mayest freely eat: **But of the tree of the knowledge of good and evil, thou shalt not eat of it:** for in the day that thou eatest thereof thou shalt surely die” (Genesis 2:16-17). Of course, **SATAN** came along and asked: “Yea, hath God said, Ye shall not eat of every tree of the garden?” (Genesis 3:1) Eve responded that they could eat of every tree **except** the tree of the knowledge of good and evil because they would die if they did so. Satan (the **serpent**) brazenly remarked: “Ye shall not surely die: For God doth know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, **knowing good and evil**” (Genesis 3:4-5).

Satan, THROUGH ENTICEMENT AND LIES, had just deceived the first man and woman by promising them godhood! He told Eve that she would know both good and evil. Satan’s offer to know BOTH good and evil presented an option that was previously unknown to her. She had never known evil and, therefore, the lure of learning about something new and different must have intrigued her. Up to this point she had only known good, truth, perfection, health, and beauty. Now, because of the attraction of the unknown offered through Satan’s deception, she would learn of evil, death, sorrow, defilement, pain, and separation from God. The very moment Adam and Eve partook of the forbidden fruit they died spiritually and were driven from the beautiful garden of Eden. That very day they experienced death to innocence, death to perfection, death to the joys they had known, and eventually they experienced a physical death even passing this physical death on to **ALL** humankind for “in Adam all die” (I Corinthians 15:22).

Yet, Hall tells us that the one who gave the realization of good and evil (who was Satan) is the “**Universal Savior!**” According to Masonic writer, Lynn Perkins, the fall of mankind was something **GOOD**. It was not a “fall” but a betterment of our situation. He boldly declares that man “**rose** to Divine Status by partaking of the ‘**fruit of the tree of knowledge of good and evil.**’” [Emphasis in the original] He adds that the advice the serpent gave to Eve was “wiser than the recorded command of God that would have, if obeyed, confined Adam and Eve and their descendants to the status of animals forever....”

Albert Pike, another occultist and Mason, brags that the oroboros “*is the body of the **Holy Spirit**, the universal Agent, the Serpent devouring his own tail....*” [Italics in the original; Boldface added] What blasphemy!

The oroboros is also representative of the androgyne.

“The serpent’s head and neck is distinctly a masculine symbol, but the serpent is sometimes symbolized with its tail in its mouth, the body forming a circle which is feminine. Also, the mouth is feminine, while the tail, which is in the mouth, is masculine. Thus for two good reasons the serpent with its tail in its mouth represents both sexes.”

As stated earlier, the androgyne (meaning male and female in one body) was considered to be “the image of **human perfection and wholeness.**”

Another creature with some snake-like features is a basilisk. It is a:

“fabulous animal with a snake’s body, pointed head and a three-pointed crest. In mediaeval descriptions it was said to be born of a yolkless egg laid by a cock and hatched by a toad on a bed of dung, and to have a three-pointed tail, glittering eyes and a crown on its head. Its glance was believed to be lethal, so that it could only be destroyed while its assailant was watching it in a mirror. This belief is related to the myth of the Gorgon’s head. In the East, its body was supposed to be a mixture of cock, snake and toad. According to Diel, this projected image of the human psyche is clearly **infernal in character**, as is shown by its threefold attributes (its three-pointed crest and trifurcated tail) since they are an **inversion of the qualities of the Trinity**; and also by the predominance of **evil components**, such as the toad and the snake. It is one of the many ‘keepers of treasure’ mentioned in legend.”

Another Masonic symbol is the bee and beehive. One source reveals:

“The **bee is sacred to the goddess Venus** and is considered a sacred feminine symbol. According to mystics wheat, bananas, and bees are forms of life which came to the earth from the planet Venus millions of years ago....

“In Greece the bee was considered a priestly creature. The priestesses of Eleusis and Ephesus were called Melissae or ‘bees,’ probably with reference to the virginity of worker bees. They served at the greatest Greek festival in honor of **Demeter, the Queen Bee**, celebrating the return of Persephone from Hades

for two-thirds of each year at which time the earth would bloom profusely with flowers— associating **bees with rebirth**. And because of their importance in pollenizing flowers, **bees are an accepted symbol of generative power**.

“The bee is also considered a symbol of the soul influenced by the Sun and possessing immortality and spiritual **telepathy**.”

One Masonic bulletin admits:

“The Egyptians always excellent and Ancient FreeMasons **paid Divine Worship to a Bee under the outward Shape of a Bull, the better to conceal the mystery**; which Bull, by them called Apis, is the Latin word for a Bee; the Enigma of presenting the Bee by a Bull consisteth in this, that according to the doctrine of the Pythagorean Lodge of Freemasons, the souls of all the Cow-King transmigrate into Bees....”

The Royal Masonic Cyclopaedia adds that the beehive is an:

“emblem of industry; appropriate to the third degree. This virtue is ever **held in high esteem in the Craft**, for the Old Charges tell us that ‘all Masons shall work honestly on working days, that they may live creditably on holidays.’ The **esoteric** meaning of the beehive was that of **regeneration**; and a hive was a type of the ark. ‘Hence,’ says Faber (*Orig. of Pag. Idol.*, vol. ii, p. 133), ‘both the diluvian priestesses and the regenerated souls were called bees; hence bees were feigned to be produced from the carcase (sic) of a cow, which also symbolized the ark and, hence, as the **great father was esteemed an INFERNAL god**, honey was much used both in funeral rites and in the mysteries.’ ...Bees and lilies have many **esoteric** significations.”

In *The Masonic Report* the question is asked: “In what way does the bee figure into the **phallic** philosophy of Freemasonry?” The answer given is:

“In the fertilization of the queen bee, the drone is deprived of his organs of generation, and thus mutilated, is left to perish on the ground. The description applies with striking exactness to the death of Osiris who lost his generative power and to Hiram Abiff who supposedly lost the Master’s word, which is actually a veiled symbol of his generative power. Thus we conclude that the emphasis laid upon the bee hive in the lecture is to be understood in the phallic sense.”

“‘In India,’ writes Manly P. Hall, ‘the God Prana—the personification of the universal life force—is sometimes shown surrounded by a *circle* of bees. Because of its importance in pollinating flowers, the bee is the accepted symbol of the generating power.’”

Masonic author, H. L. Haywood, informs us that “the Bee was made the emblem of heaven, as may be seen in certain old Hindoo (sic) pictures of the god Krishna wherein Bees hover over the deity’s head....” He adds: “Both the Persians and the Egyptians sometimes embalmed their dead in honey because they believed it to possess antiseptic properties; out of this custom, we may believe, arose the latter habit of using the Bee as a symbol of immortality.”

Rosicrucianism (which is closely related to Masonry) also used the symbol of the bee and the rose. In the picture on page 137, the “bees around the rose represent believers receiving divine nourishment.” (For more information on Rosicrucian symbolism, including the rose, see the chapter entitled “Organizational Logos.”)

Psalms 119:103-104 tells us that the word of God surpasses honey: “How sweet are Thy words unto my taste! yea, **sweeter than honey** to my mouth! Through Thy precepts I get understanding: therefore **I hate every false way.**” Also, Psalms 19:9-10 says: “The fear of the Lord is clean, enduring for ever: the judgments of the Lord are true and righteous altogether. More to be desired are they than gold, yea, than much fine gold: **sweeter also than honey and the honeycomb.**”

Nimrod was represented as a lion with a bee in its mouth. Nimrod, I’m sure you will recall, was Noah’s great-grandson (Genesis 10:8-9) and was called “a mighty hunter before the Lord.” The word “before” in the Hebrew has several meanings, but one meaning is “against.” By reading the entire context, you will notice that this is the correct explanation for this word. You see, it was **NIMROD** who **BUILT THE TOWER OF BABEL IN DEFIANCE AND REBELLION AGAINST GOD** (Genesis 10:10; 11:2). Masons, however, are proud of this building for Arthur Edward Waite brags: “As regards Masonry, **BABEL** of course **REPRESENTED A MASONIC ENTERPRISE....**” John Yarker, another Masonic author, boasts: “It is well known that the **TOWER OF BABEL WAS ONE OF THE MOST ANCIENT TRADITIONS OF MASONRY....**”

In the *Masonic Quiz Book*, the question is asked “Who was **NIMROD?**” The answer is: “He was the son of Cush. In the Old Constitutions referred to as **ONE OF THE FOUNDERS OF MASONRY**, and in the Scriptures as the architect

of many cities.” In the York manuscript we find: “At the making of the Tower of Babel there was Masonry first much esteemed of, and...**NIMROD WAS A MASON** himself and loved well Masons.”

Interestingly, Masonic author, Kenneth R. H. MacKenzie, tells us that Hermes was also one of the founders of Masonry. Remember occultist, New Ager, and Theosophist, Helena Petrovna Blavatsky, links Hermes and Satan together when she writes:

“...**Hermes**, the god of wisdom, called also Thoth, Tat, Seth, Set and *Sat-an*; and that he was, furthermore, when viewed under his bad aspect, Typhon, **the Egyptian Satan**, who was also *Set*. [Italics in the original; Boldface added]

Another representation of Thoth

The bee is also a regal symbol. The Merovingians' main symbol was that of the bee. The Mormon church also uses the bee as a symbol. (For a thorough study of Mormonism, see my book *Mormonism, Masonry, and Godhood* [ISBN: 1-891117-01-7], which can be ordered through Sharing or any bookstore.)

A Masonic bulletin, *The Bee Hive* states that the Kings of France (who were Masons):

“carried three Bees for their Arms, but to avoid the Imputation of the Egyptian Idolatry of **worshipping a Bee**, Clodovaeus, their first Christian King, **called them Lilies**, or Flower-de-Luces, in which, notwithstanding the small **Change**

made for Disguise Sake, there is still the exact Figure of a Bee....You have perhaps read of a great Number of Golden Bees found in the Coffin of a Pagan King of France...which he had ordered should be buried (sic) with him, in Token of his having been a Mason.”

Pope Urban VIII also had a seal that included bees. We are told:

“This seal was used for **magical purposes** by Pope Urban VIII, a seventeenth century leader of the Catholic Church who wickedly became involved in **astrology and occult rituals**. The bee has long been the symbol of the harlot of Mystery Babylon, the religious system of the Antichrist to come (Rev. 17). A triangle of three bees represents the pagan unholy trinity (Lucifer, his queen and their son, the Antichrist).”

Pope Urban's magical seal

The scarab is yet another sacred insect. Since the “scarab was thought to be able to renew itself...it became a symbol of **past and future lives**.” This means that the scarab symbolizes **reincarnation**. The Bible clearly teaches that there is no such thing as reincarnation. Hebrews 9:27 states: “It is appointed unto men **once to die**, but after this the judgment.”

“The scarab was, from very ancient times, and still is, sacred in Egypt; it was thought to be neither male nor female, but, instead, to contain within itself the power to create. It symbolized Khebera, the god of creation and resurrection, who was self-begotten.”

Another name for Khepri (also Khebera or Khepera) was Atum. *Egyptian Mythology* explains more about this aspect:

“Atum was ‘He who created himself.’ His next act was to create further gods. As he was alone in the world, he had to produce offspring without a mate. His means was union with his shadow, or masturbation....**Atum** seems often in the texts to be regarded as a **bisexual god** and was sometimes called the ‘Great He-She.’”

“Thus, Khepri symbolized the resurrection of the body and rebirth [reincarnation] of the soul through transformation and renewal. It is for this reason that the Egyptian custom of wearing scarabs, as well as that of placing scarabs within the tombs and on the bodies of the dead, became so popular.”

“**Khepri** (or **Khepera**) signifies at the same time ‘scarab’ and ‘he who becomes.’ For the Heliopolitans he represented the rising sun which, like the scarab, emerges from its own substance and is reborn of itself. Khepri was the god of the transformations which life, for ever renewing itself, manifests. He is represented as a scarab-faced man or as a man whose head is surmounted by this insect. Sometimes he appears simply as a scarab.” [Emphasis in the original]

Anton LaVey, the founder of the Church of Satan, states:

“The Phoenicians worshipped a fly god, Baal, from which comes the devil,

Beelzebub. **Both Baal and Beelzebub are identical to the dung beetle or scarabaeus** of the Egyptians which appeared to resurrect itself, much as the mythical bird, the phoenix, rose from its own ashes.”

Matthew 12:24 says that Beelzebub is the prince of the devils, so this is what the scarab is actually representing! (See also Luke 11:15 and Mark 3:22.)

The scarab is also a symbol of fertility and “one of the most ancient symbols of deity....” Additionally, scarabs were used as powerful amulets for healing and magic. In fact, one of the tools of the magician is listed as the scarab.

Since Masonry is based mainly on Egyptian mythology, it is no surprise to find that the scarab is featured on the 25° Masonic apron along with the serpent with his tail in his mouth (the oroboros).

We’ve already covered the goat somewhat in the chapter “The Pentagram.” As mentioned, the goat is a representation of the devil. Occultist Manly P. Hall declares: “The goat is both a **phallic symbol** and also an **emblem of courage or aspiration** because of its surefootedness and ability to scale the loftiest peaks. To the alchemists the goat's head was the symbol of sulphur.”

In Matthew 25 we find that Christ will separate the sheep from the goats:

“When the Son of man shall come in His glory, and all the holy angels with Him, then shall He sit upon the throne of His glory: And before Him shall be gathered all nations: and He shall separate them one from another, as a shepherd divideth his sheep from the goats: And He shall set the **sheep on His right hand, but the goats on the left**. Then shall the King say unto them on **His right hand, Come, ye blessed of My Father, inherit the kingdom prepared for you** from the foundation of the world....Then shall He say also unto them on the **left hand, Depart from Me, ye cursed, into everlasting fire, prepared for the devil and his angels:...**And these shall go away into everlasting punishment: but the righteous into life eternal” (Matthew 25:31-34, 41, 46).

Seeing that the occult world believes that the goat represents Satan, it is fascinating to see what the occultist, Alice Bailey, teaches about this passage of Scripture. She discloses:

“I would like to point out that the distinction between the ‘sheep and the goats’ is mainly hierarchical. The term **‘goats’ is esoterically applied to initiated disciples** and to those who have climbed the mountain of initiation. The term **‘sheep’ is applied to those who are following blindly** the inner urge of their souls and who are groping their way (in relatively large numbers) toward the Hierarchy. For them still has to come the great revelation that the ‘kingdom of God is within you’. Such is the word for them at this stage in humanity’s history.”

She also states (through her demonic spirit guide, Djwhal Khul):

“It has been thought that the sheep went to heaven and the goats went to hell. **It is the other way around.** The goat in Capricorn is the initiate and from a certain esoteric angle the **goats do go to heaven because they function in the spiritual kingdom....The sheep remain on earth...until they become goats....**”

It’s easy to see how the occult has turned everything around and distorted the truth of God’s Word.

Below is a symbol for four stylized goats. The goats are symbols of Ea-Oannes who is Lord of the Waters.

The unicorn is a mythological creature. In astrology, the unicorn represents the Moon and is also a symbol of rebirth (or reincarnation).

The unicorn is yet another androgyne symbol. In China the unicorn is known as the k'i lin which means male-female.

Al Dager explains:

“The androgynous unicorn has been merely a foreshadowing of the uni-sex mentality exhibited in modern art and music, as well as in the general acceptance of the homosexual and lesbian lifestyles.

“But more than this, the unicorn is considered by New Agers as the symbol of innocence and gentleness personified in the conquering child Horus. This Egyptian solar hero is said to conquer through gentility.

“According to New Age teaching, the world is about to enter into the second

Golden Age, which should begin about the year 2000. The Golden Age—or New Age—is also known as the Age of Aquarius and the Eon of Horus, an era of peace and brotherly love.

“Thus we see that the unicorn is, in reality, the symbol of a future conqueror who will bring peace to the earth. Who is this but the anti-Christ (the little horn that rises in the midst of the ten horns in Daniels (sic) vision [Daniel 7:8-A.J.D.]) for whom the world waits, unaware of his true nature?...

“How many Christians will yield to the unicorn’s beauty when it rears its head to pierce the last vestiges of God’s order?”

This is a good question, especially since we are told:

“In China, the Unicom or Ki-Lin is said to appear intermittently on Earth and **his appearance signifies the dawning of a new age** of harmony and enlightenment. One appeared, it is said, at the birth of Confucius in 551 BC.”

“In both European and Oriental traditions, the **Unicorn is identified with a Messiah** who comes when the world is in danger, and **who heralds the coming of a new and better age**. As the alchemical symbol for the element Earth, he represents Earth consciousness and a reawakening of natural values.”

Symbol for Earth

Anyone who knows Bible prophecy can readily recognize that this “Messiah” is none other than the Antichrist.

The horn growing out of the unicorn's head represents the third eye or the all-seeing eye, which is covered elsewhere in this book.

In *The Seeker's Handbook*, under “Unicom,” we find:

“In Celtic mythology and European folklore, a fabulous beast in the form of a horse, with a single spiraling horn growing from the center of its brow. In alchemy, a symbol of the complete mastery of **phallic sexuality** by ritual (nonorgasmic) intercourse, and its conversion into the forces of pure VISUALIZATION.”

In *The Lore of the Unicorn* we are told that the **unicorn was used as a talisman or a charm.**

Several pagan and witchcraft groups have taken the name “Unicom” for their organization or newsletter. Some of these names are: Unicom Astrological Services, The Unicom Coven, *The Unicorn Speaks*, *The Unicom Newsletter*, *The Quill and Unicorn*, *Magical Unicorn Messenger*, and *The Littlest Unicorn*.

It is also interesting to note that the Rothschilds have a unicorn on their coat-of-arms.

12.

WINGED SYMBOLS

The idea of wings is very important in mythology. In *A Dictionary of Symbols* we find:

“Wings In the more general sense, wings symbolize spirituality, imagination, thought. The Greeks portrayed love and victory as winged figures, and some deities, such as Athena, Artemis and Aphrodite were at first—though not later—also depicted with wings....In alchemy, wings are always associated with the higher, active, male principle; animals without wings are related to the passive female principle.”

Mercury is one god who has a number of wings on his being. He has the caduceus (with winged snakes) and his hat and sandals also have wings. The winged hat (called a petasus) and winged sandals symbolize Hermes' swiftness. In fact, he is called the “flying man.”

In Roman mythology Mercury:

“was the god of commerce and travel, and the patron of thieves, gamblers, and ambassadors. The Greeks called him Hermes or Cyllenius, because he was born on Mount Cyllene, in Arcadia. He was the son of Jupiter (Zeus) and Maia, a daughter of Atlas. Pan, the god of shepherds, was the son of Mercury.”

Apollo gave him:

“a magic wand called the *caduceus*. Mercury used this to guide the souls of the dead to the Lower World. He also could control the living and the dead with it, or turn anything to gold.” [Emphasis in the original]

In one book on mythology, you will find Mercury “seated naked on a rock....” A book on witchcraft informs us that **Mercury was the “inventor of incantations [and] was wont to be invoked in the rites of magicians....”** Mercury was also one of the names of gods invoked in Roman **Necromancy**. Necromancy is sorcery or communication with the dead. Other books mention that Mercury **was** “the conductor of the dead to Hades [hell].” Masonic author, Albert Pike, of course, claims that Mercury is the “Guardian and Guide of Souls.” Do you want a god that is conjured up by magicians and is the conductor of the dead to hell to be the “Guardian and Guide” of **YOUR** soul?

This god is portrayed in Masonry and the Eastern Star—but in a different guise. In the Eastern Star, the “Star in the East,” the inverted/Satanic pentagram, is a depiction of Mercury. In Masonry, the Orator is a representation of Mercury. Albert Pike states:

“Of HERMES, the Mercury of the Greeks, the Thoth of the Egyptians, and the Taaut of the Phoenicians, we have therefore spoken sufficiently at length. He was the inventor of letters and of Oratory, the winged messenger of the Gods, bearing the Caduceus wreathed with serpents; and **IN OUR COUNCIL HE IS REPRESENTED BY THE ORATOR.**”

Are you beginning to get a picture of the god that is being portrayed in Masonry

and the Eastern Star? Their god has magical powers. He is the god of the underworld (hell) and the patron of thieves and gamblers. Note also that Mercury's son is Pan.

The caduceus (or magic wand) that Mercury carries “consists of three elements: a rod, a pair of wings and two intertwined serpents. The rod is emblematic of power and authority. In the hands of primitive man, the largest club and the power to wield it were mighty persuaders as to just who was the leader of the tribe.” The caduceus “was reported to have the power of producing sleep. Milton refers to it as the opiate rod.”

In *A Dictionary of Symbols* we find:

“For the Romans, the caduceus served as a symbol of moral equilibrium and of good conduct. The wand represents power; the two snakes wisdom; the wings diligence; and the helmet is the emblem of lofty thoughts....According to esoteric Buddhism, the wand of the caduceus corresponds to the axis of the world and the serpents refer to the force called **Kundalini**, which, in Tantrist teaching, sleeps coiled up at the base of the backbone—a symbol of the evolutive power of pure energy. Schneider maintains that the two S-shapes of the serpents correspond to illness and convalescence.

In reality, what defines the essence of the caduceus is the nature and meaning not so much of its individual elements as of the composite whole. The precisely symmetrical and bilateral arrangement, as in the balance of Libra, or in the triunity of heraldry (a shield between two supporters), is always expressive

of the same idea of active equilibrium, of opposing forces balancing one another in such a way as to create a higher, static form. In the caduceus, this balanced duality is twice stated: in the serpents and in the wings, thereby emphasizing that supreme state of strength and self-control (and consequently of health) which can be achieved both on the lower plane of the instincts (symbolized by the serpents) and on the higher level of the spirit (represented by the wings)."

Pike explains the caduceus like this:

"It was originally a simple Cross, symbolizing the equator and equinoctial Colure, and the **FOUR ELEMENTS** proceeding from a common centre. This Cross, surmounted by a circle, and that by a crescent, became an emblem of the Supreme Deity—or of the active power of **GENERATION** and the passive power of **PRODUCTION** conjoined,—and was appropriated to Thoth or Mercury. It then assumed an improved form, the arms of the Cross being changed into wings, and the circle and crescent being formed by two snakes, springing from the wand, forming a circle by crossing each other, and their heads making the horns of the crescent; in which form it is seen in the hands of Anubis."

The caduceus, says Pike, additionally symbolizes the four elements. Of course, the four elements figure prominently in witchcraft. One witch writes:

"In casting a magic circle we first purify the space we will use with the four

elements of earth, air, fire, and water. We walk around the area that will become the magic circle carrying a bowl of salt and water (for earth and water) and an incense burner (for fire and air). As we walk the path of the circle we say, ‘By water and earth, by fire and air, by Spirit, be this circle bound and purified as we desire. So mote it be.’”

Four Elements Symbol

Did you notice that the caduceus “became an emblem of the Supreme Deity” and that it represented “the active power of generation and the passive power of production conjoined”? In other words, this emblem is a veiled symbol for the sex act and it is this symbol that represents the Supreme Deity of the Masons (and, by extension, the Eastern Stars as well)! Eliphas Levi, the **OCCULTIST** whom Albert Pike plagiarized in *Morals and Dogma* (which we are told by Masonic author Lucien V. Rule “is the greatest single work on Masonic philosophy ever given to the world”), also mentions that the god Mercury was assigned “to the parts of **GENERATION**.”

Blavatsky remarks:

“That the Serpents were ever the emblems of wisdom and prudence is again shown by the caduceus of Mercury....The two serpents, entwined around the rod, are **phallic** symbols of Jupiter and other gods who transformed themselves into snakes for purposes of **seducing** goddesses....The **serpent has ever been the symbol of the adept**, and of his powers of immortality and divine knowledge....It shows the dual power of the Secret Wisdom: the **BLACK AND THE WHITE MAGIC**.”

Of course, one Masonic symbol after another has this sexual connotation, but in spite of the sexual innuendoes, Past Master Albert L. Woody, Grand Lecturer in Illinois, tells us:

“As late as 1812, in Pennsylvania, the Deacons in procession carried columns—the **SAME** columns which now rest on the Wardens’ pedestals. Deacons first carried blue rods tipped with gold, symbolizing friendship and benevolence; later these were tipped with a **PINE CONE in IMITATION OF THE CADUCEUS** of Mercury, the messenger of the gods.”

One Masonic book, after explaining about the caduceus, brags: The rod of the Master of Ceremonies is an analogue [equivalent or parallel].” Another Masonic book claims that “Mercurius Caducifer [Mercury], the bearer of the herald’s staff, finds his analogue in a Mason’s Lodge, in the Senior Deacon, who accompanies the initiate throughout the ceremonies, and assists at his restoration, although himself unable to restore life.”

The caduceus is also a symbol for immortality. Of course, Mercury is not the only god who carries a caduceus. Pike indicates that it was also borne “by Cybele, Minerva, Anubis, Hercules Ogmius the God of the Celts, and the personified Constellation Virgo, was a winged wand, entwined by two serpents.”

Virgo

The Migration of Symbols reveals that the caduceus “has alternately been considered to be **an equivalent** of the Thunderbolt, a form of the Sacred Tree, a contraction of the Scarab, a combination of the solar Globe and the Crescent of the moon, and so forth.”

Another symbol using wings is the called the winged globe (or solar globe). Helena Petrovna Blavatsky, an occultist and New Ager, says the “**‘winged globe’ is but another form of the egg**, and has the **same significance as the scarabaeus [scarab]**...which relates to the rebirth of man, as well as to his spiritual generation.” The Egyptians used this symbol to represent their creator and this symbol was so prevalent in Egypt that it was known as “the land of the winged globe.” Pike relates: “In Egypt, a Sun supported by two asps was the emblem of *Horhat* the good genius; and the serpent with the winged globe was placed over the doors and windows of the Temples as a tutelary God.” [Emphasis in the original] *The New Age Magazine*, a Masonic journal, notes: “The winged globe and serpent symbolized their [the Egyptians’] triune deity.”

George Oliver, in his Masonic book, *Signs and Symbols*, says:

“Egypt was the great conservator of ancient idolatry.... Cneph was the Serpent-

god of this people; he was the second person of the sacred Triad, and said to be the Creator of the world. He was usually represented by a hooded snake, sometimes called Basiliscus, or the Royal Serpent....Did he [the worshipper] meditate on the mysterious Tri-Una deity, Eicton-Cneph-Phtha, he was presented to the worshipper's recollection by the figure of a Globe and a Winged Serpent; the Globe symbolized the Supreme and eternal God; the Serpent, the animating principle; and the Wings, the hovering Spirit of God, which moved on the face of the waters at the creation of the world."

Pike remarks:

"Serpents encircling rings and globes, and issuing from globes, are common in the Persian, Egyptian, Chinese, and Indian monuments. Vishnu is represented reposing on a coiled serpent, whose folds form a canopy over him. Mahadeva is represented with a snake around his neck, one around his hair, and armlets of serpents on both arms. Bhairava sits on the coils of a serpent, whose head rises above his own. Parvati has snakes around her neck and waist. Vishnu is the Preserving Spirit, Mahadeva is Siva, the Evil Principle, Bhairava is his son, and Parvati his consort.

Masonic columns

The King of Evil Demons was called in Hindu Mythology, *Naga*, the King of Serpents, in which name we trace the Hebrew *Nachash*, serpent.” [Emphasis in the original]

The winged globe, says H. G. Wells, is “to become the symbol of the New World Order when it overtly rules the world.”

The Rosicrucians also lay claim to this symbol. R. Swinburne Clymer said that “the Winged Globe is primarily a Rosicrucian symbol.” He adds: “The Winged Globe is the symbol of the perfected soul making its flight back to the source of its creation in the Elysian fields beyond.”

Another name for the winged globe is Lynx. This is the “living winged globe of Chaldean magic tradition, symbolizing the universal spirit.”

The rock music group, Journey, also used the winged globe in at least three of their album designs. Eric Barger notes that the winged globe “signifies a **DEMON DEITY** and the omnipresence of the sun god Ra.”

Winged Ra

One symbol that incorporates the winged globe into its symbolism is the figure of Azoth. In *Ancient Operative Masonry* we are told that “Azoth” is **OCCULT** language for the fifth element. Pike explains this symbol:

“Upon it you see a Triangle upon a Square, both of these contained in a circle;

and above this, standing upon a dragon, a human body, with two arms only, but two heads, one male and the other female. By the side of the male head is the Sun, and by that of the female head, the Moon, the crescent within the circle of the full moon. And the hand on the *male* side holds a *Compass*, and that on the *female* side, a *Square*...

“The Hermaphroditic figure is the Symbol of the double nature anciently assigned to the Deity, as Generator and Producer, as BRAHM and MAYA among the Aryans, Osiris and Isis among the Egyptians. As the Sun was male, so the Moon was female; and Isis was both sister and the wife of Osiris. The Compass, therefore, is the Hermetic Symbol of the Creative Deity, and the Square of the productive Earth or Universe....

“The COMPASS, therefore, as the Symbol of the *Heavens*, represents the spiritual, intellectual, and moral Portion of this double nature of Humanity; and the SQUARE, as the Symbol of the *Earth*, its material, sensual, and

baser Portion." [Emphasis in the original]

Masonic writer, John Yarker, adds: "The symbolism here clearly alludes to the dual sexual nature of all metals." Yet another Mason, John Sebastian Marlow Ward, relates:

"The figure with the two heads probably represents Man natural and Man regenerate, surrounded by the seven planets and trampling with his left foot on the dragon which crouches over the winged globe. The fact that the figure bears in its hands the square and compasses, suggests some inter-relationship between these philosophers and the Masonic Guilds, while the emphatic way in which the left foot is planted first proves that to them this mantric sign had a very definite inner meaning. Possibly the dragon who is thus being attacked symbolises exoteric religion and the popular **ideas of right and wrong**, which the alchemists thought **should be overthrown** so that the light of the sun and of the planets could once more shine on the world shrouded in darkness."

It's no surprise, then, to discover that the winged globe, a symbol of immortality, is also used in one of the Masonic degrees. Here's what takes place in the 31 st Degree pageantry according to Masonic author, Rex R. Hutchens:

"The Hall of Justice. The Egyptians believed that aspects of a man's *ka*, or double, could be seen in the material world. Such was the explanation given for a man's shadow or his reflection in a mirror. These physical manifestations of the *ka* were, to them, evidence of its existence. They believed that the *ka* accompanied the body to the Abode of the Dead to be there judged and to answer for both virtues and vices of life.

"In the land of Chemi, there lived an architect whose name was Cheres, the character assumed by the candidate. When he passed away, his *ka* descended with his body to the Abode of the Dead for judgment. We now follow him on his journey and enter the Court of the Dead to see what this man's end will be.

"In the East is a transparency of a winged globe with two serpents. In the center of the Hall is a large balance. In one pan is a vase, heart shaped, and in the other is a figure of *Ma*, goddess of truth and justice. The heart shaped vase represents the deeds of the soul when it dwelt within the body. West of the balance is a funeral bier with a representation of a corpse upon it, swathed like a

mummy with a skull cap and the seed vessel of a lotus plant near the head. Near each corner of the Hall is a small table upon which is a censer for burning perfume. For the Egyptians this was the Hall of Two Truths, the meaning of which will soon be explained.

“The Egyptian deities present in the hall are:

1. Osiris: the Lord and Judge of the dead
2. Atum: called the ‘Father of Souls’
3. Ma: goddess of Truth and Justice whose image weighs upon one side of the balance
4. Thoth: Scribe of the gods
5. Anubis: Conductor of Souls; son of Osiris by his sister Nephthys

6. Horus: son of Osiris, who presents the deceased to his father
7. Isis: wife and sister of Osiris, mother of Horus
8. Nephthys: sister of Isis and Osiris, mother of Anubis by Osiris
9. Four sons of Horus—Kebhsenuf, Tau-mutef, Hapi and Amset

“The candidate is brought into the Court of the Dead to be judged for actions while living and to determine if he deserves to dwell among the gods. His escort is Horus. Isis, Horus’ mother, speaks first, inquiring whose *ka* has come to be judged.” [Emphasis in the original]

Once again you can observe the paganism that is so prevalent in Masonry. You can also see that the Mason is being taught that if his good deeds outweigh his bad deeds, he will “dwell among the gods.” This is a teaching that is contrary to God’s Word, for we can never be saved by works. II Timothy 1:9 mentions that God “hath saved us, and called us with an holy calling, **NOT ACCORDING TO OUR WORKS**, but according to His own purpose and grace, which was given us in Christ Jesus before the world began.” In Titus we are told: “**NOT BY WORKS OF RIGHTEOUSNESS** which we have done, but according to His mercy He saved us, by the washing of regeneration, and renewing of the Holy Ghost” (Titus 3:5).

Of course, just a few verses later we find “that they which have believed in God might be careful to maintain good works” (Titus 3:8). We also know that many profess “that they know God; but in works they deny Him, being abominable, and disobedient, and unto every good work reprobate” (Titus 1:16), but good works alone will not get us to heaven. As Paul wrote: “For **BY GRACE ARE YE SAVED THROUGH FAITH**; and that not of yourselves: it is the gift of God: Not of works, lest any man should boast” (Ephesians 2:8-9). However, once we are saved, we will want to obey God’s commands and work for Him out of love for God, but our works cannot save us. “Even so faith, if it hath not works, is dead, being alone” (James 2:17).

Another winged symbol is the winged disk or winged solar disk. It is a symbol of the sky god and was “originally used for magic.”

“This symbol originated in ancient Egypt, where it was the quintessential symbol representing Horus, the sun god. The winged disk was used throughout the centuries to represent the supreme god of other pagan cults and societies. It was the symbol for the baal god during Jezebel’s reign, as well as the god of the Zoroastrian cult, founded by Zoroaster, the Persian religious prophet....”

A Dictionary of Symbols further informs us:

“**Disk** An emblem of the sun and also of the heavens. In China, the ‘sacred disk’ is a symbol of celestial perfection, and the disk that actually represents the sky (the jade disk called *Pi*) has a hole in the centre. The ‘winged disk’ is one of the most widespread of ancient symbols, which is still in use today in signs and emblems; in the profoundest sense, it represents matter in a state of sublimation and transfiguration. The two small serpents which are often to be seen next to the disk are those of the caduceus, alluding to the equipoise of opposing forces. But in a more esoteric sense, the winged disk signifies the disk in movement—in flight; it is therefore correctly used today in emblems created by an age which has learnt how to dominate the air and space.” [Emphasis in the original]

Different gods are represented by a winged solar disk. For example, the Egyptian god Behdety usually appears in the form of a winged solar disk. “He often appears in battle scenes hovering above the Pharaoh like a great falcon with outspread wings....” Horus also is represented by a winged solar disk. In *Egyptian Mythology*, we are told:

“The sun, most important of the Egyptian deities, had many names, and the interpretations given to his functions were extremely varied. As a sun-disk he was called Aten; as the rising sun his name was Khepri, a great scarab beetle rolling before him the globe of the sun, just as on earth the scarab rolls before it a ball of dung in which it has laid its eggs and from which will burst forth life; as the sun climbed to its zenith he was called Ra, supreme god of Heliopolis; and as he set as an old man he was called Atum. He was also called Horus, and when this aspect was combined with that of Ra as Ra-Harakhte he was seen as the youthful sun of the horizon, a winged sun-disk.”

The Assyrian sun god, Shamash, was also represented by the winged sun-disk, as was Asshur, an Assyrian war god.

The winged solar disk also was used by Charles Taze Russell, the founder of the Jehovah Witnesses. He wanted the winged disk put on all his covers (which were later removed from the books by Joseph Rutherford). Of course, this is not surprising that Russell used a 33° Masonic symbol since he himself was a Mason.

There are also numerous creatures that are winged. Isis, an Egyptian goddess, is often portrayed with wings.

Then there's the winged serpent (or uraeus), a symbol of royalty. Quetzalcoatl, an Indian god, was portrayed as a plumed, feathered, or winged serpent. "The

serpent was a wisdom symbol, when plumed it meant that wisdom had been given wings and had become spirit-wisdom, or illumination.”

Uazit, an Egyptian goddess, is also represented by the winged serpent. Another Egyptian goddess, Buto, was symbolized by a winged cobra. She was the protector of Pharaoh. The *New Larousse Encyclopedia of Mythology* explains:

“Buto was a snake-goddess, frequently represented in the form of a cobra, sometimes winged and sometimes crowned. She also often has the features of a woman wearing, either directly on her head or on a head-dress in the form of a vulture, the red crown of the North, of which she was the official protectress as Nekhebet was of the white crown of the South.”

Closely related to the winged serpent is the winged dragon.

“The dragon has symbolic importance to many people, however each person gives a different meaning to the dragon.

To some it stands for great wisdom and immortality. To others, it is a symbol of good fortune. Still others know the dragon as a powerful, benevolent friend.”

A catalog from Dancing Dragon Designs offered a “Golden Dragon Poster.” The advertisement said: “A golden winged dragon rises from the roiling sea.” Actually, the serpent and the dragon are really symbols for Satan.

In connection with the dragon is the wyvern. It is a creature that is usually “represented as a 2-legged winged creature resembling a dragon.”

The pegasus is another winged animal that is quite popular today. It is depicted as a flying horse or a horse with wings. Phil Phillips states: “The unicorn and the winged horse (Pegasus) are common neopagan symbols. They are derived from Greek and Roman mythology, where they were generally ridden by gods and goddesses.”

“In fact, *Pegasus*, owned by *Bellerophon*, was a winged steed, unwearying of flight, which swept through the air as swift as a gale of wind. It was believed by the Greeks that *Pegasus sprang from Gorgon's blood after Perseus, another mythological character, killed her. Pegasus* received its powers to fly when fitted with a golden bridle. After the death of his master, which *Pegasus* deliberately caused, *Pegasus* went to live in *Zeus's*, god of thunder and lightning, stables. It was *Pegasus's* job to bring the lightning bolts and thunder to *Zeus* whenever he needed them.” [Emphasis in the original]

One researcher explains:

“The *pegasus*, or winged horse, originated in Greek mythology as the symbol of the Pegae, a water-priestess.

The pegasus was said to be the son of the Moon Goddess Medusa. His hoof was shaped like a *crescent moon*, which today is yet another New Age and occult symbol. The pegasus is depicted today in the kids’ cartoon series ‘SheRa,’ and crystal pegasus horses are common as amulets and decorative pieces in the homes of New Agers.”

For clarification, one account mentions Gorgon and the other report refers to Medusa. There is no contradiction here. There were three Gorgons who were sisters, one of whom was Medusa. Poseidon seduced Medusa in the temple of Athene. She became angry over this and “turned Medusa’s hair into snakes. When Perseus decapitated Medusa, the blood which escaped from the wound gave birth to Chrysaor and the horse Pegasus.”

Cronus is another god that is sometimes represented as winged. Cronus, Horus, and Saturn are all considered to be a “god of time.” Cronus (also spelled Kronus, Chronus, Chronos, Cronos, and Kronos), from which we get our word “chronology,” was the Greek name and Saturn was the Roman name of the same god. Masonic writer, J. S. M. Ward, in his book *Freemasonry and the Ancient Gods*, tells us that Saturn “is the Satan, the *Tempter*, or rather Tester.” [Emphasis in the original] Eliphas Levi claims:

“Works of malediction and death” were “under the care of Saturn.” It’s no wonder, then, that Saturn is called the “Lord of Death.” In fact, human sacrifices were even offered to him.

Masonic writer, Robert Macoy, reveals that some men believed:

“that Baal was the Saturn of Greece and Rome; and there was a great conformity between the rites and sacrifices offered to Saturn and what the Scriptures relate of the sacrifices offered to Baal.”

Blavatsky also confirms that **SATURN IS BEL OR BAAL**. The Bible condemned Baal worship on numerous occasions. Whenever the Israelites forsook the true God, they turned their worship to false gods, usually Baal. They went so far as to even burn their children as sacrifices to Baal: “They have built also the high places of Baal, to bum their sons with fire for burnt offerings unto Baal, which I commanded not, nor spake it, neither came it into My mind” (Jeremiah 19:5). Some other verses that deal with the abomination of Baal worship are: Judges 2:11, 13; 3:7; 8:33; 10:6,10; I Samuel 7:4; 12:10; I Kings 18:18; 22:53; II Kings 17:16; 21:2-3; II Chronicles 17:3; 24:7; 28:2; 33:3; Jeremiah 11:13, 17; 23:13; 32:29, and 35.

Additionally, **SATURN WAS** known as the god **SET**. Remember Set, the “Egyptian god of evil,” which we covered earlier?

In ancient mythology a festival was held in honor of Saturn which was called the Saturnalia. “[T]emple **PROSTITUTION AND SEXUAL LICENSE**...was most

prolific during the Roman Saturnalia." This festival was also to celebrate the winter solstice, which is still commemorated in witchcraft and Masonry today.

Saturn "is represented as an old man bent with age, carrying a scythe in his right hand." We find that "the scythe is also symbolic of the harvest—of renewed hopes for rebirth" or **REINCARNATION**. The scythe is also a symbol of time.

"Time is [r]epresented by winged old man, with scythe and hourglass, disentangling ringlets of weeping virgin." Sometimes the hourglass is even drawn with wings.

You have probably encountered Cronus on the TV and elsewhere without even realizing what was being depicted. Cronus (or Saturn) is most likely to be encountered at the end of a year or at the beginning of the new year. Cronus is the old man that is leaving the old year behind and the baby crawling (or bringing in the new year) is the rebirth of the god.

Incidentally, Saturn is also represented by a goat's head! Does that remind you of the Goat of Mendes in the inverted pentagram which we covered earlier? It should!

Another holiday that uses a winged god as a symbol is Valentine's Day. In a *Short Dictionary of Mythology* we find:

“Cupido [Cupid], god of love, son of Jupiter and Venus, is depicted as a **NAKED**, winged infant, armed with bow and arrows. On ornaments he is generally represented amusing himself in some childish diversion. He could, in common with the rest of the gods, assume different forms. In the Aeneid he is represented as putting on the form of Ascanius, at the request of his mother, and going to Dido's court where he inspired the queen with love.”

Another name for Cupid is Eros.

“Eros was the youngest of the gods; he was a winged child, gracious though rebellious, whose pranks and caprices caused much suffering among men and gods. He was armed with a bow and arrows whose prick stirred the fires of passion in all hearts. In his malice he respected not even his own mother, and Aphrodite sometimes had to punish him by taking away his wings and quiver. Normally, however, he was her zealous servant. He helped with her toilet and accompanied her abroad.”

“Cupid is often portrayed shooting arrows into the hearts of hapless victims. Usually naked, winged and armed with a bow and arrow, cupids are still portrayed in modern times on Valentine cards, in theater decor and the like.”

As just mentioned, Cupid (Eros) was the son of Venus (Aphrodite). From Eros

we get the word “erotic” and Venus was also considered to be the Roman goddess of erotic love. In fact, the word “venereal disease” was derived from the name “Venus.” Also, the bow and arrow that Cupid carries has a sexual connotation. In *A Dictionary of Symbols* we are told that the bow and arrow “stand for the sun’s energy, its rays and its **fertilizing** and purifying powers. The symbolism of the crossbow is similar, but more complex, including, as it does, the ‘**conjunction**’ of the bow and its stock.”

Cupid is not some adorable, little, mischievous god who makes couples fall in love. He is a god (really a demon) of vulgarity and indecency—but he is presented in a cute way with such an innocent-looking disguise. Our society is so inundated and saturated with paganism. It has become so common place that we don’t even notice it any more. We just accept it as part of life not realizing how we must be offending God by using and propagating pagan symbolism and idolizing debauched, perverted, and evil pagan gods and goddesses.

“But the wisdom that is from above is first pure, then peaceable, gentle, and easy to be intreated, full of mercy and good fruits, without partiality, and without hypocrisy” (James 3:17).

Two mythological creatures that are winged are the sphinx and the griffin.

Below are some more winged items that appear in Masonry the occult, *etc.*
Notice the snake biting its tail on two of these pictures.

13.

ORGANIZATIONAL LOGOS

Many organizations use occultic symbols in their logos. Some of these symbols may be used innocently by some groups but many other groups know the exact meaning behind the symbols they have chosen. In fact, certain organizations even proudly tell you about the logo they've chosen. For instance, the Rosicrucian group called the Ancient and Mystical Order of the Rosae Crucis (AMORC) gives a very detailed explanation about the Hermetic Rose Cross. They state (in part):

“The intricate symbol above is called the alchemical and hermetic Rose Cross, and is a very old **MYSTICAL** symbol. It is composed of two Rosy crosses united into one: the small Rosy cross at the center—representative of man, the microcosm—is in turn, the center point of a larger rose residing at the heart of the large cross—symbolic of the macrocosm. Upon the four ends of the large cross are inscribed the three **ALCHEMICAL** symbols: mercury,

sulphur, and salt. At the top of the cross, mercury is placed in the center, sulphur on the left, and salt on the right. Upon the other ends of the cross the symbols have been inscribed in such an order as to conform to the **ESOTERIC** tradition.

“Also upon each arm, adjacent to the alchemical symbols, is the symbol of the **PENTAGRAM**. This five-pointed figure is a symbolic representation of the Rosy Cross itself: the victory of the quintessence over the four alchemical elements. The wheel at the top of each pentagram represents the quintessence....

“On the lower arm of the figure, below the large rose is a **HEXAGRAM**—symbol of the macrocosm—composed of two interlaced triangles. At its points are inscribed the six planets, according to the ancient **ASTROLOGICAL** tradition: at the bottom is the moon, at its right is Venus, followed in turn by Jupiter, Saturn, Mars, and Mercury. At the center of the hexagram is the **SUN**.

The order of arrangement of these symbols conforms to certain **CABALISTIC RITUALS**.

“The lower end of the longest arm is divided into four sections by two diagonal lines. These sections are colored according to the four colors of Malkuth of the Cabalistic ‘Tree of Life.’ The four sets of three rays which extend outward from the center of the large cross symbolize the Divine light. The letters inscribed upon each large center-ray combine into **INRI**, which combination, according to the Rosicrucian historian Fr. Wittemans, represents a Latin motto meaning ‘Nature is renewed by fire.’ The letters upon the smaller rays represent **INVOCATIVE** names of Latin, Egyptian, and Greek origin.

“The petals of the large rose on the cross are twenty-two in number, and stand for the twenty-two letters of the Hebrew Cabalistic alphabet. The outer circle of twelve petals represents the twelve single letters of this alphabet, and in particular the twelve signs of the **Zodiac**. The next circle of seven petals symbolizes the seven double letters—in particular the seven **ASTROLOGICAL** planets. The innermost circle of three petals represents the three Mother-letters—air, fire, and water.

“At the center of the large rose is the microcosmic rose cross, an unfolded **CUBE** with a five-petaled rose at its center. Four barbs emerge from behind this cross, pointing into the four directions in space.

“The complete symbol or ‘Encyclopedic’ Rose Cross symbolizes all the majesty,

power, beauty, and protection of the Rosicrucian Order.”

The above description is just filled with **OCCULTIC** connotations. It is far too extensive to mention here but I want to point out three things. First of all, the word “alchemy” was mentioned. According to the book, *Power of the Witch*, written by a witch, Laurie Cabot, we discover:

“**Witches** are called many things—shamans, sages, medicine people, **ALCHEMISTS**, mystics, psychics. But no matter what the appellation, these **magical** people share a common bond: a unique relationship with nature, with divinity, and with human society.”

Cabot states elsewhere:

“The Science Tradition [Witchcraft] is based on the Hermetic principles that parallel the principles of the new physics. They have their origins in the teachings of Hermes, known to the Egyptians as Thoth, and to the Romans as Mercury....Actually **HERMES** seems to have been a universal Indo-European god who **TAUGHT ASTROLOGY, ALCHEMY, AND THE MANY MAGICAL PRACTICES THAT ARE AT THE HEART OF WITCHCRAFT**. He seems to have taught the universal truths everywhere, for he even pops up among Native Americans as the trickster gods Raven, Coyote, and Hare.”

We can easily see that **witchcraft uses alchemy**. Of course, alchemy is also important in Masonry. For example, in the 21st degree of Masonry, the initiates are told the following:

“The Hermetic philosophers may also be called speculative alchemists. The name ‘Hermetic’ comes from a tradition that the founder of alchemy was an Egyptian (Thoth) whom the Greeks called Hermes Trismegistus or Hermes the Thrice Great, identifying him with their Hermes, the Roman Mercury.

“The tradition of alchemy is best understood by separating its practitioners into two groups: the first group, who we may term ‘operative alchemists,’ truly believed the transmutation of metals was possible. Their goal was to transform base metals, such as lead or copper, into silver or gold thereby creating wealth. The second group, the ‘speculative alchemists,’ were mystics who declared

that alchemy was not the science of making gold but a **SPIRITUAL SCIENCE OF REGENERATION AND A SACRED ART DEVOTED TO INTERPRETING THE MYSTERIES OF GOD** and life. When we speak of **alchemy in Masonry** our reference is to the second group.”

Remember Hermes, Mercury, and Thoth which we covered earlier? These are synonyms for Satan says occultist Helena Petrovna Blavatsky.

The Masonic book, *A Bridge to Light*, declares: “The 28th Degree is purely philosophical and the most mystical of all. The tenets of **NUMEROLOGY, ASTROLOGY AND ALCHEMY ARE EXPLAINED.**”

Mysteries of Mind, Space and Time states:

“It was natural to suppose that, if a **MAN COULD MAKE HIMSELF TRULY GOD-LIKE**, he would gain the power to transform baser metals into gold, by exactly the same processes that they underwent in the Earth. This belief was expressed on the Emerald Tablet, a record said to have been inscribed by the god Thoth, who was supposed to have taught the ancient Egyptians the sciences and the art of writing. (The Greeks identified Thoth with one form of their god Hermes—Hermes Trismegistos, the ‘thrice-great.’ Hence the term ‘hermetic art’ for alchemy.)

“All these various strands came together: the primitive belief that the search for a way to transmute base metals into gold involved a succession of god-like actions developed into the belief that an **IMPORTANT PART OF ALCHEMY WAS THE ATTEMPT TO BECOME LIKE GOD**—‘as above, so below.’ From this, no doubt, stems the conviction that the **FINAL RESULT OF THE ALCHEMICAL QUEST WAS TO ACHIEVE ETERNAL LIFE....**

“At the lower levels of Taoist practice, the mixing of *yin* and *yang* could be achieved by controlled sexual intercourse; the more advanced mystics practised various meditative procedures, designed to bring about a kind of ‘distillation’ of *yang* within the body. These practices were commonly known as ‘sexual alchemy.’” [Italics in the original; Caps and boldface added]

(ENCLAM 27)

Yet another book, *A Pictorial History of Magic and the Supernatural* remarks: “The Greeks believed Hermes Trismegistus to be the initiator of **OCCULT PHILOSOPHY, OF MAGIC**. In fact, this was really a composite personage, half Hermes, half the Egyptian god Thoth.”

I think it is quite interesting that in *The Occult* we find: “It is worth bearing in mind that the psychologist Jung, who considered “the discovery of alchemy as one of the greatest intellectual adventures of his life,” regarded **ALCHEMY AS THE PREDECESSOR OF MODERN PSYCHOLOGY...**” [Italics in the original; Caps and boldface added]

Let's return to the explanation of the AMORC's logo for the second point.

Notice that “quintessence” was mentioned twice. Mason, occultist, and the artist of the Baphomet drawing, Eliphas Levi, comments: “The guiding star is that same blazing star which is a symbol in all initiations. For alchemists it is the sign of the **QUINTESSENCE**, for magicians the great arcanum, for Kabbalists the sacred **PENTAGRAM**.”

Third, the Cabala was mentioned. Briefly, the Cabala:

“assumes the magical power of words, signs, and numbers, and the possibility through the knowledge of this power to foresee and influence future events. It recognized the power of **amulets, magic formulae, conjurations of spirits** and other supernatural agencies.”

In an article entitled “Jung and the Qabalah,” we are told:

“The Qabalah is one of the most ancient Western philosophical systems. **IT FORMS MUCH OF THE INNER FOUNDATIONS UPON WHICH ASTROLOGY, TAROT, ALCHEMY, NUMEROLOGY, MYTHOLOGY AND CEREMONIAL MAGIC ARE BASED.**”

The book, *Magical Arts*, claims: “Like most of the occult systems within the European tradition of high magic, the **CABALA INCLUDED SPELLS** designed to induce an unseen population of spirits to carry out the magician’s wishes.”

In fact, in the *Dictionary of Mysticism*, we are told that the **CABALA “IS AN ESSENTIAL ELEMENT IN MOST SCHOOLS OF OCCULTISM.”**

So, now you should have a little better idea about the extensive occultism

represented in the Rosicrucian logo. We can see that the person who designed that logo knew exactly what he was doing. We can also see that the Rosicrucians were anticipating a one world order and a one world religion. Listen to what appeared in *The Rosicrucian Digest* in June 1941:

“We predict a mystical-pantheism as the religion of tomorrow.... There will not be churches, but a church.... Since the earth is a habitat of humanity, it is also the common property of all men.... The World State will provide and maintain community hospitals, sanitariums, and clinics....Physicians will be paid by the state and their entire professional services will be absorbed by the state....Every citizen will enjoy these health benefits and guarantees.... Quotas will be placed upon all professions, in each of the zones of the World-State.”
[Emphasis in the original]

A few other Rosicrucian symbols appear below.

ROSICRUCIAN
ILLUMINATI

ROSICRUCIAN
NEOPHYTE

THE BROTHERHOOD OF THE ROSY CROSS.

A M O R C

The Occult Emporium, which sells human bones, has an oil lamp as their logo. They explain:

“Our logo is a drawing of a fine bronze oil lamp. Nine were made for Aleister Crowley’s Order of the Golden Dawn (OTO). It is pictured in the book **‘WITCHES AND SORCERERS’** by Arkon Daraul, page 226. One resides in our personal collection of magical art objects.”

They add that this “magic lamp” “represents earth, fire, air, water. Sign of the Heathen occultist, the solitary wanderer wise in the ways of the cosmos.... See, ‘The Magic Circle; Its Successful Organization & Leadership,’ by Rev. Yaj Nomolos, for more information.” Nomolos is with the Church of Satan.

The Council for a Parliament of World Religions (CPWR) also describes the logo they use. The November 1993 issue of *CPWR Journal* proclaims:

“Five years ago, when Hyde Parker Larry Janiak designed the symbol of unity for the Parliament of the World’s Religions, he believed that someday the people of Chicago might get to see his creation. He had no idea that his symbol would become known to people all around the world. ‘I’m very happy and I hope it helps to unify the world’s religions,’ said the 55-year-old Janiak....

“After researching traditional religious symbols, within two weeks Janiak developed his symbol of unity. The symbol is a circular shape called the **mandala**. The mandala symbolizes completeness and unity, Janiak said.

“The design is ‘the sun in the form of the radiating shape of the iris of the eye of God,’ according to Janiak. The symbol is based on ancient poetic spiritual concepts: the all seeing eye of God; fire, flame and the sun as the source of all life on earth; the sun as the sustenance and source of life on earth; and a single candle flame, as the proverb, ‘Light one candle instead of cursing the darkness.’

“Nine individual flames surround the core, representing the different paths of the **WORLD’S RELIGIONS, WHICH ALL COME FROM THE SAME SPIRITUAL SOURCE**, according to Janiak.”

Once again we can see that the designer of this logo knew exactly what he was doing. He even said that the symbol is a **MANDALA**. However, to fully understand what Janiak had in mind, we need to find out what a mandala is. In the book, *The Tantric Mysticism of Tibet*, we are told that the **yin/yang concept forms the mandala’s basis**. This is interesting since we’ve already seen the occultic yin/yang symbolism.

One magazine tells us: “The word *mandala* can be translated from Sanskrit as **MAGIC CIRCLE**. When we fill the circle with color, forms and symbols, it can be a **MAGICAL** experience.” [Italics in the original; Caps and boldface added]

A New Age organization, describing one of their workshops, states:

“Techniques of visualization, meditation and color breathing will be practiced....All these factors will be put to use as each person makes their *own* mandala....

“The Sanskrit word mandala, usually a circle, is a **MYSTICAL** diagram. In Eastern Philosophy it is used as a point of focus. It is considered to be an ‘engine of power,’ believed by many to have talesmanic (sic) properties, radiating a power that projects qualities associated with it for which it was constructed, *i.e.* tranquility, healing, protection, etc.” [Italics in the original; Caps and boldface added]

A catalog from the Theosophical Society says:

“The word mandala originates from Sanskrit, meaning holy or magical circle. Three principles of order determine structure of a mandala: the center, the radiation that emanates from the center, and a periphery of the circle. The

center represents the **MYSTERIOUS SPIRITUAL FORCE**, birthplace of all existence within space and time. The emanation streams from the center toward the circle's periphery, uniting the inner and outer. Our road to self-realization may lead to the center of being. There, too, we may discover a peaceful centeredness and healing energy of color therapy." [Emphasis in the original]

In *A Color Guide to Yoga* we are told that the every detail in a mandala has a **SPIRITUAL** significance. This book adds: "A *mandala* is a design in which the whole pattern leads you to the center. Gazing steadily at a mandala helps to center your thoughts and to bring you to the required state of single-minded concentration." [Emphasis in the original]

Laurie Cabot proudly declares:

"On many pages [of my Book of Shadows] I have drawn small pentacles, as I do when I sign my name on letters and documents. I believe the pentacle to be one of the oldest geometric symbols known to humans. It consists of a **FIVE-POINTED STAR INSIDE A CIRCLE. IT IS THE KEY SYMBOL OF THE CRAFT. IT IS THE WITCH'S MANDALA**, a geometric diagram of all existence, that encompasses both creatrix and creation."

Another book explains:

"The *Mandala* is known as a 'power diagram,' having its origins in Tantric Buddhism, which is designed to alter consciousness and awaken the Kundalini energy in an individual, thereby leading to 'enlightenment' or the realisation of personal divinity." [Emphasis in the original]

So we can see that Janiak knew exactly what he was doing when he designed the logo for the Council for the Parliament of the World's Religions.

The next logo we'll look at is from *The Beacon* magazine. There is an accompanying article explaining this symbol entitled "A New Age Symbol" followed by an asterisk. The note reads: "This deeply **ESOTERIC** symbol now appears on the cover of *The Beacon*." The article was written by Foster Bailey, a 32° Mason and husband of Alice Bailey (founder of the Lucifer Publishing Company now called Lucis Trust, which was an offshoot of the Theosophical Society). Bailey elaborates:

"The symbol is set in a limitless field of blue, which signifies the sphere of life expression of our solar Logos, who is said to be a deep blue, second-ray Logos. The potency and quality of his pervading life maintains and conditions all within the solar system including the life and destiny of our planetary Logos, Sanat Kumara. It is the most powerful factor which we are able to touch mentally.

"The golden disc, against which the triangle and the star appear, symbolises the all inclusive background of our life on this planet. Sanat Kumara may look through it....It is spoken of in that most ancient of all mantrams, the Gayatri: 'Unveil to us the face of the true spiritual Sun, hidden by a disc of golden light, that we may know the truth.'

"Behind the entire symbol, extending beyond the disc of golden light, emerges

the cosmic cross, which is found in the consciousness of the great ones on that distant Sun, Sirius....

“Some of these forces are partially available in the council chamber of Shamballa....Our symbol touches only a few of these new potencies and includes a blend of both the old age and the new....

“The triangle superimposed upon the disc is yellow, because that is the colour of buddhi. The Hierarchy functions on the buddhic plane, so-called, and the potencies of this triangle make their entry into our planetary life there. This triangle is formed by the three great extraplanetary entities [demons!] now aiding the Plan for the planet....

“One of these three great beings is known to us as the Lord Buddha....He is the closest of the three to the Christ.

He stands at the right hand of the Christ, depicted, therefore, at the lower right hand point of the triangle.

“At the lower left hand point stands the great Entity who carries the potency of solar equilibrium, now newly available to Sanat Kumara. He is referred to by the Master Djwhal Khul as the ‘spirit of equilibrium’ and also as the ‘spirit of

peace,' the peace that passeth all understanding.'...

“At the top point of this new and unique triangle stands that Avatar of Synthesis....His permeating influence hastens the realisation by humanity that, in fact, we live in one world as one humanity with a common destiny....

“Superimposed upon the triangle of new age forces is the five pointed star of the Christ...The **old and the new MUST merge**. The problem is not to fight to kill out the old, but a wise and rightly timed **INFILTRATION** of the new into the boiling cauldron of our times.

“Our symbol, therefore, blends the two eras and rightly pictures the work of the Christ today and the forces He must wield. The point in the centre is the place where the Christ stands. It is the centre of the star, the centre of the triangle, and the centre of the disc of golden light.

“From that centre He works, and as He works the cross of the new era emerges. This is the equal-armed cross, reflecting its cosmic archetype, which will in its own right become the cross of humanity in the days to come. It symbolises the balanced life of right relation to God through aspiration, and right relation to man through service and sharing. Eventually we shall know and live by the fact that nothing actually belongs to any individual man.”

The above description is filled with occultic terminology which could take a book in itself to explain. However, a few items need to be addressed briefly. One thing that must be pointed out is that when Bailey refers to “the Christ” he is not referring to Jesus Christ of the Bible. The New Agers teach that everyone is a Christ. They also believe that Lucifer was Christ. For instance, on the magazine from the Theosophical Society called *Lucifer* (edited by Helena Petrovna Blavatsky and Annie Besant) is the following: “*I Jesus....am the bright, the Morning Star, ' (...Lucifer).*” They add: “The **Light-bearer is the Morning Star or Lucifer**; and ‘Lucifer is no profane or Satanic title. It is the Latin *Luciferus*, the Light-bringer, the Morning Star....’”

Besides this, Sirius was mentioned in the explanation of the logo just given. “Throughout the centuries Sirius has been recognized by most occultists and esoteric teachers as the location where **LUCIFER** and his hierarchy dwell. In Christian terminology, Sirius is simply a secretive codeword for ‘hell.’” In the

book, *Sirius*, we find:

“The Euphrateans, Persians, Phoenicians, and the peoples of Vedic India called Sirius The Leader, while the **Romans knew Sirius as** Janitor Lethaeus, or **Keeper of Hell**, both of which titles are perhaps reminiscent of Anubis, the Egyptian god who led the deceased through the underworld. The Egyptian (sic) themselves revered Sirius under several other names as well, including Sothis, Sothi, Sept, Sepet, Sopdet, Sot, and Sed.”

One form of Anubis

It is interesting to note that Venus also “became the goddess of the Dog Star, Sirius....” Venus, by the way, is another name for Lucifer! Sirius is so important to the occultists that a New Age organization even named their society the Sirius Community and their newsletter is called the *Sirius Journal*. This group was started by former members of the Findhorn Community located in Scotland. Their logo appears below.

One former member and co-director of the Findhorn Community was David Spangler. Spangler seems to be quite enthralled with Lucifer. Some of his quotes about Lucifer were given earlier in this book. Here are two more of his quotes:

“Lucifer prepares man in all ways for the experience of Christhood and the Christ prepares man for the experience of God....But the light that reveals to us the presence of the Christ, the light that reveals to us the path to the Christ comes from Lucifer. He is the light giver. He is aptly named the Morning Star because it is his light that heralds for man the dawn of a greater consciousness. He is present when that dawn is realized. He stands no longer as the tester or the tempter but as the great initiator, the one who hands the soul over to the Christ and from the Christ on into ever greater realms.”

“Christ is the same force as Lucifer but moving in seemingly the opposite direction.”

Of course, quotes like this aren't really surprising since Masons themselves (and others) tell us that Lucifer (or Venus) is the Light-bearer and the Morning Star. Blavatsky writes about the Druids, Magi, Zoroastrians, etc., greeting “the Morning Star—the beautiful Venus-Lucifer.”

Symbol representing Venus

As already mentioned, Lucis Trust was an offshoot of the Theosophical Society, founded by Helena Petrovna Blavatsky, an occultist, Luciferian, magician, and

Mason. She remarked: "...Lucifer or Luciferius is the name. Lucifer is divine and terrestrial Light, 'the Holy Ghost' and 'Satan' at one and the same time."

In other words, Blavatsky claims that Lucifer is the Holy Ghost **AND** Satan, but she is not the only one who has called Lucifer the Holy Ghost.

Masonic author, Albert Pike, insulted and blasphemed the Holy Ghost when he recorded that "the body of the Holy Spirit, the universal Agent, [is] the Serpent devouring its own tail." In fact, in the 28th degree of the Masonic lecture, the Masons being initiated are told the **IDENTICAL** thing!

Notice the hexagram and the snake biting his tail

As also mentioned, the Theosophical Society's newsletter was called *Lucifer*. One person who had material printed in this magazine was Eliphas Levi, the individual who drew Baphomet. He stated: "The intellectual **LUCIFER IS THE SPIRIT OF INTELLIGENCE AND LOVE**; it is the paraclete, it is the Holy Spirit..." The word "paraclete" means "advocate" or an "intercessor." St. John penned: "If any man sin, we have an advocate [paraclete] with the Father, Jesus Christ the righteous" (I John 2:1). Christ is our mediator: "For there is one God, and one mediator between God and men, the man Christ Jesus" (I Timothy 2:5). The occult tries to steal the title of Jesus Christ and apply it to Lucifer (Satan), but this is no surprise for Lucifer has boasted:

"I WILL ascend into heaven, **I WILL** exalt my throne above the stars of God: **I WILL** sit also upon the mount of the congregation, in the sides of the north: **I WILL** ascend above the heights of the clouds; **I WILL BE LIKE THE MOST**

HIGH” (Isaiah 14:13-14).

Satan’s boast, however, rings hollow since God reveals: “[T]hou shalt be brought down to hell, to the sides of the pit” (Isaiah 14:15).

The “light” (or “the Christ”) that the occultists refer to is actually the **LIGHT OF LUCIFER**. As Eliphas Levi and Albert Pike have written: “LUCIFER, the *Light-Bearer!*... Lucifer, the Son of the Morning!” [Emphasis in the original] Blavatsky boasts “that Satan, or the Red *Fiery* Dragon...and *Lucifer*, or ‘Light-bearer’ is in us: it is our *Mind*—our tempter and Redeemer, our intelligent liberator and Saviour from pure animalism.” [Emphasis in the original]

In Blavatsky’s book we also find:

“Holy is the Sabbath of god: *blessed and sanctified is the name of the Angel of Hades*—SATAN.

“For, ‘The glory of Satan is the shadow of the Lord’: God in the manifested world; ‘the throne of Satan is the footstool of Adonai’—that footstool being the whole KOSMOS.” [Emphasis in the original]

A little later in her book she adds that the name “adversary” does not belong to Satan but to Jehovah (the Christian’s God), whom she refers to as “the first and cruelest ‘*adversary of all the other gods*’.....” [Emphasis in the original] She said that the serpent (Satan) “spoke only words of sympathy and wisdom....”

Manly Palmer Hall, also a **MASON AND OCCULTIST, BELIEVES THAT THE MESSIAH IS “THE PLANET VENUS, OTHERWISE CALLED LUCIFER...”** In Hall’s book, *Initiates of the Flame*, we find an astounding statement. He says:

“There are two parts, or divisions, of humanity whose history is closely related to that of the Wisdom Teachings. They embody the doctrines of fire and water, the two opposites of nature. Those who follow the path of faith (or the heart) use water and are known as the Sons of Seth, while those who follow the path of the mind and action are the Sons of Cain, who was the son of **SAMAEL, the Spirit of Fire**. Today we find the latter among the alchemists, the Hermetic

philosophers, the Rosicrucians, and the Freemasons.”

What is so amazing to me is that Blavatsky explains just who Samael is. She notes that “in the Kabala **SAMAEL...IS SATAN....**” (See picture on page 53.) So, according to Hall, the Masons, alchemists, and Rosicrucians are sons of Satan!!

Also notice that in the writings of Lynn Perkins, a Mason, he claims: “**The PATH TO HEAVEN SEEMS TO BE BY THE WAY OF HELL** and intended that way by the Creation.” There’s one problem with this view, however, and that is **THERE IS NO ESCAPE FROM HELL** (see Luke 16:26).

Let’s observe another logo. Target stores use the point within a circle for their symbol. As mentioned earlier, this sign is a representation of the phallus. The obelisk (e.g. the Washington Monument) is another phallic symbol. With this in mind, it is quite interesting that the Target stores are helping to restore the Washington Monument. They also have a punch out paper where you can build your own obelisk. Just “coincidental”?

Another logo comes from the Satchidananda Ashram—Yogaville. Notice the

mandala-like center with the point within a circle, a hexagram, triangle, yin/yang, crescent and moon, *etc.* This logo is obviously a representation of the uniting of all religions into one. Of course, this is exactly what the New Age has been desiring to do. They want to bring all religions together. “Fabian Socialist H. G. Wells wrote that *‘the coming World-State...will be based upon a common World Religion, very much simplified and universalized and better understood.’*” [Emphasis in the original] Robert Muller, former Assistant Secretary General of the United Nations, said: “We must move as quickly as possible to a one-world government; **A ONE-WORLD RELIGION**; under a one-world leader.”

Muller has also stated: “My great personal dream is to get a tremendous **ALLIANCE BETWEEN ALL MAJOR RELIGIONS AND THE UN.**”

Muller refers to himself as a humanist and is one of the editorial advisors for the New Ager's Marilyn Ferguson's *Brain/ Mind Bulletin*. He is also on the advisory boards of The Center for Attitudinal Healing, another New Age organization, the Institute for Educational Studies, and The Temple of Understanding, where he is listed as one of the "Founding Friends." He is on the Board of Trustees of the Global Education Associates. Muller also is on the Board of Directors of Planetary Citizens and was one of the co-founders of this group, as well as a board member of the Planetary Initiative for the World We Choose, another New Age group. Furthermore, "Muller has encouraged the work of Benjamin Creme, of the Tara Center, which has placed ads in leading newspapers of the world proclaiming: 'THE CHRIST IS NOW HERE.'"

Since he founded the School of Ancient Wisdom in Fort Worth, Texas, he is considered the Father of global education and his World Core Curriculum is used in schools around the world. In fact, Muller, who is an ardent follower of the occultist/New Ager, Alice Bailey, claims that this World Core Curriculum was given to him by his spirit guide (which is actually a demon) by the name of Djwhal Khul, also known as the Tibetan! This is the same spirit guide that directed Bailey to write many of her own occultic books. Muller is quite proud of this fact for the literature received from the Robert Muller School clearly admits that the philosophy underlying this curriculum "is based on the teachings set forth in the books of Alice A. Bailey by the Tibetan teacher Djwhal Khul and the teachings of M. Morya."

Muller spoke at the Conference in Search of the True Meaning of Peace which was held in Costa Rica on June 25-30, 1989. He urged them to work towards a one world religion. Here is part of his speech:

"We need a *World or cosmic spirituality*...religious leaders will get together to define before the end of this century the cosmic laws which are *common to all their faiths*....They should tell the politicians what the cosmic laws are, what *God*, or the *gods*, or the *cosmos* are expecting from humans.

"We must hope also that the Pope will come before the year 2000 to the United Nations, speak for all the religions and spiritualities on this planet and give the world the religious view of how the third millennium should be a spiritual millennium, a millennium which will see the integration and harmony of

humanity...." [Emphasis in the original]

Muller also claims:

"The world's major religions must speed up dramatically their ecumenical movement and recognize the unity of their objectives in the diversity of their cults. Religions must actively cooperate to bring to unprecedented heights a better understanding of the mysteries of life and of our place in the universe. 'My religion, right or wrong,' and 'My nation, right or wrong' must be abandoned forever in the planetary age."

Along with the idea of a one world religion comes the idea of one humanity and one world. Global Forum of Spiritual and Parliamentary Leaders on Human Survival has a logo that gives the idea of humanity uniting together to form one world as does the Quartus Foundation and the Planetary Commission for Global Healing.

The Center for the Dances of Universal Peace has a circle-of-hearts logo which doesn't seem to suggest a one world order, but below their logo was this phrase: "Through music and dance, **TOWARD ONE WORLD**, within and without." This group also explains their logo. They state:

"Actually, the heart-circle is original art, produced by graphic artist Marc Takaha, who **RECEIVED THE DESIGN IN VISION** specifically as the logo for the Dances of Universal Peace. The **VISION CAME UNBIDDEN**,

and Marc graciously donated the art to the Center. We wish to respect the intention of **THIS GIFT FROM THE COSMOS....**”

Did you notice that this logo came through a vision? In other words, this logo was evidently given by spirit (demonic) intervention! They also brag that these:

“Dances have spread around the world and are used in a variety of settings, including peace studies, transpersonal counseling, holistic health education, ecumenical conferences and cross-cultural arts celebrations. These have included the United Nations Day Celebrations, Association of Humanistic Psychology National Conference, San Francisco Folk Music Festival, Interfaith Peace Celebrations, Association for the Study of Cross-Cultural Consciousness Studies Conference, American Macrobiotic Society Conference, Whole Life Expos and others.”

By the way, the “Dances were originally the creation of the **SUFI** Murshid (teacher) Samuel L. Lewis and inspired by his teacher Hazrat Inayat Khan, as well as American dance pioneer Ruth St. Denis.”

A Sufi logo

The viewpoint of one humanity and one world is also expressed in the logo which appeared in a pamphlet from the Spiritual Unity of Nations (SUN). The front cover states: “DEDICATED TO THE SPIRITUAL UNITY OF RELIGIONS, NATIONS AND PEOPLES.” [Emphasis in the original]

One author informs us:

“In May 1968 the S-U-N [Spiritual Unity of Nations] held an international conference of Spiritual and **ESOTERIC** Organizations in Hove, Sussex, England. 1650 delegates attended, some coming from behind the Iron curtain and even as far afield as Iceland. There is a S-U-N Centre in detroit (sic), and groups in Chicago, Atlanta, Costa Mesa [California], Bulawayo [Rhodesia], New Zealand; and many in South Africa. The Americans sponsored a large S-U-N conference in November 1968 to formulate ‘A New Age World Religion’ to complement the New World Order of the Aquarian Age.”

The illustration above appeared in one of SUN's pamphlets. SUN also has an interesting logo on their stationery. Note the point inside the triangle, the circle, the seven-pointed star, and the twelve pointed star—all enclosed by a circle.

Another group working to bring all cultures and religions together is the Unity-and-Diversity World Council (UDC). Previous names for this same group are International Cooperation Council and Unity-and-Diversity Council. The *"Unity-in-Diversity Council is a powerful New Age promotional network...which [in 1982—D.L.C.] linked arms with the international network of 'Mind, Body, and Spirit Festivals.' This formed a vast army dedicated to the merger of all religions into one, under a world leader."* They have produced a *Directory for a New World*. Their purpose is "to foster the emergence of a new person and civilization based on the dynamic integration of diversity among all peoples and all life." Their website states: "The methods we use are based upon our search for universal moral and **SPIRITUAL** principles We welcome the **COMING TOGETHER OF ALL** races, cultures and **RELIGIONS** into a unity-and-diversity type of community both locally and around the world." Their activities include Interfaith Celebrations.

"Since September 1995 this World Interfaith Network has been meeting at religious and spiritual centers around Los Angeles such as the Vedanta Society, the Islamic Center, the World Peace Prayer Society, and the

Mormon Temple....Celebrations include meditation...and messages from the different faith groups.”

Unity-and-Diversity World Council

Leland P. Stewart was the founder of Unity-and-Diversity World Council. On May 10, 1998 he spoke at the Taurus Wesak Festival (sponsored by the Los Angeles InterGroup). Before mentioning some of Stewart’s remarks, I think it is necessary to explain what the Wesak Festival is. The Group for Creative Meditation tells us:

“Held in the solar month of Taurus at the full moon of May, this Festival **HONORS THE BUDDHA, THE LORD OF LIGHT**, Messenger of the East. It is this great living Avatar Who brings the ‘Light of Illumination’ from ‘the centre where the Will of God is known’ closer to humanity. During Wesak we are reminded that it is the Will of God to awaken humanity and reveal its true purpose on earth.

“Year after year, the Forces of Light make an effort at Wesak to increase the flow of enlightenment into the world and to throw the light of wisdom and understanding ‘into the minds of men.’ If the demand from humanity is strong enough, mentally powerful and adequately focussed, the Forces of Enlightenment can be invoked and brought forth into human affairs.”

Symbol for Enlightenment

This festival is referred to as “the supreme moment of the year.” Tom Carney says that Wesak “is a wonderful time to talk about the rising sun, for that is what the Festival is all about. It is about the eye being single and the whole body being full of light. It is about the impact of will upon the dedicated server, a single eye, a single will.”

A symbol representing the “Three Linked Meditation Festivals of Spring” (one of which is the Festival of Wesak) appears below.

It was at this festival in honor of Buddha, where Stewart commented:

“In preparing for my remarks today, I took the trouble to locate all of our Alice Bailey books and to look them over, especially the one entitled *The Externalisation of the Hierarchy*. What I discovered was a number of areas of COMMON GROUND with the work of the Unity-and-Diversity World Council. I’d like to mention a few of those areas now.

“I discovered that Synthesis is a very important term in the Alice Bailey teachings....In these teachings, the Buddha represents **light**, the Buddha being ‘the illumined one.’...The central goal of these teachings is to help give birth to a **new world religion**. All of these dimensions resonate with our work.

“The meaning of **unity-and-diversity** in this arena is to serve both the synthesis, which we call the **unity**, and also to pay close attention to the **diversity**, which each aspect of the unity represents....

“Let me just comment on the Wesak Festival itself in that regard. Wesak in Buddhism symbolizes the birth, life, and death of the Buddha....

“In addition to Buddhism and Christianity, we need to pay close attention to Judaism, Islam, Taoism, Confucianism, and a host of modern spiritual movements such as Baha'i, Vendanta (sic), and the like. All of them are making their contribution to the religious life....

“The NEW WORLD RELIGION is also a focus of common ground. We have been working on a ***World Scripture*** since the 1950's as a document which people can use to learn to live in harmony with our universal heritage....Certainly we should include some of the most pertinent esoteric teachings....

“May our spiritual work together be an increasingly powerful force in the awakening of individuals and groups throughout the planet to the NEW WORLD RELIGION and the new world at large!” [Boldface and italics in the original; Caps and underline added]

Leland Stewart is not the only person looking for a new world with unity and diversity. The Sufi Order, founded by Hazrat Inayat Khan, is an interfaith group whose purpose is:

“to spread the message of unity, and promote the awakening of humanity to the divinity in all; to provide a program of spiritual training that brings about a deep personal transformation, culminating in a balanced, harmonious and creative life; to find ways to apply the spiritual ideals of love, harmony, and beauty to the challenges of everyday life; to promote understanding and acceptance among adherents of various faiths, and encourage the unfoldment of universal loving kinship.”

Notice that their logo uses wings as well as the moon and crescent.

Thomas Ehrenzeller has been associated with the World Federalist Association and the Association to Unite the Democracies. Both of these organizations are working for world government. Ehrenzeller remarks:

“The era in which the people of the world finally cast off the bonds of nationalistic self-deception, freeing themselves to join together in one free community, will be a true Solar Age. As solar citizens, we will be part of one mighty race.... We could build a world society...and so we will....Human society must finally become one single society, UNITED IN ITS DIVERSITY....The New Era is coming, whether the guardians of the old are ready or not....There can be a New World Order....We will save the world by making of it a bright New Age.” [Italics in the original; Caps and boldface added]

Mikhail Gorbachev also calls for unity in diversity. Addressing the United Nations (U.N.) on December 7, 1988, Gorbachev; “praised the ‘*tremendous impetus to mankind’s progress*’ that came from the French and Russian revolutions, and he called for a new role for the U.N., saying: ‘*World progress is only possible through a search for universal human consensus as we move forward to a **new world order**....What we are talking about...is **unity in diversity**.*’ (The *Newsweek* article regarding this on December 19, 1988, was titled, ‘Brave New World.’)” [Italics in the original; Boldface added]

Gorbachev, who was president of Russia, is now the President of the Green Cross International. Their logo appears below. (Notice the yin/yang in the logo.)

The Gorbachev Foundation USA is based at the Presidio in San Francisco, California. Below is the Presidio Alliance’s logo. They have the same logo as the United Religions Initiative which was seeking to set up their headquarters at Presidio.

It is also interesting to note that Russia has now changed their symbol of the hammer and sickle to that of the two-headed eagle. (The eagle symbolism is covered elsewhere in this book.)

Gorbachev mentioned that we need a new world order. Plans have been and are being laid for this new world order. There is even a flag called the “One World Flag.” They explain their symbol like this:

“Representing sky above and earth below, the circular icon grabs the eye and pulls our attention to *center*. Like the familiar ‘yin-yang’ symbol and other mandalas, it encompasses all, with everything in balance. Placed within a framework of colors representing the four directions—as generally agreed upon by native americans (sic) and many of the world’s indigenous peoples—we are called to continually think and act from a larger perspective. And with the overlapping of these stripes, we are inspired to move forward—into a future we have always imagined as possible.”

They add: “The steps of our paths may be diverse, but we will all arrive at the same destination!” There’s that **unity in diversity** theme again. Incidentally, this website has won the “Pagan Best of the Web” award and the “Mystic’s Award.”

Global Education Associates is also working for world order. They describe their logo like this:

“The sphere is each of us and it is all of us together and it is the earth as a whole in the system/mystery that is the universe.

“The tree is life—our life—becoming what it can be within and dependent on the larger sphere of life.

“The contrasting fluid fields of dark and light are the ancient elements: earth and water (dark), air and fire (light).

“The dark and light are also the yin and yang of life. They are the opposites which cannot exist apart, and which together are an integrated whole. They are the inner and outer dimensions of our humanization—of our shared present and future.” [Emphasis in the original]

The Council on Foreign Relations (CFR) is also pushing for a one world order. The CFR publishes a magazine called *Foreign Affairs* as well as printing “position papers.” One of these papers was published on November 25, 1959, and was entitled *Study No. 7*. This document called for the “building (of) a new international order (which) may be responsible to world aspirations for peace (and) for social and economic change...An international order — ...including labelling themselves as Socialist (Communist).”

They have an interesting logo. It is a naked man astride a white steed. His hand looks like he could possibly be making the sign of the homed devil.

The Bible tells us in Psalms 9:17 that “the wicked shall be turned into hell, and all the nations that forget God.”

A fascinating bit of information concerning the letters “CFR” is found in the *Encyclopaedia Britannica*. The Moslems believe that an Antichrist is to appear who will have “one eye.”

“Nor is Antichrist unknown to Mohammedan theology in which he is called Masth (sic) al Dajjal, the false or lying Christ... He is to be one-eyed and marked on the forehead with the letters C.F.R., i.e. Cafir or infidel.”

The Trilateral Commission, another group working for world government, has a logo that is a variation of the triskelion and 666. Notice also that the arrows form

a triangle, the center of which yields a broken cross.

Americans United for Separation of Church and State (AU) is yet another organization whose logo forms a triangle. Notice that flame at the top of this logo. The torch is covered elsewhere in this book. I also mention that a Masonic publisher is called The Torch Press. It should be noted that “about eighty percent of the funding for the predecessor of Americans United for Separation of Church and State came from Masons.” Their address is the very same address as that of the Masonic Service Association. In fact, a former Executive Director, Dr. Glenn L. Archer, and a former Associate Director, Dr. C. Stanley Lowell, were both 33° Masons.

AU is against creation being taught in the classroom and they are for abortions, contraceptives, and sex education. A letter received from Barry Lynn, the Executive Director of AU, declares:

“Now I’m asking you to join with Americans United as we prepare for a massive clash with the Religious Right.

“I don’t know about you, but personally I have seen enough, heard enough and read enough about the powerful new political influence of the revamped Religious Right. There’s no point in mincing words: they must be stopped! And the sooner the better.

“If the Religious Right prevails, they will destroy our wondrous American mosaic. They’ll thumb their noses at pluralism and stifle diversity. They’ll inject their own moral code into our personal lives. We cannot—must not—let them do that!

“That’s why I’m writing today to ask you—to urge you, really—to join Americans United and play a personal role in our battle against the Religious Right.” [Emphasis in the original]

The Trismegistus Press printed a Masonic book (which was full of veiled occultism) by W. L. Wilmshurst. You can see that their logo also uses the torch along with the circle and triangle. By the way, remember that the god Hermes was called Hermes **TRISMEGISTUS** or Hermes the Thrice Great. It was Hermes Trismegistus who was the initiator of **OCCULT PHILOSOPHY and MAGIC**. Is this what the Trismegistus Press represents?

Alcoholics Anonymous (AA) also uses the circle and triangle in their logo. Bill Wilson, a co-founder of AA, explained their logo. He said: “The circle stands for the whole world of A. A., and the triangle stands for A.A.’s Three Legacies: Recovery, Unity, and Service.” That doesn’t sound bad but then he added: “It is perhaps no accident that priests and seers of antiquity regarded this symbol as a means of warding off spirits of evil.”

What this symbol (with the triangle pointing upward, called a **MAGIC TRIANGLE**) actually represents is interesting. It is a “symbol of importance to **WITCHES**,” and “represents the protection of the ‘circle’ and the power of the triangle. It is also associated with the **OCCULT** and used to procure the services of **DEMONS** in various rituals.”

Al-Anon, a group based on the principles of AA, also uses a circle and triangle as their logo.

The California Institute of Integral Studies’ logo has numerous triangles incorporated into it. A pamphlet from this group states:

“The Integral Counseling Center offers the San Francisco community growth counseling based on an integral perspective which recognizes the individual as a body-mind-spirit continuum. Counselors have a wide variety of backgrounds in both Eastern and Western philosophy and **psychology**: psycho-dynamic, cognitive, **psychosynthesis**, **yoga**, **meditation**, **Gestalt**, **Jungian psychology**, Rankian therapy and **dreamwork**.”

The logo for Apple Computers is an apple with a bite out of it.

“To many occult insiders, this signifies that the eating of the forbidden fruit (symbolically, the apple) by Adam and Eve in the Garden of Eden was *a good* thing. Occultists and New Agers teach that taking a bite out of the apple gave the first two humans knowledge, or *gnosis*, putting them on the path to self-divinity and godhood.” [Emphasis in the original]

Interestingly, the price tag on the first personal computer from Apple was \$666.

An unusual logo is that of the Raelists. One author points out:

“Last year [1991] they met in Canada; this year the sunny beaches of France hosted the 600 naked worshippers. They call themselves *Raelists* and their leader and prophet is *Rael*, a Frenchman who used to be a sports reporter but now proclaims, ‘I am the Messiah!’

“The name ‘Rael’ comes from combining the word *RA*, one of the names of the ancient Egyptian sun god, and *EL*, a Hebrew title for deity. The 45 year-old Rael says that in 1973 he was whisked to the ‘planet of the Elohim’ by a flying saucer. There, two, tiny, oval-eyed aliens briefed him on his earthly

mission as the messenger and savior of mankind.

“Rael explains that the spacemen also gave him a symbol for the new faith—a swastika inside the Jewish Star of David.

This, he indicates, means peace, love, and harmony and has nothing to do with Hitler or Nazism.

“The primary method of worship by the Raelists is sacred sex, engaged in open, outside spaces as their messiah sits lotus-legged playing a wind instrument. The fast-growing UFO cult now has devotee’s (sic) from 38 countries, including the USA, Japan, Belgium, Switzerland, Italy, and Canada.” [Emphasis in the original]

The Brookridge Institute had previously used a hexagon symbol but they are now using a different logo. The editors relate:

“Our energy model hexagon served us well but this **ancient Celtic symbol**, the *triskele*, speaks more eloquently about the consciousness approach....The *triskele* represents the three cycles of life, and we likewise are moving our publication frequency to three times a year.” [Italics in the original; Boldface added]

In an accompanying article called “The Triskele,” we are informed:

“The **Triskele**, the Celtic version of the YIN-YANG symbol, represents the wholeness of life. It is a circle enclosing three spiral figures that appear to move in the same direction from a single central point. Triplicity symbolizes the stages of Life: Birth, Death and ReBirth. The **CELTIC GODDESSES** typically showed three faces....

“Brookridge Institute has adopted this symbol as its logo because the Institute has two of nature’s four elements in its name (Brook and Ridge) and we also espouse wholeness and the cyclic, regenerative quality of life.”

Many other groups use the triskele (or triscele) as their logo. Remember that this is a variation of the yin/yang symbol but it is also a representation of 666!

New Ager, Richard (Dick) Sutphen, defines the logo he uses for his Reincarnationist organization.

“It incorporates a variation of the pentacle, combined with the dove holding an olive branch. The pentacle, the five-pointed star with the **point up**, represents the highest power of spirituality on earth and is a seal against evil and negativity. It is often called the ‘Star of Man’, and the top point represents the Higher Self dominating the four lower points—the elements of fire, water, air and earth—symbolic of man controlling and creating his own reality.” [Emphasis in the original]

Sutphen also received a symbol during **meditation** on the night that his son, Hunter Shane, was born (June 2, 1986). He bragged: “He is a Gemini with Scorpio rising and moon in Aries. **Astrologically**, that adds up to a very determined young man who knows exactly what he wants.” This symbol appears on page 213. The caption that was under this picture proclaimed:

“Hunter’s birth announcement included a symbol of Hunter, received by Richard in meditation on the night of Hunter’s birth. It was a young man on horseback in Crusader’s attire, holding a grail, and behind it, a glowing golden pentagram.” [Emphasis in the original]

Hunter's birth announcement included a symbol of Hunter, received by Richard in meditation on the night of Hunter's birth. It was of a young man on horseback in Crusader's attire, holding a grail, and behind it, a glowing golden pentagram.

It is interesting to note that "at least 20 or 30 **psychics** around the country predicted that Tara (Dick Sutphen's wife) would have a girl. Only two predicted a boy, one of whom was the Sutphens' close friend, author Jess Stearn." That should show how inaccurate psychic predictions are—and they even had a 50/50 chance of being correct and that many still missed it!

One issue of Sutphen's paper mentioned the words "New Age," or "New Ager(s)," at least 169 times in 26 pages. His magazines are full of advertisements for books, videos, and cassettes on handwriting analysis, automatic handwriting, past life experiences, the Tarot, how to contact spirit

guides, hypnosis, *etc.* He also held Psychic seminars.

Cagliostro was an occultist and Mason who used a symbol with a snake. His symbol can be explained as thus:

“Because of his knowledge of alchemical mysteries, his familiarity with Hermetism and his skill in transmutation, Cagliostro was accorded new honors. It was at this time that a scholar of Nuremberg turned over to him a symbol which he was to adopt as his emblem and engrave on his seal in recognition of the powers that had been conferred on him. The symbol represented a serpent reared on its tail, swallowing an apple as an arrow pierced him through and through while blood gushed from the wound.

The arrow was pointed downward, the serpent stretching its jaws upward—the symbol and hallmark of the Rosicrucians. The serpent is thus seen eating the fruit of knowledge, but then dying of it. Cagliostro informs us that he found the esoteric tracing of this symbol in the great manuscript of the ‘Unknown Superiors’ of Germany. He also relates that a dignitary of Freemasonry who saw it on his seal, bowed before him reverently. In Nuremberg, another Master, noticing this mark of respect, offered him in homage a ring set with a beautiful diamond.”

Another logo that utilizes the snake is the Himalayan Institute. Notice that the circle is actually a snake biting its tail.

The American Medical Association's symbol is the caduceus. This is not surprising when you read the oath that doctors take. The Hippocratic Oath states: "I swear by **Apollo**, the physician, and **Aesculapius** and health and all-heal and **all the gods and goddesses** that, according to my ability and judgment I will keep this oath and stipulation...."

The chiropractic emblem is often the caduceus with just one snake. The International Chiropractors Association uses a logo that seems to be a variation of the yin/yang. Below (in the center) is yet another chiropractic representation.

The Theosophical Society is another society that incorporates the snake into its logo. Observe that there are a number of symbols besides the snake in this drawing. There's an ankh, a white and black triangle making a hexagram, a swastika, and an Om. Masonic writer, J. D. Buck, reveals:

“The perfect equilibrium of spirit and matter is symbolized by the six-pointed star, which is again only another form of the Square and Compass, each now having a base-line from which to form a triangle. Inclose (sic) the star in a circle, which symbolizes Infinity, and you symbolize the harmony, or at-one-ment of the Spirit that descended, and the body, now purified, with Divinity, or the Over-Soul. Place within the Star thus inclosed (sic) the Egyptian emblem of Life [the ankh], and we symbolize *Immortality*, as the result of regeneration. Transform the circle into a serpent and it now symbolizes Wisdom, as the crown or result of equilibrium; and is also a double glyph of the return of matter to its source in spirit. Separate the tongue and tail of the serpent by a *Thor’s Hammer*, or Svastika [swastika], inclosed (sic) within a circle, and it symbolizes regeneration through conquest of animal sense, precisely as taught in the Lodge, under the spiritual meaning of the symbol of the Compass.”

Notice the center of the large picture above. It’s the same as the small picture. Below is another logo for the Theosophical Society.

DASO has a catalog that offers all kinds of occultic paraphernalia including statues of gods and goddesses. Their logo also has a snake in it. DASO explains:

“Our latest offering is rich in mystic symbolism. Notice the person in the picture. He has both wings and roots, symbolizing freedom while being grounded. His head is bent in surrender.

“Surrounding him is a serpent, symbolizing the **KUNDALINI** force. Notice the serpent’s head: the shape is in a heart, between the eyes, the brow is in the shape of the Aries symbol [astrology], symbolising (sic) renewal and rebirth. The serpent has roses as a scale pattern, representing the enjoyment of life and it’s (sic) corresponding disappointments.

“The combining of the serpent and the man has produced an oasis in the desert, where a lotus blooms and two dragonflies play. Behind them you see the sun rising over the pyramids, a new day dawning for an ancient knowledge....

“The activation of the Kundalini is a dangerous step, but once activated the vital life force is flowing through the student. When that happens, the **INITIATE** becomes an overflowing river of love, affecting those who come in contact.

“The pyramids symbolize the revival of knowledge once held sacred in Ancient Egyptian times. The secret processes of awakening your soul!

“DASO selected this picture for its logo because of the meaning behind it. We are now making the complete picture available as a **MEDITATION** Tool. We hope you will meditate on this picture and find the **HIDDEN MEANINGS** held within.”

Former President, George Bush, belongs to a secret society called the Skull & Bones. “The initiation ritual of Skull & Bones is bizarre and grotesque. New members must pass through a harrowing ordeal. At one point, the initiate, lying naked in a coffin in a darkened room, must reveal the most intimate details about his sexual history and experiences.” The logo for this association is a skull and bones with the mysterious number 322 below it.

Mountain Luminary is a New Age paper. Their logo uses the all-seeing eye.

The logo for the Ordo Templi Orientis also utilizes the all-seeing eye.

“Around the turn of the century, Karl Keller, a German, founded the Ordo Templi Orientis (OTO), a ritual magick group which taught sex magick. Crowley joined the OTO and was made the head of its British affiliate. To the heterosexual ninth degree he added a homosexual eleventh degree. OTO sexual magick seems to have been derived from Oriental sources as well as from P. B. Randolph of the American-based Fraternitas Rosae Crucis. It was perfected by Crowley during three years (1920-23) at the Abbey of Thelema in Sicily. Crowley also succeeded Theodor Reuss in 1922 as outer head of the OTO.

“Upon Crowley’s death in 1947, Karl Johannes Germer succeeded to the outer headship of the order. Germer had been with Crowley in England, but returned to his native Germany in the 1930’s.”

The American Psychotherapy Association has pentagrams in their emblem.

Shree Gurudev Ashram utilizes the “Om” for their symbol.

Below are a number of organizations (many of them government associations) that use various occultic symbolism. I am not saying that these groups **intentionally** used any particular symbol with occult connections in mind, but it is important to remember that many of our government officials do belong to secret societies such as Freemasonry or the Skull & Bones. In the book, *Sirius*, we are reminded:

“Many of the founding fathers of the United States of America were Masons and they used its rituals in the consecration of their inspired work, including the erection of important government buildings. Study will reveal that there is more to Masonry than meets the modern eye, for there reside important aspects of the Mysteries within it, as we are told by the Tibetan.”

The Tibtean is a spirit guide (actually a demon) that many New Agers such as Alice Bailey, Robert Muller, M. Temple Richmond, etc., have received guidance from.

HAND SIGNALS

Proverbs 6:12 tells us: “A naughty person, a wicked man, walketh with a froward mouth. He winketh with his eyes, he speaketh with his feet, he teacheth with his fingers.” It sounds as though this verse could be applied to Masons, occultists, gang members, and many other groups of people because they often use their hands and their feet to give messages to one another. For example, the Masons have their secret hand grips. They also position their feet in a particular manner to form a Tau cross. This type of position can be helpful if a Mason is called into court. With this stance, the judge (if he is also a Mason) can readily see that the person before his bench is a fellow member of his society.

You see, the Mason, taking the oath of the 3°, **PROMISES TO CONCEAL ALL CRIMES COMMITTED BY A FELLOW MASON** except those of treason and murder. By the 7° of Masonry, the candidate has to promise that he “will assist a Companion Royal Arch Mason when I see him engaged in any difficulty, and will espouse his cause so far as to extricate him from the same, **WHETHER HE BE RIGHT OR WRONG.**”

In the 13° the oath is taken to the effect that **ALL CRIMES ARE TO BE CONCEALED, INCLUDING MURDER AND TREASON.**

This, of course, means that if a Mason has committed murder and the judge is also a Mason, the judge is obligated by his Masonic oath to set the murderer free, even if it results in placing the blame on an innocent person! In fact, this command is given in one handbook:

“YOU MUST CONCEAL ALL THE CRIMES OF YOUR BROTHER MASONS...AND SHOULD YOU BE SUMMONED AS A WITNESS AGAINST A BROTHER MASON BE ALWAYS SURE TO SHIELD HIM....IT MAY BE PERJURY TO DO THIS, IT IS TRUE, BUT YOU’RE KEEPING YOUR OBLIGATIONS.”

Witches tell us that hand signals are very important. In *Wicca: A Guide for the Solitary Practitioner* we find:

“Gestures are silent counterparts to words. Gestures can enhance Wiccan rituals when performed in conjunction with invocations or dance, or can be used alone for their real power....

“My introduction to Wicca happened to include some of these old gestures. In 1971 I saw some photographs of **MAGICAL** protective **GESTURES** such as the *mano figo* (a hand clenched into a fist, the thumb jutting out between the first and middle fingers) and the *mano cornuta*, a V formed by the first and little fingers and held upside down....the latter is **USED IN WICCA**, with points up to represent the God in his Homed aspect....

“Gestures in Wiccan ritual can easily become second nature. When invoking the Goddess and God, the hands can be held uplifted with the fingers spread to receive their power. The Goddess can be individually invoked with the left hand, the thumb and first finger held up and curled into a half-circle, while the rest of the fingers are tucked against the palm. This represents the crescent Moon. **The God is invoked** with the first and middle fingers of the right hand raised, or **with the first and fourth fingers up, the thumb holding down the others against the palm, to represent horns.**

“The elements can be invoked with individual gestures when approaching the four directions: a flat hand held parallel with the ground to invoke Earth at the North; an upraised hand, fingers spread wide apart to invoke Air at the East; an upraised fist for the South to invite Fire, and a cupped hand to the West to invoke Water....

“GESTURES ARE ALSO USED IN MAGIC. Each of the fingers relates to a specific planet as well as an ancient deity. Since **pointing is a magical act and is a part of many spells,** the finger can be chosen by its symbolism.

“The thumb relates to Venus and to the planet Earth. Jupiter (both the planet and the god) rules the forefinger. The middle finger is ruled by the god and planet Saturn, the fourth finger the Sun and Apollo, and the little finger by the planet Mercury as well as the god after which it is named....

“Gestures are magical tools as potent as any other, ones we can always take with us, to be used when needed.”

[Italics in the original; Caps and boldface added]

The “mano figo,” also called “fica gesture” (mentioned above), “has been regarded as a defense against the evil eye, a crude insult, and a sexual symbol as well.”

The “mano cornuta” was also mentioned. This is known by a number of other names such as: the devil’s triad, il cornuto, the horn, homed devil, twin-homed salute, homed hand, devil salute, and devil horn salute.

The Devil's triad is a recognition sign among Satanists and witches. Remember that Satan (or Pan) is called "The Horned God," so the hand signal is formed so as to resemble horns. Many people in heavy metal music or rock music also use this sign. Even some within the so-called "Christian" rock world (there is no such thing as Christian rock!) use this signal. Some of the rock groups who use this are: Gene Simmons (from KISS), Heart, Cheap Trick, Utopia, and so-called "Christian" rock group Petra. The Beatles were the first rock band to use the devil's triad on a record album cover.

Another rocker who frequently uses the devil salute is Ronnie James Padovana who calls himself "Dio" (which is Latin for "God"). He admits that he knows about the occult and he at one time "led thousands in 'altar calls' to Satan at concerts...."

His album covers also feature this sign. In addition, it is interesting to note his name on the cover. When his name is turned upside down, the word changes from "Dio" to "Devil"!

The Devil's triad "is a Silician sign of the Devil used to cast spells and to ward off the 'Evil Eye,'" as well as a sign for hexing and charming (casting spells), which is explicitly forbidden by Deuteronomy 18:10-12a: "There shall not be found among you any one that maketh his son or his daughter to pass through the fire, or that useth divination, or an observer of times, or an enchanter, or a witch, Or a **CHARMER**, or a consuler with familiar spirits, or a wizard, or a necromancer. For all that do these things are an abomination unto the Lord."

This sign is "also used by the Mafia for signaling death."

It is also intriguing to note that the god Shiva (Siva), which is a synonym for Satan (according to *The Satanic Bible*), also is seen making the Devil's triad in some pictures. One Mason, J. S. M. Ward, brags: "Shiva, who carries in His second right hand the cabletow of death...is the Lord of Death, and therefore of rebirth [reincarnation], it is **particularly significant** that He should be represented as making the sign He is."

In *The Gods of India*, we find:

"I bow to Siva as Isana, the Ruler, who has five faces. Followed by the She-Goat...he holds in his hands the Vedas, an elephant hook, a noose, a hatchet, a skull, a drum, a rosary, a trident, and he shows the **gestures** of removing fear

and granting boons.”

Below is the “moon sign.” It is used by witches to salute the rising moon.

A hand signal can also be seen in the Tarot deck:

“*The Magician* (also called the Magus or the Juggler). A young man holding up a wand in his right hand, and pointing to the earth with his left. On a table before him are the four elemental symbols, and above his head is the sign of eternity or infinity....He is the Magus, the Adept, the human being integrated on all planes, the will liberated through understanding. His **GESTURE** refers to the basic **OCCULT** principle ‘That which is above is as that which is below, but after another manner.’”

Notice that the artist of Baphomet, Eliphas Levi (who was a Mason and occultist), drew Baphomet making the same OCCULT gestures!

S. R. Parchment boasts:

“Those who received initiation into the mysteries were given certain keys pertaining to both **white and black magic** which were portrayed by the **right hand of Baphomet pointing upward** to the bright disc of the waxing moon while the **left pointed downward** to Lima in darkness. That **MANY OF the leading lights of MASONRY WERE IN QUEST OF THE MAGICAL SECRETS NO STUDENT OF OCCULT SCIENCE WILL DENY....**”

Another hand gesture is called a mudra. *The Seeker's Handbook* explains that a mudra is:

“A ritual gesture of the hand or body, often seen in Oriental art and sculpture, as in figures showing the Buddha with one hand raised in the gesture of granting peace and dismissing fear. Also, trancelike motions, or convulsive-ecstatic poses and hand gestures, often performed in a convulsive manner by someone receiving a direct transmission of spiritual power from a master (shaktipat).”

A Dictionary of Mysticism notes that the mudra is a “‘mystic seal’ of Oriental **occultism**; a series of **occult signs** made with the fingers, and considered to have **magical** effects.”

In *The Gods of India* we find:

“In addition to *mantras* *yantras*, the third way of representing deities is through gestures (*mudra*). There is a large number of symbolic gestures used in ritual and believed to evoke supranatural beings. Many of the *mudras* through which a deity can be evoked are also used in the sacred dance.” [Emphasis in the original]

Notice how the fingers of both figures on page 231 are formed into circles. This is called a mudra.

Another hand gesture is that of benediction. The **shadow** “**represents Satan**. That shadow, according to Satanists, is the symbol of malediction. A modernized use of this sign appeared in the *Daily World* of October 18, 1969, as the insignia...of the **Communist** GIs & Vets for Peace.” The Pope makes this sign frequently, especially when giving blessings.

A former witch, Mason, and Satanist explains:

“However, the two-fingers TOGETHER *mudra* symbolizes:

“1) the Masonic/Gnostic Law of opposites. The need for both dark and light, good and evil, pain and pleasure which is exemplified in such Masonic icons as the ‘Master’s Carpet,’ which is intended to be a black and white checkerboard. This is rooted in Persian dualism (the doctrine that there is a god of good and a god of evil; and that both gods are equal in power and are necessary to the equilibrium of the cosmos), and is totally un-Biblical....

“b) These also symbolize the ‘Abba’ or ‘Father Current’ of Magic and the ‘Aima’ or ‘Mother Current’ of Magic. These currents or ‘lines of power’ come down to us through the centuries from Babylon and Nimrod....

“In Satanism, that gesture is known as the sign of ‘The Bowman.’ It is a symbol of the anti-Christ. This Bowman/anti-Christ association IN THE OCCULT... is because of the connection between the Horned God of witchcraft and the hunt. A popular name for the Horned God in England is, in fact, Heme the Hunter.”

[Emphasis in the original]

The *Complete Book of Witchcraft* reveals:

“There was a deeply seated belief in the fascination or enchantment of shadows;

so that the witch, or magician, could use them to either produce sickness and death or to inspire love....the shadow of the priest's fingers raised in blessing was considered [*by Satanists—American Opinion*] to have evil significance....A remarkable thing connected with the hand so lifted, is that its shadow resembles the head and horns of the Goat of Baphomet...the symbol of black magic. The use of the 'shadow of blessing' was regarded as the legitimate prerogative of the Pope, and was most terribly exercised during the Dark Ages and at the times of the Inquisition." [Emphasis in the original]

A related hand signal is the "peace sign" or "v sign." The signal "actually began as a symbol of Satanic benediction during the rituals." This sign has been used by Yasser Arafat, Richard Nixon, Winston Churchill, and Stewart Meacham, Co-Chairman of Reds' New Mobilization Committee." Churchill said that the sign stood for victory but remember that Churchill was one of the insider "elite" and a Mason. He most likely knew the evil significance of this symbol but tried to give it a facelift.

The "v sign" has a colorful history. "V" is the Roman sign for the number five and Adam Weishaupt used it in the Illuminati to symbolize the "Law of Fives," but there's more. In the Cabala:

"the meaning for the Hebrew letter for V (Vau) is 'Nail.' Now, 'The Nail' is one of the secret titles of Satan within the Brotherhood of Satanism. Satan is letting us know that this is one of his favorite signs. Why else does he like the PENTAGRAM (Penta = five!) and the FIVE-fold salute used in Masonry and Witchcraft?"

[Emphasis in the original]

Furthermore:

“The Leftists, radicals, and Satanists who have popularized that sign...know its ancient significance very well. In fact, that ‘V’ sign is now used **extensively** by such **Communist** organizations as the Young Socialist Alliance, Vets for Peace in Vietnam, and the Students for a Democratic Society.”

Although not a hand sign, the peace symbol itself needs to be examined.

“Known as the ‘peace sign’ throughout the 1960’s and into the present day, this symbol is the **Teutonic rune** of **death**. 1950’s peace advocate Gerald Holtom may have been commissioned by **communist sympathizer Bertrand Russell to design a symbol to unite leftist peace marchers in 1958**. It is clear that either Holtom or Russell deemed the Teutonic (Neronic) cross as the appropriate symbol for their cause.

“Throughout the last 2,000 years this symbol has designated hatred of Christians. Nero, who despised Christians, crucified the Apostle Peter on a cross head downward. This hideous event resembled the Teutonic cross and became a popular **pagan insignia** of the day. Thereafter, this sign became known as the ‘Neronic cross.’

“**The symbol’s origin in history proves it to be the visual mystic character for ‘Aum’ (the split ‘Y’), This is the sacred word to the Hindu. Chanting ‘Aum’ is supposed to help awaken ‘the serpent power of Brahma’ at the base of the human spine.** Occultist Albert Pike also identifies this symbol as

mystical in his book on Freemasonry *Morals and Dogma*.”

The peace symbol (also called the “broken cross,” “crow’s foot,” “witch’s foot,” “Nero Cross,” “sign of the ‘broken Jew,’” and the “symbol of the ‘anti-Christ’”) is actually a cross with the arms broken. It also signifies the “gesture of despair,” and the “death of man.”

“The Germanic tribes who used it attributed strange and **mystical** properties to the sign. Such a ‘rune’ is said to have been **used by ‘black magicians’ in pagan incantations and condemnations....**To this very day the inverted broken cross—identical to the socialists’ ‘peace’ symbol—is known in Germany as a ‘*todersrune*,’ or death rune. Not only was it ordered by Hitler’s National Socialists that it must appear on German death notices, but it was part of the official inscription prescribed for the gravestones of Nazi officers of the dread SS. The symbol suited Nazi emphasis on **pagan** mysticism.” [Italics in the original; Boldface added]

With the arms of the cross raised in an upright position, it is “a Pythagorean emblem of the course of life, in the form of a rising path with fork roads to Good and Evil.” It also signifies fertility, but with the arms pointing downward, it denotes evil and death.

“In fact, the inverted ‘Man-rune’—the figure encircled in the common sign which the Communists tell us means ‘peace’—has for centuries been a favorite sign of Satanists.”

Anton LaVey, the founder of the Church of Satan, used the peace symbol as the backdrop for his altar.

One former witch makes the following comment about the peace symbol:

“It is an ancient and powerful symbol of Antichrist. During the dark ages it was used in Druid Witchcraft and by Satanists of all sorts during the initiation of a new member to their order. They would draw the magic circle and give the initiate a cross. The initiate would then lift the cross and turn it upside down. He would then renounce Christianity in all three dimensions (sic) of time (past, present and future) and break the horizontal pieces downward forming the design of the ‘Raven’s Foot.’ This ugly symbol is nothing short of blasphemy against the Holy Ghost. For one to wear or display this symbol is to announce either knowingly or unknowingly that you have rejected Christ. Remember, symbolism is a picture language, and a picture is worth a thousand words.

Below are a few examples of how the peace symbol is being used.

ECOLOGY NOW!

*This symbol is used
nationwide by revolutionary
Marxists*

Another hand signal is the Vulcan peace sign. It is supposed to mean “Live Long and Prosper,” and can be seen in *Star Trek*.

Vulcan was a sun deity who was associated with fire, thunderbolts, and light. The festival in honor of him was called the Vulcania **human sacrifices** were offered. “According to Diel, bears a family relationship to the Christian **devil**.” It fascinating to know that he married Venus, another name for Lucifer or the devil. What is even more interesting is that Vulcan adored in Masonry under the name of Tubal Cain. In the *Masonic Quiz Book* the question is asked: “Who was

Tubal Cain?” The answer is: “He is the **Vulcan** of the **pagans**.”

In Masonry, Tubal Cain is the name of the password for the Master Mason (or third) degree.

Listen to what occultist and Mason, Manly Palmer Hall, has to say:

“When the Mason learns that the key to the warrior on the block is the proper application of the dynamo of living power, he has learned the mastery of his Craft. The **seething energies of Lucifer** are in his hands and before he may step onward and upward, he must prove his ability to properly apply energy. **He must follow in the footsteps of his forefather, Tubal-Cain**, who with the mighty strength of the war god hammered his sword into a plowshare.”

There is also a sexual connotation associated with Vulcan and Tubal Cain. Former Mason, Bill Schnoebelen, explains:

“For Masons who wish to conceal their membership from non-Masons, but still advertise it to their Lodge brothers, there is a special pin (or tie tack) they can wear. It looks like an upside down golf club with two balls near the top....Many people assume the person is a golfing enthusiast, but it is actually a visual Masonic pun.

“This is called the ‘Two Ball Cane,’ and is a pun on the secret password of a Master Mason, ‘Tubalcain (sic).’...It is also an all-too-obvious pun on the ‘god’ of Masonry, the male reproductive organ. Nice, eh?...especially when many men wear these wretched things to church on Sunday!”

While we are on the subject of Masonry, there is another Masonic symbol called the clasped hands. Of course, the Masons aren't the only ones who use this symbol.

“It is now used by the...A.F.L.-C.I.O., and is frequently reproduced in the Communist *Daily World* to indicate union between Comrades. This insignia is the official symbol of the Communist-controlled Student ‘Nonviolent’ Coordinating Committee, and serves as the logo for the Trotskyite Communists’ *Workers World*.”

This emblem was also a Pythagorean symbol. (Pythagoras was a **MAGICIAN**.) Many Masonic sources reveal that the clasped hands are a “symbol of fidelity,” but they don’t stop with that explanation. For example, Albert G. Mackey, 33° Mason, confesses:

“The *right hand* has in all ages been deemed an emblem of fidelity, and our ancient brethren worshiped **DEITY UNDER THE NAME OF FIDES** or Fidelity, which was sometimes represented by **TWO RIGHT HANDS JOINED**, and sometimes by two human figures, holding each other by the right hands....

“Numa was the first who erected an altar to **FIDES**, under which name the **GODDESS OF OATHS** and honesty was worshiped. Obligations taken in her name were considered as more inviolable than any others.” [Italics in the original; Boldface and caps added]

Oh, so here again the Masonic symbol represents a **PAGAN GOD**—this time it is Fides.

In fact, the very first degree of the Masonic ritual contains the following question and answer:

“Q. Why were you caused to rest your right hand on the Holy Bible, square, and compasses?

“A. Because the right hand was supposed by our ancient brethren to be the seat of fidelity, and so they worshipped Deity under the name of *Fides*, which was supposed to be represented by the right hands joined, and by two human figures holding each other by the right hand; the right hand, therefore, we masonically use to signify in the strongest manner possible the sincerity of our intentions in the business in which we are engaged.” [Emphasis in the original]

How can a Christian worship Fides and at the same time worship the God who commanded: “Thou shalt have **NO** other gods before Me” (Exodus 20:3)? Another of God’s precepts is: “Make **NO MENTION** of the name of other gods, neither let it be heard out of thy mouth” (Exodus 23:13).

15.

A MEDLEY OF SYMBOLS

As mentioned earlier, the triskele (or triskelion) is one symbol that appears in many logos today. Although many people would probably not recognize the name “triskele,” they certainly would recognize a picture of this symbol. “The **triskelion** (Greek for three legs) is a symbol of the sun intended to express motion. A similar device, with four legs, called a tetraskelion, is a modification of the swastika.” Like the swastika, it is considered to be a good luck symbol.

An occult organization sells a triskelion and serpent pendant. They brag: “Double **magic!** Designs on both side (sic) of this unusually attractive pendant. One side bears the three-legged triskeles symbolizing rising, zenith, setting. On the other [side the] serpent portrays strength, divine power, infinite wisdom, eternity.” Another catalog tells us that the “legs’ represent birth, death, and **rebirth.**” Of course, this is a reference to **REINCARNATION.**

We must remember that since the triskele is “a Celtic version of the Yin-Yang symbol of life,” and a modification of the swastika, that what has been said previously about the yin/yang and the swastika (to be covered later) applies to this symbol as well.

A New Age organization sells a Celtic Goddess Pin. It is described like this: “Symbols of the triskele (the sea, good luck) and cauldron (abundance, inspiration) celebrate *Cerridwen*: Celtic goddess of transformation, who offers guidance and spiritual renewal at crucial junctures in the lives of her devotees. In Welsh mythology, she guarded the cauldron of inspiration and was the muse of the bards.” [Emphasis in the original]

Cerridwen is the goddess of wisdom and **witchcraft**. A former witch reveals: “Cerridwen is the traditional name of the Crone. I learned that in ancient legend, she is the keeper of the Black Cauldron of Immortality. This is the Cauldron from which one sip could bring incredible insights, wisdom and supernatural powers.”

Cerridwen is also another name for Venus (also known as Lucifer), Isis, and Hecate. In *Mythology* we find that “Hecate was the Goddess of the Dark of the Moon, the black nights when the moon is hidden. She was associated with the deeds of darkness, the Goddess of the Crossways, which were held to be ghostly places of evil magic.”

Laurie Cabot, a witch, states: “At death Hecate was said to meet the departed souls and lead them to the Underworld....And so Hecate became known as the Queen of the Witches....” It’s no wonder that Hecate is called the “Queen of the Witches” since she taught **SORCERY** and **WITCHCRAFT**.

Marilyn Ferguson, a New Ager, used the symbol of the triquetra (another name for the triskele) on her book *The Aquarian Conspiracy*. This is a variation for the number 666. Other books and materials have a similar design printed on them, such as books from David Spangler, the person who lauds Lucifer, and *The Witch’s Grimoire*. As most people know, the number 666 is the number of the beast (see Revelation 13:18) and is evil, yet the occultists and New Agers love this number and consider it to be a sacred number.

As stated earlier, many organizations, such as the World Future Society and the Trilateral Commission, incorporate this symbol into their logo. I think it is quite interesting to see that this same symbol appears on the cover of the *New King James Bible* as well!

The symbol below is used to exorcise evil spirits. Isn't there a striking similarity to the logo on the *New King James Bible*?!

A few more variations of the triskele appear on the next page.

I think it is interesting to note that Paul (David) Yonggi Cho, a former Buddhist who is now supposedly a Christian, is pastor of the world's largest church with about 800,000 members. His church in Seoul, Korea, the Yoido Full Gospel Church, belongs to the Assemblies of God conference. The logo he uses is the triskele (see below). As a former Buddhist, I'm fairly sure he would be quite aware of the symbol he is using.

Satanists love to use 666 but sometimes it is disguised as "FFF," since "F" is the 6th letter of the alphabet. Sometimes they will use 999 since 9 is an upside down 6. Also used in Satanism is 3 circles connected at the center which is another symbol representing the mark of the beast.

Another symbol used in Satanism is the anarchy sign. It is a large A surrounded by a circle and it “represents the abolition of **all** law. Initially, those into ‘punk’ music used this symbol, but it is now widely used by Heavy Metal followers.”
[Emphasis in the original]

This symbol is really an emblem of rebellion. I Samuel 15:23 tells us that “rebellion is as the sin of witchcraft.” It isn’t hard to see how rebellion can result in witchcraft. King Saul was rebellious and he eventually sought out a witch. Satan rebelled against God and now his followers obviously are following in his footsteps.

Below are two symbols that are used in Satanism. The first one is a “blood ritual symbol [that] represents human and animal sacrifices” and the second is a “sexual ritual symbol often...painted on objects near the side of the road to show the Satanists’ use of the location.”

Satanists also reverse the double-headed axe to represent “anti-justice to Satanists.”

Of course, the doubled-headed axe (or labrys) in the upright position isn't a good

symbol, either. One witchcraft magazine states:

“A Labrys is a double-headed ax that some say dates back to matriarchal times. Women involved in Dianic **Witchcraft** and related paths of **Feminist Spirituality** wear **Labrys amulets** for protection, strength, and empowerment. For some, the Labrys also is the emblem of the Amazon.”

In fact, the labrys is one of the symbols in witchcraft used to honor the Goddess. Another book on witchcraft states: “The labrys is symbolic of the phases of the Moon and of the Goddess. It was extensively used in Crete.”

A gay and lesbian organization proudly uses the labrys. They brag: “The Labyris (sic) comes from the time when women lived equal and free. It symbolized power and strength, transformation and the Goddess. Labyris (sic) takes its name from labia and gives its name to **labyrinth, place of initiation. Lesbians** are self-initiated women who have transformed and empowered ourselves. The **double-axe is our symbol**, wear it with pride!”

Marduk, a pagan god, was known as the Lord of the double-headed axe and a Masonic book tells us that the double-headed axe was the chief symbol of Sandan and that it was also “associated with the Syrian god of fertility....” A *Dictionary of Symbols* gives some revealing information about the axe:

“A symbol of the **power of light....**But much more important and complex is the significance of the **twin-bladed axe, related to the sign tau....**According to Luc Benoist, this twin-bladed axe is the same as the Hindu *vajra* and Jove’s **thunderbolt**, becoming, therefore, a **symbol of celestial illumination**. Nowadays, the **double-bladed axe** (the *labrys*) is **associated with the**

labyrinth, both being symbols in the Cretan cult.” [Italics in the original; Boldface added]

The tau is a Masonic symbol. The Mason makes the tau cross with his feet during his initiation ceremony and the triple tau appears on the Masonic apron. J. S. M. Ward, a Mason, reveals that the tau cross is “placed on the apron of the Master of the Lodge, though placed [upside down], so as to give also the symbol of the square, and also to emphasise its **phallic** meaning.” He adds: “The *tau cross* is also a symbol of the male or creative side of the deity, and is really a conventionalised form of the phallus.” [Emphasis in the original] *The Sign Language of the Mysteries* states somewhat the same thing: “The tau cross is a very ancient symbol, representing the phallus and hence it often stands for our animal passions.”

The book *Anacalypsis* reveals: “The Tau, T, is the emblem of Mercury, of Hermes. It is the *crux ansata*, and the *crux Hermis*....the **crux Tau was also the emblem of the generative power**, of eternal transmigrating life, and thus was used indiscriminately with the Phallus. It was, in fact, *the phallus*. The Tau is the Thoth, the Teut, the Teutates of the Druids; and Teutates was Mercury....” [Italics in the original; Boldface added]

A former Mason mentions that the tau cross “is actually the symbol of the pagan slain and risen god, Tammuz (Ezekiel 8:13-14). It is a symbol for just another counterfeit Masonic ‘Christ.’”

COUNTERMASONIC CHURCH.

The Phoenicians used the tau cross as a **magic** symbol.

As just mentioned, the tau and the double-headed axe are the same as the thunderbolt. Thor, Set, Zeus, and Jupiter (as well as other gods) were considered to be the gods of thunder and lightning. It's interesting to note that Thor (who is covered more thoroughly in the chapter on "Masonic and Eastern Star Symbols") is another name for Satan. Remember that Satanists love to use the lightning or thunderbolt (also called the Satanic S).

A Satanic rock group called KISS ("the name stands for 'Knights in Satan's Service'") uses the Satanic S for the last two letters in their name. They also have a song on one of their albums entitled "God of Thunder." Some other rock groups that use the Satanic S are "*Black Sabbath, AC-DC, Raven, Metallica, Krokus, Judas Priest, Keel, [and] Bowie....*" [Emphasis in the original]

A little history of where the Satanic S came from should prove fascinating. We're told: "In the early stages of the total Nazification of Germany, Gestapo chief Heinrich Himmler, one of the most feared and hated men in the entire nation, undertook archeological excavations in various parts of Europe, digging for clues to the 'magnificent' past of the Aryan 'super-race.' At a site in Bavaria, ancient **runic** inscriptions were uncovered. **Runes** were part of a centuries-old Germanic alphabet which **possessed mystical significance** to the Teutonic tribesmen of that time. One of the tokens unearthed was the **lightning bolt 'S.'** **Himmler incorporated the sign into the Gestapo, making it the infamous 'SS' (for Schutzstaffel).** **Several other runes were also used in secret SS rituals.**

"The two letters of *KISS*' logo are identical to those of Himmler's SS...."

“These jagged symbols were also used by the Nazi S.S. as their **sign of Satanic terror. The sign represents the power of Lucifer falling to earth from Grace as a lightning bolt.** (Luke 10:18).” [Italics in the original; Boldface added]

A Dictionary of Symbols claims; “The **thunderbolt** is held to be an emblem of sovereignty. The winged thunderbolt expresses the ideas of power and speed. Jupiter’s three thunderbolts symbolize chance, destiny and providence—the forces that mould the future....The *vajra*, the Tibetan symbol for both ‘thunderbolt’ and ‘diamond’, is also connected with the world-axis....It **is also related to the glance from the third eye of Shiva** (or Siva), the destroyer of all material forms.” [Italics in the original; Boldface added]

The thunderbolt, in the form of the dordj, “is used by the lamas and bonzes to bless the faithful, and to exorcise demons.” As just noted, it is also related to the third eye of Shiva. The third eye is covered in the chapter on the “All-Seeing Eye,” but it should be noted, according to *The Satanic Bible*, that Shiva is another name for Satan.

Shiva carries the **trisula** (or trident, which is referred to as the **Caduceus of India**) and Jupiter’s thunderbolt was three-forked.

The number three is very important in Masonry and the occult. A Masonic author, John T. Lawrence, reminds us: “Thus we [the Masons] have **three** degrees, **three** great lights, **three** lesser lights, **three** principal officers, **three** assistant officers, **three** sets of **three** working tools, **three** steps, **three** pillars, **three** ornaments, **three** articles of furniture, **three** movable jewels and

three immovable jewels, **three** grand principles, **three** assassins, **three** searching lodges, **three** who rule a lodge, **three** Grand Masters, and **three** orders of architecture. In fact, the respect paid by Freemasons to this number goes far to suggest that our mysteries have affinities not only with the Egyptian rites and ceremonies, but with those of a good many other nations.

In the **mythologies** of Greece and Rome **the thunderbolt of Jupiter was three-forked; the sceptre of Neptune was a trident**. There were **three** Fates and **three** Furies. Both the sun and moon had **three** names—Apollo, Sol, and Liber, and Diana, Luna, and Hecate respectively. Cerberus was **three-headed**. In Hindu mythology **the worshipper of Vishnu has his forehead decorated with a trident.**”

A Dictionary of Symbols explains that the **trident** “is an attribute of the god of the unconscious and of sin—**Neptune**, whose realm is the haunt of monsters and base forms of life. The triple character of the **trident is an ‘INFERNAL replica of the Trinity....’**” Neptune, the god of the sea, is also known as Poseidon, Hades (hell), and Shiva.

Neptune

Mythologist Joseph Campbell reminds us that the “trefoil or trident, [is] the symbol of Shiva, Poseidon, Satan.” The Lord of the Abyss is pictured with a hammer which “is symbolic, also, of the **lightning bolt of illumination....**” The trident “is also a fire symbol....” Remember, that Lucifer (Satan) is called the

Light-bearer and the Bible tells us that Satan comes as “an angel of light” (II Corinthians 11:14).

The trident or lightning bolt is used in many ways. It's the symbol used for psychology and Neptune, the emblem on the flag for Barbados, as well as The United States Naval War College.

Another Satanic symbol is the **lazy eight** or the **infinity sign**. *The Seeker's Handbook* states that this sign is the "Western counterpart to the **YIN/YANG**." [Emphasis in the original]

Helena Petrovna Blavatsky comments that it "is symbolized in its turn by the **Caduceus**." One witchcraft book asserts that it is the symbol for immortality. To

occultists, it represents Lucifer's eternal victory. It also symbolizes reincarnation and karma.

This symbol can be seen on certain Tarot cards such as “The Magician” (for picture, see the chapter on “Hand Signals”) and “Strength.”

The infinity symbol sometimes encircles a globe in which case it means that Satan has put the earth under his control.

The rock group, Duran Duran, also incorporates the lazy 8 and the globe in their album cover.

There is yet another meaning according to Starhawk, a witch. She maintains: “In the Faery tradition of Witchcraft, the unconscious mind is called the Younger Self; the conscious mind is called Talking Self....

“In the Faery tradition, a third ‘self’ is recognized: the Deep Self or God Self....The **Deep Self is the Divine within....**and is conceived of as both male and female....It is often **symbolized as** two linked spirals, or as **the infinity sign**, the 8 on its side. In the Faery tradition, it is called Dian Y Glas, the Blue God. Blue symbolizes spirit; the Deep Self was said to appear blue when psychically ‘seen.’...‘Dian’ is related to both Diana and Tana, the Faery name of the Goddess; also to Janicot, the Basque name of the Horned God....

“In modern occultism, the Deep Self often appears as the ‘Spirit Guide....’”

As a Christian knows, a spirit guide is really a demon. The Bible warns “that in the latter times some shall depart from the faith, giving heed to seducing spirits, and doctrines of devils” (I Timothy 4:1). We can see that this is happening frequently today. Our society is quickly heading back to paganism.

The infinity sign also represents “the adept’s hourglass from which flows infinite time.” Once again we find that the hourglass is a Masonic symbol. It is also used in the Odd Fellows organization, which is known as “poor man’s Masonry.”

We’ve seen in the chapter on “Winged Symbols” that Cronus (or Saturn) is depicted as an old man with a scythe and an hourglass. The hourglass is also the symbol for Shiva’s drum (the Damaru).

As mentioned before, Shiva is another name for Satan. His drum is an hourglass which is the representation of the infinity sign. With this in mind, it was fascinating to learn that the sign for brimstone incorporates the infinity figure in its symbol. It was also interesting to see that the brimstone symbol appears at the top of the Church of Satan’s “Nine Satanic Statements.”

**THE
NINE
SATANIC
STATEMENTS**

1 Satan represents indulgence, instead of abstinence!

2 Satan represents vital existence, instead of spiritual pipe dreams!

3 Satan represents undebilitated wisdom, instead of hypocritical self-deceit!

4 Satan represents kindness to those who deserve it, instead of love wasted on ingrates!

5 Satan represents vengeance, instead of turning the other cheek!

6 Satan represents responsibility to the responsible, instead of concern for psychotic vampires!

7 Satan represents man as just another animal, sometimes better, more often worse than those that walk on all fours, who, because of his “divine spiritual and intellectual developments,” has become the most vicious animal of all!

8 Satan represents all of the so-called sins, as they all lead to physical, mental, or emotional gratification!

9 Satan has been the best friend the church has ever had, as he has kept it in business all these years!

Brimstone

Anton Sander LaVey

Satan (Baphomet, Lucifer) is proclaimed by the New Agers, occultists, and Satanists as the light-bearer. In the drawing of Baphomet (the Goat of Mendes) by Eliphas Levi, a Mason and occultist, we see that he has a **flaming torch** between his horns. The goat is used in Hermetic **MAGIC** where it represents **FIRE** and is also the symbol of generation.

The torch, therefore, is another symbol that needs to be examined but first we'll look at one of the witchcraft holidays called Imbolc (held on February 2nd). This festival: "marks the recovery of the Goddess after giving birth to the God. The lengthening periods of light awaken Her.

The God is a young, lusty boy, but His power is felt in the longer days. The warmth fertilizes the Earth (the Goddess), causes seed to germinate and sprout. And so the earliest beginnings of spring occur.

"This is a Sabbat of purification after the shut-in life of winter, through the renewing power of the Sun. **It is also a festival of light and of fertility**, once marked in Europe with **huge blazes, torches and fire in every form. Fire here represents our own illumination and inspiration** as much as light and warmth.

“Imbolc is also known as Feast of Torches, Oimele, Lupercalia, Feast of Pan, Snowdrop Festival, Feast of the Waxing Light, Brigid’s day (sic), and probably by many other names. Some female Wiccans follow the old Scandinavian custom of wearing crowns of lit candles, but many more carry tapers during their invocations.”

Notice that the Feast of Torches is also called the Feast of Pan.

“The god **Pan** is a symbol of nature, and **is usually represented with horns** (expressive of the sun’s rays and of the aggressive force of Aries) and with legs covered with hair (denoting the vitality of base forces, earth, shrubs and the instincts). In astrology, Pan is one aspect of Saturn, **and is also equated with Satan** and with life in its involutive, and, in particular, its base, aspects.”

“PAN WAS THE PATRON SAINT OF SEXUAL PASTIMES....He often tried to capture women, and because of his lustfulness, they lived in such fear of him that his name is still associated with fear, in the adjective ‘panicky’ and the noun ‘panic.’”

In *The Satanic Bible* Pan is called the “Greek god of lust” was “later relegated to devildom.” Since Pan is represented with horns it is no wonder that he is called the “Homed God” by witches.

Returning to the Feast of Pan or Brigid’s Day, did you notice that some witches

(wiccans) have the custom of wearing crowns of lit candles on **February 2nd**? Starhawk, a witch, reveals: “Brigid is the Irish Goddess of smithcraft, poetry, and healing—the **fire Goddess** who is also worshiped at holy wells. Her festival, on the eve of **February 2**, is a festival of the waxing light, celebrated when the sun begins to grow stronger and the days begin to grow longer. **Also called Candlemas**, it is a time of purification and strengthening, and seemed an appropriate time for our ritual.”

Candlemas is “[o]ne of the eight religious festivals of Witches.” What is interesting is that this **VERY SAME FESTIVAL (including the candles)** under the same name, **CANDLEMAS**, is celebrated in the Catholic Church. Stewart **Farrar**, a witch, comments about Candlemas: “This is the classical Lupercalia or **Feast of Pan**. More anciently still, it is the **celebration of the Goddess’s recovery from giving birth to the new year’s Sun God**, coming as it does six weeks after the winter solstice. The **same concept** has survived **undisguised** in the Christian festival of the **Purification of the Blessed Virgin Mary....**”

A Christian author notes: “Another day adopted from paganism, supposedly to honor Mary, is called ‘Candlemas’ or the ‘Purification of the Blessed Virgin’ and is celebrated on February 2....In pagan Rome, this festival was observed by

the carrying of torches and *candles* in honor of Februa, for whom our month February is named! The Greeks held the feast in honor of the goddess Ceres, the mother of Proserpina, who with *candle*-bearing celebrants searched for her in the underworld. Thus we can see how adopting February 2 to honor the purification of Mary was influenced by pagan customs involving candles, even to calling it ‘Candlemas’ day. On this day all of the candles to be used during the year in Catholic rituals are blessed....Says *The Catholic Encyclopedia*, ‘We need not shrink from admitting that candles, like incense and lustral water, were commonly employed in *pagan* worship and in rites paid to the dead.’” [Emphasis in the original]

Candlemas, the Festival of Torches, is just one of the pagan uses of the flame. Many of the gods and goddesses of mythology carried torches. Some of these are: Hecate (the “Queen of the Witches”), Comus, Eros, Hymenaeus (or Hymen), Apollo, Ilithyia, Eos (or Aurora), Iakchos, and Phosphorus (who is also called Lucifer).

Listen to what occultist Edouard Schure says about Lucifer and his flaming torch: “**Lucifer**, having regained his star and his diadem, will assemble his legions for new works of creation. Attracted by his **flaming torch**, celestial spirits will descend...and he will send these messengers from unknown spheres to earth. Then the **torch of Lucifer** will signal ‘From Heaven to Earth!’—and the...(New Age) Christ will answer ‘From Earth to Heaven!’”

Light (as signified by the torch) is a very important Masonic term. Masonic writer, Arthur H. Ward, in *Masonic Symbolism and the Mystic Way*, notes: “When later he [the Mason] is given **LIGHT**, it means really that he is taught the principles of **OCCULTISM....**” Occultist and Mason, Manly Palmer Hall, states that “the **torches represent the OCCULT** arts and sciences, the doctrines and dogmas by the light of which Truth is made visible.”

A magical tool--Notice the flames, hexagram, triangle, circle, and moon.

In fact, a book publisher that prints Masonic and Eastern Star books is called The Torch Press. The torch is also prevalent in the Olympics. We mentioned the Olympics briefly in the chapter “Humanist Symbols,” but let’s look at this topic a little more. In the *New Age Rainbow Bridge Newsletter*, we find some interesting information.

“The torch has been a symbol for ages of the light of God as it flames in the spirit of man. As it has been lighted at Olympics past and sent on its way to other nations, it has carried that symbology of the flame of spirit being extended from one nation to another. This time, it came to a land at whose doorstep stands a lady with another lighted lamp, significantly lighting the way for those seeking freedom.

Our national motto is ‘I light the way.’...

“So, the Olympic torch came to a land prepared for its arrival....The torch reached the ‘City of the Angels,’ the heart **chakra** of our country, and was held proudly aloft by *one* of us for *all* of us....

“John Sinclair, speaking earlier at Meditation Mount about the Games said, ‘**The Olympic Games are the heritage of the early forms of which the Yoga of Synthesis is the new yoga to come. It is the yoga of union, effort, enterprise, all of which is enshrined in the Games.**’ The ages of man are represented and the future of man is expressed in the effort and excellence which they represent. The Avatar of Synthesis is the inspirer of the Yoga of Synthesis which **man has now to evolve.**”

“The symbol of the **five-pointed star** was presented over and over. It is the symbol of the New Group of World Servers, the symbol of perfected man, the **star of initiation.** As an energy it is expansion, progress, freedom dominion over the material plane, and a purificatory energy on all planes.”
[Italics in the original; Boldface added]

Torch races have a pagan origin. The Hephestia was an “Athenian festival in honour of Hephaistos, the Greek Vulcan, in which races were run with lighted torches, handed from one to another.” Also the Prometheia was a “festival held at Athens in honour of Prometheus, in which a torch race was run, from the belief that Prometheus stole fire from heaven, and hence was called the torch-bearer.”

“Torch races date back to the ancient Greeks. A sanctuary in Olympia dedicated to the goddess Hestia, sister of Zeus, ‘housed the glowing embers which, every four years, would be fanned into flame by the winning athletes. To preserve the purity and power of the fire, it had to be moved with speed. Soon competitions developed to see which individual or group—a relay—could move the torch the fastest. The winner won the honor of lighting the fire in the name of the patron deity of the city.’”

As just mentioned, the Statue of Liberty also holds a torch in her hand. It’s no surprise to learn that the Masons gave us this “goddess.”

“Towering above the shimmering but polluted waters, she holds in her **outreached arm and hand a torch of fire and light. A gift of the Masonic Order**, the modern inheritors of the Illuminati heritage, the Statue of Liberty was sculptured by Frederic Bartholdi, a member of the Masonic Lodge of Alsace-Lorraine in Paris, France. The statue is significant to the secret societies plotting the New World Order.”

The Migration of Symbols reveals: “The **hand uplifted towards the sky** is...figured on native houses...to **ward off evil spirits** from the dwellers therein.”

Another popular symbol with the New Agers and occultists is the rainbow. God gave the rainbow as a promise to mankind that He would never send a worldwide flood again to destroy man (Genesis 9:13-16).

The New Agers have taken this symbol and made it into something that it was never meant to be. Masonic author, George Oliver, remarks: “It is remarkable that in all the ancient systems of **MYTHOLOGY**, the Great Father, or the **MALE GENERATIVE PRINCIPLE** was uniformly symbolized by a **POINT WITHIN A CIRCLE**. This emblem was placed by the Scandinavian priests and poets on the central summit of a **RAINBOW**, which was fabled to be a bridge leading from earth to heaven.”

Another author reveals: “In the practice of voodoo black magic in Haiti and

Africa today, the **RAINBOW IS DEPICTED AS AN EVENT CELEBRATING THE MARRIAGE OF A 'RAINBOW GOD' TO THE 'SERPENT GOD.'**

“In the ancient Jewish **KABBALA**—now being revived by New Age teachers of today—mystical rabbis taught that the **RAINBOW SYMBOLIZED A SEXUAL RITE**. The bow of the rainbow was supposedly the phallus of the male god which descended into the kingdom of the womb, the queen or goddess. The union was said to create immense divine powers.”

Notice the astrological symbols under the rainbow

In Scandinavian mythology, there was a rainbow bridge called Bifrost. This bridge was “also known as the ‘devil’s bridge’” and was equated with the river Styx of the Egyptians, which was the river that they believed flowed through hell.

“In Greek mythology, the rainbow is the embodiment of the messenger of the goddess, Iris...” The Chinese rainbow differs somewhat in that it only has five colors (instead of the typical seven), “their synthesis symbolizing the union of YIN AND YANG.” [Emphasis in the original]

In Babylonian literature the rainbow was “a sign of wrath, of terror, and of ill, and as an attribute of the goddess Tir-an-na, bringer of misfortune.”

In Masonic symbolism, we find that the Rainbow appears as the representation of Lucifer, the Light Bearer.

The rainbow bridge (also called the antahkarana) is referred to frequently by the New Age movement and is found repeatedly in occult literature. One Christian author explains: “In the occult, the rainbow is a hypnotic device supposedly forming a bridge between the individual and the over-soul or Great Universal Mind. This ‘Mind’ is not God.”

Lynn F. Perkins, a Mason and author of *Masonry in the New Age*, reveals the following about the **antahkarana**: “Masons, as ‘Builders of a Spiritual Fabric,’ should become familiar with this old **Hindu** term. It refers to the ‘Bridge’ or ‘Pathway’ that every human being is consciously or unconsciously building between his ‘lower self’ and his ‘High-Self,’ between his imperfect self and his perfect self.

The process of the ‘Builder’ never ceases **FROM LIFE TO LIFE EITHER IN OR OUT OF A PHYSICAL BODY**. The ‘rough stone’ ultimately becomes the ‘Perfect Ashlar.’”

In passing, notice that Perkins is also promoting **REINCARNATION** by his remark about “life to life”!

In the teachings of Tibetan Buddhism: “the **RAINBOW SYMBOLIZES**

MAN'S ultimate perfect state—**DIVINITY**, when he has achieved an inner unity of good and evil, shadow and light, and becomes one with the Great One.

“In other words, **THE NEW AGE TEACHES THAT MAN'S PATH TO GODHOOD IS SYMBOLIZED BY THE 'RAINBOW BRIDGE,'** which man crosses over by achieving higher consciousness. The reward at the other end of the rainbow: self-empowerment, immortality, divinity.”

With this in mind, it's no surprise to see the following notice in a witchcraft magazine. It states: “**CARRY A BEAUTIFUL SYMBOL OF THE NEW AGE SPREAD THE WORD—JOIN THE LEGIONS OF LIGHT....**”

“Ashtar and the ‘Space Brothers’ have repeatedly said that it is time we New Agers show our belief in the existence of more advanced life in space. As a special memento to coincide with the release of this important volume we are offering for a limited time only a beautiful medallion depicting the **symbol of the New World Order—a rainbow with a flying saucer** flying over it....”

A New Age book, *The Light Shall Set You Free*, states: “Since the seven major **chakras** comprise the seven colors of the RAINBOW...and since the **seven colors of the RAINBOW** form **WHITE LIGHT**, we must keep these chakras vibrating at their maximum strength within us at all times. This is done through the power of the mind and through **VISUALIZATION**. The process is also enhanced through **MEDITATION....**”

“When each chakra is fully activated, vibrating with its purest color, the seven colors combine within and create an auric field of **WHITE LIGHT**. This forms a protective shield of energy around us and gives off a glow of energy that is often called **ILLUMINATION.**”

The **white light** is an important symbol in the New Age. A former witch wrote: “In the upper three levels of witchcraft **LUCIFER IS REPRESENTED BY A WHITE LIGHT.**” The Tara Center, a well-known New Age organization who is promoting the “New Age Christ,” called Maitreya, explains: “Triangles work is easy. Mentally link up with the two other members; visualize a **TRIANGLE OF WHITE LIGHT** circulating above your heads; then say The Great Invocation aloud (whenever possible). See your **TRIANGLE** linked with all other triangles, transmission and meditation groups on the planet. See the **WHITE LIGHT** circulating among this network of focal points and pouring out to envelop the world, thus helping to form a channel for the downpouring of Light and Love into the body of humanity.

“When you say: ‘From the centre where the Will of God is known,’ which is Shamballa, visualise a great sphere of **WHITE LIGHT.**”

Shamballa, by the way, is the mythological place where the “Lord of the World,” Sanat Kumara or Shiva (who is actually Satan), is supposed to live!

Dennis Carpenter, a witch, advises: “Connect with the Divine as you know it. Imagine yourself surrounded with **WHITE LIGHT**, a protective sphere of light that will keep you safe throughout this meditation.” Lazaris, a spirit guide (actually a demon), “suggests that he be visualized, simply, as a sphere of

WHITE LIGHT.”

Kundalini is the name of the serpent that is supposed to lie coiled at the base of the spine but which is raised during yoga. New Ager, Elizabeth Clare Prophet, calls Kundalini the white light.

Prophet, as well as other occultists, refer to the Great White Brotherhood. New Agers, Shirley McCune and Norma Milanovich, explain: “The Great White Brotherhood (white meaning **WHITE LIGHT**) is composed of many of the beings in the Cosmic Hierarchy. This organization includes seventy Orders/Brotherhoods of the universe....

“**Beings of Light** can hold membership simultaneously in the Order of Melchizedek and in the Great White Brotherhood. In fact, most, if not all, do belong to both.”

Both Masonry and Mormonism refer to the Melchizedek Priesthood. In fact, for one to become a god, according to Mormon doctrine, one must belong to the Melchizedek Priesthood. In Scottish Rite Masonry, the 19th degree is called “Grand Pontiff.” It is during this ceremony that the “Candidate is anointed with oil, is made and proclaimed a priest for ever according to the Order of Melchizedek.” Hebrews 5:5, 9 tells us, however, that “Christ glorified not Himself to be made an high priest” but was “called **OF GOD** an high priest after the order of Melchizedek,” but occultists, Mormons, and Masons glorify **THEMSELVES** and take **ON THEMSELVES** the honor of priesthood that was given to **Christ ALONE**.

The Bible goes on to reveal that Christ “because He continueth ever, hath an unchangeable priesthood” (Hebrews 7:24). The word “unchangeable” is “aparabatos” in the Greek and means “**UNTRANSFERABLE**.” In other words, this priesthood cannot be passed on from one person to another. Christ is the one and only one who can hold this priesthood.

Example after example could be given of such quotations about the “**white light**.” It is also interesting to note that *The White Light* is the name of a publication of the **OCCULT** organization the Temple of Truth. It is billed as “The Magazine of Ceremonial Magick.” The name of their bookstore is The Magick Circle.

For much more information on the rainbow and the white light, see my book *Hidden Secrets of the Eastern Star*.

Another symbol that is frequently seen today is the lotus flower. Blavatsky says that the lotus: “is the flower sacred to nature and her Gods....With the Hindus, the lotus is the emblem of the productive power of nature, through the agency of fire and water (spirit and matter)....The lotus, in India, is the symbol of prolific earth....The lotus is the two-fold type of the Divine and human **hermaphrodite**, being of dual sex, so to say....

“The lotus flower, represented as growing out of Vishnu’s navel—that God resting on the waters of space and his Serpent of Infinity—is the most graphic allegory ever made: the Universe evolving from the central Sun, the POINT, the ever-concealed germ.” [Caps in the original; Boldface added]

Hall, writes:

“You will sometimes see strange little Chinese gods or Oriental Buddhas sitting on the blossom of a Lotus. In fact, if you look carefully you will find nearly all the Oriental gods are so depicted. This means that they have opened within themselves that Spiritual Consciousness which they call the **KUNDALINI**.”

One of the emblems of Isis is the lotus, which is a symbol of the resurrection. Of course, in Egyptian mythology, the idea of resurrection means rebirth or **REINCARNATION**. The lotus was also associated with sun gods.

“One Egyptian legend tells that before creation there was nothing but a stagnant ocean upon which floated a lotus. When the beautiful flower opened, all of creation, including the Gods, spilled forth from it. Another tale tells how a great lotus opened to reveal a scarab which became the sun, and each day as mighty Ra opens His eye (the lotus), the sun appears. The lotus flower opens and

closes each day as the sun rises and sets so the connection between the flower and the sun is very clear.”

Hall explains:

“In the Western World the **Lotus has been changed to the Rose**. *The Roses of the Rosicrucians, the Roses of the Masonic degrees, and also those of the Order of the Garter in England* **ALL stand for the SAME THING: the awakening of spiritual consciousness** and unfolding into full bloom the soul qualities of man. When man opens this bud within himself, he finds, like the golden pollen in the flower, this wonderful spiritual city, **SHAMBALLA**, in the heart of the thousand-petalled Lotus of the brain.”

Pike says that the “Rose was anciently sacred to Aurora and Sun.” In another book Hall declares: “Of all symbolic flowers the lotus blossom of India and Egypt and the rose of the Rosicrucians are the most important. In their symbolism these two flowers are considered identical. The esoteric doctrines for which the Eastern lotus stands have been perpetuated in modern Europe under the form of the rose. The rose and the lotus are **yonis** emblems, signifying primarily the maternal creative mystery...”

Hall just said that the lotus and the rose are symbols of the female generative parts. An expanded definition is given in *A Dictionary of Symbols*. Another author writes: “For example, the *lotus* symbolizes the female vulva of the Mother Goddess, the *diamond* the male organ of the ancient Father God of paganism. Thus, when a New Ager speaks mysteriously of the ‘diamond entering the lotus’ during religious initiation ceremonies, he literally is referring to sexual intercourse as a New Age holy ritual.” [Emphasis in the

original]

“There is a certain parallel between the symbolism of the lotus and that of the rose in Western culture. In Egypt, the lotus symbolizes nascent life, or first appearance. Saunier regards it as a natural **symbol for all forms of evolution**....As an artistic creation it is **related to the mandala**, its significance varying according to the number of its petals: the eight-petalled lotus is considered in India as the **Centre where Brahma dwells** and as the visible manifestation of his **occult** activity....The ‘thousand-petalled’ lotus symbolizes the final revelation....From the remotest days of antiquity, the lotus was unanimous choice of the Chinese, the Japanese, the Hindus, the Egyptians and the Aryans. The lotus flower growing out of the navel of Vishnu, symbolizes the universe growing out of the central sun—the central point or the ‘unmoved mover’. It is the attribute of many deities.”

The mandala, mentioned in the previous paragraph, is: “a Hindu term for a circle. It is a kind of *yantra* (instrument, means or emblem), in the form of a ritual geometric diagram, sometimes corresponding to a specific, divine attribute or to some **form of enchantment** (*mantra*) which is thus given visual expression....They are to be found all over the Orient, and always as a means towards contemplation and concentration—as an aid in inducing certain mental states and in encouraging the spirit to move forward along its path of evolution from the biological to the geometric, from the realm of corporeal forms to the spiritual.” [Italics in the original; Boldface added]

One item that is used in Buddhism is the prayer wheel. “In Buddhist countries the wheel or chakra is twirled for **divination** and as a means of gaining inspiration.” The Tibetans put a prayer inside the wheel and then spin it over and over again. They feel that every time they spin it, the prayer is being sent forth. This is a repetitious form of prayer. In *Numerology: The Magic of Numbers* find: “We are all aware today that with the new interest in Indian **occultism** the modern gurus or teachers are fond of giving a ‘word’ to their disciples which they use as a prayer form and which has vibrations which build up in the body of the person using them by repetition. The word, such as *ohm*, must always be a specific one given to the individual, and it is the work of the guru to find out which word will indeed vibrate harmoniously with the vibrations of the individual receiving it. The ‘**magic**’ appears to be in the constant use of the word rather like the Tibetan prayer wheel churning out its monotonous prayers.” [Italics in the original; Boldface added]

The Bible address this issue. In Matthew 6:5-8 we are told: “And when thou prayest, thou shalt not be as the hypocrites are: for they love to pray standing in the synagogues and in the comers of the streets, that they may be seen of men. Verily I say unto you, They have their reward. But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which

is in secret; and thy Father which seeth in secret shall reward thee openly. But **when ye pray, use not vain repetitions, as the heathen do:** for they think that they shall be heard for their much speaking. **Be not ye therefore like unto them:** for your Father knoweth what things ye have need of, before ye ask Him.”

16.

ZODIAC SIGNS

Astrology (a form of **divination**) is a practice in which a person consults the sun, moon, stars, and planets to **foretell future events**. One occult magazine relates: “Anxious to know the future, they believed that by watching the stars they could deduce ahead of time the actions of their gods and goddesses who controlled every facet of their lives. Astrology can be traced back to ancient Babylon where the Zodiac was established.”

The astrologers claim that the position of the heavenly bodies at the exact time of one's birth will influence this person's entire life including his personality, romance, and career. Given the exact time and location of one's birth, astrologers (those who study astrology) can then determine which days will be “lucky” and which days will be “bad”. These good and bad days differ from person to person. If August 18th has been determined as a good day for you, you

would then be encouraged to make a large business deal, apply for that special job opening that you always wanted, or take that long-awaited trip to Europe on **THAT** day. However, if August 18th is one of your bad days, you should not make any major decision until one of your “good” days, thus avoiding the possibility of having things turn sour.

The World Book Encyclopedia recounts: “During ancient times there was wide belief in **OCCULT** sciences. The best-known of the old **OCCULT subjects included ASTROLOGY**, alchemy, necromancy, and magic.” Under “ASTROLOGY” we find: “Judicial astrology is the astrology of today. It was and still is closely related to other **pseudo** sciences and superstitions such as palmistry, numerology, and the use of charms and magic.” Related articles under “**Magic**” include: **ASTROLOGY**, clairvoyance, divination, evil eye, exorcism, hypnotism, necromancy, shaman (witch doctor), telepathy, trance, voodoo and witchcraft!

Nat Freedland, in *The Occult Explosion*, writes that “**astrology is clearly the MOST IMPORTANT part of the OCCULT explosion.**” He also says: “The greatest common denominator of **OCCULTISM** in the United States is the **astrology** column.”

The *Treasury of Witchcraft* states: “Stemming from the **Black Arts**, and involving **goetic** premises, assuming the techniques and conditions of **occult practices** are alchemy, divination, **astrology**, and levitation.” **Goetic magic**, by the way, **is black magic or sorcery**. Mason Kenneth MacKenzie says that goetia is the “term for black magic, in contradistinction to Theurgia, or white magic. The powers of darkness were invoked in this system with horrible rites.”

One book explains the **Goetic Circle of Pacts** (see picture on page 277) like this: “*Symbols play a vital role in infernal conjuration. ...the Goetic Circle of Pacts, drawn by Eliphas Levi in the 19th century, is supposed to be used when the sorcerer is to make a pact with the Descending Hierarchy. The three circles in the center are the standing positions of the sorcerer and his apprentices. The skull must be from a parricide, the horns from a goat, the bat must have been drowned in blood, and the black cat, whose head is place opposite the skull, must have been fed on human flesh.*” [Emphasis in the original]

Once again we can find Masonry **PROMOTING** an **OCCULT** practice. One Masonic author, Mr. Castells, brags: “The Zodiac is still with us in the Royal Arch, although...like so many other symbols of Freemasonry, its real import and significance has been obscured.” He adds: “In 1775, when the Freemasons’ Hall was erected, the **ZODIAC WAS ACKNOWLEDGED TO BE A MASONIC SYMBOL** by placing it over the main entrance of that edifice.”

In *Masonry and Its Symbols in the Light of “Thinking and Destiny,”* we find: “The Zodiac is the best symbol of the circle with the twelve points on the circumference which give a value to geometrical symbols....**Masonry has its symbols from the Zodiac.**”

Notice the astrological symbolism on the Masonic globe

Another Mason claims: “According to **Occult** teaching, each **reincarnation** is under the adjoining sign of the zodiac, hence a sign, thirty degrees, is a **symbol of rebirth**, and the moving over (the advancement) of thirty degrees is emblematic of rebirth.”

The **zodiac** is based on astrology which is and **ALWAYS HAS BEEN associated with the OCCULT and WITCHCRAFT**. In spite of this, however, some “evangelical” people (such as D. James Kennedy of Coral Ridge Ministries) promote the zodiac and refer to “Biblical astrology.” An ad in *Charisma and Christian Life* announced: “Startling discoveries made by eminent theologian Dr. D. James Kennedy prove that God created the Zodiac! God intended the stars to foretell the future of the world. Discover what Dr. Kennedy calls **BIBLICAL ASTROLOGY** or the Gospel in the stars. Order, ‘The Real Meaning of the Zodiac’ book on cassette....”

Let's look at some of what Kennedy teaches. He claims: "Fourthly, in the signs of the zodiac, is Sagittarius, the Archer. Sagittarius is a CENTAUR WITH THE BODY OF A HORSE AND THE TORSO OF A MAN. He is a man with a drawn bow and arrow. The Bible speaks of one in Revelation 6:2, '**And I saw, and behold a white horse, and he that sat on him had a bow...and he went forth conquering, and to conquer.**' THIS IS A PICTURE OF ONE WHO HAS TWO NATURES: OF CHRIST WHO IS THE GOD-MAN (the *theanthropos*, both man and God) who is going forth conquering and to conquer." [Italics and boldface in the original; Caps added]

Personally, I feel that this is blasphemy. The centaur is a **MYTHOLOGICAL** animal, so does this make Christ a mythological being? In Revelation 6 we see **TWO DISTINCT** beings—a horse **AND** a man, not a horse-man. Supposedly this represents the two natures of Christ, but does the horse represent the man aspect of Christ or the divine aspect? Or, does the man represent the man aspect or the divine aspect? We cannot make either the horse or man **DIVINE**. Romans 1:22-23, 25 warns: “Professing themselves to be wise, they became fools, And ***changed the glory of the uncorruptible God into an image made like to corruptible man, and to birds, and fourfooted beasts, and creeping things....Who changed the truth of God into a lie,*** and worshipped and served the creature more than the Creator, who is blessed for ever. Amen.”

Kennedy admits: “Remarkably, the stars in the heaven which represent those twelve signs bear **absolutely no resemblance to the pictures or the signs themselves**. For example, what we call the Big Dipper has been called Ursa Major (Great Bear).

One thing it does not look like is a great bear! Neither do any of the other signs look like what they are supposed to represent.”

This is some admission! Kennedy claims that “God intended the stars to foretell the future of the world,” but if the signs do not “look like what they are supposed to represent,” then how can the Gospel be clearly proclaimed by the constellations? The Bible tells us: “Have **NO** fellowship with the unfruitful works of **DARKNESS**, but rather **REPROVE** them” (Ephesians 5:11). We are not to try to “Christianize” the occult.

There are many explicit warnings **AGAINST ASTROLOGY** in the Bible. We covered Deuteronomy 18:10, 12 before but it’s well worth repeating: “There shall not be found among you **ANY ONE** that maketh his son or his daughter to pass through the fire, or that useth **DIVINATION [ASTROLOGY!]**, or an **OBSERVER OF TIMES [ASTROLOGER]**, or an enchanter, or a witch....For **ALL** that do these things are an **ABOMINATION** unto the Lord.”

Jeremiah 10:2 warns: “Learn not the way of the heathen, and be not dismayed at the **SIGNS OF HEAVEN**; for the heathen are dismayed at them. For the **CUSTOMS** of the people are **VAIN....**” Speaking about the doom of Babylon,

Isaiah prophesied:

“For thou hast trusted in thy WICKEDNESS....Therefore shall evil come upon thee....Stand now with thy enchantments, and with the multitude of thy sorceries....Let now the ASTROLOGERS, the STAR-GAZERS, the MONTHLY PROGNOSTICATORS, stand up and save thee from these things that shall come upon thee....**NONE** shall save thee” (Isaiah 47:10-15, in part).

A former witch cautions us that astrology, occult jewelry, face painting, tarot cards, playing cards, incense, drugs, nakedness, and occult games are definitely part of **witchcraft**. Let’s do what I Thessalonians 5:22 tells us to do: “Abstain from **ALL** appearance of evil.”

Connected to astrology is another symbol that is quite popular nowadays. It is called the enneagram. One Christian researcher explains: “A currently popular variation of the triangle is the *enneagram*, a symbol that has several triangles arranged so that nine points touch an outer circle. Sir John Sinclair, in his commentary on the legacy of Alice Bailey, founder of Lucis Trust, remarks that the **enneagram originated in ancient Egypt**. He suggests that the nine points on the enneagram represent nine different groups of **New Age** workers: financiers and economists, psychologists, telepathic communicators, workers in the field of religion, educators of the New Age, trained observers, scientific servers, political organizers, and magnetic healers.

“Djwhal Khul, the spirit guide who revealed this diagram and its meaning to Alice Bailey, confided to her that once these nine groups come together, a ‘tenth group’—which he failed to identify—will come forth to bring in a One World Order.

“The enneagram also is a Hindu symbol. Sri Aurobindo, an Indian Hindu guru whose writings and teachings hold a strange fascination for American and European New Agers, **connect the enneagram not only to the Mother Goddess of the Hindus but also to the goddess myths of Greece and Rome.**” [Italics in the original; Boldface added]

“Also tying the Enneagram in with occult astrology, Aurobindo maintained that the secrets of the Enneagram are so important that he who unravels its secrets ‘will enjoy riches and wealth and be sexually fertile.’

“Regrettably, the Enneagram is also in vogue and gaining popularity amongst a number of Christian groups, with both Protestant and Catholic, whose leaders evidently are ever on the lookout for something new to give their audiences. It is especially popular in Catholic circles, with both priests and nuns promoting the use of the Enneagram to determine basic personality types, compulsions, and obsessions. One Catholic priest has even attempted to relate each of the nine points of the Enneagram with nine personality traits of Jesus! But it is not only used in the Catholic Church. Though its ancient occultic origins are undebatable, I have also received reports that the teaching of the Enneagram is being popularized at Southern Baptist retreats and in Methodist, Episcopal, and Charismatic circles.”

An ad in *Yoga International* stated the following: **“CREDENCE CASSETTES** features audio and video cassettes by authors who are free-spirited Catholics, many of whom are at home with and drink from the wells of Jung, Native American Spirituality, New Age music, guided imagery, and the Enneagram. Not your mother’s church, but probably your children’s!” [Emphasis in the original]

Some Native American symbols—Note the swastikas

It was an occultist, George Gurdjieff, who introduced the enneagram to Europe.

“[He] claims it originated about 2500 years ago in a Babylonian wisdom school....This may implicate the enneagram with Babylonian astrology, since those characteristics would be signified by a point on the enneagram. Gurdjieff’s use of the enneagram also parallels the esoteric cabala’s ‘Tree of Life’ of Jewish mysticism.”

It doesn’t matter what type of personality a person has, God can use him or her **IF** he or she is wholly committed to the Lord. God can take a hardened, drunken, wicked sinner and change that person into a kind, considerate, caring person. The Lord can take a shy person and make him or her into a bold individual who is willing to die, if need be, for the sake of the Gospel. Peter, as well as the other disciples, forsook Christ when it came time for Him to be crucified, yet just fifty-some days later these same disciples were bold enough to testify of Christ’s resurrection (Acts 2:1 -47). When they were imprisoned and admonished not to speak about Christ, they boldly replied: “We ought to obey God rather than men” (Acts 5:29).

Let’s forget all the man-made (and demonic) devices and personality testing, and let us also “obey God rather than men.” “[Y]our faith should not stand in the wisdom of men, but in the power of God” (I Corinthians 2:5).

17.

TALISMANS

Webster tells us a talisman is “an object bearing a sign or character engraved under **astrological** influences and thought to act as a **charm** to avert evil and bring good fortune.”

In *Amulets and Superstitions* we are told:

“The object of the talisman is quite different from that of the amulet. The amulet is supposed to exercise its protective powers on behalf of the individual or thing continually, whereas the talisman is only intended to perform one specific task. Thus a talisman may be placed in the ground with money or treasure, which it is expected to protect and to do nothing else. But the line which divides the amulet from the talisman has rarely been observed by any people who regard such things as parts of the machinery of magic, and in modern times the use and meanings of the two objects are generally confounded, even by educated folk who are superstitious. And the experts are not agreed on the subject.”

One occult catalog that sells talismans and amulets states:

“The word **TALISMAN** is believed to come from Arabic as there are great similarities in that language. One of the root words means ‘to make marks as would a magician. The word **AMULET** is derived from the Latin *Amuletum*, and is a **magical** object.

“At one time there was a difference between an amulet and a talisman in that a talisman was made for a specific task, and an amulet had broader uses. With time, down through the centuries, this difference disappeared, and today, an amulet or talisman is considered one and the same as far as having magical powers is concerned.

“There are uncounted forms of amulets and talismans. They can be in the form of a seal, pentacle, charm, circle, Voodoo veve, table (name given certain engraved tablets), signets, gemstones, roots, bones, miniature statues of gods and goddesses, and any other item that represents a magical force that benefits its owner....

“There are also amulets and talismans that are connected with ceremonial **magic** rituals. These are seals, signets, tablets, and other forms that are used in

summoning supernatural powers, and causing them to give help and aid in any endeavor. Such supernatural beings have varying powers, and the proper ritual and required items must be used in accordance with whom is being invoked.”

Magical seal of Sirius

Arthur Edward Waite, a Mason and occultist, reveals:

“Talismans may be made either of the seven kabbalistic metals—gold, silver, iron, copper, fixed mercury, brass, and lead—or of precious stones, such as carbuncles, crystals, diamonds, emeralds, agates, sapphires, and onyxes.”

One talisman is called “Satan’s Seal.” It shows “Lucifer depicted as king, wielding a prong with which he catches sinners, and with hands of claws like those of a beast of prey. Inscription around edges reads, ‘Master of the abyss of Hell.’”

An amulet in one catalog is described like this: “Let this strange little Japanese SPIRIT DEMON insure your safety and security. Many people claim that wearing this amulet brings serenity and peace of mind.”

One talisman sold by The Pyramid Collection is a Japanese Water Charm. It is described like this:

“In Japan, the ideographic symbol for ‘water’ can also represent that element’s properties of life, cleansing, and the emotions. Pendants similar to that shown...

(its design is taken from an ancient crest) were commonly worn as **charms** against fire. A strong, graphic **talisman** for men and women.”

Water charm—This is the same symbol that is used for “Tao.”

Other talismans they sell are Rune Jewelry. The catalog explains:

“The **Runes are secret, occult symbols** used by Norse runemasters until the 17th century. modern runemasters consult the runes to communicate with the subconscious self. The six brass Runes, with raised sterling-silver symbols, are **talismans** that promote inner growth.”

Notice that runes are **OCCULT symbols**. What then, is so-called “Christian” Michael Smith doing with runic characters on his record? Several of the letters (M, E, and T) in his name are exact representations of the runes. When I wrote to Smith about this, his manager responded. He denied that the record

contained runic characters, but he did tell me that if I wanted to know more about runes that I should check out my library for more information! He may not be fully endorsing the runes, but he certainly didn't try to warn me that runes were occultic symbols. Incidentally, the flip side of this album has Smith's name written backwards.

Figure 22. "The Big Picture" (1986)

"Writing reversal is a SATANIC principle. Master satanist Aleister Crowley taught his disciples to walk backwards, talk backwards, think backwards, speak backwards, write backwards and even listen to phonograph records backwards to gain insight into the future." [Emphasis in the original]

It is also interesting to note that in this “Christian” album the name of Jesus is only mentioned **ONE** time!

Returning to the runes, we find the word rune means “secret.” “The runes were associated with secrecy or mystery because only a few persons knew them. Heathen priests probably first used the characters in their **charms and magic spells.**” The runes are considered to be comparable to the I Ching and the Tarot and are a form of **DIVINATION**.

Magical Arts states:

“More than 2,000 years ago in the cold, rugged lands of Scandinavia, **shamans** seized evanescent, **magical** ideas and gave them form in symbols they called runes. These stick-like character, scratched onto pebbles and bits of wood, functioned as **talismans** and implements for **divination**, protection and guiding those who sought their wisdom....

“The original runic symbols developed into the letters of the earliest Germanic alphabet, known as the Elder Futhark. Even when put to this practical use, **the markings retained their old occult meanings....**and runes were ubiquitous during the Viking era as tokens of **magical** power. People covered their home with the symbols to ward off evil; warriors engraved them on the hilts of their swords, hoping for strength in battle; midwives scratched them on the palms of women in childbirth to ensure safe delivery; and **shamans used them to commune with the dead, to cast spells**, and even, reportedly, to fly.”

The runes “were so connected with **witchcraft**, the early Christian missionaries in Europe refused to use them. They replaced this **satanic sign language** with the Latin alphabet instead.”

Let’s look at a talisman sold by Papa Jim. It is a 666 variation which is supposed to defeat witchcraft or voodoo!

Notice the three sixes

Isn't it strange how Satan has blinded people's eyes to think that by wearing an occult piece of jewelry, the occultic forces can be restrained? This would be like Satan casting out Satan. Jesus said:

"How can Satan cast out Satan? And if a kingdom be divided against itself, that kingdom cannot stand. And if a house be divided against itself, that house cannot stand. And if Satan rise up against himself, and be divided, he cannot stand, but hath an end" (Mark 3:23-26).

The Satanic Cross, adopted by Satanists and devil worshippers, is another talisman. It is the Christian Cross which is inverted or turned upside down. Satanists reverse many things such as "praying" the Lord's prayer backwards.

Satanists also turn a question mark upside down. We're told: "The upside down question mark asks mockingly, 'Did Jesus really die for our sins?'"

Below are some talismans for different purposes. One is called the "Clairvoyance Talisman" which is supposed to allow one to read another person's thought. One talisman is alleged to destroy the evil of Black Magic. Another one is to "discover the most hidden secrets, enabling its possessor to penetrate everywhere unseen." One talisman is for exorcism. Yet another one claims: "Will make the most taciturn man unbosom himself to its possessor, to confess his machinations." As can be seen, these talismans certainly have nothing to do with godliness and Christianity!

We do not need to have talismans to protect us or to “destroy the evil of Black Magic.” Our hope and confidence is in the Lord and He will keep us safe from harm if we trust in Him. “I will both lay me down in peace, and sleep for Thou, Lord, only makest me dwell in safety” (Psalm 4:8). “For the Lord shall be thy confidence, and shall keep thy foot from being taken” (Proverbs 3:26).

"The angel of the Lord encampeth round about them that fear Him, and delivereth them" (Psalm 34:7). "It is better to trust in the Lord than to put confidence in man" (Psalm 118:8) or in occultic talismans and amulets.

18.

JEWELRY

Many Christians, I believe, are aware of some occultic jewelry such as a ring with a pentagram on it. However, there is far more to jewelry than just some occultic symbol engraved on it. A witch, Scott Cunningham, explains:

“Jewelry’s origins lie in magic. That should come as no surprise to us, for as I’ve said, nearly all human customs and the technologies which result from those customs stem from ancient magical practices and beliefs.

“In earliest times, jewelry was probably worn to avert negativity, then envisioned as ‘evil spirits.’ Jewelry was also often placed in tombs with other grave goods to guard the dead.

“As perception of the energies within objects sharpened, certain stones and metals were associated with various organs and regions of the body and were worn to guard the health. Later, stones, metals, horn, feathers, bone and many other materials were donned for their power to attract love, health, money and other necessities of life....

“When materialism has ruled over naturalism, jewelry has survived purely as ornamentation or, at times, as a statement of class definition. Yes, jewelry still has a few ceremonial roles, such as engagement and wedding bands, but even these have lost their **original magical** messages....

“Until the nineteenth century in much of the Western world, **the history of jewelry was a history of magic....**”

Laurie Cabot, another witch, comments:

“Many Witches wear crystals as jewelry, along with other gemstones that have magical powers. **Jewelry is a way to have magic on your body** without anyone knowing it but you and others who are wise in the ways of the Craft. In general, Witch jewelry is worn because it directs energies to various parts of the body.”

In the *Freemasons' Book of the Royal Arch*, we find that “the finger-ring, the bracelet, the anklet, and the necklace, all of which came to be worn as ornaments, were originally regarded as means of protection from evil.”

Another well known witch, Sybil Leek, also brags about the protective properties of jewelry. She states:

“Jewelry and metals have their own vibrations and corresponding numbers, and again there is a link with the vibrations and colors of the planets. A favorite piece of jewelry will take on the vibrations of the person wearing it, especially over a long period, which gives the vibrations time to build up and become forceful. **Charms, amulets and talismans have been worn** throughout the ages not as a form of decoration but **as a focal point that can be charged with the appropriate vibrations**. We are not free from the use of such things even today, for there is an increasing business in the sale of charms, even though now they be only part of a dangling bracelet. It seems that the **amulet and talisman are gaining a new lease on life WHETHER OR NOT THE BUYERS AND WEARERS ARE AWARE OF THEIR SIGNIFICANCE.**”

“In the early days, mystical, magical properties were assigned to the star polygons, but their influence is still felt today even if the forms are used only in cheap charm-type jewelry. Pythagoreans regarded the star polygon, derived from the pentagon, as the symbol of health.”

Many people find particular designs appealing but they have no idea what is being represented. For instance, in the 1993 issue of *Light Speed* we discover: “For several years the Cosmo Tech clothing and jewelry have had an amazing effect in their support of **beings accessing their Divinity** and living their True reality. All of the exquisite clothing and jewelry are **channeled** through Rahztar and Astara.” New Ager, Dick Sutphen, sells jewelry that is called a “Circle of Unity Symbol.” This is a:

“symbol of the unity of mankind. In **regressive hypnosis**, Dick Sutphen **channeled** this symbol from a highly advanced period in Atlantis. This was a time when all people were connected psychically—enabling everyone to **communicate telepathically**. The symbol is made up of three people with their arms raised and connected by the circle of oneness. The three also represent God, man and spirit.”

When you pick up some jewelry, you may well be choosing an item that has been channeled through demons! Prisma catalog reveals: “The **amulets** of ancient times **have become the popular jewelry of today**. There is a resurgence of interest in the metaphysical attributes of gems and symbols.” As explained earlier, an amulet is “a charm...often inscribed with a magic incantation or symbol to protect the wearer against evil or to aid him.” *The Occult Sciences* explains that “the word amulet came to mean a small bag hung round the neck and containing roots, seeds and other articles which had an efficacious **OCCULT** power, or a metal disc engraved with Kabbalistic signs.”

We’ve all heard of a “**charm** bracelet.” People wear it without giving a thought as to what the word “charm” means.

Many people carry a rabbit’s foot or a four leaf clover for luck or put a horseshoe on their home to bring luck. All of these items are charms. You will even hear the phrase “it works like a charm,” in reference to some product that produced good results.

Just a few days ago I was looking through a “Christian” book catalog from Christian Book Distributors. I was surprised and disappointed to see a “Nativity **Charm** Bracelet” advertised. The descriptions reads: “Fashioned of gold-plated metal, these seven **CHARMS** include two wise men, two angels, a shepherd, a nativity scene, and Jesus carrying the cross.” We cannot “Christianize” pagan practices—even if we include a “Jesus” **CHARM**. Remember, **a charmer is also called an enchanter or a magician!**

Deuteronomy 18:10-12 warns:

“There shall not be found among you any one that maketh his son or his daughter to pass through the fire, or that useth divination, or an observer of times, or an **enchanter**, or a witch, Or a **charmer**, or a consulter with familiar spirits, or a wizard, or a necromancer. For **all that do these things are an abomination unto the Lord.**”

In *Wicca: A Guide for the Solitary Practitioner* a witch remarks:

“Selecting and donning ritual jewelry naturally follows dressing. Many Wiccans have collections of exotic pieces with religious or magical designs. Then too amulets and talismans (devices made to ward off or to attract forces)

often double as ritual jewelry. Such wonders as necklaces of amber and jet, silver or gold bands worn on the wrists, crowns of silver set with crescent

moons, rings of emeralds and pearls, even ritual garters set with tiny silver buckles are often part of Wiccan regalia.”

A Christian author comments:

“Personal jewelry is also very important to those in witchcraft, since they receive it during ritual ceremonies, having had it ‘blessed’ (cursed) with clinging demons. Since such things are worn close to the body, the witch or warlock always has his or her familiar spirits ‘on call.’ The symbols on the jewelry are very important; they are never accidental or harmless. The crescent or crescent and star are two of the most common symbols representing the Queen of Heaven and the ‘bright morning star’—Lucifer.”

As should be evident by now, it’s not just the design or symbol on the jewelry, but the jewelry itself that has a magical meaning. Many people wear a ring or a necklace with their birthstone. However, these different gemstones are used for magical purposes and are based on **ASTROLOGY**.

Tanya Turner, a Christian, informs us:

“Birthstones were created during the Classical Period by the Romans, with each holding an **astrological** significance. In astrology, there are 12 signs of the zodiac each showing specific signs of weaknesses and/or strengths. A specific gem, possessing the necessary properties was assigned to each zodiac time frame in order to strengthen weaknesses and build on strengths supposedly possessed by persons born in that month or period of the zodiac. An article in *The Gatson Gazette*, March 22, 1990, made the following analysis: ‘The concept of birthstones assigns a specific crystal thought especially beneficial to each astrological sign chosen specifically to counteract or protect from weaknesses and to enhance strengths inherent in each house of zodiac.’”

“In earlier cultures, shamans, witch doctors and medicine men utilized gems, believing them to have mystical healing powers. Certain stones were also used for protection against supposed mental and physical evils. They have been used to adorn Egyptian pharaohs’ death masks and sarcophagi, European crowns, and the fingers, wrists, and necks of innumerable women in love. With the coming of the New Age we are seeing a revival of the use of stones and gems for these same purposes.”

Prisma catalog advertises jewelry. It says that ruby “increases vigor and renews vital life forces.” “This beautiful stone,” claims Scott Cunningham, “was considered the most perfect offering to Buddha in China and Krishna in India....In 13th-century magic, rubies were well established as wealth-increasing stones. They were especially effective if engraved with the image of a dragon or snake before using.”

Opal is supposed to heighten “the emotions and restores dim vision. Known as ‘The Gem of the Gods,’ it is believed to open the Third Eye.” Another book proclaims: “Opals are worn during astral projection for protection as well as to facilitate the process.” Opals are also used to help recall one’s past lives, which is the false teaching of reincarnation. Witch Cunningham continues:

“The stone is favored by many to develop psychic powers and is often worn in jewelry for this purpose. Earrings are ideal....

“Black opals are prized by magicians and Wiccans as power stones. They are often worn in ritual jewelry designed to increase the amount of power aroused and released from the body during magic.”

Moonstone “symbolizes the Third Eye, sharpens spiritual awareness, and assists in the astral realms.” Psychic ability is improved by wearing azurite, this catalog claims. So, the gemstones have an occult meaning behind them.

“In some contemporary Wiccan coven women— usually High Priestesses—wear necklaces consisting of alternative amber and jet beads. Though reasons for the use of these materials vary, it is said that **these two stones represent the Goddess and God, the feminine and masculine principles**, the projective and receptive forces of nature. They **also heighten magical effects....**

“Witches, Wise Women, and shamans wear amber beads to strengthen their spells, whether cast in caves, deserted valleys or at lonely seashores, or within magically created spheres of power in urban bedrooms. A large piece of amber placed on that altar increases the effectiveness of your magic.”

“BANGLE BRACELETS were worn in India to ward off negative astral forces. Hand-made bangles of copper, silver, and gold are said to exert an electromagnetic influence on the cells of the body.” [Emphasis in the original]

Let's look at the ring for a few minutes.

“The **ring** is a circle, **symbolic of eternity, unity, reincarnation** and the universe. In earlier times the **ring was associated with the Sun and Moon**. It **was** an object of protection, **a magical guard** that warded off negativity through its continuity....

“All rings were once magical or sacred. Even goddesses and gods wore rings; Babylonian mythology is replete with stories of the rings of Shamash and Marduk. **Rings have also been linked to the zodiac, the yin/yang and the ‘magic circle’ of magicians and Wiccans.** Their magical history is complex and fascinating.

“In a magical sense, **wearing a ring ‘binds’ you with power, with energy.** The materials of which the ring is constructed, plus your **visualization**, determine the nature of this energy....

“The appearance or attractiveness of a ring, and certainly its material value, are of little importance in magic. The ring’s design, the metals and stones used are the only factors involved in selecting rings for magic....

“The finger on which a ring is worn has magical significance. The index or ‘ring’ finger was once thought to be especially powerful. Herbal medicines were applied to the body with the ring finger to strengthen the effectiveness of the cure. Thus, rings containing stones which speed the body’s healing are best worn on this finger....

“Once, rings were usually worn on the third finger, because it was thought to contain a nerve that went directly to the heart. Betrothal rings are still traditionally worn on this finger.”

Another book reiterates:

“In **astrology**, the THUMB is correlated with Venus, the index finger with Jupiter, the middle finger with Saturn, the ring finger with the sun, and the small finger with Mercury.—In popular parlance, the ring finger used to be called the ‘heart finger’ because people believed that it was directly connected to the heart by a special vein or nerve; the symbolism of love and fidelity of the ring finger, particularly of the left hand (the side of the heart), also has to do with this.” [Caps in the original; Boldface added]

Our Phallic Heritage says this about the ring:

“The **Wedding Ring**, customarily put on during the marriage ceremony and worn continuously thereafter, **had a phallic origin**. In the **Buddhistic hand sign** of blessing, the thumb and index fingers are joined at the tips, forming a circle, symbolizing the **yoni**, while the other three fingers (the middle, ring, and little fingers) are extended, symbolizing...the male [genital] triad. When the ring is placed on the ring finger (the penis symbolized), it symbolizes the union of the male and female; hence, through this symbolism, the wedding ring means marriage or union.”

Occultist and Mason, Manly Palmer Hall, asserts:

"The wedding ring originally was intended to imply that in the nature of the one who wore it the state of equilibrium and completion had been attained.

This plain band of gold therefore bore witness of the union of the Higher Self (God) with the lower self (Nature) and the ceremony consummating this indissoluble **blending of Divinity and humanity in the one nature** of the initiated **mystic** constituted the *hermetic marriage* of the Mysteries.” [Italics in the original; Boldface added]

More about the wedding ring can be found in *The Occult Sciences*. There we

find:

“It may be pointed out that **wedding rings are a remnant of the magic rings**. They are worn on the ring finger, because in **chiromancy** that finger corresponds to the heart. The husband will be master in the home, if, on placing it on his wife’s finger, he is careful to push it right down.”

According to *A Pictorial History of Magic and the Supernatural*, “**Chiromancy** is based on the cabbala....”

Also, chiromancy is another name for **PALMISTRY**! This is a form of **DIVINATION**. For instance, *Dictionary of Mysticism* states: “**Chiromancy**: The art of **DIVINATION** from the shape of the hand and fingers and the lines and other markings which appear on them.” *The World Book Encyclopedia* indicates under “palmistry”: “It is sometimes called *chiromancy*. It is a

combination of **astrology** and handreading....See also **FORTUNETELLING.**”

Of course, divination and astrology are strictly forbidden by the Scriptures in Deuteronomy 18:10-12. See also II Kings 17:17 and Acts 16:16.

Now, let's turn our attention to the necklace. Cunningham discloses:

“The necklace is simply a large ring worn around the neck. Its powers and uses are much the same as those of rings. Because necklaces are often worn near the heart, they can be used to work on the emotions, or to attract or strengthen love.

“In contemporary Wicca, **women often wear necklaces of stones to represent reincarnation and the Goddess.**

“Wearing a necklace of stones increases their energies because you are surrounding yourself (**binding** yourself) with their powers. Thus, **the necklace is much more powerful than any one stone used separately.**”

Another book relates:

“Broadly speaking, the threaded bead-necklace stands for the **unifying of diversity**....Regarded as a string, the necklace becomes a cosmic and social symbol of ties and bonds. Because it is usually worn on the neck or breast, it acquires a symbolic relation with those parts of the body and with the **signs of the Zodiac** pertaining to them. Since **the neck has an astrological association with sex**, **the necklace also betokens an erotic link.**”

One item that is often found on the end of a necklace is the **Italian Horn** or the

leprechaun staff. This was “introduced by the lord druids of Scotland and Ireland” and was “used as the instrument of the druids for castrating animals and humans. It has been hexed and is used for luck and fortune. **Satanist priests wear this emblem for prosperity, as a charm** around their neck.”

“The **Italian horn**, also known as the Unicom Horn, **is an occult symbol for the devil to bless one’s finances.** It is believed that this **charm** is an offshoot from the word ‘malucka’ where the word Tuck’ is derived.” A former witch says that “the word Tuck’ is derived from the word ‘Lucifer.’” He adds that the cornucopia (which is covered in the chapter entitled “Masonic and Eastern Star Symbols”) “is derived from the word ‘uni-corn.’”

Another item worn as a necklace is the squash blossom. The “pendant is shaped to look like the moon in its first or last quarter; it is a fertility symbol.” A former witch writes the following about the squash blossom:

“**This symbol represents the Crescent star.** The person making it is offering it for a sacrifice to the goddess of fertility. The forming (budding) of the blossom on the squash represents youth. The wearer is usually unaware of the evil intent behind the making. The curse is being worked out and the wearer is acting as a catalyst because demons need bodies to carry their messages. **The wearer becomes a messenger of Satan.**”

According to *Magical Arts* evil spirits were thought to be able to enter the body through any of its openings and take control. “The first earrings were probably worn to bar the way to these spirits and so was the first lipstick.”

“Earrings are rings that are worn in the ears. Piercing the lobes to allow the wearing of earrings is an ancient practice.

“Most parts of the body have been pierced for various magical and religious reasons throughout the ages. Ears may have been among the first, along with the nose which is still pierced in India for protective, as well as cosmetic reasons.

“Folklore still surrounds this practice. Pierced earrings in general are often recommended to strengthen weak eyes— if set with emeralds, they are particularly effective. Gold earrings are often worn by those wishing to cure headaches, though some say to wear one gold earring and one silver for this purpose.”

In Genesis, when God told Jacob to go to Bethel, Jacob:

“said unto his household, and to all that were with him, Put away the strange gods that are among you, and be clean, and change your garments: And let us arise, and go up to Bethel; and I will make there an altar unto God, who answered me in the day of my distress, and was with me in the way which I went. And they **gave unto Jacob all the strange gods which were in their hand, and all their earrings** which were in their ears; and **Jacob hid them under the oak** which was by Shechem” (Genesis 35:2-4).

When Jacob’s household was ready to seek God, they got rid of all their earrings and idols. What some people don’t realize is that Satan is a liar and a deceiver. Instead of these items protecting an individual **FROM** the evil spirits, they are actually **ATTRACTING** evil spirits.

Hosea 2:13 says that Israel “decked herself with her earrings and her jewels, and she went after her lovers, and forgot Me, saith the Lord.”

I Timothy 2:9-10 advises: “In like manner also, that women adorn themselves in modest apparel, with shamefacedness and sobriety; not with broided hair, or gold, or pearls, or costly array; But (which becometh women professing godliness) with good works.”

Concerning pierced ears, a former witch, David Meyer, reports:

“I think it is interesting to note at this point that Hillary Clinton said that she did not allow Chelsea to have her ears pierced until she was 13. There is, of course, a very good reason for that. It is a known fact **among occultists** that when a girl is 13, she is taken into what is called the ‘outer court’ of a coven, and the **token of this child becoming a neophyte witch is the piercing of the ears.**”

Earrings were also a symbol of slavery.

With our culture returning to many pagan practices, it isn’t surprising to see an increase in body piercing. Some are doing this “just for the fun of it,” or because it is a fad, or because their favorite rock star had it done. Whether innocently or not, our children are nonetheless opening themselves to demonic influences and doctrines of devils by taking part in such activity. Tattooing parts of the

body is also quite prevalent at the present time. The Bible warns: “**Ye shall not** make any cuttings in your flesh for the dead, nor **print any marks upon you: I** am the Lord” (Leviticus 19:28). Laurie Cabot, a witch, comments:

“The origins of **tattooing come from ancient magical practices** of painting designs and **talismans** on the skin either for temporary ceremonial purposes or permanently....

“Pay particular attention to how you adorn your forehead where the **Third Eye** is located. East Indians wear a red dot over this chakra point, ancient **Druids** wore crowns with a band of jewels in the center of the forehead; the African Berbers use black **makeup to tattoo** their faces with stars, moons, and other **magical** symbols. A quartz crystal worn across the **Third Eye** can be particularly powerful.”

Could the piercing of the body, along with the acceptance of tattoos, be preparing the way for the mark of the beast where a chip may be placed in the right hand or forehead?

Body painting is also a magical practice.

“Both men and women use some type of **makeup as a form of magic in Witchcraft....Native** Americans, Polynesians, the ancient Egyptians, the Chinese and Japanese, and African tribal peoples have also **used makeup and body paint for magical purposes**. The use of color affects our behavior and emotional dispositions.”

Cabot elaborates:

“Outlining the eye emulates the Goddess, who is often portrayed with large, distinctive eyes, capable of seeing through space and time as well as into our innermost hearts. Ishtarte, the Goddess of Light, was known in the ancient Middle East as the Eye Goddess because the light she brings from heaven to earth illuminates the world. The Egyptian Goddess Maat originally possessed the All-Seeing Eye, which later was transferred to Horus. In Syria the Goddess Mari had large, strong eyes that could see deep into the human soul. The Goddess’s ability to see and know all things became a terrifying concept in patriarchal times, and her **mystical eye** was turned into the **‘evil eye,’** associated during the time of the Inquisition with Witches....

“But the tradition of **outlining the eye to honor the Goddess of Love** and to make one’s own eyes more radiant and mysterious is a time-honored custom. Green, rose, or copper eyeshadow or eyeliner draw in energy from Venus, the planet of love and romance. Pink eyeshadow, blush, or lipstick will strengthen self-esteem. Glitter refracts and reflects light and will send out light to others. **Affixing jewelry to your body or face is also powerful.** Remember to charge your makeup and jewelry and body paint before you use them, catalyzing them with the specific intention of your spell.”

Another magazine states:

“**The use of makeup is also said to stem from witchcraft** where the painting of one’s face was believed to ward off evil. **Makeup was used extensively by American Indian witch doctors and European witches. Mascara was particularly a charm** inasmuch as it is made of antimony, an old witch metal.”

On three occasions the Bible refers to face painting. Jeremiah 4:30 and Ezekiel 23:40-44 refer to wicked women who tried to lure men into the sins of immorality. II Kings 9:30 mentions that Jezebel painted her face. Of course, Jezebel was a pagan woman who practiced witchcraft (II Kings 9:22) and worshipped Baal. King Ahab married her and he also started to worship Baal (I King 16:31-32). Since the pagans painted their face, it is no surprise to see Jezebel doing the same thing. In fact, wicked and immoral women today are often called a “Jezebel.”

“In this connection, I should like to share an incident. About 25 years ago, a returned missionary from China spoke at our church and related the following. He had been in China for seven years, and upon return to this country for furlough he immediately noticed something different about the American women. In the seven years that he had been gone, many of the women had adopted the popular fad of painting their faces [makeup]. In China, **the prostitutes were the only women who painted their faces, wore ear rings, and had long painted fingernails.** This was their means of identifying themselves to their men-partners in sin. The shocking thing to the missionary was that the **American women had taken on the custom of the heathen harlot.**”

The Bible says: “Abstain from all appearance of evil” (I Thessalonians 5:22) and “have no fellowship with the unfruitful works of darkness, but rather reprove them” (Ephesians 5:11).

19.

MASONIC AND EASTERN STAR SYMBOLS

Masons use many symbols which have already been covered such as the point within the circle, the pentagram, the circle, the triangle, the clasped hands, *etc.* We'll briefly look at a few other symbols that the Masons use.

The “G” is quite prominent in Masonry. In the lower degrees, the Mason is told that the “G” stands for “Geometry” or “God.” The occultist Eliphas Levi, however, informs us that the “G” stands for Venus and that Venus’ symbol is a lingam (a symbol of the male private part)! Remember, Venus is another name for Lucifer.

Levi also states that the:

“G which Freemasons place in the centre of the Burning Star signifies GNOSIS and GENERATION, the two sacred words of the ancient Kabbalah. It also signifies GRAND ARCHITECT, for the Pentagram, from whatever side it may be looked at, always represents an A. By placing it in such a manner that two of its points are above and only one below, we may see the horns, ears, and beard of the hieratic god of Mendes [Baphomet], when it becomes the sign of infernal evocations.” [Emphasis in the original]

Osiris, by the way, “was represented by the Ram of Mendes, sporting the horns natural to the ram.”

Many other Masonic authors reveal that the “G” really means generation or carries a sexual connotation. Albert Pike claims that the “generative principle” is “represented by the letter G....”

“A Masonic symbol seen less frequently is the 33° cross because it appertains only to the highest degrees. It is more commonly called the Crusader’s Cross or the Jerusalem Cross....It was supposedly worn by the first Grand Master of the Knights Templar, Godfrey de Bouillon, after he liberated Jerusalem from the Muslims.

“This symbol is on the hat of the Sovereign Grand Commander of all 33° Masons in a very slightly modified form. **It is part of the magical signature of Aleister Crowley, the supreme satanist of this century!** It is also found as the **logo of the new Catholic Bible, the Jerusalem Bible!**”

The broken column is used in both Masonry and the Eastern Star. The initiates are told that the broken column signifies an early death and the symbolism of the

column can be traced back to ancient Egypt. We learn, however, that **columns represented gods.**

In a *Short Talk Bulletin*, entitled “The Broken Column,” published by the Masonic Service Association for use in the Masonic Lodge, we find that: “In **EGYPTIAN MYTHOLOGY, ISIS IS SOMETIMES PICTURED WEeping OVER THE BROKEN COLUMN** which conceals the body of her husband Osiris, while behind her stands Horus or Time pouring ambrosia on her hair.” (See “Winged Symbols” for a picture of Isis weeping over the broken column.) A former Satanist and Mason explains:

“Isis was both virgin and mother, so the ‘beautiful virgin’ is Isis weeping. The broken column is the missing member of Osiris [the phallus], the acacia, an allusion to the eternal life preached by the Egyptians as well as the fertility cults’ emphasis on vegetation. The urn is an evocation of the canopic jars used in Egyptian funerals to store the vital organs of mummies.

“Finally, we have ‘Time,’ the god Saturn, a later form °f the mysterious and evil god, Set. In astrology, Saturn is called the ‘greater malefic,’ or greater evil.

Astrological representations of Saturn

Another name for Osiris is Saturn. Masonic writer, J. S. M. Ward explains that Saturn is really Satan. *A Dictionary of Symbols* mentions that Saturn “is related to the Ouroboros (or the serpent which bites it own tail).”

Saturn’s symbol is a scythe. The scythe is really symbolic of renewed hopes for rebirth or reincarnation. This is quite fitting since the symbolism of the broken column represents Isis and Osiris. Osiris had a “rebirth” due to **SPELLS** performed by Isis.

Isis was known as a powerful **SORCERESS**, “the **GREAT ENCHANTRESS**, the **MISTRESS OF MAGIC**, the **SPEAKER OF SPELLS**.” Not only was Isis a sorceress but she “has always been seen as the guiding light of the profession of **PROSTITUTION....**” Incidentally, Isis’ name among the Syrians was Achot, meaning “**SISTER**.” Isn’t it interesting to learn that the degree of Martha is known as the “**SISTER**” degree in the Eastern Star?

Saturn is symbolized by the goat’s head! Remember that the pentagram used in the Eastern Star also represents the goat’s head. Is this just another “coincidence”?

Saturn is also another name for Nimrod who is considered by some Masons to be one of the founders of Masonry. According to the Bible, Nimrod built the Tower of Babel which displeased God, but Masonic writer John Yarker boasts that: “It

is well known that the **TOWER OF BABEL WAS ONE OF THE MOST ANCIENT TRADITIONS OF MASONRY....”**

Additionally, the acacia of Masonry and the fern or pine branch of the Eastern Star, which is used for Martha, symbolizes eternal life or immortality. The acacia, which is actually dedicated to the Powers of darkness, is placed on the Mason’s grave, but going back to Egyptian mythology we find that the acacia protected the grave of Osiris.

Yet another name for Osiris and Saturn is Baal. Of course, the Bible condemns Baal worship, but this is the god who is being represented in Masonry and the Eastern Star under the symbolism of the broken column, but there is an even deeper meaning.

Baal

The broken column actually represented the phallus of Osiris. Albert Mackey, a 33° Mason, specifies that “the **PHALLUS** was an imitation of the male generative organ. It was represented usually by a **COLUMN**, which was surrounded by a circle at its base, intended for the *cteis*, or female generative organ.” [Italics in the original; Boldface and caps added]

The square is used in both Masonry and the Eastern Star. Eastern Star writer, Mary Ann Slipper, states:

“When turning square comers in floor work it is well to remember that this is acknowledging in action the great truth of being. The square not only means the acknowledgement of that Power but also our belief in the finished work of

the Master Builder, who some day will summon each one into that Great Temple not made with hands, eternal in the heavens.”

In other words, the square used in the Eastern Star floor work represents passing from earth to heaven. Also of interest is that both J. D. Buck and Harold Waldwin Percival mention that the Masonic Square and Compass is just another form of the six pointed star, which we have already covered.

The Masons use a square and compass combined in their degrees.

“The square represents the female (passive) generative principle, the earth, and the baser, sensual nature; and the Compass represents the male (active) generative principle, the sun/heavens, and the higher, spiritual nature.”

The two symbols displayed together once again represent sexual union. In fact, in witchcraft, the square is actually the symbol of the lingam or the male reproduction organ and the compass represents the female organs. Combining the two symbols gives an obvious and vulgar meaning.

Another meaning of the square is that it represents a god or gods. Just which god is it? We don't have to wonder for long, for a number of Masons have already revealed some of these gods to us. For instance, in *The Symbolism of Freemasonry* by Albert G. Mackey, 33° Mason, we see that the “Thebans worshipped Bacchus under the form of a rude, **SQUARE** stone.” He also explains that Mercury, or Hermes, was always represented by a cubical stone, because he was the type of truth....” In a footnote, he says: “In the most primitive times, all the gods appear to have been represented by cubical blocks of stone; and Pausanias says that he saw thirty of these stones in the city of

Pharae, which represented as many deities.”

Masonic author, Albert Churchward writes: “The Square is also very clearly depicted, symbolically, in the Egyptian *Ritual* and is plainly **SHOWN IN ‘THE BOOK OF THE DEAD,’**...This Square you find depicted in many of the ancient temples and in the Great Pyramid, as two seats, one for Osiris and one for Maat—**IT IS THE MASONIC SQUARE.**”

Tibetan Book of the Dead—Notice the triskele (666) on the cover

Joseph Fort Newton, also a Mason, claims that “Mercury, Apollo, Neptune, and Hercules were worshiped under the form of a **SQUARE** stone, while a large black stone was the emblem of Buddha among the Hindoos (sic), of Manah Theus-Ceres in Arabia, and of Odin in Scandinavia.”

The labyrinth is used in the Eastern Star. We are told that the **LABYRINTH** “was made to conform to the idea of a **FIVE POINTED STAR, WITHIN A COMPLETE CIRCLE.**” A witch, Laurie Cabot, explains that the “**CIRCLE AROUND THE PENTAGRAM** represents the totality of all intelligence. It is the **SIGN FOR THE GOD AND GODDESS**, the fullness of cosmic intelligence.”

Albert Pike mentions that a **LABYRINTH** “**WAS BUILT IN HONOR OF THE SUN....**” We also learn that some labyrinths were designed with the purpose of luring devils into them so that they might never escape.

The labyrinth is also one of the symbols of the goddess, which is interesting knowing that the original names of the five Eastern Star women were actually names of goddesses. How appropriate, then, to use one of the goddess' symbols!

Was the labyrinth chosen intentionally or was it just a coincidence? In *The Symbolism of the Eastern Star* we read: “The meaning of the word Labyrinth is a series of winding passages, a maze of intricate windings; **copied from the structure made in Crete by Dadalus** (sic).” *The Seeker's Handbook* explains more about this:

“By a second derivation, labyrinth comes from the ancient Greek word *labrys*, ‘the double-headed axe.’ In **Cretan myth, the maze of Daedalus**, where Theseus found and slew the Minotaur, was known as the place of the double-headed axe—this being, apparently, the weapon of slaughter or sacrifice that the hero used. But deep research into Mediterranean culture of five to seven thousand years B.C. (reported by Marija Gimbutas) turns up the curious notion that the doubled-headed axes may have been a visual pun: At the earliest stage it appears to have been more common as the image of a butterfly! Now the butterfly itself—in Greek, *psyche*—is the earliest symbol that we have for the immortal human soul. It was also **an emblem held sacred to the Great Goddess or Mother Earth**. Somehow **the butterfly is deeply connected with the labyrinth**, as much as the double-headed axe. These two images, one so masculine and the other so feminine, appear to spring from an ancient unity of some kind.”

Minotaur

This book adds that the word labyrinth is:

“From the Latin *labor* + *intus*, ‘into’: the place of entering into labor, birth, or **rebirth**. At sacred sites, such as Chartres, Glastonbury, and Knossos in Crete, a maze constructed of earth-walls, ruts, tiles, or underground windings, believed to have been used in **initiations** as a place of ordeal and initiation through the **PSYCHO-DRAMA**....They are also closely related to **SACRED DANCE**, for which they may have provided a sort of ground plan.” [Italics and caps in the original; Boldface added]

The Labyrinth Walk is becoming popular in the United States.

“This is a mystical medieval practice of walking a 42' wide maze-like design (a sign of wholeness appearing also in Tibetan mandelas (sic) and Hopi Indian medicine wheels) which becomes a ‘walking meditation.’ People walk and ‘contemplate,’ walking to the ‘center of their spirituality.’

In San Francisco, new ager, Jean Houston (Mrs. Clinton’s guru) introduced the Labyrinth to Episcopal Priest(ess), Rev. Lauren Arness, who now travels the U.S. with a mobile model to introduce it to others.

“The Unitarian Church made one and loaned it to the Washington National Cathedral in DC. St. Luke’s Episcopal church in Stuart, FL has one and here, locally, the Pilgrim Congregational Church (Blue Roof Church) on Montclair Road has made one, as well. The Pilgrim Church regularly celebrates **WITCHCRAFT** and other new age events there.”

Mimi Lobell “designed a ‘Goddess Temple’ with a labyrinth and ring of fire (upper level) symbolic of the conscious, and a lower level symbolic of the unconscious.” Her husband, John Lobell, gave a speech at the World Service Forum which was distributed by the Lucis Trust.

The balance scales appear in Masonic and Egyptian symbolism. In Egypt, it was “Anubis’ duty to attend to the ritual preparation of bodies, to weigh the heart of every man on the **scale of justice**, and to judge a man’s good and bad deeds on earth.” “In many traditions, The **Law of Karma has been symbolized by the Scales of Justice**. The Scale or Balance is also the symbol for the astrological sign of Libra.”

Not surprisingly, Anubis is one of the gods adored in **witchcraft**. One witchcraft magazine tells how to make an Anubis protection amulet. After the instructions are given, the writer of the article then adds: “Anubis can be anyone’s best friend, (He’s definitely mine!) even if He is considered by many to be the **most ominous God of the Underworld [hell]**.” Personally, I don’t need (or want) the protection of the “God of the Underworld"! Do you?

Albert Pike tells us: “Isis was also aided in her search [for Osiris] by **Anubis**, in the shape of a dog. **HE WAS SIRIUS OR THE DOG-STAR...**” It was Anubis who supposedly guarded “the gates of death” and he “was associated with magic an divination.”

Another representation of Anubis

The description of Anubis given above clearly signifies to us that this god cannot possibly be the God of the Christians. For one thing, the Bible definitely states that “God is not the God of the dead, but of the living” (Matthew 22:31-32, Mark 12:26-27, and Luke 20:37-38). Notice also that Anubis is depicted in the shape of a dog (or a jackal). Many of the gods are presented in animal (or part-animal) forms. Thoth was illustrated as an ibis-headed man, a baboon, or sometimes as a “dog-headed ape” or a “dog-headed baboon.” Set was “represented by the head of a strange-looking animal that may have been a cross between a donkey and a pig” and was also worshipped under the crocodile and hippopotamus forms. Horus was symbolized as a hawk or falcon and Pan was portrayed as “half-goat, half-man.”

Garuda

You see, the “gods were originally believed to be animals or birds—and in later years were anthropomorphized and pictured with human bodies with the head of the animal or bird.” Of course, the Bible speaks about such a situation. Romans 1:21-23 and 25 state that:

“when they knew God, they glorified Him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened. Professing themselves to be wise, they became fools, And **changed the glory of the uncorruptible God into an image made like to corruptible man, and to birds, and fourfooted beasts, and creeping things....**Who changed the truth of God into a lie, and worshipped and served the creature more than the Creator, who is blessed for ever.”

This passage continues:

“For this cause God gave them up unto vile affections: for even their women did change the natural use into that which is against nature:...And even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind, to do those things which are not convenient; Being filled with all unrighteousness, fornication, wickedness, covetousness, maliciousness; full of envy, murder, debate, deceit, malignity; whisperers, Backbiters, haters of God, despiteful, proud, boasters, inventors of evil things, disobedient to parents, Without understanding, covenant-breakers, without natural affection, implacable, unmerciful...” (Romans 1:26, 28-31).

It’s no wonder, then, that all kinds of unrighteousness follow such a worship of pagan gods for the gods that are being revered are themselves portrayed as doing evil acts. Just a quick glance at mythology will show the gods lying, cheating, committing fornication, incest, adultery, murder, and such like. This is certainly a completely different lifestyle from the righteous life Christ lived (see Hebrews 7:26). Peter also admonishes us: “But as He which hath called you is holy, so be ye holy in all manner of conversation; Because it is written, Be ye holy; for I am holy” (I Peter 1:15-16).

Also presented in the description of Anubis is the idea that if good deeds outweigh bad ones, the person is rewarded and vice versa. A book printed by the Masonic Publishing and Manufacturing Company reveals:

“A painting of the Funeral Ritual represents the judgment of a soul; it advances toward the goddess *Thme*, who wears an ostrich feather on her head; beside this divinity of justice and truth, appears the **scale** in which *Anubis* and *Horus* weigh the actions of the deceased—they place in one side the ostrich feather, and in the other the vase containing the heart; if the weight of the heart is greater than that of the ostrich feather, the scale descends, and the soul is received in the celestial courts; above this scene appear the forty-two judges of the souls seated, and having the head ornamented with the ostrich feather.” [Italics in the original; Boldface added]

What is interesting about this explanation is that **THIS “EGYPTIAN WITCHCRAFT” SCENE IS ACTUALLY PORTRAYED IN THE MASONIC LODGE** in the 31st degree where the candidate’s actions are weighed on a **balance** scale. In this Masonic degree the “candidate is brought into the Court of the Dead to be judged for actions while living and to determine if he deserves to dwell among the gods.” (For picture, see chapter entitled “Winged Symbols.”) This is a teaching that is contrary to God’s Word, for we can never be saved by works. II Timothy 1:9 mentions that God “hath saved us, and called us with an holy calling, **NOT ACCORDING TO OUR WORKS**, but according to His own purpose and grace, which was given us in Christ Jesus before the world began.” In Titus we are told: “**NOT BY WORKS OF RIGHTEOUSNESS** which we have done, but according to His mercy He saved us, by the washing of regeneration, and renewing of the Holy Ghost” (Titus 3:5).

The gavel is an important Masonic and Eastern Star symbol. Sarah Terry, in her Eastern Star book, *The Second Mile*, tells us that “in ancient times the **GAVEL** referred to the **HAMMER OF THE GOD THOR.**” Thor is another **PAGAN** god—a god of fertility. He is part of the Scandinavian Trinity. What is interesting is that **THOR IS ANOTHER NAME FOR SIRIUS—THE BLAZING STAR OR THE PENTAGRAM!**

Albert Pike gives us some additional names for Thor. He explains: **“THOR WAS THE SUN, THE EGYPTIAN OSIRIS and Kneph, the Phoenician BEL OR BAAL.”** BAAL IS ALSO A SYNONYM FOR THE DEVIL. This god Baal, under the name of Thor, is called “the Prince of the Power of the Air.” Baal worship is condemned by the Bible (I Kings 16:30-33, 22:53; II Kings 17:16, etc.), and in Ephesians 2:2 we find that Satan is called the “prince of the power of the air.” Not only does Satan have the same title as is given to the god Thor, but we should notice that the word “Thor” means “thunder.” Thor “was the god of lightning and thunder in Norse mythology.” This is a significant statement for Satanists use the symbol called a “Satanic S,” which resembles a lightning bolt. In Luke 10:18 Jesus says: “I beheld Satan as lightning fall from heaven.”

Is it any wonder that the Bible further informs us that this “prince of the power of the air” is “the spirit that now worketh in the children of DISOBEDIENCE” (Ephesians 2:2)?

Additionally, the gavel, like so many of the other symbols, also has a sexual connotation. Masonic author, J. S. M. Ward, remarks: “Thus we see that the **HAMMER, OR GAVEL**, and the **TAU** were originally the same, and this is a natural evolution of symbols, for the **TAU CROSS IS EVOLVED FROM THE PHALLUS**, and that is the **SYMBOL OF GOD** the Creator....”

This reference shows us that the gavel, the hammer, and the tau cross were all the same and, therefore, the meanings would be the same.

Ward continues:

“But this is not the only place where the tau cross occurs. The gabels, or gavels,

are all T crosses and combine in one symbol the hammer, the sign of rule, and the T cross, the symbol of the male or creative side of the Deity; and, lest there should be any mistake, the T is placed on the apron of the Master of the Lodge, though placed [upside down], so as to give also the symbol of the square, and also to emphasise its **PHALLIC** meaning.”

“The Tau, T, is the emblem of Mercury, of Hermes. It is the *crux ansata*, and the *crux Hermis*. It was the last letter of the ancient alphabets, the end of boundary, whence it came to be used as a terminus to districts; but the crux Tau was also the emblem of the generative power, of eternal transmigrating life [reincarnation], and thus was used indiscriminately with the Phallus. It was, in fact, *the phallus*.” [Emphasis in the original]

The ankh (or crux ansata) is a symbol of life. A *Dictionary of Mysticism* explains the ankh as the “Egyptian cross, shaped like a capital T with an oval loop on the top, symbol of life in **occult** tradition.” It was “used by the gods as an instrument for awakening the dead to a new life.”

One Masonic book relates: “The Crux Ansata, so frequently observed in the hands of the statues of the old kings and gods of Egypt, was evidently both solar and **Phallic** in signification, and represented a combination of the male and female principles in,” nature.

Isis and Amon each holding an ankh

In *The Origins, Practices, and Traditions of Halloween*, we find that the ankh is an “ancient symbol for immortality, fertility; a cross with a ring at the top worn and used in Satanic rites.” A former witch reveals that the ankh is:

“An emblem (sic) to identify the wearer as a worshipper of the sun god Ra, a seeker of the Satanist beliefs, and one who practices the worship to the unknown gods of the supernatural. The wearer acknowledges the sun god Ra, works the voodoo of the unseen world through this **hex**.”

It is interesting to discover that, according to a Masonic book, that the “**caduceus is a variant of** the earliest form of the Cross, the *Crux Ansata* of the ancient Egyptians.” [Italics in the original; Boldface added] (The caduceus is covered in more detail in “Winged Symbols.”)

A related item to the ankh, the hammer of Thor, the tau cross, and the gavel, is the swastika. Occultist Helena Petrovna Blavatsky remarks: “Few world-symbols are more pregnant with real **OCCULT** meaning than the Svastika.” In *The Royal Masonic Cyclopaedia of History, Rites, Symbolism, and Biography* we find that the **swastika**:

“was the hammer of Thor, celebrated in the mythology of the Norse nations, and the tradition ran that when Thor threw this golden cross, it struck, and, like the boomerang, returned again to his hand....**In Masonry**, however, **we find this hammer of Thor exceedingly important**, and of very ancient usage among the Goths, and **in the Masonic fraternity it has survived in the form of the mallet.”**

In *Amulets and Superstitions* we are told that it has been suggested that the four arms of the swastika “represent the four quarters of the heavens or earth, and also that the whole sign is an emblem of INDRA, or DYAUS, or ZEUS, or JUPITER, or THOR.” [Emphasis in the original]

In fact, Thor used the hammer for his weapon and the swastika as his emblem.

Rudyard Kipling, a Mason, used the swastika as his symbol. What most Masons today probably do not realize is that the swastika itself was also a **MASONIC** symbol. It is an older form of the Tau Cross (the ankh).

I have read quite a number of old Masonic books from the 19th and early 20th century. Many of these books will mention the swastika. For instance, one of the most popular Masonic books ever written is ***The Builders*** by Joseph Fort Newton. In this book he refers the reader to an essay by Thomas Carr “**in which he shows that the Swastika is the symbol of the Supreme Architect of the Universe among Operative Masons today....**”

Hinduism Today gives a little history on this symbol.

“When Buddhism fomented its birth out of India’s spiritual wellspring, it inherited the right-angled emblem. On the backs of monks, the little double-jointed **good luck** design journeyed north over the Himalayas into China— often carved into Buddha’s feet—and splayed into a spectrum of decorative ‘meandering’ swastikas, the classical, geometric oriental motif. Nineteenth century Americans picked up the symbol from the American Indians. Boy Scouts tightened their britches with brassy swastika buckles and a US World’s Fair minted flashy swastika commemorative coins.

Buddha's footprint—Notice the swastikas on the toes

coins. Deformed into a mark of demonic racism by Hitler, the ancient symbol soon disappeared except in India where it still retains its auspicious identity and

aura of blessings.”

Women’s Mysteries relates:

“Among the Hindus the right-handed swastika represents the male principle—light, life, and glory; it is the sun in its daily course from east to west. The left-handed swastika is, on the contrary, the emblem of the goddess Kali; it is the female principle—darkness, death, and destruction. These are four-armed swastikas, based on the equilateral cross; in addition three-armed, or three-legged, swastikas called triskeles also occur, for example, in Sicily and the Celtic countries....A three-legged swastika is the official emblem or arms of the Isle of Man, where the Celtic Moon Goddess, under the title of Anu or Anis, was formerly worshipped.”

In *Dictionary of Mysticism* we find that the swastika is a “very ancient and widespread symbol, one of the most **sacred** and **mystic** diagrams in **OCCULTISM**....In general it is regarded as the **symbol of the sun**; in India, especially, it is used as a symbol of good luck.”

As is well known, Hitler used the swastika to represent his Nazi party. Hitler belonged to the occult Thule Society which also used the swastika. Additionally, Hitler was a disciple of the occultist Helena Petrovna Blavatsky.

“By 1914 her Aryan doctrine had spread through Germany and Austria. It was a member of the inner circle of the Thule Society, Dietrich Eckart, who first introduced Hitler to the teachings of Madame Blavatsky. Reportedly, Hitler kept a copy of her book, *The Secret Doctrine*, by his bedside, and it was from her writings that he learned the meaning of the Aryan swastika. (The swastika is the

symbol of the seventh ray of initiation, and Hitler was a sixth ray initiate.)”

Blavatsky says that the swastika is “purely phallic.” She also states: “The *Swastika*, the most sacred and mystic symbol in India, the ‘Jaina-Cross’ as it is now called by the Masons....It is the ‘devil’s sign,’ we are told by the Indian missionaries.” [Emphasis in the original] “The Nazi symbol has become popular with Satanists to represent nature out of harmony.”

A few more representations of the swastika appear below.

The Druids also used the swastika, but this is no surprise since Masonic author, William Hutchinson, acknowledges that “our mode of teaching the principles of our profession **[MASONRY] IS DERIVED FROM THE DRUIDS...**[and] our chief emblems originally [came] from Egypt...” Albert Churchward, another Mason, also writes about Masons as “**OUR PRESENT DRUIDS**”!

In *The Masks of God* we discover that the Lord of the Abyss has a “hammer in his right hand and on his left arm a **cornucopia....**”

The cornucopia (or horn of plenty) is likewise a Masonic symbol. It can be seen

on the jewel worn by the Steward. We're told that the cornucopia "was introduced by the early American **WITCHES** that came over from Scotland."

Many Masonic authorities give us the meaning of this particular emblem. The Grand Lodge A.F. & A.M. of Canada admits:

"The emblem has allusion to the ancient **Greek legend** of Amalthea, a she-goat who nursed the god Zeus when he was a baby. Her horns were miraculous; from one of them flowed nectar, and from the other ambrosia. On one occasion she broke her horn off on a tree. Some one picked it up, filled it with fruit, and brought it to the baby god. According to some versions of the story it continued to replenish itself miraculously. The **cornucopia is appropriated to the Steward as his emblem** because of his function in ministering to the brethren at the hours of refreshment."

Another Masonic writer, Carl Claudy, comments:

"A curious derivation of a **Masonic symbol** from the heavens is that universally associated with the Stewards, the **cornucopia**."

“According to the **mythology of the Greeks** which goes back to the very dawn of civilization, the **god Zeus** was nourished in infancy from the milk of the goat, Amalthea. In gratitude the god placed Amalthea forever in the heavens as a constellation, but first he gave one of Amalthea’s horns to his nurses with the assurance that it would forever pour for them whatever they desired.

“The horn of plenty, or the **cornucopia**, is thus a symbol of abundance. The goat from which it came may be found by the curious among the constellations under the name of **Capricorn**. The Tropic of Capricorn of our school days is the southern limit of the swing of the sun on the path which marks the ecliptic, on which the earth dips first its north, then its south pole toward our luminary. Hence there is a connection, not the less direct for being tenuous, between our Stewards, their symbol, the lights in the lodge, the place of darkness, and Solomon’s Temple.”

Astrological representation of Capricorn

The cornucopia is another example of an androgynous symbol. “The horn was masculine and the inside was feminine. The fruit inside symbolized productiveness of the female.” *A Dictionary of Symbols* gives more information about this under the entry “cornucopia”:

“In mythology, it was the goat Amalthea who fed the infant Jupiter with milk. Given that the general symbolism of the horn is strength, and that the goat has maternal implications, and in addition that the shape of the horn (phallic outside

and hollow inside) endows it with a complex symbolism (including that of the *lingam*, or symbol of generation), it is easy to understand its allegorical use as the horn of abundance. Piobb points out also that the cornucopia is an expression of prosperity deriving from its association with the zodiacal sign of Capricorn.” [Emphasis in the original]

In spite of this interpretation of the cornucopia, the Masons are proud to use this symbol. In fact, the logo for the Job’s Daughters (a Masonically-affiliated organization) is a double triangle with the letters “IYOB FILLAE” between the two triangles and inside the inner triangle are three girls wearing crowns. One girl is holding the horn of plenty (cornucopia), another girl is holding a dove, and the third girl is holding an incense burner.

Another Masonic symbol that stands for plenty is the pomegranate. A Masonic book, *The Perfect Ashlar*, states: “The pomegranates, being a fruit remarkable for the number of their seeds, are **symbolic of fertility**, and the wreaths, or network, spread over the surface, indicate the courses of the heavenly bodies around the earth.”

Another Masonic book, *The Lodge and the Craft*, gives an expanded (and more vulgar) definition about the meaning of the pomegranate in Masonry. The author claims:

“To illustrate some of the lines of thought which pass among the present philosophers of the Craft, we will describe a late theory that a certain brother, than whom *there is none brighter among our acquaintance*. Said he, ‘The lodge is a representation of King Solomon’s Temple and the Temple was calculated to

symbolize the maternal human body, wherein the candidate must enter to be born again. The uterus and vagina represent the porch of the Temple, the pillars of the porch represent the fallopian tubes, the network, the broad ligament with its accompanying blood vessels, the lily-work, the ampulla or fimbriated extremity of the tube, and the **pomegranate**, the ovary and its exuberant seeds, the ova cells.

The winding stairway is represented by the three divisions of the intestine. The three steps are represented by the ascending, transverse and descending colon, the five steps by the coils of the ilium and the seven steps by the coils of the jejunum. The veil of the Temple represents the diaphragm, the shechinah and the altar represent the heart, which is the source of life, the first to live and the last to die. This is overshadowed by the wings of the cherubim, in the shape of the lungs. The seven-branched candlestick is represented by the arch of the aorta, the great artery of the chest, which is itself the sanctum sanctorum, while the abdomen was the holy place or Middle Chamber. The brain represents the Deity, which governs all things, and is the analogue of the Holy Royal Arch, whose ark contains the Ineffable Name of God.' There are many other analogues which might be mentioned, which suggest themselves to the trained anatomist."

Knowing the meaning behind the pomegranate, isn't it interesting to learn that Milenko Matanovic, a friend of David Spangler (who praises Lucifer), started an organization called the Pomegranate Foundation? Matanovic and Spangler worked on a musical play. Spangler explains:

“One of my very close associates and friends whom I met here at Findhorn, a Yugoslavian named Milenko Matanovic who was largely responsible for creating the New Troubadours and much of the music which we sang, worked with me on a three-act musical play....In this play we tried to look, in a comic and a musical way, at the course of human evolution. In the first act of the play, four great beings have gathered together evaluating the situation here on Earth. Three of the beings are actually present and the fourth being is suggested as a being who is trying to be present. The three who are present were: **Pan, representing the overlord of nature** and all the principles of nature; **Lucifer**, representing the principle of self and of selfhood and of all that is involved in learning to be separate from the universe in order that you can reunite with the universe; the **Logos**, who represented the power of that reunion through love. The **fourth suggested entity was the one who would appear when these three elements of Pan, Lucifer and the Christ were all blended into a wholeness.**”

Matanovic also wrote a song entitled “Festival of Light,” which was sung at the Cathedral of St. John the Divine in New York City. This is a very ungodly place where they took Christ off the cross and put a **FEMALE** “Christ” (called Christa) in His place on the cross.

Returning to the symbolism of the pomegranate, a Masonic book, *The Historical Landmarks and Other Evidences of Freemasonry, Explained*, declares: “The names of the pillars signified potency and perpetuity; the pomegranates on their capitals **were symbols of generation.** Hence **they were esteemed to be of Phallic reference.**” He adds:

““The **two pillars,**’ says Fellows...‘represent two imaginary columns, supposed to be placed at the equinoxes (sic) to support the heavens....The one on the left is called Boaz, and **indicates Osiris, or the sun,** the one on the right is called Jachin, **and designates Isis,** the symbol both of the earth and its productions, and of the moon.””

Another name for a four-sided pillar is the obelisk. Pillars have always been worshipped as gods. In Egypt, the obelisk stood for the sun god. *The New Age Magazine* had an article by 33° Mason, Henry Ridgely Evans, in which he said that Osiris, the god of the underworld, was also depicted in the form of a pillar.

In fact, in *Numbers: Their Occult Power and Mystic Virtues*, we find that the lingam (the male sex organ) was an upright pillar.

H. L. Haywood, another Mason, states:

“In some cases these crude rock **pillars were thought to be the abodes of gods or demons**; in others, homes of the ghosts; and often as **symbols of sex**. Of the last-named usage one writer has said that ‘pillars of stone, when associated with worship, have been from time immemorial regarded as symbols of the active and passive, the generative and fecundating principles.’ In Egypt, Horus and Sut [Set] were regarded as two living pillars, twin builders and supporters of the heavens....”

Masonic author, Rollin Blackmer, elaborates:

“The symbolism regarding solar worship indicated by the point within the circle has many variations, but one of the most primitive and natural was that the Sun was to be regarded as the male generative power of nature. To the ancient philosopher the origin and creation of life led to the contemplation of only one process, the generative act. The Sun God was certainly the generator of life, light and heat, the male principle, and this was symbolically represented by the Phallus or Lingam, which was some picture, more or less veiled, of the human male generative organ. The most frequent illustration was of a **pillar** set up in the center of a circle. The circle just as distinctively represented the earth or female principle. The Sun was the Great Father. Under his benign influence all nature germinated, and the earth was the Universal Mother, in whose ample womb all these germs grew to maturity.”

In *Our Phallic Heritage* we are told that “All pillars or columns originally had a phallic significance, and were therefore considered sacred.” Pan, the goat god and god of sensuality, was often represented as an obelisk.

A former witch gives some interesting information about the obelisk. He writes:

“The obelisk is a long pointed four-sided shaft, the uppermost portion of which forms a pyramid. The word **‘obelisk’** **literally means ‘Baal’s Shaft’** or Baal’s organ of reproduction. This should be especially shocking when we realize that we have a gigantic obelisk in our nation’s capital known as the Washington Monument.”

Of course, the Masons and Egyptians aren’t the only ones who had high regard for the obelisk. In front of the Vatican stands the very same obelisk that once stood in Egypt! Ralph Woodrow explains:

“The very same obelisk that once stood at the ancient temple which was the center of Egyptian paganism, now stands before the mother church of Romanism! This seems like more than a mere coincidence.

“The red granite obelisk of the Vatican is itself 83 feet high (132 feet high with its foundation) and weighs 320 tons. In 1586, in order to center it in front of the church in St. Peter’s square, it was moved to its present location by order of Pope Sixtus V. Of course moving this heavy obelisk— especially in those days —was a very difficult task. Many movers refused to attempt the feat, especially since the pope had attached the *death penalty* if the obelisk was dropped and broken!

“Finally a man by the name of Domenico Fontana accepted the responsibility. With 45 winches, 160 horses, and a crew of 800 workmen, the task of moving began. The date was September 10, 1586. Multitudes crowded the extensive square. While the obelisk was being moved, the crowd, upon penalty of death, was required to remain silent. But after the obelisk was successfully erected, there was the sound of hundreds of bells ringing, the roar of cannons, and the loud cheers of the multitude.” [Emphasis in the original]

When the children of Israel would forsake God, they turned to worshipping

idols. One of the idols they worshipped was the obelisk. God had specifically forbidden them to do so. Leviticus 26:1 warns: “Ye shall make you no idols nor graven image, neither rear you up a **standing image**, neither shall ye set up any image of stone in your land, to bow down unto it: for I am the Lord your God.” They were also told that when they went into pagan nations, they “shall overthrow their altars, and **break their pillars**, and bum their groves with fire; and ye shall hew down the graven images of their gods, and destroy the names of them out of that place. Ye shall not do so unto the Lord your God” (Deuteronomy 12:3-4). Many other such warnings are also in the Bible. The following references use the same Hebrew word for “pillar” but it is translated as “images.” See: Exodus 23:24, 34:13; Deuteronomy 7:5, 16:22; I Kings 14:23; II Kings 10:26,27, 17:10, 18:4, 23:14; II Chronicles 14:3, 31:1; Jeremiah 43:13; Hosea 10:1-2; and Micah 5:13.

How can anyone who truly loves the Lord belong to Masonry, the Eastern Star, or any other Masonically-affiliated organization when they so blatantly promote paganism? The Bible clearly states: “Come out from among them, and be ye separate, saith the Lord, and touch not the unclean thing; and I will receive you” (II Corinthians 6:17).

Leviticus 18:3, 30 warns:

“After the doings of the land of Egypt, wherein ye dwelt, shall ye not do: and after the doings of the land of Canaan, whither I bring you, shall ye not do: neither shall ye walk in their ordinances....Therefore shall ye keep mine ordinance, that ye commit not any one of these abominable customs, which were committed before you, and that ye defile not yourselves therein: I am the Lord your God.”

One other phallic symbol, although not a Masonic symbol, is the maypole. A New Age magazine, *Utne Reader* gives a little explanation about the maypole and May Day.

“In preindustrial Europe, the first of May was widely celebrated as the beginning of warm weather and natural fruition. The Romans held games in honor of the goddess of flowers around this date, and the Druids lit new fires in honor of the god Bel. In the Middle Ages, most European communities celebrated May by decorating their homes with new flowers (the custom of carrying in baskets of

flowers was known as ‘bringing in the May’), choosing a Queen of the May, and erecting and dancing around a maypole. **It was the maypole, with its phallic and pagan connotations,** that brought May Day into disrepute among the 17th-century Puritans. In both Old and New England the custom of dancing the maypole was outlawed by the religious authorities.”

Another author notes:

“The May pole was formerly a huge phallus decked with flowers and brightly colored ribbons and set upright in an open area, around which the young people joyously danced at the return of the mating season. This typified the rejoicing of the return of spring, with its fructifying powers, after the earth had awakened

from its long winter's sleep.”

Witch Laurie Cabot tells us that May Day is a witchcraft holiday called Beltane in which:

“fires are lit and the great fertility ritual of the God and Goddess is celebrated with Maypoles, music, and considerable frolicking in the greening countryside. May is a lusty month. The fifth month in the year expresses all the sexual and sensual meanings in the number five....Nature celebrates the great fecundity of the earth in rituals of sex, birth, and new life....

“The sexual forces of springtime abound everywhere, and as the folk songs say, ‘We go a-Maying.’ Symbolically we celebrate the forces of the season by erecting Maypoles, around which young men and women dance,

entwining multicolored ribbons, weaving themselves together as they wrap the pole in festive colors.”

Feminist Naomi Goldenberg adds:

:“The God’s mother is the Goddess herself. As the year waxes into spring, her son becomes her lover [incest] and their union makes the whole world bloom with sexual energy. The first of May, **May Day**, is the time for this celebration — probably the **most joyous holiday of the witch’s year**. The famous **Maypole** represents the God’s erect phallus and is used as the rallying point for dancing and playing games.”

Many other authors (such as Masons and witches) reveal that the Maypole is a

phallic symbol. With information like this, it was disappointing to see the May 1995 issue of *Clubhouse Jr.* This is a magazine for children distributed by Dr. James Dobson's Focus on the Family. On the back cover they mentioned May Day and the maypole and showed a maypole with adults and children dancing around the pole. The children were supposed to find hidden flowers in this drawing.

Those who profess to be Christians should not be promoting such a festivity which is actually held in honor of the god Belenos.

Not only is May 1st a prominent **WITCHCRAFT** and **SATANIST** holiday, it is also celebrated as a Communist holiday. Additionally, **it is the day that the Illuminati was founded and the day that appears on the back of our dollar bills** (which was orchestrated by Masonry).

James Walker, 32° Mason, mentions the **Masonic symbolism in the dollar bill**. Here is what he says:

- 13 leaves in the olive branches
- 13 bars and stripes in the shield
- 13 feathers in the tail
- 13 arrows
- 13 letters in the 'E Pluribus Unum' on the ribbon
- 13 stars in the green crest above
- 32 long feathers representing the 32° in Masonry
- 13 granite stones in the Pyramid with the Masonic 'All-seeing Eye' completing it.
- 13 letters in Annuit Coeptis, 'God has prospered.'

“On the front of the dollar bill is the seal of the United States made up of a key, square, and the Scales of Justice, as well as a compass which, of course, is an important symbol in Masonry.”

A former Mason and witch, Bill Schnoebelen, gives a little more detail about the Masonic symbolism in a dollar bill.

“On the front of the Seal is an eagle. Amazingly, the eagle *happens* to have 32 feathers in its right wing—32 being the number of ordinary degrees of the Scottish rite. The left wing of the bird has 33 feathers, which corresponds to the 33°. The tail-feathers number 9, the number of degrees in the York rite. The eagle itself is a prominent icon of Masonry, being used extensively in the Scottish rite.

“To magicians, the eagle is often a standin for the Phoenix....

“In a bit of historical irony, the Scottish rite had its beginning in France, and the York rite had its greatest success in America. Thus, this eagle can be thought of as a symbol of Franco-American unity. This theme is carried further when one realizes that the total number of feathers in the two wings is 65. This is the Cabalistic number of the Hebrew, ‘*Yam Echad*,’ meaning ‘to dwell in unity.’...

“Over the eagle’s head is a cloud with 13 pentagrams in the shape of a hexagram—or greater Seal of Solomon. To the sorcerer, the hexagram is a powerful tool to invoke Satan, and is a sign of anti-christ. (6 points, 6 angles, 6 planes—**666**) The 5 pointed pentagrams multiplied by the **13** stars equals 65, the same cabalistic number above! This makes one wonder with *whom or what*, we are to

dwell in unity?

“Though there is an obvious rationale for the 13 stars (13 colonies) there is also a more subtle reason—13 is a key number of Satan.” [Emphasis in the original]

One Masonic symbol that **appears** to be Christian is the cross and the crown emblem. However, this **is not** the case. Masonic author, Ray Denslow, reveals:

KNIGHTS TEMPLAR

“The Cross and Crown may be said to be confined almost exclusively to the historical degrees in Masonry as exemplified in the various orders of knighthood of York and Scottish rites. In Gaul we find the *cross to have been a solar symbol* when it had equal arms and angles; to the Phoenicians it was *an instrument of sacrifice* to their God, Baal; and to the Egyptians, the *crux ansata* was his *symbol of eternal life*.” [Emphasis in the original]

In *The Masonic Report* we find more about this emblem:

“Question: What does Masonry’s emblem of the ‘Cross and Crown’ actually symbolize?

“Answer: The ‘Cross’ of Freemasonry is a philosophical cross, according to Albert Pike, ‘Morals and Dogma,’ p. 771. It is philosophical in the sense that it represents the generating fecundating principle by the perpendicular shaft, and

the matrix or womb of nature, the female producing principle, by the horizontal shaft. The philosophy of the Masonic cross is totally phallic.

“The ‘Crown’ of this Masonic emblems is also phallic, it being the first emanation of the Cabalistic Sephiroth....”

A former Mason also explains:

“The other York Rite jewelry you may see is the Templar symbol....It is a large Maltese cross with a circle in the center. Inside the circle is a red Latin cross within a crown. Around the arms of the cross is the Commandery motto, ‘In Hoc Signo Vincas.’ (In this sign, conquer!)

“Although this may seem harmless enough, the motto is originally attributed to the emperor Constantine, who used it in conjunction with a supposedly heavenly vision to begin the subversion and politicization of Biblical Christianity into the false, apostate Alexandrian cult....

“A similar shell game is played with the word ‘sign.’...The sign Constantine referred to was NOT a Christian cross, but a kind of ‘X’ which had both Christian and pagan associations. In modern magic, it is the sign of the slain and risen Egyptian god, Osiris (another version of the ‘slain and risen’ Hiram Abif).

“Again Masonry has downgraded Jesus and replaced Him with its own ‘christ.’”
[Emphasis in the original]

Two other groups (both with Masonic connections) use the cross and crown. Charles Taze Russell was a Mason who started the Jehovah Witnesses. He used the red cross and other distinctive features of the Knights Templar logo.

He also used the Masonic symbol of the winged sun-disk with snakes and he is “buried in a pyramid with masonic symbols on its capstone.”

The other group that uses the cross and crown emblem is Christian Science. This group was founded by Mary Baker Eddy in Massachusetts but Mason Henry Steele Olcott, who was cofounder of the Theosophical Society with Helena Petrovna Blavatsky, was an associate of Mary Baker Eddy. Some Eddy Brothers held seances and it was at these seances that Blavatsky met Col. Henry Steele Olcott. Mary Baker Eddy herself had married a Mason and this was the only secret society which she allowed other Christian Science members to join. She even had some of her material published in the *Freemason's Monthly Magazine*. Several people connected with Christian Science such as directors and board members and a number of the editors of *The Christian Science Monitor* were Masons. Even the presidents of the Mother Church in 1922-23 and 1923-24 were Masons.

Below are some more Masonic symbols as well as some logos for different Masonic organizations.

20.

THE All-SEEING EYE

One of the most prominent symbols in Masonry is the all-seeing eye. A single eye appears almost everywhere you look today.

Ralph Anderson, a 32° Mason, gave a speech in 1985. He said:

“A brief word about the future. The Tibetan [a demonic spirit guide] tells us: ‘The **three main channels through which the preparation for the New Age is** going on might be regarded as **the church, the Masonic fraternity and the educational field**. All of them are as yet failing to meet the need and to respond to the inner pressure. But in all of these three movements, disciples of the Great Ones are to be found and they are steadily gathering momentum and will before long enter upon their designated task.’

“He tells us further, ‘The **Masonic Movement** when it can be divorced from politics and social ends and from its present paralysing condition of inertia, will meet the need of those who can, and should, wield power. It is the custodian of the law; it is the home of the Mysteries and the seat of initiation. It holds in its symbolism the ritual of Deity, and the way of salvation is pictorially preserved in its work. The methods of Deity are demonstrated in its Temples, and **under the All-seeing Eye the work can go forward**. It is **a far more occult organisation than can now be realised**, and is intended to be the training school for the

coming advanced **occultists**. In its ceremonials lies hid the wielding of the forces connected with the growth and life of the kingdoms of nature and the unfoldment of the divine aspects in man.

In the comprehension of its symbolism will come the power to cooperate with the divine plan. It meets the needs of those who work on the first Ray of Will or Power."

The eye used in Masonry is a representation of **OSIRIS**. Pike clearly reveals that **the all-seeing eye is "the emblem of Osiris, the Creator."** He also maintains that Osiris' "power was symbolized by an Eye over a Sceptre. The Sun was termed by the Greeks the Eye of Jupiter, and the Eye of the World; and **HIS [OSIRIS']** is the All-Seeing Eye in our Lodges." Masonic author, Carl Claudy, writes:

"This is one of the oldest and most widespread symbols denoting God. We find it in Egypt, in India....The **Open Eye of Egypt represented Osiris**. In **India Siva** is represented by an eye."

Albert Mackey, 33° Mason, agrees. He states:

"A symbol of the omniscient and watchful providence of God. It is a very ancient symbol, and is supposed by some to be a **relic of the primitive sun-worship**. Volney says (*Les Ruines*, p. 186) that in most of the ancient languages of Asia, the eye and the *sun* are expressed by the same word.

Among the Egyptians the eye was the symbol of their supreme god, Osiris, or the sun." [Emphasis in the original]

"To the ancient Egyptians, the right eye symbolized the sun and the left eye the moon."

“Legend recounts how an Eye of Ra which had fled from Egypt was brought back from Nubia by Anhur, and how this divine Eye became enraged upon seeing that another Eye had taken its place. Ra then set it on his forehead where it became the Uraeus which protected the god against his enemies.”

“The Eye, or *uraeus*, was to become the effective rule of the world, and as such was to be worn by the pharaohs as a symbol of their majesty and their descent from the sun god.” [Emphasis in the original]

Since the all-seeing eye represents Osiris, let's look at who Osiris is. He committed incest with his sister, Isis, which resulted in the birth of Horus. Pike says: “Osiris was the image of generative power.” He is also the Egyptian **god of the dead** as well as a **SUN GOD**. Remember that the Bible reminds us that

the Christians' "God is not the God of the dead, but of the living" (Matthew 22:31-32, Mark 12:26-27, and Luke 20:37-38).

Osiris is known by many other names in other countries. In Thrace and Greece he is known as Dionysus, the god of pleasures and of partying and wine. A contrast between this pagan god and the true Christ once again becomes obvious when we look at the Bible. When Jesus was on earth He was called a "man of sorrows," not a "god of pleasures." Isaiah 53:3 prophesied of Jesus that "He is despised and rejected of men; a man of sorrows, and acquainted with grief: and we hid as it were our faces from Him; He was despised, and we esteemed Him not."

Festivals held in Dionysus' honor often resulted in **HUMAN SACRIFICES AND ORGIASTIC** (sexual) rites. In Rome Osiris is called Liber or Bacchus. The Lydians named him Bassareus and in Persia he is identified as Mithras, where **ASTROLOGY** is practiced by his followers. He is Zagreus to the Cretans and "became an **underworld divinity** who welcomed the souls of the dead to Hades [hell] and helped with their purification." The Phrygians know Osiris as Sabazius where he is honored as a solar deity (a sun god) who was represented by **horns** and his emblem was a **SERPENT**.

In other places he went by yet other names such as Deouis, The Boy Jupiter, The Centaur, Orion, Saturn, The Boy Plutus, Iswara, The Winged One, **NIMROD**, Adoni, Hermes, Prometheus, Poseidon, Butes, Dardanus, Himeros, Imbors, Iasius, Zeus, Iacchus, Hu, Thor, Bel, Serapis, Ormuzd, Apollo, Thammuz, Atus, Hercules, **SHIVA**, **MOLOCH**, and, believe it or not, **BAAL**!

The Bible condemned Baal worship. In Jeremiah 32:35 we find that the Israelites "built the high places of Baal, which are in the valley of the son of Hinnom, to cause their sons and their daughters to pass through the fire unto Molech; which **I commanded them not, neither came it into My mind**, that they should do this abomination, to cause Judah to sin." Jeremiah 19:5 mentions that the Israelites burnt their children with fire as burnt offerings for Baal. So, now we have a little better idea of who Osiris is and what the all-seeing eye represents.

The symbolic sign for Osiris and the sun is the point within the circle. This symbol was covered in the chapter "The Circle," but as a brief reminder, the point within the circle is a phallic symbol. This symbol also stands for the sun

and for air.

Mason and occultist Albert Pike contends:

“These two Divinities [Isis and Osiris], the Active and Passive **Principles of the Universe, were commonly symbolized by the generative parts of man and woman....**The Indian lingam was the union of both, as were the boat and mast and the **point within a circle:** all of which expressed the same philosophical idea as to the Union of the two great Causes of Nature, which concur, one actively and the other passively, in the generation of all beings....”

In *Signs and Symbols of Primordial Man* we find that the point within a circle **“is an equivalent for the Eye,** and the two are co-types. Therefore it may be inferred that, as the fixed star at the centre, it was the Primordial All-Seeing Eye in the Astral Mythology.” The all-seeing eye, then, has the same phallic meaning as the point within the circle. In spite of this, *The Short Talk Bulletin*, a Masonic pamphlet, has an article entitled “The All-Seeing Eye.” It states: “The All-seeing Eye is to Freemasons the **cherished symbol....**Therefore the thinking **Freemason has reverence for this symbol.**”

Robert Hieronimus, an occultist, wrote: “The single eye, alone or in a triangle, was used extensively by Freemasons and other secret societies.”

Alice Bailey, whose husband, Foster Bailey, was a 32° Mason, also talked about the eye. She said:

the eye. She said.

“I would first have you note the emphasis upon the ‘eye’ in this formula. It is a keynote and appears in various guises. Behind all the ideas lies the concept of seeing, of a Seeing One, looking on at the created Whole. This same concept is to be found in the fundamental Masonic symbol of the Eye of God which dominates everything within the Temple.” [Emphasis in the original.]

Bailey then goes on to mention that the “Eye of God” is Shiva (or Siva), the Destroyer. Remember, Shiva is the Indian god who is equivalent to Osiris. Shiva is also a synonym for Satan.

Charles Vail, a Mason, writes:

“This is the symbol of the higher **clairvoyance**. The Master always possessed this sight. **In India this All Seeing Eye was called the Eye of Siva.** The

Egyptians represented Osiris by the symbol of an open eye, and placed this hieroglyphic of him in all their temples. In the Lodge the All Seeing Eye represents the Omniscence (sic) of God,—The Eye that never sleeps. It may also represent, as in the Ancient Mysteries, the higher vision.”

Masonic author, J. D. Buck, agrees:

“The EYE of SIVA is, in fact, an All-Seeing Eye; for it practically annuls Space and Time as concepts on the physical plane.... A real Master, then, has the Eye of SIVA; the pineal gland, dormant in others, is active in him; and the vibrations of his brain correspond to the synthesis of sound and light.” [Emphasis in the original]

Hieronimus remarks: “The single eye also has been identified with the **third or spiritual eye** and therefore with **clairvoyance**. The esoteric tradition relates the single eye to the inner light, intuitive power, illumination, and the philosopher’s stone....”

Many authors recognize that clairvoyance is gained through use of the third eye. For instance, a book entitled *The Third Eye* describes how T. Lobsang Rampa “entered Chakpori Lamasery, the Temple of Tibetan Medicine where he learned **clairvoyance, levitation and astral projection** by learning to **open the third eye**.”

In *Yoga Made Easy* we find that the sixth chakra “is said to be the seat of the mystical ‘third eye’ which accounts for the **clairvoyance** claimed by some Yogis.” In fact, yoga and visualization are two methods used to open the third eye.

“For centuries, the secrets of **Kundalini yoga** have been guarded by the yogis of India. Known to the ancients as ‘the **sixth sense**,’ this extraordinary life-force which makes it possible to open ‘the **third eye**’ is located at the base of the spine, and can provide an inexhaustible reserve of energy and knowledge!”

Alice Bailey, an occultist, declared: “Through the practice of the power of visualization the third eye is developed.” Bailey also wrote:

“No man is a magician or worker in white magic until the third eye is opened, or in process of opening, for it is by means of that eye that the thought form is energised, directed and controlled, and the lesser builders are swept into any particular line of activity....

“The ‘*Eye of Shiva*’ in the human being has its position... in the centre of the forehead, between the two physical eyes.” [Emphasis in the original]

Mother Goddess with third eye

Laurie Cabot, a witch, remarks:

“Furthermore, the term ‘Third Eye’ is not just a fanciful metaphor conjured up by Witches and psychics to sound mysterious. Anatomists believe that the gland is indeed a remnant of a third eye that never developed in the course of **evolution**. From the oldest times, sages, **magicians, and Witches have spoken of the Third Eye as the doorway to all knowledge.**

Ancient peoples have intuitively understood the importance of this power spot and honored it in various ways. In the Orient it is one of the seven chakras. Egyptian monarchs wore a cobra-headed ornament at the center of the forehead. In India a red dot is placed over the Third Eye. Celtic priestesses painted the area blue. Cultures that use ritual face makeup often single out this area in front of the pineal gland for special attention.”

“Pay particular attention to how you adorn your forehead where the Third Eye is located. East Indians wear a red dot over this chakra point, ancient Druids wore crowns with a band of jewels in the center of the forehead; the African Berbers use black makeup to tattoo their faces with stars, moons, and other magical symbols. A quartz crystal worn across the Third Eye can be particularly powerful.”

A Masonic book states:

“These considerations lead us to an interesting topic, the Eye of Mind or the Eye

of Horus, a subject elaborated in the Chapter on 'Horus' and conveying the idea of the 'All seeing Eye.' The end set before the Egyptian neophyte was **illumination**, that is to be '**brought to light.**' The Religion of Egypt was the Religion of Light."

A former witch and Mason comments:

"To 'open' the eye a little bit is to experience psychic powers. To open the eye completely is to have your brain flooded with the 'pure' consciousness of Lucifer himself. This is why one of the Masonic symbols is the 'All-Seeing Eye.' It is a symbol of Illumination.

"This is Satan's counterfeit for being Born Again. In it, you acquire a 'personal relationship' with Lucifer. You begin to think his thoughts and see with his eyes. You begin to look at humans the way he does. It is not a pretty experience!"

There is some very revealing information found in *The Power of Karma* (written in 1937 by Alexander Cannon). The author says that "much of that which is prophesied in the book of Revelation is to come to fruition." He goes on to mention that those who have the mark of wisdom have nothing to fear. He then notes that "this mark of wisdom needs explanation." He indicates that those

who have had superior past lives (meaning reincarnation) have been singled out for leadership. It results in seership, in clairvoyant gifts, in a type of intellect that perceives the hearts of men, their innermost ambitions, without the necessity for physical speech.” He finally explains:

“YOU HAVE A LITERAL SIGN UPON YOUR FOREHEADS, PLACED BETWEEN YOUR EYEBROWS! DOUBT IT NOT! WE SPEAK WHEREOF WE KNOW!

“NOW, THAT SIGN UPON THE FOREHEAD IS EVER THE MARK OF THE SOUL IN CHRIST. It is ever the mark of those aligned with the great truth of Light. It is the Mark of those who have incarnated to render unto God the things that are God’s, and found a **new order** in the current generation....

“The time has come to tell you that as you minister, so shall you be saved! As you join the ranks of those who presently walk with the **Sign on their foreheads**, so are your wants supplied by those who recompense you for the services performed to them and their children.” [Caps in the original; Boldface added]

If you read Revelation 13 you will find some astonishing information. The mark that is put upon the foreheads is not the “mark of the soul in Christ,” but is rather the mark of the beast or the antichrist. Once again we can see how the occultists and New Agers twist the Scriptures and make the good evil and the evil good. The Bible warns: “Woe unto them that call evil good, and good evil; that put darkness for light, and light for darkness; that put bitter for sweet, and sweet for bitter! Woe unto them that are wise in their own eyes, and prudent in their own sight!” (Isaiah 5:20-21).

Also notice that Cannon said that those who have this mark will have their wants supplied. Again turning to Revelation 13 we find that only those who have the mark can buy or sell:

“And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name” (Revelation 13:16-17).

We need to point out, however, that those who take this mark will end up in hell. Receiving the mark of the all-seeing eye or the third eye is not something glorious like the New Agers would have you think. Revelation 14:9-11 points out:

“And the third angel followed them, saying with a loud voice, If any man worship the beast and his image, and **receive his mark in his forehead, or in his hand,** The same shall drink of the wine of the wrath of God, which is poured out without mixture into the cup of his indignation; and **he shall be tormented with fire and brimstone** in the presence of the holy angels, and in the presence of the Lamb: And the **smoke of their torment ascendeth up for ever and ever: and they have no rest day nor night, who worship the beast and his image, and whosoever receiveth the mark of his name.**”

The all-seeing eye is also related to the Blazing Star. Pike tells us:

“...the **Blazing Star has been regarded as** an emblem of Omniscience, or **the All-seeing Eye,** which to the Egyptian Initiates was the emblem of Osiris, the Creator. With the YOD in the centre, it has the kabalistic meaning of the Divine Energy, manifested as Light, creating the Universe.” [Caps in the original; Boldface added]

“The **Blazing Star in our Lodges,** we have already said, **represents Sirius, Anubis, or Mercury,** Guardian and Guide of Souls. Our Ancient English brethren also considered it an emblem of the Sun....accordingly the Blazing Star has been regarded as an emblem of Omniscience, or the All-Seeing Eye, which to the Ancients was the Sun.”

We’ve already covered some of these pagan gods (like Anubis and Mercury) earlier in this book. Riane Eisler, a feminist, mentions that the eye is one of the symbols of the goddess. One goddess that was represented by an all-seeing eye was Maat.

“The Egyptian priesthood taught first that Maat, the Goddess of truth and judgment, possessed a **third eye.** Later the central text of the Egyptian Mystery Religion was revised and a male god, Horus, son of the Goddess, was given the **all-seeing eye.**”

Laurie Cabot agrees that the “Egyptian Goddess Maat originally possessed the All-Seeing Eye, which later was transferred to Horus.” She adds:

“Outlining the eye emulates the Goddess, who is often portrayed with large, distinctive eyes, capable of seeing through space and time as well as into our innermost hearts. Ishtarte, the Goddess of Light, was known in the ancient Middle East as the Eye Goddess because the light she brings from heaven to earth illuminates the world.”

She continues: “The Goddess’s ability to see and know all things became a terrifying concept in patriarchal times, and her mystical eye was turned into the ‘evil eye.’...” The “evil eye” is defined in *The Complete Book of Witchcraft and Demonology* as the “power of the glance to harm others.” In *Witches* we are told: “No one would want a witch as an enemy. Some witches used ‘the evil eye’ on their victims. One glance from a bad witch could mean real trouble.”

People became afraid of the evil eye and therefore they sought ways to “protect” themselves from it. Different charms and amulets were used. For instance, in *Amulets and Superstitions*, we find:

“The amulet used against the Evil Eye...was called BASKANION or PROBASKANION, and FASCINUM, and it was usually in the form of the PHALLUS. As children were specially liable to be attacked by the Evil Eye, models of the phallus were hung around their necks....Other names of the phallus amulet were *mutonium*, *scaevola*, and *Satyrica signa*....” [Emphasis in the original]

Another object used as protection was the “homed hand” or the “devil salute.” Budge writes that “a closed hand with the first and fourth fingers outstretched represents the ‘horns of the Devil.’

Nevertheless models of such a hand were worn as amulets. A closed hand with the first finger alone outstretched was in some countries regarded as a sure protection against the Evil Eye.”

Cabot remarks:

“Many customs and terms continue to reflect the importance that horns once held in local folklore. The word *scorn* comes from the Italian word that means ‘without horns,’ for to be without horns was a sign of disgrace, shame, or contempt. Holding up the index and little fingers in the form of horns was a gesture to ward off the **evil eye**....And since it was the male animal that had horns, the horn easily became a phallic symbol.” [Italics in the original; Boldface added]

In fact, Shiva (a synonym for Satan) can sometimes be seen making this gesture.

“In India, where the **occult** sciences are still followed, figures of Shiva, the Destroyer...is not only placing his right hand over his solar plexus, but has folded his fingers so as to form the **sign of the horns**, thereby combining the sign which drives away the **evil eye** with that of Destruction, of which he himself is the embodiment....although he is the Lord of Death and Destruction, he is also Lord of Birth, through whose hands the dead man’s soul passes once more into **reincarnation**.”

We must remember that the devil salute (which is covered in the chapter entitled “Hand Signals”) “is a Sicilian **sign of the Devil** used to cast spells....” This certainly is not any sign that a Christian would want to make. When one makes this gesture, one is actually calling on the devil to “protect” him from evil. Satan must laugh when someone “innocently” uses this signal to ward off the evil eye.

Hex signs are also used to fend off the evil eye. To hex means to place a curse on someone or something to bring bad luck. A witch remarks: “Many people say that the Hex signs were painted on barns to protect livestock from harmful spells, negative influences, and the Evil Eye, and to bring luck and prosperity.” She then gives extensive instructions on how to make your own **hex sign talisman**. She starts by saying: “On the night of a **Full Moon**, cast a **Magic Circle** in your customary manner and consecrate your Hex sign with tools of the Elements. Sprinkle salt on the Hex sign for Earth,” *etc.*

Again, many people are attracted to the Pennsylvania Dutch hex signs not knowing the **occult** connection behind them. J. Gordon Melton asserts:

“Among the Pennsylvania Dutch there is the survival of what seems to be genuine ‘**witchcraft-life**’ practice, locally termed **powwowing**. One must call it

witchcraft-life because, while it involves magick and the psychic, it is theologically a Christian derivative with Kabbalistic elements....The most obvious manifestations of the powwow power are the many colorful **hex signs** on the farmhouses in Eastern Pennsylvania. Each sign is a circle; within the circle are birds, hexagonal stars, *etc.*

“Powwowers are, in essence, Christianized **witches** working in the agricultural society of the Pennsylvania Dutch. They have a **grimoire** (a book of **spells** and **magical** procedures)...and they are as feared for the ability to **hex** as they are liked and sought after for their ability to heal.”

Grimoire is a “name applied to any book on **black magic** which pretends to teach the practice of black magic, especially the art of the **evocation of evil spirits** and making an alliance with them.” Another resource states that the grimoire is “a book containing formulas for **calling up and controlling demonic beings**. A manual of ceremonial magic.”

Of course, there is no such thing as “**Christianized** witches” for the Bible clearly states that no one who practices witchcraft will go to heaven.

“Now the works of the flesh are manifest, which are these; Adultery, fornication, uncleanness, lasciviousness, Idolatry, **witchcraft**, hatred, variance, emulations, wrath, strife, seditions, heresies, Envyings, murders, drunkenness, revellings, and such like: of the which I tell you before, as I have also told you in time past, that they which do such things **shall not inherit the kingdom of God**” (Galatians 5:19-21).

“But the fearful, and unbelieving, and the abominable, and murderers, and whoremongers, and **sorcerers**, and idolaters, and all liars, shall have their part in the lake which burneth with fire and brimstone: which is the second death” (Revelation 21:8).

Many other amulets and talismans are used to supposedly protect an individual from the evil eye.

Earlier we mentioned that the **Blazing Star** was connected to the all-seeing eye. Well, in a Masonic bulletin on the Blazing Star we are told that it is a “**hex sign.**” Interesting!

One author reports:

“One of the oldest, and most important symbols of Masonry is the Egyptian hieroglyph of the eye—or the ‘evil eye.’ It represents their god Osiris. It dominates the top of most Masonic documents, and now dominates the back of the Great Seal of the United States...its presence on the Great Seal suggests that secret societies were instrumental in creating the new nation of America, and still have an important influence in the present day.”

Not only does the Great Seal of the United States sport an all-seeing eye but so does our dollar bill. We’ve already covered some of the Masonic symbolism in the dollar bill in the last chapter.

What does the United Nations Meditation Room, the Egyptian Pyramids, The Temple of Understanding, and the Prayer Room in the United States Capitol have in common with the Great Seal of the United States? The all-seeing eye, of course!

Since this all-seeing eye represents the third eye of occultists and New Agers, as well as Masons, it’s no wonder that we see an increase in the widespread use of single eye designs. One author wrote:

“Perhaps not coincidental is the recent commercial for an ‘Eos’ (meaning ‘dawn’ in Greek) camera which zooms in close on only one of the sports figure’s eyes. There are also recent television ads (e.g., by Glidden Paint) that focus on one eye (the left eye) for a long time.”

“Concerning the New Age, one will increasingly see figures showing or emphasizing only one of their eyes on television ads, or on magazine covers, *etc.* In esoteric or occult terms, the right eye represents Osiris (the male) and the left eye represents Isis (the female). A single eye, indistinguishable as left or right, represents the All-Seeing Eye (Horus Hawk from Egypt). In the last few months, covering just over a year, Time magazine has had 10 covers with single eyes prominent. Secretary of Education Lamar Alexander on the 9/16/91, Ted Turner 1/6/92, Susan Faludi 3/9/92, Ross Perot 6/29/92, Kevin Buchberger with a caption ‘come out of the darkness’ 7/6/92, Bill Clinton 1/4/93, Zoe Baird 2/1/93, Cyberpunk 2/8/93, Boris Yeltsin 3/29/93, and ‘The Info Highway’ 4/12/93. Also see Ross Perot on Newsweek’s cover 4/27/92.

“It is noteworthy that Ted Turner (1990 Humanist of the Year) is on one of the covers with only one eye showing, because June 14, 1986 when addressing about 1000 ‘futurists’ at John Denver’s Windstar Institute, Turner said at Snowmass Village, Colorado, that ‘America must elect a “new age” president if it wants to survive through the year 2000’ (according to ‘Broadcaster Ties Survival to “New Age” President,’ The Denver Post, June 15, 1986).” [Emphasis in the original]

Other magazine covers with single eyes (or an emphasis on one eye) are: *Science Digest* (March 1981), *Time* (April 26, 1993, May 17, 1993, and June 14, 1993), and *Discover*. There are also books such as *The Illuminatus! Trilogy*, *The*

Unschooled Mind, and *Multiple Intelligences* that have a single eye on the cover.

It is interesting to note that Time Warner's logo is an all-seeing eye. It was Time Warner who made a seven year, \$80 million deal with Madonna in 1992. They also published her filthy, pornographic book.

A report put out in 1995 said that in 1994 there were 14,313 sex incidents, 8,333 violence incidents and 23,556 profanity incidents on primetime TV. One of the top twelve sponsors for this trash was none other than Time Warner.

They also fund the Council on Foreign Relations, a one world order organization. Time Warner gave \$1 million (or more) to the New American Schools Development Corporation. Additionally, they gave \$100,000 or more to the Points of Light Foundation.

“The Points of Light Foundation was begun with a \$5 million grant from the U.S. Congress and the President. Its first chairman was J. Richard Munro, formerly the chairman of Time Warner, Inc....

“Not surprisingly, the logo for the Points of Light Foundation is also of an occultic nature. It depicts the golden sun disk with what at first glance appears to be a torch of light within. But wait, is it not the concealed image of two entities, a male and a female, facing each other? Occultic philosophers can easily recognize these two as the Sun God and his Goddess.”

Of course, the interest in the eye goes back many centuries.

Dr. Dennis Cuddy writes:

Dr. Dennis Cuddy writes.

“Both King Henry VII and his granddaughter, Queen Elizabeth I (Queen of England, 1558-1603), used the ‘phoenix’ as one of their badges. Queen Elizabeth I (to whom President Bush is related) was also fascinated by men’s eyes....Favored servants of the queen signed their letters to her with symbolic eyes...and John Dee (who headed the British espionage network) signed himself ‘007.’ Dee, an acquaintance of the queen’s husband (the Earl of Leicester), was an alchemist, astrologer, psychic, and spy. According to *Mind Wars* (1984) by Ron McRae (former associate of columnist Jack Anderson), the basis for his ‘007’ signature was: *‘Each zero representing an eye and the seven being the sum of two eyes, four other senses, and last, mystical knowledge from “the nine” spirits (muses) who spoke through Dee’s crystal ball, the “shew stone.”*”

Dee credited the nine and his shew stone with uncovering a Spanish plot to burn the forests that provided wood for English shipbuilding. Whatever the source, the plot was real. Had it succeeded, the Spanish Armada might have sailed unopposed in 1588.” [Emphasis in the original]

In *The Eye* Queen Elizabeth’s garment is described in detail. We are told: “The sumptuous robe of Elizabeth I is embroidered a remarkable **SERPENT** upon the sleeve, and a deft scattering of **EYES** and ears elsewhere, no doubt to signify that nothing escaped the attention of the Virgin Queen, our English Diana.”

In Masonry, the symbol of the all-seeing eye can be disguised by the use of other symbols. *Ancient Operative Masonry* reveals: “**Instead of the ever-watching eye**, you at times behold the **square and compass** and the **letter ‘G’** floating in a spiritual light which words cannot describe. These visions are but glimpses of the human Ego which is veiled from the eyes of the profane.” We’ve covered these symbols elsewhere in this book, but when these symbols are seen, remember that a Satanic all-seeing eye stands behind them!

Below are a few more illustrations which use the all-seeing or single eye.

21.

SYMBOLS IN BRIEF

Many people think that the Ouija Board is just a “game” to be played. However, this is not the case. It is used by spirit mediums and others to contact the spirit world. Using this board can bring people in contact with demons. The planchette is controlled by demonic entities to spell out messages from the spirit world. The idea of the ouija board is not new. Some boards were in use six centuries before Christ.

A werewolf is a man who can change himself temporarily into a wolf.

The mermaid is a mythological creature that is half-female and half fish. You encounter mermaids in fairy tales and elsewhere. The movie *Splash* popularized the mermaid.

“The pa kua is made up of eight combinations of solid and broken lines, the solid line representing symbolically the yang or male principle, and the broken line the yin or female principle. To each pair a third is added, representing the result of union, that is, offspring. The eight figures are arranged about a t' ai chi, or aboriginal One, forming the first of the 24 circles on the divining board....”
[Emphasis in the original]

“PENTACLE OF THE GODDESS. With its five points— spirit, air, fire, water, and earth—the pentacle is the embodiment power and perfection. Like the endless circle, it binds negative elements and denotes good luck,” [Emphasis in the original] claims catalog which sells this pentacle.

A. PENTACLE OF
THE GODDESS.
With its five
points—spirit, air,
fire, water, and
earth—the pentacle is
the embodiment of
power and perfection.
Like the endless cir-
cle, it binds negative
elements and denotes
good luck. Our intri-
cate, double-sided pen-
dant is crafted of pol-
ished pewter and hangs
gracefully from a 30"
black nylon cord.

A spiral is an ancient goddess emblem symbolizing the universal pattern of growth in Nature.

An occult catalog advertises one of their products like this:

“The Eleven-Pointed Star symbolizes the Divine Will expressing itself through humanity. This magically-correct design fuses elementary and planetary forces, enabling you to alchemically accomplish the Great Work.” [Emphasis in the original]

A similar-looking design is called the unicursal hexagram which is also called the Aquarian Star. It “is used to channel psychic energy. It’s (sic) function is to connect earth-plane consciousness to the infinite universal mind.” It was designed by Satanist and 33° Mason, Aleister Crowley, and was the symbol of his Order of the Silver Star (Astrum Argentum or AA).

The “magic hand amulet” is supposed to protect the wearer’s destiny and is considered to be “the ultimate goodluck (sic) **charm**.”

The hand was important in occultism. For instance, the hand of glory was “a hand cut off from a criminal, who had been hanged on a gibbet. In the Middle

Ages, such a hand, dried and steeped in various salts, was used in **spells.**”

One occult catalog states:

“The hand is a universal symbol of healing, giving, blessing—and good luck because it wards off the ‘evil eye.’...Wear the Palm Chakra Hand to stimulate higher consciousness; wear the Heart Hand to increase love flowing from and to you.”

“When the eyes are situated in the hand, for example, by association with the symbolism of the hand they come to denote **clairvoyant** action. An excessive number of eyes has an ambivalent significance which it is important to note.”

Below is another hand that was “connected with the old Rites of the *Mater Deorum*.” [Emphasis in the original] The pine cone “was an important symbol in the Mysteries of Ceres, as also in those of Bacchus. It has descended thence to the Secret Orders of modern times.”

Earlier we discussed May Day and the Maypole. There are also peace poles. *Meditation* newsletter states:

“Peace Poles are obelisks inscribed with the message ‘May Peace Prevail on Earth.’ They have been dedicated the world over as an international symbol of peace. Their purpose is to spread the message of peace and act as a constant reminder of the necessity to wish and pray for peace at all times.”

Remember, obelisks are phallic symbols, but this is the object that’s been chosen to help promote peace.

The Tree of Life is used in magic and the Cabala. It is:

“A design consisting of ten points (SEPHIRA) linked by twenty-two lines, taken as a model of the creative emanations from the Godhead. Used for elaborate metaphysical speculations, psychological exercises, and ceremonial magic.”

The Celtic Knot's "loops symbolize **Infinity, good luck, and the harmony** between peoples of the world."

The hypno-disc is used for hypnosis. "Achieve the hypnotic state in shortest

possible time,” says the ad.

The symbol below is called a veve and is used in Voudoun (or Voodoo) rites to summon the loa (demonic spirits that possess voodoo worshippers). This particular veve is for Baron Samedi, the Lord of the Graveyards and Death.

“The ecology symbol is seen almost everywhere since it has been foisted on the unsuspecting people of America just after the demonic revolution days of the 1960’s which served as the springboard for the ‘Age of Aquarius’ or the last generation. The symbol is a circle with a diagonal line through it and means ‘God Sleeps.’...The ‘God Sleeps’ concept is the primary doctrine of ‘Deism,’ a religion that was embraced by such famous men as Benjamin Franklin and Thomas Jefferson. Their doctrine states that, ‘God, the Supreme Architect of the Universe created all things,’ but then isolated Himself from the entire creation and lets it operate on its own.’ This is the very essence of the teachings of

Freemasonry. Most people never look beyond the surface of anything. That is why we have this blasphemous Masonic symbol on our roadways, in our parks, in public buildings and even in churches.”

The skull necklace shown below was advertised with these words:

“An interesting symbol, the skull...it is an emblem of the mortality of man, yet it is in truth that which survives of the living being once its body has been destroyed. It is prominent in **WITCHCRAFT and DEMON WORSHIP** as a celebration of death. Our skull has a movable jaw, on a triangle...and makes a fascinating, macabre ornament for those who dare to be different.”

Another necklace is the Baphomet necklace.

“Called the God of the Witches, he is said to possess the wisdom of God. This is a most popular symbol, sometimes called the Goat of Nedes or the Sabbatic Goat. It is a **sacred witchcraft** sysmbol (sic), and no witch, warlock, or unique amulet collector should be with[out] this....”

The man in the moon necklace below is labeled as “Jewelry of the Occult!”

The Islamic religion uses the crescent star and moon for their symbol. This emblem can be seen on many of the Islamic nations' flags.

The Islamic God is called Allah. He was the moon god, who married the sun goddess. “Together they produced three goddesses who were called ‘the daughters of Allah.’ These three goddesses were called Al-Lat, Al-Uzza, and Manat.” The *Encyclopedia of Religion* mentions that “‘Allah’ is a pre-Islamic name...corresponding to the Babylonian Bel.” The symbol for Allah appears below.

The Islamic holy book is called the Koran (or Quran). This symbol looks like this:

Om (or Aum) is often used as a mantra for meditation. It signifies the Hindu pagan trinity of Brahma, Vishnu and Shiva. The Om symbols below are also used for Brahman, the impersonal god of the Hindus.

The goddess Isis sometimes wears a crown with a solar disk and at other times she wears horns. The symbol below shows the disk and the horns combined.

God's Eye (or Ojo de Dios) is an emblem used for enchantment and the worship of pagan deities. "With the work of the forces of the spirit world, the worshipper of the deities (sic) calls (chants) to the supernatural, and the demon spirits bring into being whatever the chanter is seeking."

Another symbol associated with the eye is the Rx sign. In *Healing Without Medicine* we find:

"In one aspect of modern medicine Egyptian magic continues to be practiced to the present day. When the 20th-century doctor writes out a prescription he prefaces it with the sign Rx. He may think this is an abbreviation of the Latin word *recipe*, but he will be wrong. It is a simplified form of the **Egyptian hieroglyph for the Eye of Horus**—a symbol familiar as a jewel among the treasures of Tutankamun.

"This symbol derives its power from the myth of death and resurrection of the

god Osiris. The myth says that after Osiris had been treacherously murdered, his son Horus set out to avenge his death. In the course of the long struggle one of his eyes was plucked out. This was eventually restored by Thoth, the god of wisdom, and came to be linked with the art of healing. Roman physicians introduced Egyptian symbols into their prescriptions to impress their patients, and the eye of Horus was one.... Over the centuries the outline was modified until it became the simpler symbol we know today. **Unwittingly**, then, even the most orthodox of **today's doctors make use of a magic sign.**"

The “triple sceptre of the Nile” can be seen in several of the Egyptian gods’ hands. The triple sceptre comprises the flail (or whip), the shepherd’s crook, and the Anubis-headed staff. This triple sceptre represented the powers which an Initiate had mastered.

“With the Whip he had subjugated his physical body; with the Shepherd’s Crook he was the guardian and keeper of his emotional body; with the Anubis-headed Staff he was master of his mind and worthy to wield the powers of government over others because, first of all, he obeyed the laws himself.”

Ptah

Osiris

Below are several more representations of gods and goddesses (some in picture form and some only identified by a symbol).

Buddha's footprints*

Initiation

Wisdom

Cosmic Consciousness

Tree of Death

Earth

*Eight-pointed
Star*

Chimera (a mythological creature)

As stated at the beginning of this book, there are many other symbols that could have been added but those shown and explained here will give you a good idea about many symbols that have not been included. How many of these symbols have YOU been using unknowingly?

Christ has a bride, the church, which is supposed to be holy. Paul refers to this bride in Ephesians 5:25-27: “Christ also loved the church, and gave Himself for it; That He might sanctify and cleanse it with the washing of water by the word, That He might present it to Himself a glorious church, not having spot, or wrinkle, or any such thing; but that it should be holy and without blemish.” The Antichrist, too, will have a bride, but instead of being pure spotless, she will be a whore (Revelation 17:1, 15, 16).

Are you waiting for Christ or the Antichrist? Which person you following? Are

you professing to be a Christian while using paraphernalia, amulets, talismans, jewelry, runes, etc., of Satan? ho are you depending on for your protection? Do you think you need Satan's devices to supposedly keep evil away from you and your family or are you resting securely in Christ? "The angel of the Lord encampeth round about them that fear him, and delivereth them" (Psalm 34:7). "I sought the Lord, and He heard me, and delivered me from all my fears" (Psalm 34:4). "Every word of God is pure: He is a shield unto them that put their trust in Him" (Proverbs 30:5).

If you claim you are following Christ, does your life match your profession? We are admonished by Peter: "But as He which hath called you is holy, so be ye holy in all manner of conversation" (I Peter 1:15). "The fruit of the Spirit is love, joy, peace, longsuffering, gentleness, goodness, faith, Meekness, temperance" (Galatians 5:22-23). On the other hand, the fruits of the flesh are:

"Adultery, fornication, uncleanness, lasciviousness, Idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies, Envyings, murders, drunkenness, revellings, and such like: of the which I tell you before, as I have also told you in time past, that they which do such things shall not inherit the kingdom of God" (Galatians 5:19b-21).

"In this the children of God are manifest, and the children of the devil: **whosoever doeth not righteousness is not of God**, neither he that loveth not his brother" (1 John 3:10). "They that are Christ's have crucified the flesh with the affections and lusts" (Galatians 5:24). Does your life reflect the fruits of the Spirit?

Regardless of what man may say, the Bible is our final authority. No church can save you. Only Jesus Christ can do that. Even though you may be a moral and honest person, if you have never invited Christ into your heart as your own **PERSONAL** Savior, you, too, need to repent. Maybe you are not committing a blatant sin, but the Bible tells us that "**ALL** have sinned and come short of the glory of God" (Romans 3:23). The "**ALL**" includes both you and me, and "the wages of sin is [eternal] death; but the gift of God is eternal life through Jesus Christ our Lord" (Romans 6:23). God's gift to us is eternal life, but we must accept this gift to make the transaction valid. If I had a gift to give to you and you refused to accept it, that gift would do you no good. You must **RECEIVE** this gift for it to become effective.

Even though **ALL** of us are born in sin, the good news is that “Christ Jesus came into the world to save sinners” (I Timothy 1:15). If you have never accepted Christ as your **PERSONAL** Savior and would like to do so, the first step is to be born again. John 3:3 emphasizes: “**EXCEPT** a man be born **AGAIN**, he **CANNOT** see the kingdom of God.” How can one be born **AGAIN**? We all know that we were born once, our physical birth, but can we enter into our mother’s womb and be born the second time (see John 3:1-17)? No. The second birth comes by being born into the family of God. John 3:16: “For God so **LOVED** the world [that includes **YOU!**] that He **GAVE** His only Begotten Son, that **WHOSOEVER** [that includes **YOU**] **BELIEVETH** [trusts, clings to, relies on] Him [God’s Son, Jesus] should not perish [in hell], but have everlasting life.”

All you need to do is sincerely believe with all your heart that Jesus is the Son of God and to be willing to turn from your sins, whatever they are—big or small. Ask Jesus to come into your heart and help you to live for Him, and He **WILL** do it. “He that covereth his sins shall not prosper: but whoso **CONFESSETH AND FORSAKETH** them shall have mercy” (Proverbs 28:13). John 6:37 promises: “Him that cometh to Me I will **IN NO WISE** cast out.” Romans 10:9 states: “If thou shalt **CONFESS** with thy mouth the Lord Jesus, and shalt **BELIEVE** in thine heart that God hath raised Him from the dead, thou **SHALT** be saved [born again].”

If you would like to be born again, pray your own prayer or sincerely pray the following: *Dear Jesus, I realize that I am a sinner. I believe that You died for my sins. Please forgive me of my past sins and come into my heart. Save me for Your sake, and help me to live for You. I ask this in Your name. Amen.*

If you sincerely prayed and asked Jesus to forgive you of your sins, you will have the assurance that you are now a child of God. John 1:12 reveals: “But **AS MANY AS RECEIVED HIM**, to them gave He power to become the sons of God, even to them that **BELIEVE** on His name.” Read your Bible **EVERY** day (start with book of John), and find a Bible-believing church where you can Worship God with other born again believers.

“Therefore being justified by faith, we have peace with God through our Lord Jesus Christ” (Romans 5:1), “and the peace of God, which passeth all understanding, shall keep your hearts and minds through Christ Jesus” (Philippians 4:7). “If the Son [Jesus Christ] therefore shall make you free, ye shall be free indeed” (John 8:36).

There are three truths.
One truth corresponds to facts.
Another truth harmonizes with a system of beliefs.
And a third truth depends on you.

1

Shepherd Kings

Despite being the foundational books of the Old Testament, no specific references to contemporary events in the Middle East are recorded in Genesis and Exodus. No Pharaohs are identified by name in the sagas of the so-called Hebrew Patriarchs, though numerous incidental characters are. Two centuries of archeological digs have not unearthed a single Hebrew artifact in Egypt; and nowhere in the extraordinarily detailed Egyptian archives of the period are Hebrews even mentioned.

Traditionally, “Hebrew” and “Israelite” are interchangeable. The earliest reference to Israel is found on a stone pillar commemorating Pharaoh Merneptah’s military campaign in Canaan around 1200 BC – “Israel is laid waste, his seed is not” – and relates to a group of people living in Canaan, *not* in Egypt. No mention of Israelites *in* Egypt exists anywhere.

Ostensibly, then, the core narrative of monotheistic religion and the seminal creed of western civilization – the ancient Israelites migrate from Canaan to Egypt; are enslaved for 400 years; and are liberated by Moses after a series of spectacular events – is pure fiction.

But is it?

The Final Deception

The Stele of Merneptah, Egyptian Museum, Cairo.

Matching recent archeological finds with previously uncorroborated details from ancient texts, an increasing number of researchers have come to believe the ancient Egyptians knew the Israelites by another name, chronicled their sojourn in Egypt, and did not consider them Hebrews.

So who were the Israelites?

Israelites

According to Genesis, the term 'Israel' originates from a *malakhim*, which means “messenger” in ancient Hebrew, but is translated as *angelos* (angel) in the Greek version of the Old Testament. After wrestling with Jacob at the Ford of Jabok ([Gen 32:22-28](#)), the ‘angel’ renames him “Israel,” literally “he who struggles with El” (*El* being the Canaanite word to express the

Shepherd Kings

concept of divinity). Jacob is described as the son of Isaac, and the grandson of Abraham, who we shall return to later. But in the Bible, “Israelites” refers only to Jacob’s lineal descendants.

To escape famine in Canaan, Jacob brings the Israelite clan south to Egypt, where he is reunited with his long lost favorite son, Joseph, who happens to be the Grand Vizier of Egypt, the second most powerful man in the world. Once in Egypt, “Israel settled in the region of Goshen; and they gained possessions in it, and were fruitful and multiplied exceedingly.” (Gen 47:27)

Map of the Nile Delta

Goshen is significant because it is located in the Nile Delta, where archeologists have long been excavating the ancient city of Avaris, capital to the Pharaohs of the Fifteenth Dynasty (1670 - 1550 BC), who ruled Egypt from the north without control of the entire land. Several impressions on clay documents made from a seal ring, in the shape of a scarab, have been found at Avaris bearing the name *Yacov Hr* (Jacob Hr). An Egyptian royal cartouche, which is an image of a circle of reeds surrounding the name, signifies that the owner of the seal-ring was a royal or high-ranking figure.

A papyrus dating from the era of Rameses II (1297-1213 BC), known as the Turin Kings List after the museum where it is

The Final Deception

located, is a compilation of all the names and chronologies of all the rulers of Egypt. Six kings of the Fifteenth Dynasty (often omitted from other king lists) are named, who ruled for a total of 108 years. A hieroglyphic sign indicates that they were all foreigners. One of kings is named “Jacob Hr.”

The Turin King's List, *Museo Egizio*, Turin

The name *Jacob Hr* follows the typical pattern of a “statement” name, which is composed of a verb plus a divine name, used throughout the ancient world to invoke and display the protection of a particular deity. *Michael*, *Samuel*, and *Gabriel*, are examples of statement names from the Bible that include *El*.

In several ancient Middle Eastern languages *Hr* means “mountain” or “rock,” words commonly used as synonyms for a deity. For example, Isaiah 26:4 states “For in God we have an everlasting rock.” In effect, *Hr* has an identical meaning to *El*. So the name ‘Jacob’ is a shortened form of the original statement name, Jacob *El*, which is the same as Jacob *Hr*.

Numerous other *Yacov Hr* scarabs, without the royal cartouche, have been found elsewhere in Egypt, Sudan, and Palestine, all dating to the middle and late 17th century BC. No scarabs dated from outside this time period have been found in Egypt.

Shepherd Kings

In the center of this scarab beetle-shaped royal seal, the hieroglyphics spell out the name **Y'qb-HR**, which is the Egyptian transliteration of Yaqub, or “Jacob.”

The discovery of numerous similar seals attests to a widespread usage of the name **Jacob** during the first half of the second millennium BC.

The name is subsequently absent from later archives for over a thousand years.

In 1969, another royal scarab of *Jacob Hr* was found inside a mid-eighteenth century tomb in Haifa, modern Israel, dated approximately 80 years before the Fifteenth Pharaonic Dynasty began. If this *Jacob Hr* was a local Canaanite ruler, in accordance with the biblical description of Jacob, then the later Avaris *Jacob Hr* scarab would have belonged to one of his successors. The name Jacob appears on no artifacts between the end of the Fifteenth Dynasty and the third century BC, while the name of Israel does, which supports the biblical claim that the name of Jacob was changed to Israel.

Historians, archeologists, and Egyptologists identify these foreigner rulers of Egypt as the “Hyksos,” a mysterious people of ambiguous descent who continue to defy ethnic classification.

The Hyksos

Egyptian hieroglyphics that represent Hyksos Pharaohs include a shepherd's staff and a crown, which lends credence to the notion, still prevalent in the region, that

The Final Deception

contemporaries nicknamed the Hyksos, “Shepherd Kings,” as their name translates in Arabic. Writing in the aftermath of the destruction of Jerusalem in 70 AD, the Jewish priest-historian, Josephus, breaks down the etymology of “Hyksos” to literally mean “shepherd kings,” the name by which the Hyksos are known by the third century BC Egyptian priest-chronicler Manetho, and the second century AD Christian historian, Julius Africanus.

Modern philologists explain the Greek word *Hyksos* derives from the Egyptian expression *heka khasewet* meaning “rulers of foreign lands,” a phrase used to refer to Phoenicians and other foreign groups at different times, which implies the Hyksos were trans-national. Although the origin of the name remains unclear, “Hyksos” is thought to refer only to the leadership, and not to the foreigners as a whole, who the Egyptians knew as *amu*, which is usually translated as “Asiatics.”

Clearly, the Hyksos Pharaohs were not pastoral farmers, but curiously enough, from the initial dynasty of Abraham, Isaac, and Jacob to the shepherd boy king David, the Old Testament describes almost every central character in Israelite history as a “shepherd.”

The traditional image of Abraham – strolling across the landscape, shepherd’s staff in hand, tending to his animals – lacks credibility. As it is unambiguously communicated in Genesis, he travels with an armed retinue, leads armies into military campaigns, and is received personally by kings and Pharaohs. Quoting from earlier sources, Josephus writes in his *Antiquities of the Jews*,

Abraham reigned at Damascus (Harran), where he was a foreigner, having come with an army out of the land above Babylon....after a long time, the Lord got him up and removed him from that country together with his men and he went to the land then called Canaan but now the land of Judea.”

Shepherd Kings

Abraham and Sarah (above left) watch their favorite son, and future shepherd, Isaac. As will become clear later, Sarah's "lyre" is a symbol loaded with meaning.

David (above right) is the youth who became the "shepherd king" of Israel.

Jacob, shepherd (left), and founder of the Israelite nation, with his wife, Rachel, the shepherdess.

Patently, Abraham was no simple farmer. He was a major power broker in the region with huge financial resources and considerable political and military clout. What, then, is the significance of the recurring shepherd motif?

According to Genesis, before receiving his "divine call" at Harran (modern Turkey), Abraham lived in Ur, heartland of ancient Sumer (**Gen 11:31**), now Iraq. The Sumerians were the dominant cultural group of the entire Middle East from the beginning of the fourth millennium BC to the end of the third millennium BC. Not unlike the Hyksos, Sumerians origins are murky; their racial and linguistic affiliations remain unclassifiable, but their religious concepts profoundly influenced all the peoples of the Near East.

No explanation is given in the Bible for leaving Ur, but most biblical historians accept that Abraham's departure from Sumer

The Final Deception

coincided with its imminent collapse some time before 2000BC. In the past, it was assumed he was a Semitic exile living in Sumer, but nothing in the Bible suggests Abraham was a returning immigrant. On the contrary, Abraham emerges as the uprooted scion of an elite family involved in Sumerian affairs of state.

Journey of Abraham

Since he is described as a son of “Terah,” which translates as a type of shamanic priest, Abraham was a member of the hereditary Sumerian priesthood. He was also of royal blood, having married his half-sister, Sarah, who was a princess (*Sarai*), according to Sumerian custom. His apparent transformation from a Sumerian dignitary to a Semitic noble is recorded in Genesis through a process of name change from the Sumerian *Abram* (Father’s beloved”) to the Semitic *Abraham* (“Father of many nations”).

From votive inscriptions found at Nippur, the religious center of Sumer, we know the kings of Ur prized the title ‘Pious Shepherd,’ and performed priestly functions there. Sumerian king lists record the names of antediluvian “shepherds” who ascended to “heaven;” and countless cuneiform tablets refer to the enigmatic *Annunaki* gods of Sumer, Assyria, and Babylon as “shepherds.” Not only would Abraham have been steeped in Annunaki tradition, his legitimacy as a royal priest was based on the presumption of Annunaki blood descent, which purportedly inferred knowledge of the divine will.

Shepherd Kings

Dumuzi, the Annunaki shepherd god

Babylonian King Hammurabi (1792-1750 BC), in the prologue to his famous law code, declares that he has been chosen by the chief god of the city of Babylon, *Marduk*, to tend to the needs of the people on the god's behalf:

I Hammurabi, the shepherd, have gathered abundance and plenty, have stormed the four quarters of the world, have magnified the fame of Babylon, and have elated the mind of Marduk my Lord.

This assertion of divine appointment as “shepherd” reinforces the political reality by divine mandate. The Annunaki god entrusts his flock to Hammurabi, the shepherd of his people: a metaphor which implies not two, but three parties, as a shepherd is usually employed by the owner of the sheep. The impression implied by kings who present themselves as a good shepherd is, at its foundation, not one of a caretaker lovingly caring for those in need, as in the stylized representation, but a strictly hierarchical administrative relationship between the gods and the king employed by them.

Around the turn of the third millennium BC Egypt experienced an influx of immigrants as a result of the relaxation of the immigration laws. One well preserved mural from the tomb of a Twelfth Dynasty official shows a group of bearded Asiatic people entering Egypt about 1900 BC. Reminiscent of the biblical Joseph (great-grandson of Abraham) and his famous “coat of many colors,” the foreign visitors are distinguished by their multi-

The Final Deception

colored striped robes, in contrast to the customary all-white Egyptian attire.

Scene from the tomb of Khnumhotep in Beni Hasan, depicting a group of foreign traders entering Egypt. The Hyksos hieroglyph is highlighted.

Populations that settled in the North of Egypt formed a community occupying the Delta region, which became a power base for the Hyksos and their allies. As the central power of the Twelfth Dynasty Pharaohs decreased, the Hyksos gradually insinuated themselves into strategic positions. By the mid-seventeenth century BC, the Hyksos had systematically imposed their hegemony over the Nile Delta and Middle Egypt, a state of affairs famously alluded to in Exodus 1:7, “the Israelites multiplied and grew exceedingly strong.” South Egypt remained under the control of the Pharaonic dynasty in Thebes, which reached a begrudged accommodation with the “Asiatics” in the North.

As no evidence exists to support the typical scenario of an armed invasion and war of conquest, Egyptian chroniclers struggled to make sense of what happened. Surviving accounts, however, are unanimous in depicting Hyksos rule in a mold similar to the later Saxon, Vandal, and Viking raiders of Europe. A fragment from the priest-historian Manetho explains:

Shepherd Kings

...unexpectedly, from the regions of the East, invaders of obscure race marched in confidence of victory against our land. By main force they easily overpowered the rulers of the land, they then burned our cities ruthlessly, razed to the ground the temples of the gods, and treated all the natives with a cruel hostility, massacring some and leading into slavery the wives and children of others.

Far from being the bearers of an exclusive religion, the Hyksos seem to have borrowed extensively from the Egyptian; even a temple from the flourishing contemporary Minoan culture has been found by excavators at the Avaris site. Yet if Hyksos administration appears to have been tolerated, it was also deeply resented by most Egyptians. As quoted by Josephus, Manetho assessed the period of Hyksos domination as a measured genocide, “who were all along making war with the Egyptians, and were very desirous gradually to destroy them to the very roots.”

Wall relief from a Minoan Temple found at Avaris

When Hyksos rule collapsed, all traces of their occupation were eradicated. Future generations would evoke memories of the dreaded Hyksos whenever a foreign threat was real or imagined. This hostility is evidenced in the Bible when Joseph advises his father and brothers to hide their true identity from the Pharaoh because “shepherds are an abomination to the Egyptians” ([Gen 46:34](#)).

The Final Deception

Until the 2009 discovery at Avaris of a cuneiform tablet (right) with formal diplomatic language (dated 1600 BC-1550 BC) confirmed contact between the Hyksos regime and the Babylonian “shepherd” kings, Egyptologists had hitherto denied any relationship between Egypt and Babylon during the second millennium BC.

Hyksos rulers are known to have interacted with fellow Hyksos outside Egypt, but this cuneiform tablet indicates that Hyksos political diplomacy was much more organized and extensive than had been previously assumed.

Reversal of Fortune

Around 1560 BC, the Theban rulers of the south began a protracted war on the Hyksos. Eventually Pharaoh Ahmose I was successful in driving them out of Avaris in 1550 BC. Archeological evidence suggests that the city was abandoned, rather than destroyed. Ahmose chased them to Sharuhén, a Hyksos stronghold in southern Canaan, where, after a three year siege, he was again victorious.

Pharaoh Ahmose drives the Hyksos out of Egypt

Shepherd Kings

Details of Ahmose I's military campaigns are known from an account written on the walls of a soldier's tomb. In the fighting around Avaris, Hyksos prisoners were taken and enslaved,

Then Avaris was despoiled. Then I carried off spoil from there: one man, three women, a total of four persons. Then his majesty gave them to me to be slaves.

As Exodus 1:8 implies, Ahmose I belonged to a different ancestry; “there arose a new king over Egypt, who did not know Joseph.” Payback was inevitable, and the roles were reversed. Having enslaved the Egyptians, the Hyksos were themselves enslaved, “they (the Egyptians) made the people of Israel serve with rigor, and made their lives bitter with hard service (Ex 1:13).”

Numerous alphabetic inscriptions, found in mountain caves and on pottery fragments near Serabit el-Khadim in the Sinai Peninsula, where slaves dug for turquoise, date from the period 1550-1450 BC. The script, known as Proto-Sinaitic among scholars, has proved difficult to translate, but the name *El* appears in several places (“O, El save me from these mines”).

Found at Serabit el-Khadim, Sinai Peninsula, dated c 1500 BC.
The figure “8” unclosed at the top, and the diagonal line beneath

The Final Deception

translate as “El,” or “god.”

In Egyptian society, few could read and write hieroglyphic symbols let alone alphabetic script. And in the absence of any other suitable candidates, knowledge of lettering would surely have belonged to literate Hyksos slaves captured during the war, and doubtless proved a useful administrative tool. Manetho, as again quoted by Josephus, records that slaves from the mines were later relocated to the Avaris site:

Those sent to work in the quarries lived miserably for a long while, and the king was asked to set apart the city Avaris, which the shepherds had left, for their habitation and protection; and he granted them their wish.

Likewise, Exodus 1:11 states:

The Egyptians set taskmasters over them to afflict them with heavy burdens; and they built for Pharaoh store-cities, Pithom and Rameses.

Rameses was the name given to a city built by Pharaoh Rameses II in the eastern Nile Delta in the 13th century BC. For their own reasons, biblical scribes use this name instead of the historically apt one. Today, archeologists agree that the location and original name of Rameses is Avaris.

Both sides record the same events only from diametrically opposed viewpoints. Hence compilers of the Bible associate the former Hyksos capital with Israelite slaves, and Egyptian chroniclers link the former Hyksos capital with Hyksos slaves. Heroes in the Bible are “shepherds,” and in Egyptian accounts, villains are “shepherds.”

For obvious reasons, students at theological seminaries are not taught the ancient Israelites were the Hyksos, and Bible commentaries do not identify Old Testament Patriarchs as Hyksos Pharaohs. For the priestly intellectual Josephus, however, Hyksos descent was nothing to conceal.

Shepherd Kings

In a bold and unequivocal affirmation, unsurprisingly missing from later rabbinic literature, which perpetuates the myth of the holy priest, Josephus writes,

Now Manetho, in another book of his says that “this nation, thus called shepherds, were also called captives in their sacred books.” And this account is the truth... these shepherds as they are here called, were none other than our forefathers, who were delivered out of Egypt.

The Exodus

Chronology is probably the greatest source of confusion and debate among Bible students. But it is generally overlooked that Israelite scribes insinuated esoteric or sectarian numerology into time periods of ‘dispensational’ significance. So periods of fasting, exile, prayers, flooding and so forth, are inevitably based on the number 40 or multiples thereof.

Whatever the underlying rationale, the earliest historical source for the sanctity of the number 40 derives from the cuneiform records of Sumer/Babylon, which describe 40 as the sacred number of Enki, who is characterized as one of the high ranking Annunaki. Babylonian astrologers record the Pleiadian star system’s 40 day disappearance from the constellation of Taurus as a period of rains, storms, floods and other dangers. The Pleiades’ return was a time of celebration, and a bundle of 40 reeds was burned to purify the 40 days of evil power. This tradition is thought to lie behind the later Roman custom of “quarantine” (from the Latin *quarantos* or ‘forty’).

In any event, since the entire exodus story is replete with examples of the number 40, to willfully interpret “400 years of Israelite slavery” or “40 years wandering in the desert” as literal time periods in order to calculate exact dates is futile.

Most modern scholars assume a mid-thirteenth century date for the exodus, not

The Final Deception

because overwhelming evidence exists to support that chronology, but mostly because the traditional mid-fifteenth century date advocated by Church Fathers does not match the accepted archeological timetable for the appearance of Israelites in Canaan.

According to Manetho, the Hyksos founded Jerusalem after being chased north by Ahmose I, but it appears Jerusalem was already a Hyksos enclave. Clay figurines, listing cities along major routes of travel, have been found in Egypt dated between 1800-1630 BC, and *urushalim*, a name for Jerusalem, is named. Known as “execration texts,” ancient Egyptians would inscribe these figurines with the names and locations of their enemies. After a ritual cursing, the figurines were smashed into pieces to break their enemies’ power.

After their expulsion, Hyksos factions returned periodically to raid inside Egypt. Professed to have been written by the Egyptian seer *Neferti*, the *Ermitage Papyrus* describes conditions prevailing in Egypt in the months before the reign of Amenhotep I (1526-1505 BC), and justifies his rise to power and subsequent actions.

A strange bird will breed in the Delta marsh,
Having made its nest beside the people (i.e. Egyptians)
The people having let it approach by default...
The land is bowed down in distress,
Owing to those feeders,
Asiatics who roam the land.
Foes have risen in the East,
Asiatics have come down to Egypt.

Amenhotep embarks on a military campaign to unite North and South Egypt, purge foreigners and foreign influences, and protect the borders from future incursion, “Asiatics will fall to his sword...rebels to his wrath, traitors to his might, as the serpent on his brow subdues the rebels for him. One will build the Walls-of-the-Ruler, To bar Asiatics from entering Egypt.”

A document at the Temple of Pharaoh Queen Hatshepsut (1479-1458 BC) at Speos Artemidos claims that the final eradication of the Hyksos menace occurred during her reign:

Shepherd Kings

Hear ye, all people and the folk as many as they may be, I have done these things through the counsel of my heart. I have not slept forgetfully, (but) I have restored that which had been ruined. I have raised up that which had gone to pieces formerly, since the Asiatics were in the midst of Avaris of the Northland, and vagabonds were in the midst of them, overthrowing that which had been made. They ruled without Ra, and he did not act by divide command down to (the reign of) my majesty.

For the duration of Queen Hatshepsut's reign, her stepson Tuthmosis III was co-regent. Nicknamed by modern historians as the “Napoleon of ancient Egypt,” Tuthmosis III was a warrior king who conducted at least seventeen military campaigns, and presided over the largest empire Egypt had ever seen. Detailed Egyptian topographical lists inscribed at the Temple of Karnak show cities named *Joseph El* and *Jacob El* in Canaan when Tuthmosis III was there about 1480BC. Facts that led prominent historian Donald Redford to theorize the Israelite departure from Egypt occurred a few generations earlier in conjunction with the Hyksos expulsion in 1550 BC.

Inscriptions at Karnak detail Tuthmosis III's campaigns in Canaan

The Final Deception

However, the Old Testament describes the evacuation of an oppressed slave population, *not* the overthrow and exile of a tyrannical regime. Therefore, if the biblical exodus is historical, the freed slaves are not the overthrown Hyksos administration, but rather descendants of captured Hyksos enslaved by their Egyptian conquerors. And since these slaves were still inside Egypt in 1480 BC, at least two distinct mass departures of Hyksos must have occurred, which were consolidated into one by later Israelite/Hyksos scribes.

Because Tuthmosis III collected tribute from Hyksos settlements in Canaan in 1480 BC, the biblical exodus must have taken place sometime between 1480 BC and the death of Queen Hatshepsut in 1458 BC. The notoriously stubborn and bizarrely anonymous Pharaoh from the Book of Exodus, who clashed with Moses, is therefore Tuthmosis III.

Interestingly, in his *Against Apion*, Josephus quotes Manetho, “After this people or shepherds had left Egypt to go to Jerusalem, Tethmosis (Tuthmosis III), who drove them out, was king of Egypt and reigned for twenty five years and four months, and then died.” Tuthmosis III died in 1450. Irrespective of Manetho’s personal spin on historical events, if his chronology is correct, then the biblical exodus probably took place in 1476 BC.

Moses

Because no physical evidence for his existence has ever been found, Moses is the Old Testament’s greatest mystery. Until recently, most Bible commentaries incorrectly stated the name ‘Moses’ is Egyptian for “saved out of water.” Moses simply means “born of,” and is used as a suffix in Pharaonic names, which were prefixed by a deity – Tuthmosis (born of Thoth), Rameses (born of Ra), Ahmose (born of Ah), and so on. Moses’ actual name would have included the epithet appropriate to his dynasty, with the component *Moses* (*Mosis*, *Mose*) suffixed.

The birth legend of Moses – the Pharaoh orders all Israelite male children thrown into the Nile; his mother puts him in a reed basket daubed with pitch; he is found by Pharaoh’s daughter – is almost certainly a fiction lifted from Sumerian tradition because it

Shepherd Kings

is identical to that of the King Sargon I, who founded the Sumero-Akkadian Dynasty about 2350 BC:

I am Sargon, the king of Akkad...my mother bore me in secret, she put me in a little box made of reeds, sealing its lid with pitch. She put me in the river...the river carried me away and brought me to Akki the drawer of water. Akki adopted me and brought me up as his son.

Moses, we are told, is raised in the Pharaoh's palace and becomes a leading general; his true identity secret until the day he reportedly kills an Egyptian taskmaster for abusing a Hebrew slave. Forced to flee Egypt, he escapes to the wilderness of Midian, where he marries a Midianite priest's daughter and lives, predictably, as a "shepherd" before receiving his divine mission via a burning bush. As Genesis explains Midian as the fourth son of Abraham by Keturah, after the death of his wife Sarah, Midianites had Sumerian roots.

Internecine strife between competing elites, royal and priestly, is a perpetual component of Pharaonic history, so it would be naïve to imagine all Hyksos living inside Egypt were rounded up and enslaved after the expulsion of 1550 BC. Doubtless many held influential positions incognito, particularly among the priesthood, and continued to pursue covert agendas to regain power. In reflecting this reality, the Moses story conceals the potentially embarrassing information that the savior of the Israelite nation was a Hyksos prince.

Soon after Hatshepsut's death, her statues were vandalized, her images were defaced, her hieroglyphs were scratched out, and the first female Pharaoh was deleted from Egyptian history. Hatshepsut would remain lost until, almost three thousand years later, Egyptologists reconstructed her damaged inscriptions and restored her to the historical record. Queen Hatshepsut was the eldest daughter of Tuthmosis I, and did not bear a son from her marriage to her half-brother, the succeeding Pharaoh Tuthmosis II.

Did Hatshepsut adopt or otherwise bring Moses into the royal family? Until Egyptologists can explain Tuthmosis III's

The Final Deception

animosity toward Hatshepsut, the possibility that he believed Hatshepsut had brought a Hyksos cuckoo into the nest cannot be discounted.

Vandalized statue of Queen Hatshepsut

Did Moses return from exile to free the Hyksos slaves? In a seemingly weird story that most scholars consider has no single origin but rather combines numerous historical episodes, Manetho claims that a renegade Egyptian priest named Osarseph organized a rebellion of Hyksos slaves in Avaris. Combining forces with an army of “lepers,” Osarseph forced the Pharaoh into exile, and instituted a thirteen year tyranny that is eventually overthrown when the unnamed Pharaoh returns. In a curious aside, usually dismissed as the anti-Jewish sentiment of an Arab editor, Manetho mentions that Osarseph later changed his name to Moses.

According to the Bible, the Pharaoh frees the Israelite slaves only after a succession of plagues convinces him that Moses, or rather a staff in Moses’ possession wields extraordinary powers. Notwithstanding its heavy stylization, the biblical narrative basically describes the same events as an Egyptian papyrus from the late thirteenth century BC. Known as the *Admonitions of Ipuwer*, it is copied from an earlier original document, the date of which is unknown and remains in dispute.

Shepherd Kings

The Ipuwer Papyrus, National Archaeological Museum, Leiden, Netherlands

Some scholars regard the *Ipuwer Papyrus* as a poetic lamentation of Hyksos rule over Egypt and a pessimistic description of its consequences; “forsooth, the desert is throughout the land. The nomes (districts) are laid to waste. A foreign tribe from abroad has come to Egypt.” Most Egyptologists prefer to interpret the *Ipuwer Papyrus* as an amalgam of literary archetypes with little, if any, historical value.

Table 1.

Ipuwer Papyrus	Book of Exodus
Indeed the river is blood, yet men drink of it. Men [shrink] from human beings and thirst for water.	Moses raised his staff...and all the water was changed into blood. The fish in the Nile died, and the river smelled so bad that the Egyptians could not drink its water. Blood was everywhere in Egypt.
Indeed, all animals, their hearts weep; cattle moan because of the state of the land.	All the livestock of the Egyptians died, but not one animal belonging to the Israelites died.
Indeed, gates, columns, and [walls] are burnt up... Behold, the fire has gone up on high, and its burning goes forth against the enemies of the land.	When Moses stretched out his staff toward the sky, the LORD sent thunder and hail, and lightning flashed down to the ground. So the LORD ruined hail on the land of Egypt.

The Final Deception

Indeed, trees are felled and branches are stripped off. Neither fruit nor herbage can be found... everywhere barley has perished. [The land] is not bright because of it. Indeed men are few, and he who places his brother in the ground is everywhere... Indeed [hearts] are violent, pestilence is throughout the land, blood is everywhere, death is not lacking, and the mummy-cloth speaks even before one comes near it.	Throughout Egypt hail...beat down everything growing in the fields and stripped every tree. [The locusts] devoured all that was left after the hail—everything growing in the fields and the fruit on the trees. Nothing green remained on tree or plant in all the land of Egypt. So Moses stretched out his hand toward the sky, and total darkness covered all Egypt for three days. Every firstborn son in Egypt will die, from the firstborn son of Pharaoh, who sits on the throne, to the firstborn son of the female slave, who is at her hand mill, and all the firstborn of the cattle as well.
---	---

Nevertheless, when read literally, the *Ipuwer Papyrus* coincides with the Book of Exodus (see Table 1.) The text ascribes social upheaval, violence, famine, and death in Egypt to a series of disasters during the rule of an unnamed king, which occurs because slaves had abandoned their servitude and escaped with their masters' treasure, "gold and jewels are fastened on the neck of female slaves." A state of affairs that accords with Exodus 12:35, "let every man demand from his neighbor, and every woman from her neighbor, articles of silver and jewels of gold."

The Promised Land

The rest of the exodus legend is almost too familiar to bear recounting: Moses leads the Israelites into the wilderness and eventually receives the Ten Commandments on stone tablets. The so-called Ark of the Covenant is built, but the Israelites' lack of faith prolongs their journey to Canaan, the Promised Land. After Moses' death, Joshua leads the Israelite army in a succession of stunning victories against the local inhabitants. With the Canaanite

Shepherd Kings

population subdued, the Promised Land is divided between the twelve tribes of Israel, and a priestly caste is designated to enforce the Law of Moses.

Archeological evidence neither substantiates nor invalidates an Israelite conquest of Canaan at any time. Indications of the destruction of Canaanite cities are obvious, but no consensus exists on either the dating of the destruction or the identity of the perpetrators.

Judging from the lack of historical record it appears the Hyksos vanished into thin air after leaving Avaris. But a Hyksos presence in Jericho and other cities during the sixteenth century BC is beyond dispute. And for Hyksos living there under Egyptian domination, a returning Hyksos army would be welcomed as liberators.

The Bible relates how two Israelite spies infiltrate Jericho and meet a female sympathizer there named Rahab, who helps them escape detection. Although the divine mandate requires the Israelites slaughter every man, woman and child inside Jericho, Rahab and her relatives are spared from the ensuing bloodbath when the Israelites invade the city ([Josh 6:25](#)).

According to the legend, the Israelites advise Rahab to hang a red thread from her window so her house would be recognized. The “red thread” features in an earlier biblical story of the birth of Jacob’s twin grandsons, Perez and Zerah ([Gen 38:28](#)), where it is tied on Zerah’s wrist to signify him as firstborn.

The protective power of scarlet is a recurring theme in Old Testament imagery (“She is not afraid of snow for her household, for all her household are clothed in scarlet” [Psalm 31:21](#)), but in ancient Egypt, where color represented the power and essence of the gods, the color red was associated with the god *Set*, or *Seth*, known to have been venerated by the Hyksos. After their expulsion, Set was demonized, and the color red was declared a color of evil, belonging to the powers of darkness.

The assumed date for the earliest Israelite presence in Canaan is around the beginning of the Iron Age, about 1200 BC, which is when the earliest Israelite houses are usually dated. The “Israelite house,” a basic home structure with pillars and a four-room floor plan, is considered unique to ancient Israel. So mainstream

The Final Deception

archeologists are at a loss to explain why numerous houses with an identical floor plan have been excavated on the site of the Hyksos settlement at Avaris since 2006.

Israelite Four-Roomed House

Four-Roomed House discovered at Avaris

Dr Neiman, one of the leaders of the Austrian archeological team excavating the ruins of Avaris, explains the Egyptian locals traditionally “know the area as *Tel Le Judia*, which means “The Jewish Ruins” for some reason.” But who else are the Israelites, if not the Hyksos – and vice versa?

The Old Testament is essentially the Hyksos version of Hyksos history. So the central “God” character is, for the most part, a Hyksos conception of deity, with mitigating aspects likely drawn from elsewhere. This also raises important questions about the New Testament, but before they can be addressed we need to

Shepherd Kings

trace the Hyksos as far back as the historical record allows – Sumer.

2

The Annunaki Legacy

Sumer, ancient homeland of the Shepherd kings, is also home to the ancient world's most documented and unfathomable society. Ever since nineteenth century archeologists unearthed its remains and discovered its clay cuneiform writing tablets, reputable scholars have conceded that the mid-fourth millennium BC Sumerian society is not only the template for all subsequent Mesopotamian civilizations, but is the prototype for all modern nations – cities, paved roads, monumental architecture, organized religion, schools, courts, writing, and bureaucratic institutions to control everything.

The standard text on ancient Sumer is *"History begins at Sumer: Thirty-Nine Firsts in Recorded History,"* published in 1956 by Samuel Noah Kramer, the world's most renowned Sumerologist. But although a wealth of literature now exists, so far no one has explained who the Sumerians are, let alone why the blueprint for civilization should spring wholesale from a rainless desert, where agricultural land had to be created by draining swamps and

The Final Deception

building artificial canals, and where stone, metal, and timber had to be transported from elsewhere.

No one, that is, except for the Sumerians themselves.

Located in southern Mesopotamia, ancient Sumer (c 3500 BC – 2000 BC)
is modern Iraq

The Sumerian Archives

Using a small dry reed sharpened at one end, Sumerian scribes etched wedge-shaped (“cuneiform” from the Latin *cuneus* “wedge” and *forma* “shape”) pictographs into tablets of wet clay, and then kiln-dried them for preservation. The language developed over the centuries, but cuneiform writing was used for at least three millennia. Figure drawings and seals were created by carving the contours on the exterior surface of a hollow stone cylinder, which produced a flat image when rolled over a sheet of wet clay.

According to best estimates, approximately two million clay writing tablets have been excavated since the mid-nineteen century, but no more than 100,000 have been published. Most gather dust in museum vaults and university storage rooms around the globe, with access to them restricted to a handful of approved scholars and government officials.

The Annunaki Legacy

Neo-Sumerian stone cylinder seal (left), c 2100 BC

Sumerians were avid list makers and record-keepers. Many tablets report the minutiae of commercial transactions, legal contracts, administrative procedures, foreign engagements, and financial accounts; some are concerned with architecture, agriculture, cookery, music, and medicine; others consist of creation stories, and heroic poetry documenting the exploits of the gods. From these extensive sources, scholars believe they have pieced together a reasonably accurate picture of daily life in Sumer.

But the lists don't stop there. Several tablets contain what has come to be known as the "Sumerian King List," a meticulous delineation of names, places and lengths of rule. The list goes back over 430,000 years, beginning with 162,000 years of divine rule from "heaven," followed by rule from a succession of five different "cities" by 8 earthly god-kings lasting 241,200 years – an average reign of 30,150 years. The location of the five cities – Eridug, Bad-Tibira, Larag, Zimbar, Curuppag – is unknown, but each in turn "fell" from the seat of power until "the Flood swept over the land" about 30,000 years ago.

Of these 8 antediluvian kings, only one is given a title – Dumuzi, "the Shepherd," which implies not all "gods" are the same. Dumuzi was also known as husband of the celebrated fertility goddess "Inanna," or "Ishtar," who features in numerous cuneiform narratives. The "shepherd" designation suggests Dumuzi belonged to a strand of deity directly responsible for the

The Final Deception

transition of divine power through earthly agents acting on their behalf.

Dumuzi carries special significance because later kings of Sumer, Assyria, and Babylon reenacted the role of Dumuzi in *hieros gamos* sacred marriage rituals with the priestess representing the goddess of the city. After copulation, the priestess would proclaim the king's destiny to be the “shepherd” of all nations.

Loaded with sexual allusions, the Old Testament's *Song of Songs* is widely believed to be drawn from the Sumerian fertility rites of Dumuzi and Inanna, who many consider the original prototypes of the “Bridegroom and “Bride” motif used repeatedly in the New Testament.

Inanna/Ishtar, the shepherdess

After the flood subsides, “kingship descended from heaven, and the kingship was in Kish.” Archeologists believe Kish was located twelve kilometers from the site of Babylon. This period would last 24,510 years, consisting of 23 kings, with an average reign of 1070 years, a noticeably shorter length of kingly rule than during “Five Cities” era.

Again, of these kings one merited the “shepherd” distinction, “Etana, the shepherd, who ascended to heaven and consolidated all the foreign countries.” A poem known as the “Epic of Etana” explains that after another devastation caused by the gods it was decided to install intermediary kings on earth:

The great Annunaki who decree the fate
Sat exchanging their counsels regarding the land.
They who created the four regions,
Who set up the settlements, who oversaw the land,
Were too lofty for Mankind.

The Annunaki Legacy

One example of the Sumerian King List, known as the Weld-Blundell prism, located in the Ashmolean cuneiform collection in Oxford, UK

After Kish, “the kingship was taken to E-ana,” which scholars interpret as the city of Uruk. Twelve kings of Uruk are listed, the first five rule for a total of 2170 years, which is an average reign of 434 years. Described as a “shepherd,” king Lugalbanda rules for the longest period - 1200 years. The remaining seven listed kings rule for a total of 140 years, with an average reign of 20 years each, signifying the era of contemporary lifespans. A further 101 kings are listed, which includes concurrent dynasties from neighboring kingdoms.

Modern text books state that current humanity, *Homo sapiens sapiens*, emerged in Africa approximately 200,000 years ago, and was preoccupied with primitive survival issues until about 6,000 years ago. So it is not surprising most scholars categorize the Sumerian timeline, along with references to gods or antediluvian societies in other ancient cultures, as fictional mythology designed to legitimize the power structure that formulated it. Nonetheless, historians and archeologists still use the painstakingly carved

The Final Deception

“fictional” chronologies of the Sumerian King List to reconstruct the fourth and third millennia BC.

Another pool of seemingly impossible data was discovered on Babylonian tablets copied from earlier Sumerian record i.e. astronomical information including lists of stars invisible to the naked eye, and distances calculated between them; timetables of planetary orbits around the sun; and charts of comets, meteors and celestial phenomena related to the position of the earth. Calendars were drawn up based on a sophisticated understanding of the passage of spherical bodies pertaining to the ecliptic (the path the sun appears to trace through the stars), the equinoxes (when the Earth’s axis aligns with the center of the Sun, which is directly overhead the Equator every March and September), and the solstices (when the sun is at its greatest distance from the equator every June and December).

Sumerian star map dated approx 3000BC

Mesopotamian zodiac constellations show awareness of the phenomenon known as the “Precession of the Equinoxes,” whereby the gradual shift in the axis of the Earth’s orientation over a period of approximately 26,000 years, appears to change the position of the fixed stars in the visible firmament. However this sophisticated astronomical knowledge was acquired, it was not needed to determine mundane farming or business schedules.

The Annunaki Legacy

Repeatedly throughout the texts, the Sumerians credit their existence, along with all their learning, expertise and “everything that is beautiful” to the same source – the gods. Serious research into the identity of the Annunaki is conspicuously absent from academic publications. Imaginary beings, however, make for unlikely disseminators of highly-developed celestial mechanics.

The eight-pointed star (the planet Nibiru) and the seven spheres (Pleiades) are standard icons on Mesopotamian seals and boundary stones. Only six Pleiadean stars, however, are visible to the naked eye.

The Annunaki

A comprehensive study of the word “Annunaki” is still lacking, and no consensus exists on its literal meaning. Scholars agree the name derives from “Anu,” or “Annu,” the primordial Mesopotamian Father “sky-god,” though “Anu” is sometimes applied collectively to occupants of the highest heavens. As described in the texts, the relationship between the Anu and the Annunaki is unambiguously hierarchical.

Today, anyone familiar with ancient astronaut theories knows the term “Annunaki,” but before 1976, when Zecharia Sitchin published the first book in his *Earth Chronicles* series, the Annunaki were known only to the narrow readership of a few specialized academics. Although he leant upon the work of earlier scholars,

The Final Deception

being free from peer pressure and uninhibited by institutional paymasters, Sitchin independently studied the Sumerian lexicon, translated the cuneiform texts, decoded the images, and blew away the tired “mythical sky-gods” hypothesis with an eloquence that made his books bestsellers, and turned the Annunaki into a cottage industry.

To briefly summarize Sitchin’s research: an extra-terrestrial quasi-hominid race, or group of races, known as the “Annunaki,” visited the earth several times in the distant past. Initially, they arrived in search of gold, travelling in space ships from the Annunaki home world of Nibiru, which is largest and outermost planet of our solar system, and which reverse orbits around the sun every 3600 years. Having a metallic-based biology, for the Annunaki to thrive on Nibiru its atmosphere requires periodic infusions of gold dust.

Production of gold on Earth ceased when the lower caste Annunaki workforce (*Igigi*) rebelled against the harsh conditions in the underground mines. Forced into a decision, the Annunaki leadership instructed its scientists to genetically engineer slaves to do the labor. After several failed attempts, modern humans were ultimately created as this new slave race by combining Annunaki DNA with samples taken from primitive “apeman,” among other possible sources.

Centuries past, and the escalating human population became too difficult for the Annunaki to control, so it was decided to wipe them out by means of a flood. This plan was thwarted by the intervention of an Annunaki faction allegedly sympathetic to humanity’s plight. After the flood, life expectancy on earth was drastically shortened, but the human race lived on and prospered.

In due course, human technological knowhow reached a level where it was deemed a potential threat. Resigned to the inevitability of human existence on Earth, the Annunaki chose a course of action that effectively rendered the entire population amnesiac, and unable to communicate. A program of mass ‘re-education’ followed, exemplified by the construction of Sumerian society sometime after 3800 BC.

Human kingship and priesthood were inaugurated as institutional proxies through which the Annunaki could remotely

The Annunaki Legacy

direct earthly affairs. Physical symbols of kingship – crown, scepter, and shepherd’s staff – were reportedly brought to Earth directly from Nibiru. The Annunaki departed Earth, content to be “gods” ruling from afar, but one day the Niburians will return to check the progress of their wayward children. Zecharia Sitchin died in 2010, so did not live to witness this auspicious event.

Even though many of Sitchin’s arguments are well-researched and highly persuasive, a number of his conclusions appear deeply flawed.

Apart from “Anu,” the king of Nibiru, the most prominent Annunaki in the Sumerian texts are his sons “Enki” and “Enlil” (“Marduk,” a “son” of Enki, is the key deity in the later Babylonian pantheon). Although described as singular personae, they are sometimes combined with different gods. Moreover, their respective titles, powers, accomplishments, sexual prowess, numbers of offspring, together with an apparent transcendence, suggests “Enki,” “Enlil,” and “Marduk” are best understood as individualized Annunaki tribe or racial groups, whose history is glamorized and/or misrepresented through the typical personality-dramas that drive myth and legend.

The Father god, “Anu,” though undoubtedly the source or founder of the Annunaki in general, is more akin to a metaphysical gestalt. Not one image of Anu has ever been found among the many thousands of depictions of the ancient gods that have been uncovered.

Certain fundamental attributes of the Annunaki deserve mention because, as it is described in the epic poetry, basic Annunaki character is sadly lacking, and Annunaki society leaves plenty to be desired. Ruthlessness, cunning, brutality, deceit, distrust, and boastfulness are highly regarded qualities in a wildly patriarchal culture where incest abounds. Bloodline and genealogy are such obsessions females are regarded as no more than gestation chambers.

Predictably, the Annunaki are riddled with internecine strife, and divided into competing factions harboring long-standing mutual resentments.

The Final Deception

Typical representation of an Annunaki god with horned headgear, long beard, rosette “wristband,” holding a “pine cone” and a “bucket.”

Decipherment of the Mesopotamian texts did not go unnoticed by late nineteenth century biblical scholars researching source materials of the Old Testament, and of the Book of Genesis in particular. Today, a huge volume of published literature exists demonstrating the parallels between Bible stories and their much earlier Sumerian equivalents, though the impact of this information on the general public is negligible.

No one knows precisely when the *Torah*, or core books (Genesis, Exodus, Numbers, Deuteronomy, Leviticus) of the Old Testament were compiled, but it is generally accepted the process began during the sixth century BC when the Israelite elite was in Babylon, where they had access to the cuneiform libraries. But if priestly Jewish scribes intended to record the sacred history of

The Annunaki Legacy

Israel, why would they need to study the archives of the Annunaki and their shepherd king representatives?

The Elohim

The answer is because the Israelites are the Hyksos, and Hyksos history *is* Sumerian history. The Hebrew text of Genesis conveys the polytheistic traditions of Sumer by attributing creation, the flood judgment, and the confusion of languages to certain *Elohim* – the plural form of *El*, which translates as “gods,” not God.

Strictly speaking, since the Hebrew language uses the Canaanite word, *El*, a Father sky-god and equivalent of the Mesopotamian *Anu*, the plural *Elohim* refers to the *Anu* group or council, not to Annunaki rank and file.

By applying a type of theologically-inspired hindsight to transform *Elohim* into “God” (even when followed by a plural verb) in an era when monotheistic religion did not yet exist, translators distort its actual meaning and thus conceal the *Elohim* identity. In Genesis 20:13, for example, Abraham explains to the Philistine king Abimelech that “the gods (*Elohim*) caused me to wander...” In Genesis 35:7, Jacob returns to the place where he dreamed of angels ascending and descending a ladder to heaven,

And there he built an altar and called the place El-bethel, because the gods (*Elohim*) had revealed themselves to him...

In another example, the King James Bible translates Genesis 48:15:

And he blessed Joseph, and said, God, before whom my fathers' Abraham and Isaac did walk, the God which fed me all my life long unto this day...

But the literal translation of Genesis 48:15 is:

And he blessed Joseph, and said, "The gods (*Elohim*) before whom my fathers' Abraham and Isaac walked, the

The Final Deception

gods (*Elohim*) who have been my **shepherds** all my life to this day...

Referring to the Elohim as “shepherds” in the original transcript links them with the Annunaki “shepherd” traditions with which the Hyksos were associated. In the Sumerian-Babylonian creation epic, *Enuma Elish*, the Annunaki home planet, Nibiru, is defined as a celestial manager and “shepherd” of the Annunaki:

The stars of heaven, let Nibiru set their course; let him shepherd all the gods like sheep.

Jacob dreams of a ladder to heaven, Nicolas Dipre, 1525
Do winged “angels” represent the Annunaki?

The impression that humans were created by the Annunaki, or by the Anu-Elohim, is created only by naïve or misleading translations of the Sumerian creation accounts and the biblical text. Conveying human origins is not their purpose. For the Bible, along with other derivatives of Sumerian lore, is Annunaki history.

The Annunaki Legacy

“Lulu” and Adam

Pointing to obvious similarities between the Genesis story of Adam’s creation and the creation of the *Lulu* (translated as “man”) mentioned in Mesopotamian epics, skeptics dismiss both accounts as typical mythology – imaginary gods did it. The level of detail in the Sumerian texts, however, seems not so much to describe unreal “gods,” but real extraterrestrial visitors with advanced genetic engineering technologies.

A Sumero-Akkadian text called *Atra Hasis* describes a mutiny of Annunaki gold miners in vivid detail, and explains how the Annunaki leadership reached its decision to create an intelligent being capable of handling the backbreaking workload. Enki, the chief scientist, working together with *Ninmah*, the Chief Medical Officer, was instructed:

Create Mankind (*Lulu*)! Create a Mixed One that he may bear the yoke, let him bear the yoke assigned by Enlil, let the Primitive Worker (*amelu*) toil for the gods!”

The “Lulu” is presented to Ninmah

In the sixth tablet of the Babylonian *Enuma Elish*, Marduk addresses the assembled Annunaki:

I will bring together blood to form bone, I will bring into being a Lulu, whose name shall be “man”. I will

The Final Deception

create a Lulu on whom the toil of the gods will be laid
that they may rest.

Evidently, Enki (*Ea* in Babylon) and Ninmah (*Nudimmud*) successfully accomplished the mission:

From his blood he (*Ea*) created the Lulu, on whom
he imposed the service of the gods, and set the gods
free. After the wise *Ea* had created the Lulu and had
imposed the service of the gods upon them — That task
is beyond comprehension. For *Nudimmud* performed
the creation with the skill of *Marduk*.

Use of the word *amelu* in the pre-Babylonian version is significant. Usually translated as “slave” or “worker,” in Babylonian society an *amelu* was a member of the hereditary ruling class, whose birth, death, and marriage was registered. According to the Code of Hammurabi, kings, priests, ministers, generals, and the high professions all came from the *amelu* caste. So if all humans were supposedly “*amelu*,” why was the separate ruling caste in Babylon named “*amelu*?”

For some reason, the Lulu workforce came to be known as “the black-headed ones.” In one Sumerian psalm Enlil is referred to as “Father Enlil, Shepherd of the Black-Headed Ones.” Later in the *Enuma Elish*, an accolade paid to Marduk emphasizes his same role with the “black-heads:”

Let him shepherd the black-heads, his creatures, Let
them tell of his character to future days without
forgetting.

Most people are unaware that Genesis includes two separate accounts of Adam’s creation. The first version states “The Elohim said, “Let us make man (Adam) in our image, after our likeness” (**Gen 1:26**). In the second version (**Gen 2:5**), “the Adam” is prefixed with the definite article, and a specific reason is given for his creation, “there was no Adam to till the ground.” Presumably, the first “Adam” did not practice agriculture. Was the second creation intended to mix Adam into contemporary civilization?

The Annunaki Legacy

In acknowledgment of his famous Code, this marble relief of Hammurabi, wearing the horned headdress of the Annunaki, is displayed in the Capitol building, Washington DC

By way of explaining duplicate creation accounts, an ancient tradition in mainstream Judaism distinguishes between the ideal of “Adam Kadmon,” who was “made in the image of God,” and “the Adam” who “the Lord God formed from the dust of the ground” ([Gen 2:7](#)).

The Sumerian word *Lu* means “man,” but it also means “sheep.” Characteristic of Sumerian wordplay, *Lulu* implies a “man-sheep” that is essentially a type of domesticated hominid-animal, which explains the need for “shepherds.” The Annunaki required an extremely compliant being to follow instructions without too much thinking and without complaint. This being needed to be durable enough to withstand physical hardship, but above all, the “Lulu” slave miner needed a strong musculature and robust frame. In other words, the Annunaki needed a Neanderthal, not a human.

We know Neanderthals were much stronger than modern humans, comparable in height, with longer collar bones, wider shoulders, and a barrel-shaped rib cage. Neanderthals also had a longer torso, shorter stockier legs, and larger kneecaps than

The Final Deception

humans, giving them a much lower center of gravity. Added to that, Neanderthals had larger rounder finger tips than humans, which were far better suited for heavy manual tasks.

Unlocking the sophisticated Sumerian dating system, Sitchin calculates that the Annunaki created the “Lulu” approximately 300,000 BC – the period when most anthropologists accept Neanderthals first appeared. The earliest Neanderthal tools site is dated at 300,000 years old.

The sudden and unexplained Neanderthal extinction is estimated to have occurred around 30,000 years ago. Humans and Neanderthals undoubtedly co-existed, but biologists have found no evidence that humans and Neanderthals interbred. While modern humans (*Homo sapiens sapiens*) share some nuclear DNA with Neanderthals, the two species do not share any mitochondrial DNA which in primates is always maternally transmitted.

Nothing in Genesis discounts the existence of indigenous forms of intelligent life – humans –before the creation of Adam. The word *Adam* predates its use in Hebrew. The earliest known

The Annunaki Legacy

use is *Adamu*, a name recorded in cuneiform tablets listing Assyrian kings. Its root meaning is “red,” “fair,” or “handsome,” generally thought to be related to the words *adam*, (red), and *dam* (blood).

Genesis also contains two separate creations of Eve. In the first account, man and woman are made synchronously, “male and female He created them.” In the second account, Adam is created first, and Eve is created later from the material of Adam’s body because “it is not good that the Adam should be alone.” This apparent inconsistency lies at the root of the rabbinic *Lilith* legends, in which the “woman” in Genesis Chapter One (*Lilith*) is a separate individual from the “Eve” in Chapter Two.

Textual critics have long argued that the first two chapters of Genesis were written by different writers at different times, drawing from a combination of different sources. Even so, Genesis explains creation purely from the ancient Israelite perspective, and thus its purpose is to trace Hyksos descent to the Anu-Elohim.

The Cro-Magnons

Assuming the Annunaki managed to successfully create a Lulu, or a Neanderthal slave race, by mixing diverse genetic materials, why would they have stopped there? The strong likelihood is that creation stories of the Lulu and the Adam are archetypal, and genetic engineering was an ongoing process.

Because evolution is understood as a subtle progression, evolutionary biologists are stumped by the precipitous arrival of Cro-Magnon man in the fossil record. The earliest date for the existence of Cro-Magnon man is approximately 43,000 BC. Cro-Magnons seem to have disappeared around 10,000 BC. But although Cro-Magnons were contemporaneous with Neanderthals for over 10,000 years, the nature of their relationship remains a mystery.

One scientific theory postulates that the Cro-Magnons methodically ‘ethnically cleansed’ the Neanderthals out of existence. Was Cro-Magnon man simply a genetically-engineered upgrade of the Neanderthal model?

The Final Deception

Cro-Magnons were more similar to modern humans than to Neanderthals, with a larger cranium and greater musculature than humans; longer limbs and greater dexterity than Neanderthals. The Cro-Magnons did not farm. They were nomadic hunter-gatherers, responsible for the prehistoric cave paintings, but they did not “till the ground.” Unlike Neanderthals, Cro-Magnon man did not suddenly become extinct. Genetic studies confirm that Cro-Magnons somehow evolved to the stage where they could interbreed with pre-existing humans (or *archaic* humans as anthropologists refer to them). And once that point had been reached, it appears there was no stopping them.

Sumerian Annunaki “god” dressed as a bull, and (right) cave drawing of a shaman dressed as a bull, c 13,000 BC, France

Over time, the Cro-Magnon race progressively assimilated itself into the human population, and disappeared. Paleontologists classify Cro-Magnons as *Homo sapiens*, and Modern humans are classified as a sub-species, *Homo sapiens sapiens*. No physical evidence that Cro-Magnons and humans co-habited exists. So how did this “assimilation” occur?

The sixth chapter of Genesis proves informative:

The sons of the Elohim saw the daughters of men that they were fair; and they took them wives of all which they chose.

The Annunaki Legacy

To explain it away, this verse has spawned a library of convoluted liberal and conservative theological constructs, none of which are worth repeating. Ancient alien advocates highlight it as evidence of direct miscegenation between humans and extraterrestrials, a not uncommon idea in ancient myth. But the “sons” of the Elohim are an Adamic race. Moreover, the innocent-sounding phrase “took them wives of all which they chose” reads as a not-so-subtle euphemism for mass rape.

In plain language, the same Bible verse might read:

Cro-Magnon men systematically targeted and raped human females in order to impregnate them

In this way, the Cro-Magnon race facilitated its own demise, and accomplished a forced merger with humanity. Not only is the scenario of organized hunting, raping, and impregnating of human women utterly horrific, it infers a profoundly unpalatable root cause of misogynist violence and postnatal depression.

Many scholars consider the most developed Cro-Magnon cave paintings to be astromical maps. The Pleiades is depicted by 6 dots above the bull.

Eventually, Cro-Magnons and humans became physically indistinguishable one from the other. Without overt bodily differences, everyone appeared more or less the same, and distinctions were no longer made. But while evolutionary biologists prefer the term “Early Modern human” to “Cro-

The Final Deception

Magnon,” a consensus exists that while all Cro-Magnons are Modern humans, not all Modern humans are Cro-Magnon.

Seth

In Genesis, Adam and Eve have three sons – Cain, Abel, and Seth. Cain kills Abel and is cursed. The martyred Abel is identified as a “shepherd” (Gen 4:2). Cain re-appears briefly only to permanently disappear from the plot. Born after Abel’s death, Seth is described by Eve as Abel’s replacement (Gen 4:25). Consequently, Seth becomes the ancestor of the Hyksos, the biblical Israelites.

The Hebrew name “Seth” is philologically identical to the name of the Egyptian god “Set,” principal deity of the Hyksos in Egypt. In post-Hyksos Egypt, Set was no longer categorized as an Egyptian god, but rather as a Lord of foreign lands. *Baal* of the Canaanites, and *Teshub* of the Hittites, were both considered forms of Set. As reflected in their respective iconography, Canaanite and Hittite deities are widely accepted as complements of the Sumerian Annunaki.

Teshub (left) and Baal (right) in the horned headgear of the Annunaki

The Annunaki Legacy

One extremely well known Egyptian creation myth demonizes Set. *Geb*, representing the earth, and *Nut*, representing the heavens, have three sons – Osiris, Horus and Set. Set, as with the biblical Seth, is the third son. Set kills his brother Osiris, the first born, and becomes the villain of the piece. This contrasts with Genesis, in which the evil brother is the first born Cain. Seth, the third son, who replaces the innocent Abel, emerges as the savior.

Seth's origins are oddly related in the fifth chapter of Genesis:

This is the written account of Adam's family line. When the Elohim created mankind, he made them in the likeness of the Elohim. He created them male and female...When Adam had lived one hundred and thirty years, he became the father of a son in his own likeness, according to his image, and named him Seth.

As the same “image” and “likeness” terminology is used in the creation of Adam, is an identical process of creation implied? Did Seth represent a new and improved model? If so, then what lies behind this seemingly arbitrary template of three “brothers?” Does it signify three related Annunaki factions?

Adam and Seth, Royal Chronicles of Cologne, 1238

The Final Deception

“God-lists,” which are akin to family trees for Annunaki deities, are included within various Mesopotamian texts to prove the king’s ancestral credentials and legitimize his rule. In the earliest third millennium BC Sumerian lists, Enki is usually listed as the first born son of Anu. During the later Neo-Sumerian Akkadian period, Enlil is generally the first born son, indicating a power shift among the Annunaki had taken place. In the final Babylonian era, all the god-lists began with Marduk, from whom all Babylonian kings claimed descent. When Marduk became chief god in the region, history and epic poetry were re-written. Heroic acts of the distant past were attributed to Marduk.

The Israelites first compiled Genesis while in exile. According to biblical legend, the Jews were captured en masse by the army of Nebuchadnezzar II and forcibly taken to Babylon. Although archeological evidence proves that some Israelites were in Babylon during the sixth century BC, nothing shows they were prisoners there. When supposedly given freedom to return to Jerusalem by the Persian king Cyrus in 539 BCE, many Israelites preferred to stay put. No doubt for some, Babylon was always the homeland. Did the Babylonian priests of Marduk influence the composition of Book of Genesis?

Nebuchadnezzar II

Most Old Testament critics consider the Cain Abel conflict to be inspired by Enki-Enlil legends of Sumerian lore. Because Enki and Enlil were supposedly half-brothers competing for world domination, the connection is vaguely plausible. But when Seth is factored into the equation the fraternal dynamic begins to make sense.

In their efforts to connect names in Genesis’ antediluvian genealogies to the Babylonian pantheon, nineteenth century scholars identified Seth with *Shitti*, which is an epithet for Marduk. Seth, it seems, is none other than Marduk, the third great Annunaki god, who inherited, or usurped, the former possessions

The Annunaki Legacy

of Enki and Enlil, and consolidated power in Babylon. The Annunaki triumvirate of Enki-Enlil-Marduk is mirrored by Cain-Abel-Seth.

If the Lulu/Adam was the product of co-operation by Enki and Enlil Annunaki factions represented in Genesis by Cain and Abel, then the surviving Sethian lineage was claimed by the Marduk Annunaki, and documented accordingly by Hyksos scribes in Babylon.

Wrap-up

In the modern world, everyone is “human.” Certain ancients, however, knew this was not so, and had the records to prove it. Considering themselves a genealogically superior race directly descended from “gods,” they presumed a license to dominate and abuse inferior humans – the “Divine Right of Kings” – and to exploit the Earth. Genesis translates this philosophy as “be fruitful, multiply, and have dominion.”

Authors of Sumerian and Biblical epics were unconcerned with human origins, and cared even less about human history. They record only the roots of a genetically engineered hybrid ‘master’ race, and its subsequent infighting, as though humans never existed.

As is it taught in schools, history is *not* study of the past, but of records of the past, which is not the same thing. Text books catalog wars of kings, queens, emperors, generals, prime ministers, presidents, popes, and religious leaders. Historians review, evaluate, and deliberate on these wars. But whose history is it?

Due to a chronic lack of archives, alternative interpretations of the past are difficult to justify. Ice ages and floods periodically wiped the slate clean, so to speak, and during the last few thousand years the destruction of cultural records has been routinely practiced by religious authorities, totalitarian regimes, and invading armies across all continents. Whatever has survived, so the cliché goes, “is written by the winners.”

The Final Deception

From the standpoint of comprehending the Annunaki agenda, the development and absorption of Cro-Magnons into the human population raises an obvious question. If complete control of the Earth and its resources was the target, why did the technologically superior Niburians not just kill all the humans?

3

Gene Raiders of the Lost Ark

Ever since the first cuneiform tablets were translated, folklorists and researchers have identified fingerprints of Sumerian deities in the myths and traditions of numerous ancient civilizations. This book focuses on Mesopotamia, though not exclusively, because the three global religions of Judaism, Christianity, and Islam trace to Abraham, who was a Sumerian. And for anyone wishing to make sense of the Annunaki agenda, it is logical to look for patterns in the recorded activities of their proxies.

Two important and persistent themes in ancient Mesopotamian literature are genealogical “purity” and “all-powerful” artifacts. To prove bloodline credentials of the main protagonists, authors of Sumerian poems and the books of the Old Testament were obliged to create elaborate lists of ancestors. And to wield the extraordinary powers they grant to the holders, epic heroes slaughter mercilessly to possess the “Tablets of Destiny” or the “Ark of the Covenant.”

It appears the one fixation – DNA – relates directly to, and cannot be divorced from, the other – total control.

The Final Deception

All in the Family

For kings and patricians throughout the ancient Near East and Mediterranean, the issue of succession was relatively straightforward. The dynastic line passed through the oldest male child. There was however, a strangely incestuous twist. Kings tended to marry and produce heirs with their half-sisters. No matter how many previous sons the king may have had from his other wives or concubines, priority was always given to the son by his half-sister.

This practice was enshrined in law. Early second millennium cuneiform law codes, discovered in Mari (modern Syria) and in Nuzi (modern Iraq), explicitly state that a man could marry his half-sister, with one stipulation. The half-sister must be born from the same father, *not* mother.

Abraham subscribed to this same custom. When questioned by the Pharaoh why he had presented his wife Sarah as his sister, Abraham replied,

Indeed she is my sister, the daughter of my father,
but not the daughter of my mother, and she became my
wife.” (Gen 20:12)

If the intent was to keep the bloodline as pure as possible, why was marriage with a full sister forbidden? Did the ancients know the risks involved in mixing replicas of recessive genes carried in mutations of the Mitochondrial DNA and inherited only through the mother?

Whatever the case, the chief priority in this type of selective breeding is to contrive a genetic imprint in the fetus that is agreeable to a specific type of consciousness. Sitchin was first to notice this tradition of incest had initiated with the Annunaki, and is described in the tales of Enki's repeated efforts to create an heir with his half-sister *Ninhursag*. Though Enki failed in the end, his brother Enlil managed to reproduce a successor, *Ninurta*, with *Ninhursag*.

Generation of specific DNA blueprints lies behind many biblical legends. None more blatant than the story of Tamar, subject of Genesis Chapter 38. Despite being married in

Gene Raiders of the Lost Ark

succession to all three sons of Judah (from whom “Judaism” takes its name), Tamar is childless. But because Judah’s lineage is “sacred,” Tamar disguises herself as a Temple prostitute to seduce her father-in-law.

New Testament genealogies of Jesus, which are based on the Old Testament bloodline of Judah, demonstrate how the appropriate genetic conditions were created to allow for a “messianic” consciousness to birth.

If Cro-Magnons were introduced specifically to interbreed with humans, then ultimately they were a surrogate race for non-human consciousness. Simply put, Annunaki entities birthed into Cro-Magnon bodies, and then later into hybridized bodies that held a certain percentage of Annunaki DNA. Complications arose over succession because several non-human categories exist. Strict guidelines were followed to ensure only the right type entered the fold. This explains why the preferred mothers were half-sisters from the same father.

According to legend, the conflict between Enki and Enlil stems from Enki’s refusal to recognize Enlil as Anu’s first born son. From Enki’s supposed autobiography:

My Father, king of the Universe,
Brought me forth in the Universe...
I am the fecund seed,
I am he who has been born
As the first son of the divine Anu!

No further details are given. This same rival sibling dynamic permeates the lineage of Old Testament Patriarchs, manifest in the stories of Cain/Abel, Ishmael/Isaac, Esau/Jacob, Ephraim/Manasseh, and Zerah/Perez. In every case, the second born son is favored.

But the Annunaki, it seems, were not the only game in town. Blending the Cro-Magnon genotype with the human had opened the door to other races of non-human consciousness. And at least one was determined to co-opt the Annunaki agenda.

The Final Deception

Enter the Dragons

Among the thirty-nine recorded “firsts” attributed to the Sumerians by Sumerologist Samuel Kramer is “Chapter 22: *Slaying of the Dragon: The First Saint George*.” In his analysis, Kramer acknowledges legends of dragon slayers are found almost everywhere, and that “there was hardly a Greek hero who did not slay his dragon.” He concludes that the prototypical dragon, or serpent, originated in Sumer, because at least three dragon-slaying myths are found in third millennium BC cuneiforms.

Annunaki gods battle with a dragon/serpent

In the earliest of the three tales, *Kur*, a serpent-dragon, abducts the goddess *Ereshkigal*. Enki then tracks down the dragon, is victorious in battle, and rescues *Ereshkigal*. Kramer connects this story to the Greek tale of the “abduction of Persephone,” the fertility goddess. Abduction of fertility goddesses is a regular theme in pre-Greek myth, and may have influenced the Genesis story of Eve and the Serpent, which conveys the same unmistakable sexual subtext. The Book of Revelation (12:9) refers to the Serpent in the Garden of Eden as “the ancient dragon,” and “deceiver of the world world.”

The dragon and maiden paradigm is epitomized in the story of Saint George and the Dragon. The numerous variants of this legend can be crystallized in one sentence. George slays the dragon to save the maiden from being consumed. Righteous

Gene Raiders of the Lost Ark

enough to make for a children's fairy tale perhaps. Except that it isn't.

Rape of Persephone, marble relief, Antiquities Museum of Toulouse

This design shows a fire-spitting winged dragon drawing the chariot of the Annunaki who had most probably subjugated it in battle.

A nude female stands between the dragon's wings.

Females in serpent-dragon slaying myths are invariably virgins of child-bearing age. We are told this is because morality tales are meant to encourage chivalry and chastity. But their real message is about who gets the girl. Pragmatically speaking, the hero only kills the dragon so he can impregnate the maiden instead. At stake in

The Final Deception

this life or death struggle is neither “honor” nor “virtue” but access to the human gene pool that the virgin female represents.

Temptation of Eve, Willam Blake, 1866

In Genesis, the Elohim curse the serpent:

And I will put enmity between you and the woman,
and between your seed and her seed. (Gen 3:15)

How does a “serpent” have children (seed) with a woman? Clearly, mythological “serpents” are not literal snakes, but rather a type of consciousness, or being. The “seed” of the serpent, then, can be called a Draconian-human hybrid, in contrast to the “seed” of Adam and Eve, which indicates Annunaki-human hybrids. Apparently, both forms of non-human consciousness can birth into bodies with the necessary ratio of Cro-Magnon – human DNA. And as the dragon slayer model plainly illustrates, the two non-human hybrid lineages are mutually inimical.

In most dragon folklore, dragons are primordial celestial creatures that predate humankind, existing even before the earth. Where dragons come from, and whether a dragon is good or evil, depends largely on who tells the story. In the ancient Near East, primeval dragons were enemies of the gods, but it appears the opportunity afforded non-humans to inhabit hybrid-human

Gene Raiders of the Lost Ark

bodies brought their age-old conflict to earth. And humans were stuck in the middle.

Saint George and the Dragon, Paolo Uccello, c 1450

The Legend of Saint George and the Dragon, Edward Burne-Jones, 1866

Courtesy of the Old Testament, something of the intensely visceral nature of this cosmic war, and how it effected human populations, can be gleaned from ancient Israelite battle strategies.

The Final Deception

The Annunaki god *Ninurta*, a son of Enlil, defeats the dragon *Kur*

Gene Raiders

They attacked Midian just as the Lord had commanded Moses, and they killed all the men....Then the Israelite army captured the Midianite women and children.....But Moses was furious with all the military commanders who had returned from the battle. “Why have you let all the women live?” he demanded...“Now kill all the boys and all the women who have slept with a man. Only the young girls who are virgins may live; you may keep them for yourselves. (Numbers 31:7-18)

So they sent twelve thousand warriors to Jabesh-gilead with orders to kill everyone there, including women and children. “This is what you are to do,” they said. “Completely destroy all the males and every woman who is not a virgin.” Among the residents of Jabesh-gilead they found four hundred young virgins who had never slept with a man, and brought them to the camp at Shiloh in the land of Canaan. (Judges 21:10-12)

Gene Raiders of the Lost Ark

Symptomatic of a recurrent Old Testament pattern, i.e. the wholesale slaughter of non-Israelite males together with the seizure of non-Israelite females, these passages resonate with Manetho's description of the Hyksos:

After they had subdued our rulers, they burnt down our cities, and destroyed the temples of the gods, and treated the inhabitants most cruelly; killing some and enslaving their wives and their children.....They all along waged war against the Egyptians, and wanted to destroy them to the very roots.

Midianite virgins are led away by the Israelites

In attempting to justify this practice, most Judeo-Christian apologists insist it was divinely-ordained policy necessary to preserve the purity of the “chosen people” in an extremely hostile environment. Ironically, socio-biologists claim such biblical episodes exemplify the primitive tribal survival instinct, a consequence of the male impulse to spread genes and remove competition for resources, which basically amounts to the same thing.

Theologians and evolutionists have yet to offer a convincing explanation as to why Israelites were required to kill only non-virgin women and only rape virgins. This behavior, according to the experts, reflects a cultural preference in the ancient world, and

The Final Deception

cannot be judged by modern standards. Virgins, in other words, made better sex slaves.

Bearing in mind Moses' commandments not to kill or commit adultery, the esoteric school of Judaism, as expressed in *The Letter on Holiness* by Nahmanides (1194 - 1270), a Kabbalistic philosopher, emphasizes the “holiness” of a child depends on the intention and motivation behind conception, and not from technicalities of the Torah. “When the sexual relationship points to the Name, there is nothing more righteous and more holy than it.” When this is understood, one “will then grasp a great secret regarding the God of Abraham and Isaac and Jacob.”

The “great secret” is now out of the bag. The Israelites were “gene raiders” for the Elohim. Here’s how it worked:

- A specific ethnic group is deemed superfluous. At the same time, its unique genetic material (DNA code sequences) is coveted.
- All males in this ethnic group, regardless of their age, are killed.
- All non-virgin females in this community are killed.
- As they carry no potential traces (fertilized eggs) of non-Israelite males, virgin females are kept alive.
- The virgins are repeatedly raped by Israelite (Hyksos) males until made pregnant.

Offspring from these unions would carry existing Israelite (Hyksos) gene codes plus coding from the targeted ethnicity. And wherever “prized” genes are located, the same formula is repeated. As this was obviously a long term strategy, it must have started long before the advent of biblical Israelites. Egyptians knew the Hyksos as a mixed race of unfathomable genealogy.

To prevent outsiders stealing their accumulated genetic “treasure,” the Law of Moses strictly prohibited sexual relations between Israelite females and non-Israelite males. Genesis Chapter 34 demonstrates this rule was in effect during earlier times.

After having had sexual relations with Dinah, who was Jacob's daughter, Shechem, a “prince” in Canaan, expresses his desire to marry her. Following negotiations between Jacob and Shechem's

Gene Raiders of the Lost Ark

father, a marriage is agreed pending mass circumcision of the male population in Shechem's city, which is duly carried out. While the men of Shechem are still recuperating, Dinah's brothers enter the city, remove Dinah, and "slaughter all the males," including Shechem.

Jacob's sons slaying the Shechemites, Wencelaus Hollar, c 1650

Needless to say, the Bible mentions numerous instances of sexual relations between Israelite men and non-Israelite women, even intercourse with temple prostitutes is condoned. But this activity did not threaten the integrity of the Israelite, or Hyksos, genome, passed on by Israelite females. As keepers of the genetic "bounty," sanctions on sexual behavior were enforced only on Israelite women.

Rod and Staff

What gave the Hyksos Israelite gene raiders the confidence and to succeed with their program? Technologically-superior weaponry, by all accounts. During the protracted departure from Egypt and desert sojourn, to the conquest of the Promised Land and the establishment of kingship in Jerusalem, the Israelites

The Final Deception

supposedly possessed the “rod” of Aaron, the “staff” of Moses, and the “Ark of the Covenant” gold box.

According to the Bible, the rod and staff sparked a succession of disasters that convinced the Pharaoh to free the slaves. Among other capabilities, the rod and staff could influence weather conditions and cause plagues. Moses even uses the staff to part the Red Sea, and he strikes a rock with the rod to create a spring for the Israelites to drink from. The staff is also used to gain victory in battle against the Amalekites.

Moses raises his “staff” and parts the Red Sea

No explanation is given in the Bible for the source of Aaron’s rod, but Moses reportedly receives the staff when God speaks to him from the burning bush.

“And thou shalt take this staff in thy hand, wherewith thou shalt do signs.” And Moses went and returned to Jethro his father in law, and said unto him, “Let me go, I pray thee, and return unto my brethren which are in Egypt, and see whether they be yet alive.” And the LORD said unto Moses in Midian, “Go, return into Egypt: for all the men are dead which sought thy life.” And Moses took his wife and his sons, and set them

Gene Raiders of the Lost Ark

upon an ass, and he returned to the land of Egypt: and Moses took the staff of God in his hand. (Exodus 4:2-3)

Once the Israelites enter Canaan, the rod and staff are not directly used again, though they are frequently mentioned in the Bible, most famously in the “Lord is my Shepherd” Psalm 23, traditionally attributed to king David:

Even though I walk through the valley of the shadow of death, I fear no evil; for thou art with me; thy **rod** and thy **staff**, they comfort me.

Romanticising the terms “shepherd,” “rod,” and “staff,” as in the customary interpretation, clouds the real meaning of this Psalm. Like every military commander with more advanced weaponry at his disposal, David was confident of victory.

As described in the Bible, the Ark of the Covenant is basically a gold-plated wood storage box (approximately 131 x 79 x 79 cm or 52 x 31 x 31 inches), built about one year after the exodus. Yet the Ark of the Covenant is unquestionably the main source of ancient Israel’s power. On several occasions, the Israelites used the Ark to defeat their enemies, before it is eventually captured by the Philistines.

The Philistines return the Ark to the Israelites, because outbreaks of “hemorrhoids,” “tumors,” and “deathly panic” afflict their people wherever it was taken. As these epidemics are similar to plagues previously inflicted on the Egyptians, it is reasonable to assume the Ark of the Covenant box contained Aaron’s rod and Moses’ staff. The New Testament confirms a tradition that Aaron’s rod was kept inside the Ark. (Hebrews 9:4)

On a few occasions, people reportedly dropped dead after touching the Ark or looking inside. Commensurate with the type of energy that caused these effects, the heavily guarded Ark box seems to have been purpose built to protect its contents. Actual power resided with the rod and staff, not the Ark. So the search for the lost Ark, which has always been a subject of historical intrigue, controversy, and conspiracy, is really the quest to recapture the missing rod and staff.

The Final Deception

Ark of the Covenant, Ralph McQuarrie

Ring and Scepter

Even in the original Hebrew, “rod” and “staff” have similar meanings. From limited descriptions in the Old Testament, we can surmise that both items were hand held. To fit inside the Ark neither object can be very long, but to differentiate between them one must be longer, or have obvious differences in thickness or weight. Since a staff is usually held for walking it must have a certain length, so the rod was likely shorter. The rod may also have been broader, cylindrical, or perhaps not solid. Considering the power the “rod” and “staff” reputedly transmitted, they must have been made of crystal and/or precious metals, but definitely not wood.

Because it is closely associated with “shepherd,” “staff” is a loaded word. For Shepherd Kings, the staff is the symbol of authority, the royal scepter. In Sumerian tradition, the ruler was granted kingship by the gods, and presented with a “scepter” and “ring,” which were originally understood as the actual power behind the throne, and *not* as symbols. So the “ring” was not a finger ring as such, and is only so-called because it is hollow. Beyond vague notions that they might be “measuring items,” scholars are unable to clearly identify these artifacts.

Gene Raiders of the Lost Ark

In Tablet IV of the Enuma Elish, reference is made to this staff and ring as unbeatable weaponry:

They rejoiced, and they did homage unto him,
saying, "Marduk is King!"
They bestowed upon him the scepter, and the throne,
and the ring.
They gave him an invincible weaponry which
overwhelmeth the foe.

The Annunaki god (right) with scepter and ring.

In the Sumerian myth of the goddess Inanna's descent to the "nether world," she is described as "holding the lapis-lazuli staff and ring in her hand." In the ancient world, lapis lazuli, a deep blue crystal, was customarily linked with royalty. Among the many legends surrounding King Solomon, who built the Jerusalem Temple to house the Ark of the Covenant, God gave him a lapis lazuli ring with which to command "demons."

The Koran and the Book of Revelation both feature a "Beast" that appears at the Last Judgment. According to the "Hadith," which are a collection of reported sayings of the Prophet Mohammed, the "*Daabba*, (Beast) will emerge, and will have with it the Staff of Moses and the ring of Solomon," and will "destroy the noses of the unbelievers."

The Final Deception

Babylonian king Hammurabi is presented with the scepter and ring

It seems “ring,” is a synonym for the “rod.” In Egypt, the divine *Shen ring* was often associated with a staff, and carried by the god *Horus* or the goddess *Nekhbet*. Represented in hieroglyphs as a circle with a tangential line, the shen ring is thought to symbolize eternal protection.

As a symbol of authority, the *Sekhem* scepter is an indispensable component of Pharaonic iconography. The word “sekhem” means “power” in Egyptian. From the earliest dynasties, *sekhem* appears in the royal names of the pharaohs, and later in the titles of queens and princesses. In depictions, the king usually holds a sekhem scepter in his right hand. The origin of the sekhem scepter is unknown.

“Staffs” of enormously destructive power surface in a variety of legends across the world. In Chinese mythology, the *Riyu Bang* is the ultimate weapon given to the immortal Monkey King, *Sun Wokong*, by the Dragon Queen of the East Sea. In Norse mythology, a giant gives Thor a weaponized staff, *Grioarvoir*, which is instrumental in saving Thor’s life in his dueld with Loki. In

Gene Raiders of the Lost Ark

India, the *Kaladanda*, known as the staff of Death, is believed to be the supreme lethal weapon used by *Yama*, god of the underworld.

The vulture goddess, Nekhbet, carries the “shen ring” in her claws

By the same token, “measuring rods” were standard accessories for ancient divinities. The Greco-Egyptian God *Serapis* and the Greek goddess *Nemesis* were depicted with rods. In the Book of Revelation, the angel has a “rod” with which to measure the temple of God ([Rev 11.1](#)). The Rig Veda describes Vishnu as “rod and Lord.” Until recently, the word for “rod” was used as a unit of length measurement throughout continental Europe.

Although they now appear lost to our collective memory, it seems two objects of enormous potency were tremendously important in the ancient world. Named for convenience sake as “rod” or “ring,” and “staff” or “scepter,” their origin is unknown.

Rabbbinic legend claims that the “rod” and “staff” were fashioned in heaven before the world began. And since these artifacts are unique, and cannot be reproduced, they were not manufactured by the Annunaki. Nonetheless, when possessed by them, the “rod” or “staff” were passed on to their hybrid representatives, such as Moses, when it was opportune to do so. In theory, both items changed hands many times.

From the Babel incident to the destruction of Sodom and Gomarrrah, the “rod” and the “staff” were tentatively responsible for a number of events ascribed in the Bible to the wrath of God.

The Final Deception

Successive empires in the Near and Middle East may have risen and fallen depending on who possessed the “rod” and “staff.” Did Sumer, Assyria, Babylon, Egypt, and the Hyksos kingdom of Israel under David and Solomon, take turns in holding the region hostage?

Life without the Ark

Suddenly, these weapons of mass destruction disappear, never to resurface, at least not in the public domain – “The glory has departed Israel” (I Sam 4:22). The Catholic Church, Knights Templar, and the Nazis are just some of the groups linked at various times to the legendary quest to find the “Lost Ark,” which acts as a smokescreen to cloak what is truly coveted – the “rod” and “staff.”

The totem of the ancient Israelites, the Ark of the Covenant was carried in front on the journey to Canaan, and during battles with the Canaanites, and was instrumental in bringing down the city walls at the siege at Jericho. Yet once Canaan was occupied, the Ark was allegedly put in cold storage for 350 years, abruptly reappearing during war with the Philistines, before returning to storage for another 20 years.

The Ark resurfaces when the divided Israelites are united under a monarchy. Kept by the army, King Saul did not use it. After David succeeds Saul, he brings the Ark to Jerusalem and celebrates by dancing wildly in public, events related in the First Book of Samuel, in which the Ark is repeatedly referred to as “The Ark of the Elohim.” David’s son Solomon builds a Temple to house it, and that is the last time we hear of the Ark.

The conquest of Jericho

Gene Raiders of the Lost Ark

According to the annals of his military victories transcribed on the walls at Karnak, Tuthmosis III campaigned throughout Canaan during and after 1457 BC, and it seems he was invincible. If the biblical exodus took place in or about 1476 BC, then the biblical claim that the Israelites warehoused the Ark of the Covenant somewhere in Canaan is likely a ruse, and the “rod” and “staff” were captured by the Egyptians.

Among modern historians, Tuthmosis III is widely considered a military genius. Recognized as Egypt's greatest general, he transformed Egypt into *the* international superpower. During his reign, he is reportedly captured an astonishing 350 cities in seventeen known military campaigns. How did he accomplish all of this?

Military analysts attribute Tuthmosis III's great success to having learned how to use the advanced weaponry and fighting techniques of the Hyksos. Yet his tactics were identical to those of the biblical Israelites. Tuthmosis approached his enemies city by city. He then put them under siege to weaken them until they finally capitulated. He would start with the smaller cities and gradually work upwards to the larger. He never failed.

Did Tuthmosis III use the “rod” and “staff” to smite his enemies?

The Final Deception

What happened to the Israelites after Solomon's demise? The Bible states Israel was divided into two kingdoms, north (Israel) and south (Judah). Ten tribes stayed in the north, and the tribes of Judah and Benjamin lived in the south. As Jerusalem was located there, the priesthood also resided in the south.

After the Assyrians invaded around 740 BC, the northern tribes are forcibly deported, becoming widely known thereafter as "the lost tribes of Israel." At the turn of the sixth century BC, when the army of the Babylonian King Nebuchadnezzar II invades the southern kingdom, the defeated population was carried back to Babylon.

In recorded history there is no mention anywhere of a mass expulsion from this region. Babylonian chronicles, however, confirm Nebuchadnezzar's siege of Jerusalem in 597 BC, and that a king of Judah stayed in Babylon, "Ya'u-kīnu, king of the land of Yahudu and five royal princes, his sons."

The Persian King Cyrus, as recent conqueror of Babylon, permits the exiled Jews to return to their homeland to rebuild the Jerusalem Temple. Cyrus' famous decree is recorded in the so-called *Cyrus Cylinder* but the text is specific to Babylon and Mesopotamia and makes no mention of Judah or Jerusalem.

Sumerian symbol of the *Anu* (above). Right, onyx eye stone inscription of Nebuchadnezzar II, showing both the symbol of the Anu, and two eight-pointed stars of Nibiru.

Whatever the historical facts, it seems without the "rod" and "staff," ethnic cleansing and gene raiding were absent from the Israelite résumé. Despite having created many enemies in the

Gene Raiders of the Lost Ark

region, the Hyksos still had friends in high places. Both the Assyrians and the Babylonians had the power to wipe them out, but chose not to do so.

For the priestly leadership in Jerusalem, the Babylonian “captivity” was probably more of a rescue than an exile. And insofar as they would later control the region and administer Jerusalem, the Persians oversaw the rebuilding of the Jerusalem Temple and the beginnings of what became known as “Second Temple Judaism.”

Ezra the priest, leader of the post-Babylon faction in Jerusalem, blamed the Israelites’ trials and tribulations on interbreeding with Gentiles (non-Israelites), singling out the Levitical priesthood in particular for committing this “sin.” Henceforth, ancestral genealogies to prove “purity” of descent were mandatory for those who served at the Temple.

The epithet “Jew” derives from the name Judah, the overwhelmingly predominant tribe from whom most of the population claimed descent. Technically, as most Israelites were not descended from Judah, most Israelites, including the priesthood, were *not* Jews.

Over the next centuries, “the Jews” repeatedly succumbed to foreign invasion, with all that that implies, and converts were accepted into the “Jewish” faith. No longer was it necessary for a “Jew” to have Israelite descent. Rival powerful factions with ties to foreign powers emerged with Judaism, such as the Sadducees and Pharisees, whose origins are untraceable. The original Hyksos core became another sect within Judaism.

Although it might appear the Hyksos had had the rug pulled from beneath their feet, they were far from finished.

4

The Two Christs

For hundreds of millions of Christians, Old Testament history is far less interesting than Old Testament prophecy. And since the New Testament is considered absolute proof that Jesus of Nazareth was the predicted “messiah,” Old Testament history is more or less unnecessary.

Most biblical scholars, however, agree the New Testament contains so many contradictions, non-sequiturs, presuppositions, and factual errors, it is virtually impossible to treat it as accurate history. Together, the testimony of the four Gospel writers is the stuff of a cross-examiner’s dream.

The Gospels were composed decades after the events they describe, but in a time when less than one per cent of the population was literate, even after two hundred years of New Testament scholarship, the jury is still undecided on the identity of the authors.

The Final Deception

Bloodlines in Conflict

The New Testament begins with the ancestry of Jesus Christ. To establish his “messianic” credentials, the Gospel of Matthew presents a genealogy of Jesus. The third Gospel, Luke, does the same. Ancestral genealogies were obligatory for providential figures, and since it was taken for granted the Messiah would be a descendant of King David, any genealogy of Jesus needed to prove Davidic descent. The names in the two lists of ancestors, however, differ wildly and cannot be reconciled.

Biblical genealogies do not for make scintillating reading (so and so begat so and so), so most readers skip them altogether. All the same, anyone taking time to study them cannot help but notice they differ not only on the identity of Joseph’s father, whose name was presumably in living memory, but on the *entire* Davidic lineage.

The Two Christs

The most popular solution to this thorny problem is that Matthew maintains Old Testament tradition so lists paternal forefathers in Joseph's ancestry, even though Matthew insists Joseph is *not* the biological father. Luke, not being as strictly "Jewish" as Matthew, cites Mary's paternal ancestry, despite no precedent for maternal genealogies existing anywhere in the archives of Judaism. Ancient Israelite culture was arguably the most patriarchal the world has ever seen.

Matthew's genealogy begins with Abraham; Luke traces Jesus all the way back to Adam, "son of God." It was not necessary for a genealogy to go back as far as Abraham, let alone Adam, and none that did would be believed. Furthermore, although Matthew and Luke name Joseph as the step-father, they both fail to name Jesus' biological father.

Clearly Matthew and Luke accessed diverse source materials to assemble their lists of names, and since neither list is likely to be historically accurate both were compiled for pedagogical purposes. For skeptics, the gross discrepancies between the names prove that at least one, if not both genealogies are fraudulent. But neither doubters nor believers have explained why Luke prefers the relatively unknown Nathan over his illustrious brother, the great hero King Solomon, of whom the Old Testament prophesies, "the throne of King Solomon would last forever over Israel" (*I Chronicles 22: 9-10*). Or likewise why Matthew lists the relatively obscure Jeconiah as an ancestor, about whom the prophet Jeremiah predicts, "He shall have no one to sit on the throne of David, or rule anymore in Judah" (*Jeremiah 22:30*). On face value, both lists make no sense.

Virgin Birth

Absent an explicit identification of the father, the Church was able to force its own interpretation onto the text. In other words, Matthew and Luke did not name Jesus' biological father because he had none. Mary's perpetual virginity was justified mainly by use of the Greek word for "virgin" in the infancy narratives when a

The Final Deception

King Solomon – *not* Jesus' ancestor in Luke's genealogy

literal reading of “virgin” was entirely out of context. *All* Jewish girls were described as virgins before marriage; and Mary is no longer described as a “virgin” after Jesus was born, which is the whole point of the doctrine.

Scholars, holding the view that Matthew and Luke advocate a virgin birth, concede virgin birth is a pagan concept alien to Judaic thought. It is assumed, therefore, that Luke was a pagan convert. No one has yet explained from where the more “authentic” Jew Matthew got the idea.

Ironically, the dynamics of how Mary conceived a child while preserving her virginity intact provided fertile breeding ground for all manner of cerebral hypotheses by Greek-speaking intellectuals. In due course, the world was introduced to the high theological concept of the Trinity. Simultaneously God, the Son of God, and the Holy Spirit, Jesus was the world's first and only hermetically sealed individual; spontaneously generated inside the womb of his mother; without sexual intercourse, lacking the sperm, chromosomes, and DNA of a human father, and devoid of the particular genetic signature of a paternal ancestry.

Still, the existence a family tree implies the subject's father is known. Not only does virgin birth negate the centrality of the bloodline principle upon which messianic Judaism was founded, it contradicts the requirement for genealogies.

The Two Christs

While both genealogies intend to prove Jesus' messianic legitimacy, neither implies a miraculous conception. More significantly, neither source tradition for the names listed by Matthew and Luke represents mainstream first century Judaism. So it is worth looking further into these names.

Matthew

If Israelite genealogies precluded the names of women, names of Gentile women were unthinkable. Yet Matthew lists four foreign women, Tamar, Rahab, Ruth, and the “wife of Uriah” (Bathsheba) in the pre-monarchic (from Abraham to David) section of Jesus' ancestry.

As described in the Old Testament narratives, each of these four women violate sacrosanct rules of sexual conduct which make them liable to punishment by death. Tamar disguises herself as a prostitute and seduces Judah, her father-in-law; Rahab is a “prostitute” in Jericho; the unmarried Ruth sneaks naked into Boaz's bed; and Bathsheba, the wife of Uriah, bathes naked in broad daylight. Yet all four are regarded by Jews as heroines because they risked their lives to further the Israelite cause.

Tamar disguised as a prostitute entrapns Judah (Genesis 38)

The Final Deception

Below, the prostitute Rahab helps the Israelite spies escape from Jericho

Boaz wakes to find Ruth in his bed, Louis Hersent, 1850

The Two Christs

Bathsheba at the bath entices the watching David, Sebastiano Ricci, 1725

The Bible records Tamar, Ruth, and Bathsheba as willing participants in sexual liaisons that produce offspring with men belonging to a specific Israelite lineage. Matthew's source for Rahab's role in this "messianic" lineage is unknown, though later rabbinic legend claims she married Salmon, a prince of Judah.

Significantly, none of these Hyksos Israelite forefathers – Judah, Salmon, Boaz, and King David – has foreknowledge of the sacred mission to which these foreign women were committed. So, while the mission's success does not depend solely on non-Israelites, it seems the research, preparation, and initiation did. This would suggest the provenance of the Messiah or Christ ideal was non-Israelite, which contradicts *all* Judeo-Christian theology.

The standard theological explanation for the Gentile women in Jesus' genealogy is that Matthew emphasizes Jesus as savior for the whole world, and not only Jews. A pious ideal, but one which conveniently overlooks the racial exclusivity expressed by the adult Jesus in Matthew's Gospel:

Go nowhere among the Gentiles....but go rather to the
lost sheep of the house of Israel. (Mt 10:6-7)

I have come only for the lost sheep of the House of
Israel. (Mt 15:24)

The Final Deception

Who are these “sheep” that so interest Jesus? Are they Jews in general? Or does he refer only to Hyksos Jews – Israelites directly descended from the ancient Shepherd Kings? The Hyksos no longer held the reins of power in Jerusalem, is that what makes them “the lost sheep.”

When he saw the crowds, he had compassion for them, because they were harassed and helpless, like sheep without a shepherd. (Mt 9:36)

Luke

Luke's pre-monarchic genealogy is basically the same as Matthew's (minus the four foreign women), but Old Testament genealogies do not mention Adam, let alone “son of God.” Publication of the Dead Sea Scrolls, however, has proven that divine begetting was thematic to the sect that secreted its sacred literature inside the caves at Qumran sometime before the Roman army arrived there in 68 AD.

When God has begotten the Messiah among them. (1QSa 2:11)

Not by coincidence does Luke list 77 names in Jesus' genealogy. A prophecy in the apocalyptic *Book of Enoch* predicts that the Messiah would deliver Israel 77 generations after the

The Two Christs

primordial fall of the angels (1 Enoch 10:11-12). Enoch describes this event as the coming of an eschatological “Elect One.” Luke is the *only* known writer to apply the same epithet to Jesus (Lk 9:35).

Because so much of its content was paraphrased, even quoted, in the New Testament, until recently scholars believed the Book of Enoch originated in the beginnings of the Christian era. With the discovery at Qumran of several Enochic manuscripts dating from the second century BC, this theory was shattered. The New Testament did not influence the Book of Enoch. The Book of Enoch influenced the New Testament.

And as the Parable of the Unjust Steward shows, an Enochic sect undoubtedly influenced Luke. Without repeating the whole of the parable, the punch line contains a reference to the “sons of light” (Luke 16:8), which is the favorite self-designation of the Qumran sect. No other ancient source exists for this title.

The gulf between ancestral names could be conjecture on the part of unconnected Christian groups, but the respective genealogies could just as easily belong to different people. The simplest explanation for two incompatible bloodlines is that they generated unique individuals.

Comparing the lists, an unmistakable break in the lineage occurs within the Davidic household, which is a rift that never heals. This strongly suggests two distinct persons of Davidic descent were recognized as the Messiah or Christ by one or the other faction that supplied names for their anomalous genealogies.

The First Birth

The Gospel of Mark is considered a primary source for both Matthew and Luke. All three gospels (usually known as *synoptic*, literally meaning “with one eye”) present a Jesus whose contemporaries knew him as a Galilean. Mark ignores the issue of Jesus’ birth so avoids the question Matthew and Luke attempt to answer. Why was Jesus a Galilean if he was born in Judea?

Matthew and Luke wrote independent birth narratives, but an actual birth is the *only* incident they have in common. Textual scholarship confirms Church tradition that Matthew is the earlier

The Final Deception

version. According to Matthew, Jesus was born “in Bethlehem of Judea in the days of Herod the king.” Herod was a Roman client, who most historians accept ruled Judea from 37 BC to 4 BC, based on the chronicles of Josephus. Matthew mentions Herod’s death and the start of his son Archelaus’ reign, which occurred sometime during Jesus’ early childhood. This dates Jesus’ birth somewhere between about 14 BC and 4 BC.

Matthew claims Herod wants to kill the newborn “king of the Jews,” so Jesus is taken to Egypt shortly after his birth. After Herod’s death, the holy family is afraid to return to Bethlehem because Herod’s son, Archelaus, is the new ruler of Judea. They move to Galilee instead. So Jesus was Judean by birth, but was raised a Galilean.

The glitch in this storyline is that Herod Antipas was the ruler of Galilee during this time; and since he was also Herod’s son he shared the family interest in eradicating would-be child-kings. Territory under Herod Antipas’ jurisdiction could only be considered a safe haven for Mary’s child if Jesus was *not* considered a threat.

So is the Bethlehem birth story pure fantasy? Some scholars argue it was invented because many Jews believed the Messiah would be born there. Yet Matthew’s Gospel is the *only* known source for this idea. Matthew specializes in the *pesher* method of interpreting prophecy, which means he reads recent events into ancient books of prophesy. Repeatedly, Matthew isolates a line or verse, and then reexamines it as though it had been written in direct reference to an incident in his narrative, in the process extracting meanings never intended by the original authors.

To justify Bethlehem as Jesus’ birthplace, Matthew misquotes the Old Testament prophet, Micah:

But you, Bethlehem Ephratah, though you are small
among the clans of Judah, out of you will come for me
one who will be ruler over Israel, whose origins are from
of old, from ancient times. (Micah 5:2)

Matthew’s version drops “Ephratah” from the original “Bethlehem Ephratah” because it refers to a dynasty, *not* to a physical location (Ephratah was the name of an eminent

The Two Christs

Bethlehem family, (Ruth 1:2, I Samuel 17:12)). What, then, was so important about Bethlehem? Why not simply describe a birth taking place in Nazareth? If the Galilean Jesus is the long-awaited Messiah, what difference does his birthplace make?

Unless it was common knowledge the Christ child *was* born in Bethlehem, Matthew would surely not have gone to these lengths. No matter where Mary's child was born, Matthew *had* to record Bethlehem as the birthplace, even though he gives no explanation for Mary and Joseph's presence there.

Massacre of the Infants

Frustrated in his attempts to pinpoint the location of the Christ child's birth, Herod the Great orders the death of all male infants under two years old in the Bethlehem area. But is there any historical truth in Matthew's version of the so-called "Massacre of the Infants?"

Historians consider this event fiction for two reasons. First, no record of this carnage exists anywhere else, and Josephus, who delights in listing the unpopular Herod's atrocities, omits what would have been the most heinous. Second, it reads as a crude attempt to match Jesus and Herod with Moses and the Pharaoh, who reputedly ordered the killing of Israelite children in Egypt.

In Herod's later years factional strife broke out in his family over the succession. Not unusual for dictators, Herod suspected those in his close circle of plotting against him. Responding violently, he ordered the murder of two of his sons, Aristobolus and Alexandros, in 7 BC and 4 BC respectively, for allegedly conspiring with their mother. In light of this, how would Herod have reacted to a newborn Messiah in his jurisdiction?

An alternative royal dynasty would have been nipped in the bud before it started. So Matthew's "Massacre of the Infants" most probably represents a theologically-inspired gross exaggeration of the facts, rather than a wholesale fantasy, since Herod likely targeted only *one* child.

The Final Deception

The Magi

The list of names in Matthew's genealogy of Jesus points to the existence of a hitherto unidentified group that kept family records. His material for Jesus' birth narrative most probably came from the same source.

For sure, parties with foreknowledge of the Christ child's birth would ensure the mother was as well-prepared as possible, and the birth place secure. Strange, then, that Mary's pregnancy should be unanticipated and unwelcome.

When his mother Mary had been betrothed to Joseph, before they came together she was found to be with child of the Holy Spirit; and her husband Joseph, being a just man and unwilling to put her to shame, resolved to divorce her quietly. (Mt 1:18-19)

Then, out of the blue, the *Magi*, enter the plot, and they do know about the birth. We are told the Magi, or "wise men," came to Jerusalem to ask for the whereabouts of the newborn "king of the Jews" so they could worship him. This notion is plausible only if the Magi had a death wish. Equally fantastic is Matthew's claim that Herod had a private discussion with the Magi before letting them visit the child unescorted.

For most Bible commentators, the famous three "gifts" of the Magi are self-explanatory. Gold is a precious metal; frankincense and myrrh are sweet smelling resins highly valued in the ancient world. The Magi, therefore, came to pay tribute to the "royal" child. Is it really that simple?

Ancient wisdom, specifically as it relates to herbs, metals, and the complex energy systems of the human body, remains for the most part a mystery. Some modern research, however, has shown that frankincense and myrrh can be used to increase blood flow and stimulate the pineal gland. Structurally altered gold, taken in powdered form, was understood by ancient Egyptians to induce short term changes in reality perception. Were these substances used by the Magi to facilitate the birth process in some way?

The Greek word "Christ" is used to explain the Hebrew concept "Messiah," which means "anointed one." While the root

The Two Christs

of both words remains obscure, it is not inconceivable that the Magi came to Bethlehem to perform an “anointing” of sorts.

No reason exists for Matthew to invent the Magi because *all* other Magi references in the New Testament are pejorative, and the early Church associated Magi with the Gnostic heresy. So who were the Magi?

Most speculation over their identity centers on the vague statement that they came from “the East.” Though the Magi are often thought to be Zoroastrian astrologers from Persia, “the East” customarily refers to regions beyond Mesopotamia – India, Tibet, or China. Non-canonical Church tradition alleges the Magi were ‘kings,’ and if true, then the type of “king” is not to be confused with a nation-state monarch otherwise it would be relatively easy to identify them.

As the root of such words as “magic,” “magistrate,” and “majesty,” *Magi* is an ancient term with profound meaning. All that can be safely said is that Magi-kings were highly respected members of a trans-national community that maintained a Christ tradition. And if Matthew’s genealogy of Jesus is anything to go by, women from this international group donated genetic material to the Hyksos on behalf of the “Christ” tradition.

The Final Deception

The Second Birth

Luke's gospel does not start with Jesus' genealogy, but with an introduction to the parents of John the Baptist – Zacharias the priest, and his wife Elisabeth. This is followed by a birth narrative of John, with which Jesus' birth is intertwined. The genealogy does not appear until midway through the third chapter, which raises the suspicion that what comes before was added later.

In Luke's schematization, John is born “in the days of Herod” (37 BC – 4 BC), and Jesus is born six months after John. At first this might appear to harmonize with Matthew's chronology, only Luke goes on to demolish his credibility with a Machiavellian explanation for Joseph and Mary's manifestation in Bethlehem:

In those days a decree went out from Caesar Augustus that all the world should be enrolled. This was the first enrollment, when Quirinius was governor of Syria. And all went to be enrolled, each to his own city. And Joseph also went up from Galilee, from the city of Nazareth, to Judea, to the city of David, which is called Bethlehem, because he was of the house and lineage of David, to be enrolled with Mary, his betrothed, who was with child. (Lk 2:1-5)

According to Josephus, Quirinius became governor of Syria after Augustus had banished Archelaus to Vienna, which happened in the tenth year of his reign, or 6 AD. The historian, Cassius Dio (c. 200), confirms that Syria acceded to Roman rule about 6 AD, which means Quirinius' first census could not have taken place earlier.

This particular Roman census was carried out only in Galilee, *not* in Judea. No reason exists for Joseph and Mary to travel from Galilee to Bethlehem, Judea. Luke contends that the census stipulated everyone return to their ancestral home for registration. Apart from the sheer logistical improbability, no record exists of any such requirement for any tax census in the history of the Roman Empire.

Clearly, Quirinius' census is a historical event seized upon by a resourceful Luke to persuade his readers that the Galilean Jesus

The Two Christs

was *truly* born in Bethlehem, when he almost certainly was not. Evidently, it was accepted as historical fact that Christ was born in Bethlehem. But why would Luke present his Jesus as that same Christ if he was not? Why indeed.

If Herod died in 4 BC, then Luke's Jesus was born at least ten years after Matthew's Jesus. Luke is the sole source for the idea that John the Baptist is six months older than Jesus, which also makes John ten or more years younger than Matthew's Jesus. The other three gospels give the impression of a mature John the Baptist, who has already established his reputation long before Jesus went public.

Return of Abraham's Family

For most New Testament scholars, there are few, if any, facts in Luke's opening chapter. It is generally considered a theological machination to emphasize John the Baptist's role as Jesus' forerunner, and as a bridge between the Old and New Testaments. But Luke is far more ambitious than that.

The infancy narratives of John and Jesus are modeled on Old Testament birth legends, and written in the same style of ancient Greek used in the formal translation of the Hebrew original. More specifically, the characters and plot mechanics replicate the Genesis dramas of Abraham's family. Hence Zacharias and Elizabeth are the new Abraham and Sarah. Both couples are elderly; Abraham and Zacharias "walk blameless;" Sarah and Elizabeth are "barren." Divine messengers tell Abraham and Zacharias that their wives will have sons, and both respond with incredulity.

Mary even refers to her pregnancy as the fulfillment of the Abrahamic covenant, "he has helped his servant Israel...as he spoke to our fathers, to Abraham and to his posterity forever" (**Lk 1:54-55**).

With his barren wife's permission, Abraham has a son, Ishmael, by Hagar, who is described as a *doule* (**Gen 16:3**) or "maid." Similarly, Luke presents Mary as a *doule* (**Lk 1:38**), then claims she visits the house of Zacharias immediately on being informed by the angel Gabriel about her upcoming pregnancy. At

The Final Deception

this time, Elisabeth is six months pregnant with John the Baptist. Mary abruptly leaves Zacharias' home after "about three months," and before Elisabeth has given birth. Six months later, Mary gives birth to Jesus.

Nothing in this story rings true. If Mary came to visit her pregnant elderly sister, then ostensibly it was to assist Elisabeth through the final part of her pregnancy. Yet Mary leaves precisely when she was most needed. The timeline implies Mary was impregnated while at the house of Zacharias, and nothing in the angelic message suggests she had already conceived. From the instant Mary's impending pregnancy is announced (Lk 1:35), to the moment it is acknowledged by Elisabeth (Lk 1:43), Zacharias is the only man mentioned in the narrative (Lk 1:40).

Are we supposed to figure out that Zacharias was Jesus' father as well as John's? And that Jesus was the favored second son of Abraham revisited, just as second born Isaac was Abraham's favorite? The firstborn Ishmael "grew up and lived in the wilderness (Gen 21:20), as does John the Baptist,

And the child grew and became strong in spirit, and
he was in the wilderness. (Lk 1:80)

The older versus younger fraternal dynamic, whereby God favors the second born, repeats throughout the Old Testament. According to Luke, a fetal John the Baptist leaps inside his mother's womb at the sound of Mary's voice – an idea meant to evoke the unborn twins Jacob and Esau (the older brother), fighting for supremacy while inside Rebecca's womb. In this way Jesus is linked to Jacob, founding Patriarch of the Israelites.

John the Baptist is widely accepted as a historical personality who made a huge impression during his lifetime, though little dependable information is known about him. But although the priest Zacharias features in later non-canonical literature, as well as in the Koran, his existence traces to Luke. And as we have already seen, Luke does not allow facts to spoil a good story.

The Temple priesthood was hereditary, but nothing about John the Baptist suggests he was ever a priest. According to Josephus, priests were the aristocrats of ancient Israel, long-established as a wealthy landowning class. Did John retire from

The Two Christs

this exclusive club at an early age to live on locusts and wild honey in the desert? More likely he was a never a member in the first place.

Priests married only daughters of other priests, so Zacharias' supposed wife Elisabeth was a priest's daughter. As Mary was allegedly Elisabeth's "kinswomen" (usually understood as sister), then Mary was also a priest's daughter, and her son therefore a priest. Was the Galilean Jesus really a priest?

This whole charade is designed to obscure the identity of the Galilean Jesus' father, and the truth about Jesus' conception, while simultaneously infusing neophytes with subliminal Hyksos myth. At the time of writing, Luke knew Christ's identity was a source of confusion. Having explained that the Galilean Jesus was one and the same as the Bethlehem-born Jesus Christ, Luke then claims John the Baptist was popularly mistaken for the Christ.

As the people were in expectation, and all were questioning in their hearts concerning John, whether he was the Christ. (Luke 3:15)

For his readers, this seems perfectly understandable. After all, the two men were family, about the same age, and both were speaking in public. The thorny "two Christs" issue is thus solved. Except John was well-known for predicting the coming Christ was somebody other than him:

Someone more powerful than I will come after me. I am not worthy to stoop down and untie the strap of His sandals. (Mt 3:11, Mk 1:7, Lk 3:16, Jn 1:27)

Baptist sects that venerated John are known to have endured in the region for centuries after his death, but none claimed to be followers of the true "Christ." In the sacred books of the Mandaeans of Iraq, who maintain they are descendants of John the Baptist's original disciples, Jesus (*Yeshu*) is described as a "devil Christ," who "stole John's teachings and spread fraud and malice around the world." Yet even the Mandaeans do not pretend John is the Christ.

The Final Deception

For the birth of Luke's Christ, there would be no outsider visitors, no herbs, spices, or precious metals. And above all, there was no interference from Herod.

Shepherds of the Nativity

Shortly after his birth, Jesus is visited by local “shepherds,” which hardly requires further elaboration. It is worth mentioning, however, that in the influential Book of Enoch's *Animal Apocalypse*, the end-time population of Israel (Jews of Hyksos descent) is divided into elite “shepherds” and rank and file “sheep.” None of the visiting “shepherds” are identified by Luke, but they would be high caste Hyksos by theoretically superior genealogy.

Adoration of the Shepherds, c 1625

According to Luke, an “angel of the Lord” informs these shepherds that the Christ child has been born in Bethlehem. They decide to visit Mary and Joseph and report what the angel has spoken. Then they return home “praising God for all they had heard and seen.” The story of the shepherds might seem an altogether pointless episode, but it would have satisfied Luke's

The Two Christs

constituency. After all, who better than “shepherds” to attend the newborn Good Shepherd?

Summary

- Matthew and Luke consolidate two separate births into one.
- The first child was born in Bethlehem, Judea. The second child was not.
- Matthew creates a nativity story for the second child using details from the birth of the first.
- Luke fabricates an infancy narrative for the second child pretending that he describes the birth of the first.
- Both Gospels misrepresent Mary, mother of the second child, as the mother of the first child.
- Both Gospels fail to identify the father of the second child, and neither parent of the first child.

Step by step, the “Word of God” unravels into a “web of deceit.” Nothing is what it appears to be. Nobody is who they seem.

5

Cosmic Identity Theft

To recapitulate: Ancient Mesopotamian clay tablets claim that the Annunaki created humankind. In reality, they engineered the Neanderthal slave race through a process of genetic experimentation and manipulation. The Cro-Magnon race represents an upgrade of the Neanderthal which eventually interbred with humans. The resultant hybrid-human bodies were vehicles for types of non-human consciousness. Untold centuries of hunting and systematically raping human females succeeded in blending Cro-Magnons out of existence and into the so-called “Modern” human race – Homo sapiens sapiens.

Kingship, caste system, and the priesthood were instituted in Sumer from among specific hybrid bloodlines. Sumerians are a race of unspecified ethnic origin. The same is also true of the Hyksos people, who began to call themselves “Israelites” sometime during the late second millennium BC. Since the Hyksos acknowledge Abraham, a high-ranking Sumerian, as their original Patriarch, the strong likelihood is that the Hyksos have Sumerian roots.

After Abraham was chosen by the Elohim (Annunaki) to initiate their “salvation” plan for humankind ([Gen 1:17](#)), the Hyksos began a policy of ethnic cleansing and organized mass

The Final Deception

rape. The extent to which the Hyksos failed or succeeded depended largely on possession of certain powerful artifacts of unknown provenance. Known as the “rod” and “staff,” the nature and origin of these objects was deliberately shrouded in obscurity by competing non-human elites.

New Testament Gospels describe a Hyksos pretender as the long-awaited Messiah. The genuine Christ existed, but his life and teachings are not the subject of the New Testament, which is composed primarily by Hyksos scribes, who are antagonistic toward mainstream Judaism.

* * * * *

The *modus operandi* of the Hyksos effectively boils down to two words: identity theft. The Elohim are not God; the Israelites are not Hebrew, and not even Semitic; Adam is not human; and Jesus of the New Testament is not the Christ.

Hebrews and Israelites

In the popular mind, as well as in academic circles, “Hebrew” and “Israelite” are synonymous. Nothing could be further from the truth.

Ancient Hebrew, the written language of the Old Testament, is understood by modern philologists to derive from an original Canaanite language, which is why Hebrew is called “the language of Canaan” in Isaiah 19:18. If Hebrew was spoken in Canaan long before the arrival of Abraham and the Israelites, then the original Hebrew speakers are the original Hebrews.

The term “Hebrew” is traditionally explained as an adjective derived from the name *Eber*, who is listed in Genesis as one of Abraham’s ancestors. As Abraham’s ancestors were Sumerians, who did not even speak Hebrew, this notion is implausible.

The Bible refers to Abraham as an “Ibri,” which is translated as “Hebrew.” Most Bible dictionaries explain *Ibri* means “to cross over,” and in the biblical context *Ibri* is generally taken to mean

Cosmic Identity Theft

“one who has crossed over the River Euphrates,” which is what Abraham and his retinue did. More accurately, the verb *bri* means to “cross over,” and the suffix *I*, when applied to a person, signifies their place of origin. *Ibri*, then, means literally “a person from the place of the cross over.”

In transposing or translating from Sumerian to Hebrew, dropping the *n* is normal practice. By calling Abraham an *Ibri*, the Bible refers to his Sumerian roots, which could not be identified as any known ethnicity. So Abraham was a *Nibri*. The Sumerian word *Nibiru* means “place of the crossing over,” and is also the name of the Annunaki home world, the planet that “crosses over” in reverse orbit around the sun. As an *Ibri*, Abraham is a Niburian, an Annunaki who birthed into a hybrid body with appropriate non-human genetics.

What the Bible refers to as “Hebrews” is a high caste Sumerian race – the Hyksos, who later coined the name “Israelites.” Essentially, the relationship between the Hyksos and the original Hebrew people of Canaan is similar to that of a serial murderer and rapist to his victims:

When you come to a city to fight against it, then proclaim peace. And it shall be, if it makes you an answer of peace and opens to thee, then it shall be that all the people who are found therein shall be your slaves, and they shall serve you.

And if it will make no peace with you, but will make war against you, then you will besiege it. And when God has delivered it into your hands, you will kill every male with the edge of the sword. But the women and the little ones, and the cattle and all that is in the city, even all the spoil thereof, you will take for yourself...

(Deuteronomy 20: 10-15)

The Hebrew identity was co-opted, and the Hebrew language was spoken, by the Hyksos. Naturally, original Hebrews are not specified among those tribes singled out for annihilation:

You will do this to all the cities which are very far from you, which are not of the cities of these nations.

The Final Deception

But of the cities of these people which God gives you for an inheritance, you will save alive nothing that breathes, but you will utterly destroy them, namely: the Hittites, the Amorites, the Canaanites, the Perizzites, the Hivites, and the Jebusites, as your God hath commanded you.

(Deuteronomy 20: 16-18)

The Victory of Joshua over the Amalekites, Nicolas Poussin, 1655

Twelve Tribes

We are told the Israelites were divided into twelve tribes, each tribe descended from one of Jacob's sons or grandsons. After Canaan was conquered, the land was partitioned into twelve territories with each tribe settling in a separate zone.

The number twelve features 187 times in the Bible, and not always in reference to the Israelites. Genesis mentions the twelve tribes of Arameans (Gen 22:20-24), and of Edomites (Gen 36:10-14), and the twelve sons of Ishmael, Abraham's son by Hagar (Gen 25:12-15). And as John Mitchell and Christine Rhone point out in *Twelve Tribe Nations*,

All over the world, in countries as far apart as China, Iceland, Ireland, and Madagascar, are records and

Cosmic Identity Theft

traditions of whole nations and their territories being divided into twelve tribes and regions.

Mitchell and Rhone itemize these twelve tribe societies, and explain they were governed by twelve principle gods, corresponding to the division of the year into twelve months and of the celestial sphere into twelve astrological houses. They reach a logical conclusion,

The more deeply we study the universal tradition of twelve tribe societies, the more splendidly apparent becomes the idea behind it: to create and maintain a perfectly balanced human order in harmony with the heavenly order.

A world of peace and harmony, home to a global family of the human race, evokes legends of a lost Golden Age, but unfortunately, the authors neglect to mention that these ancient twelve tribe nations were generally despotic slave-owning oligarchies constantly at war with each other. If there was a noble intent behind the twelve tribe nation ideal it preceded, and was distorted by, these cultures. Nonetheless, this does not mean humankind was not originally a twelve-tribe species.

The Hyksos were not so much concerned with “a perfectly balanced order,” as they were interested in consolidating diverse genetic material. When this process first began and when, or if, it ever ended, is moot. But clearly, Hyksos interbreeding was selective. Apparently, DNA from rival hybrid-human tribes was not a priority.

Whoever chose “the chosen people” did not pick humans. Through Old Testament myth-making, the Hyksos appropriated the original blueprint of twelve human tribes, and transposed it onto the twelve tribes of Israel – God’s elect. This subterfuge has been enormously successful.

Hebrews were targeted presumably because they are one of the original twelve tribes of humankind. But why was the Hebrew tribe settled in Palestine?

The Final Deception

Holy Land

What made a particular piece of real estate “sacred” to the ancients? Why did they conduct ceremonies, build monuments and temples at one specific location and not another? When Christianity became the state religion of the Roman Empire, monasteries and churches were erected on top of demolished pagan shrines that had previously been built on sites sacred to local cults. Was it simply for convenience sake?

Archeologists explain the location of “sacred sites” as a matter of chance. It just so happens they are where they are. They could just as easily be somewhere else. An alternative theory, as yet scientifically unproven, suggests that the spherical earth is sustained by an all-encompassing electromagnetic energy field or grid. As energies move through the grid network, vortices are formed at the physical locales of key junctions. These places were considered sacred by ancient civilizations because they were understood as gateways or access points to and from this and other reality systems.

Needless to say, this idea is dismissed as pseudoscience or wishful fantasy by those who believe *all* existing types of energy can be detected and measured by contemporary mechanical instrumentation. For those who accept the existence of “sacred sites,” certain albeit unrecognized energies influence, and can be detected by, the human body.

Cosmic Identity Theft

Whatever the case, ancient tribes considered themselves as guardians of sacrosanct places, despite drawing no obvious strategic, geographic, or material advantages from them. The “holy” city of Jerusalem, for example, is located 2,500ft above sea level, in an area where water has always been scarce. Yet during its recorded history, Jerusalem has been destroyed at least twice, besieged 23 times, attacked 52 times, and captured and recaptured 44 times. The Abrahamic religions, Judaism, Christianity, and Islam, have fought amongst themselves over Jerusalem, and specifically the Temple Mount, for the best part of two thousand years. Why?

Ceramic evidence indicates that the site of present-day Jerusalem was inhabited during the fourth millennium BC, long before Abraham was born. People speaking Northwest Semitic languages are known to have lived there from the early third millennium BC. Is the original Hebrew tribe the custodian of Jerusalem?

Temple Mount, Jerusalem

According to Josephus, the Hyksos army captured Jerusalem in 1550 BC after leaving Avaris. Egyptian archives record Jerusalem as a vassal to the Pharaohs shortly thereafter, and for over 400 years more. The Bible claims Jerusalem was not conquered during the Israelite invasion of the Promised Land despite repeated attempts to do so. Not until King David (c 1010 BC) was Jerusalem occupied by the Israelites, after which time it

The Final Deception

became known as the “city of David” and capital of the United Kingdom. In typically euphemistic style, the Old Testament records:

“After he left Hebron, David took more concubines and wives in Jerusalem, and more sons and daughters were born to him.” (2 Samuel 5:13)

This particular information translates as follows:

“Adoption of the Hebrew identity followed the assimilation of local genetics, and was cemented with the capture of Jerusalem.”

Stealing Christ

Obvious from the disparate genealogies of Jesus, the messianic bloodline hit a fork in the road with King David. Two distinct lineages branch out, one set in motion by Solomon, the other by Nathan, both supposed sons of David and Bathsheba. While Solomon is only second behind David in the illustrious pantheon of Israelite leaders, Nathan merits only three mentions in the Bible, and nothing of his life is recorded.

As mentioned in the last chapter, references to Jesus’ maternal ancestors in the Gospel of Matthew are witness to a non-Israelite, or non-Hyksos, group that engineered births in the messianic line. But Matthew does not mention the name “Bathsheba.” She is cited only as “the wife of Uriah the Hittite,” which draws attention to her adultery with David. Why would Matthew do that? He boldly names Tamar, who commits adultery with Judah, even while she was married to his son.

The story of David and Bathsheba is told in 2 Samuel 11. While walking on the palace roof one afternoon, David spots Bathsheba bathing naked, and arranges a rendezvous with her. Bathsheba is pregnant, and so that her husband, Uriah, might believe the child is his, David brings him back from military duty presuming he would sleep with his wife. However, Uriah refuses due to the soldier’s code of conduct. Duly dispatched to the

Cosmic Identity Theft

frontline, Uriah is killed in battle. Thereafter, David marries the widowed Bathsheba.

Her apparent status as pariah must be connected more to her “mission” than her biblical legend because David is far more culpable. The Hebrew form of the name “Bathsheba” means “daughter of the oath.” It seems Matthew cannot bring himself to mention the name Bathsheba because the genuine Jesus Christ was her descendant. Bathsheba is the “fork in the road.” Nathan, the Israelite “prophet,” may have known something of Bathsheba’s “mission” as he is reportedly persuades David to make her son Solomon heir to the throne.

Why did Luke trace the Galilean Jesus from Nathan, another son of Bathsheba, if she was anathema? Why did Luke not list a son from one of David’s other wives? In the same way Bethlehem was too well-known as the Christ’s birthplace to delete from a birth story, so Bathsheba was well-known as the Christ’s maternal ancestor. And since the sole purpose of Luke’s genealogy is to supplant the genuine Christ with the Galilean Jesus, Luke mentions the only other recorded son of David and Bathsheba. So Nathan distinguishes the Galilean Jesus from Jesus Christ.

A genuine Christ would necessarily descend from David, but not from Solomon. As Luke immodestly points out in his introduction, he can be relied upon to set things straight:

Since I myself have carefully investigated everything from the beginning, I too decided to write an orderly account for you, most excellent Theophilus, so that you may know the certainty of the things you have been taught.

(Lk 1:2-4)

Secrets of the Galilean

New Testament scholars have never managed to reach a consensus over for the so-called “messianic secret,” a hypothesis that derives from the numerous instances in the Gospel of Mark, and elsewhere, in which

The Final Deception

Jesus instructs his disciples to keep quiet about his identity. For example,

But who say ye that I am? Peter answered and said unto him, Thou art the Christ. And he charged them that they should tell no man of him. (Mark 8:30)

Tellingly, only the introductory first line of Mark's Gospel identifies Jesus with "Christ," "The beginning of the gospel of Jesus Christ, the Son of God." Thereafter in Mark, "Christ" as a name is never applied to Jesus.

"Demons" feature prominently in Mark's gospel. At one point, Jesus warns exorcised demons not to speak about him:

They brought to him all who were sick or possessed with demons....And he healed many who were sick with various diseases, and cast out many demons; and he would not permit the demons to speak, because they knew him. (Mark 1: 32-34)

If demons knew Jesus, then why does Mark not clarify who the demons knew Jesus to be? Later, in a strange incident, the Galilean Jesus dismisses the young daughter of a Greek woman as a "dog," but then removes her child's demon after her mother agrees with him that her daughter is a dog.

But immediately a woman, whose little daughter was possessed by an unclean spirit, heard of him, and came and fell down at his feet. Now the woman was a Greek, a Syrophenician by birth. And she begged him to cast the demon out of her daughter. And he said to her, "Let the children first be fed, for it is not right to take the children's bread and throw it to the dogs." But she answered him, "Yes, Lord; yet even the dogs under the table eat the children's crumbs." And he said to her, "For this saying you may go your way; the demon has left your daughter." (Mark 7: 25-29)

Though this scene shows the Galilean Jesus as both a racist and a narcissist, his ability to remove demons is assumed by

Cosmic Identity Theft

Christians to be a Christ-like quality. The ancients, however, believed demons existed in strict hierarchies, and most demons feared higher ranking demons.

John said to him, “Teacher, we saw a man casting out demons in your name, and we forbade him, because he was not following us.” But Jesus said, “Do not forbid him; for no one who does a mighty work in my name will be able soon after to speak evil of me.”

(Mark 9:39-40)

What was understood by “demon?” Unlike run of the mill “fallen angels,” demons were unequivocally committed to the “dark” side. Believed to come from an abyss, or type of bottomless pit, somewhat akin to modern interpretations of a black hole, demons were thought to sustain themselves by drawing vitality from people. It was commonly accepted that certain demons birthed into human bodies to spread chaos and destruction. The Romans knew demons with notoriously sexual cravings as *incubus* or *succubus*.

All the synoptic Gospels record an accusation leveled at Jesus that he exorcised demons through the power of Beelzebub, the prince of demons. Jesus’s reported response does not stand up to examination,

If a kingdom is divided against itself, that kingdom cannot stand. And if a house is divided against itself, that house will not be able to stand. And if Satan has risen up against himself and is divided, he cannot stand, but is coming to an end.

(Mark 3:24-26)

If “evil” kingdoms or houses compete, the name of the victor may change, but the rule of evil, or “Satan,” still stands.

One possible explanation for the so-called “messianic secret” is that the Galilean Jesus *knew* he was not the Messiah and he knew who was. Were his true identity be made public, it is not inconceivable the Galilean Jesus would be summarily killed by a mob.

The Final Deception

In any event, his audience was Hyksos Jews – “lost sheep of the House of Israel,” – confusion with the genuine Christ would come later. As Paul intimates in his second letter to the Corinthians, written around 50 AD,

For if someone comes to you and preaches a Jesus other than the Jesus we preached, or if you receive a different spirit from the one you received, or a different gospel from the one you accepted, you put up with it easily enough. (2 Corinthians 11:4)

After a two-century-long quest to find “the historical Jesus,” more and more scholars now interpret the New Testament Jesus character as a composite, if not entirely fictional figure, drawn mainly from pre-existing pagan archetypes. This assessment is at best a half-truth, because textual evidence reveals “Gospel Jesus” not merely as a fraud, but as an *imposter*. And the existence of an imposter Christ implies the existence of a *genuine* Christ.

The Historical Christ

Holding the manufactured position that the *Jesus of history* is not the same as the *Christ of faith*, most theologians and clergymen remain steadfastly unimpressed with efforts to uncover historical truth. All the same, a more accurate assessment is surely that the “Christ of history” is plainly not the same person as the “Jesus of faith.”

The English name “Jesus” comes from the Greek *Iesous*, which is a transliteration of the Hebrew name *Yeshua*, an extremely common name in first century Palestine. In his *Antiquities*, the first century Jewish historian Josephus mentions no fewer than nineteen different “Yeshuas.”

“Yeshua” has its origins *Yehoshua* in which the first part “yeho” supposedly refers to YHWH, the *Tetragrammaton* or supposed proper name of the Israelite God (*YHWH Elobim*). *Yehoshua* literally means “YHWH saves.” The meaning and source of YHWH is unknown, but it is generally assumed to have been vocalized as “Yahweh.” During the second and third

Cosmic Identity Theft

centuries BC, pronunciation of the Tetragrammaton was avoided or forbidden. To prevent accidental voicing of YHWH, Yehoshua was truncated to *Yeshua*, or, in Galilee, to *Yeshu*.

The name of Moses' successor, "Joshua," the exemplary Israelite warrior hero, is an Anglicization of "Yeshua." Thus the name of the Galilean "Jesus" was effectively a Hyksos title. For that reason alone, the earlier-born Judean Christ was unlikely to have been named "Yeshua," but rather a similar sounding original Hebrew name upon which Hyksos names were based.

One of the world's most secretive religions is that of the Druze minority of Lebanon, Syria, and Israel. Druze do not proselytize, do not publish a theology, and access to Druze texts is forbidden to outsiders. Druze firmly believe keeping secrets is fundamental to their survival. From the little of what is known of them, the Catholic Encyclopedia records,

The Druze teach a distinction between Jesus, the son of Joseph, and the Christ. Christ instructed Jesus, but finally Jesus disobeyed Christ...

Druze tradition, therefore, would support the contention that the Gospels reference two births. Furthermore, not only was the son of Mary and Joseph *not* the Christ; he was educated *by* the Christ. In Druze lore, both men were known as "Jesus." The older Jesus Christ was born an Essene, and mentored the younger Jesus before the Galilean chose an alternative path, which is partly recorded in the New Testament.

If the historical Christ did not surround himself with disciples; did not indulge in heated public arguments with Pharisees; taught differently from the Galilean Jesus; and most of all, did not calculate and predict his own demise, then what did he do? That is surely the authentic "messianic secret."

The Final Deception

Druze elders meet in Damascus in 2013

Essenes

The Essenes are one the great unsolved mysteries of the Biblical era. Our main source of information on them comes from Josephus who describes Essenes as one of the three principle sects of Jewish philosophy alongside Pharisees and Sadducees. Though he fails to explain their origins, Josephus portrays at least two Essene factions with contradictory beliefs and practices. One group is an all-male celibate commune; the other is family-oriented. While one is peaceful, contemplative, and detached from worldly ways; the other is fixated on ritual, and biblical prophecy, and is closely aligned with the regime of Herod the Great.

About twenty years before Josephus, the Roman writer Pliny the Elder (died c. 79 AD), mentioned the Essenes in his *Natural History*. According to Pliny, Essenes do not marry, have no money, and congregate together in the Dead Sea

district as a means to escape from reality. Since the discovery and publication of the sectarian Dead Sea Scrolls, most scholars regard them as Essene literature, and the nearby settlement at Qumran as an Essene stronghold.

Cosmic Identity Theft

To explain the existence of two apparently incompatible groups both named “Essene,” a number of scholars subscribe to the “Groningen hypothesis,” which postulates that a schism within the Essenes took place at a time as yet unspecified.

Although the identity of those responsible for the Dead Sea Scrolls is unproven, no one argues they were not a patriarchal, militaristic, legalistic, exclusivist, messianic apocalyptic sect at odds with mainstream Jewish society, and fervently anti-Roman. Considering themselves the “true Israel,” they venerated Old Testament patriarchs in general, and Enoch in particular. More than anyone else in history, they combed through their sacred books to extrapolate on the “Messiah.” Everything points to them being Hyksos Jews.

Not limited to any cult, religion, or political persuasion, the Hyksos are whoever the Annunaki agenda requires them to be at any given time. After their expulsion, not all Hyksos left Egypt, and not all remaining Hyksos were slaves. Established high-ranking Hyksos families within elite Egyptian society, maneuvered under other names to regain the Pharaonic throne.

For example, the Eighteenth Dynasty Pharaoh, Amenhotep III (c 1390 -1350 BC), discontinued all wars in Canaan, and the 14th century BC diplomatic correspondence known as the *Amarna Letters*, shows that he offered one of his daughters in marriage to the Babylonian king, which is unprecedented for an Egyptian Pharaoh. Moreover, almost all the tablets found at Amarna are written in Sumero-Akkadian, rather than Egyptian, which is also unique.

Amenhotep III’s second son, who became known as Pharaoh Akhenaten, distanced the Egyptian monarchy and administration from the entrenched priesthood and temple cults, by famously moving his capital from Thebes to modern day Amarna (Akhetaten). During this period, Akhenaten built a temple in Heliopolis (Cairo) dedicated to the *Aton*, the meaning of which remains a mystery. Heliopolis was the capital of the province of

Amarna letter, Sumero-Akkadian writing on clay tablet

The Final Deception

Goshen in the Nile Delta, heartland of the Hyksos in Egypt. And as with the Hyksos Pharaohs of the Fifteenth Dynasty, all public traces of Akhenaten were removed after his death.

In 1897, a vast collection of documents and fragments dating from the 10th century onwards was discovered in Cairo. A number of them matched a Dead Sea Scroll known as the Damascus Document, not found until 1947. For at least a thousand years after Qumran was destroyed by the Romans, someone was obviously determined to preserve the sect's traditions.

In his book, *The Mystery of the Copper Scroll of Qumran*, metallurgist Robert Feather demonstrates that the chemical composition of the Copper Scroll, found in a cave near Qumran in 1952, is identical to copper produced in Eighteenth Dynasty Egypt. The Copper Scroll is an engraved list of locations where various types of treasure are allegedly buried. The numbering system, and the system of weights used are based on ancient Egyptian systems from at least 1200 BC. The script is a mixture of Egyptian, ancient Hebrew, Greek, and Akkadian. Writing that was clearly important to, and part of the inheritance of, the Qumran sect.

Until Feather's analysis, large Greek letters systematically placed on the Copper Scroll had proved a code impossible to decipher. Feather shows that the first ten letters spell AKHENATE. While his findings are not disputed, scholarly convention dictates that it is impossible for the Qumran Essenes to have known Akhenaten, or even the lost city of Akhetaten, because they were not discovered until 1887.

Copper Scroll found at Qumran

Cosmic Identity Theft

Various publications detail undeniable similarities between the Dead Sea Scrolls and the New Testament, and different conclusions are drawn. Most authors think John the Baptist was connected with the Qumran sect, and some think Jesus also knew them. Everyone agrees, however, that whoever wrote the sectarian books shared the Gospel writer's contempt for the Jerusalem authorities.

As representatives of Second Temple Judaism, Pharisees and Sadducees are repeatedly disparaged in the New Testament, while Essenes do not merit a single mention. This is often taken to imply the early Christians were Essenes, and that the Galilean Jesus was therefore an Essene. There is much more to it than that.

To airbrush the genuine Christ out of the historical picture, the early Church took a totalitarian approach. In other words, the real Christ and his “community” were expunged root and branch. Genuine Essenes were strictly taboo.

So who were the genuine or original Essenes? In denigrating Essenes as a whole, Pliny happens to mention that “they had existed for thousands of generations.” Exaggeration by ancient historians is not uncommon, but even two hundred generations is 4000 years, and predates the Abrahamic era by two millennia. Pliny’s point, then, is that Essenes were an ancient ethnicity in the region that predated the Jews. Are Essenes the original Hebrews?

The Final Deception

From the Old Testament, we know that a non-Israelite faction intermittently cooperated with the ancient Israelites in matters of genealogical significance. If Druze tradition is based on fact, and the Essene Jesus Christ taught the Galilean Jesus, the Hyksos Yeshua, then this age-old collaboration was revived early in the first century AD, if not before.

At some point, there was a parting of the ways – violent or otherwise. If the Hyksos had not already assumed the Essene identity long before, they did so afterward. Did the Hyksos seize an opportunity to advance the Annunaki agenda? Most probably.

Son of man

But when the Son of man comes in his glory, and all the angels with him, then he will sit upon his glorious throne. All the nations will be gathered in his presence, and he will separate them as a shepherd separates the sheep from the goats. (Matthew 25:31-32)

Although this passage defines the Annunaki design, as with most sayings of the Galilean Jesus it is invariably interpreted through a theological prism that distorts its meaning. No biblical phrase has acquired more manipulative ideological detritus than “Son of Man.”

In the traditional perspective, “Son of man” is the natural counterpart to “Son of God.” As “Son of God” affirms the Galilean Jesus’ “divinity,” so “Son of man” affirms his “humanity.”

Cosmic Identity Theft

Jesus separates the sheep from the goats. Mosaic, Ravenna, Italy, 6th century.

The expression “son of man,” which is a translation of the Hebrew *ben Adam*, occurs 107 times in the Old Testament. Supposedly a generic term for “human being,” *ben Adam* literally refers to an offspring of Adam. As already explained, “Adam” is the name of the prototypical hybrid-human ancestor. As a vehicle for Annunaki consciousness, *ben Adam* symbolizes the antithesis of humanity. Some rabbinic literature and writings of the Kabbalah expand on the “original” Adam as the ideal template of a future perfect race, the so-called *Adam Kadmon*.

In the New Testament, the phrase “the Son of man” occurs 81 times in total, 69 times in the Galilean Jesus’ sayings, and always with the definite article in ancient Greek. This interests textual scholars since the definite article is not used this way in the Old Testament, or in other surviving Greek documents of antiquity.

But “*the* Son of man” is used as a definite title in the Book of 1 Enoch, several Aramaic and Hebrew fragments of which were discovered at Qumran, and which most specialists date from between 150 BC and 50 BC. According to Enoch, God will punish fallen angels and wicked humans in the Last Days through an eschatological figure known as “the Son of man.” This will happen seventy seven generations from Adam.

The Final Deception

And he answered and said unto me: This is the Son of Man who hath righteousness, With whom dwells righteousness, And who reveals all the treasures of that which is hidden, Because the Lord of Spirits hath chosen him, And whose lot hath the pre-eminence before the Lord of Spirits in uprightness forever.

And this Son of Man whom thou hast seen shall rise up the kings and the mighty from their seats, And the strong from their thrones And shall loosen the reins of the strong, And break the teeth of the sinners.

Listed as the seventy seventh name in Luke's genealogy, the Galilean Jesus is meant to be understood as Enoch's prophesied "Son of Man." So what is meant by "*the* Son of man?"

The definite article distinguishes this "Son of man" from all others. It is an upgraded model of a genetically engineered species. As an ongoing project, not only was the "Adam" open to

improvement, its purpose was to progress toward the true Adam, or Adam Kadmon, who carries the maximum DNA potential without actually being human. For this reason, the Hyksos branch of Adamic hybrids gave themselves a license to continue bloodline agendas.

Authors of the New Testament considered Jesus of Galilee to be *The* Son of man, the perfect "Last Adam," implying he had achieved a genetic advancement.

Adam Kadmon, Hildegard Von Bingen, c 1240

The Last Adam

Cosmic Identity Theft

The first man Adam became a living being; the last Adam, a life-giving spirit. (I Corinthians 15:45)

Nevertheless death reigned from Adam until Moses, even over those who had not sinned in the likeness of the offense of Adam, who is a type of Him who was to come. (Romans 5:14)

Written before the Gospels, Paul's epistles reveal next to nothing about the Galilean Jesus. They explain only Paul's theology, which is unrelated to historical fact.

Inside Judea, things did not pan out exactly how the Galilean Jesus had expected, and not enough Jews of Hyksos descent responded positively. News of his demise at the hands of the Romans would definitely create the impression of failure. So for Diaspora Jews scattered throughout the Roman Empire, who numbered more than double the approximately two million Palestinian Jews, Paul put a different spin on events.

Millions have pondered and debated the finer points of Paul's message. He has been credited with, and accused of, spreading the idea of salvation by "faith" in a crucified savior. He is admired for waxing lyrical about "love," and at the same time blamed for institutionalizing chauvinism, intolerance, and dogmatism.

Despite its popularity with Christians, Paul's "Adam" theology is construed by critics as a highly ambiguous personal interpretation, and a convenient way of insinuating Genesis into his salvation scheme. Some question whether Paul genuinely believed Adam was the historical first man.

It hardly matters. Paul's interest was the non-human Adamic race. Having long since assumed human identity, non-humans may genuinely believe they are human, but they are not. For Paul, Genesis Adam was only a "type of Him who was to come." Adam was never the original human blueprint. The hybrid Adamic race would advance and evolve to the point of the "Last" Adam – the Galilean Jesus.

The Final Deception

But Adam implies Eve. So where is the Last Eve? In Paul's salvation theory, crucifixion of the "Last Adam" atones for the "sin" of the first Adam, but the principle blame for "sin" is attached to Eve, who was seduced directly by the serpent. So why does Paul leave Eve out of his restoration process?

Was this misogyny due to his literal belief that a talking snake had tricked a woman into eating a fruit? Or did Paul associate Eve with being human? Did not the Annunaki agenda require the "Adams" to assimilate genetic code from a human "Eves?"

Paul, along with the Gospel writers, portrays the Galilean Jesus as though he was a thirty year old asexual virgin bachelor. Paul takes this absurdity a step further by making him the poster boy for a race of sexual predators. And that being the case, surely the "Last Adam" would be the raider-in-chief?

What did the Galilean Jesus accomplish for the Hyksos agenda to qualify him as the Last Adam? Beyond the veils of silence and secrecy, clues exist, but first a long overdue investigation of the Galilean Jesus' background is in order.

6

Mary, Joseph, & John

In the absence of forensic evidence, most New Testament scholars agree the identity of the Galilean Jesus' biological father will always be unknown. As an unsolvable mystery at the very foundation of the Christian faith it is a subject best left alone.

Jesus' biological mother is altogether different. Whether or not she was descended from King David, Mary was a simple Jewish girl. Expected to follow the rigorously codified laws on sexual behavior, and observe the decrees on marriage passed down by scriptural tradition, any controversy surrounding her pregnancy would have ended with her marriage to Joseph.

With one or two exceptions, that is about the extent of academic research into the Holy Family. So profound and multi-layered is the web of distortion underpinning the New Testament investigation into the Galilean Jesus' origins is stalled before it even begins. Fortunately, historical information is not conveyed by the written word alone.

The Final Deception

The Dark-skinned Woman

Archeologists, historians, folklorists, psychologists, and scholars across many disciplines, know from experience that the past is often revealed through works of art, deliberately or unintentionally. And *all* the earliest images of Mary contradict her accepted myth.

Scattered throughout Europe, around 500 mostly wood statues and paintings depict the Madonna and child with dark brown skin. Despite concerted efforts by the Church to explain away the coloration as soot or age patina, each “Black” Madonna is the focal point of a cult stirring such devotion in the faithful that the Church now seeks ways to exploit them.

Mary, Joseph & John

Many Black Madonnas are located in Eastern Europe, but over sixty per cent are found in France, and most of them in the south, where alternative legends of the Virgin Mary circulate. Studies into the history of the Black Madonnas indicate this depiction of Mary and child is the original model. Later, when all representations of the Madonna were monitored by the Inquisition, the white Madonna became the official standard.

But why would white-skinned Europeans portray their most sacred icons with dark skin?

Some researchers wax poetic on the eternal significance of the ancient mother Goddess whose dark skin mirrors the dark soil of the earth; others explain reverence of the Black Madonna is merely a continuation of Isis worship, and Isis was black. Although the Church did borrow extensively from pagan tradition, the presupposition that Mary was a native Palestinian blurs the palpably obvious. Early Christians knew Mary was brown-skinned and depicted her complexion as accurately as possible.

The Final Deception

Almost all the women associated with the Galilean Jesus happen to be named “Mary.” *Mary*, mother of Jesus; *Mary* Magdalene; *Mary* of Bethany; *Mary* mother of James the younger; *Mary* mother of John Mark; *Mary*, the wife of Clopas, and *Mary* of Rome. Is it purely coincidental? Or is “Mary” (Hebrew, *Miriam*) only a title used to conceal their background and their real names from the uninitiated?

In the Dead Sea Scrolls, none of the main protagonists are identified by their real names. Use of aliases and stylized names appears standard practice within the Hyksos cult.

The Black Madonna's fine facial features give her an unmistakably south Asian appearance, and not North African. From the large hordes of Roman coins discovered in Indian port cities, archeologists know that bilateral trade between western India and the Roman Empire peaked during the first century CE, after Rome had conquered Egypt and opened up the Red Sea, and before the rise of Islam closed contact between India and the West. During this time the prosperous Jewish business community in India had its Indian counterpart in Judea.

No documented migration of people from India to the Middle East exists, but one group of Indians is known to have traveled west in this period. Known later in Europe as “Gypsies,” they are

Mary, Joseph & John

the predecessors of today's Romani people. By all accounts, white Europeans assumed these Indians came from Egypt due to their dark skin.

Gypsy society is tightly closed to outsiders, and there is no tangible evidence of their history or religious beliefs. Much Gypsy folklore, however, is centered on the infant Jesus. Gypsies (Romani) still teach their young that Jesus was protected by Gypsies after he was taken to Egypt after his birth. One legend claims the nails used by the Romans to crucify Jesus were made by a Gypsy blacksmith. Originally, the Romans told him to make four nails, but he withheld one at the last minute when he learnt their purpose. As a result, Jesus was fixed to the cross with three nails, and spared the agony of a nail through the heart.

All European states, with the support of Catholic, Protestant, and Orthodox churches, have had laws to repress or expel Gypsies at one time or another. Strangely, anti-Gypsy sentiment was sporadically whipped up by an accusation that Gypsies refused to help the infant Jesus along his journey to Egypt.

Sarah the "Black, patron saint of Gypsies

The Final Deception

The patron saint of Gypsies is Saint Sarah, or “Sarah the Black.” Every year a mass pilgrimage of Gypsies visits her holiest shrine on the coast of southern France, where legend states that Sarah arrived together with the so-called “Three Marys,” the three women who allegedly came to the tomb of Jesus in Gethsemane. The iconography of Saint Sarah resembles a carbon copy of the Black Madonna.

The authors of the groundbreaking book, *Holy Blood, Holy Grail*, suggest Sarah is actually the daughter of Jesus and Mary Magdalene, an idea repeated by Dan Brown in *The Da Vinci Code*. But if that is the case, is Sarah not a dead ringer for her grandmother?

The “Jewish” population of Judea was divided into three castes of pure blood descent—priests and Levites, who were from the tribe of Levi; and pureblood Israelites from the remaining tribes. A fourth social group was for those judged to be “impure,”

Mary, Joseph & John

which included illegitimate births, and the families of Gentile converts.

Because it was accepted that Christ was Davidic, Matthew and Luke show Davidic genealogies for the Galilean Jesus, but neither genealogy connects to Mary or the biological father. So no reason exists to suppose Jesus was Davidic, or even a pureblood Jew.

The modern Church is disinclined to prohibit veneration of the Black Madonna since it has exploited the cult of the virgin for almost two thousand years. But if it were ever to consider a ban on the Black Madonna, the Church would have to explain why. And it could never do that.

The story of the Black Virgin may also include a heretical secret with the power to shock and astonish even post-Christian attitudes, a secret, moreover, involving political forces still influential in modern Europe.

Ean Begg, *Cult of the Black Virgin*

The Cover-up

Before her theological profile was fully developed, the Galilean Jesus' mother was a major embarrassment. Mark records nothing of Jesus' birth, affords no special honor to Mary, and does not even mention Joseph. No reference is made to Mary in the earliest extant version of the Gospel of John.

Mark records an incident when a group of neighbors refer to Jesus as the "son of Mary" (Mk 6:3). In this staunchly patriarchal society, maternal identification was an insult usually reserved for someone whose parents were not married. In the Gospel of John, some Pharisees respond to Jesus with the terse comment, "we were not born of fornication" (John 8:4), implying that he was. Chances are most Pharisees regarded Jesus as illegitimate, a *mamzer*, worthy only of disdain. The same accusation is made by later rabbinic writers who condemn Mary.

If the Galilean Jesus was looking for wider acceptance, the charge of illegitimacy was the most damaging of all, as it

The Final Deception

disqualified him from any kind of leadership role in the Jerusalem Temple cult that was first century Judaism.

In the birth narratives, Mary is portrayed as an ingénue, and as a betrothed girl she would have been no more than fourteen years old. But there was nothing extraordinary about a betrothed girl becoming pregnant by her fiancé during the betrothal period. In such cases, the marriage would simply take place as soon as possible, and before her pregnancy was visibly obvious.

If Mary's pregnancy had the potential for scandal, she must have been married to someone other than the child's father. Throughout the Middle East, and particularly in Jewish Palestine, once identified, female "fornicators" were liable to be stoned to death. Husbands had the authority to kill adulterous wives. If such a woman was to death, news of her infidelity would soon become public knowledge. Was Mary killed?

According to Matthew, when Joseph hears of Mary's pregnancy he initially wants a divorce, but is convinced otherwise by an angel in a dream, and agrees to raise the child – which is an expedient way to explain why Jesus was adopted. In a possible scenario where Mary was killed after giving birth, her husband would definitely *not* have adopted her child. So not only was Joseph not Mary's husband, they were never betrothed. Whether her child was taken by Joseph, or by his biological father, is arguable, but he was not taken by Mary's husband.

The Stepmother

If his mother was dead, how could Mary be present during the Galilean Jesus' public ministry? The answer is simple. Every significant woman in the sect was called "Mary." If Jesus had a stepmother, her name would be "Mary." And the same name is essential to obscure the truth.

According to the Gospels, Mary had other children, which complicated things for early Church theologians who declared Mary an eternal virgin. It was decided, therefore, that Jesus' siblings were Joseph's children by an earlier marriage, and Mary was only the stepmother to her other children.

Mary, Joseph & John

But textual evidence suggests the reality was the other way round. Mary was only the stepmother to Jesus, and Jesus' Gospel siblings were Mary's children.

Luke recounts the following episode:

And when he was twelve years old, they went up according to custom; and when the feast was ended, as they were returning, the boy Jesus stayed behind in Jerusalem. His parents did not know it, but supposing him to be in the company they went a day's journey, and they sought him among their kinsfolk and acquaintances; and when they did not find him, they returned to Jerusalem, seeking him. (Lk 2:42-45)

What “parents” would return home from a family trip without their twelve year old son? How many would need a day before they noticed he was missing?

During the famous wedding at Cana recorded in the Gospel of John, there is a brief exchange between Jesus and his “mother” that defies the conventional myth:

On the third day there was a marriage at Cana in Galilee, and the mother of Jesus was there; Jesus also was invited to the marriage, with his disciples. When the wine failed, the mother of Jesus said to him, “They have no wine.” And Jesus said to her, “Woman, what have I to do with you?” (John 2:1-4)

Can Jesus' curt riposte to his mother be explained away as an expression of frustration? Or does “woman” signify a lack of respect on his part? The impression created by the abrupt words, “what have I to do with you” is of a stepson rejecting his stepmother.

Mary and her family make sporadic appearances in the Gospels. Mark records an occasion when Mary and her other children try to “seize” Jesus to prevent him from speaking in public (Mk 3:21):

And when his family heard it, they went out to seize him, for people were saying, “He is beside himself.”

The Final Deception

All three synoptic gospels include the following scene:

And his mother and his brothers came; and standing outside they sent to him and called him. And a crowd was sitting about him; and they said to him, “Your mother and your brothers are outside, asking for you.” And he replied, “Who are my mother and my brothers?” And looking around on those who sat about him, he said, “Here are my mother and my brothers! Whoever does the will of God is my brother, and sister, and mother.” (Mk 3:31-35, Mt 12:46-50, Lk 8:19-21)

Are these fabricated dramas to score theological points? If Mary and her other children are Jesus’ step-family, and not biological relatives, then they make perfect sense. And the manifest distance between them is a subplot that needs no explanation.

Matthew quotes Jesus saying “a prophet is not without honor except in his own country and his own house” (Mt 13:57); John’s Gospel states that “even his brothers did not believe in him” (John 7:5). But what about Joseph?

Man of the Craft

We appear to have only two pieces of information about Joseph. He was the Galilean Jesus’ guardian; and he was a “carpenter” (Mt 13:55). Joseph’s influence over Jesus is hazy, except that Jesus himself is also described as a “carpenter” (Mk 6:3), which infers he served an apprenticeship under Joseph.

This image of the savior as a humble woodworker was encouraged by the Church, and embraced by the faithful. Jesus was everyman – a salt-of-the-earth honest laborer. The problem with this picture is that it is due entirely to a naïve, or rather expedient, translation of the Greek word *tekton* as “carpenter.”

Literally meaning “craftsman,” an ancient *tekton* was a “man of the Craft.” Echoing ancient Egyptian themes, Plato’s “Creator” in the *Timaean*, is called *tekton*; the *arche-tekton* is the “Architect of the Universe.” As a student of the esoteric, belonging to a hermetic

Mary, Joseph & John

brotherhood, a *tekton* did not often dirty his hands. In Modern Greek, *tekton* means “freemason” (*Collin's Contemporary Greek Dictionary*, 168, 311; *Oxford Dictionary of Modern Greek*, 189).

Joseph, the craftsman (left), or (right) Joseph, “Man of the Craft”

When Jesus speaks at a local synagogue in Galilee, we are told the audience “takes offense.” In Luke’s Gospel, the assembled mob tries to kill him. They ask rhetorically:

Is not this the carpenter? (Mk 6:3)

Is not this the carpenter's son? (Mt 13:55)

Is not this Joseph's son? (Lk 4:22)

In the standard apologetic, self-righteous Galileans cannot accept that one of their own, a simple tradesman, might be a “prophet,” and they react indignantly. A more plausible interpretation would be that the locals associate Jesus with “tektons,” and specifically with Joseph, who was apparently known, and resented, as a secret society kingpin. “Guilt by association” caused them to be “offended” by Jesus, not the outrageous presumptuousness of a manual laborer.

Mark’s Gospel does not mention a stepfather named Joseph, but another Joseph who plays a central role in the immediate aftermath of the crucifixion:

Joseph of Arimathea, a respected member of the council, who was also himself looking for the kingdom of God, took courage and went to Pilate, and asked for the body of Jesus. And Pilate wondered if he were

The Final Deception

Detail from Ghirlandaio, *Marriage of Mary*, c 1490

As Joseph gives a wedding ring to Mary in this depiction of a non-biblical scene, a man coming from behind Joseph is about to strike him with a raised fist. Why?

already dead; and summoning the centurion, he asked him whether he was already dead. And when he learned from the centurion that he was dead, he granted the body to Joseph. (Mk 15:43-45)

This event breaks with Roman protocol, as crucified men were refused burial, the custom being to leave bodies to rot (or be pecked by birds) on the cross as a public spectacle. According to Matthew and Luke, Joseph of Arimathea was both a rich man and an influential member of the Sanhedrin - the supreme council that governed Judaism under Roman auspices (Mt 27:57-61; Lk 23:50-56). Josephus describes Pilate as cruel and brutal, but also notoriously corrupt, so the possibility that money exchanged hands between them does not stretch the imagination.

Handing over the body would also imply an acknowledgment by the Romans that Joseph of Arimathea was in some way related to the deceased. In extra-canonical tradition, Joseph of Arimathea is the Virgin Mary's paternal uncle, and therefore Jesus' great

Mary, Joseph & John

uncle, who became legal guardian out of necessity after the first Joseph “passed away.”

Linguistically, as the name “Joseph” combines “Io” and “Seth,” it is therefore a ‘statement name,’ with Seth the protective deity. Strictly speaking, only the honorific *Arimathea* separates the two Gospel Josephs, but nobody knows where or what Arimathea

is. Luke claims Arimathea is “a city in Judea,” but no such place is documented in any maps, censuses, or archives, of any period anywhere in recorded history. Are the two Josephs the same man? It would seem so.

On the face of it, Arimathea is a total mystery, but clearly it meant something to someone. Is Arimathea a sectarian name or title with a special significance for members of a Hyksos brotherhood?

Carpenter Joseph holds a shepherd's crook

The Sorcerer's Apprentice

By all accounts, Joseph of Arimathea's wealth derived from supplying Rome with tin from the mines of Cornwall. Tin was then akin in importance to that of steel today. As a metal and shipping magnate, he reputedly owned one of the largest private merchant shipping fleets afloat. In Britain, a surviving tradition claims Joseph of Arimathea brought the young Galilean Jesus to southwest England on at least one of his voyages. Once there, Jesus was instructed in the Celtic mysteries. The English poet-mystic William Blake's famous poem *Jerusalem* is based on this legend.

The Final Deception

Among the places Joseph and Jesus reputedly visited are Stonehenge and Glastonbury in Somerset, which at the time were sacred sites of the Celtic Druids. In a letter to the Pope, St

Augustine claims to have discovered a church in Glastonbury that was built by followers of Jesus, but according to local legend, this same church was actually built by Joseph of Arimathea and Jesus, and dates back to pre-Roman times, or before 43 AD. Glastonbury Abbey is thought to have been built on the site of the original church.

Glastonbury, and Glastonbury Tor (conical hill), is the focus of more fable and esoteric myth than any other location in the British Isles. The hill is basically a spiral labyrinth or maze with seven deep, almost symmetrical terraces that defy explanation by conventional archeological models.

Similar to Cretan labyrinths, the pattern on Glastonbury Tor was created for ritual purposes long before the Druids used it in their rites and initiation ceremonies. Today, Glastonbury Tor is thought to be at the intersection of powerful ley lines, and is a destination for Christian pilgrimages and seasonal rituals by magicians, witches, pagans, and various occult groups.

Nearby Glastonbury Abbey is understood to have been constructed by a secretive guild of masons using Pythagorean numerology and arcane architectural principles similar to those observed at Chartres Cathedral. During the Middle Ages, Joseph of Arimathea and Glastonbury featured in numerous Arthurian romances and legends of the Holy Grail. King Arthur's supposed grave remains a tourist attraction at Glastonbury Abbey.

No question Glastonbury and the English southwest was a magnet for mystics and ancient "tektons." And researchers have discovered potential links between the Celtic mysteries and the Dead Sea sect that preserved Enochic lore.

Mary, Joseph & John

Glastonbury Tor

The *Book of Enoch* contains numerous astronomical observations. In one section, Enoch is told by an angel to come north with him in order “to measure.” In another passage the measurements given are those of the rising and setting of the Sun at different times of the year. From the description of the Sun at midsummer, it is calculated that Enoch is not in the Middle East, but at the latitude of southwest England.

And the Sun returns to the east and enters into the sixth portal, and rises and sets in the sixth portal one-and-thirty mornings on account of its sign. On that day the day becomes longer than the night, and the day becomes double the night, and the day becomes twelve parts, and the night is shortened and becomes six parts.

Family Feud

For Protestant Christians, the Virgin Birth is not official doctrine. Protestant theologians in general consider Joseph the most likely candidate, but the biological father of the Galilean Jesus is as irrelevant to Protestant salvation paradigms as it is to Paul.

The Final Deception

So the question remains. Why do Matthew and Luke deny Joseph was the father? If the idea was to exclude Joseph from the equation why construct elaborate birth narratives that include him? Everyone must have known Jesus had a guardian. The truly embarrassing information was his biological father's identity.

Some scholars reason Luke combines the families of Jesus and to evangelize followers of John the Baptist, who constituted a rival sect to the early Christians. As mentioned previously, Luke states John was conceived "in the days of Herod" (37 BC - 4 BC), and Jesus was born during the Roman census of 6 AD, which indicates a generational gap between them. Luke then describes a difference of only six months between the births of John and Jesus. By misrepresenting their age difference, what is Luke trying to conceal?

John the Baptist's historicity is confirmed by Josephus who describes him as a respected ethics teacher whose influence was perceived as a threat by Herod Antipas, who had him arrested and eventually executed. When Antipas' army was routed in battle soon afterward, his defeat was popularly blamed on his treatment of John.

The Gospels do not necessarily contradict Josephus. They describe John as an immensely popular preacher, arrested for condemning Herod Antipas' marital status, and then beheaded at the behest of Antipas' wife. But New Testament scholars struggle to explain John the Baptist's role in the Gospel drama. At the outset, it seems as though John will have a central part, but it is only a cameo in the end.

Church teaching claims John the Baptist proclaimed the Galilean Jesus as the prophesied Christ. The evidence suggests he did no such thing. In all four Gospels, John baptizes Jesus, but the two men do not join together, and do they meet again. John maintains an independent group of disciples, who early Church Fathers considered the greatest thorn in the side of the Church.

Most of Jesus' teachings can be traced to Judaic, Greek, or Buddhist traditions, and his reported statements copy or paraphrase Old Testament axioms. Even his supposedly "unique" message of "the Kingdom" is not original:

Mary, Joseph & John

In those days came John the Baptist, preaching in the wilderness of Judea, “Repent, for the kingdom of heaven is at hand.” (Mt 3:1-2)

The so-called “Lord’s Prayer” also stems from John:

When Jesus had finished praying, one of his disciples said to him, “Lord, teach us to pray, just as John taught his followers to pray.” (Luke 11.1)

One common suggestion is that John the Baptist was originally Jesus’ mentor, but after Jesus received a higher calling, they had to minister separately. Scholars have long recognized evidence of a conflict between John and Jesus that has not filtered down to the pulpit. Nowhere is this more transparent than on the decisive issue of “Elijah.”

A folk hero throughout the Middle East, Elijah is known mostly for being taken up to “heaven” in a fiery chariot. In the New Testament, Elijah is mentioned more times than Moses, Abraham, or any other revered figure. Fueled by an Old Testament prophecy that he would return in the Last Days (Malachi 4:6), Elijah expectation reached its peak in first century Palestine.

Having provoked questions about Elijah’s whereabouts, and being unaware of the prophecies, Jesus’ disciples were stumped for an answer:

And the disciples asked him, “Then why do the scribes say that first Elijah must come?” He replied, “Elijah does come, and he is to restore all things; but I tell you that Elijah has already come, and they did not know him”.....Then the disciples understood that he was speaking to them of John the Baptist. (Mt 17:10-13)

On a separate occasion, Jesus says that “if you are willing to accept it, he (John) is Elijah who is to come” (Mt 11:4). But when a delegation of priests and Levites from Jerusalem ask John the question, “Are you the Elijah?” he replies, “I am not.” (Jn 1:21).

Jews in general have a very simple approach to this subject. No Elijah. No Messiah. Whatever expectations the Galilean Jesus

The Final Deception

had, John the Baptist effectively nailed his chances of being widely accepted as the Messiah.

During John's incarceration, Jesus reportedly said:

Truly, I say to you, among those born of women there has risen no one greater than John the Baptist; yet he who is least in the kingdom of heaven is greater than he. (Mt 11:11, Lk 7:28)

This is often misinterpreted as an expression of Jesus' profound respect for John as the ultimate paragon of humility. Earlier in Matthew's Gospel, however, Jesus clarifies what he means by "least in the kingdom:"

Whoever then relaxes one of the least of these commandments and teaches men so, shall be called least in the kingdom of heaven. (Mt 5:19)

As far as Jesus is concerned, John the Baptist was public enemy number one.

Next of Kin

John's arrest is the catalyst for Jesus' own ministry:

Now after John was arrested, Jesus came into Galilee, preaching the gospel of God, and saying, "The time is fulfilled, and the kingdom of God is at hand; repent, and believe in the gospel." (Mk 1:14-15)

According to Luke, Herod Antipas had never even heard of the Galilean Jesus before John's death, which is a strong indication Jesus was not the Christ child Antipas' father sought to eliminate.

And Herod said, "John have I beheaded: but who is this, of whom I hear such things?" (Luke 9:9)

Mary, Joseph & John

Why would Antipas automatically connect John the Baptist with Jesus? In the same scene, Mark and Matthew appear to infer occult forces are at work:

But when Herod heard of it he said, “John, whom I beheaded, has been raised.” (Mk 6:16)

This is John the Baptist, he has been raised from the dead; that is why these powers are at work in him. (Mt 14:2)

Some scholars see in Herod’s remarks a reference to magic practices Jesus had supposedly learned in Egypt, whereby the captured “essence” of a recently deceased person can be accessed by the living. More simply, Herod’s comments can be read to imply the Galilean Jesus had inherited John’s “powers.”

Jesus is quoted asking his disciples, “Who do men say that I am?” Their first response is illuminating:

“John the Baptist.”
(Mk 8:27, Mt 16:13, Lk 9:18)

Under what circumstances might the general public perceive John and Jesus as one and the same? A clue comes with the news of John’s death.

The custom in the Middle East, then, as it is today, was to bury a dead body as soon as possible. The deceased’s next-of-kin was then notified, and the immediate family - father, mother, son, daughter, brother, sister, and spouse observed a *Shiva*, or seven-day mourning period. According to Matthew, after John died, “his disciples came and took the body and buried it; and they went and told Jesus.” From outward appearances, Jesus immediately began the customary bereavement:

When Jesus heard this, he withdrew from there in a boat to a lonely place apart. (Mt 14:13)

And he said to them, “Come away by yourselves to a lonely place, and rest a while”...And they went away in the boat to a lonely place by themselves. (Mk 6:30-32)

The Final Deception

No love was lost between the disciples of Jesus and John. On a previous occasion, Jesus had sent John's disciples packing with a forceful censure of their master, "Go and tell John what you hear and see....blessed is he who takes no offense at me" (Mt 11:4-6). Why then did they report John's death? Was it because the two men were maternal cousins, or because Jesus and John were next-of-kin?

In an interesting scene recorded in all three Synoptic Gospels, the Galilean Jesus is asked from where his authority comes.

And as he was walking in the temple, the chief priests and the scribes and the elders came to him, and they said to him, "By what authority are you doing these things, or who gave you this authority to do them?" Jesus said to them, "I will ask you a question; answer me, and I will tell you by what authority I do these things. Was the baptism of John from heaven or from men? Answer me." And they argued with one another, "If we say, 'From heaven,' he will say, 'Why then did you not believe him?' But shall we say, 'From men?'" - they were afraid of the people, for all held that John was a real prophet. So they answered Jesus, "We do not know." And Jesus said to them, "Neither will I tell you by what authority I do these things." (Mark 11:27-35)

Plainly, Jesus believed his authority should be recognized as a legacy from John the Baptist, as authority was traditionally inherited. Were he not Jesus' father, the priests and elders would have considered John the Baptist irrelevant to the issue at hand. But since they did not acknowledge John's authority, they would hardly recognize Jesus'.

In the Book of Acts, which is purportedly written by Luke, followers of John the Baptist had already established a presence in Ephesus (modern Turkey) before Paul and the first Christian arrived there. Luke recounts the story of Apollos of Alexandria:

....who was an eloquent man, well versed in the scriptures. He had been instructed in the way of the Lord; and being fervent in spirit, he spoke and taught

Mary, Joseph & John

accurately the things concerning Jesus, though he knew only the baptism of John. He began to speak boldly in the synagogue; but when Priscilla and Aquila heard him, they took him and expounded to him the way of God more accurately. (Acts 18: 24-27)

Later, Paul encounters a group of twelve Baptist disciples:

And he said to them, “Did you receive the Holy Spirit when you believed?” And they said, “No, we have never even heard that there is a Holy Spirit.” And he said to them, “Into what, then, were you baptized?” They said, “Into John’s baptism.” And Paul said, “John baptized with the baptism of repentance, telling the people to believe in the one who was to come after him, that is Jesus.” On hearing this, they were baptized in the name of the Lord Jesus. (Acts 19:2-7)

Occurring with ridiculous ease, such instantaneous conversions read as fairy tales. But what if it was explained to John’s disciples that the Galilean Jesus was the son of John the Baptist?

Hidden in Plain Sight

One the great mysteries of European mysticism is why John the Baptist ranks higher than Jesus. Secret societies have hierarchical internal structures designed to preserve their secrets, but even though early Church Fathers denounced the “Johannite heresy,” if they knew what was, they never explained it.

Knights Templar churches were invariably dedicated to John the Baptist, and decorated inside not with a crucifix, but with images of John’s head on a plate. John the Baptist is also the patron saint of Freemasonry, self-proclaimed keepers of the Templar’s legacy, and historical arch nemesis of the Roman Church. According to noted alchemist and medieval mystic Paracelsus (1493–1541), Elijah (John the Baptist), and not Jesus, was the ultimate savior figure.

The Final Deception

During the Renaissance, there was an explosion of paintings with biblical themes commissioned by private individuals, as well as the Church. In the stringently controlled feudal theocracy of the time, painting was a means to reinforce Church dogma, and for enemies of Catholicism, to undermine it.

All works of art were monitored by the Inquisition, but supposedly devotional works with conventional Christian motifs sometimes contained “profane” ideas that bypassed unsophisticated censors. They still remain unnoticed by art historians, who focus on painting techniques, and by a general public that sees in an image only what it is conditioned to see.

As the definitive Roman Catholic icon, at least one version of the Madonna and Child was *de rigueur* for Renaissance artists. Probably the most popular auxiliary character in the scene was the

Mary, Joseph & John

infant John the Baptist. But some artists chose to disregard traditional ages, and depicted an adult John the Baptist, looking every inch the proud father.

Seemingly unhistorical or impossible images are generally attributed to “artistic license.” So the inclusion of an adult John the Baptist signifies his proclamation of Jesus in the Fourth Gospel, “behold the Lamb of God who takes away the sin of the world” (John 1:29). However, other saints and clergymen, who occasionally feature in images of the Madonna and Child, usually stare at John, and draw attention away from Jesus.

In numerous Madonna and Child paintings and sketches, the infant Jesus holds a swallow. Striving for an explanation, Vatican historians construe the swallow as a symbol of the Resurrection. Just as Jesus mysteriously disappears from his tomb before rematerializing out of thin air, so nobody knows where swallows go every year, but they always return. This interpretation ignores the well-known meaning implied by a solitary swallow derived from Aesop’s ancient Greek fable, *The Swallow and The Spendthrift*. Renaissance art was, after all, supposed to revive classic themes. Expressed in the aphorism, “one swallow does not a summer make,” the moral of the tale is things are not always what they appear to be.

The Final Deception

Alvise Vivarini, *Madonna and Child with John the Baptist* c. 1490

Another popular theme is known as the *Presentation of the Virgin*, which is drawn from the second century non-canonical *Protovangelium of James*. This text presents a narrative of Mary's birth, and makes the absurd claim that she entered the Jerusalem Temple as a three year old to be raised by priests. In the standard image, Mary is shown ascending the Temple steps as a group of priests welcome her. A number of artists contradict the legend and depict Mary as a young adult. One such artist was the celebrated Italian master, Domenico Ghirlandaio, who painted an extraordinary version.

As Mary hurries up the Temple steps, a resigned and somewhat forlorn-looking John the Baptist watches her intently from steps in the lower right hand corner of the picture. In Church tradition, John was not even born when this imagined event took place. If his appearance is artistic license then what is Ghirlandaio's message?

Mary, Joseph & John

Presentation of the Virgin at the Temple, Domenico Ghirlandaio c. 1490

The Final Deception

On the left side of the picture, three finely-dressed female spectators strike curious poses. Two of them watch Mary and at the same time make strange hand gestures in her general direction. The leftmost woman seems to make an overtly sexually sign. The woman on the right looks somewhat disapprovingly at John, and stands as though she is accusing him. Ghirlandhaio's art, experts tell us, epitomizes devotional Catholic iconography. It does nothing of the sort.

John the Baptist

If John the Baptist was the father of the Galilean Jesus, then he probably had Hyksos descent, and was apart from mainstream Judaism, if he was even Jewish. Baptism was not a Jewish practice, and is mentioned nowhere in the Old Testament.

Descent from Abraham did not impress John:

Mary, Joseph & John

Do not begin to say to yourselves, “We have Abraham as our father;” for I tell you, God is able from these stones to raise up children to Abraham. (Luke 3:8)

According to Luke, John was “in the wilderness till the day of his manifestation unto Israel,” which is open to various interpretations. It may be significant that the separatist Dead Sea Scrolls community described itself as “Israel,” and described its location as “in the wilderness.”

John baptizes Jesus, Magdalene Church, Rennes le Chateau, France

Provence in southern France has most of the world's Black Madonna statues, and also the world's largest concentration of churches and buildings dedicated to John the Baptist. Among statues of John, some show him wearing a Roman toga, and not his traditional hair shirt and loin cloth. Nobody seems to know why, but local tradition must have understood him as a Roman citizen, or as somehow connected with a Roman deity, or both.

As one of the few episodes recorded in every Gospel, John's baptism of the Galilean Jesus seems genuine enough, though an actual baptism is not described in the Fourth Gospel. In the synoptic version, Jesus sees “the Spirit of God descending on him like a dove,” and hears a “voice from heaven, saying this is my

The Final Deception

beloved Son, in whom I am well pleased” (Mk 1:10-11, Mt 3:16-17, Lk 3:22).

Because the doctrine of the Holy Trinity had not yet been formulated, this type of theological statement seems anachronistic, and therefore inauthentic. Is it possible the Gospels distort words spoken by Jesus’ biological father – John the Baptist?

Anti-Semitism is one of the most common accusations leveled against the New Testament writers. Time and again, “the Jews” are depicted negatively, and blamed for most of Jesus’ ordeals. At odds with the apparent “fact” that Jesus was himself a Jew, many scholars view the New Testament’s portrayal of Jews as highly suspect.

The Galilean Jesus, however, was first and foremost a Hyksos Israelite, not a “Jew.” For elite Hyksos, the Jewish establishment were interlopers of despised origins no different from the Roman army.

Spectacle at Calvary

Whether he is considered a Son of God, a social revolutionary, a magician, an itinerant preacher, an inscrutable mystic, a Mediterranean peasant, a failed coup leader, a delusional egotist, or a fictional fantasy figure, one event gets even more mileage than Jesus' birth – his death. And if his arrival is an artfully crafted, but fatally flawed deceit, why should his passing be any different?

The conviction that Jesus' death was staged has always been popular in the Middle East. The Koran claims the Romans unwittingly executed an eleventh hour replacement for Jesus. Found in Cairo, and believed to be copied from an earlier original, a fourth century Gnostic manuscript, known as *The Second Treatise of the Great Seth*, describes Jesus scoffing at the gullibility of his former persecutors, as he secretly watches them crucify a substitute.

The Final Deception

According to the early Church Fathers, “Docetism” was the earliest and first major heresy. Docetics insisted Jesus did not die on the cross, and that his death was an illusion. Although “illusion” infers sleight-of-hand was utilized, as opposed to metaphysical or supernatural power, Docetics were caricatured by Christian writers as believers in magical apparitions.

But if Christianity’s first major headache was to convince people that Jesus was actually crucified, then the views of the early Church’s leading heresy hunter did not help much.

Ireneaus of Lyons

Ireneaus (c. 120-200) was the Bishop of Lugdunum in Gaul, now Lyon, France, which was part of the Roman Empire. His body of writings is considered formative in the early development of Christian theology. His best-known book, *Adversus Haereses* or *Against Heresies* is a detailed refutation of Gnosticism and Gnostic sects, which were considered the most serious threat.

For the most part, Ireneaus’ work was dismissed as exaggerated rhetoric by modern scholars until discovery of the recently unearthed Gospel of Judas, in which Jesus asks Judas to betray him. Ireneaus mentioned the Gospel of Judas, and wrote of the sect that produced it:

They declare that Judas the traitor was thoroughly acquainted with these things, and that he alone, knowing the truth as no other did, accomplished the mystery of betrayal; by him all things were thus thrown into confusion. They produce a fictitious history of this kind, which they style the Gospel of Judas.

In his exposition of the teachings of Basilides, an early second century Egyptian, who wrote over two dozen books of Gospel commentary (all now lost), Ireneaus explains Basilides’ view that Simon of Cyrene was actually crucified,

Spectacle at Calvary

Wherefore he did not himself suffer death, but Simon, a certain man of Cyrene, being compelled, bore the cross in his stead; so that this latter being transfigured by him, that he might be thought to be Jesus, was crucified, through ignorance and error, while Jesus himself received the form of Simon, and, standing by, laughed at them.

For Ireneus, Jesus' crucifixion was real, but he did not believe Jesus was crucified in his thirties. Ireneus castigated those who believed Jesus died prematurely, insisting instead that he lived to an old age:

Jesus therefore passed through every age, becoming an infant for infants, thus sanctifying infants; a child for children, thus sanctifying those who are of this age, being at the same time made to them an example of piety, righteousness, and submission; a youth for youths, becoming an example to youths, and thus sanctifying them for the Lord. So likewise He was an old man for old men, that He might be a perfect Master for all, not merely as respects the setting forth of the truth, but also as regards age, sanctifying at the same time the aged also, and becoming an example to them likewise. Then, at last, He came on to death itself, that He might be the first-born from the dead, that in all things He might have the pre-eminence. *(Adversus Haereses, Book II, Ch 22)*

As he was based in Lyons, Ireneus would almost certainly have known the local legend that Jesus and Mary Magdalene had escaped persecution in Palestine to live in the south of France. Did he manage to find a way to accommodate the one legend with the other?

The Final Deception

Joseph of Arimathea brings Jesus and the three Mary's to France

The Illusion

Apart from a few incongruities in the different accounts, all four Gospels tell a similar tale of Judas' betrayal of Jesus. The storyline is highly dubious, however, because Jesus reportedly knows about his betrayal in advance. Moreover, if Temple authorities rely solely upon Judas' kiss to recognize Jesus, how would they know Judas kissed the right man?

In May 1983, a Coptic language manuscript *Gospel of Judas* surfaced in the Geneva antiquities market. Experts soon recognized its significance after it was carbon dated to 280 AD, plus or

minus 60 years. Since Ireneaus railed against the Gospel of Judas in 180 AD, the Coptic text was likely translated from an earlier Greek version.

Spectacle at Calvary

The Kiss of Judas, Giotto di Bondone, c. 1306. Who did Judas kiss?

The introduction is self-explanatory:

The secret account of the revelation that Jesus spoke in conversation with Judas Iscariot during a week three days before he celebrated Passover.

In conversation with Judas, Jesus speaks of the “incorruptible generation of Seth,” which is a comment typical of “Sethian” Gnostic texts found at Nag Hammadi in Egypt in 1945, which reflect Hyksos “Seth” veneration. In the controversial section where Jesus instructs Judas to betray him, the key lines are usually translated in English as:

You will exceed all of them (Jesus’ other disciples).
You will sacrifice the man that clothes me.

The words, “the man that clothes me” form an abstract phrase that alters the literal meaning of the Coptic, “the man who resembles me.” So Judas is not asked to hand over Jesus. He is asked to inform on Jesus’ substitute. According to the Gospel of

The Final Deception

Judas, Jesus' crucifixion was a carefully planned deception. In *The Second Treatise of the Great Seth*, Jesus explains what happens:

And the plan which they devised about me to release their Error and their senselessness - I did not succumb to them as they had planned. But I was not afflicted at all....And I did not die in reality but in appearance, lest I be put to shame by them because these are my kinsfolk. I removed the shame from me and I did not become fainthearted in the face of what happened to me at their hands...

For my death, which they think happened, (happened) to them in their error and blindness, since they nailed their man unto their death...they were deaf and blind...Yes, they saw me; they punished me. It was another, their father, who drank the gall and the vinegar; it was not I. They struck me with the reed; it was another, Simon, who bore the cross on his shoulder. It was another upon whom they placed the crown of thorns. But I was rejoicing in the height over all the wealth of the archons and the offspring of their error, of their empty glory. And I was laughing at their ignorance.

Most Islamic scholars deny Jesus was crucified based on the following Koranic verse:

That they said (in boast), "We killed Christ Jesus the son of Mary, the Messenger of Allah" - but they killed him not, nor crucified him, but so it was made to appear to them, and those who differ therein are full of doubts, with no (certain) knowledge, but only conjecture to follow, for of a surety they killed him not. (Sura 4:158)

Did Hyksos conspirators employ a surrogate martyr to simulate the Galilean Jesus' death?

Spectacle at Calvary

The Substitute Imposter

The final chapter in Jesus' biography has always been subject of the most speculation, proclamation, debate, contemplation, and demagoguery. One day a confident Jesus rides triumphantly into Jerusalem, where he is hailed as king by cheering crowds, and kicks moneychangers out of the Temple. A few days later, a limp and fatalistic Jesus submits to an inevitable destiny.

The triumphal entry into Jerusalem

According to the problem-solving principle known as “Occam’s razor,” among competing hypotheses the one with the fewest assumptions should be selected. The apparent revolution in Jesus’ character is most easily explained if the Gospels describe two different men.

To pass himself off as the Galilean Jesus, the substitute would need to be of similar age and complexion, but most of all, he would need to speak less, which according to the Gospels is precisely what he did.

Purportedly, because the Sanhedrin’s own rules prohibited them from executing Jesus, he was transferred to Pontius Pilate, the Roman procurator. But the Sanhedrin could have easily

The Final Deception

fabricated a charge and had him stoned to death. It must therefore be assumed the conspirators, which surely included Joseph of Arimathea as an influential member of the Sanhedrin, wanted the Romans to judge, sentence, and crucify the substitute in the manner reserved exclusively for enemies of Rome. Evidently, it was vital Rome believed the Galilean Jesus was dead.

Before Herod Antipas, Duccio di Buoninsegna, 1308

The accumulated time and energy spent by scholars and laymen alike in scrutinizing different Gospel accounts to fathom why Jesus allowed himself to be interrogated, why he offered no defense, and were the Jews or the Romans responsible for his death, is incalculable. But all along it was not even Jesus.

The Substitute in Art

Among the most popular Gospel-based themes to inspire European artists from the thirteenth century onwards is what art historians categorize as the “Man of Sorrows.” The title comes from a passage in the Book of Isaiah that happens to mention a despised and rejected “man of sorrows.”

Spectacle at Calvary

Albrecht Durer, c 1520

Understood as a devotional image for the mystical contemplation of Christ's Passion, "Man of Sorrows" paintings usually feature a bloodied "Christ" in a loin cloth, with crucifixion wounds prominently displayed, and wearing a crown of thorns. From an orthodox viewpoint, these images are a visual expression of the profound Christian piety of the late Middle ages.

In many "Man of Sorrows" images the artist appears to depict remorse of a man on the receiving end of more than he had bargained for. For example, the supremely gifted and versatile German artist, Albrecht Durer, shows "Jesus" alive in his tomb, apparently fresh from the crucifixion. Appearing somewhat cynical and jaded, he looks bored waiting for the others to arrive and let him out.

The Final Deception

Man of Sorrows, Geertgen tot Sint Jans c 1490

Luis Morales, c 1560

Jan Gossart, c 1530

Spectacle at Calvary

For some reason, the late sixteenth century Dutch artist, Geertgen tot Sint Jans, depicts “Jesus” carrying the cross *after* his crucifixion, and not before. Amidst the mourners and the weeping angels, his plaintive facial expression conveys a transparently profane message along the lines of “can you ever forgive me?” or “I am so sorry about this, but I really didn’t understand what I’d let myself in for.”

Ecce Homo, Luis Morales c 1570

Luis de Morales, a sixteenth century Spanish artist, who specialized in Passion scenes, produced several versions of the “Man of Sorrows.” In most cases, his “Jesus” appears decidedly

The Final Deception

disinterested, as though impatient for the charade to be finally over.

One other Passion scene painted by many artists is known as *Ecce Homo*, after the Latin words used by Pontius Pilate in the Vulgate translation of John 9:15, “Behold the man,” when presenting a scourged Jesus to a hostile crowd. The “Ecce Homo” frequently depicts an older man with an authoritative and paternal demeanour standing alongside “Jesus.” In Morales’ version, this gentleman places a fatherly arm around Jesus’ shoulders as he holds his red cape. Who is this man supposed to be?

The most suitable candidate is Joseph of Arimathea, and as the picture implies, the relationship between the two men is one of manager and client. Joseph of Arimathea reassures “Jesus” as he guides him through the rest of his scheduled ordeal. In the Gospel accounts, Joseph of Arimathea is not mentioned as present during Jesus’ scourging, and only collects his “dead” body for burial.

The Crucifixion

Why would anyone volunteer for a suicide mission in which they would be beaten, tortured, and crucified – and all as somebody else? It seems inconceivable except no reason exists to believe the mission was fatal. And would there not be a corresponding reward for services rendered?

To be an effective deterrent, Roman crucifixion was purposely designed as a slow death. Exposed to the elements, and pecked by scavenger birds, the victim’s rotting corpse was a public reminder of what happens to those foolish enough to challenge Rome. Suspended with feet fixed to a stake to relieve pressure on his chest and lungs, a man in his thirties could survive for up to a week before dying of fatigue or thirst.

Yet we are told that Jesus died after only a few hours on the cross, and that his body was taken down because the next day was the Sabbath. According to Mark’s Gospel, when Joseph of Arimathea “takes courage” and asks Pilate for the body:

Spectacle at Calvary

Pilate wondered if he was already dead; and summoning the centurion, he asked him whether he was already dead. And when he learned from the centurion that he was dead, he granted the body to Joseph.

(Mk 15:43-45)

All the Gospels allege a thirsty Jesus was cruelly offered a sponge soaked in vinegar, but rather than as a stimulating tonic the vinegar acts as a permanent sedative:

When Jesus had received the vinegar, he said, “it is finished;” and he bowed his head and gave up the spirit.

(John 19:30)

Was Jesus given an opiate that rendered him unconscious? When this so-called “swoon hypothesis” was first advanced by nineteenth century scholars, it met with such vociferous disapproval that it is rarely mentioned today. Nevertheless, an administered soporific remains the most plausible explanation for the reported effect.

Jesus is offered a sponge soaked in “vinegar”

The Final Deception

No matter how similar in appearance, would not at least some onlookers notice the substitute was not the Galilean Jesus? We know from his reported arrest, Jerusalem priests and Temple security guards believed the substitute was Jesus. But what about everyday folk who had welcomed King Jesus into the city? Would they not recognize a substitute?

The crucifixion did not take place in a freely accessible location. According to Mark, Matthew, and Luke, even those who knew Jesus could only watch from a distance:

And all his acquaintances and the women who had followed him from Galilee stood at a distance and saw these things. (Luke 23:49)

The Gospels state that the crucifixion took place at “Golgotha,” a name that brings to mind images of a desolate barren wasteland. But in reality, Golgotha is described as a privately-owned, and landscaped, piece of land that was recently customized for a burial:

Now in the place where he was crucified there was a garden, and in the garden a new tomb where no one had ever been laid. (John 19:41)

Would the notoriously corrupt Pontius Pilate have allowed a Roman crucifixion to be held on private property? If the price was right, there is no question. By the same token, a Roman centurion in Pilate’s service could just as easily be bribed. For the wealthy Joseph of Arimathea and his Hyksos co-conspirators, the circumstances to perpetrate a mock crucifixion could hardly have been more convenient.

“Mystic” Crucifixion

One of the most famous crucifixions scene painted is by the Italian master Sandro Botticelli, who was an early mentor to Leonardo da Vinci. Widely accepted as having been painted during Botticelli’s late period, when he took to abstruse or profound themes, its imagery still baffles art historians who

Spectacle at Calvary

collectively pigeon-hole Renaissance artists as devout Catholics. The work is untitled, and is known today simply as the “Mystic Crucifixion.”

The Mystic Crucifixion, Sandro Botticelli, c 1495

While Jesus remains nailed to the cross, a prostrate and theoretically grief-stricken, Mary Magdalene wraps her arms around the base as she looks upward at a female angel holding a fox by its tail with one hand, while raising a stick with the other.

The Final Deception

The angel looks down at Mary Magdalene and dangles the fox at her. What message does Botticelli impart?

In the satirical literature and art of medieval Europe, the fox is a widely-used symbol to depict venal hypocrisy and deceit inside the Church. By painting the fox the same color as Mary Magdalene's hair, Botticelli reinforces the connection.

The Fox is a medieval symbol of pious fraud and hypocrisy in high places.

From her demeanor, the angel is obviously scolding Mary for something. But considering her pain and anguish, how is Mary Magdalene being hypocritical? Because the person on the cross is not her lover, but a substitute. Her display of inconsolable loss is a sham, intended to deceive observers into believing the Galilean Jesus is dead.

In the background is the city of Florence, whose patron saint is John the Baptist. The Florentine school was the world's leading school of artists at the time, and included Leonardo da Vinci, who specialized in works dedicated to John the Baptist, an affinity that has never been explained. Botticelli and others plainly knew more than they were supposed to have known.

Spectacle at Calvary

The Resurrection

If the Galilean Jesus was not crucified in the first place, he did not miraculously come back to life afterwards. So was his crucified substitute resurrected from the dead?

In the original Greek of Mark's Gospel, Joseph of Arimathea asks Pilate for Jesus' *soma*, a word used to refer to a "living" body. Although Roman law prohibited the burial of crucified men, in responding to his request Pilate uses the word *ptoma*, which means corpse. It is as though Mark wants to convey what each man *believed* was the case.

In Roman Catholic tradition, as well as several other Christian denominations, the "Stations of the Cross" denotes fourteen scenes from the "Passion of Christ," meditation upon which is intended to strengthen the faithful's connection with Jesus' sufferings. In the final, and fourteen Station of the Cross, Jesus is laid in the tomb.

Fourteenth Station of the Cross

Certain representations of the fourteenth Station in the south of France, most notably in the Magdalene church at Rennes le Chateau, imply Jesus was *not* dead when he was laid in the tomb. In Jewish custom, it was absolutely forbidden to bury the dead at night, the moonlight being associated with negative powers. The only reason to unambiguously portray the fourteenth Station with a moon in the dark sky, would be to show that Jesus (or rather his substitute) was alive at the time.

The Final Deception

But why go to the trouble of organizing a mock crucifixion? If the Galilean Jesus' life was genuinely in danger, why did Joseph of Arimathea not simply arrange for him to leave the country? Perhaps return to Britain, which was not a Roman province at this time. What was the agenda behind the staging of this pivotal event?

Fourteenth Station of the Cross, Rennes le Chateau, France

By all accounts, the Galilean Jesus had a modicum of support, but his public campaign and growing reputation had alienated powerful interests in Jerusalem. Whether or not the hullabaloo surrounding his entry into Jerusalem was indicative of a coup attempt, it was bound to have attracted the attention of those with links to Imperial Rome. From that moment on, the days of the Galilean Jesus were numbered.

Having repeatedly referred to himself as the “bridegroom,” and having continuously related parables of “brides and bridegrooms,” “wedding feasts,” and “virgins,” Jesus either had a predilection for fertility metaphors, or else reproduction was on his agenda.

Spectacle at Calvary

From the perspective of Hyksos elders, the debacle in Jerusalem had endangered the larger mission. Because of what they represented to the Annunaki agenda, it was absolutely imperative to protect the children of Jesus and Mary Magdalene.

Drastic action was necessary. First, the Romans *had* to believe the Galilean Jesus was dead. Second, but just as important, Rome had to be certain he was unmarried and childless. No one could know of the family's existence. Then Mary Magdalene, Jesus, and the children, needed to be evacuated to a safe haven as soon as possible.

Once the dust had settled, to maintain the pretense and conceal the truth, a crucified savior would be proselytized throughout the Roman Empire. Using the extensive Hyksos network, and backed by the Old Testament, new "Gospel" testimonies would form the basis of a religion centered on the Galilean Jesus as the prophesied Christ.

It just might work.

8

Regeneration

From whichever standpoint the Bible is analyzed, it is undeniably a history of a specific genealogical group, the central figures of which belong to a certain lineage within the group. From the Judeo-Christian perspective, this particular bloodline is “holy” because God bestowed on it the responsibility to save the human race. From another perspective, the Old Testament is the story of a hybrid-human raider race, the Hyksos, the sacred lineage of which represents an “unholy” Annunaki agenda to replace the human race.

Insofar as two Jesus’ descended from the Israelite patriarchs, one an Essene Christ, the other a Hyksos pretender, both interpretations of the Old Testament have some validity. Although the New Testament is a gloss that shrouds the imposter Christ in theological obscurity, it is not a perfect gloss. But its central message of “rebirth” and “new life” in Jesus needs further clarification. Let’s start with Mary Magdalene.

The Final Deception

Mary Magdalene

Whether everything that can be said about Mary Magdalene has been said during the twenty years or so since she became the staple ingredient of bloodline conspiracies, and the cause célèbre of feminist spirituality, is debatable. But among Magdalene researchers, the following consensus exists:

- Mary Magdalene's association with the Galilean Jesus was deliberately obscured by the four Gospel writers, and later by the patriarchal Church, which misrepresented her as a "prostitute."
- The Gnostic gospels reveal an intimate bond existing between Mary Magdalene and Jesus, which implies theirs was a sexual relationship. She was resented by Jesus' male disciples.
- Mary Magdalene had at least one child, and possibly more, with Jesus.
- Mary left Palestine with her offspring to live in the south of France, with or without Jesus, shortly after the crucifixion.
- Regarded as "holy" or special by people who knew their origins, Mary's descendants constituted an elite caste in Europe.
- Secret societies, inimical to the Church, protect the Magdalene "legacy," or "Grail" line, but their motives are unclear.

• By concealing the true nature of her relationship with Jesus, the Christian religion was distorted by the Church, and women were reduced to second class citizens.

A common sentiment expressed by modern "Grail" writers is that Mary Magdalene was the driving force behind the Galilean Jesus, the power behind the throne, so to speak. Evidence for this opinion comes mostly from non-canonical Gnostic scriptures

Regeneration

that were condemned by the early Church, and from symbolic clues in unorthodox paintings by Renaissance masters and others, who may have belonged to an underground Grail Church.

Any serious investigation into the history of European heresy finds Mary Magdalene inextricably linked with John the Baptist. Locales with John the Baptist churches, particular in the south of France, almost always have adjacent Magdalene chapels or statues. In paintings, John and Mary are often featured together with the infant Jesus. Yet in the Gospels, John the Baptist and Mary Magdalene never meet, and other than knowing Jesus, nothing seems to connect them.

Depictions of John the Baptist and Mary Magdalene, Hans Memling, c 1500

In the region of St Baume in Provence, is a small village named St Zacharie. Legend has it that Mary Magdalene spent her last years in this area. Inside the church is a statue of Mary Magdalene kneeling in prayer. At her side are two containers with the lower halves painted red so as to resemble vials holding blood. One vial is labeled *Sang de St Zacharie*, “Blood of St Zacharias” and the other, *Sang de Jean Baptiste*, “Blood of John the Baptist.” As Zacharias is the supposed father of John the Baptist, the meaning behind the twin vials could not be more transparent. Bearing

The Final Deception

children by the Galilean Jesus, Mary Magdalene continues the Baptist's bloodline.

Regeneration

Goddess with a Jar

In the traditional image of Mary Magdalene, she is invariably depicted holding a jar or vase, presumed to contain perfume, ointment, or spices. Mary Magdalene's "sacred" container is thought to identify her as the unnamed woman in all four Gospels who anoints Jesus with expensive perfume (Mt 26:6-13, Mk 14:3-9, Lk 7:36-50, Jn 12:1-8).

A similar "sacred jar" was associated with female deities in ancient Mesopotamia and elsewhere, which indicates this tradition was preserved for many generations. But what does it signify?

One goddess figurine dating from the third millennium BC shows her holding an open jar outwards from the womb. Her horned helmet means she is probably Inanna, the fertility goddess. Sumerian seals often depict women using straws to drink from jars. This is usually interpreted as a reference to some kind of beer-drinking ceremony, but sometimes this "drinking" occurs during sexual intercourse.

The Final Deception

Does the eight-looped motif behind the seated queen signify the Annunaki genetic imprint?

Many scholars see in Magdalene's anointing of Jesus a reenactment of the ancient Mesopotamian *beiros gamos* ritual that features a ceremonial anointing of the king, as the god, by a sacred "prostitute," as the goddess, but its relevance to first century Judaism remains a mystery. But those readers who recognize the ancient goddess in the anonymous woman of the Gospels, would assume a sexual consummation with the god.

Regeneration

Note the long dress parts in the same way to show the feet

Buddhist fertility goddess, Kwan Jin with sacred jar

The Final Deception

For the Hyksos, what defines a “goddess” is her highly valuable genetic potential as it relates to the Annunaki agenda, which is masked at all times. Hence biblical dramas describe such highly-treasured women in Israelite tradition – Tamar, Rahab, Ruth, and Bathsheba – as morally dubious. And so it is with Mary Magdalene, who Church traditions claims is a reformed prostitute:

And, behold, a woman in the city, which was a sinner, when she knew that Jesus sat at meat in the Pharisee's house, brought an alabaster box of ointment...Now when the Pharisee which had bidden him saw it, he spoke within himself, saying, This man, if he were a prophet, would have known who and what manner of woman this is that touches him: for she is a sinner.

(Lk 7:37-39)

Does Mary Magdalene's open jar signify that her genetic “treasure” has been accessed?

Regeneration

The Female Christ

The shadowy Annunaki background of ancient “gods” is neglected by most Magdalene commentators, who generally regard them as primordial archetypes, and prefer to imagine the highest ideals motivated the Galilean Jesus.

As we have seen, the Hyksos “master race” was tasked with intermingling Annunaki and human genotypes. At the outset, mass rape and forced impregnation was standard operating procedure, but over time more subtle strategies developed out of necessity.

Salvatore Mundi, “Savior of the world” ascribed to Leonardo da Vinci, c 1495.

Once the Hyksos state of Israel was consolidated, the great heroic kings, David and Solomon, reportedly serviced hundreds, even thousands, of concubines. Clues in the Gospels infer the Galilean Jesus was no slouch in that department either.

The Final Deception

Accused by his detractors of associating with known “prostitutes,” in Luke’s Gospel Jesus appears more as a “kept” man:

And the twelve were with him, and also some women who had been healed of evil spirits and infirmities; Mary, called Magdalene, from whom seven devils had gone out, and Joanna, the wife of Chuza, Herod’s steward, and Suzannah, and many others, who provided for them out of their means. (Lk 8:2-3)

Was Mary Magdalene exorcised from a case of multiple demonic possessions? If so, her portrayal in the Nag Hammadi texts represents a remarkably abrupt character transformation on her part. Rather than exorcism, there exists a far more plausible explanation for Luke’s assertion. As part of the purification process for entry into Mesopotamian priesthoods, most notably for those connected with the goddess Inanna/Ishtar, newcomers were required to graduate through seven grades of initiation.

Mary Magdalene offers her sacred container to Mary, as John the Baptist indicates Jesus, Raphael, c 1525

Regeneration

As a Hyksos king-priest, the Galilean Jesus targeted Mary Magdalene not merely for instruction, and membership of his inner circle, but to bear his children. Why Mary Magdalene?

Theologians presume the “Messianic” genealogy ends with the Messiah. Yet no logical reason exists to presuppose the Messiah, or Christ, would not have offspring. Quite the reverse. And therein lays the importance of Mary Magdalene to the imposter Christ.

Some of her titles in Gnostic texts – “the woman who knew the All,” “inheritor of the Light,” “Apostle of the apostles,” – suggest Mary Magdalene had a unique pedigree. In an inflexible society where deferential females had fixed roles, the idea of an innately or qualitatively “superior” female was not something easily accepted or understood by Jesus’ male disciples. Peter, especially, seems to resent Mary’s relationship with his master, and numerous heated exchanges between the two of them are recorded. An oft-quoted line from the Gospel of Philip captures the general mood in the camp:

But Christ loved her more than all the disciples and used to kiss her often on the mouth. The rest of the disciples were offended by it and expressed disapproval. They said to him, “Why do you love her more than all of us?” The Savior answered and said to them, “Why do I not love you as I love her.”

As yet not enough information is known for scholars to unravel the complexities of Gnostic thought, but the same Gospel implies Jesus only became “Christ” through his physical relationship with Mary Magdalene:

The chrism is superior to baptism... and Christ is so-called because of the chrism...He who is anointed possesses the All. He possesses the resurrection, the Light, the Cross, the Holy Spirit. The Father gave him this in the bridal chamber.

It was the Magdalene’s “Christ” gene code that gave her the “elevated” status, and made her the target. If she was born the

The Final Deception

feminine counterpart, or female twin of the male Christ, then was Mary Magdalene not born to co-create a truly sacred lineage?

From the Hyksos perspective, that is exactly what she did. Hippolytus of Rome (c.170-235), one of the most prolific writers of the early Church, wrote a great deal about Jesus and Mary Magdalene. In his *Commentary on the Song of Songs*, Hippolytus subscribes to the Magdalene tradition found in the Gospel of Philip. His language, as in the *Song of Songs*, is replete with the sexual innuendo typical of *heiros gamos* poetry, and appears to celebrate the creation a new upgraded hybrid lineage:

Mix this body of mine with the heavenly body! Drink it as wine! Take it and then reach it to heaven as a newly mixed drink.

Philip's Gospel continues, "Understand what great power undefiled intercourse possesses," inferring through procreation between the Galilean Jesus and Mary Magdalene the Hyksos assimilated the Christ genotype. The result being a new lineage with higher potentials into which non-human consciousness could birth.

Precisely how it was achieved is open to speculation, but somehow the imposter Christ "got" to Mary Magdalene before she realized who she was, or who he was. By then, it was too late....

Jacopo Palma il Vecchio, c 1517, Jesus grabs Mary Magdalene's jar

Regeneration

The Eight-Pointed Star

The eight-pointed star, and the related octagon, are stylized geometries found in the iconography of diverse cultures across all continents, but its meaning is hard to pin down. In Islam, the eight-pointed star is known as the “seal of the prophets,” and forms the ground plan of the Dome of The Rock in Jerusalem. Many Church baptismal fonts are octagonal, according to Christian thinkers, because the number “8” symbolizes regeneration.

From its earliest appearance in Sumerian cuneiform tablets, the eight-pointed star is almost always included in images depicting gods and goddesses. Appearing to be in the heavens, the eight-pointed star is usually associated with Nibiru, the Annunaki home planet. In Sumerian writing, an eight-pointed pictogram represents the Anu.

The Final Deception

In the Babylonian era, the eight-pointed star was chiefly linked with the goddess Ishtar/Inanna. In the Egyptian cosmogony taught at Hermopolis during the 3rd millennium BC, the *Ogdoad* were eight principle deities responsible for creation. In Taoist cosmology, there are eight *Bagua*, or fundamental interrelated principles of reality. It would seem “eight” holds an intrinsic or genealogical significance that differentiates gods from humans. Accordingly, coins of Greek kings and Roman Emperors, who were considered descendants of the gods, featured an eight-pointed star or wheel.

Greek coin, 3rd century BC

Roman coin of the Emperor Augustus

Anu pictogram

If the eight-pointed star can be taken as a crystallization of the Annunaki energetic encryption, this might explain its omnipresence in religious imagery. Symbols were used extensively by ancient cultures for protection, fertility, wealth, crop germination, and death and birth rituals. Since only the conscious direction of energy affects

Regeneration

physical conditions, symbols were geared to the subconscious mind. Modern science proves the more a symbol is used the greater its impact on neural networks, acting as a key to open energy pathways that lead to specific manifestations in real time and space.

Inanna in a classic scene

As will be explained later, both Imperial Rome and the Roman Catholic Church came under the sway of a power strongly opposed to Hyksos dominion, and the Annunaki agenda. Eight-pointed stars, common in Christian art, especially in images of the Madonna and Child, were calling cards of Hyksos-related factions inside the Church, and in Catholic society, used to advance the Annunaki agenda wherever possible.

Genesis describes a victorious Abraham receiving a heavenly commission from Melchizedek, king of Salem. No evidence for the existence of this Melchizedek has ever been unearthed. Nonetheless, within esoteric Judaism, Melchizedek is foundational as an angelic hero figure, and has even a quasi-divine status in the sectarian Dead Sea Scrolls.

The Final Deception

In Enochic literature, Melchizedek is described as a priestly world savior figure who returns in the End Times. This same Melchizedek is referred to in the New Testament as the power behind the Galilean Jesus:

Where Jesus has gone as a forerunner on our behalf,
having become a high priest forever after the order of
Melchizedek. (Hebrews 6:20)

The anonymous author of the *Letter to the Hebrews* goes on to describe Melchizedek as the “king of peace...without father or mother or genealogy, and had neither beginning of days nor end of life, but resembling the Son of God he continues a priest forever. See how great he is!”

Detail from *The Rucellai Madonna*, Duccio di Buoninsegna 1285

Regeneration

Earliest Christian inscription found at Ephesus reads, “Jesus Christ, Son of God, Savior,” with an eight-pointed star.

Father, Son, and Holy Spirit, encircled by eight-pointed stars, and supported by eight angels.

For their own reasons, later Roman Catholic theologians chose to trivialize Melchizedek, and he had no part in Church doctrine or Christological formulations. With the rise of Protestantism, Melchizedek reemerged, but his central role was only restored in Mormon theology.

Earliest depictions of Melchizedek show him in the classic Mesopotamian father-god mold, receiving sacrifices on an altar

The Final Deception

marked with an eight-pointed star known as the “seal of Melchizedek.” There can be little doubt the impetus behind Judeo-Christianity is borne from the Annunaki agenda.

Mosaic showing Melchizedek receiving the sacrifices of Abel and Abraham, an eight-pointed star is on the altar. Ravenna, Italy, sixth century.

Jesus inside the seal of Melchizedek, 6th century Byzantine tapestry

Regeneration

As painted by the sixteenth century Dutch artist, Quentin Massys, in his version of *Ecce Homo*, as Joseph of Arimathea stands alongside the scourged substitute, his headdress is embroidered with the seal of Melchizedek. Significantly, Joseph of Arimathea makes the little-understood, and seldom recognized, “hand of Sabazios” gesture. This happens to be the same “blessing” gesture made by Jesus in countless depictions down through the centuries. This particular imagery has profound implications.

Joseph of Arimathea (left) wears the eight-pointed “seal of Melchizedek,”
Ecce Homo, Quentin Massys, 1520

The Final Deception

The Hand of Sabazios

Sabazios is classified as a “sky father god” believed to have emerged in central and southeastern Europe during the first millenium BC, following the collapse of the Hittite empire. In stone steles found in Turkey and across the region, Sabazios is typically pictured on horseback defeating the primordial serpent in the classic dragonslayer tradition of the Sumerian Annunaki. The Greeks later equated Sabazios with Zeus, and sometimes with Dionysus.

Sabazios slays the Serpent, National Museum of Romanian history

According to the early first century Latin writer, Valerius Maximus, Jews that had settled in Rome were expelled in 139 BC, under a law which proscribed the cult of “Jupiter Sabazius:”

Gnaeus Cornelius Hispalus, praetor peregrinus in the year of the consulate of Marcus Popilius Laenas... compelled the Jews, who attempted to infect the Roman custom with the cult of Jupiter Sabazius, to return to their homes.

The word “Jupiter” is the anglicized *Iuppiter*, from the Greek *Zeus pater*, “father Zeus.” An exact parallel to Zeus and Jupiter is

Regeneration

the Sanskrit god addressed as *Dyaus pitar*: *pitar* is “father,” and *dyaus* means “sky.” Since the “sky father god” traces to Sumer and the Annunaki, were Hyksos Jews active in Rome? Numerous scholars have equated YHVH with Jupiter/J Zeus. And as YHVH was not a spoken name at the time, it was convenient to use “Jupiter” when in Rome.

In the Old Testament, YHVH and Elohim are interchangeable, and occur as *YHVH Elobe Tzevaot*, *Elohey Tzevaot*, and *YHVH Tzevaot*. Is there a connection between the Hebrew word *Tzevaot*, pronounced “sabaoth” (translated as “hosts” or “armies”) and “Sabazius?” Were Hyksos Jews known as the “army of YHVH?” In any event, the cult of Jupiter Sabazios gained a firm foothold in Rome, and later spread westward.

In various parts of Italy and Western Europe, a number of ornate bronze “votive” hands used in the cult of Sabazios in still unidentified ceremonies, have been discovered. Dating between the 1st century BC and the 2nd century AD, small holes drilled around the bases suggest the hands were affixed to poles, but scholars are duly mystified as to their purpose.

The Final Deception

Closely resembling a *mudra*, or a Hindu-Buddhist gesture to accentuate or redirect the body's energy flows, the position of the fingers and thumb is the same in all the hands. The index finger and forefinger are upright, the ring finger and little finger fold downwards, and the thumb is angled outwards. An assortment of different cult figurines appear on the fingers, but in most cases a pine cone is balanced on the tip of the thumb.

In Eastern traditions, the five fingers represent each of the five elements. Practice of hand mudras (“seals”), or hand yoga, regulates the five elements in the body to maximize health. The thumb is responsible for the “Fire” element, which is presumably why the pine cone in the hand of Sabazios is always on the thumb. Literal “fire” is visible plasma energy, or ionized gas. Irrespective of how, or from where, flow of plasma current is generated, the intent behind the ceremonial hands

seems to be to direct “Fire” to the pineal gland.

Regeneration

Wherever blatant pagan symbols occur in Christian imagery, Church authorities routinely explain them as diabolic imitations. Yet although the pre-Christian hand of Sabazios is prominent in Christian art, and especially in images of the *Salvatore Mundi* (Savior of the World), its existence is not officially acknowledged. Along with other enigmatic gestures, it is interpreted as a divine benediction with roots in the Byzantine Church, the peculiar finger positions symbolizing different theological creeds.

John the Baptist blesses Jesus with the hand of Sabazios

Originating with John the Baptist, the odd concept of “baptism of fire,” recorded in the New Testament, begins to make sense. John’s forecast that someone would “baptize with fire,” and in so doing make his water baptism redundant, refers to the transmission of invisible plasma energy or current to the pineal gland, and subsequently throughout the central nervous system of the “baptized.” By dint of his own energetic configuration, the predicted “fire baptizer” was a conduit for specific plasma frequencies.

The Final Deception

Salvatore Mundi, Sandro Botticelli, c 1500

To whom, then, did John refer? Not the Galilean Jesus apparently, since John continued to baptize separately from him.

Now a discussion arose between John's disciples and a Jew over purifying. And they came to John and said to him, "Rabbi, he who was with you beyond the Jordan... here he is, baptizing, and all are going to him."

(John 3:26)

Regeneration

Four typical *Salvatore Mundi* images from the early sixteenth century. Jesus makes the hand of Sabazious gesture while holding the earth, or a globe, in the other. The cross staff appears to be a four directional solstice-equinox marker, and strangely enough, it appears to be angled in sync with the earth's 23.5 degrees clockwise axial tilt. Not until Kepler's Laws, early in the seventeenth century, was it possible to calculate the tilt of the earth. What is the source of this "impossible" knowledge? Is the earth's tilt somehow connected to the Annunaki agenda?

The Final Deception

The Virgin Mary wears an eight-pointed star, while Jesus makes the hand of Sabazios

Jan Gossart, *Virgin Mary, Jesus Blessing, and John the Baptist*, c 1525

Regeneration

In Carlo's Crivelli's (1435-1495) masterpiece, *The Annunciation to Mary*, there are several aspects worth mentioning. Perhaps the most significant, however, is the "ray of light" descending from the skies to the top of Mary's head, location of the fontonelle, and the so called "crown" chakra.

The angel facing Mary makes the "hand of Sabazios" gesture emphasizing her pineal gland react to the plasma current directed at her.

The Final Deception

In modern society, symbols are more often than not taken for granted. But when orchestrated in alignment with specific energy patterns or formulae the unseen power of symbols is well known to occultists, Jungian psychologists, politicians, and advertising agencies.

Science has long understood all matter is interconnected energy in motion. Everything that exists, receives, holds, and transmits energy, and is distinguished by a unique frequency. Yet despite the carefully contrived images and icons that fill the archeological and historical record, research into their core energetic imprint barely scratches the surface.

The Annunaki agenda is displacement of the human race, a process explained as “Regeneration.” For the “gods” to go to such lengths in order to conceal this program, a human must have value beyond words. But by allowing themselves to be manipulated into believing outright lies as sacred truths, humans unwittingly enable their own displacement.

Pineal Gland

Pine cones were used as a ritual symbol throughout the ancient Mediterranean and Near East. Later adopted by the early Church as a Christian motif, it became a regular component of medieval alchemic and later Masonic iconography. Paradoxically, the pine cone symbol first appeared in Mesopotamia, where no pine trees grew.

Rationally, as the pine cone resembles, it therefore represents, the pineal gland, so-called “third eye” of Hindu mystical tradition, located near the junction of the vertebrae and the middle of the brain. Five thousand years ago, sophisticated functions of cerebral anatomy were supposedly unknown, so how did anyone know the tiny pineal gland was important?

The first description of the pineal gland, and the first speculations about its role, are found in the writings of Galen, a 2nd century AD Greek medical doctor and philosopher. Galen explains the pineal gland as a support hub for blood vessels, and goes to great lengths to refute a popular notion that the pineal

Regeneration

regulated the flow of *pneuma*. The Greek word for “breath,” in classical antiquity *pneuma* means “spirit of life,” or “soul.”

The world's largest pine cone is a bronze statue flanked by peacocks, believed to date from the 2nd century AD, located in the Vatican City

The pine cone is often featured in Freemason Octagons built into the ceilings of Masonic Lodges.

The French mathematician and philosopher, René Descartes (1596–1650), famously called the pineal gland “the seat of the soul,” as it is the only single item inside the human brain, where everything else is twinned. For Descartes, the pineal gland contains “animal spirits,” which he defines as types of plasma, “very lively and pure flames” that “enter and leave continually like the flow of water in a river.”

The part of the body in which the soul directly exercises its functions is not the heart at all, or the whole

The Final Deception

of the brain. It is rather the innermost part of the brain, which is a certain very small gland situated in the middle of the brain's substance and suspended above the passage through which the spirits in the brain's anterior cavities communicate with those in its posterior cavities. The slightest movements on the part of this gland may alter very greatly the course of these spirits, and conversely any change, however slight, taking place in the course of the spirits may do much to change the movements of the gland.

Modern text books explain the pineal gland as a small pine cone-shaped endocrine gland located in the center of the brain that medical science only partially comprehends. Known to be acutely sensitive to light, one of its main functions is to produce melatonin, which regulates circadian rhythms and affects the central nervous system.

Research on the psychedelic dimethyltryptamine (DMT) indicates the pineal gland plays a role in the production of DMT in the brain, which implies the pineal gland is instrumental to the perception of reality. It has also been suggested the pineal gland produces psychedelic amounts of DMT specifically at times of intense neurological significance, such as the moment when consciousness (hypothetically) enters and leaves the body.

Pine cones topped the ceremonial staffs of Osiris and Dionysus (Bacchus), and were often placed at the summit of a caduceus staff, symbol of medical associations around the world. A likely connection between the pine cone and staff, and the pineal gland and the spine, has not gone unnoticed.

Regeneration

Greek god Dionysus holds the pine cone topped staff

This ornate stone carved caduceus (right), topped with a pine cone, and featuring the twin masonic pillars, is on the outside of the Whitehall Building in New York City's financial district.

The Final Deception

“Kundalini” is a type of energy believed by many to sit at the base of the spine. It can be released to travel up the spine and into the pineal gland through the use of certain techniques. Theoretically, the “awakened” Kundalini aligns and merges the chakra energy vortices that are situated along the vertical column of the spine.

Asclepius looks disapprovingly at Hermes, who brings a merchant to bargain for the three naked “Graces.”

Sometimes referred to as a “serpent,” the Kundalini energy is best represented in Western lore by the rod of Asclepius, not to be confused with the twin serpents that entwine the caduceus rod. In theosophical science, and in certain esoteric schools, these twin serpents are thought to represent the wandering dual “Vagus” nerve that twists around the spine to connect the body’s principle internal organs to the brain stem (as shown in red ink).

The Vagus nerve

Among its many key functions, the Vagus nerve acts as the “reset” button after a perceived threat or shock to the system. The Vagus nerve communicates with the important centers of the body to quickly restore bodily functions to normal. Significantly, the Vagus nerve is associated with neurogenesis (creation of new neurons), and increased brain-derived neurotropic factor (BDNF). BDNF is a super-food for

Regeneration

brain cells that helps repair brain tissue, and aid regeneration throughout the whole body. Researchers have also discovered that stem cell growth is directly connected to Vagus nerve activity. Activating the Vagus nerve can stimulate stem cells to produce new cells and even repair and rebuild organs. The Vagus nerve can only function with the appropriate chemicals from the pineal gland, and ceases to function properly without them.

Without question, ancient and medieval Hermeticists participated in rituals and techniques designed to stimulate energy flows of the pineal gland. Symbols of these processes were encoded into religious imagery so devotees were unknowingly, or subliminally influenced. Not surprisingly, as items of church décor, pinecones are explained to the laity as symbols of regeneration, “new life” in Christ.

Large pinecones in Wreay Chapel, Cumberland, UK

Worldwide folklore, as comprehensively listed in the writings of Sir James Frazer and Joseph Campbell, supports the claim in Genesis that ancient gods somehow interfered with human development to drastically shorten lifespan and scramble cognitive processes ([Gen 6:3, 11:7](#)). This capability, by definition, would require highly advanced knowledge of DNA and of the body's internal mechanics, and to be achieved globally, the ability to effect change in the planetary electromagnetic field.

The Final Deception

By cultivating the appropriate energetic conditions in the human life support system, could a non-human, or Annunaki consciousness, replace its human occupant without killing the body? Renowned hermetic scholar and Egyptologist, R.A. Schwaller de Lubicz, in his introduction to *Sacred Science*, asks the question:

What object could be the aim of the Hermetic opus? It will necessarily be an undetermined substance and not a mineral, plant, or animal being. This substance can be none but the vital “Fire,” Life, capable of being transmitted to a specific being in order to lead that being to its own perfection. *This indeed is what all good texts intimate.*

The New Testament quotes the Galilean Jesus in an obvious reference to the potential of the pineal gland:

The light of the body is the eye: if therefore your eye be single, your whole body shall be full of light. (Mt 6:22)

“Enlightenment,” in the conventional Christian context, appears badly in need of reassessment.

Third century Greek relief, showing Prometheus creating mankind. With pine cone and staff suitably primed, Annunaki can birth into Homo sapiens bodies.

Regeneration

Alpha and Omega

And he who sat upon the throne said, “Behold I make all things new.” ...And he said to me, “It is done. I am the Alpha and Omega, the beginning and the end.”

(Revelation 21:5-6)

“Regeneration” would seem to lie behind the *Alpha and Omega* metaphor used in the apocalyptic Book of Revelation, which predicts a global catastrophe resulting in a “new” earth for God’s elite (“alpha” and “omega” being first and last letters of the Greek alphabet). From artistic representations of “Alpha and Omega,” the Annunaki associate themselves with “Alpha,” as initiators. “Regenerated” humanity, as recipients, is “Omega.”

The Ω symbol predates the Greek alphabet and traces back five thousand years to Sumerian cuneiforms, and later Babylonian culture, where the Ω symbol features on *kudurru* or “boundary stones.” No scholarly agreement exists on its meaning, but the Ω symbol often appears next to Ninkhursag (*Ninurta* in Babylon), fertility goddess and supposed wife and consort of Enki. Does the shape “Ω” represent the womb and birth process?

Ninkhursag and Enki

In this scene, sexual union between the god and goddess is not implied. Instead, new life is artificially generated through a mixing process – genetic engineering.

In this way, the “Omega” child is birthed, and the final solution of the Alpha Omega agenda begins.

The Final Deception

Babylonian boundary stone or marker

Old Babylonian Period plaques of clay with molded reliefs show a goddess (probably Ninurta) flanked by Ω motifs, beneath which sit naked hominid forms as if newly emerged from the womb. Two heads emerging from the shoulders is a theme primarily associated with the god Ningishzida, who collaborated with Enki to create the Lulu race.

An identical message of divinely ordained genetic transformation was repeatedly broadcast in Renaissance art. Fra

Regeneration

Bartolomeo's *God the Father and Saints Mary Magdalene and Saint Catherine* is a noteworthy example. The customary bearded Father sky-god is surrounded by eight angels as he holds an open book displaying the letters Alpha and Omega ("w" is the lower case of Ω). He blesses the two female saints with the hand of Sabazios, as the Magdalene proffers her sacred jar.

In Saint Catherine's legend, she has a mystical vision in which she is Jesus' bride. In the foreground is a white so-called "Annunciation lily," a flower often featured in paintings of the birth Annunciation to Mary, and which recalls the messianic bride's proclamation to the king in the Song of Songs (2:1), "I am the Lily of the Valley."

God the Father, Mary Magdalene, and Catherine, Fra Bartolomeo c 1495

The Final Deception

In the final chapter of the Book of Revelation, Jesus states,

“I am the Alpha and Omega, the first and the last, the beginning and the end. Blessed are those who wash their robes that they may have the right to the tree of life.”
(Revelation 22: 13-14)

What is meant by the “tree of life” and what is its significance to the Alpha and Omega “regeneration” project?

This Alpha and Omega Jesus makes the Sabazios Gesture as he holds the earth, Byzantine tile mozaic.

The Tree of Life

Discovery of huge Assyrian stone reliefs displayed prominently in temples and palaces has made famous the tall muscular stylized Annunaki “god.” In some scenes that are obviously copied from earlier cylinder cuneiforms, winged

Regeneration

bearded deities, sometimes wearing eagle-head masks, hold a bucket in one hand and a pine cone in the other. In most cases, these deities point their pine cones at the backs of the heads of kings and priests, who stand before an artificial tree; or else point their pine cones directly at the artificial tree; or directly at the king or priest, with no artificial tree present.

There is no unanimity among scholars as to the meaning of this “tree,” and no textual evidence pertaining to this symbol is known to exist. However, it appears to be a cult object with nodes and crisscrossing lines, not a literal tree, and though it has a standardized structure, the specific details vary from one tree to the other.

Some scholars interpret this Mesopotamian “tree” as the original model for the biblical “tree of life.” The “tree of life” is mentioned ten times in the Bible, most notably in the story of Adam and Eve, but it seems allegorical. Similar “tree of life” concepts occur in numerous other world cultures, some with descriptive details. Frequently, a serpent or dragon is coiled at the base of the tree, which is reminiscent of the Kundalini serpent, and a phoenix or winged bird sits at the top. Most “tree of life” mythology is linked to “gods,” and promises of “eternal life.”

The Final Deception

Without doubt the most sophisticated “tree of life” ideology belongs to the Jewish Kabbalah tradition, where it serves as the template for the structure of the universe and all creation. Essentially, the tree of life consists of ten or sometimes eleven *Sephirot*, or divine attributes, that permeate everything. *Sephirot* are interconnected through twenty-two energy channels, and organized into three vertical columns. Each *Sephirot* has a specific name, and can be located within the physical human structure, with the central column representing the spine. Initiates meditate on the names (stations) and advance upward through the respective transformative stages of the “tree of life.”

Kabbalah teachings, and those of similar and related esoteric systems, place great emphasis on the biblical Adam as the blueprint for the ideal. But as already explained, Adam represents a genetically engineered hybrid race, which is *not* the original human prototype. Adam’s sole purpose is as an earthly vehicle for non-human Annunaki consciousness.

Whatever spiritual benefits or insights may accrue from its study, in the final analysis the Adamic “tree of life” is more than likely a distortion of the original human energetic template, which would contain twelve stations.

Regeneration

The Finger of Fire

In terms of physical energy, ancient philosophers categorized everything into four elements: Earth, Wind, Fire, and Water. A fifth element, “Ether,” was understood as the non-physical causal element. These four elements correspond to the four states of matter: solid, gas, liquid, and plasma.

Plasma, in short, is ionized air or gas. Because it does not behave as a gas, plasma constitutes a separate state of matter. Fire and lightning are crude plasmas, but most plasmas are invisible to the naked eye. Although most school children are only taught three states of matter, not only is plasma physics on the cutting edge of modern science, plasma is overwhelmingly the most abundant form of matter in the Universe.

Ionization of air or gas to form plasma occurs when the number of electrons in its atoms or molecules is reduced or increased to create charged particles – positive ions or negative

The Final Deception

ions. Ionization is induced by heat or by electromagnetic fields, and the resulting plasma has similar conductive properties to that of metal, and is subject to electromagnetic influences.

In European alchemy, great emphasis is placed on the “transmutative power of fire.” Chief of the four elements, fire alone can transform the other three. Literal “fire” can only burn or incinerate a person, but as an agent of internal structural reform, “Fire” is plasma energy. By overriding all other energy frequencies, plasma frequency can change pre-existing conditions.

As a receptor of light and magnetism, the pineal gland is predisposed to the influence of plasma waves. The Pineal gland, neurological networks, DNA – these are the principle interests of those who wish to alter the human body for their own purposes.

In the Hermetic rituals of Western Europe, magic was the key component. Different orders developed specialized magic wands to invoke and transmit the element of “Fire,” either as a weapon or healer. As it acted as an extension of the pointer or index finger, adepts did not in theory need a wand. “Fire” could be summoned and conveyed by pointing the index finger – a loaded image in the encrypted art of the Renaissance.

The Creation of Adam, Michelangelo, Sistine Chapel

Regeneration

Prometheus, Piero di Cosimo, 1515

In Michelangelo's *Creation of Adam*, Adam is created through pointing an index finger, demonstrating the transmission of plasma frequencies by a Father sky god or "Anu." Adam likewise receives the transmission via his index finger. In classic illustrations, Prometheus, who created man and gave him "fire" according to Greek mythology, points his index finger. Primeval "fire" of the ancient gods does not refer to literal flame, an everyday occurrence on earth whether man exists or not.

Hermetic orders break down the four Hebrew letters of the name YHWH, the Old Testament God, to represent the four elements. The first letter *Yod* is Fire. Images of biblical heroes from both Testaments frequently show them with pointed index fingers, an odd gesture not recognized anywhere as part of Christian iconography.

The Final Deception

The Angel visits
Abraham, Jan Provost, c
1525.

“Finger magic” is prominent in this image, as the angel uses both hands to show a raised thumb and a pointed index finger to explain something to Abraham, as though the Annunaki agenda is being outlined to the “Father of Faith,” who appears to be getting the message.

Art experts explain pointed fingers in religious paintings as reminders to the faithful that their salvation comes from heaven, which was imagined at high altitude. This idea is consistent with how the Annunaki agenda is ordinarily packaged and presented to the public.

To ridicule Jesus’ delusions of grandeur, we are told Pilate instructed that a plaque be affixed to the cross, written in Greek, Hebrew, and Latin. In the synoptic Gospels, the sign reads, “King of the Jews.” But in the Gospel of John, the wording is “Jesus of Nazareth, King of the Jews,” or *Iesus Nazarenus Rex Iudaeorum* in Latin.

Though most depictions of the crucifixion show a sign with “INRI,” that particular acronym would not have been written. From census records, historical maps, and archeological excavations, there is no evidence that Nazareth

Regeneration

existed at the time of Jesus and Pilate. Even if it had, the name of a small village in Galilee was a meaningless reference to people in Jerusalem.

Rituals in medieval secret societies used the Latin language of ancient Rome. It was believed Latin words had magic power when spoken aloud in the correct sequence. *Igné Natura Renovatur Integra* – INRI – was an important mantra, the meaning of which is “By fire nature is restored to purity.” Freemasonry, which continues Hermetic tradition, explains this maxim as symbolizing the regeneration of mankind by “sacred fire.” “Fire,” it is claimed, is a metaphor for “divine love and truth.”

But then again, who would believe “fire” from ancient gods refers to artificially generated plasma frequencies? And who would ever imagine this “fire” was meant to reconfigure the human body to accommodate non-human consciousness?

The Phoenix

By improbable coincidence, in the mythology of most regions of the world is a large mythical bird that periodically renews itself through “fire.” In the West, this bird is the Phoenix from Greek myth. Among its counterparts are the Persian *anka*, the Hindu *garuda*, the Russian firebird, the Persian *simorgh*, the Turkish *kerkes*, the Tibetan Me *byi karmo*, the Chinese *fenghuang*, and the Japanese *hō-ō*, which all share the same basic design.

The Final Deception

Hermetic Regeneration

The Phoenix has proven an enduring symbol of rebirth and regeneration much favored by governments, armed services, and large corporations worldwide. Phoenix statues can be seen in parks or on public land; military operations are frequently named after the phoenix; and a disproportionate number of companies use the phoenix name and logo.

The earliest known depictions of the phoenix are found in Sumerian seals. Having passed thru the different grades, when a neophyte is presented to the Annunaki god or goddess, a stylized phoenix represents his rebirth or regeneration. In maintaining this tradition, a new initiate in the so-called Greco-Roman mystery religions was named a “phoenix.”

Regeneration

The goddess Innana receives an initiate for “rebirth.”

The phoenix became associated with royalty, and was depicted on coins of Roman emperors. With the advent of Christianity, phoenix statues often held center stage inside Catholic churches. Even more so in the medieval Knights Templar churches, which were independent from Rome. Predictably, the phoenix is explained as a symbol of Christ’s resurrection, and the rebirth of Christian believers.

The legend of the phoenix is just another fairy tale without appreciating that it is not literal burning flames that cause regeneration or rebirth, but plasma currents, for which “fire” is a synonym. As the Phoenix begins a new life, so too the Annunaki, who plan to inhabit energetically transformed human bodies, suitably altered by plasma-based processes to accommodate them.

The Many Faces Of Thoth

God of shepherds, merchants, cheats and thieves, travelers, athletes, and border crossings were just some of the titles given to Hermes by the ancient Greeks. Romans knew him as Mercury. When Hellenistic civilization collapsed, the gods of Olympus passed into myth, except for Hermes. Church Fathers adopted Hermes Trismegistus (“thrice great”) as a pre-Christian saint. Islamic tradition equates Hermes with El Khidr, immortal guide to Moses and Mohammed, who is still revered throughout the Middle East. The ancient Hindu text, *Mahanirvana*, states that Gautama Buddha is Hermes.

Emergence of the religious and philosophical system, “Hermeticism,” coincided with the development of modern science in the early Middle Ages. Isaac Newton was an avid student of the *Corpus Hermeticum*, Egyptian-Greek texts from the 2nd and 3rd centuries AD that deal primarily with cosmological issues.

The profile of Hermes adorns the United States silver “Mercury” dime, and statues of Hermes holding a caduceus are installed in public places in most European capitals, and in major cities around the world. Why?

The Final Deception

Typical Hermes statues from around the world.

Many Faces of Thoth

The Greek Gods

Greeks described their deities as having hominid form, but not human, and not subject to the usual limitations of earthly life. In stories of their deeds, the gods are competitive to a fault, prone to childish jealous, quick to anger, and fixated on sexual conquest. In others words, Greek deities are no different from the Sumerian Annunaki.

Not surprisingly, the principle Father sky-god, Zeus, is also a dragon slayer, who rises to supremacy after defeating Typhon, the deadliest monster of Greek Mythology. As with the Annunaki, Greek deities were hierarchical, with a council of twelve “Titans,” overseeing affairs. Each god had specific functions and responsibilities, and human activity in those fields prospered or suffered at the whim or mood of the respective god. Rituals and ceremonies were conducted to appease the gods and gain their favor. Like their Sumerian counterparts, Greek gods had personal names, but sometimes a personal name is applied to a collective.

Zeus hurls lightning at Typhon, Greek vase c 550 BC

The Greek historian Herodotus (c. 450 BC), who spent several months traveling around the country, wrote about the history and religion of Egypt. But when Herodotus mentions an Egyptian god he uses the Greek equivalent name rather than the Egyptian name transliterated into Greek because,

The Egyptians were the first to introduce solemn assemblies, processions, and litanies to the gods; of all

The Final Deception

which the Greeks were taught the use of by them. It seems to me a sufficient proof of this that in Egypt these practices have been established from remote antiquity, while in Greece they are only recently known.

When Alexander conquered Egypt in 332 BC, there was no need to impose Greek gods on the local population because they were already worshipped. The head of the Egyptian pantheon, *Ra*, was equivalent to Zeus, and presided over an assembly of twelve gods. *Thoth*, messenger of the gods, inventor of writing, and

supposed author of all works of science, religion, philosophy, and magic, was Hermes. Most often portrayed with an ibis bird head-covering, Thoth (also known as “thrice great”) is the most ubiquitous of the Egyptian deities.

In Egyptian king lists, as in the Sumerian lists, the first kings were gods who ruled for thousands of years. In both timelines, human kingship begins in the mid-fourth millennium BC. Historians, who regard chronicles of non-human kingship as pure fiction, treat names and dates after 3000 BC from the *same* chronicles as fact. How different civilizations, supposedly isolated from each other, could produce the same mythic history has yet to be explained.

Differences and similarities exist between Sumerian and Egyptian cultures, but if the gods of Sumer and Egypt were contemporaneous, then they were most likely the same gods. If the Egyptian god Thoth was also the Greek Hermes, did Thoth have an equivalent in the Sumerian pantheon?

Ningishzida

In his Earth Chronicle books, Zechariah Sitchin was first to identify the Sumerian deity, *Ningishzida*, as Thoth. And based on their mutual attributes, the association is unavoidable. Ningishzida

Many Faces of Thoth

designed ziggurats; Thoth was the architect of pyramids. Both were horned gods, who decreed the measurement of time, and the movement of the planets. “Ningishzida” translates as “Lord of the Tree of Life,” or “Lord who makes the trees grow properly.” Egyptian murals depict Thoth tending to a “tree of life.” Sumerian cuneiforms show Ningishzida with twin serpents and the Egyptian *ankh* – exactly how Egyptian murals portray Thoth.

Probably the strongest evidence connecting Ningishzida with Thoth/Hermes is found on a ceremonial steatite vase belonging to Gudea, the self-described “shepherd” king of Lagash during the 21st century BC. The vase, which is dedicated to his protector god, Ningishzida, is carved with winged creatures supporting twin serpents that are entwined around a central staff, which constitutes the earliest representation of the caduceus on record. In cuneiform seals, Ningishzida is normally depicted with two serpents. Likewise, Egyptian murals show Thoth holding two serpent rods.

Sumerian records describe Ningishzida as an ally of Enki, and they appear together on cylinder seals. Considering the implications of Ningishzida’s iconography, more than likely he was involved in the genealogical experimentation that led to the creation of the hybrid Adamic race.

The Final Deception

The so-called winged eagle-headed “genie” of Assyrian and Mesopotamian iconography remains an unidentified Annunaki god. Yet his constant depiction with a “tree of life” suggests a link with Ningishzida, who was given the epithet “hawk predator of the gods.” And as with his Egyptian counterpart, Thoth, the “genie” wears a bird headdress.

Caduceus libation vase or jar dedicated to Ningishzida

Ningishzida (two snakes emerging from his shoulders) brings Gudea to Enki.

Many Faces of Thoth

Thoth holds two serpents as he points an ankh at the Pharaoh

Standing serpents flank Ningishzida (seated) as he receives initiates

Iconographic evidence suggests Thoth is also *Quetzalcoatl*, the legendary Central American “feathered” or “winged” serpent god, who is credited with a central role in creating and instructing humanity, and who introduced the Mayan calendar, and the building of Sumerian-style ziggurats in Mexico. Like the Sumerian “hawk” and the Egyptian “ibis,” the “quetzal” is a bird headdress for this Mesoamerican deity.

Since mainstream historians do not accept that Mesoamerican and Mesopotamian civilizations could have met, evidence to the contrary is either ignored or classed as a hoax. In 1992 an expedition to Chua, on the shores of Lake Titicaca, Bolivia, discovered a ceramic bowl, which was unearthed by a local man

The Final Deception

some 30 years before, covered with glyphs. Reputable linguistic scholars around the world declared the writing system was Sumerian cuneiform. Other artifacts and stone monuments have been found elsewhere in Bolivia and Peru, with various forms of Mesopotamian writing.

Quetzacoatl, left, holding caduceus; right, holding a Sumerian style “bucket”

Quetzacoatl and the eight-pointed Mayan calendar

If the high-ranking Annunaki Thoth led an expedition to Central America, then the statue of Quetzacoatl holding a caduceus confirms the mission’s prime directive – alteration of the local populations.

Many Faces of Thoth

Ceramic “Fuentes Magna” bowl with proto-Sumerian writing found in Bolivia.

But Thoth’s story does not necessarily begin in ancient Sumer. According to Plato, a highly advanced civilization on the lost continent of Atlantis was home to the gods before its demise sometime during the 10th millenium BC. Hermetic tradition maintains Thoth was an Atlantean. Atlantis is not the subject of this book, but if Thoth was as all-knowing and powerful as his extraordinary reputation maintains, then how could Atlantis have perished? On the other hand, how could Atlantis have perished without Thoth’s contribution?

The Emerald Tablet

By all accounts, Thoth knew all the fundamental laws and principles by which everything in the universe exists. Written or encoded onto an “Emerald Tablet,” one of twelve alleged to exist, this information was reportedly copied and stored in as many as 40,000 books, and safeguarded by an ancient priesthood.

When did all this take place? Different dates are posited, but the general timeframe suggests a date between 25,000 and 13,000 years ago – impossible under the prevailing academic interpretation of history, which dates the beginnings of written language no earlier than 3500 BC.

Modern philologists claim *all* languages derive from one common source. The “Babel” event, as recorded in Genesis, and

The Final Deception

in global folklore, suggests the Elohim, or sky gods, somehow managed to wipe the original human tongue from collective memory, and replace it with a bewildering assortment of new languages. As mentioned previously, the minimum requirement to accomplish this feat would be the ability to manipulate the planetary electromagnetic fields.

Peoples of the ancient Mediterranean, as well as medieval Hermeticists, believed Thoth/Hermes devised and imparted these derivative languages to the amnesiac population. He also taught medicine, agriculture, astronomy, and religious ritual – everything a newborn society needed to know.

To comprehensively delete memories of the past, the entire cultural legacy of civilization would need to be physically erased. An unimaginable task of mind-boggling proportions, but perhaps that is why no advanced cultural artifacts survive from before 3500 BC? Was the evidence removed from the scene of the crime?

Earlier structures still standing, must have been essential to the larger Annunaki agenda. And since they are all made of stone, these monuments cannot be carbon dated anyway.

If this history is a glimpse into the consequences for humanity of Thoth's possession of the "Emerald Tablet," then what exactly is an "Emerald Tablet?"

Almost every culture has a tradition of primordial warring gods, and among many shared elements that indicate a common source for these legends, is the quest to capture certain "magic" stones or crystals, the possession of which guarantees victory. And no culture devotes as much attention to these objects as the Sumerian.

Epic poems describe Annunaki gods fighting over the *ME*, or "Tablet of Destinies," usually against the dragon monsters, *Tiamat* and *Anzu*. Since world domination was at stake, it seems non-humans were locked in a struggle to possess the Tablet of Destinies. Scholars have yet to quantify a *ME*, but as R. A. Boulay points out in *Flying Serpents and Dragons*, a *ME* seems to be an Emerald Tablet:

The *ME* seemed to apply to anything composed of system, direction, ordered events, law, arts, and crafts, even weapons and mechanical devices.

Many Faces of Thoth

Annunaki battle with the dragon *Tiamat* to retrieve the Table of Destiny

In *The Cosmic War*, Joseph Farrell explains that a *ME* is often called *ME-LAM*, which means “brilliant” or “light-emitting,” implying the Tablet of Destinies utilizes electromagnetic energy. Further clues suggest the *ME* can manipulate weather and effect action from a distance. “Destinies” infers the *ME* were used to predict the future, not necessarily by astrological means, but through probable outcomes or realities recorded on the *ME*. Logging all past, present, and future probabilities, the *ME* was akin to a dynamic digital disk with infinite data storage capacity.

In the consensus view of Masonic scholars, *Hiram Abif*, the central hero of Freemasonry, and the architect of King Solomon’s Temple, is none other than Thoth/Hermes. Furthermore, antediluvian knowledge, which is purportedly preserved in Masonic teachings and rituals, originates from the *Book of Thoth*. In *The Secret Teaching of All Ages*, the prominent Masonic scholar, Manley P. Hall, elucidates further:

..while Thoth/Hermes still walked the earth with men, he entrusted to his chosen successors the sacred Book of Thoth. This work contained the secret processes by which the **regeneration of humanity** was to be accomplished and also served as the key to his other writings.

Hall does not specify what this “book” is, or how its information is translated, but asserts “it is still in existence and

The Final Deception

continues to lead disciples of this Age into the presence of the Immortals.”

Nothing implies the *ME* or “Emerald Tablet” was created by Thoth, or any other “god.” But since the information it contains provided the Annunaki with sufficient know how in order to “regenerate” humankind, the manufacturers must have been privy to the original human blueprint. Presumably it was guarded with the utmost security, so how did Thoth gain access to an “Emerald Tablet?” How did he retrieve its information?

Whatever occurred, he must first have earned a sacred trust from the guardians of the Emerald Tablets...before betraying them. Is this why Thoth/Hermes was also known as the god of cheats, liars, and thieves?

Thoth, dragonslayer with Emerald Tablet

Many Faces of Thoth

“The ram bearer”

What man of you, having an hundred sheep, if he loses one of them, does not leave the ninety-nine in the wilderness, and go after that which is lost, until he finds it? And when he has found it, he lays it on his shoulders, rejoicing. (Luke 15:4-5)

Hermes, 2nd century Roman statue copied from early Greek model

The Parable of the Lost Sheep has inspired millions of sermons about Jesus’ love for mankind, but apart from the sheer impracticality of lifting an adult sheep (150 - 200lbs), why would anyone put a sheep on his shoulders in the first place?

Two reasons: one, because this is what Hermes is known for, and two, because “ram’s horns” are inside the human brain.

Dated between 700 BC and 400 AD, numerous statues and images of Hermes carrying a ram on his shoulders have been discovered throughout the ancient Greco-Roman world. Known as the *Hermes Kriophorus* (“ram bearer”), they are presumed to commemorate the propitious killing of sacrificial rams. Some later ones were labeled by the Church as “Jesus, the Good Shepherd.”

The Final Deception

The Greek historian, Pausanias (110 AD -180 AD), explains there were sanctuaries in classical Greece dedicated to *Hermes Kriophorus*, and in some places there was a joint cult with *Apollo Karneus* (from *karnos*, also meaning “ram”) in which “ram-bearers” participated in secretive rites.

According to Pausanias, these “sanctuaries” were named *Promachos*, after a soldier in the first rank of the phalanx, which collectively refers to the first line of battle. The *Promachoi* were a legendary mainstay of the highly militaristic and notoriously xenophobic culture of Sparta, where, according to Herodotus, “they considered the things of the gods weightier than the things of men.”

Sparta was also the chief center of worship of Apollo Karneus. Classical scholars are unsure how to classify *Apollo Carneus*, but translate the name to mean “the god of flocks and herds,” which means Apollo Carneus is a “shepherd” deity.

The “Good Shepherd” as seen in the Christian catacombs.

Standard “ram-bearer” statue

Many Faces of Thoth

Coin from c 350 BC showing Apollo Karneus with ram's horns

Kinship between Israelites and Spartans is asserted in the *Book of First Maccabees*, and is corroborated in Josephus' *Book of Antiquities*. First Maccabees recounts correspondence between Jonathan, the High Priest in Jerusalem, and the king of the Spartans (known as *Lacedemonians*), around 320 BC.

Jonathan the high priest, and the elders of the nation, and the priests, and the other people of the Jews, unto the Lacedemonians their brethren send greeting: There were letters sent in times past unto Onias the high priest from Darius, who reigned then among you, to signify that ye are our brethren....wherein declaration was made of the league and friendship, lest we should become strangers to you altogether, for there is a long time passed since ye sent unto us.

We therefore at all times without ceasing, both in our feast, and other convenient days, do remember you in the sacrifices which we offer, and in our prayers, as reason is, and as it becomes us to think upon our brethren, and we are right of your honor. We commanded them also to go unto you, and to salute you, and to deliver you our letters concerning the renewing of our brotherhood....It is found in writing, that the Lacedemonians and Jews are brethren, and that they are of the stock of Abraham. Now therefore, since this is come to our knowledge, ye shall do well to write unto us of your prosperity. We do write back again to you, that your cattle and goods are ours, and ours are yours.

The Final Deception

Represented as a “lost tribe” of Israel, the Spartans appear to be of Hyksos descent, which explains why Luke alludes to Spartan iconography. Writing of the Greco-Persian Wars, which began in 499 BC, Herodotus mentions that Sparta was home to the cult of *Zeus Ammon*, the bearded god with ram’s horns, who became associated with Alexander the Great two centuries later. So what is the significance of the ram’s horns?

Zeus Ammon

Enki, the archetypal horned god as depicted in 2D relief

Many Faces of Thoth

The main event in the Spartan calendar was known as the Carneia festival, which took place every year from the 7th to the 15th of August. This period is known as a highly auspicious time of the year in Hermetic lore, when planetary electromagnetic energy flows are understood to be especially conducive to “regenerative” processes, and which reach a peak on August 12th.

Silver coin showing Alexander the Great with ram's horns, c 290 BC

Phoenix rising from the flames, 2012 Olympic Games closing ceremony, August 12, London

The Annunaki idea of “regeneration” means blocking core organic energy distribution in the human body, and superimposing inorganic flows. This outcome necessitates manipulation of cerebral and neurological processes.

Located under the cerebral cortex, in the medial temporal lobe, the “hippocampus” is a major component of the human brain. Two hippocampi, one in each side of the brain, are known to have key roles in the consolidation of information from both short-term and long-term memory.

The Final Deception

The famous eight-pointed Mayan Long Count calendar, as given by Quetzalcoatl, is recognized as the world's most accurate, needing adjustment 1 day in 380,000.

The end date was December 21st 2012, the start date was – August 12th, 3013 BC.

Modern surgical texts commonly refer to the hippocampus as “Ammon’s horns.” The name “ram’s horn” was first proposed by Danish anatomist Jacob Winslow in 1732; and a decade later the Parisian surgeon, de Garengot, named it “cornu Ammonis,” supposedly after the Egyptian god Ammon, whose symbol was the ram.

Ammon’s horns

“Ammon’s horns” inside the brain

Many Faces of Thoth

Electroencephalograms (EEG) record electrical activity along the scalp, and measure voltage fluctuations resulting from ionic current (plasma) flows within the neurons of the brain. EEG patterns in the hippocampus show vibrant patterns of electrical activity, which are not yet fully understood. The high concentration of neurons in the hippocampus, and the “fornix” (the bundle of fibers (axons) carrying signals from the hippocampus to the hypothalamus), implies a central function in regulating synaptic activity, and everything that implies, particularly in terms of neuroplasticity, and neurogenesis.

Is the ritual worship of heroic statues of ram-bearers and gods with ram’s horns, intended to subliminally stimulate neurons in the hippocampus? If so, would this hypothetically increase their susceptibility to synchronized plasma flows calibrated to form neural pathways specific to desired modes of thought and behavior?

The Herma

Among his many attributes, Hermes was the god of boundaries and borders. No one knows why, but it seems the

The Final Deception

shepherd Hermes was believed responsible for herding groups of people into different lands, and for maintaining the divisions. In the Greek-speaking world, these borders lines were initially marked by strategically placed piles of stones, known as “Herma.” In time, these stones were replaced by giant carved phalluses.

Eventually, in all but the remotest areas, the phalluses were in turn replaced by busts of Hermes atop tall rectangular stone pillars, with a much smaller phallus carved at the appropriate height. No consensus exists on this peculiar depiction, as Hermes is not generally known as a fertility god. But as psychoanalysts will confirm, the phallus is the classic symbol for the male generative power, or “regeneration” in the broader sense.

Due to the Renaissance, attention returned to the gods of ancient Greece and Rome. Paintings and sculptures frequently featured scenes lifted from the various myths of Hermes. Although he was the most celebrated artist of the Renaissance, Leonardo da Vinci did not directly depict Hermes. But he seems to have done so indirectly.

Many Faces of Thoth

Leonardo Da Vinci

Leonardo produced two versions of “The Virgin of the Rocks,” and in both paintings huge “Herma” phalluses tower behind Mary. This imagery cannot have been accidental, or copied from nature, as Leonardo left nothing to chance in his paintings, and this type of rock formation is virtually impossible inside a cave (often used as a symbol of the womb). Similar, equally improbable rock phalluses were placed in the background.

The Virgin of the Rocks, Leonardo da Vinci, second version

The Final Deception

If Leonardo's intent was to undermine the "virgin" birth doctrine, why bring Hermes into the equation? The answer may lie in Leonardo's curious obsession with John the Baptist. For Renaissance masters, it seems at least one crucifixion scene was compulsory, yet Leonardo Da Vinci painted none. In Leonardo's body of work, the roles of Jesus and John the Baptist appear to be reversed.

His final painting, for which he did not receive a commission, is an enigmatic portrait of John the Baptist pointing his index finger upward. Earlier artists had shown John the Baptist more subtly making the same gesture, but Leonardo made it the dominant aspect.

John the Baptist, Leonardo da Vinci, 1510

No one seems to know what to make of John's self-satisfied expression. As his life is recorded in the Gospels, there seems to be little, if anything, to smile about. Yet the face seems to be saying, "I know something you will *never* know." Could there be a secret only Leonardo Da Vinci and John the Baptist share?

Leonardo's original version of *The Virgin of the Rocks*, which hangs in the Louvre, was rejected for reasons not made public, but which are easy to understand. The subject of the painting is a non-canonical legend, in which the Holy Family travel to Egypt. On the way they meet the infant John the Baptist and Uriel, his "protector" angel, inside a cave. In Catholic tradition, this occasion was when Jesus gave John the authority to baptize him in later life.

In the original painting, the two infants appear identical, and John blesses the kneeling Jesus, in a blatant turnaround of Church myth.

Many Faces of Thoth

In the second version, which was accepted, the positions of Jesus and John are switched. So Mary now sits with John, who is identified by the Baptist's traditional reed cross, and Uriel sits with with Jesus, who is now depicted with a less cherubic face.

Apparently, Leonardo was determined to set the record straight, which for him meant an acknowledgment of John the Baptist's superiority. If a detail from his *Last Supper* is anything to go, where an accusatory disciple thrusts John's upright index finger at Jesus, Leonardo was unhappy with the Galilean's superior status. So distinctly personal is Leonardo's art, it is almost as if he believed *he* was John the Baptist. The Renaissance was, after all, a "rebirth" of Greco-Roman culture when the transmigration of the soul was an accepted philosophy.

It doesn't stop there. In *The School of Athens*, Raphael depicts Plato as Leonardo Da Vinci, making the same "Fire" gesture as John the Baptist. This sign, however, predates Renaissance imagery, and traces to ancient depictions of Hermes.

The Final Deception

Detail from *The School of Athens*, Raphael, 1510

Leonardo Da Vinci (left), as Plato, holds a copy of *Timaews*, a discourse on the nature of the physical world focused on the four elements – Fire, Water, Earth, and Air – and the transmigration of the soul.

Early Christians believed John the Baptist fulfilled an Old Testament prophecy that Elijah would return, and the Gospels describe John wearing the same hair shirt and leather belt worn by Elijah (**2 Kings 1:8**). In almost all Middle East traditions, Elijah is equated with Hermes/Thoth. In the Gospels, John's message is reduced to a couple of proclamations and a few bland statements, but if he had the ear of kings, and Antipas struggled to understand him, his message was anything but simple:

When Herod heard John, he was greatly puzzled; yet he liked to listen to him. (Mark 6:20)

Many Faces of Thoth

As Thoth/Hermes/Elijah were all “messengers,” so was John the Baptist. According to the Book of Acts, when Paul preached in Phrygia (Turkey), people mistook him for Hermes,

When the crowds saw what Paul had done, they raised their voice, saying in the Lycaonian language, “The gods have become like men and have come down to us.” And they began calling Barnabas, Zeus, and Paul, Hermes, because he was the chief speaker.

(Acts 14:11-12)

The Gospels insist John the Baptist’s food was “locusts and wild honey,” a diet shared by Hellenistic gods. It was through eating wild honey that Hermes became the gods’ messenger.

In Greek mythology, the *Thriae* were a trinity of bee goddesses

who represented the life cycles of birth, death and regeneration. Attributed with the power of prophecy, they instructed Apollo on the art of divination and reading signs in natural world. In the fourth century Homeric *Hymn to Hermes*, Apollo speaks to Hermes:

Gold-embossed Thria, c 700 BC. Note the eight-petal flowers

“There are certain holy ones, sisters born--three virgins gifted with wings: their heads are besprinkled with white meal (pollen)... These are teachers of divination apart from me.. From their home they fly now here, now there, feeding on honey-comb and bringing all things to pass. And when they are inspired through eating yellow honey, they are willing to speak the truth; but if they be deprived of the gods’ sweet food, then they speak falsely. These, then, I give you; enquire of them strictly and delight you heart: and if you should teach any mortal so to do often will he hear your response--if he have good fortune.” So he spoke. And from heaven father Zeus himself gave confirmation to his words, and commanded that glorious Hermes should be lord over all birds of omen . . . and also that he only should be the

The Final Deception

appointed messenger to Aides, who, though he takes no gift, shall give him no mean prize.

Unholy Blood

In Ghirlandaio's depiction of the *Adoration of the Shepherds*, a figure dressed in green, wearing the green laurel wreath of the Greek gods, points out the infant Jesus to a "ram bearer," carrying a ram with green foliage on its head. Green was the color associated with Hermes/Mercury, whom Sufi tradition equates with the Middle Eastern fertility icon, the "Green Man," commonly found carved into Knights Templar churches. Is the Hermetic "Green Man" John the Baptist, father of the child in question? Was Hermes a fertility symbol because of the central role he played in the "regeneration" of humankind?

Adoration of the Shepherds, Domenico Ghirlandaio, c 1475

Many Faces of Thoth

Royalty began in Sumer as a control mechanism for the Annunaki, and royal symbolism down the centuries implies a continuity of purpose. One image is exceptionally revealing. The anonymous “Wilton Diptych” is an extremely rare example of late fourteenth century portable dual-panel art featuring the Madonna and Child. Due to anti-Roman sentiment in England during the Puritan revolution, blatantly Catholic icons were destroyed. The Wilton Diptych most likely survived, not in spite of its royal theme, but because its theme was Annunaki royalty.

The Wilton Diptych, c 1395

In the left hand panel, John the Baptist and two earlier English royals, Edward the Confessor and Edmund the Martyr (left), accompany the kneeling Richard II of England. Together they present the king to the Virgin Mary, the infant Jesus, and a party of female angels, in the right hand panel.

Each female angel wears Richard's white hart livery badge. The royal gown is similarly embroidered with horned stags – the archetypal fertility motif that features in an anonymous, and well-known, 16th century painting of John the Baptist as

The Final Deception

Dionysus/Bacchus, the Greco-Roman fertility god, which is based on an original Leonardo da Vinci drawing.

The Wilton Diptych could hardly be a more obvious Annunaki fertility icon. Representing willing recipients of the royal seed, fecund female angels assemble with Mary, as the infant Jesus blesses the king with the hand of Sabazios. The presence of John the Baptist confirms Richard's genealogical heritage, and the formal manner in which he presents the king mirrors a similar protocol depicted in Sumerian cuneiforms.

Many Faces of Thoth

Ningishzida (Thoth/Hermes) presents the king to Enki, pictured with 8 sacred “jars,” intimating a genealogical theme

Standing beside John, the Anglo-Saxon Edward the Confessor is known mostly for his pro-Norman sympathies, which eventually led to the Norman conquest of England after his death in 1066. Little is known of Edmund the Martyr, other than that he was a ninth century king of East Anglia, venerated by the Vikings, who minted coins to commemorate him.

Chief deity of the Normans and the Vikings was Odin, or Wotan to the Saxons. According to Julius Caesar and the Roman historian Tacitus, Wotan/Odin was a name for the Roman god Mercury – Thoth/Hermes.

The Peacock Angel

Northern Iraq is home to the Yezidis, a Kurdish speaking people who claim to have the world’s oldest religion – the primeval faith upon which all other religions are based. Without texts, Yezidi tradition is passed down orally. The central deity is known as *Melek Taus* or “Peacock Angel,” who is believed to have brought the colors of the rainbow into the world manifested as a

The Final Deception

peacock, whose iridescent feathers display all the colors as the angle of illumination changes.

Yezidis believe the Peacock Angel participated in the creation of Adam, and is directly responsible for teaching the different languages to mankind. As the unseen ruler of the world, Yezidis believe priests, kings, and emperors have acknowledged his authority with peacock motifs on everything from thrones to coinage.

He is also a dragon slayer, known in diverse traditions by various names. The Peacock Angel does not always manifest as a peacock. He is the Islamic prophet El Khidr, the Christian Saint George, Thoth of the ancient Egyptians, Hermes of the Greeks, and he is also John the Baptist.

Curiously enough, peacocks often feature in scenes of the Annunciation to Mary, and the Adoration of the Magi. Citing a medieval superstition that peacock flesh did not decay after death, art historians claim the peacock image symbolizes the Resurrection. But as peacocks *never* feature in crucifixion scenes, or in depictions of the resurrected Jesus, this explanation is unconvincing. However, peacocks are undeniably associated with the immortal gods of Mesopotamia, India, Persia, Greece and Rome, and are often depicted alongside the Tree of Life.

Tree of Life Peacock Tapestry, India

father of the Galilean Jesus.

In Renaissance art, the peacock usually appears as a kind of observer with a keen interest in events. In painting of the *Adoration of the Magi*, Jesus' biological father is obviously absent, but it seems as if he is represented by the peacock. In the coded language of the Renaissance artists, it seems once again we being reminded that John the Baptist, who is an incarnation of the Peacock Angel, is also the

Many Faces of Thoth

Adoration of the Magi, Sandro Botticelli, 1475

The Final Deception

Detail of the Peacock

From the painted walls of the ancient catacombs of Rome, to the sophisticated mosaics of 5th century Byzantium, and the art of medieval Europe, the peacock image is central to conveying the “regeneration” message. In Van der Weyden’s painting, *The Last Judgment*, the Peacock Angel even weighs the souls of the dead to check the extent of their “regeneration.”

Christian catacombs, Rome, c 250 AD

Although the Christian catacombs of Rome are well known, few people are aware of the existence of Jewish catacombs, at least six of which have been discovered. Similar in construction, Jewish

Many Faces of Thoth

catacombs are thought to predate the Christian by about one hundred years. Tunnel walls of both are decorated with peacock images.

Peacocks inside a Jewish catacomb in Rome, c 150 AD

Why would early Christians, who supposedly blamed the Jews for Jesus' death, use Jewish icons to decorate tombs of Christian dead? The peacock symbol only makes sense when painted in both sets of catacombs if the people buried there maintained Annunaki traditions. So the earlier Hyksos in Rome morphed from "Jews" into "Christians" as the direction of the wind changed.

The Final Deception

Detail from *The Last Judgment*, Rogier Van der Weyden, 1450

Dark Knights

Subject to supervision, harassment and continuous abuse by hybrid intruder races, who prefer to call themselves “Knights,” humans turn to religion for comfort. Put your faith in Jesus Christ. Yet cathedrals and churches are built on sites sacred to Annunaki gods. Religious worship, ritual, and iconography are designed not to save souls, but to expedite the “regeneration” of believers. And how can a religion centered on retroactive biographies of an imposter, and not on teachings of the historical Christ, be considered Christian?

As an academic discipline, Church History only pretends to study the history of Christianity. True Christian history is not on the syllabus. What has passed for “Christianity” for two thousand years is nothing other than a developmental stage in the non-human “invasion from within” agenda. Wars between nations, and conflicts within religions, testify to an ongoing struggle between competing forces to appropriate humankind. Ultimately, they have nothing to do with “freedom.”

Emerging in different times and places, and usually with different names, they might not always be in the ascendant, but the Hyksos are always involved.

The Final Deception

Templars

Why are the medieval Knights Templar the focus of so much mystery, speculation, and conspiracy theory? Because conventional Knights Templar history makes no sense, and like the Gospel drama, it was edited by the Church. Apart from a few commercial transactions, Templar archives are lost. Relying mainly on Catholic sources to explain them, orthodox historians provide only a narrow interpretation of the Templars that raises more questions than it answers.

The Knights Templar was formally registered as a monastic order in 1118. But all the founding members, as well as their illustrious sponsor, Bernard of Clairvaux, were related. So this was a close-knit family operation. As the secretive Templar organization expanded, leadership positions were based strictly on genealogy, and drawn from inter-related noble families of Europe.

Their mission was to supposedly protect Christian pilgrims en route to the Holy Land. No proof exists of them ever doing that. Although an obvious cover story, it was never publically challenged by their critics, even during the Templar trials.

After receiving huge donations of land, property, and money from European aristocrats, within two decades the Templars were the richest private enterprise in the world, and the first multinational corporation. But why would the notoriously uncharitable feudal barons suddenly give so much so readily? The formulaic response is they were guilt-ridden medieval Catholics, and Bernard of Clairvaux had promised them a place in heaven. In the real world, the barons coughed up because something visceral obliged them to do so.

It is generally known the Templars spent their first nine years in the Holy Land methodically digging beneath the site of Solomon's Temple. No one knows what they were looking for, or if they found anything. And strangely enough, their enemies never mention it.

Within a few years, the Templars had developed into an autonomous crack military unit, independent from the Crusader armies. Although respected as warriors, visiting monarchs accused the Templars of having a conflict of interest. It was said Templars

Dark Knights

would only fight against certain Moslems, and made secret deals with others. Mutual antipathy between Templars and the Knights Hospitallers, a contemporary rival military order, eventually broke out in open warfare.

After the fall of Acre in 1291, enthusiasm for further Crusades faded. Templars headquarters was relocated to Cyprus, where all efforts to raise enough support for an expedition to retake the Holy Land failed. By this time, public opinion was firmly against them, and the European nobility knew it.

Supposedly in response to allegations of blasphemy, the French crown and the Papacy moved to investigate the Templars. But the chosen strategy – a coordinated dawn raid – was primarily to seize “treasure” not detain suspects whose identity was already known. As far as is known, nothing substantial was confiscated.

Transcripts of the heresy “show” trials that followed reveal almost nothing of the roots of Templar ideology. So who were the Knights Templar? From the limited information available Templars appear to sing from the same hymn sheet as the Hyksos Essenes.

Return of the Sons of Light

According to his legend, Saint Bernard of Clairvaux was a devout twelfth century mystic, who rose to prominence as head of the Cistercian brotherhood. Confidante of popes and kings, he single-handedly inspired a crusade to rescue the Holy Land for Christendom.

What is beyond dispute is that Bernard was a man with a mission. He was only twenty two years old when he joined the ailing Cistercian order of Benedictine monks in 1112. At the same time, however, thirty two of his noble friends and family members joined with him. Effective control of the abbey at Cîteaux was usurped by the newcomers, and on account of his charisma, intellect, and energy, Bernard emerged as leader and spokesman.

In 1115, his cousin, Theobald II, the Anglo-Norman Count of Champagne, donated land to build Clairvaux (“Valley of Holy Light”) abbey, a few miles from Troyes. This signaled a period of

The Final Deception

explosive growth and over 300 abbeys were founded during Bernard's lifetime. Cistercians practiced the same lifestyle as the Qumran Essenes – daily ablutions, strict dietary regimen, and all personal wealth belonged to the community. Added to that, the membership shared the same conviction they were responsible for establishing the kingdom of God on earth. Bernard, as a new “Teacher of Righteousness” would inspire the new “sons of Light” in a Holy War against the forces of darkness

Three years later, the military wing, *The Poor Knights of Christ of the Temple of Solomon*, otherwise known as the Knights Templar, was unveiled. In his tract, *In praise of the New Knighthood*, Bernard wrote of the new order:

They fight two wars, one against adversaries of the flesh and blood, and another against a spiritual army of wickedness in the heavens.

Since all the founding members were related to the Count of Champagne, one of the richest men in the world, none of them were literally “poor.” The epithet “poor” originates in the Dead Sea Scrolls, where it is a title for the membership as a whole. It was also used by the Galilean Jesus, “Blessed are the poor, for theirs is the kingdom of God” (Mt 5:3). Bernard introduced a “rule” for the Templars, remarkably similar to the Community Rule of the Qumran Essenes.

Why the rush? In 1099, after a long siege and bloody massacre of its inhabitants, Jerusalem was captured by crusaders. It was now directly controlled by Frankish nobles, not by the Papacy. For Bernard, this was the time to unleash the Templars:

Hail land of promise, which, formerly flowing with milk and honey for thy possessors, now stretcheth forth the food of life and the means of salvation for the entire world.

Of course, Jerusalem was always a sacred location, but why should its possession necessarily lead to global “salvation?” Did Bernard and the original Templars have reason to believe the “rod” and “staff” were buried beneath the Temple Mount, or perhaps even a Tablet of Destiny? Nine years is a long time to dig.

Dark Knights

Whatever they found, no doubt some, including a future French king, would have assumed it was the lost Ark.

Seals & Symbols

To authenticate documents, Grand Masters of the Knights Templar used a double-sided wax seal that showed the Dome of the Rock on one side, and the symbol of two knights on one horse on the other. Different seals were used by provincial masters, but none

were spontaneous designs. A seal was meant to convey the essence, or energetic imprint, of whatever it represented.

During the Templar era, the two knights on a single horse were thought to represent the poverty of the order. Not only is this idea ridiculous, the Templar rule expressly forbids riders from sharing a horse. Later commentators explained it as a reference to fraternal love, while their detractors claimed it symbolized Templar homosexuality.

More sensibly, the image is designed to signal unity. Two beings in harmony, or two ethnicities united together in one common cause, or both. Although they are related members of a societal caste, the Knights Templar may have understood themselves as a race, or more correctly a “master” race.

The only other known representation of two warriors riding together into battle on one horse is found on Sumerian cuneiforms.

The Final Deception

Other seals suggest Templars roots go back to ancient Mesopotamia. The “Frater Robert” seal, which is usually explained as the sun and moon, actually shows the eight-pointed star of the Annunaki. Certainly the most familiar emblem of the Knight Templar is the “cross pattée,” which is an equidistant cross with four splayed arms. The Templar cross is featured on seals, rings, amulets, clothing, shields, and was the banner carried into battle. Numerous theories to explain its meaning are extant, and the cross pattée is known to have been used by various cultures at different times, but there is no doubt it first appears in ancient Sumer.

Templar Knight

Stylized Assyrian king as the god Ninurta

As a recurring Annunaki symbol, the Templar cross is found on Sumero-Babylonian cylinder seals, and on stone carvings from the Assyrian period. As a union of “temple” and “pillar,” the word “Templar,” and thus the Templar symbol, more than likely represent the quest rather than the Annunaki themselves, the geometry of the cross a code for a pre-existent planetary metaphysical “template.”

Dark Knights

Though the god Ninurta is described Enlil's son, he was mentored by Enki, and entrusted with guardianship of the *MEs*. In his heroic Babylonian legend, Ninurta battles with the monster Anzû to recapture the stolen Tablet of Destinies. Assyrian kings, depicted in Ninurta's likeness, wear a "Templar" cross in the middle of the chest.

The double-headed eagle is another widely-used seal with an uncertain meaning. Brought west by knight Crusaders, this symbol quickly spread throughout all Europe, though it is now known to have been used in parts of England prior to Norman times. Eventually, it became the imperial emblem of Russia, Austria, Serbia, Prussia, among other states, and a principal motif in Scottish Rite Freemasonry. Today the double-headed eagle is on heraldic shields, and coat of arms of towns and cities in all the major nations.

It was also the flag of the nomadic raiders known as Seljuk Turks (right), sworn enemies of Christendom, whose capture of Jerusalem from the Egyptian Fatimids in 1073 instigated the Crusades. In 1098, the Fatimids retook Jerusalem from the Seljuks, and pleaded in vain for the Crusader army to leave Jerusalem alone. It didn't work.

The notorious adversary of the Knights Templars, Saladin, who recaptured Jerusalem in 1187, was a Fatimid ruler, and a bitter enemy of the Seljuks. During their time in the Holy Land, the Templars fought numerous battles against the Fatimids, but maintained cordial relations with the Seljuks, which infuriated foreign monarchs to whom *all* Moslems were the enemy.

The Final Deception

The double-headed eagle of Freemasonry

Double-headed eagle stone carving, Cappadocia, Turkey

A variety of two-headed eagles can still be seen among the archeological ruins of the 2nd millenium BC Hittite Empire, located in modern day Turkey, Syria and Lebanon. But the two-headed eagle goes back to ancient Sumer, where it is included in images of Ningishzida (Thoth) and Enki that are loaded with suggestions of genetic manipulation. These are the two principal Annunaki “gods” associated with the creation of the Lulu.

Dark Knights

A naked initiate approaches Ningishzida. The double eagle is bottom right

As Enki is sandwiched between two trees of life, a flow of watery “abzu” energy connects him to a two-headed eagle and to two men in fish garb. A Templar cross is to the right.

Thoth-Enki Brotherhood

The Final Deception

It seems the two eagle heads represent two Annunaki strains, possibly with a common avian genealogy. Given the Mesopotamian penchant for combining gods, the two are joined together to form one “race.” The symbol of the two-headed eagle is therefore a code for this Thoth-Enki pact and its hybrid lineage. Assyrian eagle-headed gods, carved in 1st millennium BC stone reliefs, who are preoccupied with a tree of life, most likely represent Thoth and Enki, or their respective factions.

For casting spells and warding off evil demons, scarab-shaped magical amulets were popular in ancient Egypt, worn either as a necklace or hand-held. On one such amulet, dated about 200 BC,

is a two-headed deity holding a Djed scepter and an ankh. The two heads are a serpent and an ibis. In Egypt, only Thoth was depicted with the head of an ibis. The Djed was always associated with the god Ptah, who scholars understand as the counterpart of the Sumerian Enki. Ptah's hieroglyph was an entwined rope/serpent, and in Sumerian clay seals, Enki was sometimes depicted as a hominid-serpent being

Dark Knights

The half-serpent Enki is shown on the right

The Final Deception

Presumably, the divine lineage represented by Enki/Ptah had part-reptilian origins, as represented by the snake head and serpent tail, which is not to be mistaken for the primordial dragon/serpent that was anathema to the Annunaki gods.

Thoth-Enki brotherhood acknowledged in modern esoteric sects

Double-headed busts have been discovered throughout Europe and the Middle East, the earliest of which is believed to date from 500 BC. Although classified as “two-headed Hermes” figures, the faces are different, and so far no explanation for them exists. But why else would two gods be conjoined if not to represent their physical union? In other words, the two male gods symbolize a unified brotherhood of mixed descent. As Hermes is Thoth, so the other head signifies Enki, whose Greek counterpart is Prometheus, the supposed creator of humankind.

In Greek mythology, Prometheus is distinguished from other titans by his close kinship with Hermes. Both Hermes and Prometheus have the gift of “fire,” and are linked in primordial acts that set a course for human destiny.

The German equivalent of the Knights Templar, the Teutonic Knights, used the banner of the double-headed eagle. So although the word “Teutonic” means descended from *Tentes*, an Egyptian rendering of Thoth, Enki is also acknowledged. The preponderance of a variety of gods, however, implies the Thoth-Enki combined lineage is only one of several Annunaki factions in

Dark Knights

hybrid-human form, though it may be the most overt. That being the case, most hybrid-humans are unlikely to have conscious knowledge, or memory, of their status and affiliations. Nor would they know their genetic imprint leaves them susceptible to physical/emotional/psychological manipulation, and everything that follows.

Supposed double-headed “Hermes” in Athens, c 300 BC. More likely, this bust represents the union of Prometheus (left) and Hermes (right).

Two-headed “Hermes” found in France, c 500 BC

The Final Deception

The Gnostic Connection

From their seals, we know the Knights Templar honored Abraxas, who different sources describe as either a Gnostic deity or a demon. In his typical appearance, engraved on ancient gemstones and amulets, Abraxas has the head of a cockerel, the body of a man, and his legs are two snakes. He holds a Pharaonic flail with one hand, and a shield with the other.

Abraxas is mentioned in several Sethian gnostic texts found in Nag Hammadi, where he is a sort of high-ranking angelic savior or “aeon.” Abraxas also features in numerous fragments of the so-called *Greek Magical Papyri*, a collection of magical spells, rituals, and incantations found in Egypt dating from the 2nd century BC to the 5th century AD.

According to early Church heresiologists, including Ireneaus, Hippolytus, Epiphanius, and Tertullian, Abraxas was a central figure in the cosmology of Egyptian Gnostic Basilides, who taught in the first half of the 2nd century AD. Their interpretations of Abraxas vary, but the common denominator is of Abraxas as a high-ranking creator god, who is responsible for constructing the heavens and the 365 day year. In Isopsephy, the Greek practice of adding up the number

values of the letters in a word to form a single number, the number of Abraxas is 365.

In all likelihood Abraxas is a name or word made to hold a magic formula, not unlike “Abracadabra. Coupled with his bizarre appearance, identifying Abraxas is problematic. But when he is compared with Thoth/Hermes it is obvious who is Abraxas.

Dark Knights

Key among his many “accomplishments,” Thoth configured the solar system and calibrated the moon’s orbit. He is therefore responsible for the calendar, and the fundamental design of time. By assigning these aspects to the name “Abraxas,” Greek-speaking Gnostics simply magicalized “Thoth/Hermes.”

Hermes above the clock at Grand Central Station, New York

At the basic level, symbols represent the core imprint, which is the genealogical foundation. With a human torso, head of the cockerel, and serpent’s legs, Abraxas is a hybrid, which is to say his genetic make-up includes human, avian, and reptilian DNA. Ningishzida, Thoth’s Sumerian identity, is the earliest known depiction of an *anguiped*, the technical term for a deity with serpent’s legs.

On gemstones, he was sometimes depicted as a cockerel with a human head. After Julius Caesar’s

conquest of Gaul, when Greco-Roman gods were introduced, the cockerel became a symbol of Gaul, and later the national emblem of France. Most of Europe’s earliest weathervanes depicted

The Final Deception

Hermes. In modern times, Hermes has been replaced with his traditional symbol, the cockerel, and occasionally with the caduceus.

Seated Hermes (above) is cockerel and a goat, French silver platter, 2nd century AD

French heraldry from Mazamet, showing Hermes the (cockerel) and 3 bee goddesses. pictured with a

In Bellini's cryptic *Blood of the Redeemer*, "Christ" stands upon the checkerboard matrix of Masonic tradition, as in the background the seated Hermes (with caduceus and cockerel) welcomes an initiate.

In Church tradition, the founder of Gnosticism is Simon Magus, a character briefly described in the Book of Acts, but

Dark Knights

whose life was the subject of much myth and speculation in early Christian literature. Such was his notoriety that Ireneaus claims,

All those who in any way corrupt the truth, and harm the teaching of the church, are the disciples and successors of Simon Magus of Samaria.

If Simon Magus was the quintessential heretic, then in the *Clementine Literature* of the early Jewish-Christian Ebionites (literally “the Poor”), he is described as John the Baptist’s favorite disciple, sent to Egypt to “perfect his studies of magic.”

Being an adherent of John...through whom he came to deal with religious doctrines...Of all John’s disciples, Simon was the favorite, but on the death of his master, he was absent in Alexandria.

Sometimes referred to as the ‘last Gnostics,’ sacred texts of the Mandaean people of Iraq interpret John the Baptist in the mold of a classic Gnostic redeemer, descending from the realms of light to rescue souls trapped in the world of darkness below. After death, John escorts the Mandaean soul through different levels of the afterworld. Known as a psychopomp (from the Greek “guide of souls”), the role of the Mandaean John the Baptist is the same as that of the Gnostic Abraxas. In Greek mythology, Hermes was the psychopomp who led dead souls in a journey through the afterworld.

In most examples of Abraxas gemstones, amulets, and seals, the three letters I, A, and W are

The Final Deception

juxtaposed forming the word IAW, either around the figure or separately on the shield. The most common explanation is that these three letters represent “IAO,” pronounced “iaho,” a Jewish-Egyptian rendering of the name YHVH. However, YHVH was not spoken by Jews at this time, and so would not be included in a magical formula. The simplest explanation is that the Greek letters, “I” Iota, “A” Alpha and “W” Omega, translate as “I am the Alpha and the Omega.”

Abraxas, as the Gnostic name for Thoth, is another arm of the Annunaki “regeneration” agenda, to which the Knights Templar subscribed, unwittingly or otherwise. Gnosticism has many faces, and is notoriously difficult to pin down, but Sethian Gnosticism appears to have Hyksos origins. Early Christianity, which also stood on Hyksos foundations, used the A and W letters in some of its formative iconography, as can be seen in the Roman catacombs.

After Roman Emperor Constantine I adopted the Greek *Chi Rho* symbol (literally meaning “good”) as a military standard, the letters A and W were incorporated to create one of the most widely-used Christian monograms.

Depiction of Jesus, with the “A” and “W,” Alpha & Omega, Roman catacombs, late 3th century.

Baphomet

When news broke of the Templar’s arrest, there was no public outrage, not even protests on the streets of Paris. No evidence of sympathy for the Templars exists from any source without Templar connections. None of the knightly orders were popular at the time, the Knights Templar less than most. Widely perceived as aloof, arrogant, secretive, greedy, and corrupt, rumors had long circulated that Templars indulged in orgiastic rites, worshipped the devil, and believed all kinds of

Dark Knights

blasphemies. During the Templar trials, numerous witnesses, including low-ranking defectors, told of rituals that denied, mocked and vilified the cross; and of ceremonies with various idols to invoke an entity known as Baphomet.

Grand Masters of the Knights Templar (right) and Knights Hospitallers, blessed by a Fox as the Pope, French manuscript, 13th century

If, as it seems, the Templars embodied Hyksos tradition, then their reported view of the crucifixion is to be expected. But who, then, is “Baphomet?” Most historians think the name is a distortion of Mohammed, and from their time spent in the Middle East, Templars had been influenced by Moslem practices. Medieval Islam, however, was not idolatrous.

“Baphomet” predates the Templar trials, and first appears in a letter written in Latin by the crusader Anselm of Ribemont, who was present at the siege of Seljuk Turk-held Antioch, and dated July 1098:

As the next day dawned, they called loudly upon Baphometh; and we prayed silently in our hearts to God, then we attacked and forced all of them outside the city walls.

The Final Deception

And also in an anonymous lament from a returning crusader about 1250:

Then it is really foolish to fight the Turks, now that Jesus Christ no longer opposes them. They have vanquished the Franks and Tartars and Armenians and Persians, and they continue to do so. And daily they impose new defeats on us; for God, who used to watch on our behalf is now asleep, and Bafometz puts forth his power in support of the Sultan.

Having previously mentioned “he who was laid on the cross,” the author was almost certainly a formal Catholic, not a Templar. Taken in context, “Bafometz” appears to refer to a “supernatural” entity other than God, and not to Mohammed, who was considered a mortal. If not the “devil,” then Baphomet is a type of fallen angel or demon whose “power” was accessed by Seljuk Turks.

Nineteenth century drawing of Baphomet

Dark Knights

Since 1856, Baphomet has been closely associated with an image drawn by Eliphas Levi, a French writer recognized as a major influence on the Hermetic Order of the Golden Dawn, and on English occultist Aleister Crowley. According to Levi, the figure of Baphomet was supposed to represent the “sum total of the universe.”

Used today by numerous occult groups, including the Church of Satan, the goat-headed Baphomet is sometimes equated with *Azazel*, leader of the fallen angels in Enochic lore, whose name was given to the biblical “scapegoat.” Goat symbolism, however,

has strong connections to Hermes. A goat cult centered on Hermes is known to have existed for several centuries among Thracian tribes in Ainos, Greece. Coins, dating as far back as 500 BC, feature the head of Hermes, with a goat on the reverse.

Herodotus wrote that Thracian royal families worshipped Hermes “the most,” and believed him to be their ancestor. No scholarly consensus exists on the relevance or meaning of the “goat” and its connection to Hermes.

Four examples of Thracian Coins

The Final Deception

On the crown of Baphomet's head is a flaming torch symbolizing the "regenerative" fire associated with Prometheus and Hermes. The pentagram on Baphomet's forehead stresses the "third eye" of the pineal gland. Foremost symbol of witchcraft and the occult, and often hidden in plain sight as a "star," the pentagram is highly significant to the non-human agenda.

Medieval magicians and alchemists saw in the pentagram the blueprint, not for physical beauty or proportion, but for the underlying energy flows of the human condition, exploitation of which was their essential interest. The pineal gland directs these vital energies.

Female breasts mean Baphomet is a hermaphrodite, so-called after Hermaphroditus, the two-sexed child of Hermes and Aphrodite. Union of the two principles of generation and conception in Baphomet, in conjunction with his caduceus and the hand of Sabazios, emphasizes the Annunaki agenda.

This program is further underscored by Baphomet's arms pointing upwards, inscribed with the word *Solve*, and downwards inscribed with *Coagula*. "Solve et Coagula" is a recognized alchemical formula that translates as "separate and join together," the meaning of which is self-explanatory from the assimilator's perspective.

While the etymology of "Baphomet" is debatable, it represents not just Thoth/Hermes as a principle architect behind humanity's current plight, but the prospective non-human coup itself, many thousands, if not hundreds of thousands of years, and which involves non-human races other than Annunaki.

Friction between John the Baptist and his son, the Galilean Jesus, manifested in ill-feeling between their followers. If the Knights Templar denied the Jesus was the Christ, it is most probably because they knew he was not. And if they rejected the doctrine of vicarious salvation by a crucified savior, it is because they knew Jesus was not crucified. They venerated John the

Dark Knights

Baptist, not because they thought *he* was the Christ, but because they believed John was Thoth/Hermes, who is the Hyksos savior figure.

As the son of John the Baptist, the Galilean Jesus was still considered important. Not only did he continue the sacred Annunaki lineage, he upgraded it by integrating the Christ coding of Mary Magdalene. For this, he was respected by the Knights Templar, and related Hermetic groups – just not as highly as John was. If anything, the Hyksos Yeshua was to be feared.

Prince of Demons

Detail from *The Last Judgment*, Hans Memling, 1470

Approximately 400 years before Eliphas Levi drew Baphomet, the Dutch master Hans Memling painted Jesus in *The Last Judgment* in the exact same pose, purely by coincidence, or to

The Final Deception

deliberately transmit the twisted “new life in Christ” message of the Annunaki.

These contrived arm positions have their roots in ancient Mesopotamian iconography. In Assyria and Babylon, statues of the demon king *Pazuzu* depict him with the right arm pointing up, and the left arm pointing down. Though he was a demon, sacrificial offerings were made to Pazuzu. First, because he could drive other demons and evil spirits away and thus protect people from misfortune; second, because he was also an incubus, as the phallus indicates. Sexual union with a

demon king, so it was thought, could produce offspring with privileged lives on earth.

As most people know from the Gospels, the Galilean Jesus was called a demon by his detractors. The word “demon” was probably bandied around a great deal, but in this instance Jesus is specifically accused by “scribes,” scholars educated in religious tradition, who would have studied demon or fallen angelic lore in extensive detail. Their opinion, therefore, was not necessarily based on bigotry or envy, as Church tradition maintains.

Although Islam prohibits figurative drawing, some Sufi religious artwork survives from the Middle Ages. In one 14th century manuscript, *Iblis*, equivalent of the Christian devil, is depicted strikingly similar to Baphomet. Crossed arms have significance in Hermetic symbolism, but the central identifying feature of the image is the matching finger positions of both hands, whereby the index finger and little finger are extended, and the two middle fingers are folded into the palm.

Dark Knights

In popular culture, this gesture is known today as the “sign of the horns,” or the “hand of Baphomet” Its origins are obscure, but its earliest established use was in ancient India, where this sign is seen in statues of Gautama Buddha and his consort Kwon Yin.

Known as the *Karana mudra*, it is used to expel demons and remove negative influences, and in no way a recognized Christian blessing. Nevertheless Jesus is depicted making the “hand of Baphomet” in an anonymous mid-twelfth century painting produced in Jerusalem during the height of the Crusader kingdom, and which somehow managed to survive.

The image is part of the *Melisende Psalter*, an illuminated manuscript of the New Testament, commissioned by, or for, Queen Melisende of Jerusalem. Melisende was the eldest daughter of King Baldwin II. Baldwin II was instrumental in establishing the Knights Templar presence in Jerusalem, and wrote Bernard of Clairvaux asking for help in influencing Pope Honarius to grant the Knights Templar official status. Melisende’s husband, Fulk V, Count of Anjou, was a Knights Templar.

It would not stretch credulity, therefore, to suggest that Folio 12, the painting in question, betrays Knights Templar “secrets.” The father on the right, John the Baptist, and mother Mary on the left, make identical gestures to present their son, the bethroned

The Final Deception

Jesus. Jesus' evident scowl directed at John is easy to understand, but his finger gesture hints toward the unthinkable. Was the Galilean Jesus literally a prince of demons?

Folio 12, Melisende Psalter, anonymous, 1135

It is common knowledge that Leonardo da Vinci used “mirror script,” which means his writing flows from right to left with all the letters inverted, and can only be read with the untrained eye using a mirror. Historically, mirror imaging was used for *encipherment* whereby calligraphy or images are converted into a code or cipher. So it is more than conceivable Leonardo used mirror imaging in some of his paintings. Researchers have shown

Dark Knights

that when a mirror image of *The Last Supper* is superimposed on itself an entirely new picture emerges.

Mirror image of *The Last Supper* superimposed on itself

Jesus remains intact but wholly different. Above his head, there appears a descending white dove aligned with a vertical column consisting of highlighted chakra energy centers that western medicine does not formally acknowledge – the crown on top of the head, the third eye or pineal on the forehead, the throat, the central heart, and the solar plexus.

On the same vertical, directly above the dove, are what appear to be a number of horned goat-like heads, which might be a trick of the light except one horned face is unmistakably a Baphomet type of demon. In other words, Leonardo's *The Last Supper* reverses the Church interpretation of Jesus. Far from representing the Holy Spirit, the descending dove brings with it a host of demonic powers.

Keepers of the Truth

Seven hundred and seventy years ago, an army of ten thousand soldiers, paid for by the Roman Catholic Church and the French Crown, surrounded the hill top fort of Montsegur in the eastern Pyrenees. The majority of the approximately two hundred and fifty men, women, and children trapped inside the compound were Cathars, or Kathars, members of a heretical sect against whom the Pope had declared a holy crusade thirty five years earlier. After a siege lasting approximately nine months, the occupants finally surrendered. All of them were thrown into a fire and burnt alive by the Inquisition.

According to Inquisition archives, at least four Cathars managed to escape sometime during the night before the fall of their fortress, carrying with them an unspecified “treasure.” They were never captured. These events took place in 1244, but the precise nature and whereabouts of the Cathar treasure is still a mystery. An even greater mystery is the Cathars themselves. At the height of the persecution, not only was every Cathar man, woman, and child,

The Final Deception

hunted down, bodies of dead Cathars, and even Cathar sympathizers, were exhumed and ceremonially burnt. After Montsegur, scattered Cathar communities managed to survive until the mid-fourteenth century. Yet nobody seems to know who they were....or what their heresy was.

Manichaeans

Unfortunately, most information on the Cathars comes from their enemies, who made no distinctions and described them as a uniform group. Based primarily on these accounts, modern scholars categorize Cathars as Gnostic dualists. In its purest form, Gnostic dualism teaches there exists a transcendent *good* God and an *evil* false creator god. While “spirit” is divine and comes from God, “flesh” is perishable and is made by the false god.

The Inquisition accused Cathars of being dualist followers of *Mani* (c. 216-276), whose movement was probably the biggest thorn in the side of the Church from the late 3rd century to the early 5th century. Born in southern Babylonia (Iraq), Mani proclaimed a new religion of “light,” explaining himself as the culmination of a long line of prophets, beginning with Adam and including Hermes, Buddha, and Jesus. He also claimed to be the *Paraclete*, the priestly savior figure, predicted by the Galilean Jesus in the Gospel of John ([Jn 14:16](#)), who would come and help his disciples.

From Persia, Manichaeism spread rapidly west into the Roman Empire. By the 4th century, Manichaean churches were established in Occitania, or Languedoc, which is where the Cathars later emerged. Following sustained attacks from Rome, Manichaeism disappeared almost entirely from Western Europe by the end of the 5th century. It was present in the Mediterranean

Keepers of the Truth

region at least to the 7th century, and in Central Asia and Persia until the 10th century.

It is usually suggested Manichaean philosophy was reintroduced into southern France by Bogomil missionaries from Bulgaria in the 11th century, and took root among a population disaffected with Roman Catholicism.

Among many surviving fragments of Manichaean holy texts are sections from *The Book of Giants*, written in numerous languages. The Book of Giants is similar to the Book of Enoch, being concerned with legends of primordial fallen angels. Missing from Enoch are details about a race of *Nephilim* giants and their offspring.

All the names of the fallen angels and giants in the Manichaean Book of Giants are Aramaic. This is informative as Aramaic fragments of the Book of Giants, along with fragments of the Book of Enoch, were found among the Dead Sea Scrolls at Qumran (4Q203, 1Q23, 2Q26, 4Q530-532, 6Q8), and nowhere else.

Since Mani saw himself as the successor to the Galilean Jesus, and Manichaean sacred texts were found at Qumran, Manichaeism is likely spawned by the Hyksos, the original “sons of light,” and is thus part of the greater Annunaki agenda. And as with the Sethian Gnostics and Docetics, Manichaeans did not believe Jesus was crucified. Jesus’ apparent change of “form and appearance” is called a *raz*, or mystery.

Manichaean iconography was meticulously purged wherever Manichaeism was overthrown, but many scholars think the so-called Cross of Thomas (right), first discovered in India and still used by several Protestant denominations, is the original Manichaean cross. Mani is known to have preached in India, where Thomas is believed to have lived and died. Numerous 4th and 5th century Church Fathers claim he treasured the lost Gospel of Thomas, which was found at Nag Hammadi in 1945.

The Final Deception

The appearance of a dove on the Manichaean cross would seem to contradict traditional Church interpretation of the dove as a symbol of the Holy Spirit, since Gnostic dualism has no use for a Holy Trinity let alone a crucifixion. As a Christian motif, the descending dove derives from Gospel accounts of the Galilean Jesus' baptism by John, in which "the Spirit of God" descends in the "shape of a dove." The dove was also an essential Cathar motif.

Paper manufacturing was a well-known Cathar industry. By 1280, the Cathars had devised a technique using wires to imprint paper with symbols that were invisible to the naked eye, but which

appeared when held up to the light. Some of these designs featured doves, a phoenix, and select ancient Mesopotamian motifs. Certain Cathars, it seems, understood the power of subliminal messaging.

The Dove

Few traditions are as long and enduring as the dove. Much more than a religious symbol, the dove is now firmly established as the international icon for peace and reconciliation, used by numerous global institutions, corporations, military and pacifist

groups, and even by communist nations.

"Dove" is another word for pigeon, an extremely common bird that can be trained to ferry messages, but which is generally regarded as a civic nuisance.

What, then, lies behind its worldwide dominance?

Keepers of the Truth

The dove is the most recurring bird in the Old Testament, and for ancient Jews, and practitioners of other religions in the region, ritual killing of doves was mandatory. According to Genesis, the enslavement of the Israelites in Egypt was caused by Abraham's failure to cut a dove in two at the required time. In ancient Babylon, priests of Marduk would ceremonially cut a dove in two at the Spring Equinox.

This tradition derives from an episode some researchers consider an explanation for the existence of an asteroid belt between Mars and Jupiter. The Babylonian creation epic, *Enuma Elish*, explains that after Marduk destroyed "Tiamat" he split the body in two, "setting half of her to form the sky as a roof for our earthly house." Tiamat became *Tebom* or "Firmament" in Genesis. Firmament literally means "what is spread out," in reference to the former body of Tiamat.

This is significant because the principal Mesopotamian goddess, Inanna/Ishtar (and several other names), is described as "the daughter" of Tiamat, and the dove was her symbol. The name Ishtar comes from the Sumerian USH-TAR, "uterus" in Latin. "Dove," *peristera* in Greek, also means "womb." The earliest Sumerian name for Inanna, *Iabu* (pronounced "yahoo"), translates as "exalted dove." "Tahu" is thought by many scholars as the source of the biblical "Yahweh/Jehovah."

In the Middle East and Asia Minor, monuments still exist to the mythical queen-goddess Semiramis, who became an important figure of Greek mythology. In his *Metamorphoses*, Ovid wrote the

The Final Deception

fable of “Semiramis into a pigeon.” On her death, Semiramis was changed into a pigeon, and “to express the celestial benignity of her nature, she was called by the name of *D'Iune*,” which means “The Dove.” “D'Iune” without the article is “Juno,” name of the Roman “queen of heaven.” Doves, of course, are standard in depictions of Mother Mary, the Catholic successor “queen of heaven”

Worship of the Mesopotamian goddess and the dove spread to Crete, where she was depicted with doves on her head, and to Cyprus where doves can be seen on Roman coins perched on her temple. Throughout the Greco-Roman world, pigeon offerings were made to Aphrodite (Venus) in exchange for blessings

and favors, and Demeter (Ceres), another version of the Mother Goddess, was also associated with the dove symbol.

The name of Eurynome, the pre-Olympian Greek goddess, means “widely distributed.” The leading scholar of Greek Mythology, Robert Graves, equates her with the Sumerian Iahu. One Greek creation myth explains Eurynome was encircled by a serpent before changing her form into the dove that laid the egg from which the world emerged.

The encircled serpent is widely recognized as an ancient representation of time, or the passage of time, but also of “regeneration,” and as such its connection to the Annunaki goddess, or Dove, is inevitable. Sumerians were the first to give animal names to constellations, but insisted the names were first given to them by the Annunaki. Although the “dove”

Keepers of the Truth

may be the name of a hitherto unspecified constellation, it also appears the result of specific celestial maneuvers that cause an energy configuration or flow in the shape of a dove – as per the Hermetic aphorism, “As above, so below.” As an important aspect of the Annunaki agenda, humans on earth cannot see the “dove,” they can only experience its effects. Association with the fertility goddess, the heavenly queen, and the circling serpent, implies “dove” energy impacts how life and death on earth is experienced at the most fundamental level.

From the alternative non-human viewpoint, as expressed in the Bible and ancient mythology, the “dove” provides sustenance to those who subscribe to, or wish to co-opt, the Annunaki agenda. In the early medieval period, the “dove” resurfaced.

Of the Grail Romances that appeared during the heyday of the Knights Templar, *Parzifal* by Wolfram von Eschenbach is acknowledged as an esoteric masterpiece by everyone from Aleister Crowley to Adolf Hitler. In *Parzifal*, a hermit reports how the Templars protect the Grail:

The Grail is guarded by the Templars. I will tell you how they are nourished. They live from a stone whose essence is most pure...A dove flies down from heaven. It brings a small white wafer to the stone and leaves it there. The Dove all dazzling white, then flies up to heaven again... from which the Stone receives all that is good on earth of food and drink of paradisal excellence.

The Final Deception

In many depictions, the dove radiates from the center of an 8- pointed wheel.

“Cathars”

Besides the Cathars, Languedoc was home to the highest concentration of Knights Templar in Europe, and ruins of Templar castles and churches still dot the region. Yet even though it occurred on their doorstep, the Knights Templar did not participate in the anti-Cathar crusade, nor was their siege expertise called upon. On the contrary, it appears the Templar leadership tried to stall Rome, and even protect the Cathars.

Although twelfth century Church councils condemned them, and missionaries were dispatched to Languedoc, the Cathars were unmoved. So the Church turned to its leading light and foremost intellectual giant, and asked Bernard of Clairvaux, author of the Templar Rule, to investigate the Cathars. While Gnostic dualism was Roman Catholicism’s undisputed historical nemesis, Bernard minimized Cathar “doctrinal error.” According to Bernard, who condoned and even encouraged the wholesale slaughter of innocents in the Holy Land, the Cathars were best left alone, “if you were to examine their mode of life, you will find nothing more irreproachable.”

Bernard died in 1153. Sixty-six years passed before Pope Innocent III declared a crusade against heresy in 1209. Yet throughout the long ordeal, the dissident population were oddly identified as “Albigensians” (after the town of Albi near Toulouse, a supposed stronghold of the heretics), or any of several perjorative terms, but never as “Cathars.” The word “Cathar” was carefully avoided in official correspondence. Obviously, Rome knew its targets well enough to know most were *not* Cathars, or at least not genuine “Kathars.”

Keepers of the Truth

In their book, *The Templar Revelation*, Lynn Picknett and Clive Prince explain Cathar Knights were trained and sheltered on Templar property, and that Templars allowed hostile activity against the crusaders based from their locations.

Cathar coin with Niburian 8-pointed star

There is one documented occasion where the Templars directly fought against the crusaders. In September 1213, Templars joined a coalition army of Aragon King Pedro II and Cathar sympathizer Raymond of Toulouse that had laid siege to Muret, near Toulouse, where

Simon de Montfort's crusaders were encamped. De Monfort, who was the military commander-in-chief of the crusade, took the offensive, broke the siege, and scattered the coalition forces, which suffered enormous casualties.

The Inquisition are known to have dug up Cathar bodies on Templar land even thirty years after the end of the crusade. Despite knowledge of their "Cathar" connection, Rome did not move against the Templars until 1307, and in the Templar heresy trials, Inquisition prosecutors did not bother to mention Cathars.

"Heretical doctrine," then, was never Rome's prime motivation for the crusade, but only a smokescreen to justify genocide against both Hyksos-related "Cathars," and genuine Kathars, whose existence has never been acknowledged.

Kathars and Cathars

Etymologists explain that the word "Cathar" comes from the Greek *katharoi*, meaning "pure." Because "Cathar" was not known as a self-designation, and their enemies accused them of being "cat-worshippers," not all scholars are convinced. Adding to the confusion, *Kathari* were named in passing as a deviant sect at the First Council of Nicea in 325. Mani's father was a member of the unidentified *Katharoi* sect in Persia, and the fourth century writer

The Final Deception

Epiphanius claims the gnostic *Novations* of Asia Minor called themselves *Kathari*. At a later date, “Kathar” was changed to “Cathar” probably to obscure much wider “Kathar” implications.

We know Cathars used the New Testament, revered the Galilean Jesus and Mary Magdalene, had close ties with the Knights Templar, and utilized symbols of the Annunaki agenda overtly and covertly. We also know they separated themselves into *Perfecti* (“perfect ones”), similar to the Manichaean “elect,” and *Credentes* (“believers”). Perfecti wore black robes, and performed a ceremony known as the *Consolamentum*, which was purportedly similar to a ritual of the Mani priesthood.

Cathar Perfecti perform the Consolamentum

Local legends claim they were protectors of the sacred bloodline of Jesus and Mary Magdalene, widely believed to have lived in Cathar territory, and Cathar nobility was supposedly of their direct descent. All this suggests Cathars were Annunaki hybrids. No matter how these

“Cathars” had congregated in Languedoc, as far as Rome was concerned, their numbers had reached critical mass by the turn of the twelfth century.

Yet by all accounts, Cathars/Kathars were well-loved by the non-Cathar local population. At the infamous massacre at Beziers in 1209, upwards of 20,000 Catholic men, women, children, and priests were butchered for repeatedly refusing demands to surrender 222 known Cathars to the crusader army. Self-sacrifice on this scale is barely imaginable. It can only be assumed Cathars convincingly taught, explained, or showed something that negated Church doctrine to such an extent people preferred death over life as a Catholic. Would people have done the same thing to protect the Knights Templar?

It is difficult to imagine these “Cathars” as Templars allies. More likely, two groups of “Cathars” existed, for convenience

Keepers of the Truth

sake - “Cathars” and “Kathars.” And just as Catholic friars were differentiated by black robes (Dominicans), and white robes (Cistercerians), so “Cathars” were described wearing both black or white robes. One Kathar group, then, was distinguished by white, and not black clothing.

More fundamentally, Kathars and Cathars held incompatible beliefs about the Christ. Historians regard the seventeenth century Church historian, *Raynaldus*, as a valuable source of information because he reproduces numerous original documents. In his *Accusation against the Cathars*, Raynaldus cites an early thirteenth century monastic chronicle,

They said also, in their secret doctrine, that Christ who was born in the visible, and terrestrial Bethlehem, and crucified in Jerusalem, was a bad man, and that Mary Magdalene was his concubine

It seems the monk tries to make sense of his source material to make it fit a Gnostic-sounding paradigm. Evidently, he heard something about two Christs. In the Catholic mindset, God planned for Christ to be born in Bethlehem and crucified in Jerusalem. So if Kathars insisted Jesus of the Gospels was a malevolent imposter, then the good Kathar Christ must have been invisible and non-terrestrial otherwise the same Gospel story would be his. “Concubine” suggests Kathars claimed not just that the Gospel Jesus had a physical relationship with Mary Magdalene, but something was inappropriate about it.

From where did the Kathars get this information? They must have possessed indisputably bona fide records of the historical Christ. So irrefutable that the Church would do whatever it takes, even if it means slaughtering 20,000 Catholics in cold blood, to confiscate them.

The controlling faction behind Rome during this period is not the topic of this book. Its tradition icon, however, is the dragon slain by the Annunaki dragonslayer. Suffice it to say

The Final Deception

Hyksos Cathars and Knights Templar were enemies of the Church because they competed with Rome for the same prize.

As the net tightened around them, Kathars and Cathars were forced together for their mutual survival. But why were they together in Languedoc in the first place?

Visigoths

Indigenous inhabitants are hardly mentioned in the chronicles of Languedoc, undoubtedly one of the most popular areas of Europe. History books focus on successive raiders or conquerors who descended on the region – Celts, Greeks, Romans, Visigoths, Moslems, and Franks. Foreign intruders are unlikely to have discovered the sacred sites and geometries for which this part of the world is renowned, but some may have had advance knowledge.

The Goths were an East Germanic tribe, who played a central role in the fall of the Roman empire. Moving south, Goth armies headed for both Rome and Constantinople. From this time on, they were known as Visigoths in the west, and Ostrogoths in the east. After sacking Rome in 410, the Visigoths were allowed to settle in southern Gaul and northern Spain. Though they were well-known as nomadic marauders, for some reason the Visigoths settled, and by 475, they were independently in control. Eventually, a Visigoth kingdom was established which lasted until 725 when Arab invaders conquered the land. The history of this

period, however, remains obscure largely because the Roman Catholic Church declared the Visigoths heretical. Classified as “Arians,” Visigoths were nominally Christians who believed Jesus was a man, and not God.

What distinguishes Visigoths from other outsiders is that they intermarried with the local population. Realistically speaking, the locals did not have much

Keepers of the Truth

choice. But historians are unable to explain why Visigoths moved en masse to the site of the modern hilltop village of Rennes-le-Chateau, 50 kilometers (30 miles) from Montsegur, after the Franks drove them from Toulouse in 507. For at least a century, Rennes-le-Chateau was occupied by approximately 30,000 people. Today its population is 91, although it receives upwards of 100,000 tourist visitors annually since the publication of *The Da Vinci Code* in 2003.

Roman writers, historians, and later ethnographers, equated Goths with the *Getae*, who were a group of Thracian tribes on both sides of the Lower Danube. The sixth century Roman writer of Goth descent, *Jordanes*, who compiled the *Origins and Deeds of the Goths*, claims the Goths and the Getae went back and forth and were in constant contact for many centuries.

According to *Jordanes*, one Goth tribe known as the *Dani* came from the isle of Scandza (Scandinavia), and also lived in Jutland (Denmark, home of the *Danish*). In Greek mythology, *Danaos* came with his daughters from Egypt and settled in Argos. *Danaans* are said to have created the Mycenae civilization of ancient Greece (1600-1100 BC). The Denyen were sea raiders who harassed Egyptian shipping during this period, and even attacked Egypt in 1207 BC. They are mentioned in the Armarna Letters in relation to the "Land of the *Danuna*" in Canaan, and were also linked with the people of *Adana*, in southern Turkey (Cilician pirates).

Attempts to identify this population with the biblical lost Israelite "Tribe of Dan" have been thwarted by DNA evidence, which does not match with modern Jews. But since the Hyksos were not Hebrew, and not even Semitic, genealogical roots of the so-called lost "Dan" tribe lie elsewhere.

Visigoth iconography displays unmistakable Sumerian origins. On almost every Visigoth coin can be seen the Templar cross, sometimes with an eight-pointed star. From surviving gold jewelry and artifacts, this cross was clearly *the* core Visigoth motif. Among emblems commonly displayed on Visigoth battle shields is the eight-pointed star, the double-headed eagle, and the encircled serpent. Visigoth brickwork, and terracotta tomb plaques depict

The Final Deception

doves alongside the alpha and omega monogram. Doves, principle symbol of the Cathars, are found carved on Visigoth royal caskets.

Keepers of the Truth

By all accounts, the Visigoths did not assimilate well with the Hispanic-Romano population in Spain. That they somehow made the effort in Languedoc strongly suggests the Visigoths targeted a native group there. They may not have been the first gene raiders to invade the south of France, but the Visigoth bear the unambiguous stamp of the Hyksos.

Visigoth Brick At the heart of the Hyksos modus operandi is identity theft. In blunt terms, “Cathars” are a non-human hybrid ethnicity created by raiding human Kathars. In as far as their name and identity was appropriated by hybrid factions, Kathars are similar to Essenes, and similar targeted human ethnicities.

Perhaps the symbol that best throws light on the Visigoth elite is the bee, which was worn as a pendant necklace. Despite its undeniable status as one the most ubiquitous motifs in the world’s iconographical inheritance, this winged insect is generally passed off as a token of industry, or even as an innocuous reference to honey. But to specific Annunaki hybrid races the bee has profound genealogical connotations.

Insectoid Raiders

In most cases, ancient gods and goddesses are depicted in hominid form. Occasionally, this hominid form is combined with reptilian, avian, aquatic, mammalian, or insectoid features that serve to identify an underlying or original genetic structure. This does not imply that all reptiles, birds, fish, animals, and insects on earth are trespassers, anymore than it implies all humans are.

The giant scarab beetle statues of ancient Egypt are baffling because it is so unimaginable that humans could worship insects. But by far the most prevalent of deified insects in the ancient world is the bee. And the deified bee is often, but not exclusively the goddess, and is always connected with fertility and regeneration.

The Final Deception

Worshipping bees in Egypt

Renowned Egyptologist, Wallis Budge, translated the *Book of Opening the Mouth*, and in doing so confirmed the bees' importance,

The Bee, giving him protection, they make him to exist...Going about as a bee, thou seest all the goings about of thy father.

So the bee was understood as a creator god. The bee symbol, therefore, does not represent the literal insect, but a non-human insectoid race that participated in the creation of Annunaki human-hybrid races. As Hermes was trained by bee goddesses, so this insectoid race was allied with the Thoth/Enki partnership.

Bee Goddess Neolithic Spain 5000BC

Modern picture of a Bee Goddess

The Bee is featured prominently on many Egyptian monuments, including the pillars of Karnak, the Luxor obelisk that stands on the Place de la Concorde in Paris, the sarcophagus of Rameses III, and a granite statue of Rameses II, to name only a few. An inscription at the

Keepers of the Truth

temple of Dendera recounts how Osiris emulated the Bee and provided directions to the “sacred garden of the Bee” where the golden apples of immortality exist. But the bee symbol was foremost in the Hyksos dominated Delta region, which was known as *Ta-Bitty*, or “the land of the bee.” This explains why Israelites described the Promised Land as “flowing with milk and honey.”

Images of the pre-dynastic Egyptian god *Min*, known as “Master of the Bees” dispel any confusion regarding the insectoid agenda. Min was usually depicted with an erect phallus, and wearing a headdress decorated with bees. This not so subtle exhortation for the hybrid intruder race to “go forth and multiply” parallels the biblical instruction to Adam to “multiply and have dominion.”

Bee

carved on Min's headdress

Bee dieties are a constant theme wherever local legends and ancient artifacts betray Annunaki interence. For example, *Ah-Muŕen-Cab* is a Mayan bee god; *Potnia*, the Minoan-Mycenaean fertility goddess, was referred to as “The Pure Mother Bee.” Her priestesses were given the name “Melissa,” which literally means “bee.” Priestesses of Artemis and Demeter were called “Bees.”

The Final Deception

Ah-Muzen Cab

Nothing less than global hegemony was the objective. Bees are often depicted swarming around the planetary globe. In Rennes-le-Bains, a village only 2 miles from Rennes le-Chateau, researchers discovered a floor carving that shows an insectoid goddess standing on a globe, and holding a victory wreath. Representing the four corners of the globe four large bees watch on.

Subliminal cultivation of the “hive” mindset, and a willing disposition to be a “worker,” doubtless underpins much of the public bee imagery that is probably best typified in Manchester, UK, where the bee is the official city insignia, and a bee-dominated earth features in the city’s crest.

French kings draped themselves in bee embroidered robes, but none went as far as Napoleon Bonaparte who made the bee his personal emblem and put bees on almost everything. And it is in France where the “bee” is most clearly associated with sacred genealogies. The

tomb of the fifth century Merovingian king, Childeric, contained 300 solid gold bees. Merovingians are persistently linked with the theoretical lineage of Jesus and Mary Magdalene. Bernard of Clairvaux, so effusive in his praise of Cathar ethics, is the patron saint of bees and bee-keepers. And so on and so forth.

Keepers of the Truth

Zeus Trophonius

In this self-explanatory encapsulation of the Annunaki “regeneration” agenda, lush vegetation surrounds the Father god as he holds the beehive and acknowledges the phoenix.

Montsegur

Tourist guide books and websites explain that the name “Montsegur” means “safe mountain” in English, and castle ruins perched at the summit have an altitude of 1200 meters, or 3,900 feet, but are not from the Cathar era. Having destroyed the last bastion of the heretics, the French replaced it with a standard military fortification. Cathars believed the mountain’s steep slopes and sheer ruggedness made Montsegur impregnable. They were mistaken, and unfortunately paid with their lives. That is the potted version of Montegur. And it makes no sense.

The Final Deception

We know that at least four, and possibly more, occupants of the besieged fortress, escaped during the night using ropes to descend the almost vertical cliff face. But if the others knew they were all going to be killed if they remained behind, why did they not escape? There was nothing to lose. The exodus could have been staggered over several nights. Perhaps there was only enough rope for four people, but more than likely the main body of trapped Cathars knew nothing of the planned escape until after the fact.

Some suggest the Cathars were concerned solely with preventing their “treasure” falling into Rome’s hands. But actions of Montsegur Cathars are what brought Rome to their doorstep. In May 1242, a group of Cathar knights left Montegur to rob and murder a delegation of Inquisitors, who were staying in Avignonet, a town between Toulouse and Carcassonne. When news of the assassinations spread, revolts broke out across Occitania against the French Crown and Catholic authorities. By January 1243, the rebellion had failed, and the fate of Montsegur was sealed.

Either Cathars were unaware of the “treasure” or were ignorant of its true nature. Genuine Cathars, on the other hand, knew of the treasure *and* its contents, and concealed them not only from Rome, but from Hyksos-related Cathars.

Keepers of the Truth

On March 1st 1244, the Cathars negotiated a two week grace period to be followed by surrender on March 15th. As there is no logical explanation for this request, or for why the Inquisition agreed to it, a great deal of speculation surrounds these fourteen days. Most commentators think the extension allowed a sacred Cathar ceremony to take place. It was during this grace period, however, when the “treasure” was removed from Montsegur. But with 10,000 Catholic troops surrounding the base of the mountain, how could the security of the “treasure,” or of those carrying it, be guaranteed?

They may have been outnumbered by Cathars, but Kathars, it seems, had friends in high places. In other words, the highest levels of the Catholic Church had been infiltrated, and a Kathar “agent” played both the Inquisition and the Cathars to secure enough time to organize evacuation of the Kathar’s “treasure.”

Theoretically, this “treasure” may have had the potential to expose the non-human takeover agenda, and to unravel the distorted paradigm within which unknowing humans live. So why was it kept at Montsegur? Surely there were safer places? The answer connects to why Kathars and Cathars were in Languedoc. As with Jerusalem, and other locations, this part of the world is regarded as special or “holy,” which implies it has human

The Final Deception

“guardians,” conscious or otherwise. Twelfth century Kathars may not have been alone, but they were *aware*.

The site of Montsegur is not the highest hill in the immediate vicinity, but it affords a 360 degree view of the area, which is clearly why it was selected. So the surrounding area, as much as Montsegur itself, would appear the most sacred real estate in Languedoc. And since the “treasure” needed to be “on site,” and not buried somewhere, it must have provided information pertinent to this area. This suggests the Kathars were not at Montsegur for refuge, but for practical operations.

* * * * *

Modern Freemason consider themselves Knights Templar. Most independent investigators into Masonic origins agree. If the Knights Templar are still here, does that mean the Cathars are? Why not? Who would argue surveillance and the iron fist of state power had gone away? And if three two groups are here, then so are the Kathars.

INTRODUCTION

The elaborate rituals of the ancient Mysteries and the simpler ceremonials of modern religious institutions had a common purpose. Both were designed to preserve, by means of symbolic dramas and processions, certain secret and holy processes, by the understanding of which man may more intelligently work out his salvation. The pages which follow will be devoted to an interpretation of some of these allegories according to the doctrine of the ancient seers and sages.

Every man has his own world. He dwells in the midst of his little universe as the lord and ruler of the constituent parts of himself. Sometimes he is a wise king, devoting his life to the needs of his subjects, but more often he is a tyrant, imposing many forms of injustice upon his vassals, either through ignorance of their needs or thoughtlessness concerning the ultimate disaster that he is bringing upon himself. Man's body is a living temple and he is a high priest, placed there to keep the House of the Lord in order. The temples of the ancients were patterned after the human form, as a study of the ground plan of either the sanctuary at Karnak or of St. Peter's Church at Rome will prove. *If the places of initiation were copies from the body of man, the rituals which were given in the various chambers and passageways symbolize certain processes taking place in the human body.*

Freemasonry is an excellent example of a doctrine intimating, by means of pageants and dramas, that the regeneration of the human soul is largely a physiologic and biologic problem. For this reason the Craft is divided into two parts, *speculative* and

operative Masonry. In the lodge room, Masonry is speculative, for the lodge is only a symbol of the human organism. Operative Masonry is a series of mystic activities taking place within the physical and spiritual organisms of those who have assumed its obligations.

The possession of the occult keys to human salvation through the knowledge of self is the goal for which the wise of all ages have labored. It was the hope of possessing these secret formulae that strengthened the candidates who struggled valiantly through the dangers and disappointments of the ancient initiations, sometimes actually giving their lives in the quest of truth. The initiations of the pagan Mysteries were not child's play. The Druid priests consummated their initiatory ritual by sending their candidates out upon the open sea in a small unseaworthy boat. Some never returned from this adventure, for if a squall happened to arise, the boat was immediately capsized.

In Central America at the time when the Mexican Indian Mysteries were in their glory, candidates seeking light were sent into gloomy caverns armed with a sword and were told that if for a second they relaxed their vigilance they would meet a horrible death. For hours the neophytes wandered, beset with strange beasts which seemed even more terrible than they actually were because of the darkness of the caverns. At last, wearied and almost discouraged, the wanderers found themselves on the threshold of a great lighted room cut from the natural rock. As they stood, not knowing which way to turn, there was a whirl of wings, a demoniacal cry, and a great figure with the wings of a bat and the body of a man passed swiftly just over the candidates' heads, swinging in its hands a great sword with razorlike edge. This creature was called the Bat God. Its duty was to attempt to decapitate the ones seeking entrance to the Mysteries. If the neophytes were off their guard or too exhausted to defend themselves, they died on the spot, but if they had presence of mind

enough to ward off this unexpected blow or jump aside in time, the Bat God vanished and the room was immediately filled with priests who welcomed the new initiates and instructed them in the secret wisdom. The identity of the Bat God has been the basis of many arguments, for while it appears many times in Mexican art and in the illuminated codices, no one knew who or what it actually was. It could fly over the heads of the neophytes and was the size of a man, but it lived in the depth of the earth and was never seen save during the Mysteries, although it occupied an important position in the Mexican Indian Pantheon.

The Mysteries of Mithras were also tests of real courage and perseverance. In the rites the priests, disguised as wild beasts and weird composite animals, attacked the aspirants who were passing through the gloomy caverns in which the initiations were given. Bloodshed was not unusual and many lost their lives striving for the Great Arcanum. When the Emperor Commodus of Rome was initiated into the Mithraic Cultus, being a remarkable swordsman, he defended himself so valiantly that he killed at least one of the priests and wounded several others. In the Sabazian Mysteries a poisonous serpent was placed upon the breast of the candidate, who failed in his initiation if he showed any sign of fear. These incidents from the rituals of the ancients give an inkling of the trials through which seekers after truth were forced to pass in order to reach the sanctuary of wisdom. But when we estimate the wisdom which they received if successful, we realize that it was worth the dangers, for from between the pillars of the gates of Mystery came forth Plato and Aristotle and hundreds of others, bearing true witness to the fact that in their day the *Word* was not lost.

The tortures of initiation and the severe mental and physical tests were intended to serve as a process for eliminating those unfit to be entrusted with the secret powers which the priests understood and communicated to the new initiates at the time

of their “raising.” Those who hung on crosses for nine hours until they became unconscious, as Apollonius of Tyana, initiated in the Great Pyramid, would never reveal the secret teachings through fear of bodily torture, and such as obeyed the order of Pythagoras that unless they remained silent, speaking to no man for five years, they could not enter his school, were not likely to reveal through thoughtless indiscretion any part of the Mystery which it was forbidden that the foolish should know. Because of the great care used in selecting and testing applicants and the remarkable ability to read human nature displayed by the priests, there never was one who betrayed the more important secrets of the temple. For that reason the *Word* remained lost to all save those who still complied with the requirements of the ancient Mysteries, for the law was, *to such as live the life the doctrine is revealed.*

It is unlawful to reveal to the uninitiated the key links to the chain of the Mysteries. It is permissible, however, without breach of confidence, to explain certain of the lesser secrets, a consideration of which will not only vindicate the integrity of the older hierophants but will also reveal part of the Divine mystery of man’s nature. The fact cannot be too strongly emphasized that, regardless of claims to the contrary, the operative Arcanum of the temple has never been revealed to the public. A few candidates who went but a little way along the path and who either became discouraged or were eliminated because of their failure to be honest with themselves, have attempted to expose what they knew, but the inherent weakness which prompted them to betray was recognized by their instructors. Therefore, they were given nothing which could actually supply a link to connect the outer teaching with the wisdom of the sanctuary. The world within man—not the world without, was the concern of the Mysteries of antiquity. Hence we are apt to look upon the priests of old as ignorant when compared with ourselves; but while the modern world is mastering the visible universe and

raising a colossal civilization, it is ignorant in the fullest sense of the word concerning the identity of that mysterious lodestone of power in the midst of every living thing, without which no investigation could be conducted and no cities built. Man is never truly wise until he has fathomed the riddle of his own existence, and the temples of initiation are the only repositories of that knowledge—a knowledge which will enable him to unfasten the Gordian knot of his own nature. Still, the great spiritual truths are not so deeply concealed as might be supposed. Most of them are exposed to view at all times, but are not recognized because of their concealment in symbol and allegory. When the human race learns to read the language of symbolism, a great veil will fall from the eyes of men. They shall then know truth and, more than that, they shall realize that from the beginning truth has been in the world unrecognized, save by a small but gradually increasing number appointed by the Lords of the Dawn as ministers to the needs of human creatures struggling to regain their consciousness of divinity.

The supreme Arcanum of the ancients was the key to the nature and power of fire. From the day when the hierarchies first descended upon the sacred island of the polar ice cap, it has been decreed that fire should be the supreme symbol of that mysterious, abstract divinity which moves in God, man, and Nature. The sun was looked upon as a great fire burning in the midst of the universe. In the burning orb of the sun dwelt the mysterious spirits controlling fire, and in honor of this great light, fires burned upon the altars of countless nations. The fire of Zeus burned upon the Palatine Hill, the fire of Vesta upon the altar of the home, and the fire of aspiration upon the altar of the soul.

PART I

FIRE THE UNIVERSAL DEITY

Since the earliest times man has venerated the element of fire above all others. Even the most untutored savage seems to recognize in the flame something closely resembling the volatile fire within his soul. The mysterious, vibrant, radiant energy of fire was beyond his ability to analyze, yet he felt its power. The fact that during thunderstorms fire descended in mighty bolts from heaven, felling trees and otherwise dealing destruction, caused the primogenial human being to recognize in its fury the anger of the gods. Later, when man personified the elements and created the multitudinous pantheons which now exist, he placed in the hand of his supreme Deity the torch, the thunderbolt, or the flaming sword, and upon his head a crown, its gilded points symbolizing the flaming rays of the sun. Mystics have traced sun worship back to early Lemuria and fire worship to the origin of the human race. In fact, the element of fire controls to a certain degree both the plant and animal kingdoms, and is the only element which can subjugate the metals. Either consciously or instinctively, every living thing honors the orb of day. The sunflower always faces the solar disc. The Atlanteans were sun worshippers, while the American Indians (remnants of the earlier Atlantean people) still regard the sun as the proxy of the Supreme Light-Giver. Many early peoples believed that the sun was reflector rather than source of light, as is evidenced by the fact that they often pictured the Sun-God as carrying on his arm a highly polished shield, on which was chased the solar face. This shield, catching the light of the Infinite One, reflected

it to all parts of the universe. During the year the sun passes through the twelve houses of the heavens, where, like Hercules, it performs twelve labors. The annual death and resurrection of the sun has been a favorite theme among unnumbered religions. The names of nearly all the great Gods and Saviors have been associated with either the element of fire, the solar light, or its correlate, the mystic and spiritual light invisible. Jupiter, Apollo, Hermes, Mithras, Bacchus, Dionysius, Odin, Buddha, Krishna, Zoroaster (Zarathustra), Fo-Hi, Lao, Vishnu, Shiva, Agni, Balder, Hiram Abiff, Moses, Samson, Jason, Vulcan, Uranus, Allah, Osiris, Ra, Bel, Baal Nebo, Serapis, and King Solomon are some of the numerous deities and supermen whose symbolic attributes are derived from the manifestations of the solar power and whose names indicate their relationship to light and fire.

According to the Greek Mysteries, the gods, gazing down from Mount Olympus, repented that they had made man, and never having given to the primitive creature an immortal spirit, they decided that no harm would be done if the quarreling, dissenting human ingrates were destroyed forever and the place where they had been left vacant for a nobler race. Discovering the plans of the gods, Prometheus, in whose heart was a great love for struggling humanity, determined to bring to mankind the divine fire, which would make the human race immortal so that not even the gods could destroy it. So Prometheus flew to the home of the Sun-God and, lighting a tiny reed with the solar fire, he carried it to the children of the earth, warning them that the fire should always be used for the glorification of the gods and the unselfish service of each other. But men were thoughtless and unkind. They took the divine fire brought them by Prometheus and used it to destroy one another. They burned the homes of their enemies and with the aid of heat they tempered steel, making swords and armor. They grew more selfish and more arrogant, defying the gods, but they could not be destroyed, for they possessed the sacred fire. For his disobedience, Prometheus

(like Lucifer) was chained, but the Greek hero was placed upon the brow of Mount Caucasus, there to remain with a vulture gnawing at his liver until a human being should master the sacred fire and become perfect. This prophecy was fulfilled by Hercules, who climbed Mount Caucasus, broke the fetters of Prometheus, and liberated the friend of man who had been in torture for so many ages. Hercules represents the initiate, who, as his name implies, partakes of the glory of light. Prometheus is the vehicle of solar energy. The divine fire which he brought to men is a mystic essence in their own natures, which they must redeem and regenerate if they would liberate their own crucified souls from the rock of their base physical natures.

According to occult philosophy, the sun in reality is a three-fold orb, two parts of its nature being invisible. The globe which we see is merely the lowest phase of the solar nature and is the body of the Demiurgus, or, as the Jews call him, *Jehovah*, and the Brahmins, *Shiva*. The sun being symbolized by an equilateral triangle, the three powers of the solar disc are said to be coequal. The three phases of the sun are called Will, Wisdom, and Action. Will is related to the principle of life, Wisdom to the principle of light, and Action, or Friction, to the principle of heat. By Will the heavens were created and the eternal life continued in supreme existence; by Action, friction, and striving, the earth was formed, and the physical universe molded by the Lords of the Fire Mist passed gradually from its molten condition into its present and more orderly state.

Thus Heaven and Nature were formed, but between these two was a great void, for God did not comprehend Nature and nature did not comprehend the Deity. The lack of intercourse between these two spheres of consciousness was similar to the condition of paralysis in which the consciousness realizes the condition of its body, but owing to the lack of nerve connection it is incapable of governing or directing the activities of the

body. Therefore, between life and action there came a mediator, which was called Light, or Intelligence. Light partakes of both life and action: it is the sphere of blending. Intelligence stood between heaven and earth, for through its medium man learned of the existence of his God and God began His ministration to the needs of men. While both life and action were simple substances, light was a compound, for the invisible part of light was of the nature of heaven and the visible part of the nature of earth. Down through the ages this light is said to have taken upon itself bodies. Although these bodies have borne witness to that light, the great spiritual truth behind the symbol of the embodied light is that in the soul of every creature within whose mind intelligence is born there dwells a spirit which assumes the nature of this intelligence. Every truly intelligent man and woman who is working to spread light in the world is *christ*-ened, or *Light*-ened, by the actual labor which he or she is seeking to perform. The fact that light (intelligence) partakes of the natures of both God and the earth is proved by the names given to the personifications of this light for at one time they are called the “Sons of Men” and at another time the “Sons of God.”

The initiate in the Mysteries was always instructed concerning the existence of three suns, the first of which—the vehicle for God the Father—enlightened and warmed his spirit; the second—the vehicle of God the Son—unfolded and broadened his mind; the third—the vehicle of God the Holy Spirit—nourished and strengthened his body. Light is not only a physical element, it is also a mental and spiritual element and in the temple the disciple is told to revere the invisible sun even more than the visible one; for every visible thing is only an effect of the invisible or causal, and as God is the Cause of All Causes He dwells in the invisible World of Causation. Apuleius, when initiated into the Mysteries, beheld the sun shining at midnight, for the chambers of the temple were brilliantly illuminated, although there were no lamps of any kind. The invisible sun is not lim-

ited by walls nor even the surface of the earth itself, for its rays being of higher vibratory rate than physical substance, its light passes unimpeded through all the planes of physical substance. To those capable of seeing the light of these spiritual orbs, there is no darkness, for they dwell in the presence of limitless light and at midnight see the sun shining under their feet.

By means of one of the lost arts of antiquity the priests of the temple were able to manufacture lamps which would burn for centuries without replenishment. The lamps resembled what is commonly called the “virgin lamps,” or those carried by the Vestal Virgins. They were a little smaller than a human hand and, according to available records, their wicks were made of asbestos. It has been maintained that these lamps have burned for a thousand years or more. One of them was found in the tomb of Christian Rosencreutz which had burned for 120 years without the supply of fuel being diminished. It is supposed that these lamps (which, incidentally, burned in hermetically sealed vaults without the aid of oxygen) were so constructed that the heat of the flame extracted from the atmosphere some substance which took the place of the original fuel as rapidly as the mysterious oil was consumed.

Hargrave Jennings has collected numerous references concerning the times when and places where these lamps have been found. In the majority of cases, however, they went out shortly after the vaults were opened or else were broken in some strange way, so the secret was not discovered. Concerning these lamps, Mr. Jennings writes: “The ancient Romans are said to have preserved lights in their sepulchers many ages by the *oiliness of gold* (here steps in the art of the Rosicrucians), resolved by hermetic methods into a liquid substance; and it is reported that at the dissolution of monasteries, in the time of Henry the Eighth, there was found a lamp which had then burned in a tomb from about three hundred years after Christ—nearly twelve hundred

years. Two of these subterranean lamps are to be seen in the Museum of Rarities at Leyden, in Holland. One of these lamps, in the Papacy of Paul the Third, was found in the Tomb of Tullia (so named), Cicero's daughter, which had been shut up fifteen hundred and fifty years."

Madame Blavatsky, in *Isis Unveiled*, gives a number of formulae for the making of ever-burning lamps, and states in a footnote that she herself saw one, made by a disciple of the hermetic arts, which had burned steadily without fuel for six years previous to the publication of her book.

The ever-burning lamp was of course a most appropriate symbol of the Eternal Fire in the Universe, and while chemistry has denied the possibility of manufacturing them, the fact that many have been made and seen over a period of thousands of years is a warning against dogmatizing. In Tibet, the Lama magicians have discovered a system of lighting rooms by means of a luminous ball of phosphorescent, greenish-white color, which increases in luminosity when ordered to do so by the priests, and after the departure of those who are in the chamber it gradually becomes fainter until only a spark remains, which burns continuously.

This apparent miracle is no more difficult to explain than another performed by the Tibetans. There is in Tibet a sacred tree which sheds its bark annually, and as the old bark peels off an inscription written in Tibetan characters is found upon the new bark underneath. These secrets of so-called savage and primitive peoples incessantly refute the ridicule with which Caucasians almost invariably view the culture of other races.

The Druid priests in Britain, recognizing the sun as the proxy of the Supreme Deity, used a ray of solar light to start their altar fires. They did this by concentrating the ray upon a specially cut crystal or aquamarine, set in the form of a magic brooch or buckle upon the front of the belt of the Arch-Druid.

This brooch was called the “Liath Meisicith” and was supposed to possess the power of drawing the divine fire of the gods down from heaven and concentrating its energies for the service of men. The buckle was, of course, a burning glass. Many of the nations of antiquity so revered the fire and light of the sun that they would not permit their altars to be lighted by any other means than the concentration of the sun’s rays through a burning-glass. In certain of the ancient temples, specially arranged lenses were placed in the ceiling at various angles so that each year at the vernal equinox the sun at high noon would send its rays through these glasses and light the altar fires which had been specially prepared for this occasion. The priests considered this process equivalent to the gods having actually lighted the fires themselves. In honor of Hu, the supreme Deity of the Druids, the people of Britain and Gaul celebrated an annual lighting of fires on what they termed Midsummer’s Day.

One of the reasons why the mistletoe was sacred to the Druids was because many of the priests believed that this peculiar parasitic plant fell to the earth in the form of lightening bolts and wherever a tree was struck by lightning the seed of the mistletoe was placed within its bark. The great length of time the mistletoe remained alive after being cut from the tree had much to do with the veneration showered upon it by the Druids. That this plant was also a powerful medium for the collection of the mysterious cosmic fire circulating through the ethers was discovered by the early priests, who valued the mistletoe because of its close connection with the mysterious astral light, which is in reality the astral body of the earth. Concerning this, Eliphas Levi writes in his *History of Magic*: “The Druids were priests and physicians, curing by magnetism and charging amulets with their fluidic influence. Their universal remedies were mistletoe and serpents’ eggs, because these substances attract the astral light in a special manner. The solemnity with which mistletoe was cut down drew upon this plant the popular confidence and ren-

dered it powerfully magnetic.* * The progress of magnetism will some day reveal to us the absorbing properties of mistletoe. We shall then understand the secret of those spongy growths which draw the unused virtues of plants and become surcharged with tinctures and savors. Mushrooms, truffles, gall on trees and the different kinds of mistletoe will be employed with understanding by a medical science, which will be new because it is old."

Certain plants, minerals, and animals have been held sacred among all nations of the earth because of their peculiar sensitiveness to the astral fire. The cat, sacred to the city of Bubastis in Egypt, is an example of a peculiarly magnetized animal. Anyone stroking the fur of a domestic cat in a dark room can see the electrical emanations in the form of green phosphorescent light. In the temples of Bast, sacred to the cat goddess, three-colored cats were viewed with unusual veneration, as was any member of the feline family whose two eyes were of different colors. Lodestone and radium in the mineral kingdom and various parasitic growths in the plant kingdom are strangely susceptible to the cosmic fire. The magicians of the Middle Ages surrounded themselves with certain animals, such as bats, cats, snakes, and monkeys, because they were able to borrow the power of the astral light from these creatures and appropriate it to their own uses. For this same reason the Egyptians and certain of the Greeks kept cats in the temples and serpents were always in evidence at the oracle of Delphi. The auric body of a snake is one of the most remarkable sights that the clairvoyant will ever see, and the secrets concealed within its aura demonstrate why the serpent is the symbol of wisdom among so many nations.

That Christianity has preserved (in part at least) the primitive fire worship of antiquity is evident in many of its symbols and rituals. The incense burner so often used in Christian churches is a pagan symbol relating to the regeneration of the human soul. The incense burner represents the body of man. The incense

within the burner, made from the extracted essences of various plants, represents the life forces within the body of man. The flaming spark burning in the midst of the incense is emblematic of the spiritual germ concealed in the midst of the material organism of man. This spiritual spark is an infinitesimal part of the divine flame, the Great Fire of the Universe, from Whose flaming heart the altar fires of all His creatures have been lighted. As the spark of life gradually consumes the incense, so the spiritual nature of man through the process of regeneration gradually consumes all the gross elements of the body, transmuting them into soul power —symbolized by the smoke. Although smoke is actually a dense and physical substance yet light enough to rise in clouds, so the soul is actually a physical element, but through purification and the fire of aspiration it has taken upon itself the nature of intangible atmosphere; though composed of the substance of earth, it becomes light enough to rise as a fragrant odor into the presence of Deity.

While some authorities have held that the form of the cross was derived from the ancient Egyptian instrument called the “Nilometer” and used for measuring the inundations of the Nile, others hold the opinion that the symbol had its origin in the two crossed sticks used by primitive peoples to generate fire by friction. The use of the bell towers and campaniles in the construction of the cathedrals of medieval Christianity, also the more familiar conventionalized church steeple, may be traced to the fire obelisks of Egypt, which were placed in front of the temples sacred to the superior deities. All pyramids are symbols of fire, while the heart used on valentines is merely an inverted candle flame. The Maypole had its origin in similar antiquity, where it is both a phallic symbol and an emblem of cosmic fire.

The prevailing custom of having churches face the East is, of course, further evidence of the survival of sun worship. Practically the only branch of the human race that does not

observe this rule is the Arabic. The Mohammedans face their mosques toward Mecca, but still have their appointed hours of prayer governed by the sun. The rose windows and ivy covered walls are survivals of pagandom, for ivy was sacred to Bacchus because of the shape of its leaf, and this plant was always allowed to trail over the walls of the temple sacred to the Greek solar deity. The golden ornaments upon the altars of Christian churches should remind the philosophical observer that gold is the sacred metal of the sun, because (according to alchemists) the sun ray itself crystallized in the earth, thus forming this precious metal—which, incidentally, is still being made. The candles so often seen adorning the altars, and most frequently appearing in an uneven number, are a reminder that the uneven numbers are sacred to the sun. When three candles are used, they symbolize the three aspects of the sun: sunrise, noon, and sunset, and are thus emblematic of the Trinity. When seven are used, they represent the planetary angels called by the Jews “Elohim”, whose numerical and Qabbalistic values are also seven. When the even numbers 12 or 24 appear, they represent the signs of the zodiac and the spirits of the hour of the day, called by the Persians the “Izeds.” When only one light is shown, it is the emblem of the Supreme Invisible father, Who is One, and the little red lamp ever burning over the altar is an offering to the Demiurgus—Jehovah, or the Lord Builder of Forms.

What oil is to the flame, blood is to the spirit of man. Therefore, oil is often used in anointing, for it is a fluid sacred to the solar power. Because oil contains the life of the sun, it is used in large quantities in far Northern lands where it is necessary to generate an abundance of body heat. Hence, the proclivity of the Eskimos for eating tallow candles and whale oil.

The actual word “Christ” is itself sufficient proof that fire and the worship of fire are the two most essential elements of the Christian faith. The rays of light pouring from the sun were

viewed by the ancients as the blood of the Celestial Lamb which at the vernal equinox died for the sin of the world and redeemed all humanity through its blood (rays).

The Mystery Schools of ancient Egypt taught that the blood was the vehicle of the consciousness. The spirit of man traveled through the bloodstream and therefore was not actually located in any one part of the compound organism. It moved through the body with the rapidity of thought, so that consciousness of self, cognition of externals, and sense perception could be localized in any part of the body by the exercise of the will power. The initiates view the blood as a mysterious liquid, somewhat gaseous in nature, which served as a medium for manifesting the fire of man's spiritual nature. This fire, coursing through the system, animated and vitalized all parts of the form, thus keeping the spiritual nature in touch with all of its physical extremities. The mystics looked upon the liver as the source of the heat and power in the blood. Hence it is significant that the spear of the centurion should pierce the liver of Christ and the vulture should be placed over the liver of Prometheus to torment him throughout the ages.

Occultism teaches that it is the presence of the liver which distinguishes the animal from the plant and that mystically certain small creatures having power of motion but no liver are actually plants in spiritual consciousness. The liver is under the control of the Planet Mars, which is the dynamo of this solar system and which sends a red animating ray to all the evolving creatures within this solar scheme. The philosophers taught that the planet Mars, under the control of its regent Samael, was the transmuted "Sin-Body" of the Solar Logos which originally had been the "Dweller on the Threshold" of the Divine Creature whose energies are now distributed through the fire of the sun. Samael, incidentally, was the fiery father of Cain, through whom a part of humanity has received the flame of aspiration and are

thus separate from the sons of Seth, whose father was Jehovah.

The Egyptians considered the juice of the grape to be more nearly like human blood than any other substance. In fact, they believed that the grape secured its life from the blood of the dead who had been buried in the earth. Concerning this subject, Plutarch writes as follows: "The priests of the Sun and Heliopolis never carry any wine into their temples, * * * and if they made use of it at any time in their Libations to the Gods, it was not because they looked upon it, as in its own nature acceptable to them; but they poured it upon their altars as the blood of those enemies who formerly had fought against them. For they look upon the vine to have first sprung out of the earth after it was fattened with the carcasses of those who fell in the wars against the Gods. And this, say they, is the reason why drinking its juice in great quantities makes men mad and beside themselves, filling them as it were with the blood of their own ancestors—" (*Isis and Osiris.*) The magicians of the Middle Ages were aware of the fact that they, by their occult powers, could control any person by first securing a small amount of his blood. If a glass of water be left over night in a room where someone is sleeping, the next morning the water will be impregnated to such an extent with the psychic radiations of that person that anyone understanding the *modus operandi* may find contained in the water a complete record of the life and character of the one who occupied the room. These records are transmitted and preserved in a subtile substance which the medieval transcendentalists called the *astral light*, an ever-present all-pervading fiery essence, which preserves intact the record of everything transpiring in any part of Nature.

The streaming rays pouring from the face of the sun have caused it to be associated with the lion, because of the shaggy mane of this king of beasts. The golden-haired Savior Gods of many nations subtly signify by their uncut locks the solar radia-

tions. The sun was the king of heaven, and earthly rulers desiring to advertise their terrestrial power delighted to be considered as "Little Suns," their vassals being viewed as planets basking in the glory of the central light. The highest of each kingdom in Nature was also considered symbolic of the sun. Hence the scarab beetle, being the most intelligent of all insects, the eagle the most aspiring of all birds, and the lion the strongest of all beasts, were considered fitly symbolic of the solar disc. Thus the Moguls chose the lion for their standard, while Caesar and Napoleon used the eagle to symbolize their dignity. The crowns of kings were originally bands of gold with radiating points to symbolize that they partook in part of the divine power vested in the sun. As time went on, the crown was conventionalized. Its surface was encrusted with jewels, a number of its points were changed, and its evident resemblance to the sun was lost.

The halo so often seen pictured around the heads of both Christian and pagan deities and saints is also emblematic of the sun power. According to the Mysteries, there comes a time in the spiritual unfoldment of man when the mysterious oil which has been moving slowly up the spinal column finally enters the third ventricle of the brain, where it becomes beautifully golden in color and radiates in all directions. This radiance is so great that it can-not be limited by the skull and it pours out from the head, especially from the back of the neck where the uppermost vertebra of the spine articulates with the condyles of the occipital bone. It is this light pouring out in a fan-shaped aura around the posterior part of the head that has given rise to the halos of saints and the nimbus so often used in religious art. This light signifies human regeneration and it forms part of the auric bodies of man.

These auras have greatly influenced the color and form of the garments used in religious ceremonials. The robe of blue and gold which Albert Pike speaks of and the vestments of the

different degrees in the hierarchies of all religious orders are symbolic of these invisible emanation forms which surround man, their colors changing with his every thought and feeling. By means of these auras the priests and philosophers of the ancient world chose those disciples who would do credit to their teachings. The "Robes of Glory" of the High Priest of Israel are all symbolic, as Josephus with his Oriental instruction has shrewdly noted. The plain white linen symbolizes the purified physical nature; the many-colored garments represent the astral body, the blue raiment the spiritual nature, and the violet the mind, for it is a color made up of two shades, one spiritual and the other material.

In the Egyptian Mysteries it was not uncommon to show the rays of the sun ending in human hands. One of the chairs recently found in the tomb of Tutankhamen showed a sun with its rays ending in human hands. Among the ancients the hand was the symbol of wisdom, because it was used to raise the fallen, and no man is so low in his estate as an ignorant man. The physical proclivities of the sun and its water-drawing power were used to symbolize a spiritual process in which the divine nature of man was raised, or illuminated, and drawn upward by the heat of the sun, these emanating rays spreading the threefold spiritual power as love, wisdom, and truth.

PART II

MAN THE GRAND SYMBOL OF THE MYSTERIES

Pythagoras said that the universal Creator had formed two things in His own image: The first was the cosmic system with its myriads of suns, moons, and planets; the second was man, in whose nature the entire universe existed in miniature. Long before the introduction of idolatry into religion, the early priests to facilitate their study of the natural sciences caused the statue of man to be placed in the sanctuary of their temples, using the human figure to symbolize the Divine Power in all its intricate manifestations. Thus the priests of antiquity accepted man as their text-books, and through the study of him learned to understand the greater and more abstruse mysteries of the celestial scheme of which they were a part. It is not improbable that this mysterious figure standing over the primitive altars was made in the nature of a mannequin and, like certain emblematic hands in the Mystery Schools, was covered with hieroglyphs either carved upon its surface or painted there-on with everlasting pigments. The statue may have opened, thus showing the relative positions of the organs, bones, muscles, nerves and other parts.

The present generation is prone to underestimate the knowledge of anatomy possessed by ancient races. Owing to destruction by time and vandalism, the available records do not adequately represent the learning of antiquity. Professor James H. Breasted, archeologist of the University of Chicago, recently stated that his investigations showed that the learned doctors

of Egypt during the 18th dynasty—that is, about seventeen centuries before Christ—had a medical knowledge comparable to that of the twentieth century. Professor Breasted is quoted as follows: “For instance in it (the Edwin Smith papyrus, an early scientific document) the word ‘brain’ appears for the first time recorded in human speech, and there is evidence that the Egyptians understood the localization of brain control of muscles—a knowledge that has only been rediscovered within the last generation.”

The knowledge which the Egyptian priest-physicians possessed concerning the functions of the several parts of the human body not only equaled that of many modern scientists, but as regards those functions and powers concerned with the spiritual nature of man and organs and centers through which the spiritual essences control the body, their knowledge exceeded that of the modern world.

During ages of research, much was contributed to fundamental principles of the early philosophers, and at the time Egypt reached the crowning glory of her civilization the manikin was a mass of intricate hieroglyphs and symbolic figures. Every part had its secret meaning. The measurements of this stone figure formed a basic standard by means of which it was possible to measure all parts of cosmos. It was a glorious composite emblem of all the knowledge possessed by the sages and hierophants of Isis, Osiris, and Serapis.

Then came the time of idolatry. The Mysteries decayed from within. The secret meanings were lost and none knew the identity of the mysterious man who stood over the altar. It was only remembered that the figure was a sacred and glorious symbol of the universal power. This figure came to be looked upon as a god, the one in whose image man was made. The secret knowledge of the purpose for which the manikin was constructed being lost, the priests worshipped the actual wood and stone, until

finally their lack of spiritual understanding brought the temple down in ruins about their heads and the statue crumbled with the civilization which had forgotten its meaning.

Today the great faith of the white race—Christianity—is served by a great number of honest, sincere, devout men and women. While devoted to their task, they are only partly efficient, because the majority of them are totally ignorant of the fact that so-called Biblical Christianity is an allegory concerning the true spirit of Christianity and of that esoteric doctrine evolved in the temple by the initiated minds of pagandom, and promulgated to serve the religious needs of the human race. Today this faith is served by millions and understood by only a handful, for while the Mystery temple no longer exists as an institution on the corners of the streets as it did in the ancient world, the Mystery School still exists as an invisible, philosophical structure. It admits into the knowledge of its secrets only a few, permitting the great mass to enter only the outer courtyard and make its offering upon the brazen altar. Christianity is essentially a Mystery School, but most of its adherents do not understand it well enough to realize that there are secrets concealed behind the parables and allegories which are an important part of its dogma.

Why should Christianity not be a Mystery School? Its founder was an initiate of the Essenian Mysteries. The Essenes were disciples of the great Pythagoras and were also connected with the Secret Schools of India. The Master Jesus was himself a hierophant, deeply versed in the ancient Arcanum. St. John by his writing proves himself to be acquainted with the ritualism of the Egyptian cult, and it is contended that St. Matthew was the teacher of Basilides, the immortal Egyptian sage, co-founder with Simon Magus of Gnosticism, the most elaborate system of Christian mysticism that has ever evolved from the main stem of St. Peter's church. During its early history in Rome,

Christianity was in constant contact with Mithraism, the fire philosophy of Persia, from which it borrowed no small part of its rituals and ceremonials.

If Christianity were looked upon less as a church and more as a Mystery School, the modern world would rapidly gain a clearer understanding of its tenets. Every priest of Christendom, every minister of the gospel should be an anatomist and a physiologist, a biologist and a chemist, a physician and an astronomer, a mathematician and a musician, and above all, a philosopher. By a philosopher we mean one who could study intelligently all these different lines of thought and discover the interrelationship existing between them, and use all the arts and sciences as methods by which to interpret the magnificent emblematic pageant and mystery drama of the Christian faith. If they were to intelligently consider the secrets handed down from the priests of pagan antiquity (whose stupendous genius soared far above the rutted prejudices of modern thought), they would make a number of important discoveries.

First of all, they would discover that in the present translation of both the Old and New Testaments are numerous mistakes, owing to the fact that the translators were not spiritually competent to interpret the secret mysteries of the Hebrew and Greek languages. They would find numberless contradictions caused by misunderstanding and would also discover that the so-called Apocryphal books (rejected as uninspired) contain some of the most important keys which have descended to us from antiquity.

They would learn that the Old Testament was not to be considered literally; that concealed between its lines were certain secret teachings without which the true meaning of the Hebrew writings cannot be discovered. They would no longer laugh at the pagans for their plurality of gods, for they would discover that they themselves, if faithful followers of their Scriptures, are

polytheists. The word “Elohim” as used in the early chapters of Genesis and translated “God,” is a masculine-feminine plural word meaning a number of gods who are androgynous, and not one Supreme Deity. They would realize that Adam was not a man, but a species—a race of creatures; they would also realize that the Garden of Eden was not located in Asia Minor.

Even if some men knew these things to be true, a great part of humanity would still reject them, because they would disagree with the accepted traditions, venerated not because they are true but because they have been accepted for generations. They would crown their discoveries by a realization that the Holy Land of all nations is the human body; that this is sacred earth, consecrated to the gods. They would realize that their own bodies were the Holy Sepulchres that have long been in the hands of the infidel, and they would realize that there is no infidel of any race half so heartless as the infidel which dwells in the heart of man himself; that there is no enemy to the faith like the lower nature of the individual; there is no Judas like selfishness, no betrayer like ignorance, no tyrant like pride, no Red Sea to be crossed like that which comprises the emotional nature of man, surging outward from the red blood-forming centers in the human liver.
